signifying 'faith in gods,' or 'way to gods.' It resembles, in some degree, the Greek and Roman mythology, although its followers have the general idea of a supreme being. *Pop.* Variously estimated from 15,000,000 to 50,000,000. *Lat.* between 24° 10′ and 50° N. *Lon.* between 128° and 151° E.; having, therefore, about 26° of latitude and 23° of longitude—Japan was discovered in 1542, by the navigator Mendez Pinto, who was driven by a storm upon its coasts; and Marco Polo is the first European traveller who, under the name of Cipango, speaks of the country. The Portuguese then attempted to open an intercourse with the inhabitants; but, after effecting a settlement at Nangasaki, they were expelled the country. They were succeeded by the Dutch, who obtained a factory on the island of Firando, and at first carried on a lucrative trade; but they were gradually laid under such restrictions, that their profits were much diminished, and they were forced to submit to the most degrading search from the public functionaries appointed to prevent any illicit intercourse with the inhabitants. The Russians, by forming establishments on the eastern coast of Asia, became neighbours to Japan, and the merchants of Okhotsk made several attempts to open an intercourse, but were generally unsuccessful. In the time of Elizabeth, an Englishman, being wrecked on the coast of Japan, was taken into favour with the emperor, when commercial relations were opened with England; but, in the reign of James I., all the ports were closed against Europeans, and the flag of the English was withdrawn. From that time till 1858, Japan was a *terra incognita* to the British; but, in that year, a commercial treaty between the two countries was signed at Jeddo, on the 26th of August. The principal stipulations in this document are—1. That there shall be perpetual peace and friendship between her British majesty and the Tycoon of Japan. 2. That her majesty may appoint a diplomatic agent to reside at Jeddo, and the Tycoon a diplomatic agent to reside in London, both of them respectively to have the right of travelling freely to any part of the empire of Japan, and to any part of Great Britain; also either power may appoint consuls or consular agents at any or all the ports of the other. 3. The ports of Hakodadi, Kanagawa, and Nagasaki, in Japan, are to be opened to British subjects on the 1st of July, 1859. Nee-e-gata, or, if Nee-e-gata be unsuitable, another convenient port on the west coast of Nipon, is to be opened on the 1st of January, 1860; Hiogo on the 1st of January, 1863; and British subjects may permanently reside in all the foregoing ports, may lease ground, purchase or erect dwellings and warehouses, but may not erect fortifications. Within a certain distance of the specified ports, they shall be free to go where they please, or, speaking generally, to an extent of 20 to 30 miles around either of them. 4. From the 1st of January, 1862, they will be allowed to reside at Jeddo, and from the 1st of January, 1863, at Osaca, for the purposes of trade. 5. British subjects will be allowed the free exercise of their religion, and, for this purpose, will have the right to erect suitable places of worship. 6. Munitions of war are to be the only exceptions to articles of import and export, which last, on the payment of an *ad-valorem* duty at the place of import, are to be subject to no further tax, excise, or transit duty. Such articles may be re-exported without the payment of any additional duty. 7. The Japanese are to prevent fraud or smuggling, and to receive the benefit of all penalties or confiscations. 8. All official communications on the part of the British to the Japanese authorities shall be written in English, though, for five years from the signature of the treaty, to facilitate the transaction of business, they are to be accompanied by a Dutch or Japanese version. The treaty may be revised on the application of either of the contracting parties, on giving one year's notice, after the 1st of July, 1872. 9. All the privileges, immunities, and advantages granted, or to be granted hereafter, by Japan to any other nation, are to be freely and equally participated by the British government and its subjects. 10. The treaty to be ratified within a year from the day of its signature. This treaty is written in Japanese and Dutch, and the Dutch version is considered the original. In 1860, an embassy was despatched from the Japanese court to visit the other nations of the world. Whilst we write

they are gaining their first notion of Western civilization by a residence in the United States.

JAPAN, SEA OF, that part of the N. Pacific inclosed on the E. and S. by the Japan islands, and on the W. by the countries of Corea and Manchooria. It communicates with the Pacific on the E., by the strait of La Perouse, or Matsamai, or Sangar, and S. by that of Corea. *Breadth* at its widest part, about 530 miles.

JAPARA, *ja-pa'-ra*, a place of great antiquity on the N. coast of the island of Java. It is the capital of a province of the same name, and has a mosque, a governor's house, a school, and a fort. *Pop.* Unascertained.—About three miles inland are the ruins of the Javanese town of Japara.—The PROVINCE is bounded on the S. by Samarang, and on the other three sides by the Java Sea. It forms a peninsula about 40 miles long and 25 broad. *Desc.* Hilly in the interior, but marshy and unhealthy towards the coast. *Pro.* Rice, coffee, and Turkish wheat. *Minerals.* Salt. *Pop.* 400,000.

JAPHET, *ja'-fet*, son of Noah, whose posterity peopled part of Asia and Europe. B. 2448 B.C.

JAPIX, or JAPICKS, Gysbert, *jap'-pix*, a Frisian poet, of whose touching and simple lyrics Dr. J. H. Halbertsma, the first of living Frisian writers, says, "For any one who has a feeling for true poetry, it is worth the trouble to learn Frisian, to enjoy the beauties of Gysbert Japix." He was the son of a poor carpenter of Bolsword, in Friesland, his family name being Holckama, which the poet changed into Japix, that word signifying 'son of Jacob,' which was his father's Christian name. Little is known of the poet's life, except that he was a schoolmaster and parish-clerk in Bolsword. His chief poems in manuscript are to be found in the Bodleian library. Boswell, on obtaining for Dr. John on a copy of Japix's poems, observed in a letter, "it is the only thing they have: it is amazing that they have no translation of the Bible, no treatises of devotion, nor even any of the ballads and story-books which are so agreeable to country people." The literature of Friesland does not, even at the present time, include a translation of the Holy Scriptures. the "Merchant of Venice" and "Julius Cæsar" have, however, been reproduced in the Frisian tongue. In 1829, Sir John Bowring translated and published some poems of Japix in the "Foreign Quarterly Review." A bust of the poet was set up by public subscription in St. Martin's church, at Bolsword, in 1823. B. at Bolsword, Friesland, 1603; D. at the same place, of the plague, 1666.

JAPURA, or CAQUETA, *ja-poo'-ra*, a large river of S. America, an affluent of the Amazon. It rises in the Andes of Ecuador, about 50 miles N.E. of Pasto, and, after a course of 1,000 miles, falls into the Amazon, in *lat.* 3° S., *lon.* 65° W. It has many affluents, both on the N. and S.; but its navigation is interrupted by a great cataract, which occurs in *lat.* 1° 10′ S.; *lon.* 72° 20′ W.

JAQUELOT, Isaac, *zhak'-lo*, a Protestant theologian, who left France at the revocation of the edict of Nantes, and resided first at Heidelberg and afterwards at Berlin, where he became preacher to the king, and pastor to the French Protestant congregation. He wrote extensively on theological subjects. The chief of his works are—"Dissertation on the Existence of God," "Treatise on the Veracity of the Inspired Books of the Old and New Testament." He had also many discussions with Bayle and Jurieu. B. at Vassy, 1647; D. at Berlin, 1708.

JARCHAS, *jar'-kas*, the most learned of the Indian Brahmins, and a great astronomer, according to Jerome. He is said to have given Apollonius Tyaneus seven magical rings called by the names of the planets.

JARCHI, Solomon Ben Isaac, *jar'-ki*, a celebrated rabbi, who spent thirty years in travelling through Europe and the eastern countries. He wrote "Commentaries on the Bible," which are highly esteemed by the Jews. B. at Troyes, France, 1040; D. 1105.

JARDANE, *jar-dal'-ne*, the slave of Omphale, was loved by Hercules, and bore him a son named Alceus, who became king of Lydia, and whose descendants formed the Lydian dynasty of the Heraclidæ.

JARDYN, Karel du, *yar'-dine*, a Dutch landscape-painter, who studied and worked in Italy, where he acquired a great reputation; and so greatly was he esteemed, that, though a Protestant, his remains were interred in consecrated ground. B. at Amsterdam, 1640; D. at Venice, 1678.

JARENSK, *ya-rensk'*, a town of Russia, and the capital of a circle of the same name, 560 miles from Vologda, *Manf.* Iron wares, and it has a trade in fur. *Pop.* Unascertained.—The CIRCLE is covered with lakes and marshes, and is by no means favourable to agricultural pursuits: it is, however, tolerably rich in iron. *Area*, 500 geographical square miles.

JARGEAU, *zhar'-zho*, a town of France, in the department Loiret, 10 miles from Orleans. In its neighbourhood good red wine is manufactured. *Pop.* 1,500. —In 1428 this place was taken, after a siege, by the earl of Salisbury.

JARLSBERG and LAURVIG, *yarls'-berg*, a district of Norway, in the province of Christiania, bounded on the N. and W. by the districts of Buskerud and Bradsberg, on the E. by the Gulf of Christiania, and on the S. by the Skager Rack. *Area*, 670 geographical square miles. *Desc.* Hilly and mountainous. Agriculture and cattle-rearing are the principal occupations of the inhabitants, although there is some iron-mining carried on. *Pop.* 63,000.

JARNAC, Guy de Chabot, lord of, *zhar'-nak*, a French gentleman of the chamber to Francis I. and Henry II., who fought a duel with a courtier named La Châtéigneraie, in 1547. His adversary defeated him; but, as he stood over him, Jarnac gave him a mortal thrust under the hough. The title *coups de Jarnac* has since been given to treacherous blows. D. about 1570.

JARNAC, a town of France, on the Charente, here crossed by a bridge, 16 miles from Angoulême. It is well built, and has a considerable trade in Cognac brandy, red wine, leather, and cattle. *Pop.* 2,400.—Here, in 1569, the Protestants under Coligny and the prince of Condé were defeated, when the latter was slain.

JAROSLAV, *yar'-os-lav*, a government in the interior of European Russia, inclosed by Vologda, Kostroma, Vladimir, Tver, and Novgorod. *Area*, 9,600 geographical square miles. *Desc.* Flat, although of an elevated surface, broken in some parts by low ridges or the high banks of its streams. *Pro.* Hemp and flax are the principal crops; but, in the S., apples and cherries are extensively grown. *Manf.* Woollen, linen, cotton, and silk goods; hosiery, gloves, leather, and wooden clogs. *Pop.* about 1,000,000. *Lat.* between 56° 15′ and 59° N. *Lon.* between 37° 35′ and 41° 30′ E.

JAROSLAV, a city of European Russia, the capital of the above government, on the Volga, 162 miles from Moscow. It consists almost entirely of wooden houses, but contains a large number of churches, built of stone. It has a richly-endowed seminary, is the see of an archbishop, the residence of a governor, and has several important courts and public offices. *Manf.* Linen, silk, and Russian leather; also paper, soap, tapes, brass, white lead, oil, and iron and copper wares. *Pop.* 30,000. This place was founded in 1025, by Jaroslav, the son of Vladimir the Great. Its prosperity may be ascribed to the introduction of the linen-manufacture by Peter the Great.

JAROSLAW, a town of Austria, in Galicia, on the San, 62 miles from Lemberg. It is situate in a beautiful district, and has a handsome cathedral and various schools. *Manf.* Woollen and linen cloth, yarn, rosoglio, and refined wax. *Pop.* 3,500.

JARRY, Nicholas, *zhar'-re*, an eminent French caligraphist, who was appointed "Master Penman" to Louis XIV., and executed for that king, and for the chief lords of his court, many works which rank as masterpieces of the art of caligraphy. His "Garland of Julia," which he executed in 1611 for the duke of Montausier, consisting of 30 folio leaves, was sold, in 1714, for the sum of £580. He also completed the "Hours of Notre Dame," in 120 leaves, in 1617. B. at Paris, about 1620.

JARS, Gabriel, *zhars*, a French mineralogist. He visited, with Duhamel, the mines of Saxony, Bohemia, Austria, Hungary, and Carinthia, also those of England, and other countries. In 1768 he became a member of the French Academy of Sciences. His brother published his observations, under the title of "Voyages Metallurgiques," in 3 vols. B. at Lyons, 1732; D. at Clermont, Auvergne, 1769.

JASLO, *yas'-lo*, a town of Austria, in Galicia, and the capital of a circle, 138 miles from Lemberg. It has an old castle and a general trade. *Pop.* 2,000.—The CIRCLE is covered with branches of the Carpathian Mountains, and belongs to the basin of the Vistula. It is well wooded, but, in general, the soil is barren of all agricultural produce. *Area*, 960 geographical square miles. *Pop.* 261,000.

JASMIN, James, *zhas'-mă*, a Gascon poet of great popularity in France. He was the son of a tailor, and was himself early put to the trade of a hairdresser, which, despite his successful career as a poet, he has ever since continued to practise. He has written and published several collections of songs and poems, all of them written in the *patois*, or rural dialect, spoken on the banks of the Garonne. Soon after the publication of his collection of poems, "Les Papillotes,"—"the Curl-papers," he was elected member of the academies of Agen and Bordeaux. Two of the most celebrated critics in France, Charles Nodier and Saint-Beuve, have written critical comments upon Jasmin's productions, which they state to be full of feeling and joyous grace. The poet usually recites his poems in his native town, and, having a fine voice and manner, the delivery of these lyrics, varying in dialect but little from those of the old troubadours of the 11th and 12th centuries, is said to produce very great effect upon his hearers. Jasmin has received many presents; Louis Philippe and the duke and duchess of Orleans bestowed upon him handsome gratuities; Toulouse gave him a golden laurel-wreath; Pau marked its sense of his worth by sending him a service of china. When he began to write poetry, all his family, he says, laughed at him; but, afterwards, his wife, selecting the best pen and paper for his use, would observe, "Every verse you write, James, puts a fresh tile on the roof." B. at Agen, 1798.

JASON, *jā'-son*, the celebrated chief of the Argonauts, was son of Æson, king of Iolchos, in Thessaly, at whose death the throne was usurped by Pelias, on account of the tender youth of Jason, the lawful successor. In order to remove him from his presence, Pelias intrusted his education to Chiron, the centaur. After he had made the most rapid progress in every branch of science, Jason left the centaur, and, by his advice, went to consult the oracle. He was ordered to go to Iolchos, his native country, whither he immediately repaired, and boldly demanded the kingdom of which he had been unjustly deprived. The courage and popularity of Jason intimidated Pelias, who, in order to remove this claimant to the crown, reminded the young and ambitious Jason that Æetes, king of Colchis, had severely treated and inhumanly murdered their common relation Phryxus (*see* PHRYXUS). He added that the expedition would be attended with much glory, and that, if Jason would undertake it, he would resign to him the crown when he returned victorious. Jason readily accepted a proposal which held out such prospects of military fame. His intended expedition was proclaimed throughout Greece, and the youngest and bravest Greeks assembled to share his dangers and his glory. They embarked on board a vessel called the Argo, whence they took the name of Argonauts, and, after many adventures, arrived at Colchis. Æetes promised to restore the golden fleece, which had been the cause of the death of Phryxus, and of the voyage of the Argonauts, provided Jason would submit to his conditions. He was to tame bulls, and kill a monstrous dragon that watched over the golden fleece, &c. Medea, the king's daughter, fell in love with Jason, and as she was acquainted with the arts of enchantment, she promised to deliver her lover from every danger if he would swear to her eternal fidelity. He agreed to her proposal, and received from Medea certain herbs, which would keep him safe. He then undertook the labours imposed on him, and in the presence of King Æetes and his people, performed them, astonishing every one by his boldness and success. After this celebrated achievement, Jason immediately set sail for Europe, with Medea; and Æetes, wishing to revenge himself on his daughter, sent his son Absyrtus to pursue the fugitives. Medea killed her brother, and strewed his limbs in her father's path, that she might the more easily escape, while he was collecting the mangled remains of his son. After a variety of adventures, the Argonauts returned to Thessaly, upon which Medea restored Æson to the vigour of youth, and persuaded the daughter of Pelias to cut her father's body into pieces, for a like purpose. The flesh, however, was consumed to the bones, and Pelias was never restored to life. This act drew down upon Medea the resentment of the populace, and she fled to Corinth, with her husband Jason, where they lived in perfect union during ten successive years. Jason's partiality for Glauce afterwards disturbed their matrimonial happiness, and Medea was divorced; but her husband's infidelity was deeply revenged by Medea, who destroyed her children in the presence of their father. Jason lived afterwards a melancholy life. Reposing one day by the side of his ship Argo, a beam fell upon his head, and he was crushed to death. Some assert that he afterwards returned to Colchis, seized the kingdom, and reigned in great security.

JASSY, or YASSY, *yas'-sy*, a town of European Turkey, in the province of Moldavia, the residence of the hospodar or prince, 162 miles from Odessa. This town in 1822 had 5,000 of its houses destroyed by fire, and now shows only the remains of its ancient greatness. The principal streets are paved with logs, and the houses are irregularly built. There are not above 200 of stone, and not more than 50 have a second floor. The ecclesiastical edifices, however, are very numerous, and many of them of importance. The environs are extremely agreeable and fertile; but the town is unhealthy, owing to the total neglect of cleanliness. It has various schools; but the system of tuition is very defective. *Manf.* Unimportant. The environs produce good wine; and a great deal of canvas is made in the town, and sent to Constantinople. The other articles of trade are flax, corn, hides, wool, wax, honey, and tallow. *Pop.* about 20,000.—Jassy has been frequently taken by the Russians, but always restored at the conclusion of peace. In 1723, it was nearly entirely consumed by fire, and in 1772 dreadfully ravaged by the plague. In 1822 it was burned by the Janissaries, from which disaster it has never recovered.

JASZBERENY, *e'-ass-be-re-ne*, a town of Hungary, on the Zagyva, 38 miles from Pesth. It has a handsome Roman Catholic church, a Franciscan monastery, a Protestant church, a town-house, and a register-office. It stands in a fertile district, the produce of which forms the greater portion of its trade. *Pop.* 19,000.—It is said that, in an old fortress of this place, Attila, king of the Huns, was buried in 458.

JATIVA, or XATIVA, *cha-te'-va*, a city of Spain, standing on the slope of a hill, crowned by an old castle, 36 miles from Valencia. The houses are, in general, substantial, and the streets clean and well paved. It has a collegiate church, with many curious monuments in it, a town-house, many fountains, schools, and a palace of the counts of Moncada. *Manf.* Linen and woollen fabrics, hats, leather, and soap. *Pop.* 14,000.

JAUCOURT, the chevalier Louis de, *zho'-koor*, member of the Royal Society of London, and of the academies of Berlin and Stockholm. He furnished the French Encyclopædia with articles on medicine and natural philosophy. He also compiled a "Universal Dictionary of Medicine," in 6 vols., but the MS. was lost on board a ship, which foundered on her passage to Amsterdam. B. at Paris, 1704; D. at Copenhagen, 1779.

JAUER, *you'-er*, a circle of Prussia, in Lower Silesia, bounded S. and W. by Bohemia and Lusatia. *Area*, 183 geographical square miles. *Desc.* Fertile, and affording excellent pasture. It is watered by the Neisse and the Jauer. *Pop.* 31,000.

JAUER, a fortified town of Silesia, and the capital of the above circle, stands on a river of the same name, 10 miles from Liegnitz. *Manf.* Woollen and cotton goods; and it has a trade in flax and yarn. *Pop.* 7,000.

JAUFFRET, Gaspard, *zhofe'-frai*, archbishop of Metz, and almoner of Napoleon I. He wrote a number of theological works. His brother was the author of several fairy-tales.

JAUJA, *cha'-oo-cha*, a town of Peru, in the department of Junin, 120 miles from Luna. Near it are some silver-mines; and it carries on a considerable trade in agricultural produce and cattle. *Pop.* 15,000.

—A RIVER of the same name, rising in Lake Chinchaycocha, and, after a course of 400 miles, joining the Apurimac near *lat.* 12° S., and *lon.* 73° 35′ W.

JAULT, Augustus Francis, *zholte*, a French physician, and professor of Syriac in the Royal College of Paris. He translated into French, among other works, "Sharp's Surgery," "Ockley's History of the Saracens," and "Floyer on Asthma." B. 1707; D. 1757.

JAUREGUY, Jacques, *cha'-oo-rai-goi*, a fanatic, who, in 1582, at the instigation of Spain, attempted to assassinate William prince of Orange. He struck the prince, but the blow was not mortal: he was taken and put to death. (*See* Motley's "Rise of the Dutch Republic.")

JAUREGUY Y AGUILAR, a Spanish poet and painter, who resided for a long time at Rome, forming himself upon the best Italian models in both poetry and painting. On his return to his native land, he published some excellent translations of Tasso, and from the Latin. His pictures were distinguished for their beautiful colour, for their fine gradations of light and shade, and for the beautiful flesh-tints in them. B. near Toledo, 1566; D. at Madrid, 1641.

JAURU, *cha'-oo-roo*, a river of Brazil, rising in the Sierra of its name, which forms a branch of the Cordillera of Parecis. It runs through the province of Matto-Grosso, and, after a course of 200 miles, falls into the Paraguay, in *lat.* 16° 2′ S.

JAVA, *ja'-va*, an island of the Indian Archipelago, and the chief seat of the Dutch power in the East. On the S. and W. its shores are washed by the Southern Indian Ocean; on the N.W. lies the island of Sumatra, from which it is separated by the Straits of Sunda; on the N. is Borneo; on the N.E. the Celebes; and on the E the islands of Bali and Madura, from the former of which it is separated by the Straits of Bali. *Ext.* 630 miles long, with a breadth varying between 35 and 126. *Area*, 49,730 square miles, being the largest of the Sunda group, with the exception of Sumatra and Borneo. *Bays and Harbours.* The bays are Wynecoops, Welcome, and Pepper, on the W.; and on the S. Pachitau, Penanjong, Pangol, Sambreng, Segara-Wedi, Dampar, and Gradjagan. The principal harbours are those of Batavia and Soerabaya on the N., and Ceuli Pujang on the S. *Capes.* Java Head, at the entrance of the Strait of Sunda from the Indian Ocean; Cape St. Nicholas, where the strait opens into the Sea of Java; Panko on the W., Sandang on the E, and East and South at the S.E. extremity of Java. *Desc.* The island is divided nearly in its whole length by a range of mountains running almost E. and W., and rising towards the centre to an elevation of from 10,000 to 12,000 feet above the level of the sea. In several hills of the great range of mountains, are the craters of volcanoes, which, at various periods, raged with fury, and poured forth torrents of lava. When active, they discharge vast quantities of sulphur and sulphureous vapour, and make the atmosphere intolerable. An extinct volcano near Batur, called Gueva Upas, or 'the vale of poison,' is held in the utmost horror by the natives. Every living thing that enters it drops down dead; and "in another," says Sir Charles Lyell, "the sulphurous exhalations have killed tigers, birds, and innumerable insects." The active volcanoes at present are about twelve, ranging in height between 4,000 and 12,600 feet. *Rivers.* The most considerable are the Solo, Kediri, Tjimanoek, and the Tjitazaem. There are a great many more; but they are generally so rapid, and so shallow, as to be unnavigable. On the bank or bar, before Batavia, the flood rises about six feet, and higher at spring tides. High and low water likewise occur only once in 24 hours. *Climate.* The year is divided into the dry and the rainy seasons; or into the east, which is called the good monsoon, and the west, or the bad monsoon. The heat is various. Along the sea-coast it is hot and sultry; at Batavia, from July to November, the thermometer generally stands, in the hottest part of the day, between 84° and 90°, which it rarely exceeds; and in the greatest degree of coolness in the morning, it is seldom lower than 76°. In some parts, particularly among the hills, and in many of the inland towns, it is often so cold as to make a fire desirable. *Zoology.* The domestic animals are buffaloes, and cattle of every description, including sheep, goats, and pigs. Game, however, does not abound so much as in other countries, though hares and rabbits are pretty common; and deer and antelopes are also plentiful. Horses are very numerous, and are of an active but small breed. Wild hogs and monkeys are found in all the jungles, and the forests abound with tigers. A species of black tiger, which is often found, is very ferocious. The rhinoceros is sometimes met with. Snakes of various kinds are numerous, as are lizards of all kinds, from the variable chameleon to the guana tribe. Scorpions and mosquitoes abound in the marshes. There are, besides, various other sorts of dangerous and disgusting insects. Of the great diversity among the feathered tribes we may remark the cassowary, the peacock, which forms the favourite food of the high; various kinds of thrushes, and a blackbird, found in the vicinity of the principal craters of volcanoes. White eagles have been seen here, and every kind of bird of prey is continually on the wing. The aquatic tribes are equally diversified, and the extensive fisheries along the coast are highly productive. At the mouths of the rivers, numbers of alligators, or caymans, are continually lurking for their prey; whilst, in the several bays, numerous sharks swim about the ships; and many animals, unknown in natural history, abound in the seas. *Pro.* The soil being of extraordinary richness, vegetation is both rapid and luxuriant. In the forests are found trees sufficiently lofty to be converted into the masts of large ships, whilst great quantities of teak supply the place of oak for building vessels, adapted to all purposes. Palms and cocoa-trees abound in great variety, and are distinguished by their luxuriant growth, sometimes reaching to the height of 150 feet Fruits of all kinds are also abundant, many of them of exquisite delicacy and flavour. The various kinds of plants, and the great quantity of herbs, indicate the exuberance of the soil; whilst flowers exhale their perfumes at all seasons of the year. Garden plants, such as endives, cauliflowers, beans, cabbages, pompions, melons, pataca or water-melons, yams, and potatoes, are produced in great variety. Maize, or Indian corn, is a favourite article of food with the natives, who eat it roasted; but wheat and barley are not grown in abundance. The staple produce of the island is rice. Great quantities of sugar are also made. Pepper is produced in perfection; also indigo of a very superior quality. Cotton is cultivated in almost every part of the island, and the coffee plantations are also extremely luxuriant. The soil is likewise favourable to the growth of tobacco, indigo, cochineal, cinnamon, nutmegs, pimento, and tea. *Manf.* Cotton, leather, and saddlery; also iron, brass, and tin wares. *Exp.* The principal articles are rice, sugar, coffee, pepper, indigo, teak timber, and planks, spices, which are brought from the Moluccas, tin from Banca, cotton, yarn, salt, and edible birds-nests. The amount is upwards of 5,000,000 tons annually. *Imp.* European articles of every description, chintzes and muslins, silks, hats, which are a favourite dress with the Chinese and native chieftains, boots and shoes, cabinet ware, fire-arms, gunpowder, shot, haberdashery, hosiery, and mathematical and musical instruments. The amount is between 2,000,000 and 3,000,000 tons annually. *Rel.* The professed religion of both the Malays and Javanese is Mahometanism, but mixed with many superstitions. *Inhabitants.* Chiefly composed of Javanese; the Malays also form a large class, and on the coasts and in the seaports there is a considerable proportion of Chinese. All, without distinction, are passionately fond of gaming and of cock-fighting. *Gov.* This consists of a governor-general, assisted by the Council of the Indies, and four members named by the king. A high court of appeal sits in Batavia, and natives are under their own tribunals. *Pop.* 8,500,000. *Lat.* between 5° 52′ and 8° 51′ S. *Lon.* between 105° 15′ and 114° 35′ E. For more than a century, the Dutch held unmolested possession of this large and fertile island. In 1811, however, an expedition was despatched from India, under Sir Samuel Auchmuty, and, after some severe actions with the Dutch troops, the island was conquered by the British. It was surrendered to the Dutch again, however, at the peace of Paris in 1814. The whole of the island, since 1830, has fallen under the dominion of the Dutch, and is rapidly increasing in population and prosperity. It is traversed from E. to W. by a great military road, 700 miles in extent, constructed by

General Daendels, a governor of the island before it was taken by the British.

JAVA SEA, that portion of the Eastern Sea which lies between the island of Java to the south, Sumatra to the west, the islands of Banca, Billiton, and Borneo to the north, and the island of Celebes to the east. The width of the sea between Java and Borneo is 250 miles, and it is crossed by two approved routes to China, the one by the Straits of Macassar, and the other by Pitt's Passage. *Lon.* between 107° and 115° E.

JAVIER, SAN, *chat-re-ar*, a town of Spain, in the province of Murcia, 4 miles to the E. of the Mediterranean. It is well built, has a church, and various schools. *Manf.* Oil and flour. *Pop.* 2,700.

JAWANA, DJAWANA, or JOANA, *ja-wat'-na*, a town in the island of Java, 30 miles from Japara. It is a residence of a governor, and has a fort. Its trade is considerable. *Pop.* 16,000.—The RIVER Jawana is one of the largest on the N. coast of JAVA, taking its rise in an inland lake, and falling into the Java Sea. It is navigable by prahus to its source.

JAWOROW, *ya-vor'-o*, a town of Austria, in Galicia, 25 miles from Lemberg. It has a parish church, extensive suburbs, and mineral springs. *Pop.* 1,900.—Here Catharine, wife of Peter the Great, and empress of Russia, was first seen by that potentate.

JAXT, *yaxt*, a river of Germany, rising 3 miles from Ellmangen, and, after a course of 10 miles, joining the Neckar 7 miles from Heilbronn.—ALSO a CIRCLE of Wurtemburg. *Area*, 1,600 square miles. *Pop.* 366,000.

JAY, Gui Michel LE, *zhai*, an advocate of the Parliament of Paris, who printed a polyglot Bible at his own expense, and thereby impoverished himself. Subsequently entering into holy orders, he was made dean of Vezelai. His polyglot Bible is elegantly printed in 10 vols., and has the Syriac and Arabic versions, which are not in that of Ximenes. D. 1675.

JAY, William, *jai*, a celebrated American abolitionist. He was designed for the profession of the law, but an affection of the eyes forced him to relinquish its study; whereupon he retired to his father's country seat at Bedford, Massachusetts. Since the year 1839 he has been one of the most active advocates of the abolition of slavery in the United States, and has written several works in aid of the same cause. These were collected and published at Boston in a complete form, with the title, "Miscellaneous Writings on Slavery," in 1851. He is one of the founders of the American Bible Society, and has served as president of the Peace Society. In 1832 he edited his father's correspondence, and wrote a biography of him, publishing the work under the title of "The Life and Correspondence of John Jay." B. 1789.

JAY, Rev. William, an eminent Independent preacher, was the son of a stonecutter, at which trade he himself worked during his early years; but, while still young, was placed in the Marlborough Academy, with a view of being educated for the ministry. At 15 years of age he commenced preaching, and, before he had reached his twentieth year, was appointed minister of Argyle Chapel, Bath, where, for 62 years, he officiated. On completing the fiftieth year of his ministerial labours, in 1841, he was presented with a service of plate, and a purse containing £650, at a public meeting in Bath. His volumes of sermons met with considerable success, and passed through several editions. He wrote also an essay on Marriage, "Lectures on Female Scripture Characters," and an Autobiography, which was published in 1854. All his works have been issued in a complete form, in 12 volumes, 8vo. B. at Tisbury, Wilts, 1769; D. 1853.

JAYADEVA, *jai-a-de'-va*, a Hindoo poet, of whose life or pursuits nothing certain is known. Only one of his poems is extant, this being the "Gita Govinda; or, Poem in Honour of Govinda," one of the names of the Hindoo god Krishna. It is an amatory and voluptuous lyric, and Sir William Jones, Colebrooke, and other commentators, assert that it is only to be interpreted in an allegorical sense. Sir William Jones published a translation of the "Gita Govinda," in the 3rd vol. of the "Asiatic Researches."

JAZYGIA, *yaz-ij'-e-a*, a district of Hungary, surrounded by the counties of Pesth and Heves. *Area*, 280 geographical square miles. It is watered by several rivers, and produces wine, grain, and tobacco. As the pastures are extensive, numerous herds of horses are reared. *Pop.* 50,000.

JEACOCKE, Caleb, *je'-kok*, a baker in High-street, St. Giles's, London, who for many years distinguished himself as president of a disputing society held at the Robin Hood, in Butcher Row, Temple Bar. He had considerable powers as a speaker, and is said to have often opposed with success the celebrated Burke, and other persons, who afterwards distinguished themselves at the bar and in the senate. Mr. Jeacocke published, in 1765, a pamphlet entitled, "A Vindication of the Moral Character of the Apostle Paul from the Charge of Insincerity and Hypocrisy brought against it by Lord Bolingbroke, Dr. Middleton, and others." He became a director of the Hand-in-Hand fire-office, and was enabled to retire from his business on a small fortune. D. 1786.

JEAN D'ANGELY, ST., *zha danzh-le*, a town of France, in the department of the Lower Charente, on the Boutonne, 35 miles from Rochelle. It is irregularly built, and has an abbey, several churches, a communal college, theatre, market-hall, and an hospital. It is also a seat of a court of first resort and commerce. *Manf.* Wine, brandy; and it has a trade in timber and various kinds of seeds. *Pop.* 5,580.—JEAN is the prefix to several other continental towns with small populations.

JEAN DE LUZ, ST., *ze(r)-looz*, a town of France, in the department of the Lower Pyrenees, 11 miles from Bayonne. It is defended by two forts, and has a trade, consisting chiefly of fish. *Pop.* 2,300.

JEAN D'ILED DE PORT, ST., *je'-ai de(r) por*, a town of France, in the department of the Lower Pyrenees, on the Nive, on the Spanish frontier, 23 miles from Bayonne. It has a citadel, commanding three passes which lead from France into Spain. *Pop.* 1,800. Near this place is the pass of Roncevaux, where, in 778, the army of Charlemagne was defeated, and Roland, the distinguished Paladin, mortally wounded.

JEANNIN, Peter, *zhan'-an*, a French statesman, who was educated for the law. He became president of the parliament of Paris. Henry IV. made him member of his council, and kept him at court, where no great enterprise was undertaken without consulting him. His memoirs were published in 1659. B. at Autun, 1540; D. 1622.

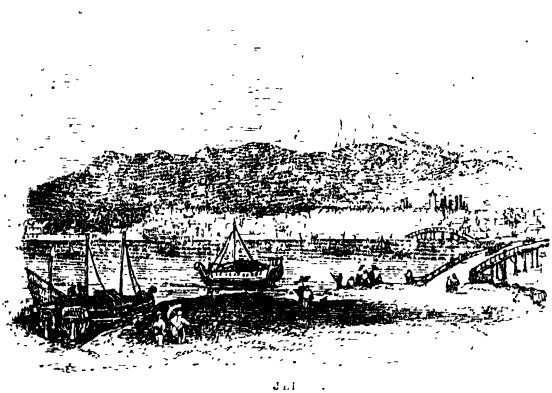
JEBA, or GEBA, *je'-ba*, a river of Guinea, W. Africa. Its source is unknown; but its mouth is in *lat.* 11° 40' N., and *lon* 15° 14' W.—Here it is 15 miles across.

JEBAIL, GEBAIL, or JEBEIL, *je-bail'*, a maritime town of Syria, 20 miles from Tripoli. It contains a castle and many relics of antiquity, some of them extremely ancient. *Pop.* Unascertained. *Lat.* 34° 12' N. *Lon.* 35° 35' E.

JEBB, Samuel, *jeb*, an English physician. He was educated at Cambridge, and subsequently settled as physician at Stratford, in Middlesex, where he resided till a short time before his death. He edited an edition of Roger Bacon's works, and of several other learned authors. B. at Nottingham, 1690; D. 1772.

JEBB, John, son of the above. He received his academical education at Peterhouse, Cambridge, where he obtained a fellowship. He was in orders, but quitted his church preferments on turning Socinian. He then studied physic, in which faculty he took his doctor's degree, and acquired considerable reputation. B. in London, 1736; D. 1786.

JEBUSITES, *jeb'-u-sites*, one of the chief tribes of the land of Canaan; they dwelt in the mountains to the west of the Dead Sea, and to the north of the Hittites. Their capital was Jebus, afterwards called Salem; and, according to some, was the site, at a later period, of the city of Jerusalem



JECONIAH, *jek-o-ni'-a*, king of Judah, began his reign at the age of 18, about 597 B.C. He sat on the throne, however, only a short time, being carried prisoner to Babylon by Nebuchadnezzar, when the latter took Jerusalem. He remained in captivity till the year 560 B.C., and was then placed by Evil-Merodach among the princes of his court. Zedekiah, his brother, succeeded him.

JED, *jed*, a river of Scotland, in Roxburghshire, falling into the Teviot, about 2 miles below Jedburgh.

JEDBURGH, *jed'-bru(r)*, a parish and royal burgh of

Scotland, of great antiquity, and the chief town of Roxburghshire, on the Jed, 42 miles from Edinburgh. It consists of several principal streets, which cross each other at right angles, and terminate in a square or market-place. Jedburgh was one of the most noted border towns; and after the union of the two kingdoms, it became the centre of an extensive contraband trade, which being checked by the vigilance of the English coast, the population and industry of the town began rapidly to decline. There are no remains of the castle of Jedburgh. The abbey, a large and magnificent fabric, in the form of a cross, was founded by David I.; and part of it has been fitted up for a parish church. There are, besides, several dissenting meeting-houses, Presbyterian and Free churches, an Episcopalian chapel, public libraries, various schools, a dispensary, and friendly and charitable institutions. There are also county and town-halls. *Pop.* about 5,000.

JEDO, Jeddo, or YEDDO, *jed'-do*, a city of Japan, the capital of the empire, situate at the head of a

Jedi

great bay of the same name, and at the mouth of a large river. It contains many splendid palaces of the nobles and princes; all these are eclipsed, however, by the palace of the emperor, which may, more properly, be called a great walled city. The appearance of the place is thus described by a writer connected with the mission which, in 1858, effected the treaty of commerce with Japan. "The port of Jeddo is at Kanagawa, about 17 miles down the gulf. Great objection has always been made to men-of-war coming further up; indeed, Kanagawa itself has only been open a few months. The Japanese said great obstacles existed to ships coming to Jeddo. We, however, put it to the test, and, without the least difficulty, ran right up, and are anchored within their own men-of-war, which we did not know were here, and within a mile of the forts of Jeddo. The town stretches for miles round the bay, and, without exception, is one of the finest cities in the world; streets broad and good; and the castle, which includes nearly the whole centre of the town, built on a slight eminence. There are three walls or inclosures round this quarter. Within the inner, the Tycoon emperor and heir-apparent live. The houses of the princes and nobles are palaces, and you may imagine the size when some contain 10,000 followers. They are built in regular order, forming wide streets some forty yards broad, kept in perfect order. An immense courtyard, with trees and gardens, forms the centre of each inclosure, in the midst of which is the house of the owner: the houses containing the followers, servants, stables, &c., form this large inclosure. They are built of one uniform shape. The gateways leading to the courtyard are exceedingly handsome, of massive wood-work, ornamented with lacquer and other devices. From the road that leads by the moat to the second wall, is one of the finest views I ever recollect seeing—on one side the Gulf

of Jeddo, with the high hills rising beyond, while on the other is a portion of the great city of Jeddo, with its trees and gardens, picturesque temples, and densely-crowded streets, extending as far as the eye can reach towards the interior; then there is a view of the trees and green fields in the distance, far away beyond a thickly-built suburb; but the most striking view of all is that close by, the well-kept green banks of the second defence, rising some 70 feet from the broad moat below, with grand old cedars, over a hundred years of age, growing from its sides. The fine timber, the water-lilies in the moat, the grandeur, good order, and completeness of everything, equal, and in some ways far surpass, anything I have ever seen in Europe, or any part of the world." *Pop.* Estimated at between 200,000 and 300,000. *Lat.* 35° 40′ N. *Lon.* 139° 40′ E. (*See* JAPAN.)

JEJEEBHOY, Sir Jamsetjee, Bart., *je'-jeeb-hoi*, an eminent Parsee merchant of Bombay. He was born of humble stock, and had to make his own way in the world: by the time he was 16 he was fully prepared to do so. That way was at first rough and hard; but, undiscouraged, he went right on. The early life of the wealthy and honoured baronet was strongly in contrast with the calm which enveloped his later years. He made five mercantile voyages to China: in one of these, the ship in which he sailed formed one of the fleet which, under the command of Sir Nathaniel Dance, beat off a French squadron under Admiral Linois. In another voyage, the vessel on board which were himself and his fortune, was captured by the French, and he was carried to the Cape of Good Hope, whence, with the loss of all his property, and, after enduring many privations, he found his way in a Danish vessel to Calcutta. Fortune smiled on him afterwards, however; and as his wealth increased, the tendency to share it with the needy, or to spend it for the benefit of the public, began to develop itself. In 1822 he released all the poor debtors confined by the Court of Requests from the Bombay gaol, by the simple process of paying their debts. From that time to the day of his death, the stream of his beneficence scarcely ceased to flow. He dispensed in philanthropic services the sum of £300,000; his charity not being limited by the bounds of the community to which the munificent donor belonged. Parsee and Christian, Hindoo and Mussulman,—indeed, people of all classes and creeds, alike shared in his beneficence, the largest outlay being for the poor and for the public. For his great public services, no less than for his philanthropic efforts, he was created a baronet. B. at Bombay, 1783; D. same place, 1859.

JEFFERIES, or JEFFREYS, George Lord, *jef'-freys*, an English judge, notorious for his cruelty and injustice. He was educated at Westminster school, after which he removed to the Inner Temple, where he studied the law with great application. By attaching himself to the duke of York, he obtained the appointment of Welsh judge, the honour of knighthood, and the chief-justiceship of Chester. In 1683 he was appointed chief-justice of the King's Bench, and, in 1685, lord chancellor. His cruelties on the western circuit towards the deluded followers of the duke of Monmouth were excessive; yet they gave great satisfaction to James II., who, with heartless mirth, called this "Jefferies's campaign." He supported all the arbitrary acts of the court, and rendered himself so obnoxious to the people, that, when James abdicated the throne, he attempted to leave the kingdom in the disguise of a sailor, but was recognized while drinking in a cellar in Wapping. Perceiving himself discovered, he feigned a cough, and turned to the wall with his pot of beer in his hand; but information of his presence being communicated to the mob, they

rushed in, and carried him before the lord mayor, who sent him to the lords of council, by whom he was

JEFFERIES.

committed to the Tower, where he remained for the rest of his life. B. at Acton, Denbighshire, about 1640; D. in the Tower, 1689.

JEFFERSON, *jef'-fer-son*, a city of the United States, the capital of Missouri, nearly 1,000 miles from Washington. It has a state-house, penitentiary, and various schools. *Pop.* 1,500.

JEFFERSON, Thomas, third president of the United States, after receiving his education at the college of William and Mary, at Williamsburg, which, at the end of the 18th century, was the capital of Virginia, he studied the law under Mr. Wythe, a celebrated barrister of that day, and, at the age of 24, began to practise at the General Court in 1767. In the stirring events that preceded the American revolution, he took a foremost and distinguished part, though he was never engaged in any military operations. He was governor of Virginia between 1779-81; three years afterwards, he was appointed minister to France, and remained at that post during five years. Shortly after his return to America, in 1789, he became secretary of state under the presidency of General Washington. He had lived some time in retirement previous to the year 1796, when he was elected vice-president of the United States. In 1801 he became president, and, after being elected a second time, he retired, in 1809, to his estate near Monticello, in Virginia. Mr. Jefferson was author of a book called "Notes on Virginia." B. at Shadwell, Virginia, 1743; D. in Virginia, 1826.

JEFFERY, John, *jef'-fre*, an English divine, educated at Catharine Hall, Cambridge. Archbishop Tillotson appointed him archdeacon of Norwich, in 1694. He published a volume of sermons, and was the editor of "Christian Morals," a posthumous work, by Sir Thomas Brown, and the sermons of Dr. Whichcote. B. at Ipswich, 1617; D. 1720.

JEFFERYS, George, *jef'-frys*, a dramatic and miscellaneous writer, who was educated at Westminster school and Trinity College, Cambridge, where he obtained a fellowship. He afterwards studied the law, and was called to the bar, but never practised. His Miscellanies in prose and verse contain, among other pieces, the tragedies of "Edwin" and "Meropo." B. at Waldron, Northamptonshire, 1678; D. 1755.

JEFFREY, Francis, *jef'-fre*, by courtesy Lord Jeffrey, a distinguished Scotch judge, essayist, and one of the founders of the "Edinburgh Review." He was the son of Mr. George Jeffrey, a depute clerk of the Court of Session, and, at eight years of age, was sent to the High School of Edinburgh, where he was remembered by a fellow-pupil as "a little, clever, anxious boy, always near the top of his class, and who never lost a place without shedding tears." At 14 years of age, he was sent to the university of Glasgow, where, in the debating societies of the college, he soon distinguished himself above his fellow-students, by his fluent speech and severe criticisms on the efforts of his opponents. While at Glasgow, he formed a habit of making notes and abstracts from books, and writing essays, which had its advantage in his after-career. This practice was continued when he returned to Edinburgh, in 1789; and his biographer, Lord Cockburn, enumerates as many as thirty-one essays on literary and metaphysical subjects as the work of some four or five months. At this period he was a pupil in the law classes of the Edinburgh university, and attended them till 1791, when he went to Queen's College, Oxford, to finish his studies. He left the English college in nine months; and very pleased to do so he appears to have been; for, "except playing and drinking," he wrote, "I see nothing that it is possible to acquire in this place." On his return to his native city, his friends perceived a great change in him: instead of speaking his thoughts in his broad native Doric, he had a way of uttering a sentence in a high mincing tone. Lord Holland said afterwards, "Jeffrey had lost his broad Scotch at Oxford; but he had only gained the narrow English." His great intellectual powers, however, and kindliness of heart, soon caused his friends to overlook what they had at first regarded as a piece of affectation. His father seems to have been, for some time, undecided whether to make a lawyer or merchant of his son. The former was eventually resolved on, and, in 1792, he was once more sent to the law classes of the Edinburgh university. In 1792 he became a member of the Speculative Society, and there formed the acquaintance of Scott, Brougham, Horner, and other young men who afterwards grew to be distinguished. In 1794 he was called to the Scottish bar; but, being unknown, and, above all, a Whig, there was small chance of his obtaining briefs. About this time he began writing for the "Monthly Review" and other magazines. His income in 1801 was about £100 per annum: he, however, entered into matrimonial bonds, and took an upper story in a house in Edinburgh, where, one evening, Sidney Smith suggested to Jeffrey and the other guests, Horner and Brougham, the idea of starting a new journal, to be called the "Edinburgh Review." The first number appeared in October, 1802, under the editorship of Sidney Smith; but, after the second number, Jeffrey was placed at its head. During the subsequent 26 years, Jeffrey continued to edit and contribute to this celebrated review. It will be unnecessary to enter here into the many political and literary controversies which arose out of the criticisms of Jeffrey and his colleagues in this organ. His contributions were unquestionably dictated by honesty; but many of them were eminently unjust,—to Wordsworth and his kindred authors most especially. Throughout Jeffrey's editorship, he was the main support of the journal; but although his contributions, like those of Macaulay, Sidney Smith, Carlyle, and others, have been published, in four volumes, they have not obtained an equal success with those authors' productions. In the interval he had won for himself a place almost at the head of the Scottish bar. Once, when making a speech for the prosecution in a libel case, the defendant, pulling out his watch, said, Jeffrey "had actually spoken the English language twice ower in three hours." This was in allusion to his rapid and fluent style of eloquence. His income had increased with his practice, and on the death of his first wife, in 1805, he was in easy circumstances. In 1806 he visited London, and, while there, fought the famous duel with Moore at Chalk Farm, which Byron, in his "English Bards and Scotch Reviewers," has thus immortalized:—

"Can none remember that eventful day,
That ever glorious, almost fatal fray,
When Little's leadless pistol met his eye,
And Bow Street myrmidons stood laughing by?"

Though this meeting had arisen out of Jeffrey's treatment, in his review, of some of Moore's early poems, both the criticism and the duel were afterwards for-

gotten, and the poet and essayist became the best of friends. In 1813 he went to America to marry Miss Charlotte Wilks, an American lady, but the grand-niece of the celebrated English politician Wilks. (*See* WILKS.) Soon after his return, he took up his residence at Craigcrook, a delightful little estate at the foot of the Corstorphine Hills, some two miles from Edinburgh. Here, till his death, he gave hospitable reception to every visitor to the Modern Athens who was distinguished in literature, in art, and in science. In 1821 he was chosen lord rector of the university of Glasgow, and, eight years afterwards, dean of the Faculty of Advocates; upon which he resigned the editorship of the "Edinburgh Review." He was returned to parliament for the Perth, Forfar, and Dundee burghs in 1830; but, losing his seat the next year, he was, through the influence of Earl Fitzwilliam, chosen as the representative of the borough of Malton. He sat for this borough, and for his native city, till 1834, when he was made a Scotch judge, with the courtesy title of lord. He sat upon the Scottish bench until a short time before his death. The biography of Jeffrey, with his correspondence, was published by Lord Cockburn, in 1852. B. at Edinburgh, 1773; D. at Craigcrook, 1850.

JEFREMOV, *yef'-re-mof*, a town of European Russia, 75 miles from Tula. It is no more than a collection of thatched houses, although it is the capital of a circle of the same name. *Pop.* 3,000. The CIRCLE is unfertile, and contains a population of 130,000.

JEGORIEVSK, *ye-gor'-e-evsk*, a town of Russia, and the capital of a circle, 66 miles from Riazan. *Pop.* 500. The CIRCLE is covered with marshes and forests, and is generally unfertile. *Pop.* Unascertained.

JEHOAHAZ, the Elder, *je-o'-a-haz*, succeeded to the throne of Israel on the death of his father Jehu, B.C. 867. Like him, he fell into idolatry. He afterwards repented; but had fallen so low, that he had but "fifty horsemen and ten chariots, and ten thousand footmen; for the king of Syria had destroyed them, and had made them like the dust by thrashing." D. 850 B.C.

JEHOAHAZ, the Younger, king of Judah, was son of Josiah, and usurped the throne, to the prejudice of his elder brother Eliakim, afterwards named Jehoiakim, at the age of 23. He was afterwards taken prisoner by Pharaoh-Necho, and sent in fetters to Egypt, after having reigned only three months.

JEHOIAKIM, *je-hoi'-a-kim*, elder brother of the above, succeeded him, 608 B.C., having paid a hundred talents of silver and a talent of gold to Necho as tribute. Notwithstanding the warnings of the prophet Jeremiah, he relapsed into idolatry. Nebuchadnezzar invaded Jerusalem during his reign; but although he did not dethrone Jehoiakim, he took away the golden ornaments of the temple, and carried off to Babylon as hostages a number of persons; among whom was the future prophet Daniel. After a reign of eleven years, he is supposed to have died; and, according to the prophecy of Jeremiah, to have been buried "with the burial of an ass, drawn and cast forth beyond the gates of Jerusalem." He was succeeded by Jehoiakim or Jeconiah. (*See* JECONIAH.)

JEHORAM, or JORAM, *je-ho'-ram*, king of Judah, succeeded his father Jehoshaphat, 904 B.C., at the age of 32. He married Athaliah, daughter of Ahab, and was an idolater and tyrant. The Edomites revolted against him, and he was also attacked by the Philistines. D. of a painful and incurable disease, 896 B.C.

JEHORAM, or JORAM, king of Israel, succeeded his brother Ahaziah, 907 B.C. He defeated the Moabites; but the Assyrians, under Benhadad, besieged him so closely in Samaria, that the people were reduced to the last stage of famine. In this extremity he and his subjects were saved by a miracle, as foretold by the prophet Elisha. He subsequently fell into idolatry and cruelty, was wounded in fighting against Hazael, king of Syria, and slain by his own general, Jehu, 895 B.C.

JEHOSHAPHAT, *je-hosh'-a-fat*, king of Judah, ascended the throne at the age of 35, in succession to his father Asa, 929 B.C. During the early part of his reign his people prospered, for he was a pious prince; but having entered into an alliance with Ahab, he suffered many disasters, which were at length averted by prayer and fasting; and henceforth his reign was peaceful and happy. After a reign of 25 years he died, 904 B.C., leaving his crown to his son Jehoram.

JEHOSHAPHAT, THE VALLEY OF, a deep and narrow glen, lying along the E. side of the walls of Jerusalem, in Palestine. On the one side is Mount Moriah, and on the other the Mount of Olives. The brook Kidron runs through it; but, except during the fall of heavy rains, is dry throughout the year.

JEHOVAH, *je-ho'-va*, the name by which God was known to the Hebrews, who at the present time never venture to pronounce it, so highly is the symbol respected.

JEHU, *je'-hu*, tenth king of Israel, had been commander in the army of Jehoram, his king, whom he shot with an arrow, and put to death seventy of Ahab's children, and the priests of Baal in the temple of their idol. Afterwards relapsing into idolatry, he was punished by the delivery of his kingdom to Hazael, king of Syria. D. 856 B.C.

JEKATERINBURG. (*See* EKATERINBURG.)

JEKATERINODAR. (*See* EKATERINODAR.)

JEKATERINOGRAD. (*See* EKATERINOGRAD.)

JEKATERINOSLAV. (*See* EKATERINOSLAV.)

JEKIL-IRMAK, or YESHIL-IRMAK, *yesh'-il ir'-mak*, a river of Asiatic Turkey, rising in *lat.* 39° 50' N., *lon.* 37° 40' E., and, after a course of 200 miles, falling into the Black Sea on the E. side of the Bay of Samsoon.

JEKYL, Sir Joseph, *je'-kil*, an English lawyer and patriot, who distinguished himself in the reign of William III. by his attachment to the Whigs, and was one of the managers on the trial of Dr. Sacheverel. At the accession of George I. he was knighted, made master of the Rolls, and a privy counsellor. He successfully maintained the independence of his office against Lord-Chancellor King, in a pamphlet entitled "The Judicial Authority of the Master of the Rolls stated and vindicated." B. in Northamptonshire; D. 1738.

JEKYL, Thomas, D.D., brother of the above, was educated at Trinity College, Cambridge, and became vicar of Rowd, in Wiltshire, lecturer at New'ind, in Gloucestershire, and minister of St. Margaret's chapel, Westminster. He wrote and published a number of sermons, all very popular in their day, and an Exposition of the Church Catechism.

JELABUGA, *je'-la-bu-ga*, a town of Russia, and the capital of a circle of the same name, about 200 miles from Viatka. It has several churches, and near it are the ruins of a Shaman temple, where there was long a celebrated oracle. *Manf.* Woollens, linens, and cottons. *Pop.* 3,500.—The CIRCLE is fertile and well wooded. *Pop.* 90,000.

JELALABAD, *jel'-a-la-bad*, two towns of Afghanistan. 1. The capital of a province of the same name, 75 miles from Cabool. It is the centre of a considerable commerce, and is memorable for the successful resistance made in 1841-2 by Sir Robert Sale, with a handful of British troops, to an Afghan army. In 1842 its fortifications were destroyed by the British, when they evacuated the country. *Pop.* 2,000. The PROVINCE is 60 miles long and 30 broad, and forms a natural subdivision of the great valley of Cabool.—2. A town in the province of Seistan, 240 miles from Kandahar. It is governed by a prince, who assumes the title of king of Seistan. *Pop.* 10,000.

JELATMA, or JELATONE, *je-lat'-ma*, a town of Russia, and the capital of a circle of the same name, 150 miles from Tambov. It has several churches and other public buildings. *Manf.* Linen and vitriol; and it has a trade in corn, tallow, hemp, honey, and wax. *Pop.* 6,000.—The CIRCLE is not fertile, but well wooded. *Area*, 62 geographical square miles. *Pop.* 78,000.

JELITZ, *jel-itz'*, a town of Russia, and the capital of a circle of the same name, 100 miles from Orel. It has several churches, almshouses, and schools. *Manf.* Ironmongery, leather, and soap. *Pop.* 16,000.—The CIRCLE is well wooded and fertile. *Pro.* Corn; and numerous herds of cattle are reared. *Pop.* 170,000.

JELLACHICH VON BUZIM, Baron Joseph, *jel'-la-chik*, the Ban, or military commander-in-chief of Croatia. He was the son of an Austrian general, by whom he was sent to the military academy of Vienna, on leaving which, he entered the Austrian army as sub-lieutenant of dragoons, in 1819. Six years afterwards, he

was a lieutenant, and occupied his leisure with the composition of a small volume of poems, which was printed for private circulation. In 1830 he went to Italy, as captain in a regiment of Hulans, and remained there four years; in 1837 he obtained the commission of major of infantry, and afterwards became, first lieutenant-colonel, and then colonel, of the 1st Banat frontier regiment. In 1848 the court of Vienna secretly induced the Croatians, the Dalmatians, and the Servians to attack the Hungarians, whose constitutional form of government was distasteful both to the Austrian emperor and to the more despotically ruled Servians and Croats. These latter requested that Jellachich might be appointed their ban, and this being complied with by the Austrian emperor, an army of irregular, but well-armed troops, to the number of 40,000, was assembled. Jellachich, as ban, put himself at their head, and led them across the Drave, at Zegrad, in September, 1848. In less than a month he was met by the Hungarians and defeated; but, having arranged an armistice with his opponents, he made good his retreat to Raab, and by this movement secured the high road to Vienna for his line of operations. Shortly afterwards, he went to reinforce, with 18,000 picked troops, Prince Windischgratz, who was then besieging Vienna, which was defended by the insurgents. Subsequently he commanded the Austrian centre at the battle of Swechat, in which the Hungarians were worsted. Throughout the remainder of the campaign he fought under General Haynau's orders, but did not exhibit any extraordinary talent for war. An illustrated edition of his poems was published at Vienna in 1851, the proceeds of which were applied towards an invalid fund he had founded in that capital. B. at Peterwardein, Austrian Slavonia, 1801.

**Jellinger**, Christopher, *jel'-lin-jer*, a Presbyterian divine, who studied at Basle and Leyden. He was some time a soldier; after which he went to Geneva, whence he was invited to England, where he acquired a perfect knowledge of the language, and obtained the living of Brent, in Devonshire, of which he was deprived for nonconformity, in 1662. He wrote, "Fifteen Conferences with Christ," "A New Way of Living and Dying," "The Spiritual Merchant," and other works of a like nature.

**Jelum**, *je'-lum*, a river of the Punjab. (*See* Jailum.)

**Jemmapes**, *zhem-map'*, a village and parish of Belgium, 2 miles from Mons. *Manf.* Soap; and there are several breweries and tanneries, a salt-refinery, some forges and flour-mills. Coal is extensively worked in its neighbourhood. *Pop.* 5,000. Here, in 1792, the French, under Dumouriez, gained a great victory over the Austrians. After the union of Belgium with France, a department was named from this place; but, in 1815, it was formed into the present province of Hainault.

**Jena**, *yen'-a*, a well-known town of Germany, in the grand-duchy of Saxe-Weimar, on the Saale, 12 miles from Weimar. The principal public building is the ducal castle. It has also a council-house, a riding-school, several churches and hospitals, and in the vicinity, is the old castle of Kirchberg, now in ruins. It is principally noted, however, for its university, which was opened in 1558, and which, towards the beginning of the present century, had for its teachers, Humboldt, Fichte, Griesbach, Schiller, and Schelling,—all men of great celebrity. *Pop.* 5,200. The neighbourhood of this town was the scene of the great battle of the 14th October, 1806, in which, by one blow, Bonaparte overthrew the Prussian monarchy.

**Jenischius**, Paul, *je-nis'-ke-us*, a learned Dutch author, who was persecuted and banished for writing a book entitled, "Theatrum Animarum." B. at Antwerp, 1558; D. at Stutgard, 1647.

**Jenkin**, Robert, *jen'-kin*, a learned English divine, educated at the king's school at Canterbury. In 1674 he was admitted of St. John's College, Cambridge, of which he was elected fellow in 1680. In 1711 he became master of his college, and Lady Margaret professor of divinity. Dr. Jenkin wrote some theological works, the best-known of which is entitled, the "Reasonableness and Certainty of the Christian Religion." B. at the isle of Thanet, 1656; D. 1727.

**Jenkin**, William, a nonconformist divine, was the son of a puritan minister, and was educated at St. John's College, Cambridge. In 1641 he was chosen minister of Christ Church, near Newgate, London, of which he was deprived for nonconformity a year afterwards. He was sent to the Tower for being concerned in Love's plot, but was released on petitioning Cromwell. In 1684 he was committed to Newgate on the Conventicle Act, and died there four months afterwards. He wrote a great many theological works, and "An Exposition on the Epistle of Jude." B. at Sudbury, Suffolk, 1612; D. in London, 1685.

**Jenkins**, Henry, *jen'-kins*, an Englishman, remarkable for longevity, having lived to the age of 169 years. He remembered the battle of Flodden Field, and gave evidence at the assizes to a circumstance within his recollection which occurred one hundred and forty years before. He retained his faculties to the last; but as he was born before parochial registers were kept, no parish would support him; so that he subsisted by begging. In the parish church of Bolton, Yorkshire, to which in reality he belonged, is a monument recording these particulars. B. in Yorkshire, 1501; D. 1670.

**Jenkins**, Sir Leoline, an English statesman, who was educated at Cowbridge school, whence he was sent to Jesus College, Oxford, where he continued till the death of King Charles I. He afterwards became tutor to some young gentlemen, with whom he travelled through France, Holland, and Germany. At the Restoration he returned to his college, of which he was chosen fellow, and in 1662 elected principal. In 1668 he was appointed judge of the Prerogative Court of Canterbury, and in 1670 he received the honour of knighthood. He had a principal share in negotiating the peace of Nimeguen, and, on his return to England, was chosen one of the representatives of the university of Oxford in parliament, where he opposed the bill for the exclusion of the duke of York from the succession to the crown. He was soon after made secretary of state and a privy counsellor. He bequeathed to charitable uses all his property. His letters and papers were printed in 1724. B. in Glamorganshire, 1623; D. 1685.

**Jenkinson**, Anthony, *jen'-kin-son*, an English traveller in the 16th century, who, between the years 1546-70, travelled in Russia, and was one of the first Englishmen who penetrated into the interior of Asia, where he lived for some time with the Uzbeck Tartars. On his return, he was sent to represent Elizabeth, queen of England, at the court of the czar of Russia. His travels are included in Purchas's collection; but the truth of many of his statements has been questioned. D. 1584.

**Jenkyns**, David, an English judge, who commenced his university education by being admitted a commoner of Edmund Hall, Oxford, in 1597. After taking his bachelor's degree, he removed to Gray's Inn, and became eminent as a barrister. Charles I. appointed him a Welsh judge. In 1645 he was taken prisoner at Hereford for his activity in the royal cause, and sent to the Tower. Being brought to the bar of the House of Commons, he denied their authority, and refused to kneel; for which he was fined £1,000, and remanded to prison. In 1650 an act was passed for his trial; but Harry Martin, it is said, prevented the measure by a droll speech. Jenkyns, who expected to be hanged, declared that he would die with the Bible under one arm and Magna Charta under the other. In 1656 he obtained his liberty. B. at Hensol, Glamorganshire, 1586; D. at Cowbridge, 1667.

**Jenne**, or **Jimne**, *jen*, a town of central Africa, situate on the Niger, and on the road from Sego to Timbuctoo, from which it is distant about 280 miles. It is a place of considerable commercial importance, and in the shops may be seen printed muslins, scarlet cloth, hardware goods, and other articles of British manufacture. *Pop.* 9,000, all Mahometans, who allow no infidels to enter the town.

**Jennens**, Charles, *jen'-nens*, an English gentleman, who, being very rich and fond of display, was called by his friends "Soliman the Magnificent." He affected to be thought learned, and wrote the words of some of Handel's oratorios, particularly the "Messiah," and published part of an intended edition of Shakspeare. D. at Gopsal, Leicestershire, 1773.

JENNER, Edward, M.D., *jen'-ner*, a celebrated English physician, who ranks among the great benefactors of the human race, as the discoverer and propagator of vaccination. He was the son of a vicar in Gloucestershire, and after receiving his school education in Cirencester, was apprenticed to a surgeon at Sudbury. At the expiration of his apprenticeship, he went to London, and became a student of medicine at St. George's Hospital, living for two years as pupil with the celebrated John Hunter. In 1773 he returned to Gloucestershire, and established himself as a surgeon in the village of Berkeley. In 1792, desiring to practise

JENNER.

as physician, he obtained a degree of M.D. from the university of St. Andrew's. Many years before, while he was a surgeon's apprentice at Sudbury, Jenner was one day much struck at being told by a milkmaid that she could not take the small-pox. He made inquiries, and discovered that this was a common belief in the district. When he went to London, he mentioned the circumstance to Hunter and many other distinguished medical men, but they all regarded it as a popular error. Jenner, however, never forgot the subject, and when he set up as surgeon in Berkeley, made several experiments, which proved that in some instances it was impossible to give small-pox to persons who had had cow-pox; while in others, although certain individuals had had cow-pox, they, nevertheless, took small-pox. The result of long study and careful experimentation, was that Jenner found that, while the udder of the cow was subject to several eruptions, there was but one true cow-pox, which, further, could only be taken by the milkers at a particular period of its course. About the year 1780 he conceived the idea of propagating the cow-pox, from the cow, in the first instance, and then from one person to another, and, consequently, secure to every individual so treated, immunity from small-pox. For sixteen years he followed up this grand conception, and endeavoured to enlist the sympathy and aid of the eminent practitioners of the healing art in its favour; but they only replied by ridiculing the idea as an absurdity. Jenner persevered, however, and, in 1796, had the good fortune to make an experiment which could not be gainsaid: he vaccinated a boy, eight years old, with the matter taken from a milkmaid's hand. The child recovered of the infection in a satisfactory manner, and was immediately afterwards inoculated for small-pox, without the slightest effect. Many similar experiments were subsequently made, all ending successfully; and, in 1798, Jenner put forth his first work on the discovery, "An Inquiry into the Causes and Effects of the Variolæ Vaccinæ (Cow-pox)." Although the author successfully demonstrated the soundness of his views, they met with great opposition from medical men at the outset. In about a year, however, some seventy leading physicians and surgeons signed a declaration stating their entire concurrence with him. An attempt was now made to rob Jenner of the merit of his discovery; but it proved signally abortive, and henceforth fame and fortune were within reach of the retired country surgeon; but Jenner refused every offer; and as a desire to benefit his fellow-creatures, and not an ambition of worldly honours, had been his endeavour, he would not quit his native village, where he practised as physician. "Shall I," he wrote to a friend, "who, even in the morning of my life, sought the lowly and sequestered path of life—the valley, and not the mountain—shall I, now my evening is fast approaching, hold myself up as an object for fortune and for fame? My fortune, with what flows from my profession, is amply sufficient to gratify my wishes." The grand discovery rapidly spread over England, France, and the other continental nations, and throughout the world. The House of Commons, by way of recompensing the long and disinterested labours of Jenner, voted him, in 1802, £10,000, and £20,000 in 1807. About two years since, a statue of him was erected, by subscription, at Trafalgar Square, London; a mark of respect which, had he been a destroyer of his fellow-men, instead of a benefactor of his species, would long since have been paid to his memory by the government of his country. He wrote several works and papers on his discovery, on general medicine, and on natural history. B. at Berkeley, Gloucestershire, 1749; D 1823.

JENSON, or JANSONIUS, Nicholas, *zhen'-sawng*, a celebrated French printer and letter-founder in the 15th century. He was the first who fixed the form and proportion of the Roman character; and his editions of books, printed between the years 1470 and 1481, are highly valued on account of the beauty of the typography. The first book which came from his press was a volume in 4to, entitled "Decor Puellarum." 1471. D. about 1481.

JENYNS, Soame, *jen'-ins*, an English writer on religious subjects, who was educated at a private school, whence he was sent to St. John's College, Cambridge. In 1728 he published a poem on the Art of Dancing. He was elected member of parliament in 1741, and sat in the house till 1780. In 1755 he was appointed one of the lords of trade, which place he held till that board was abolished. His works are,—"Poems;" "A Free Enquiry into the Origin of Evil;" "A View of the Internal Evidence of the Christian Religion." B. in London, 1704; D. at the same place, 1787.

JEPHSON, Robert, *jef'-son*, a dramatic writer. He was an officer in the army, and many years master of the horse to the lord-lieutenant of Ireland. He was also for some time a member of the Irish House of Commons. His first dramatic piece, "Braganza," was read with success at Drury-lane, and printed in 1775. "The Law of Lombardy," a tragedy, was performed nine nights at Drury-lane, in 1779. "The Count Narbonne" was well received. He wrote also "The Campaign; or Love in the East Indies," an opera; "Julia; or, the Italian Lover," a tragedy; "Two Strings to your Bow," a farce; "The Conspiracy;" and "Roman Portraits," a poem in heroic verse, with historical remarks and illustrations. B. in Ireland, 1736; D. in Dublin, 1803.

JEPHTHAH, *jef'-tha*, one of the judges of Israel, who made a remarkable vow before he marched against the Ammonites, that if he proved victorious, he would offer to the Lord the first living thing which should come to meet him on his return. This happened to be his only daughter, whom he is said to have sacrificed to fulfil his rash vow. But many learned writers contend that the text does not warrant the assertion, and that the daughter of Jephthah, instead of being sacrificed, was devoted to perpetual virginity. And this seems most probable, since human sacrifices were held in abomination by the Israelites. The history of Jephthah is contained in Judges.

JERBA, or GERBA, *jer'-ba*, an island in the Mediterranean, lying on the south side of the Gulf of Cabes. It belongs to Tunis, and is separated from the mainland by a narrow channel. *Manf.* Shawls, linens, and

woollens; and a great deal of live stock is reared. *Pop.* 30,000. *Lat.* 33° 41′ 6″ N. *Lon.* 11° 0′ 15″ E.

JERDAN, William, *jer'-dan*, a modern English littérateur. He was the son of a small landowner of Kelso, in Roxburghshire, and was educated at a Scotch parochial school, afterwards receiving some instruction from Dr. Rutherford, author of the "View of Ancient History." His family designed him for the law; but, at his own request, he was allowed to go to London, where, in 1801, he entered a merchant's countinghouse, at a salary of £50 per annum. He quitted this employment the next year, and went to Edinburgh to attend the law classes of that university; but abandoned this study in less than a year, returning once more to London, where he became embarrassed by debts, was released by his uncle, a naval officer, and taken on board his ship at Portsmouth as surgeon's clerk. While serving in this capacity, some verses of his were inserted in a Portsmouth paper; upon which he borrowed a sum of money and went to the metropolis, resolved to push his fortunes as a literary man. In 1805 he obtained an engagement on a newly-started paper,—the "Aurora;" and, after being employed as contributor to several journals, he, some years afterwards, joined the staff of the "Sun," of which he eventually became editor. In 1817 he was engaged by Mr. Colburn to edit the "Literary Gazette," of which paper he was subsequently the proprietor, but ceased to have any connection with it in the year 1850. Soon afterwards, a subscription of nearly £700 was raised for him, and Lord Aberdeen granted him a pension of 100 guineas a year. Mr. Jerdan published his autobiography in 1853. B. at Kelso, Roxburghshire, 1782.

JEREMIAH, *jer-e-mi'-a*, the second of the four great prophets, was the son of Hilkiah, a priest. Having predicted the miseries which should befall his country for the sins of the rulers, priests, and false prophets, he was thrown into prison. When Nebuchadnezzar took Jerusalem, Jeremiah was permitted to remain in Judæa; but Johanan, and other fugitive Jews, determining to go into Egypt, contrary to the prophet's advice, compelled him to accompany them. Some say he was slain there by his countrymen; but others assert that he died at Babylon, about 586 B.C. The style of Jeremiah is elegiac and pathetic, especially the "Lamentations." In his prophecies he foretold the Babylonish captivity, the return of the Jews, and the destruction of Babylon. He also predicted the conception and atonement of the Messiah. B. at Anathoth, of the tribe of Benjamin, about 630 B.C.

JEREMIE, Sir John, *jer'-e-mie*, a distinguished colonial judge and anti-slavery advocate. After receiving his education at Blundell grammar-school, Tiverton, he returned to Guernsey, his native place, and began to study the law, which he afterwards continued at Dijon, in France. In 1815 he attracted the notice of the government, by his evidence before the royal commissioners sent to Guernsey to investigate the administration of justice in that island. In 1824 he was nominated chief justice of St. Lucia, West Indies, and, from what he observed in that office, became an energetic advocate for the abolition of slavery, and published his views in four essays on Colonial Slavery. In 1832 he was made advocate-general of the Mauritius; but his abolitionist views being known to the planters, his appointment was the signal for almost open insurrection, the colonial Assembly petitioning the governor not to allow him to land upon the island. The entire naval and military force was required to protect him when he did so, after two days' delay. So general was the discontent during his short term of office, that the governor was compelled to order his return to England. On his arrival in London, he declared his willingness to return and resume his appointment, and the government acceding, he went to the Mauritius once more, and remained, notwithstanding every opposition, till 1835. This year he was appointed puisne justice of the supreme court of Ceylon, an office he resigned to assume the governorship of Sierra Leone in 1840, in both of which countries he never ceased to labour in the amelioration of the condition of liberated negroes. He published several works against slavery. B. at Guernsey, 1795; D. at Sierra Leone, 1841.

JEREZ-DE-LA-FRONTERA, or XERES, *chai'-raith*, a town of Spain, in Andalusia, 16 miles from Cadiz. It is a place of considerable antiquity, but possesses little historical interest. It has a considerable trade in corn and wine, the latter, under the name of sherry, being mostly exported to Britain. *Pop.* 33,000.

JERICHO, *jer'-i-ko*, an ancient city of Judæa, now a poor dirty village, perpetually exposed to be plundered by the Arabs, 18 miles from Jerusalem. It is represented by the village of Riha, which consists of nothing more than a few miserable huts. *Pop.* 200.

JERICHOW, *yer'-i-cho*, a town of Prussia, in Saxony, 3 miles from Magdeburg. It is the capital of a circle, and has several distilleries and mills, with a trade in cattle. *Pop.* 1,700.—The CIRCLE properly consists of two circles, both of the same name, but defined as 1 and 2. The first has an area of 418 geographical square miles, with a population of 56,000. The second has an area of 100 geographical square miles, with a population of 47,000.

JEROBOAM I., *jer-o-bo'-am*, king of Israel, was appointed by Solomon governor of Ephraim and Manasseh; but, when a prophet predicted that he would reign over ten tribes, Solomon ordered him to be arrested; on which he fled to Egypt, where he remained till the people revolted against Rehoboam, 990 B.C. Ten tribes separated from the house of David, and, forming the kingdom of Israel, chose Jeroboam for their king, who abandoned himself to idolatry. After reigning 22 years, he left his throne to Nadab, his son. D. 968 B.C.

JEROBOAM II. was the son of Jonah, king of Israel. He ascended the throne 834 B.C., and regained the countries which had been taken by the Syrians. But he was guilty of idolatry, and the prophets Hosea and Amos predicted the destruction of his family. The Assyrians defeated him at Jezreel, and carried many of his people into captivity.

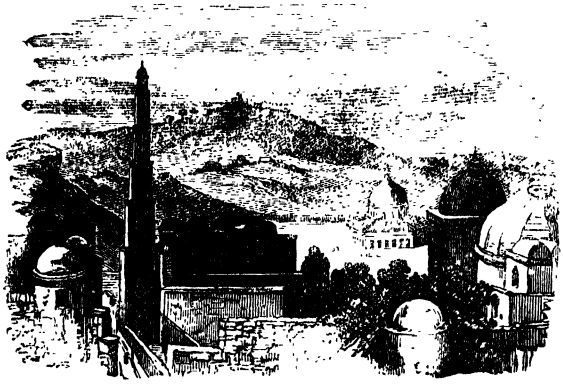
JEROME, St., *jer'-ome*. (*See* HIERONYMUS.)

JEROME OF PRAGUE, so called from the place of his birth, was the disciple of John Huss (*see* HUSS), and a man of considerable learning. The council of Constance cited him to appear before it with his master; but, finding that Huss was thrown into prison, he retired to Uberlingen, where he applied for a safe-conduct, which was refused. On his journey to his own country, he was arrested, and sent to Constance in chains. After being cruelly tortured, he was consigned to the flames, which he endured with great fortitude, in 1416. B. 1378.

JEROME OF ST. FAITH, a Spanish Jew, named, before his conversion to Christianity, Joshua Larchi. He became physician to Peter de Luna, afterwards Pope Benedict XIII., in whose presence, and that of many cardinals and prelates, he disputed with some learned rabbins at Tortosa, in 1414. The result of that conference, and of a treatise on the errors of the Talmud by him, is said to have been so deeply felt, that about 5,000 Jews were converted. Jerome's book was printed at Frankfort in 1602.

JERROLD, Douglas, *jer'-rold*, a modern English novelist, dramatist, and essayist. He was son of the manager of the Sheerness theatre during the latter years of the war between France and England. Sheerness was, in those days, a very busy arsenal; ships of war were constantly arriving and departing, and young Jerrold was enabled to hear many a stirring "yarn" about the Nile and Trafalgar. On the other hand, there was the strange life of the strolling player, in the midst of which he was being reared. The drama and the sea were thus the two great circumstances of his earliest years; and with one or other of these his life was afterwards connected. While still a boy, his father obtained for him an appointment as midshipman in a ship of war commanded by Captain Austin, brother of Miss Austin, the celebrated novelist. In this capacity he served till the termination of the war, when, coming ashore, he was sent to London, and apprenticed to a printer. For several years, while working as a compositor, he devoted his leisure hours to the task of intellectual improvement. He acquired several languages, and the habit of expressing his thoughts in writing. One night, after he had witnessed a performance of "Der Freischutz," he sat down, wrote a criticism of the play, and inclosed it to the editor of the paper upon which he was working as compositor. The "copy"

was handed over to him to be put into type, and, further, an editorial notice was inserted, asking the anonymous correspondent to continue his contributions. This event fixed the vocation of Douglas Jerrold. Before he was twenty-one years of age, he had written his play of "Black-eyed Susan," the most popular of all modern dramas, Mr. T. P. Cooke, the original William, having acted in it upwards of seven hundred times. This first success induced Jerrold to produce, during a quarter of a century, a succession of original, witty, and thoroughly English plays, which in these respects presented a marked contrast to the works of other English playwrights; they, for the most part, depending upon the French for their plot, dialogue, and sentiment. The best of these dramas are,—"The Rent-day," "Nell Gwynne," "The Housekeeper," and "The Prisoner of War." "Time works Wonders" and "The Bubble of the Day" are two of his most popular comedies, and deservedly so, for they sparkle throughout with wit, humour, and keen satire. As a novelist, he gave to the public—"Clovernook," "St. Giles's and St. James's," "The Man made of Money," and "The Story of a Feather." He was intimately connected with that most successful of all humorous periodicals, "Punch," having regularly written for it, from its second number till within a year or two of his death; and nothing that ever appeared therein, even in its best days, when Thackeray and Gilbert à Becket were among its contributors, was more popular than the famous "Caudle Lectures" of Jerrold. In the same periodical also appeared "Punch's Letters to his Son," besides a constant succession of terse, epigrammatic, short articles, directed against the follies of the day. His novels, plays, and most important miscellaneous writings, were collected and published, in 8 vols., a few years since; "Men of Character," which originally appeared in "Blackwood's Magazine," being included in the number. During the last three or four years of his life, Jerrold had been the editor of "Lloyd's Weekly Newspaper." B. in London, 1803; D. at the same place, 1857.



JERSEY, ISLE OF, *jer'-se*, one of the Channel Islands, and the largest and most southerly of the group, situate about 15 miles from the coast of France, and belonging to Great Britain. *Ext.* 12 miles long, with a breadth of 7 at its widest part. *Area*, 46,000 acres. *Bays.* Numerous. The principal are those of St. Catharine, St. Brelade, St. Helier, St. Ouen, Granville, and Boulay. That of St. Ouen is not very safe, being open to the influx of the Atlantic Ocean. *Gen. Desc.* The coast is surrounded by a natural barrier of rocks, which nearly encircles the whole island; but the soil is fertile, and sufficiently adapted for all the common crops, and also for the pasture of cattle, which is pursued to some extent. The singular mildness of the climate, however, has decided the inhabitants to apply chiefly to the produce of the orchard, and to trust, in a great measure, to their trade for a supply of grain. Wheat, barley, and potatoes, however, are cultivated; and cows, of the Alderney breed, are reared and exported in large numbers. The fruits are of the highest flavour, and great quantities of cider, the common beverage, are made annually. Besides apples, the principal fruit, and pears, of which the *chaumantelle* is particularly in repute, private gardens produce peaches and apricots of great size and beauty, melons in profusion, and strawberries of superior flavour. *Inhabitants.* These, though subject to England, still speak the French language. They make their own laws, and enjoy many privileges, and are free from the taxes with which the mother country is loaded. They live almost entirely by the produce of the soil, or by what they receive in exchange for it, and are almost wholly engaged in agriculture and commerce. The island having been occupied as a great military depôt, various fortresses have been erected on it; viz. Elizabeth Castle, Mount Orgueil, Fort Henry, La Rocco, and several others. The coast is also defended by a chain of martello towers, and by numerous redoubts and batteries. *Gov.* The government consists of a court of judicature, and an ecclesiastical body, acting separately, and at the same time uniting with 12 constables and a military governor to form the Assembly of the States, the legislative body of the island, without whose approbation no law made in England is binding. The governor is appointed by, and in a manner represents, the crown; convokes the Assembly, and has a negative voice, which, however, is merely nominal, except where the interest of the crown is concerned. The court of judicature consists of a bailiff and a president, chosen by the crown; 12 jurats, chosen by the householders; and various officers: the clerical court, of a dean and 12 rectors, appointed by the queen in council. *Pop.* about 60,000. *Lat.* 49° 13′ 54″ N. *Lon.* 2° 2′ 18″ W. Various attempts have been made by the French to possess themselves of this island, but without success. The most remarkable was in 1781, when they were repulsed by the brave Major Pierson, who was unfortunately killed in the action. It contains various remains, chiefly of a Druidical kind.

JERSEY CITY, a town of the United States, in New Jersey, opposite New York, with which it is connected by a steamboat ferry. It is regularly built, has several churches, a lyceum, a female academy, and various schools. *Manf.* Starch, flint-glass, and pottery. There are also some iron-foundries and rope-works. *Pop.* 7,000.

JERSEY, NEW, one of the United States, bounded on the N. by New York; on the S. by Delaware Bay; on the E. by the state of New York and the Atlantic Ocean; and on the W. by Pennsylvania and Delaware. *Ext.* From north to south, 160 miles long, with a breadth towards the north of 70, and towards the south of 75. *Area*, 832 square miles. *Desc.* On leaving the Pennsylvania frontier, the whole country is flat, as are also those southern parts which extend 100 miles along the sea-coast, and which are both sandy and barren. A ridge of the Alleghanies crosses the state in the parallel of 41 degrees; and to the north is another ridge, from which diverge several other chains in a southerly direction. Among the mountains, and in the interior parts, the soil is fertile, but in other places it is almost barren, being composed of a loose sand and small rounded pebbles; and it is, in general, very inferior to the state of New York or Pennsylvania. It is, however, well cultivated, and abounds with villages and towns, which from the great thoroughfare between the northern and southern states. It is also crossed by several important railroads and canals, whilst the coast is indented with a number of small streams or creeks, and several bays. *Rivers.* The principal are the Hackensack, the Raritan, the Passaick, the Maurice, and the Muscanekunk, a branch of the Delaware. *Zoology.* The native animals have nearly disappeared, such as the cougar, the bear, and the wolf; but there are rattlesnakes, black snakes, wampums, and other species. Along the coast, in the rivers and streams, various kinds of fish abound. *Pro.* The hilly and mountainous parts produce wheat, rye, Indian corn, buckwheat, oats, barley, flax, and fruits of all kinds common to the climate. The orchards in many parts of the state equal any in the United States; and their cider is said to be the best in the world. *Minerals.* Iron abounds, and copper ore is found in different parts. Antimony is said to have been discovered in 1808. There are also ochres of different sorts, which are employed as paints; lead ore, black lead, native copper, loadstone, soapstone, magnesia, coal, gypsum, slate, and freestone. *Pop.* 490,000; comprising Low Dutch, Germans, English, Scots, Irish, and New Englanders, and their descendants. *Lat.* between 38° 56′ and 41° 20′ N. *Lon.* between 73° 54′ and 75° 27′ W.—This state was first settled by the Dutch from New York, in 1614, and, in 1787, adopted the constitution of the United States.

JERUSALEM, *je-ru'-sa-lem*, a celebrated city of Asia, and the capital of the ancient Judæa and the modern Palestine. It is situate in Asiatic Turkey, 126 miles from Damascus, and at an elevation of 2,500 feet above the level of the sea. It stands on an elevated plateau, consisting of a series of ridges of limestone, intersected by narrow and precipitous ravines. Its most splendid edifice is the mosque erected, in the 7th century, by the caliph Omar, and bearing his name. It is also called Kubbet-es-Sukhrah, 'Dome of the Rock,' and appeared to Dr. Clarke superior to any other example of modern architecture in the Turkish empire, not excepting the celebrated mosque of St. Sophia. It occupies the site, and is supposed to contain some remains of the Jewish temple. The

church of the Holy Sepulchre was built by the empress Helena, the mother of Constantine the Great, and professes, without probability, to comprehend within its limits the scene of all the great events of the crucifixion, entombment, and resurrection of the Messiah. Close by the entrance to the lower chamber are the tombs of Godfrey of Bouillon and of Baldwin, the modern kings of Jerusalem, with Latin inscriptions in the Gothic character. The other buildings and inclosures are numerous, and occupy by far the larger part of the space within the walls of the city. The largest of the inclosures is called by the Mahometans El-Haram Esh-Sherif, 'the Noble Sanctuary,' and is deemed so sacred, that none but Mahometans are permitted to enter it. The other buildings of greatest note within the city are the convents. The houses are lofty, and as no windows appear on any of the lower stories, and those above are latticed, the passage appears to be between blank walls. The bazars or shops are in a most unwholesome situation, being covered over, and, to all appearance, a nursery for every species of contagion. Hardly anything is exposed to sale; the various articles being secreted, through fear of Turkish rapacity. Dr. Clarke, when at Jerusalem, riding out of the city by what is called Sion gate, came to a deep dingle or trench, at the bottom of which he discovered a series of subterraneous chambers, each containing one or many repositories for the dead. Some of these tombs, from their magnificence, and the labour necessary to form the numerous repositories contained in them, suggested an almost regal destination. As the place of crucifixion seems to have been a public cemetery, and as it was without the city, the present spot appears to agree with it better than any other yet assigned. For the same reason, this seems the most probable spot for the entombment of the Messiah. Farther to the east, and in the place called Aceldama, were found some other sepulchres. At the foot of the Mount of Olives, and on

MOUNT OF OLIVES, JERUSALEM.

the eastern side of the brook Kedron, or Cedron, are the sepulchres of the Virgin, and those of the patriarchs. They form part of a vast cemetery, which extends along the foot of all the hills which surround Jerusalem to the south and east. On the north-west side, by the gate of Damascus, are seen the sepulchres of the kings. This place of sepulture has occasioned considerable difficulty to antiquaries; but it is supposed to have been the tomb of Helena, queen of Adiabene. To the east, beyond the brook Kedron, rises the Mount of Olives, which, by the abundance of that plant, still indicates this ancient appellation. In the district in which Jerusalem is situate, many of the events recorded in the Scriptures took place, and many of the places therein named are recalled by local associations. Jerusalem, though in possession of the Moslems, has long been the abode of numerous monks. These consisted, originally, of various nations and professions, each of which had a quarter assigned to it; but the number has been greatly reduced. *Pop.* about 15,000; comprising Mahometans, Christians, and Jews, in nearly equal proportions. *Lat.* 31° 46′ 49″ N. *Lon.* 35° 13′ E.

Jerusalem belonged to the Jebusites, who, after its conquest by the Israelites, still retained a castle or fortified eminence, from which they were not expelled till the reign of David. That monarch made it the capital of his kingdom. Solomon, on succeeding to the throne, not only protected, but enlarged it, surrounded it with stronger walls, and adorned the interior with that temple, the splendour of which was so much admired in the ancient world. It was taken in 417 B.C., by Nebuchadnezzar, who put an end to the kingdom, carried King Jehoiachim captive to Babylon, and established Zedekiah as his viceroy. That prince, however, making an attempt to re-establish the independence of his country, Jerusalem was again taken, and was then razed to the ground, the temple demolished, and all the inhabitants carried into captivity. After the conquest of Babylon by Cyrus, the Jews were permitted to return to their country, and to rebuild their temple, and Jerusalem soon resumed its former splendour. After the conquest of Persia by Alexander, and after his empire had fallen to pieces, it was surprised and plundered by Ptolemy, king of Egypt. Subsequently, it was exposed to a long series of attacks from the kings of Syria, who were, however, after many obstinate conflicts, bravely repelled by the Maccabees. Afterwards, the Romans conquered Judæa, but did not interfere with the religious rites, or even the municipal government of the Jews, when Jesus Christ appeared and suffered at Jerusalem. During the reign of Nero, the Jews rebelled against the tyranny of the proconsuls, and the city was finally reduced, after a long siege, by Titus. It was burnt, and the inhabitants sold into slavery. In the reign of Adrian, it was razed to the ground, and on its ruins a Roman town was erected, called Ælia Capitolina. This name remained till, by the conversion of Constantine, Christianity became the ruling religion of the Roman empire. Jerusalem then resumed its original name, and was held as an object of pious veneration. As the empire became more generally Christian, Jerusalem continued to increase in veneration. In 1076 it fell into the hands of the Saracens and Turks, who committed such outrages on the Christian pilgrims visiting the city, that the country was invaded by the crusaders, and Jerusalem taken in 1099, by the army under Godfrey of Bouillon, who, in reward for his valour, was created king of Jerusalem. That city, with the surrounding territory, was ruled, during upwards of 60 years, by five Latin kings, when it yielded to the arms of Saladin. After changing successively its Moslem masters, it was annexed, in 1517 to the Turkish empire, of which it has ever since formed a part.

The country surrounding Jerusalem consists of numerous hills, from whose heights there is a view of the lake Asphaltites, encompassed by prodigious mountains; whilst to the north may be seen the fertile pastures of the plain of Jericho, watered by the Jordan.

JERUSALEM, J. Frederick William, a Lutheran theologian and preacher, who was charged by the duke of Brunswick with the education of his son, and appointed preacher to his court. During his successful career as a teacher of youth, he founded the Caroline College, at Brunswick. He wrote "Letters on the Mosaic Religion," "Considerations on the Truth of Religion," and a great number of sermons. B. at Osnabruck, 1709; D. 1789.—His son Charles William, a young man of great promise, killed himself in a fit of melancholy in 1773. He is said to have been the original of Göthe's "Werther."

JERVAS, Charles, *jer'-vās*, an English portrait-

painter, who studied for a short time under Sir Godfrey Kneller. By the generosity of a friend, he was enabled to continue his studies at Paris and Rome. On his return, he obtained considerable employment, more, perhaps, from the friendship of Pope and other celebrated men than from his own merit. He published a translation of "Don Quixote," to which Dr. Warburton added an appendix on the "Origin of Romances and of Chivalry." B. in Ireland, about 1675; D. 1739.

JERVIS, John, earl of St. Vincent. (*See* ST. VINCENT.)

JESI, or IESI, *e-a'-se*, a town of Italy, on the Esino, 16 miles from Ancona. It is a bishop's see, and has several churches and convents. *Manf.* Woollen and silk fabrics. *Pop.* 14,000.

JESSO, or YESSO, *yes'-so*, an island off the eastern coast of Asia, situate immediately to the north of the islands of Japan, being separated from Niphon only by a narrow strait. *Ext.* 150 miles long, by 80 in breadth. *Desc.* Well wooded; but the inhabitants occupy themselves chiefly with the pursuits of the chase and fishing. *Pop.* about 50,000.—The Japanese give the name of Jesso to the whole chain of islands between Japan and Kamschatka.

JESSORE, *jes-sor'*, a district of Hindostan, in the presidency of Bengal, situate about the centre of the delta of the Ganges. *Area*, 3,512 square miles. *Desc.* Fertile in the S., though mostly composed of salt marshes or islands, producing abundance of rice. The other parts are covered with jungle, and are, in many places, still in an unredeemed state of nature. *Pro.* Rice, indigo, salt, pepper, and tobacco. *Pop.* 382,000. *Lat.* between 22° and 23° N.

JESSULMERE, or JAYSULMERE, *jes-sul-meer'*, a town of Hindostan, and the capital of a principality, 200 miles from Hyderabad. It is a large and handsome place, the streets being laid out with considerable regularity. *Pop.* about 25,000.—The PRINCIPALITY has an area of 12,250 square miles, and a population of 75,000. *Lat.* of the town, 26° 57′ N. *Lon.* 71° 28′ E.

JESSY, Henry, *jes'-se*, a nonconformist minister. He joined the Independents, for which he was imprisoned in 1641, but was released by the parliament. In the rebellion, he officiated at St. George's, Southwark, but was ejected at the Restoration, and sent to prison. He wrote "The Glory and Salvation of Judah and Israel," a "Description of Jerusalem," and "The English Greek Lexicon." B. at West Rowton, Yorkshire, 1627; D. 1663.

JESTYN AB GWRGANT, *jes'-tin*, prince of Glamorgan, who was rejected by his countrymen as their sovereign, on the death of his father, in 1030, in consequence of his violent temper, his uncle Howel being chosen in his stead; but, on the death of the latter, in 1043, he succeeded him. Having made war on Rhys ab Tudor, a neighbouring prince, he sent Einion, his ally, to invite the English to his assistance, who defeated Rhys; but Jestyn refusing to give his daughter to Einion, as he had promised, he applied to the English, who turned their arms against Jestyn, and obliged him to quit his dominions, which they divided among themselves.

JESUA, Levita, *chai-soo'-a*, a Spanish rabbi in the 15th century, who wrote a curious book called "Halichot Olam; or, the Ways of Eternity," an edition of which, in Hebrew and Latin, appeared at Hanover in 1714.

JESUATES, *jes'-u-ai-tees*, a religious order, established at Sienna, in 1363, by St. John Colombino. They were so called because their founders were constantly uttering the name of Jesus. The chief occupation of the order was the care of the sick, and the distribution of medicines, which the members themselves compounded. The order did not take firm root in Italy, and was suppressed in 1668.

JESUITS, *jes'-u-its*, called also the "Society of Jesus," the name of a religious order, founded in 1534 by Ignatius Loyola (*see* LOYOLA), and sanctioned in 1540 by Pope Paul III. The avowed intention of the order was the propagation of the Roman Catholic faith, the conversion of heathens and heretics,—this last term meaning all those who differed from the Roman Catholic form of worship, and the education of the young. All the members were under a vow of implicit obedience to the sovereign pontiff. The organization of this order, which has played so great a part in the religious affairs of the world, was somewhat singular. There was a "General," who resided at Rome, and from that place exercised an absolute sway over every individual member of the order, spread throughout the world. He had five "Assistants," who formed his council, and an "Admonisher," whose duty it was to watch over the acts of his chief. Under the orders of the general there were, in each country where the Jesuits could obtain a footing, a number of officials termed "Provincials," each being charged with the administration of the religious affairs of a province. The order had three degrees, — the "Professors," the "Coadjutors," spiritual and temporal, and the "Novices." Each member, before being admitted to the order, was subjected to a series of severe examinations, and all were employed according to their capacity. The order took its origin in Paris, where Ignatius Loyola was studying theology; his first disciples being François Xavier, Laynez, Salmeron, Bobadilla, and Rodriguez, who were all Spaniards, like himself, and Peter Favre, who was a Savoyard. These men, calling themselves "Clerks of the Company of Jesus," went to reside at Rome, where the pope presented them with a church, which was henceforth named "Il Giesù." The order rapidly spread over Spain, Portugal, and Italy. Although Paris had been its birthplace, it was not admitted into France without the greatest opposition; the parliament and the universities acting as its most determined antagonists; and it was not till the year 1562 that it was allowed to educate the young. Although the order has furnished some men celebrated for eloquence, and has sent courageous missionaries to the most barbarous tribes and most distant countries of the earth, yet its insidious teaching, its ambition to play a great part in affairs temporal, its casuistry, and its dangerous doctrines, made it an abhorred institution, even in countries where the Roman Catholic faith was the established form of worship. For these reasons, it was driven from England in 1581, from France in 1594 and 1762, from Portugal in 1598 and 1759, from Russia in 1717, and from Spain and Sicily in 1767; finally, the order was suppressed, in 1773, by Pope Clement XIV. The Jesuits, nevertheless, continued to exist, under other names, in other countries, particularly in Russia, where the empress, Catharine II., gave them an asylum. The order was solemnly re-established in 1814, by Pope Pius VII., and soon after reappeared in several of those countries whence it had formerly been ejected. It re-entered France with the Restoration, under the title of "Brothers of the Faith," and during many years had charge of several flourishing colleges, which were, however, closed in 1828; a few of these have been re-opened since 1848. The "History of the Jesuits" was written by Wolf, and published at Zurich in 1789; by Cretineau Jolly in 1844, and by the Abbé Guettée in 1858; this last work being published at Paris. Lord Macaulay has a masterly analysis of the Jesuits, and of the character of Ignatius Loyola, their chief, in his essay on "Ranke's History of the Popes."

JESUS, *je'-sus*, in Hebrew Jehosuah, 'Saviour.' This name has been borne by nine different persons mentioned in the Holy Scriptures, where they are distinguished from each other by the names of their father being affixed. The most frequently mentioned are—Jesus, son of Josedech, who was the first high priest of the Jews after their return from captivity in Babylon, and who, with Zorobabel, rebuilt the temple between 535 and 516 B.C. Jesus, son of Sirac, a man celebrated for wisdom, who flourished under the pontificate of Simon I., between 303 and 284 B.C. He was the author of the book entitled "Ecclesiasticus." His grandson Jesus translated this book into Greek, which is the version now extant in the Apocrypha.

JESUS CHRIST *je'-sus kriste*, the founder of the Christian religion, the Saviour of the world, and Son of God, miraculously conceived of the Holy Ghost, and born of the Virgin Mary, in a stable at Bethlehem, four years earlier than the era from which the common system of chronology dates the years A.D. His birth was announced to shepherds by angels; and a star appeared in the east, which guided the magi to Jerusalem, who inquired of Herod where the Messiah was born, as they were come to worship him. This threw the king and his court into consternation. The magi, following the direction of the star, went to Bethlehem, where they found the

child, to whom they made their offerings; and being divinely warned, did not go back to Herod, but returned home a contrary way. Herod, full of wrath, determined on the death of the infant; but Joseph, the husband of Mary, being divinely warned in a dream, fled with the child and his mother into Egypt. While they were on their journey, Herod committed a horrid slaughter of all the children in Bethlehem. On the death of the tyrant, Joseph returned towards home; but finding that Archelaus reigned instead of his father, he went to Nazareth, by which that prophecy was fulfilled which called Jesus a Nazarene. Here he dwelt with his parents, working probably at his father's trade, which was that of a carpenter, till he came to the age of 30, when he commenced his public labours; and having been baptized by John the Baptist, he called a few poor, unlearned disciples, and then went about declaring the purposes of his mission, and confirming his authority by numerous miracles. The Jews were filled with astonishment at his doctrine and works; but their hearts were hardened, and instead of receiving him as the promised Messiah, they persecuted him with the utmost malignity, and attributed his miracles to diabolical agency. The Sanhedrim, or council of priests, often consulted to destroy him, and at last he was betrayed into their hands, in the garden of Gethsemane, by his disciple Judas Iscariot, for thirty pieces of silver. After an examination before Caiaphas, the high-priest, he was remitted to Pontius Pilate, the Roman governor, who made several attempts to save him from the fury of the priests and people; but being charged as an enemy of Cæsar if he let Jesus go, he caused him to be first scourged, and then put to death. He was crucified between two malefactors on Mount Calvary, Friday, April 3, A.D. 36. His body was entombed by Joseph of Arimathea in a new sepulchre; and as Jesus had declared that he would rise again the third day, the Jews obtained a guard from Pilate to watch the tomb. But on the third day he arose, and the soldiers went and gave information to their employers, who bribed them to say that the body had been stolen by his disciples. In confutation of this calumny, Jesus remained six weeks among his followers, and then conducting them to Mount Olivet, ascended into heaven. The Christian religion has subsisted to the present day, uninjured by all the attacks which have been made against it. The evidences upon which it stands are irrefragable, and its doctrines are of the most exalted nature. They teach that man is a miserable creature, in consequence of the fall, but that he is restored to the divine favour by the obedience, death, and mediation of Christ, who came from heaven to make an atonement for the sins of the world, and to bring that life and immortality to light by the gospel, which had been lost by the fall of Adam. The precepts of Christianity are in conformity with its doctrinal system; tending to make men humble, virtuous, patient, and contented in this world, and to fit them for a state of endless purity.

[In supplying this sketch of the events of the life of Jesus Christ, we desire only to give a plain narrative derived from the New Testament; and, while approaching the subject in all reverence, to avoid the slightest reference to controversy, either of fact or of opinion.]

JESUS, ISLE OF, an island of Canada, in the St. Lawrence, 8 miles from Montreal. *Ext.* 21 miles long and 6 broad. *Desc.* Fertile and well cultivated, producing grain and fruit. It has also some excellent pasturelands. *Pop.* Unascertained.

JETHRO, *jeth'-ro*, surnamed Raguel, king and priest of the Midianites, who received Moses into his family when he fled from Egypt, and gave him his daughter Zipporah in marriage. When Moses had delivered the Israelites from their bondage, Jethro met him, and delivered him his wife and children. (*See* MOSES.)

JEVER, *yai'-ver*, a town of Germany, in the grand-duchy of Oldenburg, 32 miles from Oldenburg. It is the capital of a circle of the same name, and has a castle, several churches, and various schools. *Pop.* 3,500.—The CIRCLE has an area of about 100 geographical square miles, and a population of 20,000, nearly all Protestants.

JEW, THE WANDERING, a fictitious personage, celebrated in popular tradition. The legend concerning him runs as follows:—While our Saviour toiled along, burthened by the weight of his cross, he wished to rest before the house of a Jew named Ahasuerus, who brutally drove him from his door; whereupon our Lord is said to have replied, "Thou shalt wander over the earth even till I return." And the Jew is supposed to have immediately commenced an eternal journey, which has never been lightened from that period to the present by a moment's repose. Many writers have made this legend the base of an ingenious fiction. The Wandering Jew might truly be taken as the symbol of the Hebrew people, compelled, during so many centuries, to wander far from their ancient home and kingdom.

JEWEL, John, *ju'-el*, a learned prelate, and a father of the English Protestant church. In the reign of Edward VI. he avowed the Protestant religion, and became an admired preacher; but, in the succeeding reign, his doctrines brought him into imminent danger. Finding that Bishop Bonner was devising means to apprehend him, he went abroad, and resided with Peter Martyr at Strasburg, and afterwards at Zurich. On the death of Mary, he returned home, and was appointed one of the sixteen Protestant divines to dispute with as many Romanists before Queen Elizabeth. In 1559 he was preferred to the bishopric of Salisbury, and, in 1565, received the degree of D.D. from the university of Oxford. His conduct as a bishop was exemplary, and he paid great attention to the work of reformation in his diocese. His application to study was so intense as to lay the foundation of an illness, which ultimately proved fatal. His learning and abilities were celebrated over Europe, by his admirable "Apology for the Church of England," which was attacked by his countryman and schoolfellow, Thomas Harding, and defended by the author. His works were collected into one volume folio, and deemed of so much importance as to be placed in churches for the edification of the people. It is said these writings are sometimes to be met with, chained to the reading-desk in churches, even in the present day. B. at Berry Narber, Devonshire, 1522; D. at Monkton Farleigh, 1671.

JEWS, *juse*, a celebrated people, known also by the names of Hebrews and Israelites. The word Hebrew, derived from Heber, an ancestor of Abraham, is the most ancient. After the time of Jacob, it was replaced by the word Israelites, from Israel, a surname of Jacob. The term Jew, derived from Judæus, dates from the captivity in Babylon. The Jewish people assign their origin to Abraham, whom they designate the father of their race. After Abraham, Isaac, his son, became their chief; then Jacob, or Israel, the son of Isaac. Jacob had twelve sons; among them Judah, the ancestor of David and of Jesus Christ. The descendants of Jacob, multiplying very rapidly, they were eventually divided into twelve tribes, each of which regarded as founder one of the children of Jacob. In the closing years of his life, Jacob settled in Egypt, in the land of Goshen. His posterity, powerful at first, were afterwards enslaved and persecuted by the Pharaohs. Moses delivered them from their bondage in Egypt, and put himself at their head to conduct them into the land of Canaan. Under his leadership, the Jews miraculously passed the Red Sea, when Pharaoh and all his host were drowned. After wandering for 40 years in the desert, where Moses died, they reached the Land of Promise, their leader being Joshua, who had succeeded Moses. Joshua established the Jews in the Land of Promise, and, dividing the country into twelve parts, gave a portion to each of the twelve tribes. After Joshua, the government was confided to a council of elders, then to judges; subsequently it became monarchical. Saul was the first king of the Jews; David succeeded him, and was followed by Solomon. These three kings established the dominion of the Jews throughout the ancient land of Canaan, and, for a short period, the kingdom extended to the Euphrates and the Red Sea, upon which Solomon possessed the port of Elath. But on the death of this last king, the twelve tribes were divided, and from that schism sprang two kingdoms. (*See* ISRAEL and JUDAH.) The kingdom of Judah remained faithful to the race of the kings of the Jews, and offered allegiance to Rehoboam, son of Solomon; the kingdom of

Israel elected for its sovereign Jeroboam. These two kingdoms, weakened by perpetual warfare and discord, were in the end enslaved. The kingdom of Israel was destroyed by Salmanasor, king of Assyria, and the kingdom of Judah by Nebuchadnezzar, who first carried captive to Babylon a great part of the inhabitants, and afterwards took Jerusalem by assault, destroyed the temple, and reduced to slavery the whole of the people. After a captivity of 70 years, the Jews obtained from Cyrus permission to re-establish themselves in Jerusalem, where they were governed by high priests. After the fall of the Persian empire, the Jews passed successively under the dominion of Alexander; of Ptolemy, king of Egypt; of Seleucus Nicator, king of Syria; and after once more falling under the sway of the kings of Egypt, were subsequently enslaved by the Syrians. Against these the Jews rose, under the leadership of Maccabæus, and threw off their yoke. The Maccabees became the hereditary sovereigns. Subsequently, the Romans interfered in the internal affairs of the Jewish kingdom, and placed Herod I. on the throne of the Maccabees, B.C. 37. It was under the reign of Herod that our Saviour was born. After the death of King Herod, Palestine was distributed among his sons, and divided into four portions, called tetrarchies (Judæa, Galilee, Batanea, Ituria); but in a few years the Romans sent into the country a proconsul, who governed in their name, and shortly afterwards Rome was sole master of the whole kingdom. The Jews, impatiently supporting the Roman sway, revolted many times. The emperor Titus took Jerusalem in the year 70, after a fearful siege of five months, as was prophesied. The city was again taken, under Adrian, in the year 135: the Jews were in great part exterminated; those who survived being driven for ever from Jerusalem. From this period the Jews, ceasing to form an independent nation, have been scattered over the earth. When Christianity became the religion of the Romans, their condition became very miserable. In 418 military service was interdicted them; in 610 the emperor Heraclius persecuted them with many cruel enactments. Islamism treated them less rigorously. Under the reign of the caliphs, the Jews of Asia, of Africa, and of Spain, were permitted to live in peace, and to cultivate commerce, letters, and the sciences. In Christian Europe, especially during the period of the crusades, the Jews had to undergo every form of persecution, frequently being compelled to purchase life at the price of their hoarded gold; they were made to wear distinctive marks on their clothing, and afterwards to dwell in separate quarters of every city. They were driven from England in 1290, from central France in 1395, from Spain and Sicily in 1493. In Germany, they belonged, like serfs, to the emperors and the nobles, who bought and sold them at their pleasure. The Inquisition was a particularly bitter foe to the Jews, especially in the Spanish dominions. In the 16th century, their condition became much improved. In France, they were allowed to settle at Bayonne and Bordeaux, in 1550; in 1784 they were relieved from the poll-tax which had hitherto been imposed upon them. Shortly afterwards, the other European states, following the example of France, treated them in a more liberal spirit. The Jews are spread over every quarter of the globe, being exceedingly numerous in Germany, Poland, and the north of Africa,—Algiers in particular. Although intermixed for eighteen hundred years with so many diverse nations, the Jews have not only preserved their religion, but a certain national type of feature, of which the most salient points are a dark skin, thick lips, and an aquiline nose. The Jews belong to the Semitic race, as is proved by their language, which is allied with the Arabic, the Syriac, and the Chaldean. Their primitive life was patriarchal, pastoral, nomadic perhaps,—certainly so in the desert, between their departure from Egypt and entrace into the Land of Promise. According to the Holy Scriptures, they had many vices, joined to which were superstition, a readiness to fall into idolatry, a spirit of discord and of revolt. When they became settled in Palestine, agriculture was their chief occupation; they had little taste for commerce. By the way, they have since shown the greatest aptitude for the latter, and, from the earliest times, have been celebrated as usurers. In addition to the Old Testament, they possess a literature, which chiefly consists of legends, songs, proverbs, and genealogies. After their return from captivity in Babylon, philosophy and theology began to take their rise among the Jews, and a number of sects sprang up, such as the Pharisees, Sadducees, and Essenes. During the middle ages, the Jews were instrumental, like the Arabs, in handing down the learning of antiquity. In our own day, many accomplished individuals have belonged to the Jewish people; in music, especially, the Jews have been long deservedly distinguished. Their religion is founded entirely on the Old Testament; it denies the divinity of Jesus Christ; but nevertheless teaches its followers to believe in the coming of the Messiah, who will collect the scattered Jewish people, and found a great empire. The Jews admit no other revelation than that of Moses and the prophets; they observe at the present time the same ceremonies which the ancient Hebrews practised,—the celebration of the Sabbath, the Passover, the abstinence from certain viands which are termed unclean. With the ancient Jews, all the priests were of the tribe of Levi: they thus bore the name of Levites, which, at the present time, is changed to Rabbins. After the dispersion of the Jews, during the reign of Adrian, the principal doctors of religion assembled at Tiberias, where they formed a Grand Council, or Sanhedrim, and founded a school, which became the nursery of their rabbins. These last composed, under the title of the "Talmud," a work designed to contain the oral law and traditions of the Jews. This work was completed in the year 500 of the Christian era; and, with the greatest portion of the Jews, it became the basis of their faith; some, however, refused to accept it. Hence arose the division of the Jews into two rival sects,—the Talmudists, or Rabbinists, who follow the Talmud; and the Caraites, who follow the strict letter of the Old Testament. Other less-important sects there are; perhaps the chief of these being the Rechabites. (*See* RECHABITES.)

JEWSBURY, *juse'-ber-e*, Miss Geraldine Endsor, a modern English novelist, whose education was directed by Mrs. Fletcher, herself an authoress of some mark. Miss Jewsbury's first work was "Zoe, or the History of Two Lives," a novel full of passion and finely graduated character, the success of which fixed her vocation as an authoress. This work, which appeared in 1845, was followed by a second three years afterwards, called "The Half-Sisters," a novel superior even to the first. In 1850 appeared her "Marian Withers," in 1852 the "History of an Adopted Child," and in 1856, the "Sorrows of Gentility," each of which was an advance in art upon its predecessor. Indeed, this lady, by her steady progress towards a high standard of perfection as a novelist, has established for herself a sound and lasting reputation, which leads her readers to expect the very best things from her future efforts. B. at Manchester, about 1824.

JEYPOOR, or JYEPOOR, *ji-poor'*, a town of Hindostan, and the capital of a principality, 150 miles from Delhi. It is said to be among the best-built towns of Hindostan, and contains a splendid palace, and temples of larger dimensions than any in the upper part of that country, and built in the purest style of Indian architecture. *Pop.* 60,000.—The PRINCIPALITY has an area of 15,251 square miles, and contains some of the strongest fortresses in Hindostan. *Pop.* 1,100,000. *Lat.* between 26° and 28° N.

JEZEBEL, *jez'-e-bel*, a Jewish queen, celebrated for her impious life. She was daughter of Ithobal, king of Sidon, and wife of Ahab, king of Israel. She turned her husband from the worship of the true God, established temples to the idol Baal, and caused a large number of prophets and holy persons to be put to death. Jehu, on gaining the throne, flung her from the windows of her own palace, which killed her, the dogs devouring her, as had been foretold.

JEZID I., *je'-zid*, the fifth caliph, or successor of Mahomet, and the second of the race of Ommiades, began his reign in 680. The Arabs, in the second year of his reign, elected Hussein, son of Ali, to the caliphate; but Jezid caused him to be assassinated. He also persecuted the whole house of Ali, and put a number of persons to death. Jezid, though a cruel tyrant, had a taste for poetry, and wrote some amatory verses of merit. D. 683.

JHALAWAN, *ja-la-wan'*, a province of Beloochistan. *Area*, 20,000 square miles. *Desc.* Mountainous and generally unfertile. It is thinly peopled, and the inhabitants are mostly engaged in pastoral pursuits. *Pop.* 30,000. *Lat.* between 26° and 29° N. *Lon.* between 65° and 67° 30′ E.

JHANSI, *jan-si'*, a town and fort of Hindostan, in Bundelcund, 62 miles from Gwalior. It is the capital of a small principality. *Pop.* Unascertained.—The PRINCIPALITY has an area of 2,532 square miles, and a population of 200,000.

JIDDA, JUDDA, or DJIDDAH, *jid'-da*, a considerable commercial haven of Arabia, on the shore of the Red Sea, in the province of Hejaz, 60 miles from Mecca, of which it is the port. It is supported partly by maintaining the trade with India and Egypt, and partly by the concourse of pilgrims from the coast, and of those from the opposite regions of Africa, who cross at Suaken to reach this famed seat of Mahometan pilgrimage. It is situate in a barren sandy district, destitute of water. The streets are very narrow; the entrance to the road is full of shoals, and it is dangerous to attempt going in without a pilot. The landing-place is in front of the vizier's palace, which stands close to the sea; the custom-house, likewise, faces the sea, and is a lofty, handsome building. *Imp.* Piece-goods from the coast of Coromandel, provisions and all kinds of grain from Egypt, and, through Egypt from Europe, glass for mirrors, cutlery, soap, cloths, silks, cottons, and metals of all kinds; from India, nankeens, finely-made girdles, muslins for turbans, and raw sugar; from Africa, elephants' teeth, ostrich feathers, musk, and slaves; and from Arabia, dates. *Exp.* Incense, essences, gum, tortoise-shell, coffee, and medicinal plants. *Pop.* Estimated at about 15,000; but, with the suburbs, about 40,000. *Lat.* 21° 28′ 18″ N. *Lon.* 39° 13′ E.

JIMENA-DE-LA-FRONTERA, *he-mai'-na fron-tai'-ra*, a town of Spain, in Andalusia, 45 miles from Cadiz. It has two parish churches, several chapels, a prison, cemetery, and various schools. *Manf.* Linen, hats, soap, leather, and earthenware. *Pop.* 6,000.

JITOMIR, or ZYTOMIR, *zit'-o-mir*, a town of Russia, and the capital of the government of Volhynia, 670 miles from St. Petersburg. It is the see of both a Greek and a Roman Catholic bishop. *Manf.* Linen and hats; it has also an active trade in silks, woollens, and Hungarian wines. *Pop.* 28,000.—There is a CIRCLE of the same name, well wooded and fertile.

JIZDRA, *jiz'-dra*, a town of Russia, and the capital of a circle, 80 miles from Kaluga. *Pop.* 2,000.—The CIRCLE has an area of about 2,000 geographical square miles, and a population of 110,000.

JOAB, *jo'-ab*, the general of David, king of Israel, who distinguished himself equally by his valour and his cruelties. He treacherously slew Abner the general, and stabbed Absalom the son of David. That monarch, in consideration of his services, did not punish him; but Solomon put him to death for taking part with Adonijah, B.C. 1001.

JOACHIM, *jo'-a-kim*, a celebrated Italian monk, surnamed the Prophet. He went barefoot on a pilgrimage to the Holy Land, and, on his return, entered into the order of Cistercians. He founded several monasteries, which he governed with discretion. He wrote many predictions, which were printed in a book entitled "The Everlasting Gospel." His followers pretended that miracles were wrought at his tomb, and applied to the pope to canonize him; but this was rejected, on account of some supposed errors in his works. B. at Celico, near Cosenza, 1130; D. 1202.

JOACHIM, George, a mathematician, otherwise named Rheticus. He obtained the mathematical chair at Wittemberg, where he zealously espoused and defended the astronomical system of Copernicus. He was the author of several astronomical works. B. 1514; D. 1576.

JOACHIMSTHAL, *yo-a-kim'-stal*, a mining-town of Bohemia, among the Erzgebirge mountains, 60 miles from Dresden. *Pop.* 4,500.

JOAN OF ARC, or the Maid of Orleans, *joan*, a celebrated French heroine, whose parents were simple peasants. She was servant at an inn, when she imagined that St. Michael, the tutelary angel of France, had commanded her to raise the siege of Orleans, then closely pressed by the English, under the duke of Bedford. Her pretended visions made a great noise, and she was introduced to Charles VII., whom she is said to have discovered amidst his courtiers, though he was dressed like them. She promised to relieve Orleans, and to procure the coronation of Charles at Rheims. Her offers were accepted, though the parliament treated her as an impostor. Clad in armour, she headed the troops, who were animated by her professions and example. The siege of Orleans was raised, after which she marched to Rheims, and assisted at the coronation of the king, who ennobled her family, to which he gave the name of Du Sys, with large grants of land. Joan, after heading a sortie, was taken prisoner at the siege of Compiegne, by the English, who, to their disgrace, tried and condemned her for sorcery. The story of Joan of Arc's life has furnished a theme to many writers. A large work, called the "History of Joan of Arc," in four volumes, was published in Paris in 1817. Schiller has composed a tragedy, Casimir Delavigne a touching elegy, Southey a fine poem on her life and death; Voltaire, with bad taste, wrote a burlesque and immoral poem on the heroine. B. at Domremy, in Lorraine, 1410; burnt at Rouen in 1431.

JOAN, Pope, a fictitious character, though the contrary is asserted by Platina, who calls this pope John VIII. There are several versions of the story. In one it is said that, about the middle of the 9th century, a woman named Joan, born at Mentz, and who had long worn men's clothing, obtained so great a reputation as a doctor, as to be elected to the papal chair on the death of Leo IV. It is further stated, that having become pregnant, she was taken in labour, as she was going in procession, between the Colosseum and the church of St. Clement, and died in the street. In order to avoid the like disgrace, it was said that every new pope was placed in a perforated chair to be examined. The whole of this ridiculous story, however, is now abandoned as fabulous by Catholics as well as Protestants. David Blondel, in particular, published, in 1649, an able refutation of it, in a work, called, "Familiar Explanation of the Question, Was a Woman seated on the Papal throne, between Leo IV. and Benedict III.?"

JOAN I., queen of Naples, was the daughter of King Robert of Naples. At the age of 16 she assumed the government, being at the time married to her cousin Andreas, of Hungary. She was a very handsome and accomplished young woman; but she evinced little sympathy with her husband's taste and temper. She allowed a number of conspirators, who were all nobles of the court, to murder Andreas, in 1343. Soon after this event she married her relative, Prince Louis of Tarentum; whereupon Louis of Hungary, brother of Andreas, marched with an army to avenge his brother's death. Joan's troops were worsted, and the queen fled to Avignon, where she appeared before Pope Clement VI., and protested her innocence of her husband's murder. The pope and his cardinals acquitted her; and Joan, out of gratitude, presented the pontiff with the see and county of Avignon. A pestilence breaking out soon after at Naples, Louis and his Hungarians fled; upon which Joan returned to her capital, where herself and husband were crowned in 1351. Up to the death of her second husband, which took place in 1362, Joan reigned in peace over her subjects. In the same year she married the prince of Majorca, who died in 1376; after this she married her fourth husband, Otho, duke of Brunswick. Having no issue by any of these matrimonial unions, the queen gave her niece Margaret in marriage to Charles, duke of Durazzo, whom she further nominated to be her successor. A schism, between Clement VII. and Urban VI., breaking out soon after, Joan embraced the cause of the former; whereupon Urban excommunicated her, and proclaimed Charles Durazzo king. Charles, ungrateful to his benefactress, marched against, defeated, and took her prisoner. After vainly endeavouring to induce Joan to abdicate in his favour, he shut her up in the castle of Muro. Joan, notwithstanding, would not accede; but named Louis of Anjou, brother of Charles V., king of France, as her successor on the throne of Naples. Shortly afterwards, Charles caused her to be smothered in her prison. B. 1327; D. 1383.

JOAN II., queen of Naples, was daughter of Charles Durazzo, and sister of Ladislaus, whom she succeeded in 1414, being, at the time, 44 years of age, and notorious for her scandalous life, which became still more open and disgraceful after her gaining the crown. She married James, count de la Marche, who, however, was soon compelled to retire from the court, proceeding, it is stated, to France, where he took a religious habit and died. A succession of paramours next divided the throne with this weak and wicked queen; murders, court intrigues, and barefaced profligacy reigning supreme at the court. At her death, her kingdom was left in a most miserable condition. B. 1370; D. 1435.

JOANNA, JOHANNA, or ANJOUAN, *jo-han'-na*, the largest of the Comoro group of islands, situate off the eastern coast of Africa. *Ext.* 24 miles long and 18 broad. *Desc.* Mountainous, and exhibiting a very picturesque appearance, whilst the soil is fertile, and produces rice, millet, and a variety of fruits. *Pop.* 20,000. *Lat.* 12° 15′ S. *Lon.* 44° 29′ 30″ E. This island is considerably frequented by Europeans, and particularly by English vessels, for the sake of procuring water and provisions. Its TOWN, of the same name, is surrounded by a high wall, and has a fort. *Pop.* 2,000.

JOANNINA. (*See* JANINA.)

JOAO, *jo'-a-o*, the prefix to several places in Portugal and Brazil, with populations varying between 2,000 and 10,000.

JOAO-DO-PRINCIPE, *do prcen-se-pai*, a considerable district of Brazil, abounding in copper, iron, and other minerals, and rearing large herds of cattle and horses. *Pop.* about 10,000.

JOASH, or JEHOASH, *jo'-ăsh*, king of Judah, succeeded his father Ahaziah, having escaped, by means of his aunt Jehosheba, the fury of his grandmother Athaliah, who slew all the other princes of her family. At the age of seven, Jehoiada, the high priest, caused him to be proclaimed king, Athaliah being put to death. During the life of the high priest, the king governed well; but afterwards fell into idolatry, and put to the torture Zachariah, son of his benefactor. Hazael, king of Syria, invaded Judah and defeated Joash, who shortly afterwards was slain by his own domestics. B. 896 B.C.; D. 849 B.C.

JOASH, or JEHOASH, the son of Jehoahaz, king of Israel, succeeded his father 350 B.C. He apostatized to idolatry, but paid great respect to the prophet Elisha during his last illness. He defeated the Syrians in three battles, and recovered several cities from them. He also defeated and made prisoner Amaziah, king of Judah, and took the city of Jerusalem. D. 834 B.C., having reigned 16 years, his son Jeroboam succeeding him.

JOB, *jobe*, a celebrated patriarch, was said to have been born in the "land of Uz," between Idumea and Arabia. His history makes the subject of a beautiful book in the sacred canon, and is doubtless the most ancient poem in the world. He is therein distinguished for his unshaken integrity under the severest trials, after which he was restored to wealth and honour. Some attribute this book to Isaiah, but others, with more probability, to Moses.

JOBAT, Louis, *zho'-ba*, a French Jesuit, remarkable for his knowledge of ancient coins and medals, upon which subject he wrote an elaborate treatise, printed in 1739. B. 1647; D. 1719.

JOBIE, *jo-bē'*, an island of the Indian Archipelago, situate at the entrance of the Great Bay, on the N. side of the island of Papua. *Ext.* 90 miles long, with a breadth varying between 12 and 28. *Desc.* Mountainous, and covered with wood. The coast is so high and steep, and so destitute of openings, that there is not a single creek or cove sufficiently large to receive a ship.

JOCASTA, *jo-kăs'-ta*, wife of Laius, king of Thebes, and mother of Œdipus, whom she afterwards married, not knowing him to be her son. After bearing him four children, and discovering that she had been guilty of incest, she hung herself in despair.

JOGJOCARTA. (*See* DJOKJOKARTA.)

JOGONUL, *jo-ko-bul'*, a principality of Hindostan, watered by the Jumna and the Sutlej. *Area*, 150 square miles. *Pop.* 15,000.—It has a town of the same name, in *lat.* 31° 10′ N.; *lon.* 77° 35′ E.

JODAR, *cho'-dar*, a town of Spain, in the province of Andalusia, 24 miles from Jaen. It has an old castle, now in ruins. *Manf.* Soap, earthenware, and fabrics. *Pop.* 4,000.

JODE, Pieter de, *zhode*, a celebrated engraver of Antwerp. He was instructed in his art by Golzius, after which he studied in France and Italy. His engraving of Cousins' "Last Judgment" occupied twelve sheets, altogether about 16 feet square. D. at Antwerp, 1634.——Pieter de, junior, was taught his art by the above, his father. He excelled him in some respects, and many of his prints, after portraits by Vandyck and Rubens, are regarded as very valuable by connoisseurs. B. at Antwerp, 1606; D. unknown when.——Arnold de, son of the above, was also an engraver. He is said to have engraved a print, "Mercury instructing Cupid," for Charles I. B. at Antwerp, about 1636; D. unknown when.

JODELLE, Stephen, *zho'-del*, lord of Lymodin, a French poet. He was the first who wrote tragedies on the Greek model in the French language; but one of them was so long, that it occupied ten mornings in its representation. He also wrote sonnets, elegies, odes, and tragedies. B. at Paris, 1532; D. 1573.

JODOIGNE, *zho'-doin*, a town and parish of Belgium, near the confluence of the St. Jean, 24 miles from Brussels. *Manf.* Soap, salt, oil; and there are several breweries and distilleries. It also has a trade in corn and cattle. *Pop.* 3,500.

JOECHER, Christian Theophilus, *zhe(r)'-ker*, an erudite German lexicographer. He first studied medicine, but subsequently applied himself to theology and the art of oratory, and delivered courses of lectures on rhetoric between 1715 and 1720. He afterwards filled the chair of philosophy and of history at the university of Leipsic, and became, in 1742, librarian of the same institution. His principal work is the "Allgemeines Gelehrten-Lexikon" (Universal Dictionary of Learned Men), which contained upwards of 60,000 names, and was published in 4 vols. at Leipsic, in 1750. This dictionary has since been re-edited and enlarged on several occasions. B. at Leipsic, 169[illegible] D. 1758.

JOEL, *jo'-el*, the second of the twelve minor prophets, flourished about 800 B.C. His prophecy, written in a vehement style, regards chiefly the desolation of Judæa by the Chaldeans.

JOFFREDY, GEOFFROI, or JOUFFROY, Cardinal, *zhoff'-froi*, a celebrated dignitary of the Romish church. At an early age he entered upon a religious vocation, and rapidly rose to the highest posts in his church. On the accession of Louis XI. to the throne of France, in 1461, he was bishop of Arras; but, desiring to obtain a cardinal's hat, Pope Pius II., who was anxious to procure the abolition of the "Pragmatic Sanction" (*see* PRAGMATIC SANCTION), promised him the cardinalship if he could induce Louis to repeal that act. He accomplished this task, and obtained the bishopric of Alby, and was created cardinal in recompense for so doing. He also filled many high political posts under Louis XI. B. at Franche-Comté, about 1420; D. 1473.

JOHANN-GEORGEN-STADT, a town of Saxony, 60 miles from Dresden. *Manf.* Lace, needles, tobacco, and vitriol. *Pop.* 4,000.—This place takes its name from the elector John George I., who built it as an asylum for the Protestants, who, in 1654, were expelled from Bohemia by Ferdinand II. It is situate in the centre of a district rich in metallic ores.

JOHANNISBURG, *yo-han'-nis-boorg*, a town, and capital of a circle of the same name, in E. Prussia, 70 miles from Gumbinnen. It stands near Lake Rosch, or Warschau, and is the seat of a law-court and several public offices. *Pop.* about 2,000.—The CIRCLE has an area of 608 geographical square miles, is flat and unfertile, and has a population of 34,000.

JOHANNOT, Alfred, *zho-han'-no*, a French painter, who designed many excellent pictures, and made a large number of sketches and drawings on wood, in illustration of books. B. 1800; D. 1837.——Tony, a French artist and designer of book-engravings. He was brother of the above, like whom, he also painted many superior pictures; the best of which are,—"The Battle of Fontenoy," "The Siesta," and "The Pillage." His designs upon wood were marked by great skill, refinement, and fancy, and were all in correct drawing. His principal illustrations were to "Werther," "Manon Lescaut," "Jerome Paturot," the "Vicar of Wake-

field," and the novels of George Sand, many of which have been reproduced in England. D. at Offenbach, 1803; D. 1852.

JOHANNISBERG, *yo-han'-nis-bairg*, a town of Nassau,

JOHANNISBERG.

12 miles from Mainz. It is famed for producing the best Rhenish wine, called Johannisberg. *Pop.* 900.

JOHN, surnamed Mark, a disciple of the apostles, who accompanied Paul and Barnabas in their journeys for the propagation of the gospel. When these two apostles separated, Mark went with Barnabas to Cyprus. The other particulars of his life are unknown.

JOHN I., king of England, surnamed Sansterre, or Lackland, was the fifth son of Henry II. He deprived his nephew Arthur of the throne, to which he was heir, and confined him in prison at Rouen, where he was murdered. The French Court of Peers demanded justice of Philip Augustus of France, against the murderer, who was condemned to lose all his lands in that country. The pope also excommunicated him, and absolved his subjects from their allegiance. He for some time resisted the papal authority, but in 1213 made his submission. The English barons invited over Louis, the son of Philip, and crowned him at London in 1216; but he did not continue long in England. John signed the great charter, confirming the national liberties, commonly called Magna Charta, in 1215; his signature being extorted from him by the barons. B. at Oxford, 1166; D. at Newark, 1216.

JOHN I., king of France and Navarre, was the posthumous son of Louis X. At his birth he was proclaimed king, but died when only a few days old, upon which the crown devolved upon his uncle, Philippe V. D. 1316.

JOHN II., surnamed the Good, king of France, succeeded his father, Philip of Valois, in 1350. He obtained a victory over the English in 1355; but, the year following, he was defeated and taken prisoner at Poitiers, by Edward the Black Prince, who sent him to London, where he remained till the peace of Bretigny, in 1360. His ransom was three million crowns of gold and eight provinces; but, before the sum could be raised, John died suddenly in the Savoy in London, aged 45. He was a prince of great courage and virtue. B. 1319; D. 1364.

JOHN I., Pope, was a native of Tuscany, and ascended the papal chair on the death of Hormisdas, in 523. Theodoric, king of the Goths, a violent Arian, threw him into prison at Ravenna, where he died in 526.

JOHN II. was a Roman, and succeeded Boniface II. in 532. He opposed the Eutychians and Nestorians, and died in 535.

JOHN III., a Roman, succeeded Pelagius I. in 560. D. 574.

JOHN IV., a native of Dalmatia, was elected to succeed Severinus in 640. D. 642.

JOHN V. was a native of Syria, and ascended the papal throne, in succession to Benedict II., 686. D. in the same year.

JOHN VI., a Greek, succeeded Sergius I. in 702. He held a council at Rome, to consider the charges by the English clergy against Wilfred, archbishop of York, who was acquitted. D. 705.

JOHN VII. was also a Greek, and succeeded the above. D. 707.

JOHN VIII., a Roman, was elected to the pontificate on the death of Adrian II., in 872. He crowned the emperor Charles the Bald in 875, and, three years after, went to France, where he held a council at Troyes. In his time Italy was ravaged by the Saracens, who obliged the pope to pay tribute. He corresponded with Photius, patriarch of Constantinople, who had driven Ignatius from his seat and usurped the dignity. John, imposed upon by the pretences of the intruder, acknowledged him patriarch; but, on discovering his error, he excommunicated him. D. 882.—This pope has been styled the Ninth by those who profess to believe in the existence of Pope Joan, whom they call John VIII. (*See* JOAN, POPE.) Many of his letters are extant.

JOHN IX. became pope in 898. D. about 900.

JOHN X., archbishop of Ravenna, was elected to the papacy in 915. He was a turbulent prelate, and defeated the Saracens, who had desolated Italy a long time; but he was himself driven from Rome by Guy, duke of Tuscany, who was supported by the Roman people. He was put to death in 927.

JOHN XI. was made pope at the age of 25, in 931, through the influence of his mother Marozia, wife of Guy, duke of Tuscany; but his brother Alberico afterwards threw both him and her into the castle of St. Angelo, where John died, in 936.

JOHN XII., a Roman of noble birth, named Octavianus, was elected pope in 956, and was the first who changed his name on that occasion. At that time Berenger tyrannized over Italy, and the pope implored the assistance of the emperor Otho I., who delivered the country. John crowned Otho at Rome, and promised him fidelity, which, however, was of short duration, for he united with the son of Berenger against his deliverer. Otho returned to Rome in 963, and called a council, in which the pope was accused of adultery, sacrilege, and other crimes, which being proved, he was deposed. On the departure of the emperor, John entered Rome, and exercised dreadful cruelties on his enemies. He was assassinated in 964, by a man whose bed he had violated.

JOHN XIII. was elected pope in 965, through the instrumentality of the emperor Otho, against the will of the Roman people. Peter, prefect of Rome, drove him thence in 966; but the emperor restored him, and Peter became an exile in his turn. D. 972.

JOHN XIV., bishop of Pavia, and chancellor to the emperor Otho II., obtained the papal chair after Benedict VII., in 983; but three months after his election he was sent to the castle of St. Angelo by the usurper, Pope Boniface. D. of poison, 984.

JOHN XV. became pope in 985. D. 996. This pope is styled XVI. by those that maintain he succeeded one of the same name who died a few days after his election.

JOHN XVII. was a Calabrian, and nominated to the papal chair by Crescentius, the Roman consul, in 997. Otho III., however, went to Rome, and put to death Crescentius, and imprisoned John.

JOHN XVIII. was elected pope, in succession to Sylvester II., in 1003. D. four months after his election.

JOHN XIX. succeeded the above. D. about 1009.

JOHN XX., son of Count Gregory of Tuscany, became pope after his brother Benedict, in 1024. D. 1034.

JOHN XXI. was a Portuguese, and the son of a

physician. He became pope in 1277, but died eight months after his election. Some works of his on philosophy, medicine, and divinity, are extant.

JOHN XXII. was elected pope, at Lyons, in 1316. He founded several abbeys and bishoprics, but his pontificate was disturbed by quarrels with the emperor and the Cordeliers, which order the pope endeavoured to suppress. By his works he seems to have been better fitted for a physician than a pope. They are,—"Thesaurus Pauperum; or, a Collection of Remedies for the Poor;" "Treatise on Disorders of the Eyes;" "On the Formation of the Fœtus;" "On the Gout;" "Advice for Preserving Health." D. at Avignon, 1334.

JOHN XXIII., Cardinal Cossa, a Neapolitan, studied at Bologna, and became chamberlain to Boniface IX., who made him cardinal. He was elected pope in 1410, after the death of Alexander V., during the great schism, and promised to renounce the pontificate if Gregory XII. and Peter de Luna would drop their pretensions. Not fulfilling his engagements, he was deposed by the council of Constance, in 1415, and imprisoned at Heidelberg, where he remained three years, and was then released at the request of Martin V. D. 1419.

JOHN I., surnamed Zimisces, emperor of Constantinople, was of an illustrious family. He stabbed the emperor Nicephorus Phocas, in 969, and obtained many victories over the Russians, Bulgarians, and Saracens. He was poisoned by Basil the Eunuch, in 975.

JOHN II. (COMNENUS) succeeded Alexis Comnenus, his father, in 1118. He gained several battles over the Turks and Servians, and governed with great prudence and liberality. He died in 1143, of a wound which he received from a poisoned arrow.

JOHN III. (DUCAS) was crowned at Niceus, in 1222, at the time when the Latins were in possession of Constantinople. He was a prince of great virtue, gained many battles, defeated the Scythians, Tartars, and Bulgarians, and extended his empire on all sides. D. 1255.

JOHN IV. (LASCARIS), son of Theodore the Young, whom he succeeded in 1259, at the age of 6 years; but, in the same year, the despot Michael Palæologus deprived him of his crown and his eyes, and imprisoned him for life. D. 1284.

JOHN V. (PALÆOLOGUS) succeeded his father, Andronicus the Younger, in 1341, but his throne was for a long period usurped by John Cantacuzenus, whose daughter he married, after recovering his throne. His son Andronicus revolted against him, and the Genoese made themselves masters of the isle of Lesbos, and Amurath I. took the city of Adrianople. D. 1391.

JOHN VI. (CANTACUZENUS) was the minister and favourite of Andronicus Palæologus, who made him guardian of his children John and Emanuel, with whose mother, Jane of Savoy, he governed for some time with great wisdom and moderation. But, in 1345, he assumed the imperial title in Thrace, and, in 1347, took Constantinople, compelling John Palæologus, who had been crowned in 1341, and who had married his daughter, to retire to Salonica. The exiled monarch, however, with the help of the Genoese, defeated the fleet of the usurper, and obliged him to quit his throne and capital. He then retired to the monastery of Mount Athos, where he devoted himself to literary studies, and wrote a valuable history of the empire, and a defence of Christianity against the Mohammedans.

JOHN VII. (PALÆOLOGUS) succeeded his father Emanuel, in 1425. His reign was very unfortunate, and the Turks made such progress in his dominions, as to reduce him to the necessity of imploring the succour of the Latins. He consented to a union between the two churches, which was performed at the council of Ferrara, in 1439, at which John assisted in person. D. 1448.

JOHN I., king of Portugal, was the natural son of Peter, and, in 1383, ascended the throne, to the prejudice of Beatrice, daughter of Ferdinand I., his brother. John I., king of Castile, the husband of that princess, disputed the crown, but was defeated at the battle of Aljubarota, in 1385. He then turned his arms against the Moors of Africa, and took Ceuta and other places. D. 1433.

JOHN II. succeeded his father, Alphonsus V., in 1481. He discovered several plots that were formed against him at the beginning of his reign, and put the principal conspirators to death. He gained some places in Africa, and distinguished himself in the battle of Toro, against the Castilians, in 1476. His acts procured him the titles of the Great and the Severe. He encouraged navigation; and it was during his reign that Bernal Diaz sailed round the Cape of Good Hope; he also despatched settlements to India. B. 1455; D. 1495.

JOHN III. succeeded his father Emanuel on the throne of Portugal in 1521. He greatly encouraged navigation, commerce, and the arts. His navigators discovered Japan; and he sent Francis Xavier to India as a missionary. During his reign a terrible earthquake occurred at Lisbon, by which 30,000 persons perished. D. 1557.

JOHN IV., called the Fortunate. The Spaniards rendered themselves masters of Portugal in 1580, and kept possession of it till 1640, when the Portuguese revolted, and placed the crown on the head of the duke of Braganza, John IV., who held it till his death, in 1656.

JOHN V., successor of Peter II., was crowned king of Portugal in 1706. He entered into an alliance with Charles of Austria, who laid claim to the crown of Spain, and fought against Louis XIV. D. 1750.

JOHN VI., second son of Peter III., was appointed regent when his mother, Maria I., lost her reason, in 1799. In 1817 he was driven by the French from Portugal; whereupon he took up his residence in Brazil, with the title of emperor. On the death of his mother, in 1816, he was proclaimed king, but did not return to Portugal till 1821. D. 1826.

JOHN I., king of Castile and Leon, succeeded his father, Henry II., in 1379, at the age of 21 years. He made war in Portugal, for the purpose of placing his son on the throne of that country, but was unsuccessful. He was surnamed "father of his country," for his generous and just rule of his kingdom. D. 1390.

JOHN II., king of Castile and Leon, was son of Henry III., and was proclaimed king when less than two years of age, his uncle Ferdinand being appointed regent. He made war successfully against the kingdoms of Aragon and Navarre, and the Moors of Grenada. He greatly assisted in the restoration of Spanish literature, and was father of the celebrated Isabella and of Henrique IV. B. 1405; D. 1454.

JOHN I., king of Aragon, succeeded his father, Peter IV., in 1387. Throughout his reign he was continually at hostilities with his subjects, whom he governed with great injustice and severity.

JOHN II., king of Aragon and Navarre, was son of Ferdinand the Just, and ascended the throne of Navarre on marrying Blanche, daughter of Charles the Noble, in 1425, and that of Aragon in 1458, after the death of Alphonsus, his brother. He was for a long time at war with his son Don Carlos, to whom Blanche, his mother, had left the crown of Navarre at her death, in 1441. He died in 1479, leaving the kingdom to his son Ferdinand the Catholic.

JOHN I., king of Navarre. (*See* JOHN I., king of France.)

JOHN II., king of Navarre. (*See* JOHN II., king of Aragon.)

JOHN III., king of Navarre, married, in 1484, Catharine of Navarre, the heiress to the crown, and through this marriage he obtained the crown of that kingdom in 1494; but being a prince without any energy, lost all his possessions with the exception of Bearn. He died in France, in 1516, leaving a son, Henry II., titular king of Navarre, whose daughter, Jeanne d'Albret, was mother of Henry IV. of France.

JOHN, king of Bohemia, the son of the emperor Henry VII., was elected to the throne in 1310, at the age of 15. He was a warlike prince, and, after defeating the Lithuanians, assumed the title of king of Poland. He lost an eye in that expedition, and a Jew doctor, who pretended to restore him to sight, deprived him of the other. His military spirit, however, continued unabated, and he accompanied Philip of France, in 1346, to the battle of Cressy, where he was guided betweeen two brave knights, each holding his bridle. He fell in that action, and was buried at Luxembourg. He was succeeded in his kingdom of

Bohemia by one of his sons, who became emperor under the title of Charles IV.

JOHN I., king of Poland, was the second son of Casimir IV., whom he succeeded in 1492. He was the friend of letters and of peace, and during his reign there were few military events of importance. He was succeeded by his son Alexander, grand-duke of Lithuania. B. 1459; D. 1501.

JOHN II., or JOHN CASIMIR. (*See* CASIMIR V.)

JOHN III., John Sobieski, king of Poland, was youngest son of James Sobieski, governor of Cracow, and educated at Paris. In 1665 he was made grand marshal and general of the Polish armies, after which he was appointed master of the royal house, and prelate of Cracovia. He retook several cities from the rebellious Cossacks of the Ukraine, and distinguished himself in many gallant actions. In 1673 he gained the memorable battle of Chocim, upon the Niester, in which the Turks lost 28,000 men. The year following he was elected king of Poland, on the death of Michael, and likewise compelled the Turks to sue for peace. In 1683 he forced them to raise the siege of Vienna, which otherwise would inevitably have been taken. D. at Warsaw, 1696.

JOHN I., or JOANICE, king of Bulgaria, usurped the throne to the prejudice of his brother's son. The emperor Baudouin having refused the alliance of John, he marched against, defeated, and took him prisoner at Adrianople. Baudouin was shut up at Ternora, where he shortly afterwards died. He subsequently turned his arms against Boniface, marquis of Monferrat, and king of Thessalonica; but was compelled to beat a retreat. He again resorted to arms on the death of Boniface, in 1207, and had almost reached Thessalonica, when he was assassinated by one of his generals. D. 1207.

JOHN I., king of Sweden, was son of Swerker, and successor of Eric X. He organized, with small success, an expedition into Esthonia, for the propagation of Christianity in that country. He was the last of the royal race of Swerker. D. 1222.

JOHN II., king of Sweden and Denmark. (*See* JOHN I., king of Denmark.)

JOHN III., king of Sweden, was son of Gustavus Wasa. He dethroned his brother, Eric XIV., in 1568, on account of his tyranny and cruelties. He terminated the war against Denmark, that had been commenced under the previous reign, and endeavoured, but unsuccessfully, to banish Lutheranism from his dominions, between the years 1570 and 1580. He afterwards made war against Joan Vasilivitch, and gained over him many advantages, but signed a peace in 1583. He named Sigismund, his son, king of Poland, in 1587. B. 1537; D. 1592.

JOHN I., king of Denmark and Sweden, succeeded, on the throne of Denmark, Christian I., his father, in 1481, dividing the duchy of Holstein with Frederick, his brother. He became king of Sweden in 1497; but the Swedes revolted against him in 1501. He reigned in Denmark till 1513.

JOHN I., duke of Brittany, reigned between the years 1237 and 1286.

JOHN II. was successor of the above, and ruled from 1286 to 1305.

JOHN III., called the Good, reigned from 1312 till 1341. Being without issue, he nominated, to the prejudice of his own brother, John de Montfort, Charles de Blois, to whom he gave his niece in marriage; an act which led to many sanguinary conflicts.

JOHN IV., more commonly known as John de Montfort, was brother of the preceding. He had already secured from his rival, Charles de Blois, the greatest part of Brittany, when the Court of Peers of France adjudged the duchy to his rival, Charles, in 1341. John surrendered to the duke of Normandy, whom Philippe de Valois had sent against him at the head of an army. He was confined for four years at the Louvre. At the end of that time he contrived to make his escape, and rejoined Joan of Flanders, his wife, who had continued the war with heroic courage. He, however, died a few months afterwards, leaving Brittany under the rule of Charles. D. 1345.

JOHN V., surnamed the Valiant, termed John IV. by those who exclude John de Montfort from the dukes of Brittany. He was son of the preceding, and brought up at the court of Edward III. of England, whose daughter he married. He attacked Charles de Blois, who had dispossessed his father of the duchy of Brittany, and defeated him at Auray, in 1364; whereupon Charles acknowledged him to be the rightful duke. D. 1399.

JOHN VI. was son of the above, and attained his majority in 1414, being then only 14 years of age. He assisted the English in their expeditions against the French king, and, in return, Charles VII. aided his rival, the duke de Pe. thièvre, who, in 1419, drew John into an ambuscad., and kept him prisoner for five years, when he was released by his barons. Inconstant and feeble, he allied in turns with Charles VII. and with Henry IV. of England, who, at that period, was master of almost the whole of France. D. 1442.

JOHN, duke of Burgundy and count of Nevers, succeeded his father in 1404, at the age of 33. The houses of Burgundy and Orleans at that period disputed the government of France, during the insanity of Charles VI. In 1407 he caused the assassination of the duke of Orleans, and, by that act, became absolute master in Paris; but it was also the commencement of the fearful internal struggle between the Burgundians and the Armagnacs. He was driven from Paris, but re-entered it in 1418, committed many horrible massacres, possessed himself of the king's person, usurped all authority, and favoured, by the troubles he excited, the conquests of the English in France. He was invited by the dauphin, afterwards Charles VII., to a conference on the Pont de Montereau, and there assassinated by a favourite of Charles, in revenge of the assassination of the duke of Orleans, in 1419.

JOHN, secretary to the emperor Honorius, usurped the empire of the West, on the death of his master, in 423, and overran Italy, Gaul, and Spain. Valentinian III., to whom the throne belonged, attacked him, at the head of a large army, and defeated him: he was afterwards taken by treason at Ravenna, where he was put to death, in 425.

JOHN, surnamed Philoponas, 'the lover of study,' a learned grammarian of Alexandria, in the 7th century. It is said he was appointed conservator of the celebrated Alexandrian library, and he retained the post till Omar ordered the destruction of the whole by fire. He wrote a treatise on the creation of the world, and edited several of Aristotle's works. D. about 660.

JOHN OF ARRAS, secretary of the duke de Berry, composed, in 1387, by order of Charles V., and for the amusement of the duchess de Bar, the romance of "Melusine," which was printed for the first time in 1500.

JOHN OF AUSTRIA, DON, natural son of the emperor Charles V., was brought up without the knowledge of his birth till his father, on his death-bed, had revealed the secret to his son Philip II., king of Spain, who caused him to be brought to his court, and publicly acknowledged him as his brother. In 1570 he was sent into Grenada against the Moors, where he terminated the war with great glory. The year following, he was appointed by the Christian princes commander of the fleet against the Turks, and gained the celebrated battle of Lepanto, where the Turks lost 30,000 men and 200 vessels. In 1573 he took Tunis, and in 1576 was made governor of the Low Countries, then in a state of revolt. After taking Namur, Charlemont, and Marienburg, he was vigorously opposed by the archduke Matthias and the prince of Orange. He, however, gained a great battle at Gembloux, in 1578, and died the same year, as is supposed, of poison, aged 32. (*See* J. Lothrop Motley's "Rise of the Dutch Republic.") Casimir Delavigne, the celebrated French author, has written a beautiful play on the incidents of Don John's early career. B. at Ratisbon, 1545.

JOHN OF BOLOGNA, a French sculptor, who went in early youth to Rome, for the purpose of studying the great masters' works. Having presented to Michael Angelo a statue, finished with all the care of which he was capable, the latter destroyed it, saying that he should learn to carve before he finished. This caused John to work with redoubled ardour, and soon he became one of the best sculptors in Italy. He took up his residence at Bologna, and there executed a great

number of statues, one of the most celebrated of which is the group, "Rape of the Sabines," exhibited at Florence. The bronze horse in the statue of Henry IV., on the Pont Neuf, at Paris, is also his work. B. at Douai, 1524; D. 1608.

JOHN OF BRUGES. (*See* VAN EYCK.)

JOHN OF GAUNT, or GHENT, duke of Lancaster, was the third son of Edward III., king of England. He took, for his second wife, Constance, a natural daughter of Peter the Cruel, king of Castile and Leon, and, on the death of that monarch, he laid claim to the throne in right of his wife, in opposition to Henry of Transtamare, but without success. He served with great glory in France, with his brother the Black Prince, and, on his death, had the management of affairs during the life of his father. On the accession of Richard II., he retired; but the envy of the courtiers, particularly the ecclesiastics, who hated him for protecting Wickliffe, followed him with false accusations of a design to usurp the throne, from which he satisfactorily cleared himself. In 1386 his only daughter was married to the heir-apparent of the king of Castile, and John renounced his claim to that crown, in consideration of a considerable sum and a pension. He took for his third wife, Catharine Swynford, sister to the wife of his friend Chaucer, the poet. John of Gaunt was a man of great valour, prudence, and generosity. His son afterwards became king, by the title of Henry IV. B. at Ghent, 1340; D. 1399.

JOHN OF JERUSALEM, ST., Order of. (*See* HOSPITALLERS.)

JOHN OF LEYDEN. (*See* BOCCOLD.)

JOHN OF PARIS, a learned professor of theology in the 13th century. In the dispute between Pope Boniface VIII. and Philip the Fair, king of France, he took the part of the latter, and defended his cause with zeal and ability. He also started objections to the doctrine of transubstantiation, for which he was cited to Rome. He wrote,—"De Regia Potestate et Papali;" "De Modo existendi Corporis Christi in Sacramento Altaris." D. 1304.

JOHN OF SALISBURY, a learned English monk of the 12th century, who became bishop of Chartres, in France, about 1164. He studied at Oxford, but also visited Paris, where he attended the lectures of Abelard. He likewise went to Italy, and, at Rome, lived some time under the patronage of Pope Adrian IV. On his return to England, he became secretary to Thomas à Becket, archbishop of Canterbury, whom he accompanied in his exile to France. After the tragical death of à Becket, he became bishop of Chartres. In learning he is said to have had no living superior, and wrote several valuable works on theology, politics, and philosophy. B. at Salisbury, about 1119. D. at Chartres, 1182.

JOHN, ST., the name of several parishes of England, with populations varying between 500 and 23,000. The largest is in Northumberland.

JOHN, ST., a village and fort in Canada, on the Richelieu river, 20 miles from Montreal.

JOHN, ST., a lake of Lower Canada, 120 miles from Quebec. It has a diameter of about 30 miles, and receives several rivers. It abounds with excellent fish.

JOHN, ST., a bay and island on the west coast of the island of Newfoundland.

JOHN, ST., a city and seaport of British N. America, in the province of New Brunswick. It stands on a rocky peninsula at the mouth of the river St. John, and is regularly laid out and well built. The principal buildings are of brick, and consist of various places of worship, a marine hospital, barracks, government storehouses, a gaol, and different schools. The harbour is commodious and safe, and never obstructed by ice. On its W. side stands Carlton, a town included in the municipality. *Imp.* British manufactures and colonial produce. *Exp.* Fish, timber, lime, and furs. *Pop.* about 22,000. *Lat.* 45° 14′ 6″ N. *Lon.* 66° 3′ 10″ W. This town was founded by American loyalists, in the last century, and has frequently suffered severely by fire.—Also a large river of North America, rising near the source of the Connecticut, in the United States, and after a course of about 400 miles, the half of which is in N. Brunswick, falling, in the British province of New Brunswick, into the Bay of Fundy, in *lat.* 45° 20′ N., *lon.* 66° W.

JOHN, St., the Evangelist and Apostle, was the son of Zebedee and Salome, and the brother of James the Great. His occupation was fishing, in which he was engaged when Jesus called him. John was the beloved disciple of his master, and leaned on his breast at the last supper. He preached the gospel in several parts of Asia, and fixed his residence at Ephesus. In the persecution by Domitian, he is said to have been plunged into a caldron of boiling oil; but coming out unhurt, he was banished to the isle of Patmos, where he received the visions contained in his Apocalypse. In the reign of Nerva he was released, and returned to Ephesus, where he died, in extreme old age. He wrote his gospel to complete what had been omitted by the other evangelists, and to refute the errors of Cerinthus and Ebion. In the New Testament there are likewise three epistles by him.

JOHN, St., the Baptist, the forerunner of the Messiah, was the son of Zacharias, a Jewish priest, and Elizabeth, a near relation of Mary, mother of Jesus Christ. His birth was foretold by an angel. After passing his early years in retirement, he came forth publicly as a preacher of repentance, baptizing all who confessed their sins. Our Saviour was baptized by him in the waters of Jordan, and John bore testimony to his divinity. He was beheaded by Herod, the king, at the instigation of Herodias, Philip's wife, with whom Herod lived in adultery, A.D. 29.—Salome, daughter of Herodias, having pleased Herod by her dancing, the king declared he would grant her any request she might make, even to the half of his kingdom. The girl, prompted by her wicked mother, asked for the head of John the Baptist. An executioner was sent to the prison, where the saint was confined: John was beheaded, and his head brought to Salome, who presented it on a dish to her mother.

JOHN, St., CHRYSOSTOM. (*See* CHRYSOSTOM.)

JOHN'S ISLAND, an island on the coast of South Carolina, with a circumference of about 30 miles. *Pop.* Unascertained. *Lat.* 32° 42′ N. *Lon.* 80° 10′ W.

JOHN'S, ST., a town of British N. America, the capital of the island of Newfoundland. It stands on the east coast, on a bay of the same name, and has a good harbour. Though irregularly built, it contains many good shops and stores, the former mostly of stone. The public buildings, exclusive of the churches, are—a house of assembly, an asylum, an hospital, a market-house, and various schools. There are also several literary and scientific institutions, and it has three cemeteries. Cod-fish is the principal article of export; in exchange for which it imports goods and wares of every description. *Pop.* about 20,000, exclusive of 6,000 engaged in the fisheries. *Lat.* 47° 33′ 6″ N. *Lon.* 52° 43′ W.—This town has suffered severely at different times from fire;—in February, 1816, and November, 1817. On the 21st of the same month, another fire broke out, which consumed the greater part of the western half of the town, that had escaped the previous conflagration. It was again visited by fire on the 21st August, 1818, by which great loss was sustained.

JOHN'S, ST., one of the Virgin Islands, about 36 miles E. of Porto Rico. *Ext.* 12 miles long, by 4 broad. *Pop.* 2,600. *Lat.* 18° 7′ N. *Lon.* 64° 32′ W.

JOHN'S, ST., the capital of Antigua island, in the West Indies. It is a regular and well-built town. *Lat.* 17° 4′ N. *Lon.* 62° 4′ W.

JOHN'S, ST., a river of East Florida, which spreads into broad bays and lakes, of which Lake George is the chief. *Lat.* 30° 32′ N. *Lon.* 81° 42′ W.

JOHN'S, ST., a river of Lower Canada, joining the St. Lawrence 30 miles below Montreal.

JOHNSON, Thomas, *jon'-son*, a learned Englishman, who for some time was engaged at Eton, and afterwards set up a school at Brentford. He produced editions of Sophocles and other ancient authors. B. about 1675; D. about 1750.

JOHNSON, Samuel, a learned English critic, lexicographer, and miscellaneous writer, was the son of a bookseller at Lichfield. His education was commenced at the free school of *Lichfield*, and in 1728 he was admitted of Pembroke College, Oxford; but, being too poor to remain at the university, he, in 1731, quitted it without a degree. He soon afterwards lost his father, who left him in such poor circumstances that he sought

the post of usher of a school at Market-Bosworth, Leicestershire, where, however, he did not continue long. He next resided with a printer at Birmingham, where he translated Lobo's account of Abyssinia. In 1735 he married Mrs. Porter, a widow lady of that town, who was possessed of the sum of £800; and with this capital he the same year opened a school at Edial, near Lichfield; but he obtained only three scholars, one of whom was David Garrick. About this time he began his tragedy of "Irene." In 1737 he set out for the metropolis, accompanied by Garrick. On fixing his residence in London, he formed a connection with Cave, the publisher of the "Gentleman's Magazine," for which work he wrote during several years, his principal employment being an account of the parliamentary debates. At this period he contracted an intimacy with Richard Savage, whose name he has immortalized by one of the finest pieces of biography ever written. In 1749 appeared his "Vanity of Human Wishes," an imitation of Juvenal's tenth Satire. Two years previously, he had printed proposals for an edition of Shakspeare, and the plan of his English

DR. JOHNSON.

Dictionary, addressed to Lord Chesterfield. The price agreed upon between himself and the booksellers for the last work was £1,575. In 1749 Garrick produced his friend's tragedy upon the stage of Drury-lane Theatre, but it was unsuccessful. In 1750 he commenced his "Rambler," a periodical paper, which was continued till 1752. In this work only five papers were the production of other writers. About the period of his relinquishing the "Rambler," he lost his wife, a circumstance which greatly affected him, as appears from his Meditations, and the sermon which he wrote on her death. In 1754 he visited Oxford. The next year appeared his dictionary, which, instead of three, had occupied eight years. Lord Chesterfield endeavoured to assist it by writing two papers in its favour in the "World;" but, as he had hitherto neglected the author, Johnson treated him with contempt. The publication of his great work did not relieve him from his embarrassments, for the price of his labour had been consumed in the progress of its compilation, and the year following we find him under an arrest for five guineas, from which he was released by Richardson, the printer. In 1758 he began the "Idler," which was published in a weekly newspaper. On the death of his mother, in 1759, he wrote the romance of "Rasselas," to defray the expenses of her funeral, and to pay her debts. In 1762, George III. granted him a pension of £300 per annum. In 1763, Boswell, his future biographer, was introduced to him, a circumstance to which we owe the most minute account of a man's life and character that has ever been written. Boswell, though a very ordinary mortal, has immortalized himself by this performance. In his book, everything about Johnson is supplied to us; in Lord Macaulay's words, we have "his coat, his wig, his figure, his face, his scrofula, his St. Vitus's dance, his rolling walk, his blinking eye, the outward signs which too clearly marked the approbation of his dinner; his insatiable appetite for fish-sauce and veal pie, with plums; his inextinguishable thirst for tea; his trick of touching the posts as he walked; his mysterious practice of treasuring up scraps of orange-peel; his morning slumbers; his midnight disputations; his contortions; his mutterings; his gruntings; his puffings; his vigorous, acute, and ready eloquence; his sarcastic wit; his vehemence; his insolence; his fits of tempestuous rage; his queer inmates—old Mr. Levett and blind Mrs. Williams, the cat Hodge, and the negro Frank—all are as familiar to us as the objects by which we have been surrounded from childhood." Johnson had the honour of a conversation with the king in the royal library, in 1765, when his majesty asked if he intended to publish any more works. To this he answered, that he thought he had written enough; on which the king said, "So should I too, if you had not written so well." About this time he instituted the Literary Club, consisting of some of the most celebrated men of the age. In 1773 he went on a tour with Mr. Boswell to the western islands of Scotland, of which journey he shortly afterwards published an account, which occasioned a difference between him and Macpherson, relative to the poems of Ossian. In 1775 the university of Oxford sent him the degree of LL.D., which diploma, ten years before, had been conferred on him by the university of Dublin. In 1779 he began his "Lives of the English Poets," which was the last of his literary labours. After a long illness, during part of which he had fearful apprehensions of death, his mind became calm, composed, and resigned, and he died full of that faith which he had so vigorously defended and inculcated by his writings. His remains were interred in Westminster Abbey, and a statue, with an appropriate inscription, has been erected to his memory in St. Paul's Cathedral. A complete list of his works is prefixed to Boswell's "Life." As a writer, few have done such essential service to his country, by fixing its language and regulating its morality. In his person he was large, robust, and unwieldy; in his dress he was singular and slovenly; in conversation positive, and impatient of contradiction. But with all his singularities he had an excellent heart, full of tenderness and compassion, and his actions were the result of principle. He was a stout advocate for truth, and a zealous champion for the Christian religion as professed in the Church of England. In politics he was a Tory, and at one period of his life a friend to the house of Stuart. He had a noble independence of mind, and would never stoop to any man, however exalted, or disguise his sentiments to flatter another. B. at Lichfield, 1709; D. in London, 1784.

JOHNSON, Richard, an English grammarian, who was head-master of the New School at Nottingham from 1707 to 1720. He published,—"Noctes Nottinghamicæ;" "Grammatical Commentaries." He was a master of arts, but of what university does not appear. He drowned himself in a fit of despondency in a rivulet near Nottingham, in 1720.

JOHNSON, Samuel, an English divine, who was educated at St. Paul's School, London, and Trinity College, Cambridge. In 1670, he obtained the living of Corringham, in Essex, but resided in London, where he made himself conspicuous in opposing the succession of the duke of York, afterwards James II., and the measures of the court. Having written a book against the doctrine of passive obedience, under the title of "Julian the Apostate," in which the duke was attacked, he was condemned to pay a fine of five hundred marks. When the army was encamped on Hounslow Heath, he published a remonstrance to the soldiers in behalf of the Protestant religion, for which he was sentenced to stand twice in the pillory, to pay a heavy fine, to be degraded from his function, and whipped from Newgate to Tyburn. This sentence was rigorously inflicted, but at the Revolution the parliament declared the pro-

ceedings illegal. He was also rewarded with a pension, and was offered the deanery of Durham, which he considered as inadequate to his merits. B. in Warwickshire, 1649; D. 1703.

JOHNSON, John, a learned divine, was educated at Cambridge, where he became fellow of Corpus Christi College. Archbishop Sancroft gave him two livings in Kent, and Archbishop Tenison presented him to that of Margate. He had also the vicarage of Cranbrook. He was twice chosen proctor in convocation for the diocese of Canterbury. On the accession of George I. he refused to take the oaths, but afterwards submitted. He wrote,—"The Clergyman's Vade-Mecum;" "A Collection of Ecclesiastical Laws, Canons, &c.;" "The unbloody Sacrifice and Altar unveiled and supported;" "A Paraphrase on the Psalms in the Liturgy." B. near Rochester, 1662; D. 1725.

JOHNSON, Martin, a landscape-painter of great merit in the reign of James II., whose views in England being scarce and valuable, are only to be found in the collections of connoisseurs.

JOHNSON, Charles, a lawyer and dramatic writer. He acquired some wealth by his plays, and having married a wealthy widow, set up a tavern in Bow Street, Covent Garden. Pope ridiculed him in his "Dunciad," on account of his unusual size. B. 1679; D. 1748.

JOHNSON, Maurice, an English antiquary, who was educated as a barrister. He established a literary society at Spalding, in 1712, and, in 1717, was one of the revivers of the Antiquarian Society, to which he sent numerous contributions. B. at Spalding, Lincolnshire, about 1687; D. 1755.

JOHNSON, Thomas, an English botanist. He became an apothecary in London, and, according to Wood, was the best herbalist of his age. He wrote the first local catalogue of plants published in England. But his great work was an improved edition of Gerard's "Herbal." In the civil wars he entered the royalist army, and the university of Oxford conferred on him the degree of M.D. At the siege of Basinghouse, he received a wound of which he died. Besides the above, he wrote a treatise on the hot springs of Bath, and other pieces. B. at Selby, Yorkshire, 1561; D. 1644.

JOHNSTON, Alexander Keith, *jon'-ston*, an eminent modern geographer. His first studies were directed towards fitting him for the pursuit of medicine; but a strong predilection for design caused him to become apprentice to an engraver. From early youth he was an attentive student of geography, and, in order to make himself master of all that was to be learned with respect to it, he acquired, in succession, French, Italian, Spanish, and German. The result of so much well-directed industry, was the publication, in 1843, of his first great geographical work, "The National Atlas," in folio, which procured for him election as fellow of the Royal Geographical Society, and the appointment of geographer to the queen in Scotland. A close study of the writings of Humboldt, and other great German and French writers, on his favourite art, enabled him to produce, in 1848, his "Physical Atlas," a splendid work, characterized by the "Bulletin of the Paris Geographical Society," as "one of the most magnificent monuments which the scientific genius of the 19th century has raised." He was soon afterwards made honorary member of the Geographical Societies of Paris and Berlin. He was likewise elected fellow of the Royal Society of Edinburgh, to whose papers he contributed "An Historical Notice of the Survey of Scotland." The "Dictionary of Geography" was his next work, first published in 1851, and again, in an enlarged and corrected form, in 1855. The president of the Geographical Society spoke thus, in 1856, of his great work:—"Our associate Mr. Alexander Keith Johnston has completed the new edition of his superb 'Physical Atlas.' The publication of the first edition of this great work, ten years since, had the effect of introducing in this country almost a new era in the popular study of geography, through its attractive and instructive illustration of the prominent features of science. The second edition is, to some extent, an entirely new work, owing to the additions and improvements which have been introduced, . . . . and the addition of a large general index adds materially to the utility of this extensive compendium of natural geography." He has, in addition to the above great works, produced an "Atlas of the Historical Geography of Europe;" a smaller "Physical Atlas," in 4to; a number of educational works on classical, general, and physical geography; an "Astronomical Atlas," assisted by Mr. Hind; and with Sir R. Murchison and Professor Nicol, a "Geographical Map of Europe." B. at Kirkhill, in Midlothian, 1804.

JOHNSTON, Arthur, an eminent physician, educated at the university of Aberdeen, but took his doctor's degree at Padua, in 1610. In 1637 he published a translation of David's Psalms into Latin verse, dedicated to Archbishop Laud, who procured him the appointment of physician to Charles I. B. near Aberdeen, 1587; D. at Oxford, 1641.

JOHNSTON, John, an eminent naturalist and physician, who wrote, in 1651, the "Natural History of Birds, Fishes, Quadrupeds, and Insects," 5 vols.; "A Treatise on Trees and Fruits." B. at Sambla, Poland, 1603; D. in Silesia, 1675.

JOHNSTON, George, a modern English naturalist. He commenced his medical education as the apprentice of Dr. Abercrombie; subsequently he practised as surgeon at Berwick-upon-Tweed. While at Edinburgh he was an attentive student of natural history, and continued afterwards to follow up the pursuit. In 1838 he published his "History of British Zoophytes," and four years afterwards his "History of British Sponges" appeared. He contributed many valuable articles, chiefly on the lower forms of animal life, to the Transactions of various provincial scientific societies, to the "Magazine of Zoology and Botany," and to the "Annals of Natural History." In 1850 he produced one of his best works,—the "Introduction to Conchology, or Elements of the Natural History of Molluscous Animals," and soon afterwards he put forth an interesting work "On the Botany of the Eastern Borders." The latter portion of his life was visited with some severe trials, under which his mind gave way. B. 1798; D. 1855.

JOHNSTON, James T. W., an eminent modern chemist. Under circumstances by no means favourable, he succeeded in obtaining an education that enabled him to gain his livelihood by giving private instruction to pupils of the university of Glasgow. Removing to Durham in 1825, he opened a school there. Five years later he married a young lady, whereby his circumstances were so much improved that he was enabled to retire from teaching, and give himself up entirely to chemistry, in pursuit of which intention he went to Sweden, where he became the pupil of the great chemist Berzelius. In 1833, upon the establishment of the Durham University, he was invited from abroad, to assume the readership of chemistry and mineralogy in the new seat of learning. Shortly afterwards he went to Edinburgh, and was appointed chemist of the Agricultural Society of Scotland, but eventually resided exclusively at Durham, where he commenced a series of works on chemistry as applied to agriculture, which have become famous throughout the world. His "Catechism of Agricultural Chemistry" has passed through 36 editions, and has been translated into every European language. A similar work was his "Lectures on Agricultural Chemistry and Geology." Having travelled in the New World, he published "Notes on North America," in which much valuable information is given as to the agriculture of that country. He was peculiarly qualified to make scientific knowledge attractive to the ordinary reader, as was evidenced by the vast circulation of his "Chemistry of Common Life," one of his latest works. He also wrote scientific articles for the "Edinburgh Review," and contributed to the Transactions of many learned societies. He was fellow of the Royal Society, and member of many other learned bodies. B. at Paisley, 1796; D. at Durham, 1853.

JOHNSTON STRAIT, a narrow channel of British North America, separating Vancouver's Island from the mainland. On its N.W. side it has Queen Charlotte's Sound, and on its S.E. the Gulf of Georgia.

JOHNSTONE, George, a naval commander, was the son of a Scotch baronet, and devoted himself to the sea service. After passing through the subordinate stations, he was, in 1760, made master and commander;

and, in 1762, a post-captain. He was subsequently appointed governor of West Florida, and, on his return to England, he took an active part in the affairs of the East-India Company, particularly in opposition to Lord Clive. In 1771 he wrote "Thoughts on our Acquisitions in the East Indies." He sat in parliament first for Cockermouth and afterwards for Appleby, and had a duel with Lord George Germaine, through some reflections which fell from him in the house respecting his lordship. He was one of the commissioners sent to treat with the Americans. D. 1787.

JOHNSTOWN, *jons'-toun*, a district of Upper Canada, bounded on the S. and E. by the St. Lawrence, and on the other sides by the Bathurst, East, and Midland districts. It is traversed by the Rideau river and canal, and contains large tracts of good land. *Pop.* about 50,000, mostly composed of Scotch and Irish.

JOHNSTOWN, the name of several places in the United States, none of them with a population above 7,000.

JOHORE, *jo-hor'*, a town of Malacca, the capital of a district of the same name, 35 miles from Singapore. It forms the S. extremity of the Malayan peninsula, and was formerly a place of considerable importance, but it has now dwindled down to a few miserable huts. *Pop.* Unascertained. *Lat.* 3° N. *Lon.* 104° E.—The DISTRICT is very imperfectly known, and has an area of about 50 geographical miles. Whatever it produces has not yet acquired sufficient commercial importance for notice here.

JOIGNY, *zhwoin'-ye*, a walled town of France, in the department of the Yonne, and standing on the Yonne, here crossed by a handsome bridge, 15 miles from Auxerre. The streets are steep, winding, and narrow. It has the remains of a magnificent castle, with a cathedral, and an ornamented building of the 15th century. *Manf.* Woollens, linens, leather, vinegar, brandy, and other liquors. *Pop.* about 6,000.

JOINVILLE, *zhwoin'-veel*, a town of France, in the department of Upper Marne, and standing on the river Marne, 25 miles from Chaumont. It is an ancient place, but is now of little importance. *Manf.* Chiefly woollen goods. *Pop.* 3,000.

JOINVILLE, Jean, Sire or Lord de, a French historian. He was counsellor and friend to Louis IX., king of France, whom he accompanied in his first crusade of 1248, sharing his captivity after the battle of Massoura, in which Louis and his army were taken prisoners. On the king's returning to France, Joinville received a pension, and was constantly retained near his person. His "History of St. Louis IX., King of France," is a valuable and interesting work, wherein the simple grandeur of the good king's character is minutely painted. The best French edition is that by Ducange, which was translated into English by Johnes, in 1807. B. 1224; D. 1319.

JOINVILLE, François-Ferdinand-Philippe-Louis-Marie, d'Orléans, Prince de, third son of the late king of the French, Louis Philippe. When he had completed his education, he was appointed to the French navy, and made several voyages on the coasts of France and Italy, after which he underwent a public examination at the naval school of Brest. In 1836 he became lieutenant, and in 1837 joined his brother, the duke de Nemours, at Constantine, soon after the taking of that city. During the war with Mexico, in 1838, he courageously engaged the batteries of St. Jean d'Ulloa, with his corvette the *Créole;* and, shortly afterwards, at the head of his sailors, stormed the gate of Vera Cruz, and took prisoner General Arista; for which he received the cross of the Legion of Honour, and was appointed post-captain. In 1840 he brought to France from St. Helena the remains of Napoleon I. In 1843 he married, at Rio Janeiro, the Princess Francesca of Braganza, sister of Don Pedro II., and was the same year promoted to rear-admiral. In 1845 he commanded the fleet that bombarded Tangiers and captured Mogador, upon which he became vice-admiral. During the events of 1848, he was at sea before Algiers. Surrendering his command to the republicans, he joined his exiled family at Claremont, and has ever since lived in retirement. He has published, in the "Revue des Deux Mondes," several sketches on the French navy. B. at Neuilly, 1818.

JOLIBA, *jol'-i-ba*, a river of W. Africa. (*See* NIGER.)

JOLSVA, ALNOVIA, or ELTSCH, *jols'-vä*, a town of Hungary, in the valley of the Eltsch, 14 miles from Rosenau. It has a fine castle, and in its neighbourhood iron-mines are worked. *Pop.* 4,000.

JOLY, Claude, *zho'-le*, a French political writer. He was at first a lawyer; but was afterwards made precentor of the cathedral at Paris. He wrote a book entitled "Maxims for the Education of a Prince," which, speaking too boldly of the rights of the people, was burnt by the hangman, in 1655. B. at Paris, 1607; D. at the same place, 1700.

JOLY, Guy, nephew of the preceding, was, for some time, the secretary and confidential friend of Cardinal de Retz; but, quarrelling with him, he attached himself to the court party. He wrote some "Historical Memoirs" about 1665, which were intended to give the opposite view of the questions referred to in the memoirs of Cardinal de Retz.

JOLY, Mark Antony, a French comic author, who became, in 1753, the French censor-royal. He wrote, among other plays, the "School of Lovers" and "The Jealous Wife." B. at Paris, 1672; D. 1753.

JOMELLI, Nicolo, *yo'-mel-le*, an Italian musical composer. He produced his first opera at Naples, when 23 years old, which brought so much fame, that he was soon afterwards summoned to Rome, where he became the especial favourite of the cardinal duke of York. He afterwards visited Venice and Vienna; at the latter place being engaged as teacher of music to the empress Maria Theresa. He wrote upwards of forty operas, which are now seldom heard; but his "Mass for the Dead" is considered among the best works of its kind, being often played in Roman Catholic churches. B. near Naples, 1714; D. 1774.

JOMINI, Henry, Baron, *zho-me'-ne*, a French military historian and general. He was educated for commercial pursuits, and, for several years, was employed in a merchant's office. In 1795 he obtained a command in the Swiss militia, and rose so rapidly in it, that he was a lieutenant-colonel at 20; but, on the French invasion of Switzerland, he lost his rank; whereupon he set out for Paris in search of employment. He had already established himself as a stockbroker in Paris, when he became acquainted with General Ney, who, discovering his great qualifications for military study, obtained for him an appointment which allowed him leisure to pursue it. When only 25, he wrote the early portion of his "Traité des Grandes Opérations Militaires," upon which Ney obtained a post for him in the army, and, soon afterwards, he was aide-de-camp to Ney, whom he accompanied through his campaigns during the few ensuing years, distinguishing himself by his bravery and skill. At the battle of Jena, in particular, he rendered good service to Ney, for which he was made a baron. In 1808 he marched with Ney into Spain; but fell under the displeasure of that general in the following year, and was superseded. Intending to enter the Russian army, he now applied to be discharged; but Napoleon refused, and made him a brigadier instead. Soon afterwards, he was appointed to write the history of the grand army then about to invade Russia, and, throughout the campaign, exhibited such great talent, that Ney, after the battle of Bautzen, requested the emperor to make him general of division; but Napoleon found some cause for displeasure in his conduct, and again superseded him. Mortified at this treatment, Jomini resolved to enter the Russian service, and, soon afterwards, was made lieutenant-general therein, but he never took an active part against Napoleon. Meanwhile, he was tried by court-martial, and, in his absence, condemned to death by the French. In 1815 he went to Paris, where he strove, by every possible means, to prevent the execution of his old benefactor Marshal Ney. Upon the fall of Napoleon, he went to reside in Russia, and occupied himself with the composition of military works, which have since become great text-books of the science of war. The czar of Russia allowed Jomini to settle in Brussels in 1855. His chief works are, "History of the Wars of Frederick II.," "Principles of Strategy," "Political and Military Life of Napoleon," "Treatise on the Art of War," and "The Military Atlas." B. at Payerne, in the canton of Vaud, 1779.

JONADAB, *jon'-a-dăb*, the son of Rechab, was the founder of a sect to which he gave the name of Re-

chabites. It practised the greatest austerity, refused the use of wine; the accumulation of wealth being likewise forbidden. Jonadab lived in the reign of Jehu, about 860 B.C.

JONAH, *jō'-na*, the fifth of the minor prophets. He is supposed to have lived under the reign of Jeroboam II., king of Israel. Commanded by Providence to prophesy against Nineveh, he disobeyed, and embarked in a ship for Tarshish. A storm arising, the mariners, at his request, threw him into the sea, and he was instantly swallowed up by a large fish, which, three days after, discharged him again on dry land. On going to Nineveh and delivering his message, the people repented, and the Lord's anger was averted. The gourd under which Jonah sat to watch for the destruction of the city was probably the plant called *palma Christi*. Lived about the 8th century B.C.

JONAS, Anagrimus, *jō'-nas*, a native of Iceland, and a writer of some philosophical and historical works. He was coadjutor to Gundebrand, bishop of Holum, who was a disciple of Tycho Brahe. Jonas refused that see after the death of his friend. B. 1545; D. 1640.

JONAS, Justus, a learned Protestant, who became principal of the college of Wittemburg, assisted Melancthon at Marpurg, and zealously defended the doctrines of Luther. B. in Thuringia, 1493; D. 1555.

JONATHAN, *jon'-a-than*, the son of Saul, and the intimate friend of David, whom he saved from his father's fury at the hazard of his own life. He fell with Saul, in fighting against the Philistines.

JONATHAN, son of Mattathias, and brother of Judas Maccabæus, a famous Jewish general. He compelled Bacchides, the Syrian commander, to sue for peace; defeated Demetrius Soter and his general Apollonius. At length he fell by treachery into the hands of Tryphon, who, after receiving a large sum as a ransom for him, put him to death, B.C. 144.

JONES, David, a Welsh poet. He edited two volumes of Welsh poetry, and collected a large number of ancient MSS. in that language. D. about 1785.

JONES, Griffith. He was many years editor of the "London Chronicle," and other papers. He was proprietor of the "Literary Magazine," and, with his brother, projected those useful publications for children, which were so successfully printed by that Mr. Newberry to whom Dr. Johnson introduced Goldsmith. B. 1721; D. 1786.

JONES, Henry, a dramatic writer, was originally a bricklayer. Some of his poetical attempts attracting the notice of Lord Chesterfield, then lord-lieutenant, he took him under his patronage, and brought him to London, where he published his poems by subscription, and produced his tragedy of the "Earl of Essex," which gained him wealth and reputation. B. in Ireland, about 1720; D. 1770.

JONES, Inigo, *jones*, a famous English architect. Very little is known of his youth, till he attracted, by his skill in drawing, the notice of William, earl of Pembroke, who sent him to Italy, where he acquired a great knowledge of architecture. James I. appointed him surveyor-general of the works, and, in the succeeding reign, he had charge of the rebuilding of St. Paul's cathedral. He was also made manager of the masques and interludes at court, which brought upon him the satire of Ben Jonson, who ridiculed him in his comedy of "Bartholomew Fair," under the name of Lantern Leatherhead. He suffered considerably for his loyalty in the time of the great rebellion. In 1655 he wrote "A Discourse on Stonehenge," in which he absurdly attempted to prove that it had been the Roman temple of Cœlus. He designed the palace of Whitehall and the banqueting-house, the church and piazza of Covent Garden, and other buildings. His designs were published in 1727, folio, and some in 1744, folio. B. in London, 1573; D. 1653.

JONES, Jeremiah, a learned dissenting divine, who became minister of a congregation at Avening, in Gloucestershire. He wrote, in 1719, "A Vindication of St. Matthew's Gospel," "A new and full Method of settling the Canonical Authority of the Old Testament;" which works were reprinted at the Clarendon press, Oxford.

JONES, John, a Unitarian minister, who wrote, in 1808, "Illustrations of the Four Gospels;" in 1812, a Latin and English Vocabulary, which was expanded and republished, in 1825, as "Anthologiæ Latinæ;" and "The Tyro's Greek and English Lexicon," which, although very successful, was condemned in the second number of the "Westminster Review." B. in Wales; D. 1827.

JONES, John, an English physician, who wrote "The Dial of Agues," 1566; "A Discourse of the Natural Beginning of all Growing and Living Things;" and translated Galen's four books of Elements. D. about 1580.

JONES, John, a Welsh antiquary, who continued transcribing old manuscripts for about forty years, as appears from some of his volumes dated from 1590 to 1630. Of his collection above fifty large volumes are still in existence.

JONES, Owen, a modern English architect, distinguished for his skill as an ornamental decorator. After studying under Mr. Vallisamy, an architect of some celebrity as an ornamental designer, he travelled for four years in Egypt, Turkey, and Spain, where, in conjunction with M. Jules Goury, a French artist, he made numerous designs from the Alhambra. On his return to London, he, after considerable pains and expense, succeeded in producing an elaborate work, in lithography and colours, on the Alhambra. This great work was published in parts, and concluded in 1842, from which time Mr. Owen Jones has been an authority on the subject of chromatic decoration. A work on "Mosaic Pavements" was next published by him. Upon the organization of the official staff of the Great Exhibition of 1851, he was appointed one of the superintendents of the works, being charged with the internal decoration of the structure. The plan he pursued was a novel one, and though generally admitted to be successful, was, nevertheless, opposed in principle by other architects and decorators. In advocating his own views, Mr. Jones has given lectures on decoration at the London Institution, the Society of Arts, and other places, as well as having published a number of works on the subject. Altogether, it may be admitted that he has advanced the knowledge of ornamental design and chromatic decoration in England more than any other living architect or designer. When the new Crystal Palace company was formed, he was appointed, with Mr. Digby Wyatt, to select, on the continent, the valuable collection of casts and works of art, for which the people's palace at Sydenham is so deservedly celebrated. The Egyptian, Greek, Roman, and Alhambra courts of the same structure were completed under his superintendence. But, in the case of the Egyptian and Greek departments, some controversy was aroused by his mode of decoration. In answer to the objections made as to the latter, he published "An Apology for the Colouring of the Greek Court," assisted by Mr. G. H. Lewes and Mr. Watkiss Lloyd. His latest publication was the great work called "The Grammar of Ornament." The St. James's Hall, completed in 1858, was built after his designs. B. in Wales, about 1809.

JONES, Paul, a naval adventurer, who had been a common sailor in some vessels that left the port of Kirkcudbright. He settled in America in 1778, and subsequently obtained the command of an American ship under Commodore Hopkins, and distinguished himself in several engagements, for which he received his commission as captain of the marine. He then sailed to France, and being well acquainted with the Scotch coast and the northern part of England, he conceived the design of effecting a descent. He accordingly landed at Whitehaven, and, having dismantled a fort, set fire to some shipping in the harbour. Thence he sailed for the opposite coast of Scotland, where he landed on the estate of the earl of Selkirk, and plundered his lordship's house of all the plate. He next took the *Drake* sloop of war, with which he returned to Brest. He afterwards sailed round Ireland to the North Sea, with three ships,—the *Richard*, *Pallas*, and *Vengeance*. Having committed great mischief on that coast, he fell in with the Baltic fleet, convoyed by the *Scrapis* frigate and the *Countess of Scarborough* armed ship, both which, after a severe action, he captured off Flamborough Head. For these services the king of France conferred on him the order of Merit, and gave him a gold-hilted sword. The career

of his exploits finished with the American war, and some private affairs calling him to Europe, he resided at Paris till his death. B. in Scotland, 1747; D. 1792.

JONES, Rice, an eminent Welsh poet. In 1770 he published a Welsh Anthology, in quarto, containing selections from the poets of different periods. B. in Wales, 1716; D. 1801.

JONES, Richard, a Welsh divine, who compiled, in his native language, a curious work, called "Gemma Cambricum," containing a summary of all the books and chapters of the Bible. He matriculated at Jesus College, Oxford, in 1621. D. in Ireland, about 1652.

JONES, Sir Thomas, lord chief justice of the Common Pleas in the reigns of Charles II. and James II. When this last monarch consulted him on his dispensing power, and said that he could soon have twelve judges of his opinion, Sir Thomas answered, "Twelve judges you may possibly find, sire, but not twelve lawyers."

JONES, William, an English mathematician. He settled in London as a schoolmaster, and, having instructed Lord Macclesfield's son in mathematics, that nobleman made him his secretary, and appointed him deputy-teller of the Exchequer. He was very intimate with Sir Isaac Newton, and was chosen a fellow of the Royal Society. He wrote "A Compendium of the Art of Navigation," "A New Introduction to Mathematics," some papers in the "Philosophical Transactions," and an analysis of several of Sir Isaac Newton's papers. B. in the isle of Anglesea, 1680; D. 1749.

JONES, Sir William, an Indian judge and learned Oriental writer, was son of the preceding. Losing his father in his infancy, his care devolved on his mother, a woman of great virtue and understanding, from whom he learned the rudiments of knowledge, and was then removed to Harrow school, where he made such great progress in his studies, that Dr. Sumner, the master, affirmed that his pupil knew more Greek than himself; a previous master having said, "If Jones were left naked on Salisbury plain, he would nevertheless find the road to fame." In 1764 he was entered of University College, Oxford, where to his classical pursuits he added the study of the Persian and Arabic languages, also the Spanish, Italian, and Portuguese. At the age of 19 he became tutor to Lord Althorpe, and, during his residence at Wimbledon, in that noble family, he greatly enlarged his acquirements in Oriental literature. In 1769 he made a tour in France, and about the same time undertook, at the request of the king of Denmark, to translate the history of Nadir Shah from Persian into French. In 1770 he entered on the study of the law at the Temple, but continued his application to Oriental learning and general literature. In 1774 he published his "Commentaries on Asiatic Poetry," dedicated to the university of Oxford. In 1783 he obtained the appointment of a judge of the Supreme Court at Calcutta, a post which had been the object of his anxious wishes. The honour of knighthood was on this occasion conferred on him, and he soon after married a daughter of the bishop of St. Asaph. In April of that year he embarked for India, leaving his native country, to which he was never to return. On the voyage his active mind projected the establishment of a society in Bengal for the purpose of illustrating Oriental antiquities and literature. This scheme he saw carried into effect, and under his auspices, and by his direction, the society acquired a high reputation. The volumes of its Transactions are inestimable, and are enriched by several valuable productions from his pen. As a judge he was indefatigable and impartial. He studied the native laws of the country, and became so versed in the Sanscrit and the codes of the Brahmins, as to gain the admiration of the most learned men in that country. In 1799 his works were collected and published in 6 vols., and his life written by Lord Teignmouth, in one volume, 1804. A beautiful monument has been erected to his memory in St. Paul's Cathedral by the East-India Company. B. in London, 1746; D. at Calcutta, 1794.

JONES, Thomas Rymer, an eminent English anatomist and writer on medicine. He was educated for the profession of surgery in London and Paris, and passed the College of Surgeons in 1833; but an affliction of deafness manifesting itself, he resolved to abandon the practical for the theoretical departments of medical science. He began his career by contributing to the proceedings of the Zoological Society some papers on comparative anatomy. In 1838 he produced "A General Outline of the Animal Kingdom," which was the first complete treatise on the subject in the English language. Subsequently he was appointed Fullerian professor of physiology in the Royal Institution of Great Britain, and examiner in comparative anatomy and physiology in the London University. His "Natural History of Animals" was commenced in 1845: he has also lectured, and contributed articles to scientific publications, on natural history, with considerable success. In 1844 he was elected fellow of the Royal Society.

JONES, William, an English divine. He received his education at the Charterhouse, whence he removed to University College, Oxford, where he took his degrees in arts, and, in 1749, entered into orders. He wrote an answer to Bishop Clayton's "Essay on Spirit," "The Catholic Doctrine of the Trinity," "Essay on the First Principles of Natural Philosophy," in which he espoused the Hutchinsonian system. This work he completed in 1781, by his "Physiological Disquisitions; or, Discourses of the Natural Philosophy of the Elements." When Dr. Horne became bishop of Norwich, he appointed Mr. Jones his domestic chaplain, and he embalmed the memory of his patron by an excellent memoir of his life. When the French revolution broke out, and democratical principles began to spread in England, he wrote some pamphlets, and published a collection of tracts, entitled "The Scholar Armed." To him, also, the "British Critic" owed its origin. B. at Lowick, Northamptonshire, 1726; D. 1801.

JONKOPING, *yon-cho'-ping*, the capital town of a district of the same name, in Sweden, province of Smaland, 82 miles from Gottenburg. It is well built, and has a handsome church, a town-house, governor's residence, theatre, and various schools. *Manf.* Cards and tobacco. *Pop.* 5,000. In the neighbourhood are the mineral springs of Lindal and Maredal.—The DISTRICT has an area of 4,000 geographical square miles, and is fertile. *Pro.* Corn, hemp, potatoes, and flax. It is also rich in wood and minerals, especially iron. *Pop.* 145,000.

JONSON, Benjamin, *jon'-son*, commonly known as Ben Jonson, an English poet and dramatist. His father was a clergyman, and died about a month before the birth of the poet, who received his education at Westminster school: but his mother marrying again, his father-in-law, who was a bricklayer, compelled him to work at his business. On this, he enlisted for a soldier, and went to the Netherlands, where he distinguished himself by his courage. After his return, he went to St. John's College, Cambridge, but did not remain there long, owing to his extreme poverty. He then turned his attention to the stage, and became a player and dramatic writer, with indifferent success. During this part of his career he was so unfortunate as to kill a man in a duel. His first printed play was the comedy of "Every Man in his Humour;" after which he produced a new piece annually for several years. He engaged with Chapman and Marston in writing a comedy called "Eastward Hoe," which, being deemed a satire on the Scotch nation, had nearly brought its authors to the pillory. At the accession of James I., Jonson superintended a spectacle for his entertainment in his passage from the Tower to Westminster Abbey, and he continued to have the management of all the masques and public shows during that and the succeeding reign. In 1619 he was made poet laureate; the salary of which, during his term of office, was raised from a hundred marks to as many pounds, with a butt of Canary wine. In 1617 the University of Oxford conferred on him the degree of M.A. Notwithstanding his pension and the profits of his plays, he was generally poor, and was frequently relieved by the king's bounty. He was buried in Westminster Abbey: on his gravestone is the following inscription:—

"O rare Ben Jonson!"

Mr. Gifford's edition of his works is the best, on account of the rich store of elucidatory notes which it contains. B. at Westminster, 1574; D. 1637.

JOODPOOR, JOUDPORE, or MARWAR, *jood-poor'*, the

capital town of a principality of the same name, in Hindostan, 280 miles from Hyderabad. It is inclosed by rocky eminences, and contains a palace of the rajah. *Pop.* 60,000.—The PRINCIPALITY has an area of 35,670 square miles. *Desc.* Well watered, and, where fertile, raising good crops of barley, wheat, millet, opium, and some tobacco. *Pop.* 1,783,000. The geographical situation of the town is in *lat.* 26° 18′ N., and *lon.* 73° 12′ E.

JOONAGHUR, or JUNAGURH, *joo-na-gur'*, a city of Hindostan, in the province of Gujerat, 235 miles from Bombay. It is encompassed by low walls surrounded by jungle. Its citadel is considered an admirable defensive work, and occupies an elevation on the E. side of the modern city. The streets of the town are narrow and dirty, and the only buildings worthy of notice are the mosques. *Pop.* Unascertained. *Lat.* 21° 30′ N. *Lon.* 70° 31′ E.

JORAM. (*See* JEHORAM.)

JORDÆNS, James, *yor'-dans*, a celebrated Flemish painter, was the disciple of Adam van Oort and of Rubens. He painted with extraordinary freedom and expedition. Many of his pictures are in the churches of Antwerp and other cities of the Netherlands. There is a "Holy Family" by him in the National Gallery. B. at Antwerp, 1594; D. at the same place, 1678.

JORDAN, Sir Joseph, *jor'-dan*, a gallant English admiral, who, by his presence of mind and valour, gained the battle of Solebay, in 1672. The advantage was long on the side of the Dutch fleet, the English being overpowered by numbers; but Sir Joseph fell into the midst of the enemy, and throwing them into confusion, the fortune of the day was reversed, and the English gained the victory.

JORDAN, a celebrated river of Judæa, running through the pashalic of Damascus, and forming the E. boundary of Palestine. It rises in the mountain called Jebel Sheik, the ancient Hermon, and passing by Cæsarea Philippi, called now Panias, forms a small lake, after which it enters the northern side of the great lake called the Sea of Tiberias, or Dead Sea. It is a dark-coloured rapid stream, and empties daily into this sea about 6,000,000 tons of water. It is frequently mentioned in the sacred scriptures as being the scene of many remarkable events connected with the Jews.

JORDAN, Thomas, a dramatic writer in the reign of Charles I. He wrote two comedies and a masque, mentioned by Langbaine with respect.

JORDAN, Charles Stephen, a Prussian writer, of French origin. He became vice-president of the Academy of Sciences at Berlin. Frederick the Great caused a monument to be erected to his memory with this inscription: "Here lies JORDAN, the friend of the muses and of the king." That monarch also composed a eulogy upon him, in which he bestowed a great encomium upon his talents and virtues. He wrote, "Travels in France, England, and Holland, with Satirical Anecdotes;" a "Miscellany of Literature, Philosophy, and History," and the "Life of De la Croze." B. at Berlin, 1700; D. at the same place, 1746.

JORDAN, John Christopher, an antiquary, was privy counsellor to the king of Bohemia. He wrote several chronological works, and annotated some of the ancient historians. D. 1740.

JORDAN, Camille, *zhor'-da*, a brave Frenchman, who was one of the leaders in the rising of Lyons during the reign of terror. He was exiled, but subsequently returned to France, where he wrote several valuable works on religious and political questions. B. at Lyons, 1771; D. 1821.

JORDANO, Luca, *yor-da'-no*, a famous painter, who studied the manner of Pietro da Cortona, but chiefly wrought in the style of Paul Veronese. The king of Spain employed him to decorate the Escurial, and in several other great works, by which he acquired considerable wealth. B. at Naples, 1632; D. at the same place, 1705.

JORDEN, Edward, *jor'-den*, an English physician, who took his doctor's degree at Padua, and afterwards settled in London, whence he removed to Bath. He wrote "A Brief Discourse of a Disease called the Suffocation of the Mother," and "Discourse of Natural Baths and Mineral Waters." B. in Kent, 1569; D. at Bath, 1632.

JORGENSON, Jorgen, *yor'-gen-sone*, a Dane, who, for a time, usurped the protectorship of Iceland. He was the son of a watchmaker, and is said to have served as midshipman in the English navy during his earliest years. In 1809 he sailed in an English ship to Iceland, and forthwith proceeded, by proclamation and various extraordinary measures, to assume the position of protector. After a life full of adventure, he was at length confined in Newgate for robbing his lodgings, and, in 1823, was sent to New South Wales, dying, it is supposed, on the voyage. B. at Copenhagen, 1779.

JORNANDES, *jor-năn'-dees*, a Goth, who embraced Christianity, and became bishop of Ravenna about 552. He wrote the "History of the Goths."

JORTIN, John, *jor'-tin*, an eminent English divine, who, while under-graduate of Jesus College, Cambridge, translated for Pope some of Eustathius's notes on Homer. In 1772 he published Latin poems, in 4to, under the title of "Lusus Poetici," which went through three editions. In 1730 he published four sermons on the truth of the Christian religion, and, the year following, "Miscellaneous Observations upon Authors, Ancient and Modern." In 1734 appeared his "Remarks on Spenser's Poems, and on Milton." In 1751 he produced the first volume of his "Remarks on Ecclesiastical History," which he continued to 5 vols. His "Life of Erasmus" was published in 1758. B. in London, 1698; D. at the same place, 1770.

JORULLO, XORULLO, or JORUYO, *cho-rool'-lo*, a volcano of Mexico, 160 miles from Mexico. It is situate on the plain of Malpais, between 2,000 and 3,000 feet above the level of the sea. *Lat.* 19° 6′ N. *Lon.* 100° 30′ W.

JOSEPH, *jo'-sef*, the favourite son of Jacob, by Rachel, was hated by his brethren, to whom being sent by his father when they were tending their flocks, they intended to put him to death, but were diverted from the project by Reuben. In Reuben's absence they sold him to some Midianitish merchants, and having dipped Joseph's coat in blood, carried it to his father, who lamented grievously, thinking his son had been slain by a wild beast. Joseph was sold in Egypt to Potiphar, a lord of the court, who made him steward of his affairs; but his wife falling in love with him, and he resisting her criminal desires, she accused him of having attempted her virtue; on which he was thrown into prison, where he interpreted the dreams of the king's butler and baker. Pharaoh being perplexed by an extraordinary dream, the butler mentioned Joseph, who explained the mystery, and was made prime minister of Egypt. His brethren coming thither during a famine, prostrated themselves before him. After different interviews, he made himself known to them, and sent for his father and all his family, whom he settled in the land of Goshen. Joseph married the daughter of the priest or prince of On, by whom he had Ephraim and Manasseh. He governed Egypt with great wisdom till his death, at the age of 110 years, 1792 B.C. Moses carried his bones out of Egypt, and laid them with Jacob's, in the land of Canaan.

JOSEPH, the husband of Mary, mother of our Saviour, was of the tribe of Judah, and of the family of David. He was a poor carpenter of Nazareth, and when his marriage with Mary took place, he was of an advanced age.

JOSEPH I., emperor of Germany, of the house of Austria, was the son of the emperor Leopold I., and ascended the imperial throne on the death of his father, in 1705. He engaged in his interests Savoy, England, and Holland, against France, in support of the claim of the archduke Charles to the crown of Spain. In the war which ensued, the allies, under Eugene and Marlborough, were successful, gaining the battles of Ramillies, Oudenarde, and Malplaquet. He made himself master of Italy, and levied contributions on Mantua, Parma, Modena, Lucca, Genoa, and other places. His armies also defeated the revolted Hungarians, headed by Prince Bagotzki, who was forced to take refuge in Turkey. In the midst of these successes Joseph was taken off by the small-pox, in 1711.

JOSEPH II., emperor of Germany, was the son of Maria Theresa, queen of Hungary, and archduchess of Austria, and Francis of Lorraine. He was crowned king of the Romans in 1764, and the year following became emperor. He early displayed great talents

and activity, by remodelling the army and reforming all the departments of government. He also travelled through his dominions, and visited Prussia, Italy, France, and Russia. Among other excellent regulations which he adopted, was the setting apart one day every week to receive petitions and to hear complaints. In 1780, on the death of his mother, he succeeded to the crown of Hungary and Bohemia. The year following he issued a decree in favour of the liberty of the press, which was followed by others equally liberal, particularly one of religious toleration; he also abolished the system of vassalage. This measure was followed by an imperial edict, disclaiming all secular subjection to the court of Rome, the suppression of many monasteries, and the regulation of others. On this occasion Pope Pius VI. made a journey to Vienna, to induce the emperor to alter his designs; but, though pompously received, he was completely unsuccessful. In 1786 the emperor followed up his attack on the papal authority by an assembly of the ecclesiastical princes at Ratisbon, in which it was resolved to withdraw from the jurisdiction of the pope. In 1786 a declaration of war was proclaimed against the Turks, and the same year the emperor in person reduced Schabatz: but this was followed by a defeat. Soon afterwards, a bloody battle was fought between the Imperialists and the Turks, on the heights of Rohadin, in which neither could claim the victory. Joseph next made an attempt to possess himself of Belgrade, but without success. Marshal Laudon, however, assumed the command of the army, took Durbieza and Novi, and, in 1789, reduced Belgrade. Soon after, a peace was concluded, chiefly occasioned by the discontented spirit in Germany, at such a waste of men and treasure. He was succeeded by his brother, Peter Leopold, grand-duke of Tuscany. B. 1741; D. 1790.

JOSEPH, Ben Gorion, a Jewish historian, whom the rabbins falsely confound with Josephus. He lived in the 5th century, and wrote, in Hebrew, a history of the Jews, which bears evident marks of being an abridgement of Josephus's larger work. It was published in a Latin version by Gagnier, at Oxford, in 1706, and in Hebrew and Latin, at Gotha, in 1707.

JOSEPH DEL PARRAL, St., a town of Mexico, in the intendancy of Durango. *Pop.* 5,000.

JOSEPH-EMANUEL, king of Portugal, was son and successor of Charles V., and ascended the throne in 1750. The great earthquake at Lisbon, in 1755, and the expulsion of the Jesuits from the kingdom in 1759, were the principal events of this reign, during which Joseph was assisted by his clever minister the marquis de Pombal. Learning was encouraged, commerce and industry received a fresh impulse, and the power of the Inquisition was diminished. B. 1715; D. 1777.

JOSEPH, FATHER, an apostate monk of Hungary, who, about 1678, headed, a numerous banditti, whom he called the people of God, assuming to himself the name of Joshua. He entered the Austrian dominions, where he committed dreadful outrages, burning churches, putting priests to death, and defiling nuns, under pretence of zeal for true religion. The motley crew were at last dispersed, on the sudden death of their leader.

JOSEPH OF ARIMATHEA, a rich inhabitant of Jerusalem, who went to Pilate and begged the body of Jesus, which he laid in his own sepulchre. He afterwards joined the disciples, and died at Jerusalem.

JOSEPH OF PARIS, a famous Capuchin, commonly called Father Joseph, who was employed by Cardinal Richelieu in most of his political intrigues. Louis XIII. procured him a cardinal's hat, but he died of an apoplexy before he received it, in 1638.

JOSEPH, St., a town of S. America, in the province of Buenos Ayres, lying to the N.W. of Monte Video. *Lat.* 34° 22′ 17″ S. *Lon.* 56° 53′ 22″ W.

JOSEPH, St., a river of S. America, in the province of Buenos Ayres, which joins a branch of the Plata.

JOSEPH, St., RIVER, a small river of Lower Canada, falling into the St. Lawrence.—Also, an island of Upper Canada, in the channel between Lakes Huron and Superior.—Also, a LAKE of British N. America, receiving Catlake river, and discharging its waters by the Albany into St. James's Bay. *Ext.* 20 miles long, with a breadth of 15 at its widest part.

JOSEPH'S, St., a river of the United States, which, after a W. course of 140 miles, enters Lake Michigan. It is navigable as far as Lockport, a distance of 130 miles.

JOSEPH'S BAY, St., a bay of the United States, on the coast of West Florida, of the figure of a horse-shoe. It is formed by the Gulf of Mexico, and lies immediately to the N.W. of Cape St. Blas.

JOSEPHINE, *jo'-se-feen*, empress of France. She was the daughter of Count Tascher de la Pagerie, and was married, at the age of 15 years, to the Viscount de Beauharnais, by whom she had two children,—Eugene and Hortense de Beauharnais. After her husband had fallen by the guillotine, she was herself imprisoned, but was released through the intervention of Tallien. She was subsequently introduced to General Bonaparte, who, struck by her beauty and grace, became her husband in 1796. She shared the high destinies of her husband, ascended the throne with him, and received the title of empress, in which dignity she gained universal attachment; but, being childless, Napoleon divorced her. Josephine retired to Malmaison in 1809, where she died in 1814, soon after the fall of the emperor. B. at the island of Martinique, 1763.

JOSEPHINOS, *jo-se-fe'-nose*, the name given by the Spaniards to the French, and to the Spanish partisans of King Joseph, brother of Napoleon I. They were also termed Afrancesados.

JOSEPHUS, Flavius, *jo-se'-fus*, a Jewish historian. He came of distinguished ancestors, and received a liberal education among the Pharisees, after which he went to Rome, where he cultivated his talents to great advantage. On returning to his own country, he commanded the troops employed to defend Jotapata against Vespasian and Titus, and maintained the place bravely during seven weeks. Vespasian took him into his favour, and he was held in great esteem by Titus, whom he accompanied to the siege of Jerusalem,

JOSEPHUS.

at the taking of which, Titus told him to ask for anything he wished. He requested that the sacred books might be given to him, and that the lives of his brother and fifty of his friends might be spared. When Vespasian became emperor, he gave Josephus a palace, with a pension, the freedom of the city, and a grant of lands in Judæa. Titus added to these favours, and Josephus, out of gratitude assumed the name of Flavius. During his residence at Rome he wrote his "History of the Wars of the Jews," first in Syriac, and afterwards in Greek. Its style approaches nearest to that of Livy. He also wrote the "Antiquities of the Jews," in which it is supposed are some interpolations of modern transcribers, particularly with regard to what is said of our Saviour. He wrote likewise two books

in defence of the Jews against Apion, and his own life. B. at Jerusalem, A.D. 37; D. at Rome, about the beginning of the 2nd century.

JOSHUA, *josh'-u-a*, the son of Nun, of the tribe of Benjamin. He succeeded Moses as the leader of the Israelites, whom he conducted into Canaan, and signalized himself by his valour and his prudence. He died in the 110th year of his age. The authorship of the book bearing his name is ascribed by some to him, also the concluding part of Deuteronomy.

JOSIAH, *jo-si'-a*, king of Judah, succeeded his father Ammon, 639 B.C., at the age of eight years. He destroyed the idols, and restored the worship of the true God, established virtuous magistrates for the administration of justice, and repaired the temple. He also caused the law of Moses to be sought for and preserved. He was wounded in a battle fought at Megiddo, against Necho, king of Egypt, and died 608 B.C.

JOSIKA, Nicholas, *e-o-se'-ka*, a distinguished Hungarian novelist, who, after serving in the Austrian army, and taking part in the campaign of 1814-15, retired, in 1818, to his estate in Transylvania, where he henceforth occupied himself with literature. He has written "Abafi," a national and historical tale; "The Last Batori," "The Bohemians in Hungary," "Zringi the Poet," and "Stephen Josika." He has also translated into Hungarian the English novel "A Marriage in High Life." Since the revolution in Hungary, he has resided at Brussels. B. at Torda, Transylvania, 1796.

JOSSE-ZEN-NOODE, *zhoss*, a town and parish of Belgium, about 1 mile from Brussels, of which it is a suburb. *Pop.* 8,500.

JOUBERT, Laurence, *zhoo'-bair*, physician to Henry III., king of France. On the death of Rondelet, in 1562, he became regius professor of physic at Montpellier. B. 1529; D. 1582.

JOUBERT, Bartholomew Catherine, a French republican general, who was educated for the law, but quitted it for the army, and in 1789 commenced his military course as a grenadier, whence he rose by degrees to be general. He was second in command to Bonaparte in the conquest of Italy, and signalized himself at Millesimo, Ceva, Montebaldo, Rivoli, and in the Tyrol. He was opposed to General Suwarrow, but was slain at the battle of Novi, in 1799, at a time when the Directory was about to offer him the supreme power. B. 1769.

JOUDPOOR. (*See* JODPOOR.)

JOUNA, *joo'-na*, a river of Russian America, supposed to rise in *lat.* 65° N., and *lon.* 136° W.; and, after a lengthened course, enters Behring Straits by two channels. It is navigable for 300 miles from its mouth.

JOURDAN, Jean-Baptiste, *zhoor'-da*, marshal of France. He served in the war of American independence at the age of 16 years, and in 1791 was appointed to the command of a battalion of volunteers. He fought under Dumouriez in Belgium, and became a general of division in 1793. He greatly distinguished himself at the battle of Hondschoote, and two days afterwards was named general-in-chief, but was deprived of his command by the Committee of Public Safety. Subsequently he was placed at the head of the army of the Moselle. He took Durant and Charleroi, and gained the celebrated battle of Fleurus, in 1794. Opposed by the Archduke Charles, he crossed the Rhine a second time; but, being defeated, was superseded in 1799. Named a member of the Council of Five Hundred, he proposed the law of conscription. A sincere republican, he opposed the usurpation of Bonaparte, and, after the 18th Brumaire, was excluded from the Legislative Corps. He was, however, nominated by Napoleon, marshal of France, in 1804; but he was never again employed in any important capacity. He accompanied Joseph Bonaparte to Spain, in command of the 7th military corps. B. at Limoges, 1762; D. in Paris, 1833.

JOUSSE, Daniel, *zhoosse*, a French lawyer, who wrote many works connected with his profession. B. at Orleans, 1704; D. 1781.

JOUVENCY, Joseph, *zho'-van-se*, a French Jesuit, who published an apology, in which he defended Chastel, the attempted assassin of Henry IV., and called him a martyr. He continued the History of the Jesuits, and wrote some other works. B. at Paris, 1643; D. at Rome, 1719.

JOUVENET, John, *zhoove'-nai*, a French painter, was descended from an Italian family of that profession. His first instructions were derived from his father, but he improved himself under Le Brun. He passed through all the offices of the academy, and became one of the perpetual rectors. B. at Rouen, 1647; D. 1717.

JOUX, *zhoo*, a lake of Switzerland, 18 miles from Lausanne. It is overlooked by Mont Tendre, which, on its S.E. side, attains an elevation of 5,730 feet above the level of the sea. The Château-de-Joux is a fortress in the Jura mountains, 16 miles from the lake. It has been successively the prison of Mirabeau, Toussaint l'Ouverture, Calvinchi, governor of Rome, and General Dupont. It overhangs the river Doubs at a height of 600 feet.

JOVIANUS, Flavius Claudius, *jo-vi-ai'-nus*, a Roman emperor. He was elected by the Roman soldiers, after the death of Julian, but refused the dignity, unless they turned Christians, to which they consented. He made a disadvantageous peace with Persia, shut up the heathen temples, and recalled the banished clergy. He died, after reigning seven months, owing to the suffocating vapour of burning charcoal in his room, 364. B. 331.

JOVINIAN, *jo-vin'-i-an*, a monk of Milan in the 4th century, who, after leading a life of great austerity, debauched a number of women, and procured many disciples. He held that the body of our Saviour was not real flesh, but a phantom, and that it was lawful to indulge in sensual pleasures, with other tenets equally offensive to good morals; on which account the emperor Honorius ordered him and his followers to be scourged and banished. He wrote several books, which were refuted by Jerome. D. in Dalmatia, 406.

JOVIUS, Paul, *jo'-vi-us*, an eminent historian of the 16th century. He received a pension from Francis I., king of France, and Clement VII. gave him the bishopric of Nocera, which dignity he disgraced by his course of life. His greatest work is a History of his Own Time, in folio. He also wrote the "Lives of Illustrious Men." His brother Benedict wrote the "History of Switzerland." B. at Como, 1483; D. at Florence, 1559.

JOYEUSE, Anne de, *zhwoi-e(r)se*, a French duke, favourite of Henry III., and admiral of France, who distinguished himself by many gallant exploits. He was killed in an expedition against the Huguenots in 1587. B. in France, 1561.

JOYNER, William, *joi'-ner*, otherwise Lyde, became fellow of Magdalen College, but, on turning Roman Catholic, he went abroad. He returned at the Restoration, and retired to a village in Buckinghamshire, where he led a life of devotion. He wrote the "Roman Empress," a *comedy, 1670*; "Observations on the Life of Cardinal Pole," Miscellaneous Poems, English and Latin. B. at Oxford, 1622; D. 1706.

JUAN, George, *ju'-an*, a knight of Malta, who accompanied Don Anthony de Ulloa and the French mathematicians to Peru, to ascertain the figure of the earth. He published Astronomical Observations on this voyage, prefixed to Ulloa's Historical Narrative. He also wrote a treatise on the Construction and Management of Ships. D. at Madrid, 1773.

JUAN, the name of numerous places in Spain, none of them with a population above 4,000.

JUAN DEL REY, ST., a town of Brazil, in the province of Rio Janeiro.—St. Juan is the name of several other inconsiderable settlements in Brazil; also of some other islands, bays, and points of land on the coast of South America.

JUAN DEL RIO, SAN, a town of Mexico, in the department of Durango, to the south-west of the Lake of Parras. It has rich mines, and an extensive trade in a kind of brandy called vinomescal.—Another, 60 miles from Queretaro. *Pop.* 10,000.

JUAN, ST., a river of Nicaragua, *rising* in the Andes, about *lat.* 32° 20′ S., and, after a course of 200 miles, falls into the Lake of Guanacuche.—It is the name of various other small rivers of South America.

JUAN, SAN, a province of La Plata, with a capital town of the same name. *Desc.* Generally mountainous, yet fertile, and producing corn and the grape in considerable quantities. *Pop.* 25,000. *Lat.* between

30° and 32° S. *Lon.* between 67° and 70° W. The capital is 120 miles from Mendoza, and has a considerable trade in figs, wine, and brandy. *Pop.* Unascertained.

JUAN, SAN, the chief of a group of islands situate in the Straits of Fuca (*see* FUCA), and lying between Vancouver's Island and the continent of N. America. Through the waters separating Vancouver's Island from the continent, it was decided by the treaty of 1846, between Great Britain and the United States, that the boundary-line should pass; and that this boundary should coincide with an imaginary line running through the middle of the channel to the Pacific Ocean. Leading from the Gulf of Georgia into the Pacific, however, it happens that there are several channels formed by the San Juan group of islands, and the governments of the two countries were unable to agree as to which of these channels was intended to be indicated by the treaty in question. In 1859 some American troops were landed on the island, but the officer in command was subsequently recalled, and, whilst we write, the two governments are engaged in the attempt to determine the controversy in a fair and amicable manner. (*See* VANCOUVER'S ISLAND, &c.)

JUAN-FERNANDEZ, an island of the S. Pacific, about 400 miles from the coast of Chili, to which it belongs. This is the island of Robinson Crusoe, or rather Alexander Selkirk, whom Defoe immortalized by the former name. The following description is taken from the log-book of Captain Pendleton, who, in 1859, paid a visit in the ship *Golden Rocket* to the island. "The island is about 25 miles long, by about 4 in breadth. The land is very high, rising in rugged, precipitous peaks—one of them, called Yunkque, being 3,600 feet above the level of the sea. The peaks are generally overhung with clouds. The valleys are exceedingly fertile, the grass growing to the height of 6 or 8 feet. Figs, strawberries, peaches, and cherries abound in their season. The *Golden Rocket* was there in the season of peaches, and the valleys and hill-sides were full of trees loaded down with delicious fruit. Strawberries flourish best in December and January. There are three remarkable caves in the side of the hill facing the harbour, about 30 feet in length, 25 in width, and about the same in height. The inhabitants now number but 14, and formerly a penal colony, numbering 500, was located here, the caves above mentioned being used by them; but the project was found to be impracticable, and the convicts were taken back to the mainland. The *Golden Rocket* anchored on the opposite side from that upon which Selkirk lived, and there being a mountain to cross to reach the Robinson Crusoe abode, no one ventured to make the journey. The best landing is on the eastern side, but the water is 20 fathoms deep at the head of the bay, and, in some places, so bold is the shore, that a boat, tied by her painter, and drifting to the limits, would be in 75 fathoms. An immense number of goats run wild over the island, and an abundance of fish are taken on every coast. The water is obtained from a number of never-failing rivulets trickling down over the rocks from the cloud-capped mountains." *Lat.* 33° 45′ S. *Lon.* 79° 2′ W.—This island was formerly a favourite resort of the buccaneers in their expeditions against the American possessions. In 1741 Lord Anson here repaired his ships; and, in 1749, the Spaniards formed a settlement, but subsequently abandoned the island.

JUBA I., *jú'-ba*, king of Mauritania and Numidia. He took part with Pompey against Cæsar, for which he was driven from his throne. Upon this he killed himself in despair, B.C. 42.

JUBA II., son of the preceding, was carried prisoner to Rome by Cæsar. He there became the favourite of Augustus, who gave him for a wife Cleopatra, daughter of Antony, and restored him to his throne. He wrote "The History of Arabia," "The Antiquities of Syria," "The History of Rome," and other works in Greek, fragments of which are extant. D. about A.D. 17.

JUDÆA. (*See* PALESTINE.)

JUDA-HAKKADOSH, *jú'-da hăk'-ka-dosh*, or the Saint, a famous rabbi in the time of the emperor Antoninus, to whom he was preceptor. He is said to have been the original compiler of the Mischna, or the Talmudical text.

JUDAH-CHIUC, *jú'-da chi-uk*, a celebrated rabbi and grammarian of the 11th century. He was a native of Fez, and wrote many works, particularly an Arabic dictionary. He was called the prince of Jewish grammarians.

JUDAH, the fourth son of Jacob and Leah, was the head of a tribe, to which his father gave this famous promise, "that the sceptre should not depart from it till Messiah or Shiloh should come," which was fulfilled in Jesus Christ.

JUDAH, KINGDOM OF, was formed after the schism of Jeroboam, and was composed of two tribes. Its territory comprised scarcely the sixth portion of the kingdom of Judæa, but its population equalled that of the other ten tribes. The two kingdoms of Judah and Israel were perpetually fighting with each other, and were at length subjugated. The kingdom of Judah, although smaller than its rival, endured longer. It was destroyed by Nebuchadnezzar, king of Babylon, who carried into captivity its last king. (*See* JEWS.)

JUDAISM, *jú'-da-izm*, the religion of the Jews. (*See* JEWS.)

JUDAS ISCARIOT, *jú'-dăs is-kăr'-i-ot*, so called from the place of his birth,—a city in the tribe of Ephraim. He was one of the disciples of Jesus Christ, and purse-bearer. His avaricious disposition led him to betray his master to the Jews for thirty pieces of silver; but when he found that Jesus was condemned, he was seized with remorse, gave back the wages of his iniquity, and hanged himself.

JUDAS MACCABÆUS. (*See* MACCABÆUS.)

JUDE, St., *jude*, an apostle of Jesus Christ, was called Lebbeus, Thaddeus, or the Zealous. He was the brother of St. James the Less, and preached the gospel in Mesopotamia, Arabia, Syria, Idumea, and Libya. He is said to have suffered martyrdom at Berytus, 80 A.D. An epistle of his stands in the sacred canon as the last of the seven general epistles.

JUDENBERG, *yoo'-den-bairg*, a town and capital of a circle of Austria, in the Tyrol, 40 miles from Gratz. In its neighbourhood is the modern palace of Lichtenstein. *Pop.* 1,800.—Here, in 1797, an armistice with Napoleon I. was signed.—The CIRCLE has an area of 1,681 geographical square miles, and a population of 102,000.

JUDGES, *judg'-es*, supreme magistrates of the Jews, were elected to military and judicial power. They governed the Hebrews shortly after their entrance upon the Land of Promise, and reigned in succession until the creation of the monarchical system.

JUDITH, *jū'-dith*, a Jewish heroine, who lived in Bethuliah, when Holofernes, general of the king of Syria, laid siege to that city. Judith, in order to deliver her country, visited Holofernes, who, struck by her beauty, invited her to his tent, where, while he was asleep, she cut off his head.

JUG, or JOUG, *jug*, a river of European Russia, which rises in the S. of the government Vologda, and, uniting with the Suchona near Usting, forms the Upper Dwina, which flows into the White Sea at Archangel.

JUGGERNAUT, *jug'-ger-nawt*, from the Sanscrit *Jugganat'ha*, 'Lord of the Universe;' also called Pooree, a town and celebrated temple of Hindostan, in the presidency of Bengal, and the province of Orissa, 260 miles from Calcutta. The main street entirely consists of religious edifices, and at the south end stands the great temple of Juggernaut, to which pilgrims from every part of India flock in vast numbers throughout the year, but particularly at the great festival of the idol in March. Upwards of a million devotees are said to arrive annually. The temple, an immense structure of coarse red granite, was erected for the worship of Vishnu, the chief Hindoo god, in 1198, and was called Juggernaut, that being one of the names of the deity. For many miles round the temple, the whitening bones of the pilgrims are to be seen lying on the spot where the devotees have dropped and perished of want, disease, or fatigue. This circumstance has probably been the origin of a story, by no means well authenticated, which said that large numbers of the pilgrims sought death by flinging themselves beneath the wheels of Juggernaut's car. This car, upon which a rude carving of the idol is seated, is drawn forth annually from the temple by the devotees, and placed in a sacred grove near the building, where the pilgrims adore it. *Lat.* 19° 49′ N. *Lon.* 85° 54′ E. *Pop.* 30,000.

JUGURTHA, *ju-gur'-tha*, the illegitimate son of Manastabal, the brother of Micipsa. Micipsa and Manastabal were the sons of Masinissa, king of Numidia. Micipsa, who had inherited his father's kingdom, educated his nephew with his two sons Adherbal and Hiempsal; but, as he was of an aspiring disposition, he sent him with a body of troops to the assistance of Scipio, who was besieging Numantia, hoping to lose a youth whose ambition seemed to threaten the tranquillity of his children. His designs were frustrated; Jugurtha proved brave and active, and endeared himself to the Roman general. Micipsa appointed him successor to his kingdom with his two sons; but the kindness of the father proved fatal to the children. Jugurtha destroyed Hiempsal, stripped Adherbal of his possessions, and obliged him to fly to Rome. The Romans listened to the complaints of Adherbal, but Jugurtha's gold prevailed among the senators. Cæcilius Metellus was at last sent against Jugurtha, and his firmness soon obliged him to fly among his savage neighbours for support. Marius and Sylla succeeded Metellus, and fought with equal success. Jugurtha was at last betrayed by his father-in-law Bocchus, and was delivered into the hands of Sylla, after a war of five years. He was exposed to the view of the Roman people, and dragged in chains to adorn the triumph of Marius. He was afterwards put in a prison, where he died six days after of hunger, 106 B.C.

JUIGNE BROISSINIÈRE, DE, sieur de Molière, *zhween brois-sin'-e-air*, a French gentleman, and an advocate in parliament, who wrote, in 1647, a "Theological, Historical, Poetical, and Chronological Dictionary."

JUJUI, *hoo'-hooe*, a city of La Plata, 40 miles from Salta. Near it are several rich mines. *Pop.* 4,000.—Also a river of the same name, rising on the frontiers of Bolivia, and, after a course of about 300 miles, entering the Vermejo, in *lat.* 24° 50′ S.

JULIA, *ju'-li-a*, a virgin martyr of Carthage. When that place was taken by Genseric, she was sold to a heathen merchant, and carried into Syria. Refusing to take part in some of the festivals instituted in honour of the female deities, she was put to death about 440.

JULIA, the daughter of Cæsar and Cornelia, was one of the most virtuous of the Roman ladies. She married first Cornelius Cæpio, and afterwards Pompey. D. about 53 B.C.

JULIA, the daughter of Augustus. Her beauty and accomplishments were very great, on which account she was her father's favourite, till her licentious conduct alienated his affections. She was successively the wife of Metellus, Agrippa, and Tiberius. Augustus sent her into banishment, and when Tiberius came to the throne, he suffered her to perish of want. She had a daughter of the same name, who was as vicious as her mother.

JULIA DOMNA, a native of Syria, and the wife of Severus, emperor of Rome, was a woman of great accomplishments, and well acquainted with philosophy and the sciences. On the death of Severus, her sons Caracalla and Geta succeeded to the imperial throne; the latter of whom was murdered by his brother in the arms of his mother, who was wounded in defending him. After the death of Caracalla, she is said to have starved herself to death on finding that Macrinius had assumed the imperial title, 217.

JULIAN, Cardinal, was deputed by Pope Eugene IV. to counsel Ladislas, king of Hungary, to break the peace concluded with Amurath II. A long and disastrous war was the result, during which the Christian army was defeated at Varna, in 1444. He presided at the council of Basle. D. 1398.

JULIAN, St., archbishop of Toledo, was a man of learning and piety. He wrote a treatise against the Jews. D. 690.

JULIANA, *ju'-li-an'-a*, an anchoret of Norwich, in the reign of Edward III., who assumed the prophetical character. She was the author of a singular book, entitled, "Sixteen Revelations of Divine Love, showed to a Devout Servant of our Lord, called Mother Juliana, an Anchoret of Norwich, who lived in the days of King Edward III.," published by F. R. S. Cressy, 1610. She led a life of remarkable austerity, immuring herself between four walls during many years.

JULIANUS, Flavius Claudius, *ju'-li-ain'-us*, emperor of Rome, surnamed "the Apostate," was the younger son of Julius Constantius, brother of Constantine the Great. In the massacre of his family by the sons of Constantine, he and his brother Gallus narrowly escaped. The two princes were educated in the principles of Christianity, under Mardonius, a learned eunuch, but with different effects; for, though Gallus possessed real piety, the attachment of Julian to that religion was merely affected, having secretly a strong inclination to paganism. Being sent to Athens at the age of 24, he evinced this disposition by his application to astrology, magic, and other illusions. He attached himself particularly to a philosopher named Maximus, who flattered his ambition by promising him the empire. He commanded with reputation in Gaul during the reign of Constantius, who, jealous of his success and popularity, recalled him. This gave so much offence to his soldiers, that they proclaimed him emperor, and, on the death of Constantius, in 361, he found himself in full possession of the imperial throne. He afterwards marched to the East, where his title was recognized as readily as it had been in the West. He then threw off the mask, publicly renounced Christianity, and opened the temples of the gods, in which he offered sacrifices: on this account he is called the Apostate. Soon after his accession, he resolved to chastise the Persians, who had frequently made inroads on the empire in the preceding reigns. When he crossed the Tigris, he burned his ships, that his soldiers might proceed with firmness and resolution. On his return, after marching through Assyria without opposition, his army encountered that of Sapor, king of Persia, and Julian was mortally wounded. Theodoret asserts that he took some of the blood from his wound, and, casting it towards heaven, exclaimed, "Thou hast conquered, Galilean!" a story which is hardly credible. Julian was virtuous and modest in his manners, and liberal in his disposition. He abolished the luxurious and indecent practices of the court of Constantinople, and was averse to public amusements. His "History of the Cæsars" is the most celebrated of his writings, though it is very partial. His own life has been many times written, but on no occasion so well as by Gibbon, in the "Decline and Fall of the Roman Empire." B. at Constantinople, 331; D. 363.

JULICH, *yoo'-leesh*, a town of Rhenish Prussia, 17 miles from Aix-la-Chapelle. It is the capital of a circle, and has a court of law and several public offices. *Manf.* Leather, soap, and vinegar. *Pop.* 4,300.—The CIRCLE is flat, but so fertile as to have received the name of Kornkammer, or Granary. *Area*, 93 geographical square miles. *Pop.* 39,000.

JULIUS I., *ju'-li-us*, pope and saint of the Roman calendar, succeeded Marcus in 337. He strenuously supported the cause of Athanasius, and was a man of great learning and piety. Some of his letters are extant. D. 352.

JULIUS II. (Julian della Rovere) succeeded Pope Pius III. in 1503. Sixtus IV., his uncle, made him cardinal and commander of his troops, a post which suited his enterprising genius. The emperor Maximilian, with the kings of France and Aragon, endeavoured to depose him; but he frustrated their design, and formed an alliance with them at Cambray in 1508. He then demanded from the Venetians the territories of Faenza and Rimini, which had been originally taken from them by Alexander VI., and on the death of that pontiff recovered by the Venetians, who, for refusing Julius's unjust claim, were put under an interdict. At last, being reduced to the greatest extremities, the state of Venice was obliged to submit. The pope then turned his arms against France, and besieged La Mirandola, which he entered in triumph in 1511; but, fortune turning, he was driven to Rome, and the council of Pisa declared him suspended. He was the patron of Michael Angelo, Raphael, and Bramante. D. 1513.

JULIUS III., an Italian, obtained the tiara in succession to Paul III. in 1550. He had formerly presided at the council of Trent under Paul III., and, on being elected to the papacy, joined the emperor against Octavius Farnese, duke of Parma. B. 1487; D. 1555.

JULUNDER, or JULINDER, *ju-lin'-der*, a town in the

Punjab, 80 miles from Lahore. It is surrounded by a large number of fine mausoleums. *Pop.* 40,000. The JULUNDER DOAB was, at the close of the Sikh war, ceded to the British in 1846.

JUMBOOSIER, *jum-boo-seer'*, a town of Hindostan, in the province of Gujerat, 35 miles from Baroda. *Pop.* 10,500.

JUMET, *zhoo'-mai*, a town and parish of Belgium, in the province of Hainault, 3 miles from Charleroi. It has extensive coal-works in its vicinity. *Pop.* 8,000.

JUMILLA, *hoo-meel'-ya*, a town of Spain, in Murcia, 65 miles from Carthagena. The streets are straight and wide, and on an adjoining hill are the ruins of an ancient castle. It has two churches, in one of which are said to be some fine frescoes and paintings by Rubens. *Manf.* Woollens, linens, soap, firearms, and pottery. *Pop.* 8,500.

JUMNA, or YUMNA, *jum'-na*, a celebrated river of Hindostan, which has its source in the Himalaya mountains, at Jumnoutri, 11,200 feet above the level of the sea. It enters the province of Delhi, and passing the cities of Delhi and Agra, after a course of between 700 and 800 miles, falls into the Ganges at Allahabad.

JUMNOUTRI, *jum-noo'-tre*, a place of pilgrimage at the source of the Jumna, Hindostan. The name of the place refers to the spot where ablution is performed. *Lat.* 31° N. *Lon.* 78° 40' E. The height of the mountain Jumnoutri is 25,500 feet above the sea-level.

JUNCTIN, or GIUNTINO, Francis, *joon-te'-no*, a mathematician of Florence, was for some time a Carmelite, but quitted his order, went to France, and abjured the Roman Catholic religion. He became a corrector of the press, and afterwards a manufacturer of paper and a banker, by which means he gained a large fortune. He wrote some arithmetical works, commentaries on the Sphere of Sacrobosco, on the Reformation of the Calendar, and on the Age of the "Loves of Petrarch." D. about 1580.

JUNGFRAU, *yoongf'-frou*, a lofty mountain of Switzerland, in the canton of Bern, 13,174 feet above the level of the sea. In 1804 it was first ascended by the brothers Aaron, and again by them in 1812. In 1828 it was scaled by six peasants; and, in 1841, by Forbes, of Edinburgh, and Agassiz, of Neufchatel. It ranks as the eighth in height of the mountains of Europe.

JUNIA, *jū'-ni-a*, a niece of Cato of Utica, who married Cassius, and died 64 years after her husband had killed himself at the battle of Philippi.

JUNIEN, ST., *zhoo'-ne-ā*, a town of France, in the department of the Upper Vienne, 20 miles from Limoges. *Manf.* Woollens, leather, and hats. *Pop.* 3,300.

JUNILIUS, St., *jū-nil'-i-us*, bishop of Africa, in the sixth century. He wrote two books on the Divine Law.

JUNIUS, Adrian, *jū'-ni-us*, a learned Dutchman, who studied physic, and took his doctor's degree at Bologna, after which he went to England, where he wrote several works, particularly a Greek and Latin lexicon, which he dedicated to Edward VI. He afterwards returned to his own country, and practised physic. He wrote "Commentaries on various Latin Authors," "A Poem on the Marriage of Philip II., king of Spain, with Mary, Queen of England;" "Translations from the Greek," &c. B. at Hoorn, 1515; D. 1575.

JUNIUS, Francis, professor of divinity at Leyden. He studied at Geneva, and, in 1565, became minister of the Walloon church at Antwerp, and afterwards chaplain to the prince of Orange; at last, he was made theological professor at Leyden. He is chiefly known by a Latin version of the Bible, with notes, in which he was assisted by Tremellius. B. 1545; D. at Leyden, 1602.

JUNIUS, Francis, son of the preceding. In 1620 he visited England, and was taken into the family of Thomas, earl of Arundel. There he studied the northern languages, in which he attained to considerable proficiency. He left a valuable collection of MSS. to the library of Oxford. B. at Heidelberg, 1589; D. at Windsor, 1677.

JUNIUS, the assumed name of a political writer, who, between the years 1769 and 1772, published some remarkable letters to celebrated persons, in the "Public Advertiser." Although both printer and bookseller were prosecuted, the author eluded all inquiry at the time; and, notwithstanding various conjectures have been started on the subject, supported on more or less plausibility, their author is still positively unknown. These letters have been ascribed to Mr. Burke, who solemnly disclaimed the imputation: Mr. William Gerard Hamilton, commonly called Single-speech Hamilton, was also suspected; but he likewise denied the charge. Other persons to whom they have been imputed are, John Wilkes, Mr. Dunning (afterwards Lord Ashburton), Lord Temple, Lord Grenville, and, lastly, Sir Philip Francis, whose claims to their authorship would appear to be the best founded. (*See* FRANCIS, Philip.) The letters are written in a nervous, clear, and masterly style.

JUNIUS BRUTUS. (*See* BRUTUS.)

JUNK-CEYLON, or SALANGAN, *junk'-se-lon'*, an island at the S. E. extremity of the Bay of Bengal, lying on the W. coast of the Malay peninsula, from which it is separated by a narrow channel. *Ext.* 25 miles long by about 10 broad. *Desc.* Hilly and fertile, and well adapted for producing coffee and indigo. It has numerous herds of buffaloes, hogs, and deer. *Pop.* about 5,000, consisting of a mixture of Malays, Chinese, Siamese, and Birmans. *Lat.* 8° N. *Lon.* 98° 30' E.

JUNO, *jū'-no*, the queen of the gods, according to the Grecian mythology, was daughter of Saturn and Ops, and sister to Jupiter, Pluto, Neptune, Vesta, Ceres, &c. She was born at Argos, or, according to others, in Samos, and was intrusted to the care of the Seasons, or, as Homer and Ovid mention, to Oceanus and Thetys. Juno was devoured by Saturn, according to some mythologists; and, according to Apollodorus, she was again restored to the world, by means of a potion which Metis gave to Saturn. Jupiter was not insensible to her charms, and proposed to marry her, and the nuptials of Jupiter and Juno were celebrated with the greatest solemnity: the gods, all mankind, and all the brute creation attended. By her marriage with Jupiter, Juno became the queen of all the gods, and mistress of heaven and earth. Her conjugal happiness, however, was frequently disturbed by the numerous amours of her husband, and she showed herself jealous and inexorable in the highest degree. Juno had some children by Jupiter: according to Hesiod, she was mother of Mars, Hebe, and Ilithya, or Lucina, and, besides these, she brought forth Vulcan. According to others, it was not Vulcan, but Mars or Hebe that she brought forth. The repeated debaucheries of Jupiter at last provoked Juno to such a degree, that she retired to Eubœa, resolved to forsake him for ever. Jupiter, however, produced a reconciliation, which was soon dissolved by new offences. Jupiter punished the cruelties which she had exercised upon Hercules, by suspending her from the heavens by a golden chain, and Vulcan was expelled heaven by his father, for assisting his mother. The worship of Juno was universal, and even more so than that of Jupiter, according to some authors. Her sacrifices were offered with the greatest solemnity. She was worshiped chiefly at Argos, Samos, Carthage, and afterwards at Rome. Among the birds, the hawk, the goose, and particularly the peacock, often called the bird of Juno, were sacred to her; and the dittany, the poppy, and the lily were her favourite flowers. As Juno's power was extended over all the gods, she had the privilege of hurling the thunder of Jupiter when she pleased. Her temples were numerous; the most famous of which were at Argos and Olympia. The surnames of Juno are various; they are derived either from the function or things over which she presided, or from the places where her worship was established. She was the goddess of all power and empire, and she was also the patroness of riches. She was represented sitting on a throne, with a diadem on her head and a golden sceptre in her right hand. Some peacocks generally sat by her, and a cuckoo often perched on her sceptre; while Iris, behind her, displayed the thousand colours of her beautiful rainbow. The Roman consuls, when they entered upon office, were always obliged to offer her a solemn sacrifice. The Juno of the Romans was called Matrona or Romana.

JUNONALIA, or JUNONIA, *jū'-no-nai'-le-a*, festivals at Rome in honour of Juno.

JUNOT, Andoche, *zhoo'-no*, duke of Abrantes, a French general. He entered the army as a volunteer during the Revolution, and attracted the attention of Bona-

parte at the siege of Toulon, in 1793. This was the origin of his fortune: he was appointed aide-de-camp, and went with the army to Egypt, where he so greatly distinguished himself that, on his return, he became general of division, and, in 1804, governor of Paris. In 1805 he was sent as ambassador to Lisbon, and two years afterwards assumed the command of the army sent into Portugal. Junot rapidly made himself master of that kingdom, and was created governor, with the title of duke of Abrantes; but the next year he was defeated at Vimiero by the duke of Wellington, compelled to sign the capitulation of Cintra, and obliged to abandon his conquest. This reverse brought him under the displeasure of Napoleon; he nevertheless took part, in 1810, in the Spanish campaign, and in that of Russia in 1812, becoming governor of the Illyrian provinces. His reason suddenly failing, he was compelled to return to France. B. in France, 1771; D. 1813. His widow, a woman of great accomplishments, wrote some "Memoirs on the Empire," which are full of interest.

JUNTA, *jun'-ta*, 'meeting,' the state council of Spain. The title had been formerly borne by a commercial administration; but, in 1808, Bonaparte, on the abdication of Ferdinand, summoned all the notables of the kingdom, to the number of 150, in council at Bayonne, under the title of "Junta." Many other councils of the same kind sprang up in the provinces, which were called "provincial juntas."

JUNTA, Philip and Bernard, Italian printers in the 15th and 16th centuries. They printed, at Lyons, the Letters of Leo X. by Bembo, and the works of Sanctі Pagninus. They had, also, printing-offices at Genoa, Venice, and Florence. Philip began printing at Genoa in 1497. D. about 1519. Bernard was either his brother or cousin. Philip printed some excellent editions of Greek authors, as Plutarch, Xenophon, Aristophanes, Sophocles, and Homer.

JUNTA, Thomas, a Venetian physician, who published, in 1554, a learned book on the Battles of the Ancients.

JUPITER, *jw'-pi-ter*, the most powerful of all the gods, according to the mythologists, was the son of Saturn and Ops. He was saved from destruction by his mother, and intrusted to the care of the Corybantes. Saturn, who had received the kingdom of the world from his brother Titan, on condition of not raising male children, devoured all his sons as soon as born: but Ops concealed Jupiter, and gave a stone to Saturn, which he devoured on the supposition that it was a male child. Jupiter was educated in a cave on Mount Ida, in Crete, and fed upon the milk of the goat Amalthæa. He received the name Jupiter. As soon as he was a year old, Jupiter found himself sufficiently strong to make war against the Titans, who had imprisoned his father because he had brought up male children. The Titans were conquered, and Saturn set at liberty by his son. Saturn, however, soon after, apprehensive of the power of Jupiter, conspired against his life, and was, for this treachery, driven from his kingdom, and obliged to fly into Latium. Jupiter, now become the sole master of the empire of the world, divided it with his brothers. He reserved for himself the kingdom of heaven, and gave the empire of the sea to Neptune, and that of the infernal regions to Pluto. The peaceful beginning of his reign was soon interrupted by the rebellion of the giants, whom he subdued by the assistance of Hercules. Jupiter now gave himself up to pleasures. He married Metis, Themis, Eurynome, Ceres, Mnemosyne, Latona, and Juno. He became a Proteus to gratify his passions. His intrigues with Danaë, Antiope, Leda, Europa, Ægina, Calisto, and Alcmena, are all well known. His children were also numerous as well as his mistresses. The worship of Jupiter was universal: he was the Ammon of the Africans, the Belus of Babylon, the Osiris of Egypt, &c. His surnames were numerous, many of which he received from the place or functions over which he presided. He was delighted with the sacrifice of goats, sheep, and white bulls. The oak is sacred to him, because he first taught mankind to live upon acorns. He is generally represented sitting upon a golden throne, holding, in one hand, thunderbolts just ready to be hurled, in the other a sceptre; and an eagle stands with expanded wings at his feet. Jupiter had several oracles, the most celebrated of which were at Dodona, and Ammon, in Libya. As Jupiter was the king and father of gods and men, his power was extended over the deities, and everything was subservient to his will, except the Fates.

JURA, *joo'-ra*, a European mountain-chain, belonging to the system of the Alps, commencing near Geneva, and extending N. along the frontier of France and Switzerland, separating the departments of the Ain, the Jura, and the Doubs, from the cantons of Geneva, Vaud, Neufchatel, and Bern. Its highest peaks are Renelet, Tendre, the Colombier, and the Dole. All these are between 5,500 and 5,700 feet high. *Ext.* About 220 miles long, with a breadth of about 62 miles at its broadest part. Many of its sides are covered with woods, in which are numerous wolves and a few brown bears.

JURA, a department in the E. of France, comprising the S. E. part of Franche Comté, and bounded by Switzerland on the W., and by the French territory in every other direction. *Area*, 1,917 square miles. *Desc.* Mountainous, being covered in the E. by the principal chain of the Jura, but intersected by many beautiful and fertile valleys. *Pro.* The usual cerealia and the grape; but the pastures being both rich and extensive, vast numbers of cattle are reared, and the produce of the dairy forms a principal source of wealth to the inhabitants. *Minerals.* Coal, iron, salt, marble, and alabaster. *Manf.* Cutlery, woollens, linens, leather, clocks, watches, and articles of wood and ivory, with mineral waters. *Pop.* About 320,000. *Lat.* between 46° 26′ and 47° 20′ N. *Lon.* between 5° 17′ and 6° 11′ E.

JURA, a river rising near Ratova, in the Russian government of Wilna, and, after a course of 75 miles, falling into the Memen, above Tilsit.

JURA, one of the Hebrides, or W. islands of Scotland, situate to the N.E. of the island of Islay, and opposite to the district of Knapdale, in Argyleshire, to which county it is annexed. *Ext.* 36 miles long, with a mean breadth of 7. *Desc.* It is the most rugged of the W. isles, being composed chiefly of huge rocks, piled on one another in the utmost disorder, naked, and incapable of cultivation. The mountainous ridges terminate in four similar peaked mountains, called the Paps of Jura, the highest of which attains an elevation of 2,700 feet. All the inhabitants live on the E. side. Here, along the margin of the sea, the coast is pretty level. *Pro.* The only crops are oats, barley, potatoes, and flax; the chief manure is the seaweed which is cast ashore. There is only one small village, called Jura, on the E. coast of the island, inhabited by a few fishermen. The Gaelic is the only language spoken in the island. *Pop.* 2,300. *Lat.* 56° 2′ N. *Lon.* 5° 51′ W.

JURIEU, Peter, *zhoo'-re-e(r)*, a French Protestant divine, was the son of Daniel Jurieu, pastor of the reformed church at Mer, in the diocese of Blois. His mother was sister to the famous Peter du Moulin. He received his education partly in Holland and partly in England, and while there received episcopal ordination. On his return home, he became assistant to his father, and professor of divinity and Hebrew at Sedan, where he gained great reputation by his lectures and preaching. He wrote against Bossuet's "Exposition of the Doctrine of the Catholic Church," and defended the moral character of his sect against the accusations of Arnauld. On the revocation of the edict of Nantes he retired to Holland, and was chosen pastor of the Walloon church at Rotterdam. He there applied so assiduously to the study of the Revelations, as to fancy he had discovered most of the mysteries therein; and particularly with regard to Antichrist. He addressed William III., king of England, as the instrument appointed to destroy the kingdom of the beast. He embroiled himself in controversy with Bayle and Beauval, who had objected to the extravagance of his opinions. His chief works are, "The History of Calvinism and Popery, with a Parallel between them;" "Pastoral Letters," "On the Unity of the Church," "Treatise of Nature and Grace," and "Critical History of the Doctrines and Worship of the Church, and those of the Pagans." B. at Mer, in France, 1637; D. at Rotterdam, 1713.

JURIEV POLSKOI, *joo'-re-ev pols'-koi*, a town of Russia, and the capital of the circle of the same name, 40 miles from Vladimir. *Pop.* 1,800.—The CIRCLE produces hemp and flax, and has a population of 85,000.

JURIEV POVOLSKOI, *ju'-ri-ef po-vols'-koi*, a town of Russia, and the capital of a circle, 90 miles from Kostroma. *Pop.* 2,500.—The CIRCLE is fertile and well cultivated, with a population of 110,000.

JURIN, James, *ju'-rin*, secretary to the Royal Society of London, and president of the College of Physicians. He wrote papers on philosophical and medical subjects in the "Philosophical Transactions," and had a dispute with Michelloti on the motion of currents; with Keill and Senac on the motion of the heart; with Robins upon distinct vision; and with the partisans of Leibnitz on the active forces. D. 1750.

JUSSIEU, Anthony de, *zhoos'-se-u(r)*, a French botanist and physician. After travelling over Europe, he settled at Paris, where he became a member of the Academy of Sciences, and professor of botany in the Royal Garden. He enriched the memoirs of the French Academy with several valuable papers on botany and mineralogy, the result of observations made during his travels. He also wrote the appendix to Tournefort's "Institutions of Botany," and abridged Barrelier's work upon the Plants of France, Spain, and Italy; he was likewise the author of a "Discourse on the Progress of Botany." B. at Lyons, 1686; D. 1758.

JUSSIEU, Bernard de, brother of the above. He distinguished himself as an able physician and botanist. He became professor and demonstrator in the Royal Garden, and was chosen a member of the French Academy of Sciences, and of several foreign societies. He published an edition of Tournefort's "History of Plants in the Environs of Paris," and was the author of a book entitled "The Friend of Humanity; or, the Advice of a Good Citizen to the Nation." B. at Lyons, 1699; D. at Paris, 1777.

JUSSIEU, Joseph de, brother of the preceding, was also a member of the Academy of Sciences at Paris, and accompanied Condamine to Peru in 1735. He was not only a good naturalist and physician, but an excellent engineer. He published a journal of his voyages. B. at Lyons, 1704; D. 1779.

JUSSIEU, Antoine Laurent de, a celebrated French botanist, nephew of the preceding, was the greatest philosopher of his family, and author of the "Natural System of Botany." He went to Paris, in 1765, to complete his studies, under the direction of his uncle Bernard. In 1770 he took the degree of doctor of medicine, and was soon afterwards chosen professor of botany in the Royal Garden. In 1789, he published his great work, the "Genera Plantarum," in which, for the first time, the whole vegetable kingdom was arranged according to a natural classification. He subsequently filled many important scientific posts in Paris, and continued till his eighty-eighth year to dictate valuable memoirs on the science of botany. The great work of Jussieu, in an improved and amended form, is one of the chief text-books on botany, not only in France but in England. B. at Lyons, 1748; D. at Paris, 1836.

JUSSIEU, Adrien de, son of the above, was educated for the medical profession, but devoted himself to the science which his father had so greatly benefited. In 1826 he succeeded his father as professor of botany; and, although he wrote no large work on the science, he contributed a great number of valuable memoirs relative to it to the scientific annals of France. He also contributed to the "Natural History" of Milne-Edwards. He was a member, and afterwards president, of the French Academy of Sciences. B. at Paris, 1797; D. at the same place, 1853.

JUST, ST., *just*, a village and parish of Cornwall, near the Land's End. The village is about a mile from Cape Cornwall, and consists principally of the cottages of miners engaged in copper-mines in the parish. *Pop* of the parish, about 7,000.

JUST, ST., *yoost*, a monastery in Estremadura, whither Charles V. of Spain retired after abdicating the crown in favour of his son Philip. (*See* CHARLES V.)

JUSTEL, Christopher, *zhoos'-tel*, counsellor and secretary to the king of France. He published, "The Code of Canons of the Universal Church," and the "Councils of Africa, with Notes;" and "The Genealogical History of the House of Auvergne." B. at Paris, 1580; D. 1649.

JUSTEL, Henry, son of the above, and his successor as counsellor and secretary. He was a man of learning and liberality, and so partial to England that he sent his father's MSS. to the university of Oxford, which learned body complimented him in return with the degree of LL.D. On the revocation of the edict of Nantes, he went to London, and was appointed keeper to the king's library. B. 1620; D. 1693.

JUSTI, N. de, *yoost'-te*, a German mineralogist, who devoted himself with assiduity to the study of mineralogy, and acquired such knowledge therein as to be named member of the Council of Mines. He afterwards became professor of political economy and natural history at Gottingen. He wrote treatises on Mineralogy and on Money, for some free remarks in which, on the states of Prussia and Wittemberg, he was confined for a considerable time in the castle of Breslau. He had projected a German Encyclopædia, and wrote some pamphlets against eminent naturalists. B. about 1705.

JUSTINIANI, Bernard, *yoost'-teen-e-a-ne*, a Venetian noble, was sent as ambassador to Louis XI. of France, who conferred on him the honour of knighthood. In 1474 he was made procurator of St. Mark, the second dignity of the republic of Venice. He wrote a History of Venice and other works. B. 1408; D. 1489.

JUSTINIANI, Augustin, bishop of Nebio, in Corsica. Francis I. of France made him his almoner and royal professor of Hebrew at Paris. He perished in a shipwreck in sailing from Genoa to Corsica, in 1536. B. at Genoa, 1476.

JUSTINIANI, Fabio, bishop of Ajaccio. He wrote a Commentary on Tobit, and an Index of all the writers who had written commentaries on the whole or any part of the Bible.

JUSTINIANUS I., *jus-tin-e-ai'-nus*, emperor of Rome, succeeded his uncle Justinus I. in 527. He was the protector of Christianity, and carried his arms with success against his enemies, for which he was chiefly indebted to his general Belisarius, who also preserved him from a formidable conspiracy. Peace being restored, Justinianus formed into a body all the Roman laws, which was executed under the title of "Digests," or "Pandects." After this great work was finished, the laws of modern date were collected into one volume, called the "Novellæ." He exerted himself against the ecclesiastical encroachments of Popes Sylverius and Vigilius. He built many churches, particularly the famous Saint Sophia at Constantinople, and abolished the consulate. B. 483; D. 565.

JUSTINIANUS II. was the elder son of Constantine III., whom he succeeded on the throne of Constantinople in 685. He recovered several provinces from the Saracens, and made an advantageous peace with them; but his exactions, cruelties, and debaucheries tarnished the glory of his arms. He formed the design of destroying all the inhabitants of Constantinople, which being discovered, the tyrant was deposed in 694, and banished to the Crimea. Leo the Patrician gained the throne, but he was displaced by Tiberius. About 704, Justinianus, being aided by the Bulgarians, regained his crown, but was slain, with his son Tiberius, in 711, by Philippicus Bardanes, his successor.

JUSTINUS I., *jus-ti'-nus*, emperor of the East. He rose to the rank of general from being a private soldier, before which, he was a swineherd. The soldiers of the prætorian band forced him to accept the imperial dignity on the death of Anastasius, in 518. He recalled the bishops who had been banished by the Arians, and published several severe edicts against that sect. Hearing of the destruction of Antioch by an earthquake, he laid aside the imperial robes, clothed himself in sackcloth, and passed several days in fasting and prayer, to avoid divine judgment. He rebuilt that city, and other places which were destroyed by the same calamity. B. 470; D. 527.

JUSTINUS II. was the nephew and successor of Justinianus I. in 565. He caused his cousin Justinus to be strangled, and put to death some of his senators from a suspicion of their being disaffected. He made war against Chosroes, king of Persia, who, being defeated at the head of a numerous army, was obliged to sue for peace. Justinus married Sophia, niece of Theodora, wife of the emperor Justinianus, a woman of high spirit, who, taking advantage of her husband's weakness, governed the empire in conjunction with Tiberius. D. 578.

JUSTINUS, a Latin historian of the 2nd century,

who made an abridgment of the "Universal History" written by Trogus Pompeius. This work remains, but the original is lost.

JUSTINUS, commonly called Justin Martyr, a Christian philosopher and martyr in the 2nd century. His parents were heathens, and himself a zealous adherent to the Platonic philosophy; but, disputing with a Christian in 132, he was converted to that faith, though he still continued to wear the pallium, or cloak of the Grecian philosophers. He was an equal honour to Christianity by his knowledge, his firmness, and the purity of his life. A persecution breaking out against the Christians under Antoninus, Justinus presented to that emperor an admirable apology in their behalf, which had the desired effect. He afterwards addressed another apology to Marcus Aurelius, in which he defended his co-religionists against the calumnies of Crescentius, a Cynic philosopher. This last is said to have gained him the crown of martyrdom, about 165. Besides these apologies, his dialogue with Trypho, a learned Jew, and some other pieces in the Greek language, are extant. The best edition of his works is that of Jena, 1844.

JUTERBOCK, *yoo'-ter-bok*, a town of the Prussian province of Brandenburg, on the Rohrbach, 29 miles from Potsdam. It is the capital of a circle. *Manf.* Woollens and linens. *Pop.* 5,000. The CIRCLE has an area of 390 geographical square miles, and a population of 45,000.

JUTES, *juits*, an ancient people of Germany, who belonged to the Gothic race, and gave name to Jutland.

JUTLAND, *jut'-land*, a province of Denmark, which formerly comprised the whole peninsula, forming the mainland of the Danish dominions; but the name of Jutland is now confined to the N. half of the peninsula, forming the province of N. Jutland. The S. half is better known by the name of Schleswig, and will be found described under that article. Jutland is inclosed on all its sides, except the S., by the sea. On that side it is bounded by Schleswig. *Area*, 7,452 geographical square miles. *Coastline.* Estimated at 523 miles. *Desc.* The E. coast, particularly from Aarhuus S., presents a succession of fertile elevations; whilst the W. coast faces the German Ocean for more than 240 miles, and presents, almost without interruption, a long line of sand-banks and reefs. On this side there is hardly a single harbour or navigable creek. On the N. coast is an immense range of sand-banks, which often rise almost to the surface of the water, and, with the numerous currents, render the navigation extremely hazardous. The degree of its fertility is various: in some places the pasturages are excellent; but they are bordered by a chain of small hills of moving sand, which does infinite mischief. The southern division of the W. coast, particularly below Ribe or Rypen, consists of alluvial soil, deposited by the ocean, of surprising fertility, but marshy and unhealthy. Dykes are necessary, as in Holland, to prevent the inroads of the sea. *Rivers.* Not numerous, and none of great size; but the want of them is amply compensated by a number of bays, or inlets of the sea, which run up a great way into the country. *Zoology.* Game is abundant; and a few boars are still found in the forests. *Climate.* Similar to that of the north of England. *Pro.* Rye is the kind of corn most generally cultivated. The pasturages, however, are rich and extensive. The culture of potatoes is progressively extending; but, in general, the state of agriculture is very backward. *Exp.* The principal are corn and cattle: of the former, the great articles are rye and oats; the other exports are stockings, woollens, and earthenware. *Language.* The bulk of the inhabitants speak Danish, but very incorrectly. The gentry speak German, and many understand English and French. *Rel.* The prevailing is Lutheranism. *Pop.* 577,000. *Lat.* between 55° 23' and 57° 44' 52" N. *Lon.* between 8° 7' and 10° 48' E.

JUVARA, Philip, *yoo-va'-ra*, an Italian architect, who was employed by the king of Sardinia to build some fine structures at Turin. In 1734 the royal palace at Madrid being burnt, Philip V., king of Spain, sent for him to erect another, more magnificent; he made a design, which was approved of, but the commencement of the work being delayed from day to day, it is supposed the architect died of chagrin in 1735. B. at Messina, 1668.

JUVENAL, Decius Junius, *ju'-ve-nal*, a Roman satirical poet. He went to Rome when young, and was for some time a pleader, after which he applied himself to writing satires with great success. Domitian sent him into honourable exile, by appointing him to a military command on the frontiers of Egypt. The best translations of his works are those of Dryden, Gifford, and Hodgson. B. about 40; D. 120.

JUVENTAS, *ju-ven'-tas*, a Roman goddess, who presided over youth and vigour. She is the same as the Hebe of the Greeks, and was represented as a beautiful nymph in variegated garments.

JUXON, William, *juz'-on*, archbishop of Canterbury. He studied at St. John's College, Oxford, of which, in 1621, he was elected president. In 1633 he was appointed clerk of the closet to the king, and the year following nominated to the bishopric of Hereford, but, before consecration, he was advanced to the see of London. In 1635 he was appointed lord high treasurer, which excited great indignation against Archbishop Laud, as the means of it; but the conduct of Bishop Juxon in that dignity was irreproachable. He suffered, in the rebellion, the loss not only of his ecclesiastical revenues, but a great part of his temporal estate. In 1648 he attended the king upon the scaffold, after which the regicides caused him to be taken into custody, to make him reveal what Charles I. had secretly intrusted to him. At the Restoration, he was made archbishop of Canterbury. B. 1582; D. 1663.

JYHTPORE, or JEYTPORE, *jit-por'*, a town and fortress of Hindostan, in the province of Allahabad, 20 miles from Sylhet. It is the capital of a district, and the residence of a rajah. *Pop.* Unascertained. The DISTRICT has an extent of 108 miles long and 57 broad, and is well watered and fertile. *Lat.* between 25° and 26° N. *Lon.* between 91° and 93° E.

## K.

KAARTA, *kar'-ta*, a kingdom of considerable extent in Western Africa, situate to the west of Bambarra. *Desc.* Mountainous, but well cultivated. *Pop.* Unascertained, but said to be considerable.

KABRUANG, *ka-broo-ang'*, an island of the Malay archipelago, about 18 miles in circumference. It lies between Gilolo and the Philippines. *Pop.* Unascertained. *Lat.* 3° 50' N. *Lon.* 126° 30' E.

KABUL, or KAUBUL. (*See* CABUL.)

KABYLES, *ka-biles'*, an aboriginal African people, inhabiting the mountains of the Atlas. They are an independent race of marauders, who mainly exist by plundering the people of the plains. They are divided into numerous tribes, the chief of which are the Beni-Abbas, the Koukos, and the Henneichas. They are not to be confounded with Arabs, Moors, or Turks.

KADICHAH, *ka'-di-sha*, the first wife of Mahomet, who, at the period of her marriage with the prophet, was the widow of two husbands, and forty years of age, Mahomet being only twenty-five. She had four sons and four daughters by Mahomet; among the rest the beautiful Fatima. D. 628.

KADOM, *ka-dom'*, a town of European Russia, in the government of Tambov, 230 miles from Moscow. *Pop.* 6,000.

KÆMPFER, Engelbert, *kame'-pfer*, a German physician and traveller, who, in 1683, accompanied, as secretary, the Swedish ambassador to Moscow and Ispahan. He afterwards embarked in a Dutch vessel, visited India, and then proceeded to Japan, making many valuable observations relative to the natural history of that country. He returned to Europe in 1693, and took up his residence in his native land, where he occupied himself in writing memoirs upon the countries he had seen. He left a collection of valuable manuscripts, which Sir Hans Sloane published in English in 1727, under the title of "History of Japan." This work was afterwards translated into German and French. B. at Lemgo, 1651; D. 1716.

KAFFA, CAFFA, or FEODOSIA. (*See* CAFFA.)

KAFFIRISTAN. (*See* CAFFARISTAN.)

KAFFRARIA, a territory of Southern Africa. (*See* CAFFRARIA.)

KAHLA, *ka'-la*, a town of Germany, on the Saale, 8 miles from Jena. *Pop.* 2,500.

KAIFFA. (*See* CAIFA.)

KAIMES, Lord. (*See* HOME.)

KAIOUK, or GAIOU-KHAN, *kai'-ook*, third grand khan of the Mongols, was son of Oktai, and grandson of Ghengis-Khan. He completed the conquest of China, commenced by his father, but died suddenly in the midst of his victories. Kaiouk is called, among the sovereigns of China, Ting-Tsoung. B. about 1205; D. 1248.

KAIRA, *kai'-ra*, a town of Hindostan, in the province of Gujerat, 265 miles from Bombay. It is the capital of a district, and has a court-house, a prison, and a Jain temple. *Pop.* Unascertained. The DISTRICT has an area of 1,870 square miles, and a population of 581,000. *Lat.* between 22° 12′ and 23° 33′ N. *Lon.* between 72° 30′ and 73° 27′ E.

KAIRWAN, or KAIROAN, *kar'-wan*, a city of Northern Africa, 80 miles from Tunis. The great mosque here is esteemed at once the most magnificent and most sacred in Barbary. *Manf.* Morocco leather, boots, and slippers. *Pop.* Estimated at 40,000. In the 9th century this was the capital of the Arab dominions in Africa. It still has numerous remains of antiquity.

KAISARIEH, *ki-sa-re'-ai*, a city of Asia Minor, the ancient capital of Cappadocia, 160 miles from Konieh. Its external appearance is mean, but it is resorted to by merchants from all parts of Asia Minor and Syria, who come to purchase cotton, which is here cultivated in great quantities. *Pop.* about 8,000, composed of Turks, Armenians, and Greeks. (*See* CÆSAREA.)

KAISERSLAUTERN, *ki'-zer-slow'-tern*, a fortified town of the Bavarian province, on the Rhine, 25 miles from Landau. It is the chief town of a district, and was the scene of much hard fighting in 1792 and 1793. *Pop.* 7,000.

KAKIG I., *ka'-kig*, king of Armenia, reduced several tribes to submission, and greatly embellished his capital. He reigned from 989 to 1020.

KAKIG II., the last king of Armenia of the Pagratides family. He reigned from the year 1042 till 1079.

KALAH, *ka'-la*, 'a castle,' a prefix of numerous fortresses and villages in W. Asia.

KALAMAZOO, *kal-a-ma-zoo'*, a river of the United States, in Michigan. After a course of 200 miles, it falls into Lake Michigan, 40 miles from the mouth of the river St. Joseph.

KALB, John Baron de, *kalb*, a German, who served as general in the American army of independence. Having been employed in the French army, he was sent on a mission to the United States. In 1770 he espoused the cause of the Americans, and, after a voyage to France, returned with a number of men, among the rest the distinguished Lafayette. He was appointed general, and was killed at the battle of Clermont, in 1780. B. at Nuremberg, 1739.

KALBE, *kal'-be*, a town of Prussian Saxony, on the Saale, 20 miles from Magdeburg. It is the capital of a circle. *Manf.* Hosiery and woollens. *Pop.* 7,000.

KALE, *kail*, a river of Scotland, in Roxburghshire, which falls into the Teviot.

KALENBERG, *ka'-len-bairg*, a principality of Hanover, comprising the capital of that kingdom. *Area*, 1,050 square miles. *Pop.* 1,950,000.

KALIDASA, *ka-le-da'-sa*, a Hindoo poet, who wrote, among other works, "Sakoontalah," a drama, in Sanscrit, which has been translated into English. He appears to have lived about the first century of the Christian era.

KALIL-PACHA, *ka'-lil*, grand vizier of Amurath II. He gained the battle of Varna, in 1444, over Ladislas, king of Hungary, who perished in the fight. He also assisted at the taking of Constantinople by Mahomet II., in 1453, but was soon afterwards banished for alleged treason.

KALIOUGA, or KALI-YOUGA, *ka-le-oo'-ga*, 'the age of iron,' an era of the Hindoo chronology. It is important as commencing the authentic period of Hindoo history; the three preceding eras being entirely fabulous. The era of Kaliouga is computed to commence about 3101 B.C.

KALISCH, or KALICZ, *ka'-lish*, a town of Poland, on the frontier of the Prussian territory, 65 miles from Breslau. It is inclosed by walls, and entered by several gates. Its principal public buildings are a citadel, judicial court-house, a cathedral, a theatre, and several hospitals. *Manf.* Woollen and linen fabrics, and leather. *Pop.* 17,500. In its vicinity, in 1706, the Swedes were defeated by the Poles.

KALKAS, *kal'-kas*, a Tartar nation of the Mongol race, who occupy extensive tracts to the N. and W. of China.

KALKBRENNER, Christian, *kalk'-bren-ner*, a German musical composer, who resided at Berlin, attached to the court of the Prussian king, but, in 1796, went to Paris. His most celebrated works are "Olympus," "Saul," and "Don Juan;" besides which he composed many smaller pieces. B. at Munden, 1755; D. at Paris, 1806.

KALLO, GREAT, *kal'-lo*, a market-town of Hungary, 22 miles from Debreczin. It has both Greek and Protestant churches. *Manf.* Saltpetre. *Pop.* 5,500.

KALLUNDBORG, *kal'-loond-borg*, a seaport of Denmark, on the west coast of the island of Zealand, 60 miles from Copenhagen. It has a good harbour and an active trade in cattle and corn. *Pop.* 2,500.

KALMAR. (*See* CALMAR.)

KALMUCS. (*See* CALMUCKS.)

KALOCSA, or COLOCZA, *ka lok'-sa*, a town of Hungary, 70 miles from Pesth. It is a steampacket-station on the Danube, and is the see of an archbishop. *Pop.* 11,500.

KALUBRO, Vincent, *ka-loo'-bro*, a Polish prelate and historian. The chapter of Cracow elected him their bishop, and he founded several new prebends in that and other churches. The cathedral being destroyed by lightning, in 1218, he retired to a monastery of the order of Cistercians, where he wrote his "Chronicle of the Polish Kingdom."

KALUGA, *ka-loo'-ga*, a government of European Russia, bounded by the provinces of Moscow, Smolensko, Tula, and Orel. *Area*, 12,176 square miles. *Desc.* Flat, and producing rye, wheat, oats, barley, lint, and hemp. *Manf.* Cottons, hardware goods, cutlery, leather, soap, beet-root sugar; and there are many distilleries. *Pop.* about 1,000,000.

KALUGA, capital of the above government, stands on the Oka, 95 miles from Moscow. It is the see of a bishop, and has a seminary for the children of poor nobles. *Manf.* Cottons, cloth, muskets, paper, soap, vitriol, oil, and pottery. It has, besides, numerous sugar-refineries and tanneries. *Pop.* 30,000. *Lat.* 54° 3′ N. *Lon.* 36° 5′ E.

KALWARY, *kal'-war-e*, a neatly-built town of Poland, in the province of Augustov, 75 miles from Wilna. *Manf.* Leather principally. *Pop.* 6,000.

KAMA, *ka'-ma*, a river of European Russia, the principal tributary of the Volga, rising in the government of Viatka, near Glazov, and, after an estimated course of 1,400 miles, joining the Volga 40 miles from Kasan. It is navigable for barges from the Volga to Perm, and is traversed by steam-vessels.

KAMA, or KAMADEVA, a Hindoo divinity, corresponding to the Cupid of the Grecian mythology.

KAMEHAMEHA IV., Alexander Liho-Liho, *käm-e-häm'-e-ha*, king of the Sandwich Islands. He ascended the throne in 1854, having previously received his education from the English missionaries, by whom he was taught the English and French languages. To his firmness may be attributed the defeat of the American project for obtaining possession of the country over which he rules. In 1856 he married Miss Emma Rooke, daughter of an English surgeon, and the descendant, on her mother's side, of John Young, the first white man who had settled on the island, upwards of 60 years ago.

KAMENITZ, *ka'-me-nitz*, numerous towns and villages of the Austrian empire, none of them with populations above 4,000.

KAMINIETZ, *ka'-min-yetz*, a town of Russian Poland, capital of the government of Podolia, 235 miles from Odessa. Its principal building is the cathedral of St. Peter and St. Paul. It has, besides, a Russian theological seminary, and several other public schools. *Pop.* 16,000. The fortifications of this place were razed in 1812, but have since been rebuilt.

KAMISHIN, *ka'-mi-shin*, a town of Russia, on the Volga, 105 miles from Saratov. It is inclosed by walls,

and has a trade in agricultural produce. *Pop.* 7,500. This town was founded by Peter the Great.

KAMPEN, *kam'-pen*, a fortified town of the Netherlands, on the Yssel, 10 miles from Zwolle. *Manf.* Chiefly woollens. *Pop.* 9,000.

KAMTSCHATKA, *kămt-chät'-ka*, a peninsula on the N.E. of Asia, forming part of the Russian government of Irkutsk, and the district of Okhotsk, to which it is joined at its N. extremity. It is bounded on the E. by the Sea of Kamtschatka, on the W. by the Sea of Okhotsk, on the S. by the Pacific, and on the N. by the country of the Zchuktchi. *Ext.* 880 miles long, with a breadth of 280 at its widest parts. *Desc.* It is traversed by a range of lofty mountains, extending the whole length of the peninsula. Several of these are volcanic; but the most remarkable is one situate near Nijni Kamtschatsk, the volcano of which is very active, and two years seldom elapse without some violent eruption. The culminating point of the range of the peninsula is Klintchevskaja, which has an elevation of 15,760 feet. *Rivers.* The Kamtschatka, with its principal affluent the Jelowka. *Lakes.* Kurile, which has a length of 20 miles, and a breadth of 12. *Zoology.* A great variety of animals, which produce the richest and most valuable furs. The sable is more plentiful here than in Siberia, though its fur is not quite so beautiful. There are several varieties of the Arctic fox, or fire-fox of Kamtschatka. The other animals are the beaver, the hare, the marmot, and the argali, or wild sheep. The bear is the most formidable, and the hunting of it the most serious occupation of the Kamtschadale. Game is abundant, particularly woodcocks, snipes, grouse, wild geese, and ducks, the eggs of which last are collected by the natives, and preserved in the fat of fish. The coasts and rivers swarm with fish, which form the main article of food to the inhabitants. The excellence of the salmon, herrings, and different kinds of shell-fish, is particularly remarked. *Pro.* The only vegetable productions are a stinted birch, dwarf pines, the cedar, and the larch. Shrubs are more plentiful; such as the mountain ash, wild rose, and raspberry; there is also a variety of berries. Rye, barley, and a few potherbs are cultivated in the interior, where, protected by the mountains, the climate is milder. *Minerals.* Iron and sulphur, the latter abundant. *Commerce.* The trade of Russia with Kamtschatka is carried on from Irkutsk by the difficult and tedious route of Okhotsk, whence three ships are sent annually with supplies of grain and sugar. The imports, besides brandy, are nankeens and other Chinese stuffs, together with various commodities of Russian and foreign manufacture; as ribbons, handkerchiefs, stockings, caps, shoes, boots, and, in general, all articles of European consumption, but in small quantity, and bearing a very high price. The only exports are furs, whale oil, fish, and eggs. The goods are conducted on sledges drawn by dogs. *Inhabitants.* The Kamtschadales are, in general, below the common height, with broad shoulders and large heads. The face, and particularly the nose, is long and flat, the eyes small and sunk, the lips thin, and they have scarcely any beard. Their legs are short, yet they walk much, and with rapidity. They are, like all savages, indolent, and addicted to coarse sensuality. Their principal food is fish, which they devour with avidity, and without the least regard to cleanliness or delicacy. *Pop.* estimated at 6,000, of whom two-thirds are Russians. *Lat.* between 51° and 59° 55′ N. *Lon.* between 155° 40′ and 164° 20′ E. In 1706, all Kamtschatka was surveyed and occupied by the Russians. The sway which they have established is exceedingly mild; notwithstanding which, the Kamtschadales, like all savage nations coming in contact with civilized, have suffered deeply from the connection, and the introduction of ardent spirits among them. The country, since 1783, has been divided into four districts: 1. Bolcheretsk; 2. Tigulok; 3. Nijni Kamtschatsk; 4. Verschnei Kamtschatsk.

KANARIS, Constantine, *kan'-a-ris*, a celebrated Greek mariner, who, in the Greek war of independence, signalized himself by conducting the fire-ships into the Turkish fleet. In 1824, he burnt a Turkish frigate at Samos, and a corvette in the port of Mitylene; after which he served under the Greek admiral as captain. In 1825 he attempted to destroy the squadron of Mehemet Ali, as it lay in the port of Alexandria, preparing to embark troops for the Morea; but the fire-ships, driven back by a contrary wind, burnt themselves out in the open sea, doing no injury to the enemy. In 1827 he represented Ipsara at the national Greek assembly; subsequently, he commanded the Greek fleet, but on the assassination of the president, in 1831, he resigned, and retired into private life. He was nominated minister of marine and president of the council in 1848-49, but again retired in 1855. He has been called the "Themistocles of Modern Greece," and Victor Hugo has popularized his daring deeds in verse.

KANDAHAR. (*See* CANDAHAR.)

KANDLER, John Joachim, *kand'-dler*, master modeller in the porcelain manufactory at Meissen. He executed many beautiful figures, particularly of the apostle Paul and the Death of St. Xavier. B. in Saxony, 1706; D. 1776.

KANDY. (*See* CANDY.)

KANE, *kain*, a county of the United States, in Illinois. *Area*, 540 square miles. *Pop.* 17,000.

KANE, Elisha Kent, an American traveller. After concluding his education at the medical college of Pennsylvania, he was appointed, in 1833, assistant surgeon in the United States navy, and accompanied the first American embassy to China. He afterwards visited the Philippines, Ceylon, and travelled into the interior of India. At Java his travelling companion, Baron Loë, a Prussian, died of fatigue. Dr. Kane subsequently visited Egypt and explored the Nile as far up as the frontiers of Nubia; he walked completely over Greece, and, after a short sojourn in the United States, set out for the coast of Africa, penetrating to the slave-markets of Whydah. Prostrated by fever, caught in that country, he returned in an enfeebled condition of health to his native land. He next served with the American army against Mexico, and experienced many fatigues and dangers throughout the campaign. In 1850 he accompanied the first American expedition, despatched by Mr. Grinnell, a merchant of New York, in search of Sir John Franklin and four years afterwards published "A Personal Narrative of the Grinnell Expedition in Search of Sir John Franklin." In 1853 he was appointed to the command of a second expedition to the Arctic regions, for the same purpose, and was absent two years. In 1856, he published the results of his second voyage, under the title of "Arctic Explorations." The Royal Geographical Society of London bestowed upon him its large gold medal. B. at Philadelphia, 1822; D. at Havanna, 1857.

KANE, Sir Robert, M.D., a distinguished Irish chemist and writer on medicine. After being educated for the profession of medicine, he became professor of chemistry to the Apothecaries' Hall of Dublin, and was subsequently elected member of the Medico-Chirurgical Society of the same city, and of the Paris societies of Pharmacy and Medical Chemistry. In 1830-31 he published an essay on the "Pathological Condition of the Fluids in Typhus Fever," which gained the prize offered by Dr. Graves; and the "Elements of Practical Pharmacy." The following year he received the degree of M.D. from Trinity College, Dublin; in 1841 he became fellow of the Irish College of Physicians. In 1844 he published a work on "The Industrial Resources of Ireland," which excited considerable interest at the time. He was subsequently employed by government, in conjunction with Professors Lindley and Taylor, to investigate the cause of the potato disease in Ireland; but the labours of these gentlemen have been pronounced unsuccessful. The lord-lieutenant of Ireland, in 1846, bestowed upon him the order of knighthood. He has since aided in the formation of the Museum of Irish Industry, and published several works on the application of chemistry to agriculture and manufactures. In 1848 he became president of Queen's College, Cork. B. at Dublin, 1810.

KANGAROO ISLAND, *kăn'-ga-roo*, an island on the S. coast of Australia, discovered by Captain Flinders. *Area*, estimated at about 1,900 square miles. *Desc.* Undulating, and covered with a thick short shrub. It has no native inhabitants. *Lat.* 35° 43′ S. *Lon.* of Kangaroo Head, 137° 59′ 31″ E.

KANG-HI, *käng-hi*, emperor of China, succeeded Choun-tchi, founder of the Mantchou dynasty, in 1661. He had a great love for the arts and sciences of the Europeans, and liberally patronized the missionaries; but, though he was fond of geography, and directed the construction of maps and charts, he would suffer none to be laid before him unless China was represented therein as the middle of the world. He was a voluminous writer, and composed, among other works, "Maxims for State Government," and "Moral Instructions for my Son." D. 1722.

KAN-KIANG, *kän'-ke-äng*, a river of China, forming a part of its internal line of navigation. It traverses the province of Kiang-si, and, after a course of 350 miles, joins the Yang-tze-Kiang.

KANO, *ka'-no*, a town of Central Africa, the capital of the state of Houssa. *Manf.* Silks; and an extensive trade in various articles is carried on. *Pop.* estimated at 30,000. *Lat.* 12° N. *Lon.* 9° E.

KANSAS, *kän'-sas*, a large river of Louisiana, U.S., rising in the vast plains between the Arkansau and the Platte, and after a course, generally towards the E., of about 1,500 miles, falling into the Missouri in *lat.* 38° 31′ 13″ N.

KAN-SU, *kän'-soo*, the most N.W. province of China, inclosed by the provinces Shen-si, Se-chuen, and Mongolia. *Desc.* Mountainous; producing gold, musk, silk, and tobacco. *Pop.* estimated at 16,000,000. *Lat.* between 32° 30′ and 40° N. *Lon.* between 98° and 108° E.

KANT, Immanuel, *kant*, an eminent Prussian philosopher. His father, who was a saddler, was descended from a Scotch family, the name of which was spelt Cant; but it was altered by the philosopher to Kant. He received his education at the Gymnasium, and afterwards at the university of Königsberg. On the completion of his studies, he became tutor in a clergyman's family, and afterwards in that of a nobleman, on quitting which he returned to the university, and subsisted by teaching private pupils. In 1755 he obtained the degree of M.A., and, commencing as public lecturer, obtained a number of scholars. He then became a prolific writer; and it is impossible, within these limits, to give a complete list of his publications in Natural and Metaphysical Philosophy. Among his chief productions may be named, a treatise on the "Theory of the Winds;" "Sketch of Physical Geography;" "New Principles of Motion and Rest;" "Examination of the Prize Question, whether the Earth, in turning round its Axis, by which the Succession of Day and Night was produced, had undergone any Change since its Origin? what were the Causes of it, and how we could be assured of it?" and on Volcanoes in the Moon. But it was in metaphysics that he chiefly excelled, and upon which he published a prodigious number of works, which are extremely refined and obscure. His principles attracted considerable attention in Germany, obtained many followers, and, although attacked by several writers, continue to exercise the greatest influence, even at the present time. One of his best-known works is the "Critic of Pure Reason," which has been translated into English. B. at Königsberg, 1724; D. 1804.

KARA-HISSAR. (*See* AFIOM-KARA-HISSAR.)

KARAJICH, or KARADSCHITSCH, Vuk Stephanovitch, *ka'-ra-yik*, an eminent Servian writer, the collector of the national ballads of his country, and compiler of a Servian dictionary. During the attempt of the Servians to throw off the Turkish yoke, he acted as secretary to several chiefs of his country, but, since 1813, has devoted himself to collecting the ballads of Servia, writing a grammar of the language, and otherwise benefitting literature. His collection of Servian national songs is said to be not inferior to the Scottish or Spanish. These have been published at Vienna in several volumes; and Dr. Bowring has translated a small portion of them, under the title of "Servian Popular Poetry." He has compiled a Servian grammar, translated the New Testament into Servian, made a collection of Servian proverbs, and edited a volume of "National Tales." He is a member of the societies of Gottingen, Berlin, and Vienna, and is in receipt of a pension from the emperor of Russia. B. at Trahich, in Turkish Servia, 1787.

KARAK, *ka'-rak*, an island in the Persian Gulf. It is of coral formation, and has a circumference of 15 miles. *Pop.* about 1,000 Arabs. *Lat.* 29° 12′ N. *Lon.* 50° 13′ E.—During the war between England and Persia, in 1857, it was seized by the British.

KARAMAN, *kar'-a-man*, a city of Caramania, in Asia Minor, 60 miles from Konieh. It covers, with its squares and gardens, a large area; but the houses are mean. It trades with Cæsarea, Smyrna, and Tarsus, and has an extensive manufacture of blue cotton cloth, worn by the lower classes. *Pop.* 7,000.

KARAMANIA. (*See* CARAMANIA.)

KARAMSIN, Nicholai Michaelovitch, *ka'-ram-sin*, an eminent Russian author. After completing his education at Moscow, he served as officer of the Russian guards; but, between the years 1789-91, travelled in Germany, France, and England, an account of his tour being published, with the title "Letters of a Travelling Russian." Returning to Russia, he commenced his literary career by establishing the "Moscow Journal," and afterwards published several works, original and translated. His great work, the "History of the Russian Empire," he left incomplete at his death; but the book had an unprecedented popularity, being found everywhere throughout the empire, from the noble's palace to the peasant's hut. He also wrote several poetical pieces of great merit. The emperor Alexander made him a state counsellor, and conferred upon him the order of St. Anne. B. 1765; D. 1826.

KARA-SU, *ka'-ra-soo*, a considerable river of European Turkey, rising between Macedonia and Roumelia, and, after a course of 130 miles, falling into the Ægean Sea opposite Thasos.—The name of several streams in Asia Minor.

KARA-SU-BAZAR, a Tartar town of S. Russia, in the Crimea, 24 miles from Simferopol. It has a fortified khan near its centre, and many minarets. *Manf.* Morocco leather, candles, and soap. *Pop.* 15,000.

KARA-YOUSOUF, *yoo'-soof*, the first prince of the Turcoman dynasty, called the "black sheep," because they bore an effigy of that animal on their banners. He conquered Armenia; but was forced by Tamerlane to flee into Egypt. After Tamerlane's death, Yousouf returned, and overran part of Mesopotamia and Georgia. He was pursuing his conquests when he died near Tauris, in 1420.

KARDSZAG, *kard'-zag*, a scattered town of Hungary, 25 miles from Debreczin. It is noted for its melons and land tortoises, reared in the environs. *Pop.* 12,000.

KAREING, *kair'-ing*, a county of Siam, occupied by the primitive inhabitants of Siam, and formerly subject to Cambodgee. They burn their dead. *Pop.* Unascertained. *Lat.* between 15° 30′ and 17° N. *Lon.* between 101° and 103° E.

KARGOPOL, *kar'-go-pol*, a town of Russia, in the government of Olonetz, on the Onega, 184 miles from Olonetz. *Pop.* 2,500.

KARICAL, *kar'-i-kal*, a town of the S. of India, in the district of Tanjore, 9 miles from Tranquebar. There are some extensive salt-works in its vicinity. *Manf.* Calicoes and chintzes. *Pop.* 10,000.—This town was ceded to the French by the rajah of Tanjore, in 1759. Its DISTRICT has an area of 23 square miles, and a population of 50,000.

KARLEE. (*See* CARLEE.)

KARLO. (*See* CARLO.)

KARLOWITZ. (*See* CARLOWITZ.)

KARLSBAD. (*See* CARLSBAD.)

KARLSBURG. (*See* CARLSBURG.)

KARLSTAD. (*See* CARLSTAD.)

KARLSTADT. (*See* CARLSTADT.)

KARMATHES, *kar-ma'-thees*, a Mussulman sect, founded by Karmath. They spread over part of Arabia and the mouths of the Euphrates, and held possession of the sacred city of Mecca for some time; but were exterminated in 982. It is said that the tribe of Nosairis, dwelling in Syria at the present day, are the descendants of the ancient Karmathes.

KARNTHEN. (*See* CARINTHIA.)

KARPFEN, KORPONA, or KRUPINA, *karp'-fen*, a mining-town of Hungary, in the palatinate of Sohl, 96 miles from Vienna. *Pop.* 4,000.

KARR, Jean-Baptiste-Alphonse, *kar*, a distinguished French novelist, who, after being employed as teacher in the Collége Bourbon, at Paris, commenced his literary

career, in 1832, with the publication of a novel entitled "Sous les Tilleuls," which at once became exceedingly popular. He subsequently wrote "An Hour too late," "F Sharp," "The Alain Family," and many other works, all excellent, and extensively read. He is best known in England by his "Tour round my Garden," which has been translated, and several times reprinted. He has also been editor and proprietor of various periodicals. In 1844, having published some sarcastic remarks upon a certain poetess, the lady waited in concealment near the critic's house, and, on his emerging into the street, wounded him with a poniard. The affair created much excitement at the time, but Karr took no steps to gain redress for the outrage. The poniard was afterwards hung up in his study, with the following inscription under it:—

"Presented by Madame ——, to Alphonse Karr,—in the back."

Of late years he has almost exclusively devoted his time to horticulture and rural pursuits. B. at Paris, or Munich, 1808.

KARROOS, *kar'-roos*, extensive plains of S. Africa, occupying most of the terraces in the mountain-ranges of Cape Colony. In the dry season they become deserts, but during the wet, they are covered with a rich vegetation, which supplies provender to numerous herds.

KARS, *kars*, a city of Turkish Armenia, on the Arpaleheri, 106 miles from Erzeroum. It has several mosques, minarets, and Armenian churches and convents. *Pop.* 12,000. In the war of 1854, between Turkey and Russia, this place was gallantly held for the Turks by the English general Williams and a handful of troops.

KARS.

KARSUN, *kar'-soon*, a town of Russia, 65 miles from Simbirsk. It was formerly fortified, but is now an open place. *Manf.* Leather. *Pop.* 4,500.

KASAN, *ka-zan'*, an extensive province or government of European Russia, and surrounded by the governments of Viatka, Orenburg, Novgorod, and Simbirsk. *Area*, 24,000 square miles. *Desc.* Flat in general, and, to a great extent, covered with forests. *Rivers.* The Volga, the Kama, the Sura, the Viatka, and the Kasanka, besides smaller streams, and a great number of lakes. *Pro.* Rye, wheat, hemp, and lint. *Minerals.* Copper, gypsum, lime, and potter's clay. *Pop.* 1,344,000. *Lat.* between 54° and 57° N. *Lon.* between 46° 20′ and 48° 40′ E. The kingdom of Khanat, or Tartar kingdom of Kasan, was founded about the middle of the 15th century, but did not exist much beyond one hundred years.

KASAN, a fortified city of Russia, on the Kasanka, about 4 miles above its junction with the Wolga, and 430 miles from Moscow. It consists of three parts; an antique Tartar fortress, the town proper, and the surrounding villages. The fort is built of stone, the rest of wood. It is a bishop's see, the capital of a Greek eparchy, and the seat of a small university, founded in 1803. It has also several other schools. *Manf.* Soap, woollen, cotton, lace, earthenware; and there are large tanneries. Being in a manner the central point between St. Petersburg, Archangel, Tobolsk, Astracan, Moscow, and Orenburg, it carries on an extensive trade. At a little distance from Kasan is a new admiralty establishment, with a navigation-school, magazines, and a dock-yard, where galliots are constructed and sent down the Volga to the Caspian Sea. *Pop.* 58,000. This place has frequently suffered severely by fire,—1st, in 1774; 2nd, in 1815; and 3rd, in 1842, when more than half of the city was destroyed.

KASBIN. (*See* CASBIN.)

KASCHAU, *ka-show'*, a royal free city of Hungary, 120 miles from Pesth. It is encompassed by hills covered with the vine, and forms a kind of provincial capital, to which the wealthier classes resort in the winter season. Its public buildings are a Gothic cathedral, numerous other churches and convents, an episcopal palace, arsenal, barracks, a royal academy, a collegiate episcopal seminary, and a school for nobles. *Pop.* 14,000.

KASCHIN, *ka-shin'*, a town of European Russia, in the government of Tver, on the Kaschinka, 117 miles from Moscow. *Pop.* 3,600.

KASHAN. (*See* CASHAN.)

KASHMIR. (*See* CASHMERE.)

KASIMOV, *kas'-i-mov*, a town of European Russia, on the Oka, 160 miles from Moscow. It has a considerable fur trade. *Pop.* 7,200.

KASMARK, or KAISERSMARK, *kas'-mark*, a town of Hungary, on the Poprad, 160 miles from Presburg. *Manf.* Principally linens. *Pop.* 4,300.

KASTAMOUNI. (*See* COSTAMOUNI.)

KASTRI. (*See* CASTRI.)

KATER, Captain Henry, *kat'-ter*, an English mathematician, who, although holding a military commission, devoted his life to science. He commenced his researches in physical science with two papers, "On the Light of the Cassegrainian Telescope compared with that of the Gregorian." He subsequently made several valuable experiments on pendulums and other astronomical apparatus, and published two essays on the "Construction and Adjustment of the New Standard of Weights and Measures of Great Britain." A large number of scientific treatises were also contributed by him to the Transactions of the Royal and other learned bodies. He was a fellow of the Royal Society of London, and was knight of the order of St. Anne of Russia. He assisted Dr. Lardner in writing a "Treatise on Mechanics," published in "Lardner's Cyclopædia." B. at Bristol, 1777; D. in London, 1835.

KATONA, Isturan, *ka-to'-na*, an Hungarian historian. He was professor of poetry and rhetoric in the university of Buda, and wrote the "History of Hungary," in Latin, in forty-one volumes. This work is the standard authority on the subject, and its value is greatly enhanced by the bibliographical notices it contains of Hungarian authors. B. in Hungary, 1732; D. 1811.

KATRINE, *kät-rin*, a lake of Scotland, 5 miles from Loch Lomond, and 10 from Callander. *Ext.* 10 miles long, by 2 broad. It forms a portion of the scenery of Sir W. Scott's poem of "The Lady of the Lake." In October, 1859, Queen Victoria formally opened the works by which the waters of this beautiful lake are made available for the supply of the city of Glasgow.

KATTEGAT. (*See* CATTEGAT.)

KATTYWAR, *kat-te-war'*, a province of India, with an area of 850 square miles and a population of 1,450,000.

*Lat.* between 20° 42′ and 23° 10′ N. *Lon.* between 69° 5′ and 72° 14′ E.—Also a DISTRICT of India, in the peninsula of Guzerat, with an area of 4,000 square miles and a population of 190,000.

KATZBACH, *kats'-bak*, a river of Silesia, which rises at Ketschdorf, and, after a course of 35 miles, joins the Oder, 30 miles from Breslau.

KAUFBUREN, *kouf-boi'-ren*, a town of Suabia, on the Wertach, 36 miles from Augsburg. *Manf.* Cotton and linen. *Pop.* 4,200.

KAUFFMANN, Angelia, *kouf'-man*, an eminent female artist, was the daughter of a Swiss painter, who from her earliest years instructed her in his art. At 11 years of age she drew portraits; after wandering in Italy for several years, she went to London, in 1766, where she was made one of the original thirty-six members of the Royal Academy. A story, which does not appear to be authentic, relates that she was, while at the height of her reputation in England, cheated into a marriage with an impostor, who represented himself as Count Horn, a Swedish nobleman. She returned to Italy in 1782, and there married Antonio Zucchi. Her paintings, characterized by nobleness and grace, are somewhat deficient in drawing. There is a large allegorical painting by her in the National Gallery, called "Religion attended by the Graces." B. at Chur, in the Grisons, 1742; D. at Rome, 1807.

KAUFFUNGEN, *kouf'-foong-en*, a village of Germany, in Hesse-Cassel, on the Losse. *Pop.* 1,500.

KAULBACH, William, *koul-bak*, a celebrated German artist. He was the son of a goldsmith, and was at first apprenticed to that trade, but evincing great talent for drawing, he was, after some opposition, allowed to study in the Dusseldorf academy, under Cornelius, who was so delighted with his pupil, that when he was himself solicited to paint a grand series of frescoes in Munich, he requested the assistance of Kaulbach. The young artist went to Munich in 1825, and painted there six allegorical frescoes. He exhibited his first unaided work of art, "Irrenhaus," in 1829. When his great ability became recognized, he was employed to decorate the new palace of Munich with designs in fresco and encaustic. He embellished the throne-room, the queen's apartment, the drawing-room, and the state bed-room. His greatest work in oil is "The Destruction of Jerusalem by Titus." Of late years he has worked almost exclusively at portrait-painting. Kaulbach has also drawn a very large number of thoughtful and elegant designs for books, and his illustrations to Göthe's "Reineke Fuchs" have become celebrated, not alone in Germany, but also in England. B. at Arolsen, in Waldeck, 1804.

KAUNITZ, Wenceslas, Prince of, *kow'-nitz*, an eminent Austrian statesman, who during forty years was chancellor and prime minister of Austria. He commenced his political career as minister of state for Hungary, in 1744, and enjoyed successively the confidence of Maria Theresa, Joseph II., Leopold II., and Francis II. Under his prudent administration the cabinet of Vienna obtained great influence with the other courts of Europe. B. at Vienna, 1710; D. 1794.

KAVALA, or CAVALLO, *ka-va'-la*, a seaport-town of European Turkey, on the Ægean Sea, opposite the island of Thasos. It has a trade in cotton and tobacco. *Pop.* 4,000. This is the birthplace of Mehemet Ali, late pasha of Egypt.

KAVANAGH, Miss Julia, *kăv'-a-na*, a modern English novelist. She is of an Irish family, and received her education in Paris. She commenced her literary career in 1844, by contributing small stories and sketches to the periodical press. Her first separate work was a tale for young people, called "The Three Paths," which was produced in 1847. She afterwards published—"Nathalie;" "Women in France of the 18th Century;" "Women of Christianity;" "Daisy Burns;" "Rachel Gray;" and other works. D. at Thurles, Tipperary, 1824.

KAY, William, *kai*, a portrait and historical painter. His death was occasioned by grief, caused by the duke of Alva's sentencing counts Egmont and Horn to death while the duke was sitting to him for his picture. B. at Breda, 1620; D. 1668.

KAZAU. (*See* KASAU.)

KAZBEK, a mountain of Asia. (*See* CAUCASUS.)

KAZEROON, *kaz-e-roon'*, a town of Farsistan, in Persia, 55 miles from Shiraz. It has a trade between Shiraz and the coast. *Manf.* Cotton fabrics. *Pop.* Unascertained, but several thousands.—Near it are the ruins of Shahpoor.

KEACH, Benjamin, *keech*, a Baptist teacher. He wrote an allegorical piece, entitled, the "Travels of True Godliness," in imitation of Bunyan; but his greatest work is a folio volume on the Scripture Metaphors, reprinted in 1777. D. about 1700.

KEAN, Edmund, *kene*, a celebrated English actor, was the son of a stage carpenter and an actress at minor theatres and in showmen's booths. Both his parents neglected him during his infancy, and he owed whatever small stock of education he obtained during his early years, to the care of Miss Tidswell, an actress at the London theatres, who generously took charge of him. This lady instructed him in the actor's art; but, when he was about twelve years of age, his mother took him away, and employed him to assist her in hawking about perfumery and flowers, and occasionally to play in showmen's booths over the country. So clever was "Master Carey," as he was termed, that, when performing with his mother in Richardson's booth at Windsor, George III. summoned him to the Castle, for the purpose of giving recitations. His majesty was greatly pleased at the boy's efforts, and dismissed him with a handsome present. After leading the life of a strolling player for about fifteen years, he, in 1814, made his first appearance at Drury-lane theatre, the playbills announcing the performance of "The Merchant of Venice; Shylock, Mr. Edmund Kean, from the Exeter Theatre." The house, on the first night, was only poorly attended, but the extraordinary merits of the provincial actor soon became known throughout the metropolis, and Drury-lane theatre rapidly became the crowded resort of the most fashionable circles. Kean's fame was fixed. He was universally acknowledged to be the greatest English actor since Garrick. His success remained unabated till the year 1825, when his connection with the wife of Alderman Cox led to a lawsuit, on the termination of which Kean was compelled to pay £800 damages. He was then hissed from the stages of Drury Lane and Edinburgh; whereupon he paid a visit to the United States. After two seasons he returned; but, though favourably received once more, his career was near its end. He had always been a loose liver, and he now indulged in constant intoxication; his constitution was weakened, and his memory so impaired that he could not study a new part. In 1833 he was announced to play the part of Othello, his son Charles being cast for Iago. Kean struggled through the opening scenes of the play, but when he came to the speech, "Villain, be sure," he sank exhausted upon his son's shoulder, and was led off the stage. This was his last appearance. His performances of Othello, Shylock, Richard III., and Sir Giles Overreach, are set down in the annals of the stage as inimitable efforts of the actor's art. B. in London, about 1787; D. at Richmond, 1833.

KEANE, Lord John, a British military commander, who entered upon his career as ensign at the age of 13 years. In 1799 he became captain in the 44th regiment, after which he served in Egypt and the Mediterranean. In 1812 he joined the duke of Wellington's army in Spain as brigadier, in which capacity he took part in the battles of Vittoria, the Pyrenees, Nivelle, Orthes, and Toulouse. In 1814 he was sent, with the grade of major-general, to the West-India station, afterwards acting in the attack on New Orleans, where he received two severe wounds. In 1833 he went to Bombay, as commander of the forces; and, five years afterwards, he led the army which invaded Scinde. In 1839 he reduced the hitherto impregnable fortress of Ghuznee, after a desperate defence, and for this service was rewarded with a peerage, being created Baron Keane, of Ghuznee, in Afghanistan. The East-India Company settled upon him, and his two next successors, the sum of £2,000 annually, both houses of parliament voting him their thanks. B. 1781; D. at Burton Lodge, Hampshire, 1844.

KEATE, George, *keete*, a miscellaneous writer. Having completed the tour of Europe, during which he made the acquaintance of Voltaire, at Geneva, he returned to England, became a student in the Inner

Temple, and was called to the bar; but, not meeting with much encouragement in the law, he abandoned that profession for literature. His first performance was "Ancient and Modern Rome," a poem published in 1650. His publications after this were very numerous; the principal being "An Account of the Pelew Islands," compiled from the papers of Captain Wilson, and a translation of the "Semiramis" of Voltaire. B. at Trowbridge, Wiltshire, 1729; D. 1797.

KEATING, Jeffrey, *kee'-ting*, an Irish ecclesiastic of the Roman church, and doctor of divinity, who wrote a history of the poets of Ireland, and the genealogies of the principal families. D. 1650.

KEATS, John, *keets*, an eminent English poet. He was the son of a livery-stable proprietor in Finsbury, and was sent, when about the age of 5 years, to Mr. Clarke's school, at Enfield. While there, that intellectual ambition, which formed so large a portion of his character, became suddenly awakened. The amusements and games of youth were abandoned for study; and on the half-holidays, when all his companions were at play, he was busy translating Virgil and Fenelon. The old Grecian mythology, which he afterwards reconstructed and reanimated by his feeling and fancy, was his especial study. In 1810 he left school.

KEATS.

His father dying about the same time, he was left the sum of £2,000, and was apprenticed to Mr. Hammond, a surgeon at Edmonton. From the outset, however, the youth showed that it was not in physic, but in poetry, that his name was to become pre-eminent. In 1817 he published a volume of Juvenile Poems, and shortly afterwards, "Endymion," "Lamia," "Isabella," "The Eve of St. Agnes," and "Hyperion," were produced during the three or four succeeding years. On the appearance of "Endymion," the "Quarterly Review" attacked the poet, and his kindred writers, in a most stupid and violent manner. The poet's health, always delicate, became greatly weakened by his attentions upon a dying brother; and his own decease occurring soon afterwards, it was for some time erroneously attributed to the attacks of the "Quarterly" reviewer. Byron, in his "Don Juan," gave one version of the story in the following lines:—

"John Keats, who was kill'd off by one critique,
Just as he really promised something great,
If not intelligible, without Greek,
Contrived to talk about the gods of late,
Much as they might have been supposed to speak.
Poor fellow! his was an untoward fate:
'Tis strange, the mind, that very fiery particle,
Should let itself be snuff'd out by an article."

This was quite untrue; the young poet was predisposed to hereditary phthisis. He went to Italy for the purpose of regaining strength, and had reached Rome when his malady assumed a most alarming form, and he was soon carried off by consumption. The career of the young poet was too suddenly brought to a close, or he would have redeemed the promises of his poetical genius. Although he left behind only three volumes of verse, his rich and luxuriant fancy, his teeming brilliant imagery, his stimulating and suggestive diction, have been an honour and a glory to English literature. The circumstances of his short life, and the character of his writings, compel our love and veneration; and to that which he has given us we may justly apply his own line:—

"A thing of beauty is a joy for ever."

B. in London, 1795; D. at Rome, 1821.

KEBLE, Joseph, *ke'-bel*, an English lawyer. He wrote an "Explanation of the Law against Recusants;" "The Statutes at Large," in paragraphs and sections; "Reports in the Court of the King's Bench;" and two essays, one entitled, "Human Nature, or the Creation of Mankind," the other, on "Human Actions." He also left a number of folio and quarto volumes in MS. B. in Suffolk, 1632; D. 1710.

KECHO. (*See* CACHAO.)

KEDIRI, *ked'-e-re*, a Dutch residency in the island of Java, 50 miles from Surabaya. *Pop.* 215,000.

KEDRON, *ke'-dron*, a brook of Palestine, proceeding from the valley of Jehoshaphat. It only flows after the rains.

KEDVE, *ked'-ve*, a Dutch residency in the island of Java, 40 miles from Samarang. *Pop.* 30,000.

KEELING, or COCOS ISLANDS. (*See* COCOS ISLANDS.)

KEHL, *kail*, a town of Germany, on the Rhine, opposite Strasburg. It is of great importance in a military sense, and was fortified by the French engineer Vauban in the year 1683. *Pop.* 1,400. This place has often been besieged and taken. It made an obstinate defence against the Austrians, who took it in 1797. It was taken by the French next year, who retained it till 1814. It communicates with the Baden and Basle Railway.

KEIGHLEY, or KEITHLEY, *keeth'-le*, a parish and market-town in the W. Riding of Yorkshire, near a branch of the river Aire, over which is a stone bridge, 10 miles from Bradford. The church is a spacious and handsome building; and there are a mechanics' institute, court-house, and various schools. *Manf.* Chiefly cottons. *Pop.* of parish, 19,000.

KEILL, John, *kile*, a British mathematician. After taking his degree of M.A. at Edinburgh university, he entered of Balliol College, and is said to have been the first who taught Sir Isaac Newton's principles by experiments. In 1698 he published an "Examination of Dr. Burnet's Theory of the Earth," to which he subjoined "Remarks on Whiston's Theory." The year following he was appointed deputy professor of natural philosophy. In 1708 he defended Newton's claim to the invention of fluxions, which brought him into a dispute with Leibnitz. In 1709 he was appointed treasurer to the Palatines, and attended them in that capacity to New England. In 1714 he was chosen Savilian professor of astronomy at Oxford, and the year following appointed decipherer to the queen. In 1714 the university conferred on him the degree of M.D., and, in 1715, he published an edition of "Commandine's Euclid." In 1718 appeared his "Introductio ad veram Astronomiam;" which treatise he translated into English. B. at Edinburgh, 1671; D. 1721.

KEILL, James, younger brother of the above. He obtained the degree of M.D. at Cambridge, and settled as a physician at Northampton. His works are: "The Anatomy of the Human Body;" "An Account of Animal Secretion, the Quantity of Blood in the Human Body, and Muscular Motion." B. in Scotland, 1673; D. at Northampton, 1719.

KEIR, *keer*, a parish of Scotland, in Dumfriesshire, about 12 miles from Dumfries. *Pop.* 1,000. KEIR HILL attains an elevation of nearly 900 feet above the level of the sea.

KEITH, *keeth*, a town and parish of Banffshire, Scotland, 20 miles from Banff. It consists of an old and new town, the latter regularly built, and containing several religious edifices for different denominations. *Manf.* Linens, tobacco, and snuff. *Pop.* 5,000. Ferguson, the celebrated astronomer, was born in this place. On the opposite side of the river Isla is Fife-Keith, a small town, which has risen since 1816, and which has the largest cattle and horse fair in the N. of Scotland.

KEITH, James, field-marshal in the Prussian service, was the younger son of George Keith, earl-marshal of Scotland. He attached himself to the Pretender in 1715, and was wounded at the battle of Sheriffmuir. He, however, escaped with his brother to Spain, and served as an officer of the Irish brigade for ten years. He afterwards went to Russia, and was made a general. He signalized himself in all the battles between the Russians and Turks, and was the first who entered the breach at the taking of Otchakov. He also displayed great military skill against the Swedes, and, on the restoration of peace, was appointed field-marshal, and sent on several embassies. But conceiving that his services had not been properly compensated, he accepted an invitation from the king of Prussia, who gave him a large pension, and made him governor of Berlin, and field-marshal. That monarch also took him into his confidence, and made him the companion of his travels. He was killed at the battle of Hochkirchen, in 1758. B. at Kincardine, 1696.

KEKREE, *kek-ree'*, a town of British India, 50 miles from Ajmeer. *Pop.* 4,000.

KELAT, *ke-lat'*, the capital of Beloochistan, standing on a hill 6,000 feet above the level of the sea. It has a transit trade and a manufactory of arms. *Pop.* 12,000. *Lat.* 29° 6′ N. *Lon.* 67° 57′ E. In 1840 this place was taken by General Nott, and in the following year, the British finally withdrew from it.

KELAT, a town and strong fortress of Afghanistan, 82 miles from Candahar. *Pop.* Unascertained. It was held by the British till their evacuation of the country in 1842.

KELAT, a fortress of Khorassan, in Persia, 40 miles from Mesched. This was the principal stronghold of Nadir Shah.

KELLER, John Balthasar, *kel'-ler*, a skilful founder in brass. He cast the equestrian statue of Louis XIV., which was set up at Paris in the Place of Louis the Great. He was subsequently made inspector of the foundry at the arsenal. D. 1702. His brother, John James, also excelled in the same art. D. at Colmar, 1700.

KELLERMANN, Francis Christopher, *kel'-ler-man*, marshal of France, and duke of Valmy. He served with distinction during the Seven Years war, and when the revolution burst forth, in 1788, he was a brigadier in the French army. In 1792 he was named commander of the army of the Moselle, and fought, with Dumouriez, the battle of Valmy, in which the greatly superior Prussian army was defeated and compelled to evacuate French territory. He was, nevertheless, incarcerated as a suspected person in 1793, but was afterwards set at liberty. In 1795 he became commander-in chief of the armies of the Alps and Italy, sustaining, with 47,000 men, the attacks of an army mustering 150,000 soldiers. In 1804 Napoleon created him marshal of the empire, duke of Valmy, senator, &c., and he was afterwards charged with several commands in chief, in all of which he acquitted himself with great distinction. At the Restoration he was created peer of France. B. at Strasburg, 1735; D. at Paris, 1820.

KELLERMANN, Francis Stephen, son of the above, served with distinction in the campaigns in Prussia, Germany, Italy, and Spain, and signalized himself at the battles of Marengo, Austerlitz, Vimiero, Bautzen, and Waterloo. He was general of division in 1814, and was created a peer during the Hundred Days. Excluded from the Chamber by Louis XVIII., he did not return to it till 1830. B. 1770; D. at Paris, 1835.

KELLEY, Edward, *kel'-le*, an English alchemist. He received his education at Oxford, which he quitted without taking a degree; and, rambling about the country, for some offence or other, lost his ears at Lancaster, after which he became assistant to Dr. Dee, whom he accompanied abroad. The emperor Rodolphus II. was so much deceived by Kelley's pretensions to making gold, that he conferred the honour of knighthood on him. He afterwards sent him to prison at Prague, whence, in endeavouring to make his escape by tying the sheets together, he fell, and broke both his legs. He wrote a poem on chemistry, and another on the philosopher's stone. B. at Worcester, 1555; D. 1595.

KELLHEIM, *kel'-hime*, a town of Bavaria, at the junction of the Altmuhl and the Danube. *Pop.* 1,800.

KELLS, *kels*, an ancient market-town of Ireland, in the county of Meath, on the Blackwater, 34 miles from Dublin. *Manf.* Lace. *Pop.* 4,000.

KELLY, Hugh, *kel'-le*, an Irish dramatic writer, who, after gaining a livelihood, first as a staymaker and afterwards as an attorney's clerk, turned author with considerable success. He wrote four comedies, called "False Delicacy," "A Word to the Wise," the "School for Wives," the "Romance of an Hour;" "Clementina, a Tragedy," "Thespis," a poem in imitation of Churchill's Rosciad; "Memoirs of a Magdalen," a novel, and the "Babbler," a collection of essays. D. 1777.

KELSO, *kel'-so*, a parish and market-town of Scotland, in the county of Roxburgh, on the Tweed, opposite the junction of the Teviot, over both which rivers handsome bridges are built, 22 miles from Berwick. In the centre of the town is a square, from which six streets diverge in different directions. This square, with the principal streets, contain many neat shops and houses. An old abbey, now in ruins, is the great ornament of Kelso. It was founded by David I., in 1128, and fortunately escaped the havoc of the Reformation, being used as a Protestant church till 1771, when a report being spread abroad that the building was giving way, it was never again made use of. The style of the building is Saxon, with a slight mixture of Gothic. The central tower is 90 feet high. Besides the established church, there are places of worship for various denominations, a dispensary, several subscription libraries, a museum, and schools. It has a weekly market for grain, and six yearly markets, at which farm-servants are hired. *Pop.* about 5,000. Kelso is often mentioned in the histories of our border wars.

KELVIN, *kel'-vin*, a river of Scotland, which has its rise in Stirlingshire, and falls into the Clyde, 2 miles below Glasgow. The song of "Kelvin Grove" was suggested by a beautiful portion of the scenery of this river.

KEMBLE, John Philip, *kem'-bel*, an eminent English actor. He was the son of Roger Kemble, the manager of a provincial theatre, and although, while young, he was employed to play children's parts in the theatre, he was not intended for the stage. He was educated at a Roman Catholic seminary in Staffordshire, and

JOHN PHILIP KEMBLE.

afterwards at Douay CoHege, in France; but having a natural inclination for the actor's profession, he returned to England at the age of 19, and made his appearance on the stage at Wolverhampton. After playing with great success in various provincial theatres, he made his first appearance at Drury-lane theatre, in 1783, became a great favourite, and, in

1803, purchased a share in Covent-Garden theatre, and assumed the managership of that establishment. During the subsequent fourteen years, he continued to play the leading tragedy parts with the greatest success; indeed, in the characters of Brutus, Coriolanus, Cato, King John, Wolsey, and Macbeth, he is said to have been without an equal. In 1817 he retired from the stage, and soon afterwards went to reside in the south of France, and later, at Lausanne, in Switzerland. B. 1757; D. at Lausanne, 1823.

KEMBLE, Charles, brother of the preceding, was also a distinguished actor, but excelled chiefly in comedy. After receiving his education at the Roman Catholic college of Douay, in France, his brother John obtained for him an appointment in the General Post-office; but, resigning this situation, he made his first appearance on the stage as Orlando, in "As you like it," at Sheffield. After playing in the provinces, he appeared in London, in 1794. At first he was cast for secondary characters only, but in a few years he had so improved himself by study, that he became the first English actor in the walk of high comedy, and, like his brother, had certain characters in which he was unrivalled,—such as Orlando, Falconbridge, Cassio, Benedick, Mercutio, Petruchio, and Charles Surface. He also produced on the English stage a number of adaptations from the French and German. He retired from the stage in 1840, having been a short time previously appointed examiner of plays. He afterwards appeared on several occasions as a reader of Shakspere. Like many other members of his family, he was an educated and accomplished man. B. at Brecon, South Wales, 1775; D. 1854. Mr. Charles Kemble had two daughters, Frances Anne Kemble, who became a well-known actress, and who, in 1832, visited the United States, where she married a gentleman of property, named Butler. The union, however, proved unhappy, and they were divorced in 1840. She afterwards published a volume of poems, a drama, called "The Star of Seville," and some account of her travels, both in America and in Italy. A few years ago she frequently gave readings from and lectures on Shakspere, but has, it is believed, finally retired into private life. The other daughter, Miss Adelaide Kemble, appeared, with the greatest success, as an operatic singer; but, on her marriage with Mr. Sartoris, she quitted the stage.

KEMBLE, John Mitchell, son of Charles Kemble, is one of the most distinguished Anglo-Saxon scholars of the age. After receiving his education at Trinity College, Cambridge, he, in 1833, commenced his labours by the publication of "The Anglo-Saxon Poems of Beowulf," which were followed by several volumes of translations and collections of the same early literature. In 1849, he produced "The Saxons in England, a History of the English Commonwealth till the period of the Norman Conquest," which is the most important of all his works. He had been editor for many years of the "British and Foreign Quarterly Review," and continued to act in that capacity till the periodical ceased to exist in 1845. Mr. Kemble at present holds the office formerly filled by his father,—that of examiner of plays under the lord chamberlain. B. 1807.

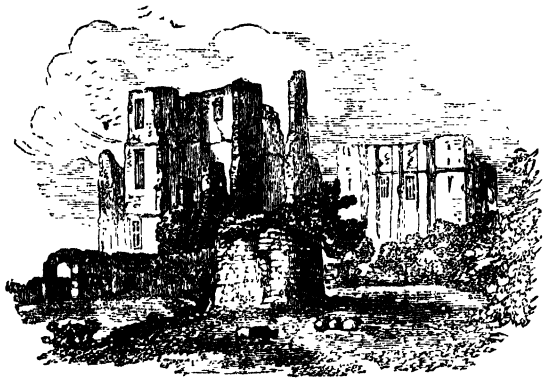
KEMP, George Mickle, *kemp*, a self-educated architect, who designed the Scott monument at Edinburgh. He was the son of a shepherd, and was apprenticed to the trade of a millwright, at which trade he worked for several years, in Scotland, London, and Manchester. From early youth he is said to have evinced a great admiration for the study of architecture, and while working as a journeyman at his trade, he contrived to visit the abbeys of Melrose and Jedburgh, the cathedral of Glasgow, and several cathedrals in England: he was also an ardent lover of poetry, and of the works of Sir Walter Scott. In 1824 he set out for the continent, intending to travel over Europe; he was, however, compelled to return in a year; he had, nevertheless, seen most of the cathedrals of France and the Netherlands. He attempted, without success, to establish himself in business at Edinburgh: after this he studied drawing and perspective with so much zeal, that, in 1830, he was enabled to make three splendid drawings of Melrose Abbey. He was next employed to make a large model for a palace to be erected by the duke of Buccleuch; he subsequently travelled over Scotland, taking sketches for a proposed work on the ecclesiastical antiquities of that country. When the design for the Scott monument was announced for competition, Kemp furnished one, and obtained one of the three premiums of £50. He was again successful on the second competition, and his design was commenced; the architect, however, did not live to see his work finished. In 1844 his body was found in the canal: it is supposed he had fallen into it on a dark night. His remains were followed to the tomb by the members of the Royal Scottish Academy and most of the other public bodies in Edinburgh. B. at Newhall, on the Esk, 1794; D. 1844.

KEMPELEN, Wolfgang, Baron de, *kemp'-len*, an Hungarian mechanician, who manufactured, in 1784, an automaton, which executed every combination in the game of chess in so skilful a manner, as to win almost every game played against it. He was employed in the Hungarian chancellery at Vienna. B. at Presburg, 1734; D. 1804.

KEMPEN, *kem'-pen*, a town of Prussian Westphalia, 20 miles from Dusseldorf. *Manf.* Woollen and linen goods. *Pop.* 4,000.—It is the birthplace of Thomas à Kempis.—Another, of Prussian Poland, 32 miles from Kalies. *Pop.* 6,300.

KEMPIS, Thomas à, *kem'-pis*, a pious writer of the 14th century. At the age of 19 he entered the monastery of Mount St. Agnes, near Ywol, where his brother was prior. He led a life of strict devotion, occupying himself in copying the Bible and the writings of the saints. The treatise "De Imitatione Christi," or "Of the Imitation of Christ," so universally known under his name, was compiled and copied by him from the older writers. He wrote, also, the history of his monastery. B. at Kempen, near Cologne, 1380; D. 1471.

KEMPTEN, *kem'-ten*, a town of Suabia, on the Iller, 50 miles from Augsburg. *Manf.* Cotton, linen, and woollen goods. *Pop.* 8,000.



KEN, or KENT, *ken*, a river of Westmoreland, rising in the mountains near the Brow, and, after passing Kendal, falling into Morecombe Bay.

KEN, Thomas, an English bishop. He was educated at Winchester school, whence he removed to New College, Oxford, where he was elected fellow. About 1680 he was appointed chaplain to the princess of Orange, whom he accompanied to Holland. He afterwards went with Lord Dartmouth to Tangier, and, on his return, was made chaplain to Charles II., whom he attended in his last illness, but was hindered from exercising the duties of his function by the Romish priests. That monarch, who had a great regard for him, nominated him to the bishopric of Bath and Wells, which was confirmed by James II. The bishop governed his diocese in an exemplary manner; he opposed the endeavours of James to introduce popery, and was one of the seven bishops sent to the Tower for resisting that monarch's dispensing power. He refused, however, to take the oaths of the Revolution, for which he was deprived. Queen Anne granted him a pension of £200 a year; and he was universally esteemed for his amiable manners and unaffected piety. He published some pious manuals, and wrote several hymns and an epic poem, entitled "Edmund." B. at Berkhampstead, Herts, 1637; D. in Wiltshire, 1710.

KENDAL-KIRBY, *ken'-dal*, a market-town and parish of England, in Westmoreland, on the Ken or Kent, 38 miles from Carlisle. It is surrounded by lofty hills in the vale of the Ken. Its principal buildings are a large ancient and a modern church, a town-hall, court-house, house of correction, theatre, assembly-rooms, learned institutions, a grammar-school, with three exhibitions to Oxford; and various other schools. *Manf.* Kendal cottons, a sort of coarse woollen cloth; linseys, knit worsted stockings, flannels, hats, serges, &c.; also smaller manufactures of fish-hooks, wool-cards, scouring waste silk, leather; and there are marble-works. *Pop.* 10,500.—This is one of the oldest manufacturing towns in the kingdom, some Flemish woollen-weavers having here taken up their abode in the reign of Edward III. It stands on a branch of the Preston and Carlisle Railway.

KENILWORTH, *ken'-il-worth*, a market-town of Warwickshire, 5 miles from Warwick. It is principally

noted for the remains of its once magnificent castle. *Manf.* Gauzes, ribbons, horn combs, and chemicals. *Pop.* 3,500.—This place is said to have been named after Kenulph, the Mercian king. The splendid gaieties

KENILWORTH.

which here took place in the days of Queen Elizabeth are graphically described in the admirable fiction of "Kenilworth," by Sir Walter Scott.

KENMARE, *ken-mair'*, a neatly-built town of Ireland, in the county of Kerry, 12 miles from Killarney. It lies in an isolated district, but has a convenient harbour and pier, which can be approached by large vessels. *Pop.* 1,500.

KENMARE RIVER, or BAY, a river, or arm of the Atlantic, on the S.W. coast of the county of Kerry, Ireland. *Lat.* 51° 40′ N. *Lon.* of the mouth, 9° 57′ W.

KENMORE, *ken'-mor*, a parish and village of Scotland, in Perthshire, 22 miles from Dunkeld. The village is situate on the Tay, and is one of the most picturesque places in Scotland. *Pop.* of parish, 2,300.—In the vicinity is Taymouth Castle, the seat of the marquis of Breadalbane, who, in 1842, here entertained her majesty Queen Victoria with great splendour.

KENNEBECK, *ken-ne-bek'*, a large river of the United States, in the district of Maine, rising in Moosehead Lake, and, after a course of 230 miles, falling into the Atlantic between Phipsburgh and Georgetown.—Also a COUNTY of the United States, in the centre of Maine, with an area of 1,110 square miles, and a population of 63,000.

KENNEDY, John, *ken'-ne-de*, a learned Scotch physician, who resided at Smyrna during several years. He had a valuable collection of pictures and coins, which, after his death, was sold by auction. He wrote a dissertation on the Coins of Carausius. D. 1760.

KENNET, Basil, *ken'-net*, an English writer, who, in 1696, published "The Antiquities of Rome." The year following he was chosen fellow of his college, and published the "Lives of the Greek Poets." In 1706 he was appointed chaplain to the English factory at Leghorn, where he narrowly escaped falling under the power of the Inquisition. He published several translations of foreign writers. B. at Postling, Kent, 1674; D. in London, 1714.

KENNET, White, an English prelate and antiquarian, and brother of the preceding. He was educated at St. Edmund Hall, Oxford, where he distinguished himself by his abilities. In 1684 he took his degree of M.A., and was presented to the vicarage of Amersden, in Oxfordshire. While shooting, his gun burst, by which accident his skull was laid open, so that he was ever afterwards obliged to wear a patch of black velvet. In 1701 he engaged in the controversy on the rights of convocation, against Dr. Atterbury. In 1707 he was made dean of Peterborough, but he was at this time very unpopular, owing to his Whig principles, and his opposition to Dr. Sacheverel. Dr. Welton, rector of Whitechapel, presenting an altar-piece representing the Last Supper to his church, caused the figure intended for Judas Iscariot to be drawn like the dean of Peterborough, with a black patch. This giving great offence, the bishop of London ordered it to be taken down. In 1718 he was preferred to the bishopric of Peterborough. He published a collection of English historians, under the title of "The Complete History of England," in 3 vols. folio, the last of which was written by himself. He also wrote the Life of William Somner, the antiquary, "Historical Account of Appropriations," and several sermons and miscellaneous tracts. The British Museum library of manuscripts contains a voluminous collection of his unprinted works. B. at Dover, 1669; D. 1728.

KENNET, a river of England, in Berkshire, rising near E. Kennet, and joining the Thames at Reading.—Also two parishes, one in Cambridgeshire and the other in Wiltshire. Neither has a population above 300. At the latter place is brewed the famous Kennet ale.

KENNETH I., *ken'-neth*, king of Scotland, reigned for one year only, 604-5.

KENNETH II., king of Scotland, succeeded Alpin, his father, in 823. He made war upon the Picts, and subdued their dominions beyond the Forth, which he divided among his soldiers. He removed the stone chair to Scone, where his successors were crowned, till it was removed to England by Edward I. D. 854.

KENNETH III. was the son of Malcolm. He subdued the Britons of Strathcluyd, and was equally successful against the Danes, who had invaded his dominions; but attempting to alter the succession of the crown in favour of his family, the people assassinated him in 994.

KENNICOTT, Benjamin, *ken'-ni-kot*, a learned English divine. By the liberality of some gentlemen, he was sent to Exeter College, Oxford, where he applied himself to his studies with such diligence, that, while an undergraduate, he published two dissertations on the tree of life in Paradise, and on the oblations of Cain and Abel, for which the university presented him his bachelor's degree, without fees, and before he had completed his terms. He next undertook to publish a correct edition of the text of the Hebrew Scriptures, collated from ancient manuscripts. In this great work, for which he was admirably fitted by patience, industry, and learning, he met with extensive encouragement, and many sovereigns and other illustrious personages appeared in his list of subscribers. To enable him to perfect his design, he was made keeper of the Radcliffe Library, and canon of Christ Church. The first volume was published in 1776, and the eighth, and last, in 1780. B. at Totness, Devonshire, 1718; D. at Oxford, 1783.

KENNINGTON, *ken'-ning-ton*, a large suburb of London, in the county of Surrey, about 2 miles from St. Paul's. It has a small park. *Pop.* 45,000.

KENRICK, William, *ken'-rik*, an English writer. He published, in 1759, "Epistles Philosophical and Moral," in verse. In 1766 appeared his comedy of "Falstaff's Wedding," an imitation of Shakspere. He was some time a writer in the "Monthly Review," but differing with the proprietors, he set up another journal in opposition to it, called the "London Review." He was also editor of the "Morning Chronicle;" but a quarrel with the proprietor induced him to start a paper against it, without success. He translated Rousseau's "Emile and Eloise," and other works, from the French, and published several original pieces. B. at Watford, Herts; D. 1779.

KENSINGTON, *ken'-ning-ton*, a parish and town of England, forming a large suburb of London, in the county of Middlesex, nearly two miles from Hyde-Park corner, and chiefly distinguished for its royal palace and gardens. It has numerous places of worship and schools, with an observatory, and a cemetery

at Kensal-green. *Pop.* about 45,000. In Kensington Palace King William, Queen Mary, Queen Anne, and George II. died. The gardens attached to the palace are well known, and much frequented as a fashionable promenade in summer. They contained, originally, only 26 acres, and 30 acres were added by Queen Anne.

KENSINGTON, a township in the United States, forming a suburb of Philadelphia. *Manf.* Cottons, woollens, glass; and shipbuilding is carried on. *Pop.* 48,000.

KENT, *kent*, a maritime county of England, forming the south-eastern angle of the kingdom, and nearer to the continent than any other part of the kingdom. It is bounded N. by the Thames, which divides it from Essex; E. and S.E. by the German Ocean and the Straits of Dover; S. by the county of Sussex, and W. by that of Surrey. *Area*, 1,557 square miles. *Desc.* Beautiful, from the extreme diversity of its surface, and the richness and variety of its scenery, which, in many places, particularly near Maidstone, Tunbridge, and Sittingbourne, is uncommonly fine. Two principal ridges of hills traverse the whole county from west to east, keeping generally about 8 miles apart. These are termed the Upper and the Lower hills. The former, which is sometimes called the Hog's Back, is of chalk; it is part of the extensive ridge which runs from Hungerford, through Hampshire and Surrey, to Dover, and forming the white cliffs which are there to be seen on the coast. This ridge, in some parts, attains a height of nearly 700 feet, and from the identity of the strata on the opposite side, is supposed to have once extended quite across the Channel to Calais. The Lower hills, or southern range, are chiefly of ironstone and ragstone. *Rivers.* The principal, after the Thames, are the Medway, the Stour, the Darent, and the Rother. The inferior rivers are the Ravensbourne, the Cray, the Little Stour, &c. *Pro.* In Kent every department of husbandry is pursued to a large extent, and with great ability and success. Besides the usual agricultural products, of which the wheat is peculiarly famed, Kent produces excellent hops, to the extent of about one-fourth of the whole crops in England; also fruits of various kinds for the London market, especially cherries, filberts, and apples; woad and madder for dyers; with plenty of samphire, hemp, and sainfoin; also canary-seed, various other esculent plants; and in the woody parts, timber and birch-twigs for brooms. The Isle of Thanet is a district of remarkable fertility. In the Isle of Sheppey there are large tracts of marsh and pasture-lands. These are entirely devoted to the rearing of sheep and fattening of cattle, which are of various breeds, principally Welsh and Sussex. Kent has been long famous for its fine breed of Romney-Marsh sheep, one of the most valuable in the kingdom, producing a large fleece of fine long wool, and becoming very fat at an early age. The Dorset, Wilts, and Southdown sheep are also kept in most parts of the county. The oyster fisheries of Faversham and Milton, and of the Swales of the Medway, have been long noted; and at St. Margaret's Bay, near Dover, large quantities of small, but very delicate lobsters, are caught. *Minerals.* Unimportant: chalk, flint, ragstone, and pyrites, are the only ones that are worked. The most extensive and important chalk-pits are those of Northfleet and Greenhithe, near Gravesend. *Manf.* Not extensive, with the exception of paper. The various dockyards at Deptford, Woolwich, Chatham, &c., employ numerous hands; and shipbuilding is pursued on the coast. *Pop.* about 620,000. It was in this county that the Romans first landed when they invaded Britain. It was inhabited by the Cantii, and was the first established kingdom of the Saxon Heptarchy.

KENT, two counties of Canada. — 1. In Lower Canada, between the rivers Sorel and St. Lawrence. —2. In Upper Canada, on Lake Erie.

KENT, the name of several counties of the United States.—1. In Rhode Island, on the west side of Narraganset Bay. *Area*, 186 square miles. *Pop.* 16,000. —2. In Delaware, bounded N. by Newcastle county, E. by Delaware Bay, S. by Sussex county, and W. by Maryland. *Area*, 614 square miles. *Pop.* 23,000 — 3. In Maryland, bounded N. by Cecil county, E. by Delaware, S. by Queen Anne county, and W. by Chesapeak Bay. *Area*, 270 square miles. *Pop.* 12,000.— 4. In Michigan. *Area*, 576 square miles. *Pop.* 13,000.

KENT, a maritime county of West Australia, mostly between *lat.* 34° and 35° S. and *lon.* 118° and 119° E. —Another in Tasmania, watered by the river Huon.

KENT ISLANDS, a group at the E. end of Bass's Straits, between the colony of Victoria and Tasmania.

KENT, William, an English painter and architect, who at first worked at coach-painting, but abandoned it for the higher branches of the art. In 1710 he went to Italy, where he became acquainted with the earl of Burlington, through whom he gained considerable employment, and was appointed principal painter and architect to the king. Although only an indifferent artist, he yet takes rank as the great improver of modern English landscape-gardening; indeed, he is regarded as the founder of the art. He also carved Shakspere's monument in Westminster Abbey. B. in Yorkshire, 1684; D. 1748.

KENT, James, an English musical composer. In his youth he was chorister in Winchester Cathedral, and afterwards in the Chapel Royal. He subsequently became organist of Trinity College, Cambridge, and at Winchester Cathedral. He greatly assisted Dr. Boyce in the production of his "Collection of Cathedral Music," and also wrote many anthems, several being familiar to the congregations of our cathedrals at the present time. He was admitted to be the best player on the organ in his day. B. at Winchester, 1700; D. 1776.

KENT, James, a distinguished American lawyer. He was elected professor of law in Columbia College in 1794; in 1800 he assisted in revising the legal code of New York; and, in 1804, was nominated chief justice of that city. His great work, "Commentaries on American Law," was concluded in 1830, and remains the standard work on the constitutional law of the United States. He was an industrious man and excellent judge. B. at Fredericksburg, New York, 1763; D. 1847.

KENT, Edward Augustus, duke of, was fourth son of George III. He commanded in both America and Spain. In 1818 he married a daughter of the duke of Saxe-Coburg, by whom he had the Princess Victoria, who reigns at the present time as queen of England.

KENTIGERN, or ST. MUNGO, *ken'-ti-gern*, a Scotchman, was the disciple of Palladius, in the 6th century. Camden says he was bishop of Glasgow, and a member of the university of Oxford. He is also said to have founded the monastery of St. Asaph.

KENTISH-TOWN, *ken'-tish*, a chapelry of England, in the county of Middlesex, 2 miles from London. It contains a college of civil engineers, and may be considered as a suburb of London. *Pop.* 24,000.

KENTUCKY, *ken-tuk'-e*, one of the United States, bounded on the N. by the Ohio river, on the W. by the Mississippi, on the S. by Tennessee, and on the E. by Virginia. Its S. boundary is in *lat.* 36° 30', and its N. extremity (which is in the N. bend of the Ohio) in *lat.* 39° 10' N. *Ext.* 400 miles long from E. to W., and 170 broad from N. to S. *Area*, 376,800 square miles. *Gen. Desc.* The flats which border the shores of the Ohio, from its mouth to that of Big Sandy River, average about 1 mile in breadth, and produce various kinds of woods, such as beech, maple, sycamore, cotton-wood, hackberry, pawpaw, and honey-locust. These flats are, in some places, subject to periodical inundations, but are nevertheless susceptible of cultivation. Parallel to the Ohio, and behind these flats, lies a strip of country from 5 to 20 miles wide, and extending the whole length of the state. It abounds with valleys, which are watered by numerous creeks, which enter the Ohio. This soil is rich, and the greater part capable of improvement. Between this strip, Big Sandy and Green rivers, and the eastern counties, lies the garden of the state. It is about 150 miles long, and from 50 to 100 wide. This extensive tract is intersected by Little Sandy, Licking, Kentucky, and Salt rivers, and their numerous forks. It has the happiest surface, gradually rising and descending alternately. As the soil rests throughout on a bed of limestone, there are numerous apertures which greatly diminish the rivers in dry seasons. *Rivers.* The principal are, the Ohio, which washes its northern margin for the space of 838 miles; the Mississippi, which forms its western

*limit for 74 miles*; the Big Sandy, which forms its eastern limit for nearly 200 miles; the Licking, and the Kentucky, which fall into the Ohio, the one opposite the town of Cincinnati, and the other 77 miles above Louisville. There are, besides, the Salt River, Green River, Tradewater River, and the Cumberland River, all tributary to the Ohio. The Tennessee runs about 75 miles in Kentucky, and then joins the Ohio; and the Kaskinampas, which falls into the Mississippi, waters the western end of the state. There are, besides, numerous smaller streams, which are principally tributary to the Ohio. *Zoology.* The domestic animals are the same as in the other parts of the northern States, but are large and beautiful, particularly the horse. Cattle are raised in great numbers, and wild turkeys are still numerous in the unsettled parts. Bears, deer, wolves, and foxes are still found in the eastern and southern counties; whilst rabbits and grey squirrels are very plentiful. *Pro.* Wheat, rye, maize, oats, barley, and buckwheat. Maize is the principal grain raised for home consumption. Cotton, hemp, flax, and tobacco succeed in many parts extremely well, and the potato grows abundantly, as do a great variety of garden vegetables. The tobacco crop is very large. Apples, pears, cherries, peaches, and plums are the fruits most commonly cultivated; but horses, mules, cattle, and hogs for export, are the prime objects of rural industry. *Minerals.* Iron, coal, marble, lime, nitre, and salt from mineral springs. *Manf.* Cloths and stuffs, bagging for cotton and hemp, iron, castings, nails, earthenware, glass, leather, cordage, paper, distilled spirits, oil, saltpetre, gunpowder, and maple sugar. There are many rope-walks, paper-mills, furnaces, and powder-mills. Large quantities of salt and maple sugar are exported. *Pop.* nearly 1,000,000, of which a sixth are slaves. *Lat.* between 36° 20′ and 39° N. *Lon.* between 82° and 89° W. This state originally formed part of Virginia, from which it was separated in 1789, and admitted into the Union in 1792.

KENTUCKY, a river of the United States, rising towards the S.E. corner of the above state, in the Laurel Mountains, and, after a course, generally to the north-west, of 200 miles, falling into the Ohio at Fort William, in *lat.* 38° 20′ N.

KENTY, *ken′-te*, a town of Austrian Poland, in Galicia, 35 miles from Cracow. *Manf.* Woollens, linens, and leather. *Pop.* 4,000.

KENYON, Lloyd, Lord, *ken′-yon*, an eminent English judge. He received his education at Ruthin school, in Denbighshire, after which he was articled to an attorney at Nantwich, in Cheshire. After serving his clerkship, he became a member of the society of Lincoln's Inn, and was called to the bar in 1761. Having practised as a conveyancer some years, his reputation as a sound lawyer brought him into great notice at the Chancery bar; but his first great rise in the profession took place in 1780, when he led the defence, with Mr. Erskine, for Lord George Gordon. In 1782 Mr. Kenyon was made attorney-general and chief justice of Chester. He was also returned to parliament for Hindon, in Wiltshire. In 1784 he was appointed master of the Rolls; and on the resignation of the earl of Mansfield in 1788, by the interest of Lord Thurlow, he was raised to the office of chief justice of the King's Bench, and created Baron Kenyon. As a judge, his lordship conducted himself with strict integrity, and though he was occasionally warm, it was never from petulance, but from his ardent love of justice. Lord Kenyon was correct in his mode of living, and resolutely punished gambling and other fashionable vices, whenever they came before him. Though a stern man, he possessed a kindly nature. One day he passed sentence of death upon a young woman guilty of theft;—she fainted; Lord Kenyon, greatly agitated, cried out, "I don't mean to hang you; will nobody tell her that I don't mean to hang her?" He passed the severest sentences upon duellists. As an English judge, Lord Kenyon was distinguished for his strict administration of justice according to the known laws of the land. His legal learning was exact and profound, and the greater portion of his adjudications are at the present time regarded as of the highest value. He was in private life temperate and frugal, even to parsimony; and, although enormously wealthy, was usually attired in a shabby costume; while his equipage was unpretending, even to meanness. On his death he left a fortune of £300,000. B. at Greddington, Flintshire, 1732; D. 1802.

KEPLER, John, *kep′-ler*, a celebrated German astronomer. He received his education at Tubingen, and in 1593 was appointed professor of mathematics at Gratz. In 1600 he went to Bohemia, on a visit to Tycho Brahe, who introduced him to the emperor Rudolph, who appointed him his mathematician. Kepler completed the tables left unfinished by Tycho, who died in the same year, and which he called the Rudolphine Tables. In 1613 he was at the assembly at Ratisbon, and assisted in the reformation of the calendar. He was the author of numerous works on astronomy, all of them invaluable contributions to science, besides his Tables and Ephemerides; among others, the "New Astronomy," which contains the great treatise on the Motion of Mars. His fame rests upon his inestimable discovery that the planets' orbits are elliptical. The character and career of this magnate of science are thus criticised by Delambre, an eminently reliable authority. "Kepler," he says, "was ardent, restless, burning to distinguish himself by his discoveries. He attempted everything; and, having once obtained a glimpse, no labour was too severe for him in following or verifying it. All his attempts had not the same success, and, in truth, that was impossible. Those which have failed seem to us only fanciful; those which have been more fortunate appear sublime. When in search of that which really existed, he has sometimes found it; when he devoted himself to the pursuit of a chimera, he could not but fail: but even there he displayed the same qualities, and that obstinate perseverance that must triumph over all difficulties but those which are insurmountable." B. at Wiel, in the duchy of Wurtemburg, 1571; D. 1630.

KEPPEL, Augustus, Viscount, *kep′-pel*, a celebrated English admiral, was the second son of William earl of Albemarle. He accompanied Commodore Anson in his voyage round the world, and afterwards raised himself to the first honours of his profession. In 1778 he commanded the Channel fleet, and in the same year fell in with the French under Count d'Orviliers, off Ushant. A partial action ensued, which the English admiral intended to renew on the following morning, but the enemy had retired. This affair gave great dissatisfaction to the nation, which was aggravated by Sir Hugh Palliser, second in command, preferring a charge against Admiral Keppel, who was honourably acquitted by a court-martial, at Portsmouth. Sir Hugh was then tried and censured. In 1782 Admiral Keppel was raised to the peerage: he subsequently acted on two different occasions as first lord of the Admiralty. D. 1786.

KERGUELEN'S LAND, or ISLAND OF DESOLATION, *kerg′-len*, lies in the Southern Indian Ocean, discovered by Kerguelen, a Frenchman. It was visited in 1779 by Captain Cook, who gave it the latter name, from its appearance. *Ext.* About 100 miles long, and 50 broad at its widest points. *Lat.* 49° 20′ S. *Lon.* 69° 30′ E.

KERIAL, KOREN, or BHOKUR, *bo-kur′*, a rajahship of India, in the presidency of Bengal. *Area*, 1,510 square miles. *Pop.* 68,000. *Lat.* 20° 20′ N. *Lon.* 82° 40′ E.

KERMAN, *ker-man′*, a province of the Persian empire, bounded by Mekran and Seistan on the E., Laristan and Fars on the W., and on the S. by the Persian Gulf. *Area*, about 65,000 square miles. *Desc.* Mountainous and unfertile; but, in some parts, producing tobacco, cotton, saffron, madder, gums, and fruits; pasturage, however, forms the principal occupation of the people. *Pop.* estimated between 500,000 and 600,000. *Lat.* between 26° and 31° N. *Lon.* between 55° and 60° E.

KERMAN, called sometimes SIRJAN, capital of the above province, was formerly a great city and a noted emporium of trade; but it has been desolated both by foreign and domestic wars. *Manf.* Carpets, shawls, and matchlocks. *Pop.* between 20,000 and 30,000. *Lat.* 29° 48′ N. *Lon.* 56° 30′ E.—In 1794, after a brave defence, this city was taken by Aga Mahomed Khan, and given up to plunder for three successive months. It never has, and perhaps never will, recover from this disaster: its aspect is deserted and ruinous, and the buildings fill only a small part of the space inclosed by the fortifications.

KERMANSHAW, *ker-man-shaw'*, a fortified town of Persia, and the capital of Persian Kurdistan, 80 miles from Hamadan. It is adorned and supplied with many gardens and public baths. *Manf.* Carpets and swords, which, with fruits and cottons, are sent to Bagdad. *Pop.* about 20,000 or 30,000. *Lat.* 34° 18′ N. *Lon.* 47° 12′ E.

KEROWLEE, *ke-ro-le'*, a state of Hindostan, in Rajpootana. *Area*, 1,880 square miles. *Pop.* 188,000. *Lat.* between 25° 50′ and 26° 48′ N. *Lon.* between 76° 40′ and 77° 38′ E.

KERRY, *ker'-re*, a county of Ireland, bounded on the N.W. by the Shannon, which separates it from the county of Clare; on the N.E. by the county of Limerick; on the S.E. by Cork, and on the W. by the Atlantic. *Ext.* Its greatest extent from N. to S. is about 53 Irish miles, and, from E. to W., 41 Irish miles. *Area*, 1,187,000 acres. *Desc.* Diversified with an irregular surface, some particular spots being as charming for their exquisite scenery as they are fruitful in crops, and equally adapted for tillage and pasture. A very great portion of the county, however, is dreary, desolate, and covered with lofty mountains; while other parts are intersected by tracts of bog. The coastline is deeply indented with bays. *Pro.* Agriculture is in a low state; but crops of wheat, barley, and potatoes are produced. Numerous herds of goats and Irish cattle are pastured on the mountains. *Minerals.* Iron, coal, copper, lead, and slate. *Rivers.* The principal are the Cashing, the Lane, the Roughty, the Mang, and the Feale. *Lakes.* Killarney, Curra, and Currane. *Manf.* Unimportant; its trade mostly consisting of provisions. *Pop.* 240,000, generally speaking the Irish language.—In 1210 this county was erected into a shire by King John.

KERRY, or CERI, a parish of Montgomeryshire, N. Wales, 3 miles from Newton. It lies in the vale of Kerry, celebrated for its beauty. *Manf.* Baizes and flannels. *Pop.* 2,000.

KERRY HEAD, the S. extremity of the mouth of the river Shannon, in the county of Kerry, Ireland.

KERRY POINT, a cape of Ireland, in the county of Down.

KERSHAW, [*ker'-shaw*, a district of S. Carolina, U.S. *Area*, 832 square miles. *Pop.* 15,000.

KERTCH, *kertch*, a seaport and fortress of European Russia, in the government of Taurida, on the coast of the Crimea, 8 miles from Yenikale. It is defended by a fort, and is the quarantine station of the Sea of Azof. It has a deep harbour, and exports corn, caviare, hides, and skins. *Pop.* 8,000.—This place was, in 1855, taken by the allied troops of France and Britain, in the war with Russia.

KESTEVEN, PARTS OF, *kes-te'-ven*, a subdivision of England, in Lincolnshire, containing extensive tracts of arable and pasture land. *Area*, 446,000 acres. *Pop.* 93,000.

KESTZHELY, *keshts'-hel-ye(r)*, a town of Hungary, in the palatinate of Sala, on the Platten See. *Manf.* Woollens. In its vicinity are some vineyards, which form the principal support of the inhabitants. *Pop.* 8,000.

KESWICK, *kes'-ik*, a market-town of the county of Cumberland, on the lake of Derwentwater, 24 miles from Carlisle. It is a neat little town, and is much visited by strangers who make the tour of the lakes. Its principal buildings are a church, market-house, town-hall, workhouse, several schools, and two museums, mostly exhibiting specimens of minerals. *Manf.* Coarse woollen goods, carpets, blankets, kerseys, and some linens. *Pop.* 2,700.—About a mile and a half to the south of the town is a remarkable piece of antiquity, of the Druidical kind.

KETSKEMET, or KECSKEMET, *ketsh'-ke-met*, a large town in the interior of Hungary, in the county of Pesth, 50 miles from Pesth. It is the residence of many families of rank and property. *Manf.* Soap and leather; but the property of the district consists chiefly in cattle and sheep. *Pop.* 32,000. *Lat.* 46° 54′ 29″ N. *Lon.* 19° 42′ 26″ E.

KETT, William, *ket*, a tanner of Norfolk, who, in the reign of Edward VI., excited a revolt against the government. The insurgents, amounting nearly to twenty thousand, marched to Norwich, which they took, and Kett formed a tribunal under a large oak, called the Tree of Reformation. They first protested only against inclosures and the exactions of the nobility and gentry, but they afterwards inveighed against innovations in religion, and demanded the restoration of popery. After defeating the marquis of Northampton, they were routed by the earl of Warwick, and Kett, with several others, was hanged upon the tree of reformation in 1549.

KEULEN, Janssen van, *koi'-len*, a portrait-painter, who, before Vandyck came to England, was in great favour with Charles I. Though the latter great painter supplanted him in his profession, a warm friendship subsisted between the two artists. D. 1665.

KEW, *ku*, a village of Surrey, on the banks of the Thames, opposite to Brentford, with which it is connected by a stone bridge of seven arches. *Pop.* 1,000. Near this is Kew Palace, the favourite retreat of George III., who enlarged the gardens, and connected them with those of Richmond. The botanic garden here, chiefly for exotics, is one of the finest in the world. It is open to the public, and maintained at the cost of the nation.

KEY, WEST, an island in the United States, at the entrance of the Gulf of Mexico. (*See* FLORIDA KEYS.)

KEY, Thomas Hewitt, a modern English philologist. After completing his education at St. John's College, Cambridge, he studied medicine at Guy's Hospital, London; but went out to Virginia in 1824, as professor of pure mathematics in the university of that state. Returning to London in 1827, he became Latin professor at the University of London, on the opening of that seat of learning. He afterwards contributed articles on language to the "Journal of Education," the "Penny Cyclopædia," and other works. In 1842 he became head master of the junior school of University College, and was also elected to the chair of comparative grammar. He subsequently wrote articles for Dr. Smith's "Dictionary of Classical Antiquities;" and, in 1846, published his Latin Grammar. At the present time he is engaged in writing a "Latin Dictionary," and a "Dictionary of Roots of Languages." B. in London, 1799.

KEYS, THE, or CAYS, *ke*, a series of islands along the shores of Honduras, in Central America, and in other parts of the West Indies.

KHAIBAR, *kai-bar'*, a town of Arabia, the capital of an independent Jewish territory, 100 miles from Medina. In 628 it was taken by Mahomet, who had received from a Jewess the poisoned egg, which ultimately cost him his life.

KHALKAS COUNTY, *kal'-kas*, the N. part of Mongolia, inhabited by Mongol Tartars of the Buddhic faith. It was the native country of Genghis Khan. *Pop.* Unascertained. *Lat.* between 47° and 53° N. *Lon.* between 90° and 112° E.

KHAN, *kan*, a name which signifies 'lord,' a title which the chiefs of the Tartar people took during the middle ages; as Genghis Khan, Mohammed Khan, &c. Some of these khans extended their dominion over a great part of Asia; among others, Genghis Khan and Tamerlane. At the present time, the title is generally borne by governors of provinces, or officers under the sway of Russia or Persia. The only independent khans which now exist are to be found dwelling to the north of Mount Caucasus, in independent Turkestan, and in the country of the Khirgiz. The greatest existing khans are those of Bokhara, Khiva, and Balk. During the middle ages, the most powerful were the khans of Kazan, Astrakan, and the Crimea. The Turks also use the word as a synonyme for caravanserai.

KHARKOV. (*See* CHARKOV.)

KHERASKOV, Michael, *ker'-as-kov*, a Russian poet, who published a poem on the use of science, and an epic, called the "Rossiada," the subject of which is the conquest of Casan by Ivan Vassilievitch II. He was vice-president of the college of mines, counsellor of state, and curator of the university of Moscow. He was also the writer of some tragedies and dramatic pieces. B. 1733. D. 1807.

KHERSON. (*See* CHERSON.)

KHILKOF, Prince, *kil'-kof*, a Russian nobleman, and ambassador to Charles XII., by whom he was thrown into prison when war broke out between Russia and Sweden. In his confinement he wrote an abridgment of the Russian history. He died as he was about

to be restored to liberty, after an imprisonment of eighteen years. His work was published in 1770.

KHIVA, or KAREESIN, *khe'-va*, a country of Independent Turkestan, bounded on the N. partly by the Sea of Aral, on the E. by Bokhara, on the S. by Khorasan, and on the W. by the Caspian Sea. *Desc.* Almost wholly a sandy desert. *Pop.* about 200,000, mostly nomadic tribes. *Lat.* between 36° and 44° N. *Lon.* between 62° and 64° E.—Its capital is of the same name, and has a population of 10,000. *Lat.* 41° 40′ N. *Lon.* 59° 13′ E.

KHIVER. (*See* CAMBODIA.)

KHOKAN, KOKAN, or FERGHANA, *ko-kan'*, a khanat of Central Asia, bounded on the N. by Chinese Turkestan, on the W. and N. by Kerghiz, and on the S. by Bokhara. *Desc.* Mountainous, embracing the lofty region W. of the great plateau of E. Asia. *Pro.* Cotton, silk, corn, and fruits. There are extensive pasture-lands, upon which large herds are raised; and wool is an extensive article of export. *Minerals.* Iron, coal, copper, and lapis lazuli. *Manf.* Embroidered silks, cottons, and cochineal. *Pop.* Unascertained. *Lat.* between 40° and 45° N. *Lon.* between 67° and 75° E. —The CAPITAL is of the same name, and is situate in a fertile and cultivated district, 280 miles from Kashgar.

KHONSAR, *kon'-sar*, a town of Irak, in Persia, 85 miles from Ispahan. *Pop.* 12,000, mostly engaged in raising and preserving fruits.

KHORASAN, or KHORASSAN, *ko'-ras-san'*, 'country of the sun,' a province of Persia, very imperfectly defined. It is inclosed by the districts of Yezd, Mazanderan, Khiva, and Afghanistan. *Pro.* Wheat, rice, tobacco, cotton, and hemp. Large herds and flocks are reared, and goats' hair is an important article of produce. *Pop.* Unascertained. *Lat.* between 34° and 38° N. *Lon.* between 53° and 61° E.

KHOSRU. (*See* CHOSROES.)

KHUZISTAN, *ku-sis-tan'*, a province of Persia, mostly mountainous, and producing maize, barley, rice, cotton, silk, dates, sugar, and indigo. Large herds and flocks are also reared. *Pop.* Unascertained. *Lat.* between 30° and 33° N. *Lon.* between 46° and 51° E.

KHYBER PASS. (*See* AFREEDIS.)

KHYERPOOR, *ki-er-por'*, a town of Scinde, 15 miles from the Indus. It is the residence of the ameers of Scinde. *Manf.* Coarse cottons. *Pop.* 15,000. *Lat.* 27° 30′ N. *Lon.* 68° 45′ E.

KHYRPOOR, *kir-por'*, a town of Scinde, 50 miles from Roree. *Pop.* 15,000.—Also a town of Hindostan, 30 miles from Bhaulpoor. It has a trade with the desert, on the borders of which it stands.

KI or KEY ISLANDS, *ke*, a group in the Malay archipelago, producing timber, tortoise-shell, and cocoa-nut oil. *Pop.* of the whole, about 10,000. *Lat.* 6° S. *Lon.* 133° E.

KIAKHTA, or KIACHTI, *ke-ak'-ta*, a town of Asiatic Russia, government of Irkutsk, 180 miles from Irkutsk. It is the centre of all the trade carried on between the Russian and Chinese empires. The great fair is held in December, when merchants flock thither from every part of the Russian empire. They bring cloths, furs, beavers, Russia and Morocco leather; and receive in exchange nankeens, silk stuffs, tea, rhubarb, &c. *Pop.* about 6,000. *Lat.* 50° 20′ N. *Lon.* 106° 35′ E.

KIANG-SI, *ke-ang'-se'*, a fine province of China, producing hemp, grass-cloths, porcelain, iron, tin, lead, and some gold. *Pop.* 23,500,000. *Lat.* between 24° and 30° N. *Lon.* between 113° 20′ and 118° 30′ E.

KIANG-SU, *ke-ang'-soo*, a maritime province of China, inclosed by the provinces of Honan, Shantung, Nganhoei, and Tche-kiang, except on the E., where it is bounded by the Yellow Sea. It has generally a level surface, and is highly cultivated. *Pop.* 38,000,000. *Lat.* between 31° and 35° N. *Lon.* between 116° and 122° E.

KIDDERMINSTER, *kid'-der-mins'-ter*, a parish and market-town of Worcestershire, divided into two unequal parts by the Stour, 15 miles from Worcester. Its principal buildings are the church, a town-hall, market-house and workhouse, grammar-school, and various other schools. The church is a handsome Gothic building, and contains several interesting monuments. The Staffordshire and Worcestershire Canal passes within 100 yards of the market-place; and near this is a wharf and commodious warehouse for depositing goods, or sending away such as are intended for Liverpool, Hull, Bristol, &c. *Manf.* Kidderminster has long been noted for its broad-cloth, which was made in the reign of Henry VIII. This was succeeded by linsey-woolsey; after which woollen and worsted tammies, and flowered stuffs were introduced; and, since that period, crapes, bombazines, and poplins. But the carpet manufacture is that which has taken the firmest root here, has flourished best, and promoted most essentially the trade, wealth, and population of the town. *Pop.* about 24,000; of borough, about 19,000. It is a station on the Worcester and Birmingham Railway.

KIDWELLY, *kid-wel'-le*, a market-town of Caermarthenshire, in an inlet in Caermarthen Bay, and 10 miles from the town of that name. It is divided into the Old and New town, on both sides of the Lesser Gwendraeth, a handsome stone bridge over the river forming the communication between them. The parish church, which is in the New town, is a plain building, with a tower at the west end, and a spire 165 feet high. The trade consists mostly in the coal and iron which abound greatly in the neighbourhood. *Pop.* 1,700.

KIEF. (*See* KIEV.)

KIEL, *keel*, a walled seaport-town of Denmark, and the capital of the duchy of Holstein, at the extremity of an inlet from the Baltic, called the Kielerfiord, 52 miles from Hamburg. It is regularly built, and has straight, well-paved streets, which terminate in the market-place. Its principal buildings are the church of St. Nicholas, a royal palace, and the public baths. The harbour is good, and shipbuilding and mercantile agency are the principal occupations of the people. *Manf.* Hats, tobacco, starch, sugar-refining, and iron wares. A great annual fair takes place in January. *Pop.* about 15,000. *Lat.* 54° 10′ 43″ N. *Lon.* 10° 8′ 18″ E. This place is the seat of a university, which was founded in 1665, and which educates about 200 students.

KIEN-LOONG, *ke-en'-loong'*, emperor of China, who succeeded his father, Yung-Tching, in 1735. He wrote some poetical pieces, and when Lord Macartney went to China as ambassador, he gave him some of his verses to present to the king of England. He favoured the missionaries, and was, in all respects, a very amiable monarch. B. 1709; D. 1799.

KIERINGS, Alexander, *kee'-rings*, a landscape-painter of Utrecht. His views were copied from nature, and he finished them with amazing patience, even the bark and the fibres of the trees being distinctly marked. B. 1590; D. 1646.

KIEV, KIEF, or KIEW, *ke'-ef*, a large government of European Russia, comprising a part of the Ukraine, and bounded by the provinces of Podolia, Volhynia, Minsk, Tschernigov, and Poltava, from which last it is separated by the Dnieper. *Area*, 19,180 square miles. *Desc.* Undulating and fertile, and covered with good timber. *Pro.* Wheat, rye, oats, maize, hemp, lint, hops, wines, and tobacco. Cattle are also extensively reared. *Manf.* Soap and candles. *Pop.* 1,606,000. *Lat.* between 48° 30′ and 51° 50′ N. *Lon.* between 28° 40′ and 33° 25′ E.

KIEV, the capital of the above province, on the Dnieper, consisting, properly, of three towns; viz., the Old town; Podol, or the Lower town; and the fortress of Petscherski, the last regularly defended. It is 270 miles from Cherson, and has barracks for the garrison; also magazines, officers' houses, and several churches; likewise a government-house, beautiful public gardens, a gymnasium, an endowed university, containing a library of 35,000 volumes, and cabinets of medals, mineralogy, zoology, and botany. The church of St. Sophia, at Kiev, being the earliest Christian church in Russia, is an object of great interest, and of frequent pilgrimage to the followers of the Greek faith. *Pop.* 48,000. *Lat.* 50° 27′ N. *Lon.* 30° 27′ 45″ E.

KIL, or KILL, *kil*, a prefix, signifying 'a wood' and 'church,' and connected with the names of numerous parishes in Ireland, with populations varying between 1,000 and 14,000. Also the prefix of several places in Scotland, with populations varying between 1,500 and 6,000.

KILBIRNEY, *kil-bir'-ne*, a parish and village of Ayrshire, 2 miles from Beith. *Manf.* Cotton and flax. *Pop.* 5,500.

KILBURN, *kil'-burn*, a township of England, in Derbyshire. *Pop.* 530.—Also a suburb of London, on the North-western Railway, 6 miles from St. Paul's.

KILBURN, Richard, an English topographer, who wrote a Survey of the county of Kent, published in 1659.

KILBYE, Richard, *kil'-be*, an English divine, who, in 1590, was elected rector of Lincoln College, Oxford, and was afterwards made Hebrew professor and prebendary of Lincoln. He was one of the translators of the present version of the Bible. D. 1620.—There was another divine of his name, who was minister of Allhallows, in Derby, and wrote the "Burthen of a loaden Conscience," which took went through several editions. D. 1645.

KILDA, St., *kil'-da*, a general name for a group of islands belonging to the Hebrides. The principal island gives its name to the rest. *Ext.* About 3 miles long from east to west, and 2 broad from north to south. *Pop.* 110. *Lat.* 57° 48′ 32″ N. *Lon.* 8° 32′ 2″ W. —Next to St. Kilda, Borera is the largest of the islands: it presents a beautiful verdure. Soa is the next in magnitude, and possesses also some pasturage; but Lavenish, Stackly, and Stackermin, are devoid of any. The islands altogether are supposed to be capable of pasturing 2,000 sheep.

KILDARE, *kil-dair'*, an inland county of Ireland, in the province of Munster, bounded on the N. by Meath, on the E. by Dublin and Wicklow, on the S. by Carlow, and on the W. by King's and Queen's counties. *Area*, 653 square miles. *Desc.* Generally an extensive flat of fine arable soil, which, for centuries, has mostly supplied the capital with grain. It comprehends, however, a considerable tract of bog. The Curragh of Kildare is one of the most beautiful commons in the island. *Rivers.* The principal are the Barrow, the Liffey, and the Boyne. The Grand Canal and the Royal Canal pass through it. *Pro.* Wheat, barley, and oats. The minerals and manufactures are unimportant. *Pop.* 96,000.

KILDARE, a market-town of Ireland, in the above county, 30 miles from Dublin. It has the ruins of two abbeys, a cathedral, an infirmary, market-house, and a jockey-club. The town is chiefly supported by the frequent horse-races on the extensive common in the neighbourhood, called the Curragh, having little or no trade. *Pop.* 1,300.

KILDWICK, *kild'-wik*, a parish of the W. Riding of Yorkshire, 4 miles from Skipton. *Manf.* Worsted, principally. *Pop.* 12,000.

KILKENNY, *kil-ken'-ne*, an inland county of Ireland, in the province of Leinster, bounded on the N.W. by Queen's county, on the N. by the county of Carlow, on the E. by the county of Wexford, and on the S.W. by the county of Tipperary. *Area*, 796 square miles. *Desc.* Undulating and fertile. There is little of bog land; and where the hills subside into plains or valleys, the soil is of great fertility. There are very extensive dairies, from the produce of which many farmers pay their rents; but agriculture generally is in a backward state. *Rivers.* The Barrow, Nore, and Suir. *Pro.* Wheat, oats, barley, and potatoes. *Minerals.* In the N. parts of the county are excellent quarries for flags, and coal is in great abundance. In the limestone district are many valuable marble-quarries. Manganese, iron ore, lead ore, and some indications of copper ore are perceived in different parts. *Manf.* Woollens and linens. *Pop.* 140,000, nearly all Roman Catholics. This county is intersected by two crossing lines, and its Grand Canal and rivers give it great facilities of communication with other parts of Ireland.

KILKENNY, the capital of the above county, on the Nore, across which there are two handsome bridges, 62 miles from Dublin. It contains many elegant buildings, and its streets are paved with black marble. The venerable ruins of its churches, monasteries, and abbeys, still remain to attest its former importance; and its gates, towers, walls, and bastions, which are yet to be seen, prove it to have been formerly a place of great strength. The most remarkable buildings are the castle of the earl of Ormond, the cathedral, the churches of St. John and St. Mary, several Roman Catholic churches, the bishop's palace, the celebrated college or free school, a theatre, an asylum for decayed housekeepers, the city prisons, an infirmary, hospital, and barracks. Its population are employed in distilling, brewing, tanning, and making flour. *Pop.* about 20,000. *Lat.* 52° 35′ N. *Lon.* 7° 15′ W.

KILLALA, *kil'-la-la*, a small seaport-town, and the see of a bishop, in Ireland, in the county of Mayo, 8 miles from Ballina. *Pop.* 1,000.—Here, in 1798, a French force landed and took the town.

KILLALOE, *kil-la'-lo*, a town of Ireland, in the county of Clare, on the Shannon, over which is a bridge with 19 arches, 11 miles from Limerick. It is a very old town, destitute of trade. The cathedral is a venerable structure, which has been built above seven centuries. In the vicinity is the episcopal palace of Killaloe. *Pop.* 2,300.—Steamboats ply from this place to Limerick by means of canals. About a mile from Killaloe was the residence of King Brian Borouch, but which is now marked only by an earthen fort.

KILLARNEY, *kil-lar'-ne*, a market-town of Ireland, in the county of Kerry, much frequented on account of the adjoining lakes of Killarney. It is 44 miles from Cork, and stands at the terminus of the Cork and Killala Junction Railway. Its public buildings are a parish church, a Roman Catholic cathedral, a court-house, market-house, and assembly-rooms. *Pop.* 6,000.—The parish includes a portion of the lake scenery, which is extremely picturesque. Lord

KILLARNEY.

Macaulay pronounced this district to be the most beautiful in the British isles.

KILLARNEY, LAKES OF, three connected lakes in the county of Kerry, Ireland, the lowest of which is within 2 miles of the above town,—the Lower, which is the largest, Tore or Middle, and the Upper. These lakes are formed by the river Flesk and other streams, which form some of the finest waterfalls in Ireland. Their scenery is a mixture of the wild, the grand, and the beautiful.

KILLIECRANKIE, *kil'-le-krink'-e*, a noted pass to the Highlands of Scotland, in Athol, near the junction of the Tummel with the Garry, 15 miles from Dunkeld. At the N.W. end, the battle in which Claverhouse, Viscount Dundee, fell, was fought in 1689.

KILLIGREW, Catharine, *kil'-li-gru*. She married Sir Henry Killigrew, of Cornwall, and was a lady of great accomplishments, being mistress of the Hebrew, Greek, and Latin languages. She also wrote

some poems. B. in Essex, about 1530; D. about 1600.

KILLIGREW, Anne, a beautiful and accomplished English lady. She received a liberal education, distinguished herself in painting, and drew the portraits of the duke and duchess of York; she was also eminent for her piety. Her poems were published in 1686, with an elegiac ode by Dryden prefixed. B. in London, 1660; D. 1685.

KILLIGREW, William, an English dramatic writer, was the son of Sir Robert Killigrew. He received his education at St. John's College, Oxford, after which he went on a tour of travel. On his return, he was made governor of Falmouth and Pendennis Castle. For his adherence to the cause of Charles I. he suffered considerably in his fortune. At the Restoration he was knighted, and made vice-chamberlain to the king. Besides "The Siege of Urbin," "Selindra," "Ormasdes; or, Love and Friendship," he wrote "Midnight and Daily Thoughts," in prose and verse, and "The Artless Midnight Thoughts of a Gentleman at Court." B. at Hanworth, Middlesex, 1605; D. 1693.

KILLIGREW, Thomas, brother of the preceding. He was page to Charles I., and groom of the bedchamber to Charles II. He wrote nine plays. He was commonly called King Charles's jester; but had more wit in conversation than in writing. B. 1611; D. 1682.

KILLIGREW, Henry, brother of the above. In 1642 he was made prebendary of Westminster. He suffered much for his loyalty to Charles I. in the rebellion, but at the Restoration recovered his prebend, and was appointed master of the Savoy, and rector of Wheathamstead, in Hertfordshire. He wrote "The Conspiracy," a tragedy; "Pallantus and Eudora," a tragedy. B. 1612; D. about 1690.

KILMAINE, Charles Joseph, *kil-main'*, an Irishman, who became general in the armies of the French republic. He fought against the English in America, under Lafayette, and was employed as brigadier in the French army sent into La Vendée. He signalized himself in Italy, at Mantua and at Castiglione, and was nominated commander-in-chief of the army that was to make a descent upon Ireland; but the expedition was abandoned. He was subsequently placed at the head of the army of Helvetia; but, being unsuccessful, was superseded by General Massena. B. at Dublin, 1754; D. at Paris, 1799.

KILMALIE, *kil-ma'-le*, a parish of Argyleshire and Inverness, in Scotland, 30 miles from Fort Augustus. Its surface is mountainous, and mostly devoted to the pasturing of sheep. *Pop.* 5,300.

KILMARNOCK, *kil-mar'-nok*, a parish and town of Ayrshire, in Scotland, 12 miles from Ayr. The town is on each side of a small river of the same name. The old part of it is irregulary built; but, in what may be called the new, many houses of a very superior description have been erected, with an elegant town-house, academy, and coffee-room. There are, besides, several churches, one of which is collegiate, a workhouse, an academy; and the parish has a great many schools. A stone pillar, about nine feet high, called Seuls' Cross, erected in 1443, in memory of an English nobleman, Lord Seuls, who was killed on the spot by an arrow from one of the Kilmarnock family, is situate in the north-east part of the town. *Manf.* Carpets, shoes, blankets, tartans, and other woollen cloths; bonnets, caps, mits, stockings, gloves, leather, saddlery, muslins, silks, and calico. There are, besides, tan-works, breweries, and works for making machinery. *Pop.* of borough, 21,500. Kilmarnock has railway communication with Ayr, and also with the city of Glasgow.

KILPATRICK, NEW, or EAST, *kil-pät'-rik*, a parish of Scotland, in Stirling and Dumbarton shires, 6 miles from Glasgow. *Pop.* 4,300.

KILPATRICK, OLD, a parish and village of Scotland, in Dumbartonshire, adjoining the above. *Manf.* Cotton, paper; and there are dyeworks. *Pop.* 6,000.

KILRUSH, *kil-rush'*, a seaport-town and parish of Ireland, in the county of Clare, on the Shannon, 28 miles from Ennis. *Manf.* Frieze, flannels, and linen sheeting. *Pop* of parish, 14,000; of town, 500.

KILSYTH, *kil'-sith*, a village of Stirlingshire, Scotland, 13 miles from Glasgow. *Pop.* 4,000, chiefly cotton-weavers.—Here Montrose gained a victory, in the 17th century, over the Covenanters.

KILWARDEN, Arthur Wolfe, Lord, *kil-wawr'-den*, chief justice of the King's Bench, in Ireland. He was called to the bar in 1766; he was afterwards appointed king's counsel, and sat in parliament. In 1787 he was made solicitor-general, and two years later attorney-general. On the death of Lord Clonmel he was appointed chief justice of the King's Bench, in which dignity he conducted himself with impartiality and moderation. Notwithstanding this, he fell a victim to a ferocious mob, who dragged him from his coach, with his nephew, the Rev. Richard Wolfe, and barbarously piked them in Thomas Street, Dublin, in 1803. Miss Wolfe, his lordship's daughter, was in the coach, but one of the mob took her under his protection, and conveyed her to a place of safety. The death of the old judge has been portrayed in a popular picture called the "Assassination of Lord Kilwarden."

KILWINNING, *kil-win'-ning*, a town and parish of Ayrshire, Scotland, on the Garnock, over which is a stone bridge of two arches, 3 miles from Irvine. Adjoining to it is the small village of Byres. It is noted for being the seat of the first Masonic lodge in Scotland, whence all the other lodges have taken their rise. Of this lodge the poet Burns was a member. The ruins of a monastery are to the south of the town. *Manf.* Cotton and silk. *Pop.* 3,500.

KIMBER, Isaac, *kim'-ber*, an English dissenting divine. He was editor of the "London Magazine" for many years, and wrote the "Life of Oliver Cromwell," the "Life of Bishop Beveridge," the "History of England," and twenty posthumous Sermons. B. at Wantage, Berks, 1692; D. in London, 1758.

KIMBER, Edward, son of the above. He was brought up a bookseller, but entered the army, and served in America with some reputation. He succeeded his father as editor of the "London Magazine," and compiled the "Pocket Peerage of England, Scotland, and Ireland," and a "History of England," in 10 vols. He was also the author of "Joe Thompson," a novel, and other works. B. 1719; D. 1769.

KIMBOLTON, *kim-bole'-ton*, a market-town of Huntingdonshire, 10 miles from Huntingdon, noted for its castle. *Manf.* Lace-making. *Pop.* 1,800.

KIMCHI, David, *kim'-che*, a celebrated Jewish rabbi and commentator, of the 13th century. He was a native of Spain, and had two brothers, Joseph and Moses, both men of learning. David's "Commentary on the Old Testament" is regarded as a work of the greatest value by the Jews. He was appointed, in 1232, to arbitrate with respect to the differences between the French and Spanish synagogues respecting the books of Maimonides. His Hebrew Grammar was printed at Venice in 1545, and his Talmudical Dictionary in 1506.

KINCARDINE, *kin-car'-dine*, a small town of Scotland, on the Forth, with a commodious harbour, 25 miles from Perth. Shipbuilding is carried on to a considerable extent. *Pop.* 2,700.

KINCARDINE, a parish of Scotland, in the counties of Ross and Cromarty, in which, in 1650, Montrose was defeated in his last battle. *Pop.* 2,000.—Another, consisting of two detached portions, on the river Forth, 6 miles from Stirling. It contains the villages of Morriestown and Thornhill. *Pop.* 2,000.

KINCARDINESHIRE, or the MEARNS, *kin-kar'-din-sheer*, a county of Scotland, bounded on the E. by the German or British ocean for about 35 miles, including the various indentations of a high and precipitous rocky shore; on the N. by the river Dee and part of Aberdeenshire; and on the W. and S. by the county of Angus, from which it is separated, in almost the whole line, by the river North Esk. *Area*, 382 square miles. *Desc.* It is extremely diversified, and may be divided into the five following districts:—1. The Dee-side district, or the valley which lies on the N. side of the Grampians, through which flows the river Dee.—2. The district on the coast, N. of the Water of Cowie, which flows into the German Ocean near Stonehaven.—3. The Coast district, S. of this water.—4. The Valley, or How of the Mearns, to the S. of the Grampians.—5. That part of the county which is occupied by the Grampians. Of the Dee-side district there is little more than one-eighth part in cultivation. The Coast district, north of Stonehaven, is generally barren

and unproductive. The district on the coast S. of this, contains very fertile lands, with some that are not so valuable. The valley, or How of the Mearns, lies to the W. of the Dee district, and immediately S. of the Grampians. It is a low champaign country, well cultivated, and dotted with gentlemen's seats, villages, and plantations. The dreary regions of the Grampians stretch through the whole breadth of the county from E. to W., with the Dee-side district on the N., and the How of the Mearns on the S., and carries sterility of soil and ruggedness of aspect almost to the verge of the ocean. This bleak country, commencing at about three miles from the coast, with a height of from 500 to 600 feet, increases rapidly in altitude, but at a tolerably regular scale of gradation, until, at the W. extremity of the county, the culminating point appears in Mount Battock, nearly 3,500 feet above the level of the sea. *Rivers.* The principal are the Dee, the North Esk, Bervie Water, and the Cowie. There are, also, the Carron, the Feuch, the Avon, and the Dye, besides others of inferior note. *Pro.* Mostly cattle. *Minerals.* Granite and sandstone. *Manf.* Coarse linens and wooden snuff-boxes. *Antiquities.* The principal are, Finella's Castle, remarkable for vitrified walls, about a mile and a half W. of Fettercairn; the Queen's Castle, about a mile E. from that town; the Kame of Mathers, about 6 miles from Montrose; Whistleberry Castle, about 2 miles from Bervie; and Dunnotar Castle, about a mile S. from Stonehaven; all placed on the summits of lofty insulated rocks on the seashore. *Pop.* 35,000.

KINETON, *kin'-ton*, a market-town and parish of Warwickshire, in the vicinity of which, in 1642, the famous battle of Edgehill was fought between the Royalist and Parliamentarian armies. It is 9 miles from Warwick. *Pop.* 1,300.

KING, *king*, the name of several Chinese towns.

KING, Peter, Lord Chancellor of England. His father was a grocer, and intended him for the same business; but a love of learning rendered him superior to trade, and he was suffered to follow his inclination. The philosopher John Locke, who was his maternal uncle, left him half his library at his death, which was of great service to him. By the advice of the same great man he went to Leyden, and, on his return, entered of the Inner Temple, where he applied himself to the study of the law with great assiduity. He also devoted some time to other studies, particularly theology, and in 1691 published, anonymously, "An Enquiry into the Constitution, Discipline, Unity, and Worship of the Primitive Church, that flourished within the first 300 years after Christ." This work was well received, and soon reached a second edition. In 1699 he was chosen member of parliament for Beeralston, in Devonshire. In 1702 appeared his "History of the Apostles' Creed," a book of considerable information. In 1708 he was chosen recorder of London, and knighted. In 1709 he was appointed one of the managers of the House of Commons on the trial of Dr. Sacheverel. At the accession of George I., in 1714, he was made chief justice of the court of Common Pleas, and, in 1725, created Lord King, baron of Ockham, in Surrey, and shortly after was appointed lord chancellor. He resigned the seals in 1733. B. at Exeter, 1669; D. 1734.

KING, William, an English writer. In 1718 he was chosen principal of St. Mary Hall, but, on offering himself as candidate to represent the university, he resigned that place. Being disappointed, he went to Ireland; but how long he remained there is not known. While in Ireland he wrote a satirical poem, entitled "The Toast." In 1749 he spoke the oration in the theatre at Oxford, on the dedication of Radcliffe's library. He was a zealous Tory, and generally considered as disaffected to the Brunswick family, which brought him into discredit. He published several curious tracts of his own, and five volumes of South's Sermons. B. in London, 1685; D. 1763.

KING, Sir Edmund, an English physician and chemist. Charles II. used frequently to amuse himself in his laboratory. He attended that monarch in his last illness, and was ordered one thousand pounds, which he never received. In the "Philosophical Transactions" are some observations by him on ants and the animalculæ in pepper; also a paper on transfusing blood from a calf to a sheep. D. Unknown when.

KING, Thomas, an eminent comedian. He received a good education, and was intended for trade, which he renounced for the stage before he was 20. He first rose to fame in Dublin, after which he appeared at Drury-lane theatre with great success. The principal character which stamped his reputation was that of Lord Ogleby. In dry sarcastic humour no man excelled him. His performance of Sir Peter Teazle, in the "School for Scandal," was admirable. By an unfortunate propensity to gaming, he lost the fruits of many years of professional toil. B. in London, 1730; D. 1805.

KING, John Glen, an English divine, and chaplain to the English factory at St. Petersburg. He became medallist to the empress of Russia. He wrote the "Rites and Ceremonies of the Greek Church, containing an account of its Doctrine, Worship, and Discipline;" "Observations on the Climate of Russia and the Northern Countries," and some "Observations on the Barberini Vase." D. 1787.

KING GEORGE, a county of Virginia, U.S. *Area*, 217 square miles. *Pop.* 6,000.

KING GEORGE'S ARCHIPELAGO, a large group of islands on the W. coast of North America. *Lat.* 56° 10′ to 58° 18′ N.

KING GEORGE'S ISLANDS, two islands in the South Pacific Ocean, discovered by Byron in 1765. *Lat.* 14° 35′ S. *Lon.* 149° 2′ W.

KING GEORGE'S SOUND, a capacious bay on the S. coast of Australia. *Lat.* of entrance, 36° 6′ 15″ S. *Lon.* 118° E.

KINGLAKE, Alexander William, *king'-laik*, an English barrister, and author of "Eothen," a celebrated book of Eastern travel. He received his education at Eton and Trinity College, Cambridge, and was called to the bar in 1837. He supplied several articles to the newspapers, during the Crimean war, descriptive of the military and naval operations; he has also written a short biography of the Hungarian hero General Guyon, and some papers for the "Quarterly Review." In 1857 he was elected a member of the House of Commons. B. at Taunton, Devonshire, 1802.

KINGSBRIDGE, *kings'-bridj*, a market-town of Devonshire, on the Salcombe river, 32 miles from Exeter. It has a harbour for boats, and has a trade in malt and leather; it has also a grammar-school. Here the climate is so mild, that oranges and some of the other descriptions of fruit belonging to the south of Europe grow and ripen in the open air. *Pop.* 2,000.

KING'S COUNTY, an inland county of Ireland, in the province of Leinster. It is bounded on the N. by East and West Meath, on the E. by Kildare and Queen's county, on the S. by Tipperary, and on the W. by Galway, from which it is separated by the river Shannon. *Area*, 772 square miles. *Desc.* The arable land is naturally fertile, and chiefly consists either of a deep moor or a shallow gravelly loam; but more than a third part of the whole county is occupied by bog and mountain. *Rivers.* The principal are the Shannon, the Brosna, the Barrow, and the Boyne. There are also several smaller rivers. *Pro.* Wheat, barley, oats, and potatoes. *Pop.* 113,000.

KING'S COUNTY is situate in Long Island, in the United States. *Area*, 76 square miles. *Pop.* 15,000.

KING'S ISLAND, an island at the western extremity of Bass's Straits, South Australia. Many ships have been wrecked on this island. *Lat.* 35° 50′ S. *Lon.* 144° E.—Another, on the west coast of North America. *Lat.* 52° 10′ N. *Lon.* 128° W.

KINGSLAND, *kings'-land*, a parish of Herefordshire, 4 miles from Leominster. *Pop.* 1,200.—Here, in 1461, the battle of Mortimer's Cross, which fixed Edward IV. on the throne, was fought.—Also a hamlet of Middlesex, now a northern suburb of London, 3 miles from St. Paul's cathedral.

KINGSLEY, Rev. Charles, *kings'-le*, a distinguished modern novelist and essayist. At 14 years of age he became the pupil of the Rev. Derwent Coleridge, son of the poet: he afterwards went to Cambridge university, where he distinguished himself both in classics and mathematics. He was at first intended for the law, but the church was afterwards chosen. In 1842 he was appointed curate of Eversley, in Hampshire; two years later he succeeded to the same living. He married, about the same time, a daughter of Mr. Grenfell, who represented Truro and Great Marlow in par-

liament for many years, and whose other daughter became the wife of the eminent historian J. A. Froude. His first acknowledged contributions to literature were a volume of "Village Sermons," and "The Saints' Tragedy," a drama in verse, published in 1848. "Alton Locke, Tailor and Poet," was his third essay, and, from its first appearance, it commanded the greatest attention. The bold and earnest views of its author,—"the Chartist clergyman" as he was called, sank deeply into the public mind. This novel has been several times reprinted; its treatment of social and political questions remaining as fresh and valuable as when the book first came before the public. A second novel,—"Yeast, a Problem," was first published in "Fraser's Magazine," and afterwards reprinted, in 1851: this is a philosophical rather than a political novel. His subsequent works were "Hypatia; or, New Foes with an Old Face," a beautiful descriptive fiction, illustrating the times of the early Christian church in the East; "Westward Ho! or, the Voyages and Adventures of Sir Amyas Leigh in the Reign of Queen Elizabeth;" and "Two Years Ago." These novels, by their great excellence, have placed their author among the foremost living writers. Mr. Kingsley has also produced a volume for juvenile reading, called "The Heroes," in which the deeds of some great chiefs of the Grecian mythology are narrated in a captivating manner. Among the more important of his religious writings may be enumerated "The Message of the Church to Labouring Men," "Sermons on National Subjects, preached in a Village Church," and "Sermons for the Times;" all of these being inspired by a pure, generous, and enlightened Christian feeling. He has expounded mental philosophy in his "Phaethon; or, Loose Thoughts for Loose Thinkers," and his "Alexandria and her Schools;" while, for natural philosophy and the science of natural observation, he has contributed his "Glaucus; or, the Wonders of the Shore." He has likewise written for "Fraser's Magazine," the "North British Review," and the "Encyclopædia Britannica." His last effort was the preface to an illustrated edition of Bunyan's "Pilgrim's Progress," the many beautiful drawings included in which were made by Mr. Charles H. Bennett. A bold, independent, and earnest thinker, Mr. Kingsley has, in every one of his popular and excellent works, contributed in elevating the tone of modern society, and giving to it a more enlarged and refined appreciation of the good, beautiful, and true, whether in art or nature. B. at Holne Vicarage, Devonshire, 1819.

KING'S NORTON, a parish of Worcestershire, 5 miles from Birmingham, in which the Birmingham and Worcestershire Canal passes through a tunnel nearly 2 miles long. *Pop.* 8,000.—It is a station on the Birmingham and Gloucester Railway.

KINGSTON, *kingz'-ton*, a seaport on the south coast of Jamaica, constituted a city in 1802, and situate on a bay or inlet of the sea, in which there is safe anchorage. It was founded in 1693, after the destruction of Port Royal by an earthquake, in the preceding year. Its principal buildings are several churches and chapels, a theatre, a free school, Athenæum, a poor-house, and a public hospital. In the lower part of the town is the market-place, which is plentifully supplied with butcher-meat, poultry, fish, fruits, and vegetables. *Pop.* 35,000. —In 1840 a railway between this town and Spanish Town, 16 miles W., was opened.

KINGSTON, the capital of the island of St. Vincent's, in the West Indies, situate at the head of a bay of the same name, on the S.W. shore of the island, in St. George's parish. It has a government house, botanic garden, and a court-house. *Pop.* 5,000. *Lat.* 13° 6′ N. *Lon.* 81° W.

KINGSTON, a town of Upper Canada, in British N. America, standing at the E. extremity of Lake Ontario, 150 miles from Toronto. It is regularly built, and covers a large surface. Its harbour is one of the best on the lake, which enables it to be the entrepôt of the trade between Upper and Lower Canada. Since the opening up of internal canals, however, its carrying trade has much declined. *Pop.* 15,000, but increasing. *Lat.* 44° 8′ N. *Lon.* 76° 40′ W.

KINGSTON, the name of numerous townships in the United States. There are two in New Hampshire, one in Massachusetts, two in Rhode Island, one in New Jersey, one in Pennsylvania, two in Maryland, &c. None of them has a population above 12,000.

KINGSTON, the name of numerous parishes of England, none of them with a population above 1,000.

KINGSTON, Elizabeth Chudleigh, duchess of, a celebrated English adventuress. She was at first maid of honour to the princess of Wales, and carried on an intrigue with the duke of Hamilton. She afterwards secretly married Captain Hervey, but separated from him in a short time. Going abroad, she was well received by Frederick the Great at Berlin. On her return to England, she married the duke of Kingston, who left her a widow, with immense wealth; but the relatives of the duke prosecuted her for bigamy, and stripped her of her title; they could not, however, reclaim the great wealth which her second husband's will had given her. She went abroad a second time, and succeeded in inspiring Prince Radziwill with a lively passion. B. in Devonshire, 1720; D. near Paris, 1788.

KINGSTON-UPON-HULL. (*See* HULL.)

KINGSTON-UPON-THAMES, a market-town of Surrey, on the Thames, 10 miles from London. It is of great antiquity, and has a spacious market-place, at the north end of which stands the town-hall. The front is ornamented with a statue of Queen Anne. The church is a spacious building. On the north side of it is a large stone, on which, according to tradition, the Anglo-Saxon monarchs were placed during their coronation. The bridge here is the oldest on the Thames, except London bridge. *Pop.* 13,000.—Here, in 838, Egbert held a general ecclesiastical council, and most of the Saxon monarchs, from Edward the Elder to Ethelred, were crowned. The first armed force of the parliamentary army assembled in this town, and here the last attempt in favour of Charles I. was made.—NEW KINGSTON, a place which has sprung up round the station on the South-western Railway. It has several terraces, many villas, and some public libraries.

KINGSTOWN, a seaport-town and watering-place of Ireland, on the Bay of Dublin, 7 miles from Dublin. It is a mail-packet station for communication with Liverpool and Holyhead. *Pop.* 11,000.—There is a railway here to Dublin and Bray.

KING-TCHEOU, *king-tchou'*, a fortified city of China, in the province of Hon-pe. *Pop.* Unascertained. *Lat.* 30° 28′ N. *Lon.* 111° 37′ E.

KING-TE-CHIANG, *king'-te-che'-ăng*, a large town of China, in Kiangsee, 93 miles from Nan-tchang. It is the principal seat of the porcelain manufacture in China, for which it is said about 500 furnaces are employed. *Pop.* Unascertained. *Lat.* 29° 25′ N. *Lon.* 115° 58′ E.

KINGTON, or KINETON, *king'-ton*, the name of several parishes in England, with populations varying between 500 and 1,400.

KINKEL, John Godfrey, *kin'-kel*, a German poet and politician. When the revolution of 1848 burst forth on the continent, he was professor of philosophy at Bonn, and, declaring himself a partisan of the republicans, he was in a few months compelled to fly from Prussia; but, being taken prisoner in Baden, he was tried and sentenced to imprisonment for life. He was confined in the celebrated fortress of Spandau, but contrived to effect his escape, and reached England. In 1851 he visited America, but in a short time returned to London, where has since remained, engaged as a teacher of the German language and literature. His poetical works are exceedingly popular in Germany. He has also written several volumes of tales and sketches, a history of painting, sculpture, and architecture, and many other philosophical and historical works. B. at Obercassel, 1815.

KINNEFF with KATERLINE, *kin'-nef*, a parish of Kincardineshire, Scotland, 6 miles from Stonehaven. *Pop.* 1,200.—Under the pulpit of the church of Kinneff, the regalia of Scotland were, during the invasion of that country by the English, long concealed in safety.

KINNOUL, *kin-nool'*, a parish of Perthshire, Scotland, on the bank of the Tay, opposite Perth. *Pop.* about 3,500, mostly in the village of Bridgend, a suburb of Perth.

KINROSS, *kin-ros'*, the county town of Kinross-shire, on Loch Leven, 14 miles from Perth. It has a county-

hall, town-hall, and two libraries. *Manf.* Cottons, tartan shawls, and damasks. *Pop.* 3,400.

KINROSS-SHIRE, the smallest county of Scotland, bounded on the N. and W. by Perthshire, and on the S. and E. by Fifeshire. *Ext.* Its greatest length from east to west is 13 miles, and its greatest breadth, from north to south, about 11 miles. *Area*, about 70 square miles. *Desc.* The middle part of this county is occupied by Lochleven lake, from the banks of which the ground rises gently towards the north; but towards the south the rise is more abrupt and rugged. The soil in the low grounds is inclined to clay, and is well adapted for all kinds of crops. In the more elevated parts it is light and scanty, and in the hilly districts moorish and barren. Agriculture is greatly attended to. Lochleven lake is chiefly supplied by three small streams, the North and South Quiech, and the Garney. It gives rise to the river Leven. *Manf.* Unimportant. *Pop.* 9,000. The antiquities in this county are numerous and interesting. In the castle of Lochleven, Mary queen of Scots was a prisoner for some time.

KINSALE, *kin-sail'*, a town of Ireland, in the county of Cork, on a bay at the mouth of the river Bandon, 13 miles from Cork. The bay forms a fine harbour, called the Harbour of Kinsale, which is protected by a regular fort, begun by the earl of Orrery, in 1670. The town is built under Compass Hill, the chief street running round the hill, with others above it, communicating by steep lanes. The harbour is compact, secure, and capacious. The principal buildings are, the parish church, town-hall, convent, assembly-rooms, hospital, baths, a barracks, and a gaol. The fisheries are valuable, and are the principal dependence of the people. *Pop.* about 6,000.—This place gives title to the De Courcy family, whose representative has the privilege of wearing his hat in the royal presence. Kinsale was, in 1601, taken by the Spaniards, and in 1608 King James II. landed here. Its foreign commerce is now chiefly transferred to Cork, which it supplies most largely with fish.

KINTYRE. (*See* CANTYRE.)

KIONG-TCHOU, *ke'-ong-tchou'*, a maritime city of China, the capital of the island of Hai-nan, on its E. coast. It is inclosed by walls, and has a considerable trade. *Pop.* 100,000.

KIPPINGIUS, Henry, *kip-ping'-i-us*, a learned German Lutheran. After completing his education at the university of Rostock, he was pressed for a soldier; but a Swedish counsellor of state observing him with a Latin book in his hand, took him from the army, made him his librarian, and procured him the place of sub-rector of the university of Bremen. He wrote a supplement to the History of John Pappus; a "Treatise on Roman Antiquities;" and another on the Creation. D. 1678.

KIPPIS, Andrew, *kip'-pis*, an English Unitarian divine and biographical writer, who was educated under Dr. Doddridge, at Northampton. His first settlement as a minister was at Boston, in Lincolnshire, in 1746; thence he removed to Dorking, in Surrey, in 1750, and in 1753 became pastor of a congregation in Prince's Street, Westminster. He was a writer in the "Monthly Review" for some time, and in 1761 had a share in a periodical work, called the "Library." In 1777 he became the editor of the new edition of the "Biographia Britannica," in which capacity he greatly distinguished himself. Five volumes of this work were published in his lifetime, and the greatest part of the sixth was prepared before his death. In 1788 he published the "Life of Captain Cook," in one volume, and the same year, a "Life of Dr. Lardner." Dr. Kippis also wrote the "History of Knowledge," and a variety of other pieces, particularly sermons and tracts. He received the degree of D.D. from the university of Edinburgh, and was a fellow of the Royal and Antiquarian societies. He was an intelligent and industrious writer, and his style is pure and perspicuous. B. at Nottingham, 1725; D. 1795.

KIRBY, *kir'-be*, the name of several parishes in England, none of them with a population above 2,500.

KIRBY, Rev. William, an eminent English naturalist. His first lessons in natural history were derived from his mother, who came of a good Suffolk family, by name Meadows. This estimable woman laid before her youthful son a collection of shells and field-plants, and the early love for nature thus imbibed, lasted throughout Mr. Kirby's life, and led him to become one of the first English naturalists. He received his education at Caius College, Cambridge, and entered upon holy orders in 1782. Up to this period, although he had been a diligent botanical observer, he had paid scarcely any attention to entomology. To this science his notice was attracted by accident. In 1835 he thus described the circumstance in a letter to a friend:—"About half a century since, observing accidentally, one morning, a very beautiful golden bug creeping on the sill of my window, I took it up to examine it, and finding that its wings were of a more yellow hue than was common to my observation of these insects before, I was anxious carefully to examine any other of its peculiarities; and finding that it had twenty-two beautiful clear black spots upon its back, my captured animal was imprisoned in a bottle of gin, for the purpose, as I supposed, of killing him. On the following morning, anxious to pursue my observation, I took it again from the gin, and laid it on the window-sill to dry, thinking it dead; but the warmth of the sun very soon revived it; and hence commenced my further pursuit of this branch of natural history." From this period he became an earnest student of entomology. In 1788 he was nominated one of the original members of the Linnæan Society, to which, in 1793, he forwarded his first paper, entitled, "A Description of three New Species of Hirudo." He furnished to the Transactions of the same learned body a succession of valuable papers during the ensuing four years. In 1802 he published his first separate work, "A Monograph concerning English Bees," which, from the novelty of its observations, and the lucid style in which they were conveyed, excited the liveliest interest in the entomological world. In 1805 he made the acquaintance of Mr. Spence, and the friendship subsisting between these two gentlemen led to the production of a work on natural history, which ranks among the best contributions to the popular science of England. This was the celebrated "Introduction to Entomology," which model scientific work was completed in 1826. In 1830, when 70 years of age, he wrote his "Habits and Instincts of Animals," one of the well-known Bridgewater treatises. Mr. Kirby also wrote the descriptions of insects contained in Captain Parry's "Voyage for the Discovery of the North-west Passage," and likewise those found in the "Zoology of the Northern Parts of British North America." In addition to these, he, throughout his long life, furnished many of the learned societies with papers on his favourite study. He was honorary president of the Entomological Society, fellow of the Royal and Geographical societies, and corresponding member of many scientific bodies on the continent and in the United States. His life, written by the Rev. John Freeman, was published in 1852. B. in Suffolk, 1759; D. 1850.

KIRCH, Mary Margaret, *keersh*, a learned German lady, distinguished for her skill in astronomy. She married M. Godfrey Kirch, an astronomer, and assisted him in his observations, and in the calculation of his Ephemerides. When the king of Prussia founded the Academy of Sciences at Berlin, in 1700, M. Kirch was appointed astronomer, with a pension. There his lady acquired the friendship and admiration of all the learned men. In 1702 she discovered a comet, of which her husband published the observations. In 1707 she made a discovery of a remarkable aurora borealis, of which mention was made by the Academy of Sciences at Paris. In 1711 she published a discourse on the approaching conjunction of Saturn, Jupiter, &c. D. near Leipsic, 1670; D. at Berlin, 1720.

KIRCHBERG, *keersh'-bairg*, the name of several towns and places in Germany, none of them with a population above 4,500.

KIRCHER, Conrad, *keersh'-er*, a Protestant divine of Augsburg, who, in 1602, published a Greek Concordance of the Old Testament, inserting therein the Hebrew words alphabetically, and under them the corresponding Greek words.

KIRCHHEIM, *keersh'-hime*, the name of several towns in Germany, none of them with a population above 5,000.

KIRCHHEIM-POLAND, a town of the Bavarian circle of the Rhine. *Pop.* 2,000.

KIRCHMAN, N., *keersh'-man*, a Russian professor of philosophy, celebrated for his electrical experiments, and particularly for the manner of his death. Being engaged near St. Petersburg in attracting, with apparatus, the electric fluid from the clouds, a ball of fire struck him on the head and killed him on the spot, in 1753.

KIRDFORD, *kird'-ford*, a parish of Sussex, 5 miles from Petworth. *Pop.* 2,000.—In its neighbourhood are quarries of "Petworth" marble, which consists of petrified periwinkles.

KIRENSK, *ke-rensk'*, a town of Asiatic Russia, in the government of Irkutsk, on the Lena, 410 miles from Irkutsk. It stands nearly 800 feet above the level of the sea, and has several churches and schools. *Pop.* 1,500, mostly employed in hunting and fishing.

KIRGHISES, or KIRGUIS, *kir'-ge-sees*, a numerous and widely-extended people of Independent Tartary, occupying a great part of the southern frontier of Asiatic Russia. The area over which they extend is estimated at 1,530,000 square miles, chiefly composed of barren plains, and abounding in salt lakes, some of which are 100 miles in length. The Kirghises are a Mongol race, divided into hordes, and numbering about 250,000. Their country lies between *lat.* 44° and 55° N., *lon.* 53° and 82° E.

KIRIA, or KERREA, *keer'-e-a*, a town of Chinese Turkestan, 130 miles from Khotan. Near it are gold-mines, wrought by the Chinese government. *Pop.* Unascertained.

KIRILOV, *kir'-i-lof*, a town of European Russia, in the government of Novgorod. It is surrounded by lakes, and, by means of a canal, is united to the basins of the Volga and the Dwina, through the Suchona and Sheksna rivers. *Pop.* 2,200.

KIRK, *kirk*, the prefix of numerous towns and parishes in Great Britain, generally with populations not above 2,000.

KIRK, Colonel, an English officer, notorious for his brutality. Being sent against the followers of the duke of Monmouth in 1685, he committed great barbarities in the west of England. James II. solicited him to turn Catholic, but Kirk roughly replied, "that when he was at Tangiers he had promised the dey that, if he ever changed his religion, he would turn Mahometan." He afterwards served in the army of William III. D. at the close of the 17th century.

KIRKALDY, *kir-ka'-de*, a royal burgh of Scotland, in Fifeshire, on the north coast of the Firth of Forth, and stretching along the shore of a bay of the same name, 6 miles from Burntisland. It is irregularly built, consisting of one principal street, nearly two miles in length, having lanes opening from it on each side, and several streets, built on a uniform plan, running parallel to it. Every exertion has been made to correct the original defect of the street, which seems to have been built according to the curvature of the shore. The only public buildings worthy of notice are the church, the town-house, and a handsome structure containing assembly-rooms, library, Masonic lodge-room, &c. *Manf.* Checks, sheetings, dowlas, tull, sail-cloth, and cottons. There are tan-works, salt-pans, a foundry; and shipbuilding is carried on, but not to a great extent. *Pop.* 10,500.—Kirkaldy is the birth-place of the celebrated Dr. Adam Smith. (*See* SMITH.)

KIRKBURTON, *kirk-bur'-ton*, a township of the West Riding of Yorkshire. *Pop.* 2,400.

KIRKBY, *kirk'-be*, the name of numerous parishes in England, with populations varying between 500 and 6,000.

KIRKBY-MALLERY, a parish of Leicestershire, 5 miles from Hinckley. *Pop.* 27,000.

KIRKCUDBRIGHT, or the STEWARTRY OF KIRKCUDBRIGHT, *kir'-kud-brite* (*kir-kw'-bre*), a county of Scotland, comprehending the E. district of Galloway, and bounded on the N.E. and E. by Dumfriesshire, where the rivers Cairn and Nith form its boundary; S. by the Solway firth and the Irish Sea; W. by Wigtonshire, where the Cree is the boundary; and N.W. by the county of Ayr. *Area*, estimated at 855 square miles. *Desc.* Exceedingly diversified, and presenting a continual succession of hills, more or less abrupt. On these, the land is, for the most part, capable of tillage; but it is only in a few places that it presents a smooth and uniformly arable surface. The shire, however, though broken into inequalities, has no great elevation above the level of the sea; but the stewartry swells into mountains of large dimensions. Of these, Cairnsmoor and Wigton Bay and Blacklay attain respectively the height of 2,329 and 2,890 feet. Considerable tracts of smooth unbroken land are everywhere interspersed among the more elevated parts, and much of it is also composed of smooth rounded hills, which are frequently extremely barren. The moorlands, also, which form a considerable proportion of the county, are extremely barren, though there are detached tracts of alluvial soil interspersed. *Rivers.* The principal are the Cree, on the W.; the Fleet, the Dee, formed by the union of the Ken, Deugh, and Dee; and the Orr, or Urr. The lakes are numerous. *Pro.* Wheat, barley, oats, potatoes, and turnips. The pastures are excellent; and the Galloway breed of cattle is reared and fattened for export. Southdown and Cheviot sheep are also numerous on the mountains. The shire is famed for its honey. *Manf.* Unimportant. *Pop.* 4,500.

KIRKCUDBRIGHT, the chief town of the above county, on the Dee, about 6 miles above its confluence with the Solway firth, and 28 miles from Dumfries. It is neatly built, and has a large and elegant court-house, a gaol, library, custom-house, and various schools. The harbour is the most commodious on the south coast of Scotland. *Manf.* Cottons; and shipbuilding is carried on to some extent. *Pop.* 3,555. Kirkcudbright was erected into a royal burgh by King James II., in 1455. It communicates by steamboat with Liverpool.

KIRKDALE, *kirk'-dail*, a township of Lancashire, 2 miles from Liverpool, in which borough it is included. *Pop.* 7,000.—Another in the N. Riding of Yorkshire, near which there is a cave, where numerous bones of tigers, elephants, and hyenas were discovered in 1820. *Pop.* 1,000.

KIRKINTILLOCH, *kir'-kin-til'-lok*, a town and parish of Scotland, 6 miles from Glasgow. The town has a court-house and a gaol. *Manf.* Hats and cottons. *Pop.* of parish, 8,500; of town, 6,400.

KIRK-KILISSA, *kirk ki-lis'-sa*, a ruinous town of European Turkey, 30 miles from Adrianople. It is inclosed by walls, and has many mosques and baths. *Pop.* about 20,000.

KIRKLAND, Thomas, *kirk'-land*, an eminent physician. He published an "Enquiry into the State of Medical Surgery," a "Treatise on Child-bed Fevers," "Thoughts on Amputation," and a "Commentary on Apoplectic and Paralytic Affections." B. 1721; D. at Ashby-de-la-Zouch, Leicestershire, 1798.

KIRKLAND, Mrs. Caroline Stansbury, an American novelist. She is the wife of Mr. William Kirkland, a critic of some celebrity in the United States, and was engaged, in 1847, to edit "Sartain's Magazine," which was published first at New York, and afterwards at Philadelphia. Subsequently, Professor Hart became her assistant in the direction of that periodical. Her principal works, for the most part characterized by an acute perception, richness of observation, and a light and somewhat sarcastic turn of thought, are—"The New Home," published in 1839; "Forest Life," published in 1842; "Western Clearings;" "Essay on the Life and Writings of Spenser;" "Holidays Abroad, or Europe from the West;" and "The Evening Book;" these latter appearing at intervals of about two years. She is also the authoress of a volume designed for youthful reading, entitled "A Book for the Home Circle." B. at New York, about 1815.

KIRKMAHOE, *kirk'-ma-ho*, a parish of Scotland, 4 miles from Dumfries. *Pop.* 2,300. On a lake in this parish the first boat ever propelled by steam was tried in 1788. It was the invention of Patrick Millar, of Dalswinton.

KIRKMICHAEL, *kirk-mi'-kel*, the name of several parishes in Scotland, none of them with a population above 3,500.

KIRKPATRICK, *kirk-pät'-rik*, the name of several parishes in Scotland, none of them with a population above 1,700.

KIRKSTALL, *kirk'-stall*, a small village of Yorkshire, 3 miles from Leeds. *Pop.* 3,000.

KIRKWALL, *kirk'-waul*, a royal burgh of Scotland, and the chief town of the stewartry of Orkney, in the

island of Pomona, built on a neck of land projecting into the sea, 26 miles from John o' Groat's. It is nearly a mile long, but is of inconsiderable breadth, having only one street, which is narrow and inconvenient, and badly paved. Its cathedral, or church of St. Magnus, is a Gothic building, founded, it is said, by Rognwald, count of Norway, in the year 1138. Opposite to it stood the ruins of the king's castle, also the ruins of a building called the Earl's Palace, and almost adjoining to it is the bishop's palace, a ruin of very great antiquity. Its principal modern buildings are a town-hall, assembly-rooms, gaol, custom-house, museum, libraries, and a grammar-school. *Manf.* Linen and straw plait, with a trade in beef, fish, butter, hides, tallow, feathers, and some corn. The harbour is excellent. *Pop.* 3,500.—This place is the seat of the superior courts of law for Orkney, and is in steam communication with Leith, Aberdeen, Wick, and Lerwick.

KIRRIEMUIR, *kir'-re-mure'*, a town and parish of Scotland, in Forfarshire, on a hill, from which there is an extensive view of the vale of Strathmore, 5 miles from Forfar. It has a parish church, an episcopal chapel, with a handsome spire, two libraries, a trade's-hall, and numerous schools. *Manf.* Linen sheeting and dowlas. *Pop.* 4,000.

KIRSTENIUS, Peter, *kir-ste'-ni-us*, an eminent physician, and professor of medicine at Upsal, in Sweden. In addition to his native tongue, he is said to have understood twenty-five other languages. B. at Breslau, Silesia, 1577; D. 1640.

KIRWAN, Richard, *kir'-wan*, a chemical philosopher. Shortly after concluding his education at the Jesuits' College of St. Omer's, he inherited his family estate, and thenceforth devoted his life to chemical science. He was elected fellow of the Royal Society in 1780, and was subsequently nominated president of the Royal Irish Academy. He was also a member of nearly all the learned societies of Europe. His chief works were "An Essay on the Constitution of Acids," "Geological Essays," and "An Essay on the Analysis of Chemical Waters." B. in Ireland, about 1750; D. 1812.

KISARIA. (*See* CÆSAREA.)

KISCHENAU, *keesh'-nou*, a town of Moldavia, on the Dniester. *Pop.* Unascertained. *Lat.* 46° 40′ N. *Lon.* 29° 25′ E.

KISHENGURH, *kish-en-gur'*, a state in Rajpootana, India, with an area estimated at 724 square miles, and a population at 70,000. *Lat.* between 25° 50′ and 26° 50′ N. *Lon.* between 74° 50′ and 75° 15′ E.

KISHME, or KISMIS, *kish'-me*, called also Jezira Derauz (Long Island), an island in the Persian Gulf, surrounded by many smaller islands, 15 miles from Ormuz. *Ext.* 60 miles long and 12 broad. *Pop.* 5,000. *Lat.* 26° 57′ 30″ N. *Lon.* 56° 50′ E.

KISS, Augustus, *kiss*, a German sculptor. He studied under Rauch, the eminent sculptor, and first attracted notice by his colossal group, the "Amazon attacked by a Tiger," which was cast in bronze by public subscription in Germany. A copy of this work formed one of the chief attractions in the Great Exhibition of 1851. He is professor of sculpture in the Royal Academy of Berlin; his fame as an artist, however, is greater in that city than in other countries. B. at Pless, Upper Silesia, 1802.

KISSER, *kis'-ser*, an island of the Malay Archipelago, lying to the N. of Timor. It has a circumference of about 20 miles and a population of 8,000.

KISTNA, or KRISHNA, *krish'-na*, a celebrated river of India, rising in the Western Ghauts, near *lat.* 18° N. and *lon.* 74° E., and after receiving numerous tributaries and pursuing a course of 800 miles, falling, by various mouths, into the Bay of Bengal, in *lat.* 15° 50′ N., *lon.* 81° E.

KIT'S-COT-HOUSE. (*See* AYLESFORD.)

KITTO, John, *kit'-to*, a modern English writer, chiefly known as the editor of "Knight's Pictorial Bible." In his earliest years he displayed great aptitude for acquiring knowledge. His father had been a respectable builder, but was reduced to the condition of a journeyman mason, in which labour young Kitto assisted him. In his 13th year, he had the misfortune to fall from a high scaffold, and, after suffering for some time from its effects, he remained permanently deaf. Owing to the intemperate habits of his parent, his after-years were spent in great destitution. He contrived to acquire knowledge, however, and, in 1823, he contributed some essays to the "Plymouth Journal;" and in the following year Mr. Grove, a dentist of the town, took him into his service. He was afterwards sent out, as a printer, to Malta, having previously been taught the trade in the Missionary College at Islington. His constitution being too weak for this work, he returned to England in 1829, and, in the same year, he accompanied Mr. Grove in an extensive Eastern tour. He visited St. Petersburg, Astrakan, the Calmuck Tartars, the Caucasus, Armenia, Persia, and Bagdad, returning home in 1833. In that year he obtained an introduction to Mr. Charles Knight, by whom he was subsequently engaged to edit the "Pictorial Bible," the "Pictorial History of Palestine," and other works. He also wrote for the same publisher "The Lost Senses—Deafness and Blindness," &c. He was attacked by a paralytic stroke in 1854, and became greatly embarrassed in his means. A pension of £100 per annum was accorded him in 1850, whereupon he retired to Germany to recruit his health. B. at Plymouth, 1804; D. at Cannstadt, Würtemberg, 1854.

KITTS, ST. (*See* ST. CHRISTOPHER'S.)

KIZILAR, *kiz'-i-lar'*, a fortified town of the government of Caucasus, in Asiatic Russia. It stands on the Terek, at a distance of about 50 miles from its mouth. *Manf.* Cotton and silk fabrics, and it has an active trade in wine. *Pop.* about 10,000.

KIZILERMAK, *ke'-zil-er-mak'*, a large river in Asia Minor, rising by several heads in the centre of that peninsula, and, after a course of 500 miles, falling into the Black Sea. *Lat.* 41° 30′ N. *Lon.* 36° 10′ E.

KIZIL-OUZEN, *kiz'-il-oo'-zen*, a river of Persia, rising near Senna, and, after a course of 300 miles, falling into the Caspian Sea, 30 miles from Reshd.

KJOBENHAON. (*See* COPENHAGEN.)

KLAGENFURT. (*See* CLAGENFURT.)

KLAPKA, George, *klap'-ka*, a distinguished Hungarian general. He acquired a knowledge of the art of war in the military college of Vienna, and served, in various grades, with the Austrian army; but, on the outbreak of the Hungarian revolution, in 1848, he offered his sword to his countrymen. In 1849 he distinguished himself in the Hungarian defence of the fortress of Comorn, before which the Austrian army was defeated, with the loss of 30 pieces of artillery, 3,000 muskets, large stores of ammunition, and 2,000 head of cattle. General Klapka communicated the news of his victory to Kossuth and Görgei, but the latter had by that time capitulated, while the former had fled into Turkey. He, however, made terms with Haynau, the Austrian general, by which all the gallant defenders received a safe-conduct to go whither they pleased. He went first to England, and afterwards to Switzerland. He published, in 1850, "Memoirs of the War of Independence in Hungary." On the outbreak of the Crimean war, Klapka went to the East; and on his return, after the taking of Sebastopol, he produced a work, entitled, "The War in the East, from the Year 1853 to July, 1855." B. at Temeswar, in Southern Hungary, 1820.

KLAPROTH, Martin Henry, *klap'-rot*, an eminent German chemist. He greatly advanced the science of mineralogy by his discoveries; and, for his distinguished services as an analytical chemist, was, in 1788, elected member of the Berlin Academy of Sciences: he had previously been appointed professor of chemistry in the Royal Mining Institute. In addition to 207 treatises on mineralogy and chemistry, he published a Chemical Dictionary, in conjunction with Professor Wolff. B. at Wernegerode, Upper Saxony, 1743; D. at Berlin, 1817.

KLAPROTH, Julius Heinrich, von, a distinguished German Oriental scholar. He was son of the preceding, who desired to educate him for his own profession; but he evinced little inclination for chemistry, or, indeed, for any science. When about 15, he was examined with his fellow-pupils of the college of Berlin; he was found so backward in his studies, that one of the professors cried out, "Why, you know nothing at all!" "Beg your pardon," he answered, "I know Chinese." It was subsequently discovered that he had learnt Chinese without any assistance whatever; and his father becoming reconciled to his son's pursuing his

favourite studies, he was sent, in 1801, to the university of Halle to acquire the classical languages. His fame as an Oriental scholar led to his being employed by the emperor Alexander of Russia. He went to St. Petersburg in 1805, and, after receiving several marks of favour, was sent, as interpreter, in the suite of the ambassador to China. The embassy had not proceeded more than 200 miles across the Chinese frontier, when they were detained, and finally informed by messengers from Pekin, that the court did not wish to see them. Klaproth did not return direct to the Russian capital with the other members of the embassy, but travelled alone through Southern Siberia. In 1807 he arrived at St. Petersburg, and was soon afterwards sent to the Caucasian provinces on a scientific mission. He came back, with a large store of knowledge, in 1809. He went to Berlin in 1811, avowedly for the purpose of superintending the casting of types for the printing of his Chinese books; but it was generally known at the time, that he had incurred the displeasure of the czar. The following year he resigned his Russian appointments. After wandering about Germany for some time, he visited Napoleon, for whom he had great admiration, in exile at Elba. The emperor promised him an appointment, which he afterwards forgot to fulfil. Klaproth was after this reduced to straitened circumstances, but, through the influence of Wilhelm von Humboldt, he became royal professor of Oriental languages and literature to the king of Prussia, a post which was accompanied by a liberal pension. Klaproth was, moreover, allowed to live in Paris: there he commenced the publication of a long list of works on Oriental learning, of the greatest possible value, which it is said would fill more than thirty volumes. At his death, he left behind, "A Geographical, Statistical, and Historical Description of the Empire of China," which was to have been published in French and English, but has not yet appeared. Klaproth was one of the greatest linguists that ever existed. B. at Berlin, 1783; D. at Paris, 1835.

KLATTAU, *klat-tou*, the chief place of a circle of the same name, in Bohemia, 69 miles from Prague. *Manf.* Woollen cloth and stockings. *Pop.* 7,000.

KLAUSENBURG. (*See* CLAUSENBERG.)

KLAUSTHAL. (*See* CLAUSTHAL.)

KLEBER, J. B., *klā'-bair*, a French general. He was educated as an architect, and sent to Paris for improvement in his profession. Being in a coffee-house where some strangers were insulted, he took their part with so much spirit, that they prevailed on him to accompany them to Munich, where Kaunitz, son of the Austrian minister, gave him a lieutenancy in his regiment. After eight years' service, he returned to his own country, and became inspector of public buildings in Upper Alsace. The revolution in France rekindled his military ardour, and he obtained a commission in that service. He displayed great skill and bravery at the siege of Mayence, after which he was employed in La Vendée; but the sanguinary scenes enacted there so disgusted him, that he obtained his recall, and was engaged in the north, where he defeated the Austrians, took Mons, and drove the enemy from Louvain; he also captured Maestricht, and contributed to the taking of Dusseldorf and Frankfort, and to the victory of Butzbach. Discontented with the Directory, he left the army, and returned to Paris, where he led a private life, writing his Military Memoirs, till Bonaparte being appointed general of the army of Egypt, chose Kleber as his companion. At the seige of Alexandria he was wounded in the head, while scaling the ramparts, but did not retire till he received a second wound. He defeated the Turks in several actions, and Bonaparte, on quitting Egypt, left Kleber in the chief command. Soon afterwards he signed the treaty of El-Arish with Sir Sydney Smith, by which the French agreed to leave Egypt; but it was annulled by the British government, and hostilities were renewed. Kleber, though greatly reduced, opposed to his unfavourable circumstances a determined mind, and defeated the Turks at the obelisk of Heliopolis. He next took Cairo by storm, and formed an alliance with Murat Bey; but was assassinated by a Turkish fanatic at Cairo in 1800. B. at Strasburg, where there is a statue to his memory, 1754.

KLEIN, John Theodore, *kline*, a German naturalist, who published a "Natural History of Fishes and of Birds." He was also secretary of the senate of Dantzic. B. at Königsberg, 1685; D. 1759.

KLEIST, Ewald Christian de, *kliste*, a Prussian officer and poet. He served under Frederick II.; and, although he only cultivated literature during the leisure allowed by his military employments, he acquired a great poetical reputation. He published, in 1756, a collected edition of his poems. He likewise wrote some reflections on the art of war, which appeared in 1759. B. at Zeblin, Pomerania, 1715; killed at the battle of Kunersdorff, 1759.

KLEIST, Henry, a German dramatic author, who served for some time in the Prussian army, but was afterwards employed at Berlin in a civil capacity. His most celebrated play is "Catherine of Heilbronn;" he also wrote poems and a collection of stories. B. 1777; D. 1811.

KLENZE, Leo von, *klain'-tse(r)*, a distinguished German architect. He studied his profession at Berlin, and afterwards went on a tour to France and Italy. While at Genoa he became acquainted with a distinguished lover of art, who introduced him to Jerome, king of Westphalia, whose court architect he became. In 1813 he went to Munich, and there attracted the notice of Ludwig, crown prince, and afterwards king, of Bavaria, who invited him to stay in that city, and appointed him court architect. Ludwig was a great lover of classical architecture, in which Klenze excelled, and he commissioned his protégé to prepare designs for the Walhalla, or Hall of Heroes, and for the Glyptothek; these works, however, were not commenced till after Ludwig had ascended the throne of Bavaria. This event took place in 1825, and from that time Klenze was constantly employed in designing one great structure after another, to adorn the great art-capital, Munich. The Glyptothek was finished in the year 1830, the Walhalla being commenced immediately afterwards. He was about the same time appointed president of the council for buildings, a privy councillor, and raised to noble rank. He subsequently built the War Office, the Odeon, the palace of Prince Maximilian, and two new wings to the palace of the king, the street in Munich called "Linden-strasse," and many edifices, public and private. He was likewise the architect of the New Imperial Museum at St. Petersburg. In 1834 he was invited to Athens to improve King Otho's capital. On his return he published a series of designs of Greek architecture. He is a member of almost every artistic academy in Europe. B. at Hildesheim, 1784.

KLEVE. (*See* CLEVES.)

KLIASMA, *klē'-as-ma*, a river of Russia, rising near Klin, and, after a course of 350 miles, joining the Oka at Gorhatov.

KLINGENSTIERNA, Samuel, *kling'-en-ste-air'-na*, a Swedish mathematician, who was intended for the profession of the law, but abandoned that pursuit for mathematics. He made a tour of study in Germany and France, between the years 1727 and 1730, and, soon after his return, was appointed professor of mathematics, and tutor to the prince-royal of Sweden. In 1762 was published, at St. Petersburg, a treatise on the means of correcting the aberrations of light in achromatic telescopes, a valuable scientific contribution which the Swedish astronomer had sent to the Russian capital. He afterwards made a number of experiments on the same subject, transmitting an account of them to England. These papers enabled Mr. Dollond to discover a combination of flint and crown-glass lenses, which, by correcting the aberration of light in chromatic telescopes, greatly perfected that valuable philosophical instrument. He published an edition of Euclid's "Elements," a Swedish translation of Musschenbrook's "Treatise on Physics," and two scientific discourses. He was a member of the Royal Societies of Upsal, of Stockholm, and of London. B. at Tolifors, near Linkooping, 1689; D. at Stockholm, 1785.

KLINGSTADT, *kling'-stat*, an eminent miniature painter, who excelled in making designs for snuff-boxes, for which he received extravagant prices. B. at Riga, 1657; D. at Paris, 1734.

KLOPSTOCK, Frederick Gottlieb, *klop'-stok*, a distinguished German poet. While at school, during his earliest years, his poetical talents were evinced, and

he formed the idea of writing a long epic poem. He received a classical education at Naumburg, and studied theology at Jena, in 1745. Three years afterwards, he commenced his epic poem, the subject being "The Messiah." He at first published only three cantos of the work, and the reception they obtained was very extraordinary: while they were universally read, the author was regarded by some as a modern type of the old prophet, and by the rest as an irreverent and presumptuous writer upon a sacred subject. In 1750 he went to Switzerland, where he was received as a great poet. The Danish minister Bernstorff having read the three cantos of Klopstock's poem, invited the poet to Copenhagen, offering him a pension of 400 dollars, in consideration of his residing in that city and there finishing his epic. In 1751 he set out for Copenhagen, and was received with the greatest respect; subsequently, he accompanied the king, Frederick V., on his travels. In 1754 he settled in Hamburg, where he married. He resided in several parts of Germany during the remaining years of his life, and completed his "Messiah" at Hamburg, in 1771. Besides that epic poem, he wrote odes, dramas, and other poetical pieces; but his writings are not now held in that extraordinary estimation which was formerly the case. B. at Quedlinburg, 1724; D. 1803.

KMETY, George, *met'-e*, an Hungarian general. He studied at the Protestant college of Presburg; but, by a mistake, lost a German scholarship it had been his ambition to obtain. Thereupon he entered the Austrian army as a private soldier; but when the Hungarian revolution broke forth, in 1848, he had attained the grade of commissioned officer. Throughout the great struggle maintained by his countrymen in their efforts to gain independence, he figured as a brave and scientific officer; but when Görgei surrendered, with the entire corps under his command, he fled into Turkey, where he became a Mussulman, and adopted the name and title of Ismail Pacha. At the memorable defence of Kars he commanded the Turkish army; and his bravery and skilful dispositions contributed in a great measure to the repulse which the Russian army at first sustained. B. in Hungary, 1810.

KNAPTON, George, *năp'-ton*, an English portrait-painter in crayons, was the pupil of Richardson, and surveyor and keeper of the king's pictures. B. 1698; D. at Kensington, 1778.

KNARESBOROUGH, *nairs'-bur-o*, a well-built market-town of the West Riding of Yorkshire, on the Nid, 16 miles from York. Its principal public buildings are, a parish church, and other places of worship, a market-house, court-house, a public library; and it has several schools. *Manf.* Chiefly linens. *Pop.* 5,500. There is a famous "dripping well" by the banks of the river, the waters of which have a singularly petrifying quality. It is a station on the Leeds and Thirsk Railway.

KNARESBOROUGH FOREST extends from the above town 20 miles, and has a breadth of 8. It has, from the time of Edward III., belonged to the duchy of Lancaster.

KNARESDALE, *nairs'-dail*, a parish of Northumberland, 16 miles from Hexham. *Pop.* 1,000.—The FOREST of Knaresdale at one period abounded with red deer, and a few still remain.

KNELLER, Sir Godfrey, *nel'-ler*, an eminent painter, was educated at Leyden for the military profession, but having a strong inclination to drawing, he resolved to apply himself to painting. He studied first under Rembrandt, and afterwards went to Rome, at which place he greatly improved himself, and then visited England, where he soon acquired unrivalled distinction as an artist, becoming state painter to Charles II. and James II. William III conferred on him the honour of knighthood, and the university of Oxford the degree of LL.D. He painted a prodigious number of portraits of illustrious personages, and to a striking likeness he always added grace and elegance in his subjects. He was created a baronet by George I., and the emperor Leopold gave him a patent of nobility. B. at Lubeck, 1648; D. in London, 1723.

KNIGHT, Samuel, *nite*, a learned English divine, who was educated at St. Paul's School, whence he removed to Trinity College, Cambridge. He obtained several church preferments, and was chaplain to George II. He wrote the lives of Dr. Colet and Erasmus. D. 1746.

KNIGHT, Charles, a modern English author and publisher, distinguished for his services as a projector and producer of cheap and valuable literature. His father had for many years conducted business as a bookseller at Windsor, and on his death Charles Knight succeeded him. He for some time published the "Etonian," a periodical which contained the contributions of the best scholars educated in the great public school of that town. The success of this work encouraged Mr. Knight to establish in the metropolis a magazine on a more ambitious plan. This was the origin of "Knight's Quarterly Magazine," to which Macaulay, then a young man fresh from college, contributed. Mr. Knight next published the "Penny Magazine," "Penny Cyclopædia," in 1827, and other works, unique in their day for their extensive, exact, and generally excellent contents, no less than for the lowness of price at which they were issued to the public. An exceedingly large circulation was obtained for these productions, which were admirably suited at once to gratify the intellectual appetite of thousands of readers, and to stimulate their minds into a desire for more of the same character. Such was the inestimable purpose and effect of books that have contributed to establish, as a great English institution, cheap and pure literature. Mr. Knight also published many more works of a like value; such as the "Pictorial History of England," the "Pictorial Bible," the "Pictorial Shakspere," and the "Cyclopædia of London." Lord Brougham, Mr. Lane, Professor Long, and many other eminent men, wrote treatises, &c. for "Knight's Shilling Volumes," which, for some time, appeared weekly. Mr. Knight is himself an agreeable writer, and has reprinted his contributions to various periodicals, under the title of "Once upon a Time," "The Old Printer and the Modern Press," &c. His Life of Shakspere is without a superior in English literature; while the notes to his edition of the same poet are generally admired for their good sense and learning. Against the oppressive duty on paper he has vigorously protested in his two pamphlets, "The Struggles of a Book against Excessive Taxation," and "The Case of Authors as regards the Paper Duty." When the compulsory newspaper stamp was abolished, he started a new journal, called "Charles Knight's Weekly Newspaper;" but the speculation proved unremunerative. B. at Windsor, about 1790.

KNIGHT, Richard Payne, an English philologist and writer on art. In his earliest years, his health being very delicate, his father would not allow him to be sent to school, but educated him in the rudiments of knowledge at home. He was not allowed to study either Latin or Greek, but on the death of his father he went to a grammar-school near his native place, and there made considerable progress in the former language. When he had attained to the age of 18, he began to learn the Greek language, and this pursuit, combined with the investigation of Grecian plastic art, became his chief occupation throughout his after-years. He subsequently visited Italy, where he imbibed a strong taste for the fine arts. On the death of his grandfather, he inherited a considerable estate near Ludlow. In 1780 he was sent to Parliament as member for the borough of Leominster, and in 1784 was returned for Ludlow. He became a trustee of the British Museum in 1814; ten years afterwards, he bequeathed his magnificent collection of antique art, estimated to be worth £50,000, to the Museum. Mr. Knight wrote many works on Greek literature, some of which were devoted to the task of proving that the Homeric poems are the production of a single individual. (*See* HOMER.) He also published "An Analytical Inquiry into the Principles of Taste," and a great number of volumes on fine-art subjects. B. at Wormesley Grange, Hereford, 1750; D. 1824.

KNIGHTON, *nī'-ton*, a market-town and parish of Radnorshire, 10 miles from New Radnor. *Pop.* 1,600. —The great dyke, erected in the 8th century, by Offa, as a barrier against the Britons, passes through this town.

KNIGHTSBRIDGE, *nites'-bridj*, a W. suburb of London, in Middlesex, 3½ miles from St. Paul's. The Albert gate, entering Hyde Park, and the cavalry barracks are in it.

KNOCKMELEDOWN MOUNTAINS. (*See* IRELAND.)

KNOLLES, Richard, *nols*, an English historian. In

1564, he became fellow of Lincoln College, Oxford, and afterwards master of the grammar-school at Sandwich, in Kent. He wrote the "History of the Turks." Of this book there have been several editions and continuations, particularly by Ricaut. Knolles also wrote the "Lives and Conquests of the Ottoman Kings," a "Discourse of the Greatness of the Turkish Empire," and a "Compendium of Latin, Greek, and Hebrew Grammar." B. about 1540; D. in Kent, 1610.

KNOLLES, Sir Robert, an English commander in the reign of Edward III., was of low origin in Cheshire, but being of an enterprising disposition, obtained the rank of general and the order of knighthood. His name was formidable in France, where he took several places. He was made grand-seneschal of Guienne, and by his prudence quelled an insurrection in that province. At the close of life he retired to his estate in Kent, where he built Rochester bridge. B. 1317; D. 1407.

KNOLLIS, Francis, *nol'-lis*, an English statesman. After receiving a university education, he went to court, and became a zealous partisan of the Reformation in the reign of Edward VI., at whose death he went abroad. On the accession of Elizabeth he returned, and was made a privy counsellor, and vice-chamberlain of the household. He was also employed in several important matters of state. He was one of the commissioners who sat in judgment on Mary queen of Scots; was appointed treasurer of the royal household, and knight of the Garter. He wrote a "Treatise against the Usurpation of Papal Bishops," printed in 1608. D. 1596.

KNOTT, Edward, *not*, an English Jesuit, whose real name was Mathias Wilson, entered the order of Jesuits in 1606. He taught divinity in the English College at Rome, and afterwards became provincial of his order in England. Knott was the antagonist of Chillingworth, and it was in reply to him that the latter wrote his "Religion of Protestants." D. in Northumberland, 1580; D. in London, 1656.

KNOTTINGLEY, *not'-ting-le*, a township of the West Riding of Yorkshire, 3 miles from Pontefract. *Pop.* 4,700.

KNOWLES, James Sheridan, *noles*, a modern English dramatist. His first effort at dramatic composition was made at the early age of 12 years. Two years afterwards he wrote an opera entitled the "Chevalier de Grillon," and a ballad called the "Welsh Harper." A tragedy and a drama quickly succeeded the preceding. After becoming acquainted with Hazlitt, who gave him much good advice relative to his studies, and whom Knowles terms his "mental father," the young playwright removed to Dublin, where he soon afterwards appeared on the stage, but without success. In 1809 he was engaged as an actor and vocalist in the Waterford theatre, and, Edmund Kean having joined the company, Knowles wrote a play called "Leo the Gipsy," in which Kean enacted the principal part. He published, about the same time, a volume of poetical "Fugitive Pieces." He next became a teacher of elocution at Belfast, and there produced a play called "Brian Boroihme," which was very successful. "Caius Gracchus" was also played at the same theatre, and with the greatest success. His tragedy of "Virginius" was first produced at Glasgow, and, on being performed at Covent-Garden theatre, in 1829, its author became an established writer for the stage. During the succeeding twenty years he continued to write tragedies, dramas, and comedies with great industry, and enjoyed the very highest reputation as a dramatist. The best of these plays were the "Hunchback," the "Wife, a tale of Mantua," the "Love-Chase," "Love," and the "Rose of Aragon." In 1847 he produced a novel called "Fortescue," and later, "George Lovel;" but these were very inferior to his dramatic works. In 1840 the government granted him a pension of £200 a year. Mr. Knowles subsequently became a Baptist minister, and wrote several sermons and a couple of controversial works, called the "Rock of Rome, or the Arch-heresy," and the "Idol demolished by its own Priest." B. at Cork, 1784.

KNOWLTON, Thomas, *nole'-ton*, an English botanist. He wrote several short papers on botanical science, which were inserted in the Philosophical Transactions. He likewise produced a paper concerning the situation of the ancient town of Delgoricia, another relative to two men of extraordinary bulk and weight, and a third giving an account of two extraordinary deer's horns found in Yorkshire. B. 1692; D. 1782.

KNOWSLEY, *nose'-le*, a township of Lancashire, 3 miles from Prescot. *Pop.* 1,500.—The earl of Derby has a fine seat here, where, from 1835 to 1851, a magnificent zoological collection existed.

KNOX, John, *nox*, a bookseller in London, who wrote a "Systematic View of Scotland," and planned a herring-fishery and settlement on its N.E. coast. D. 1790.

KNOX, John, the celebrated Scotch reformer. He received his education at the university of St. Andrew's, and entered into priest's orders before he had attained his 25th year; but an examination of the writings of SS. Augustine and Jerome is said to have occasioned his renunciation of popery. Being accused of heresy before Cardinal Beaton, he addressed to that prelate a confession of faith, which was condemned. The doctrines of the Reformed religion rapidly spread throughout Scotland. Cardinal Beaton, a determined supporter of the Romish church, was murdered. Knox

JOHN KNOX.

shortly afterwards began to preach the new faith openly from the pulpit. The French fleet, with a considerable body of troops, appeared, in 1547, before St. Andrew's, and made prisoners of Knox and the other reformers who had defended the place. Knox was afterwards condemned to the galleys at Rouen, and remained there nineteen months. After his liberation, he went to England, where he was well received and made chaplain to Edward VI., who offered him a bishopric, which he declined, being averse to episcopacy and the common prayer. In the reign of Mary he went to Frankfort, where he preached the new doctrines to the English exiles. Being accused to the emperor as a seditious person, he retired to Geneva, where he was greatly esteemed by Calvin, to whose doctrines he was zealously attached. He there wrote his "Blast of a Trumpet against the Monstrous Regiment of Women." In 1559 he returned to his native country, and commenced his ministerial office at Edinburgh by denouncing the acts of the queen and clergy. His sermons produced a general commotion, and the Roman Catholic cathedrals and parish churches were not only deprived of their ornaments, but reduced almost to ruins. B. probably at Gifford, East Lothian, 1505; D. at Edinburgh, 1572.

KNOX, Rev. Vicesimus, an English writer. He pursued a brilliant career at St. John's College, Oxford, after which he became master of Tunbridge school, in Kent. He was an admired preacher in his day, and an excellent pastor. He published—"Moral and Lite-

rary Essays," in 1777; "Liberal Education; or, a Practical Treatise on the Methods of acquiring Useful and Polite Learning," in 1781; and "Elegant Extracts in Prose and Verse;" the latter enjoying the greatest popularity. He was likewise the author of several volumes of sermons and theological essays, and was an elegant and correct writer. B. in London, 1752; D. at Tunbridge, 1821.

KNOX, the name of several counties in the United States.—1. In East Tennessee, on the Clinch, and intersected by the Holston. *Area*, 445 square miles. *Pop.* 20,000.—2. In the south part of Kentucky. *Area*, 665 square miles. *Pop.* 8,000.—3. In the central part of Ohio. *Area*, 524 square miles. *Pop.* 30,000.—4. In Indiana, on the Wabash. *Area*, 496 square miles. *Pop.* 12,000. Also several townships.

KNUTSFORD, *nuts'-ford*, 'Canute's Ford,' a market-town of England, in Chester, situate on the Birken, 24 miles from Chester. *Manf.* Cotton, velvet, thread, and leather. *Pop.* 4,500.

KNUTZEN, Matthias, *noots'-ain*, a notorious atheist. He publicly defended atheism, and took journeys to make proselytes. His followers were called Conscience-diaries, because they held that there is no other deity than conscience. He wrote a letter and two dialogues in defence of his principles. D. at the close of the 17th century.

KNYGHTON, Henry, *ni'-ton*, an English ecclesiastic and historian, who wrote a "Chronicle of the English History, from 950 to 1395;" also a "History of the Deposition of Richard II." He was a canon regular at Leicester.

KOBELL, Francis de, *ko'-bel*, a German mineralogist and poet. After completing his education at the university of Munich, he was appointed, at the age of 23, assistant professor of mineralogy in that learned establishment. In 1831 he completed his work on the "Characteristics of Minerals," and since that period has produced a succession of valuable treatises on the same science. The principal of these, with the dates of publication, are—"Elements of Mineralogy," 1838; "Mineralogy," 1847; "Sketch of the Mineral Kingdom," 1850; "Mineralogical Nomenclature," 1853. For his eminent scientific services, he was appointed member of the Academy of Sciences of Bavaria, and chief conservator of the Munich mineralogical collection. His poetical efforts consist of a volume of lyrics in pure German, and several others in the Bavarian idiom, and in the patois of the Palatinate. These latter are marked by great liveliness, freshness, and grace, and are greatly admired for their piquancy both of thought and language. B. at Munich, 1803.

KOBLENTZ. (*See* COBLENTZ.)

KOCK, Charles Paul de, *kok*, a French comic novelist, the son of a Dutch banker; he was originally educated for commerce, and placed in a French banker's establishment. While thus engaged, he commenced writing, "he knew not why." He produced a great number of vaudevilles, operas, and melodramas, and afterwards wrote a novel, which being successful, the author went on writing similar works, displaying great fertility of invention in the task. During the last twenty years, he has been the author of a considerable amount of humorous fiction, which, unfortunately, is defaced by loose morality. B. at Passy, 1794.

KODIAK, *ko'-de-ak*, an extensive group of islands on the W. coast of North America, about 50 miles from the entrance into Cook's Inlet, extending about 130 miles in length, and about 50 in breadth. *Lat.* 56° 45′ to 58° 28′ N. *Lon.* 140° to 150° W.

KOENIG, Daniel, *ke(r)'-neeg*, a Swiss, who translated Arbuthnot's Tables of Coins into Latin, printed at Utrecht, in 1756. He died of the ill-usage he received from the populace of Franeker, who mistook him for a French spy.

KOENIG, Samuel, brother of the preceding, was professor of philosophy and law at Franeker, and librarian to the prince of Orange. He was a great mathematician, and had a dispute with Maupertuis. D. 1757.

KOERTEN-BLOCK, Joanna, *ker'-ten*, an ingenious Dutch lady. She had a taste for drawing in water-colours and embroidery. She also modelled in wax, and made artificial ornaments and flowers; but her principal excellence was in cutting figures out of paper with scissors, and her portraits and landscapes executed in this way became so celebrated; that foreigners visited Amsterdam to see them; among the rest, Peter the Great of Russia. She made a magnificent work for the consort of the emperor Leopold I., consisting of trees, arms, eagles, and crowns, for which she received about 4,000 guilders. She also executed the portrait of that emperor. B. at Amsterdam, 1650; D. 1715.

KOHL, John George, *kole*, a German traveller and writer, who received a legal education at Gottingen, Heidelberg, and Munich. In 1832 he became tutor in the family of Baron Manteuffel, and afterwards in that of Count Medem. He subsequently visited Courland, Livonia, St. Petersburg, Moscow, and the interior of Russia. Finally, taking up his residence at Dresden, he made tours from that city over nearly the whole of Europe. Among his most important works of travel, many of which have been translated into English, may be enumerated, "Sketches and Pictures of St. Petersburg," "Travels in Russia and Poland," "Tours in England, in Scotland, and in Ireland," "Paris and the French People," and the "Tour in Denmark and the Duchies." He is understood to be at present engaged in collecting materials for a History of the Discovery America. B. at Bremen, 1808.

KOJICK PASS, *ko'-jik*, traverses the Amran Mountains, in Afghanistan. In 1839, the British troops advanced through it, and in 1842 they forced it.

KOKAN. (*See* KHOKAN.)

KOLAPOOR, *kol'-a-por'*, an Indian rajahship, under the superintendence of the Bombay presidency. *Area*, 3,445 square miles. *Pop.* 500,000. *Lat.* between 15° 60′ and 17° 17′ N. *Lon.* between 73° 47′ and 74° 40′ E.

KOLLAR, Jan, *kol'-lar*, a Bohemian poet and preacher, who originated the idea of Panslavism. He studied at Pesth and Jena, and subsequently became pastor of an Evangelical congregation at the former place. Between the years 1821 and 1835, he published several collections of poems, written in Bohemian, the object of which was to unite in one common bond of union the Sclavonic nations. Sir John Bowring has translated some of his sonnets; and in one of Kollar's works he wrote,—"This is a very remarkable book, and how its true and fiery spirit should have burst this Austrian censorship is altogether unintelligible to J. B." His most admired production is "The Daughter of Glory," included in the poetical works published at Buda in 1845. B. at Moschowze, in Hungary, 1793.

KÖLLIKER, Albert, *ke(r)'-le-ker*, an eminent modern German physiologist and microscopial observer. He is professor of anatomy and physiology at the university of Wurzburg, and has distinguished himself by his discoveries in science, chiefly by the aid of the microscope. In 1841, he put forth an important paper on the reproductive organs and fluid of invertebrate animals. His greatest effort is a work on the "Microscopic Anatomy or Histology of the Human Body," the publication of which was commenced in 1850. Messrs. Busk and Huxley have translated the introduction of this important contribution to science, which, it is stated, has placed its author at the head of living histologists. B. in Germany, about 1817.

KOLN. (*See* COLOGNE.)

KOLOMNA, *ko'-lom-na*, a town of European Russia, government of Moscow, on the Oka, 65 miles from Moscow. *Manf.* Silks and woollens. *Pop.* 13,000.

KOLYMA, or KOVYMA, *ko-le-ma'*, a river of Asiatic Russia, rising in *lat.* 61° 30′ N., and, after a course of 700 miles, falling into the Frozen Ocean, *lat.* 71° 25′ N.; *lon.* 152° 24′ E.

KOMHARSIN, *kom-har-sin'*, a hill state of India, lying between the Sutlej and the Jumna. *Area*, 56 square miles. *Pop.* about 12,000.

KOMORN. (*See* COMORN.)

KONGSBERG, *kongs'-bairg*, a town of Norway, in the government of Aggerhuus, or Christiania, on the Lowe, 40 miles from Christiania. The silver-mines of this place are the most important in the kingdom. *Pop.* 4,000.

KÖNIGGRATZ, *ke(r)'-neezh-gratz*, one of the sixteen circles into which Bohemia is divided. It lies in the north-east of that kingdom, and is contiguous to Silesia, the county of Glatz, and Moravia. *Area*, 1,300 square miles. *Pop.* about 300,000.

KÖNIGGRATZ, the capital of the above circle, stands on the Elbe, 63 miles from Prague. It is neatly built, and is a place of some strength. The principal edifices are an elegant cathedral, an episcopal palace, Jesuits' church, and a gymnasium. *Manf.* Woollens. *Pop.* 9,500.—In 1758 this place was taken by the Prussians.

KÖNIGSBERG, *ke(r)'-neezh-bairg*, the name of several German towns, none of them with a population above 5,000.

KÖNIGSBERG, a fortified city of Prussia, and the capital of a circle, stands on the Pregel, 4 miles from its mouth in the Frische-Haff. A part of it is built on an island formed by the Pregel. The houses have their foundations on piles, as at Venice and Amsterdam. Opposite to this island, and on the north bank of the river, stands the rest of the city, consisting of the old town and a quarter to the eastward called Lobenicht. The streets are straight, and, in general, spacious. The Old town contains the town-house, an anatomical theatre, an hospital for the widows and orphans of citizens, and large warehouses for the use of merchants. The quarter to the east of the old town contains a large hospital on the river-side, a mint, a theatre, and an orphan-house; here, also, is the royal palace. The insulated part of the town contains a council-house, an exchange, and the university buildings. Its orphan-house is also a conspicuous edifice; but none of these equal the cathedral, which, besides its architecture and ornaments, is remarkable for its organ, erected in 1721, and containing 5,000 pipes. The university, founded in 1544, has connected with it a library, botanic garden, and an astronomical observatory. There are, besides, many excellent schools in the city. There are several bridges over the arms of the Pregel. *Manf.* Woollens, leather, gloves, lace, soap, refined sugar, tobacco, starch, and sealing-wax: there are breweries and distilleries on a large scale. *Pop.* 76,000. *Lat.* 54° 42′ 8″ N. *Lon.* 20° 30′ 2″ E.

KÖNIGSMARCK, Philip Christopher, Count, *ke(r)'-neezh-mark*, a celebrated Swedish adventurer. He was descended from an ancient noble family of Brandenburg, a branch of which had passed into Sweden, where it had produced many distinguished soldiers. Philip went to Hanover, where the elector Ernest Augustus appointed him colonel of a regiment of dragoons. The electoral prince, George Louis, afterwards George I., king of Great Britain, had married his cousin Sophia-Dorothea, a beautiful, witty, and accomplished princess This princess did not love her husband, whose cold, brutal nature repelled her. She bestowed her affections upon the handsome Swede. The pair were about to fly together to France, when Königsmarck was assassinated. Many incorrect versions of the tragedy were for a long time current in the works of various writers; but Mr. Thackeray, in his first lecture on the Four Georges, thus truthfully describes the event: —"Her husband was away at Berlin; her carriages and horses were prepared, and ready for the elopement. Meanwhile, the spies of Countess Platen had brought the news to their mistress. She went to Ernest Augustus, and procured from the elector an order for the arrest of the Swede. On the way by which he was to come, four guards were commissioned to take him. He strove to cut his way through the four men, and wounded more than one of them. They fell upon him, cut him down. . . . he was dispatched presently, his body burnt the next day, and all traces of the man disappeared." The princess was afterwards consigned to the castle of Ahlden, where she was confined for 32 years, "and her silent husband no more uttered her name." Königsmarck was slain in 1694.

KÖNIGSMARCK, Marie-Aurora, Countess of, was sister of the above, and celebrated for her beauty and accomplishments. Despoiled of a succession to which she had a claim, she went to Dresden to enlist the services of Frederick Augustus, elector of Saxony. That prince became inspired with a lively passion for her, to which she replied, and became the mother of the celebrated Marshal Saxe. On being abandoned soon afterwards, she retired into privacy, and exclusively occupied herself with the education of her son. B. about 1673; D. 1725.

KÖNIGSTEIN, *ke(r)'-neezh-stine*, the name of several towns and villages in Germany, none of them with a population above 2,500. One of these, 17 miles from Dresden, has a fortress on a rock nearly 500 feet high, and one of the few in Europe never yet taken. In it the royal treasures have usually, during war, been deposited.

KONIYEH, or KONIAH, *ko'-ne-a*, a city of Asia Minor, with numerous mosques, and once the capital of the Seljuk sultans. *Manf.* Carpets and coloured leather. *Pop.* 30,000. *Lat.* 37° 50′ N. *Lon.* 32° 40′ E.

KONSTANZ. (*See* CONSTANCE.)

KOOCH-BEHAR, *koosh be-har'*, a territory of British India, in the Bengal presidency, with an area of 1,365 square miles. It is under the administration of a native prince. *Pop.* Unascertained. *Lat.* between 25° 58′ and 26° 32′ N. *Lon.* between 89° 40′ and 89° 45′ E.

KOOM, *koom*, a city of Persia, built by the Saracens in the year 806, 80 miles from Teheran. It contains a beautiful college, with a celebrated mosque and sanctuary, but is now greatly decayed. *Pop.* 8,000. *Lat.* 34° 45′ N. *Lon.* 50° 29′ E.

KOONAWUR, *koo-na-wur'*, a district of India, in Bussahir. *Area*, 2,100 square miles. *Desc.* Extremely mountainous; some of the ridges attaining a great elevation, and several of their peaks rising to heights varying between 10,000 and 22,500 feet. *Pro.* Wheat, rice, millet, barley, potatoes, turnips, peas, and fruit. The honey is excellent. *Manf.* Blankets and coarse woollens. *Pop.* 10,000. *Lat.* between 31° 12′ and 32° 8′ N. *Lon.* between 77° 50′ and 78° 52′ E.

KOONDOOZ, *koon-dooz'*, a district of Independent Turkestan, in Central Asia. *Desc.* Mountainous, with intersecting fertile valleys, producing rice, wheat, and barley. *Pop.* Unascertained. *Lat.* between 35° and 38° N. *Lon.* between 68° and 92° E.

KOORDISTAN. (*See* KURDISTAN.)

KOORTHUL, *koor-tul'*, a town of British India, in the district of Meerut, 40 miles from Delhi. *Pop.* 8,000.

KOPROLI, or KUPERLI, Mehemet, *kop'-ro-le*, grand-vizier of Turkey during the minority of Amurath IV. He remained in power till his death. He was a sagacious governor, and filled the treasury, which had been emptied by the prodigality of the previous reigns. He was, however, cruel and relentless to those who gave him offence. D. 1661.

KOPROLI, Achmet, son of the preceding, succeeded his father as grand-vizier. He made war in Hungary in 1662, and lost, in 1664, the battle of St. Gothard, against Montecuculi, but concluded an advantageous peace at Temeswar. In 1669 he took Candia. D. 1675.

KOPROLI, Mustapha, son of the preceding, was grand-vizier under Soliman III. He made war in Hungary; he took Widdin and Belgrade; he was killed at the battle of Salankemen, 1691.

KOPROLI, Njuhman, son of the preceding, was nominated by Achmet III. grand-vizier in 1710. He remained in power only two months. He was the victim of a strange hallucination, believing that he had a fly constantly on his nose. A French physician cured him, by feigning to perform an operation upon the feature, and afterwards showing him a dead fly, with which he had previously provided himself.

KORAT, *ko-rat'*, a state of Asia, tributary to Siam. It produces copper, ivory, sugar, and rosewood. *Pop.* 60,000. *Lat.* 15° 40′ N.

KORBACH. (*See* CORBACH.)

KORDOFAN, *kor-do-fan'*, a country of Central Africa, to the W. of the Bahr-el-Abiad (White Nile), between the kingdom of Darfur and that of Sennaar. *Pop.* Unascertained.

KORNER, Karl Theodor, *kor'-ner*, an eminent German poet. In early youth, his health being delicate, he was not sent to a public school, but educated by private teachers. At the age of 17 he was sent to the School of Mines at Freiburg; subsequently completing his studies at Leipzig and Berlin. His health giving way, he was sent to Vienna, where, on his recovery, he engaged in poetical composition. He there wrote two plays for the Vienna stage—"The Bride" and the "Green Domino," which, meeting with some success, he produced two tragedies, one of which had for its subject the story of the English "Fair Rosamond." In 1813 he joined the celebrated volunteer corps of Major Lützow, organized to resist the French, and was severely wounded at the battle of Kitzen. In a subsequent engagement he was shot, on the road between Gadebusch and Schwerin, and

buried under an oak-tree, on the trunk of which his name was engraved by his comrades. He is chiefly famous for his collection of warlike songs, called the "Lyre and Sword," mostly composed in the intervals of battle, or by the bivouac fire. His song "Männer und Buben" (Men and Cowards), and his "Schwertlied" (Sword-Song), were, and are still, extremely popular with his countrymen. Lord F. Gower has given a fine translation of the latter song; and selections from his poems, dramas, and tales have been produced by Mr. G. F. Richardson. B. at Dresden, 1791; D. 1813.

Körös, *ke(r)-esh'*, two market-towns of Hungary, with populations of 5,000 and 17,000. They are distant from each other 5 miles, and from Pesth about 45.

Korotscha, *ko-rot'-sha*, a town of European Russia, in the government of Kursk, on the Korotscha, 63 miles from Koursk. *Pop.* 10,000.

Kosciusko, *kos'-ke-us'-ko*, a county of the United States, in Indiana. *Area*, 580 square miles. *Pop.* 12,000.

Kosciusko, Thaddeus, the Polish patriot. He studied for the military profession, first at Warsaw, and afterwards at Paris; he accompanied Lafayette to America, and fought against England, on the side of the American colonists. On the conclusion of the war he returned to Poland, and was created major-general. In 1794 he was put at the head of the Polish army, when his countrymen attempted to gain their independence. In the same year he defeated the Russians at Raclawice; but was himself beaten by the combined Russians and Prussians, in an engagement near Warsaw, shortly afterwards. On the arrival of fresh Russian troops from the interior, under Suwarrow, he marched forth to meet them at the head of 21,000 men. The Russians numbered about 60,000 men. The Poles were defeated, after a desperate battle; Kosciusko being wounded, and taken prisoner, exclaiming "Finis Poloniæ." Warsaw was taken by storm shortly afterwards, and the Poles were completely subdued. The patriot was conducted to St. Petersburg, but was subsequently released by the emperor Paul, upon which he went to America. In 1798 he went to France, and was repeatedly solicited by Napoleon to join his standard; but he would not consent to leave his retirement. On the establishment of the new kingdom of Poland, in 1815, he wrote to the emperor Alexander, thanking him for his generosity. In 1816, he settled in Switzerland, and applied himself to the pursuits of agriculture. B. in Lithuania, 1756; D. in Switzerland, 1817.

Kosciusko Mount, the most lofty mountain of the Australian Alps, in Victoria. *Height*, 6,500 feet.

Kossein. (*See* Cossein.)

Kossova, *kos-so'-va*, a town of European Turkey, 8 miles from Pristina. *Pop.* Unascertained. Near it a battle, in which the Turks annihilated the independence of Servia, took place in 1389.

Kossuth, Louis, *kos'-suthe* (*kos-shoot*), the late provisional governor of Hungary. He was son of a small land proprietor in northern Hungary, and was educated at the Protestant college of Sarospatak. In 1819 he began to study the law at the local court of Eperies, and the royal court of Pesth. Three years afterwards, having completed his legal education, he went to Monok, where he obtained a good practice. He left that place for Pesth in 1831, and was sent the following year as representative of a magnate, to the Hungarian diet or parliament, in whose deliberations he was allowed to participate by speech, but without voting. The debates of the diet were soon afterwards circulated by Kossuth in manuscript, and were eagerly sought after; so popular, indeed, did they become, that he set up a lithographic printing-press, to multiply copies of the speeches to meet the demand for them. This proceeding soon became distasteful to the Austrian government, and Kossuth was compelled to abandon his lithographic printing; but he still continued to circulate manuscript reports. In 1836 a number of young men were imprisoned for alleged political conspiracy: Kossuth warmly defended them, and charged the prosecution with illegal procedure and injustice. For this he was himself arrested, brought to trial, and thrown into prison at Buda, remaining therein three years, from 1837 until 1840. His release was obtained in the latter year, through the Hungarian diet's refusal to grant the supplies until he was set free by the Austrian government. With the commencement of the year 1841 Kossuth brought out the first number of the "Pesti Hirlap" (Pesth Journal), which, at starting, was issued four times a week, and, soon after, daily. The success of the new journal was very great, the circulation at one period reaching the number of 10,000. About this time Kossuth married. Throughout the ensuing six years the "Pesth Journal" was a bold and unceasing opponent of the Austrian design of substituting for the constitutional government of Hungary, one based on the imperialist principles. In the diet, the liberal opposition, headed by Count Louis Batthyany, was likewise very decided. In 1847 Kossuth became the representative of the city of Pesth in the diet, and in March, 1848, he proposed that a deputation should be sent to the king of Hungary (the emperor of Austria), asking that a new ministry, composed of Hungarians, together with certain constitutional reforms, should be granted. Kossuth was a member of this deputation, which reached Vienna soon after the minister, Prince Metternich, had quitted it, and while the city was in a most excited state. The deputation was received by the emperor, who acceded to their request, and decreed that a new and liberal ministry should be formed, with Count Louis Batthyany as president, and Kossuth as minister of finance. Many more reforms followed this decree, in the benefits of which the Servians and Croatians participated with the Hungarians. The Servians and Croats were, at the outset, greatly pleased with the new concessions, but were soon afterwards led to believe, by Austrian agents, that Hungary sought to enslave them, and to destroy their religion and nationality. Accordingly, in June, 1848, they rose against the Hungarians, being secretly provided by Austria with arms and stores, and commanded by disguised officers of the Austrian army. Several desperate encounters took place on the frontier, and many villages were laid waste. Kossuth, by his great eloquence and energy, roused his countrymen into fierce activity; ten battalions of Honveds, or defenders of home, were organized, and these, with some regiments of hussars and of the line, formed the nucleus of what was subsequently the great Hungarian army. Three months afterwards, Jellachich, ban of Croatia, invaded Hungary at the head of 30,000 Servians and Croats. (*See* Jellachich.) He was met by the Hungarians, under Guyon and other leaders, and defeated. About the same time, Field-Marshal Count Lamberg was sent from Vienna as commander-in-chief of the Hungarian army. He went to Pesth to assume his post; but the infuriated populace murdered him on the Buda-Pesth bridge. The rupture between Hungary and Austria was now complete, the parliament of the former addressing the nation in a "Remonstrance," which roused the entire population. In October, the Hungarian army crossed the frontier, and advanced to within a short distance of Vienna, but was then defeated. The Hungarian parliament now retired from Pesth to Debreczin, where they proclaimed the deposition of the house of Hapsburg, and the independence of Hungary. This measure, proposed by Kossuth, is said to have led to that great division among the Hungarians, which ultimately proved fatal to their cause. It certainly furnished to Görgei a pretext for surrendering unconditionally to the Russians. Kossuth was nominated by the parliament provisional governor of Hungary. Meantime, the Austrians, under Prince Windischgrätz, invaded Hungary. The Austrians were defeated in several engagements; but, in May, 1849, a Russian army entered Hungary, and closely pursued Görgei to Arad. In the south, the Hungarians were defeated by the Austrian army, under General Haynau, in August, 1849. On receiving news of this disaster, Kossuth resigned his civil and military power as dictator, to Görgei, who, on the 14th of the same month, surrendered himself and his whole army to the Russians. The Hungarian struggle was thus terminated. Kossuth fled into Turkey, and was detained as prisoner at Schumla, being subsequently sent to Kutuyia, in Asia Minor. He remained in prison about two years, during which he, with the aid of Shakspere and of Johnson's

Dictionary, mastered the English language. In August, 1851, the ambassadors of the English and American governments obtained his release, despite the threats of Austria. He embarked at Smyrna in an American vessel, and arrived in England in October. He was received in London and the provincial towns with the utmost enthusiasm; his eloquent speeches, delivered in stirring English, exciting the greatest admiration. He sailed for the United States in November of the same year, but returned to England in 1852. During the Crimean war, he spoke at Sheffield, Nottingham, and other places; but has since led a retired and private life. His speeches have been collected and published in several forms, the best of which is that put forth under the care of Professor Francis W. Newman, in 1853. B. at Monok, in the county of Zemplin, Northern Hungary, 1802.

KOSTELETZ, *kos'-te-letz*, the name of several towns in Bohemia, none of them with a population above 3,000.

KOSTER, Lawrence, or Laurent Janszoon, *kos'-ter*, the true inventor of printing, according to the Dutch. Adrian Junius, a learned Dutch historian of the 16th century, in his "Batavia," states that Koster was a native of Haarlem, about the middle of the 15th century, and that in the course of his afternoon rambles in the suburbs of the city, he was in the habit of amusing himself with cutting letters out of the bark of the beech-tree. To amuse his grandchildren, he afterwards put these letters together, and printed short sentences with them. Being an inventive man, he is stated to have subsequently compounded a glutinous ink for the printing of his wooden letters, and that, finally, he set up an establishment in which entire pages, adorned with engravings, were printed. In course of time he made his letters of lead, and later of pewter, that being a harder metal. His establishment flourishing, he was induced to augment the number of his assistants, but all were bound by their oath to maintain the invention a secret. One of these assistants, by name John, after making himself acquainted with the whole process of casting, joining the characters, and taking impressions from them, is said to have fled, while Koster and his family were at church, hearing a midnight mass, taking away with him all the implements of his master's art. He is alleged to have gone first to Amsterdam, thence to Cologne, and finally to have taken up his residence at Mainz, and there established printing-presses. The thief, called John by Junius, is suspected to be Faust, but he is never named. (*See* FAUST.) This story having been carefully sifted by competent authorities, has been pronounced unworthy of credit. Certain books stated to have come from Koster's press, have never been satisfactorily discovered. Even admitting the possibility of John's being able to carry clear away the whole of the apparatus of a printing establishment, why did not Koster exert his ingenuity once more, and replace the loss? Again, Junius, the author of the work in which the claims of Koster have been enforced, died twelve years before his book was published, and it is believed that the whole story was inserted in the volume by some person anxious to advance the reputation of Haarlem.

KOSTROMA, *kos-tro'-ma*, a river of Russia, which, after a course of 130 miles, joins the Volga, at Kostroma.

KOSTROMA, a considerable town of European Russia, and the capital of a government of the same name, on the Volga, 200 miles from Moscow. It is the capital of a Greek eparchy. *Manf.* Leather, linen, Prussian blue, salt, wax, and soap. It has also a trade in corn and wine. *Pop.* 15,000.—The GOVERNMENT has an area of 31,800 square miles, and a population of 155,000. Nearly its entire surface consists of forests and pasture-land.

KOTAH, *ko-ta'*, a town of Hindostan, in the province of Ajmere, 190 miles from Agra. It is strongly fortified, has numerous temples, and excellent bazars. *Manf.* Cloths, chiefly of native product. *Pop.* Unascertained. The STATE, of which this town is the capital, is one of the most flourishing in India, and has an area of 4,400 square miles.

KOTANAH, *ko'-ta-na*, a town of British India, in the district of Meerut. *Pop.* 7,000. *Lat.* 29° 6' N. *Lon.* 77° 15' E.

KOTHEN, or COTHEN, *ko-tain'*, a town of Central Germany, on the Zeithe, 20 miles from Halle. *Manf.* Cloth and linens. *Pop.* 6,300.

KOTLIN-OSTROF. (*See* CRONSTADT.)

KOTZEBUE, August Frederick Ferdinand Von, *kots'-boo*, a German writer and dramatist. After completing his studies for the legal profession at the university of Jena, he went to Russia, where he became secretary to a general, and after filling several posts under the government, was appointed by Catharine II. civil governor of Revel, in Esthonia. He resigned this office after a few years, and, resolved to devote himself to dramatic literature, accepted the directorship of the theatre of Vienna. After a short period spent there, he returned, in 1800, to Russia; but had scarcely crossed the frontiers of that country when he was arrested by order of Paul I., and conveyed to Siberia. He was accused of having written a pamphlet against the czar. About a year afterwards Paul witnessed a play by Kotzebue, translated into Russian, and was so delighted with it that he recalled the author, and appointed him director of the German theatre at St. Petersburg. After the death of Paul, he went to Weimar, but, quarrelling with Göthe, he removed to Berlin, where he established a satirical journal. In 1813 he became the emperor Alexander's political secretary; in 1814 he was appointed Russian consul-general at Königsberg. After having again visited Russia, in 1817, he was sent to Germany with a large salary, to watch the state of literature and political opinion, and communicate thereon to the Russian government. About this time he established a weekly paper, in which, as in all his previous works, he derided every aspiration for freedom and constitutional government. It was this scoffing at liberal institutions which caused him to be assassinated by a German student and political enthusiast, named Sand. From his earliest years he had been an industrious writer for the stage; at his death, he had composed nearly one hundred dramas. The best of these, with one exception, have been reproduced in English. "The Stranger," "The Indians in England," "Lovers' Vows," "Pizarro," and "Benyowski," are the most meritorious of his works played on the English stage. B. at Weimar, 1761; killed 1819.

KOTZEBUE, Otto Von, son of the preceding, and officer in the Russian navy. In 1815 he went on a voyage round the world, an account of which he published in 1821. In 1824 he again undertook the same task, and discovered two islands in the South Sea. D. 1846.

KOULI-KHAN. (*See* NADIR SHAH.)

KOURSK, or KURSK, *koorsk*, a government of European Russia, bounded on the S. by Kharkov, on the E. by Veronetz, on the N. by Oriel, and on the W. by Tchernigov. *Area*, 17,380 square miles. *Desc.* Fertile, and extensively under the operations of agriculture. *Manf.* Woollens, soap, saltpetre, leather, and pottery. *Pop.* 1,640,000. The capital CITY is of the same name, and is 290 miles from Moscow. It is the see of a Greek eparchy, and has a gymnasium, a theological seminary, and several schools. *Manf.* Leather, wax, and tallow. *Pop.* 27,000.

KOWAREE, or KWARA RIVER. (*See* NIGER.)

KOZLOV, *koz-lof'*, a town of European Russia, in the government of Tambov, 55 miles from Tambov. It has a considerable trade in cattle and tallow. *Pop.* 21,000.

KOZLOV, Ivan Ivanovich, a Russian poet, who produced numerous translations of English poetry, chiefly from Byron, Wordsworth, and Sir Walter Scott. His mastery of English was so complete that he translated a poem by the Russian poet Pushkin into our language, a specimen of which, published in the "New Monthly Magazine," for 1830, was as correct as if written by an accomplished Englishman. His poems, composed during intervals of pain, and dictated to an amanuensis, the author being afflicted with blindness, are included in two volumes. B. 1774; D. 1838.

KRACHENINNIKOW, Stephen, *kra'-ken-nin'-ni-kow*, a Russian naturalist. He was educated at the academy of St. Petersburg, and, when young, went to Kamtschatka. He returned in 1748 with a number of observations made during ten years' travel. The academy nominated him an associate, and, in 1753, he was made

professor of botany and natural history. He wrote an account of his travels and discoveries in Chappe d'Auteroche's Account of Siberia. B. 1713; D. 1755.

KRAIN. (*See* ILLYRIA.)

KRAKAU. (*See* CRACOW.)

KRANTZ, Albert, *krantz*, a German chronicler. He studied philosophy and theology at Rostock and at Hamburg, and was sent on several diplomatic missions to France and England by the confederation of the Hanseatic towns. He composed in Latin the "Chronicles of the Kingdoms of Sweden, Denmark, and Norway," the "Ecclesiastical History of Saxony," and other works. B. at Hamburg, about the middle of the 15th century; D. at the same place, 1517.

KRASICKI, Ignacy, *kra'-shick-e*, an eminent Polish poet, and archbishop of Gnesen. His wit and accomplishments made him the favourite of King Stanislas Poniatowski. On the partition of Poland, in 1772, he became the subject of Frederick the Great. His poetry takes rank in Polish literature in about the same degree as Pope's in English. He wrote both prose and verse, nearly all of which was collected and published, in 10 vols., in 1804. B. at Dubiecko, 1734; D. at Berlin, 1801.

KRASNOIARSK, *kras'-no-yarsk*, a town in the government of Astracan, in Asiatic Russia, on the Yenesei. *Pop.* 6,000. *Lat.* 6° N. *Lon.* 92° 57' E.—This town is the emporium of an extensive region, and is on the high route between Irkutsk and Tobolsk.

KRASNOI, *kras'-noi*, the name of several towns in Russia, none of them with a population above 3,500.

KRASZEWSKI, Jozef Ignacy, *kra-shoov'-ke*, a modern Polish author. He has written more than a hundred volumes of fiction. The best of his novels are said to be the "Magic Lantern," and "Under Italian Skies." His most popular poems are "Anafielas, a story of Lithuanian tradition," and "Satan and Woman." He has published several volumes of travels, and a history of Wilna, and was at one time editor of the "Wilna Athenæum." B. at Warsaw, 1812.

KREMENEZ, *krem'-e-nez*, a town of Russian Poland, in the government of Volhynia, 36 miles from Ostrog. *Pop.* 5,600.

KREMENTSCHUG, *krem'-ent-shoog*, a town of Russia, 65 miles from Poltova, standing on the Dnieper, here crossed by a bridge of boats. *Manf.* Hats, sugar, nitre, and soap. *Pop.* 18,000.

KREMNITZ. (*See* CREMNITZ.)

KREUTZ, *kroits*, a town of Austrian Croatia, 24 miles from Warasdin. *Pop.* 3,000.

KRISHNA, *krish'-na*, a Hindoo divinity, regarded as the eighth incarnation of Vishnu. (*See* VISHNU.) He was remarkable for beauty, valour, and wisdom; and is said to have caused 16,800 women to become enamoured of him. He was accidentally killed by the hunter Angada; whereupon all his female admirers voluntarily sacrificed themselves upon his funeral pile. His career is strikingly like that of Apollo and some other Greek divinities. The adventures of Krishna have given rise to a celebrated poem among the Hindoos, called the "Bhagavata Purana," which is said to have been composed during the 13th century.

KRISTNAH. (*See* KISTNA.)

KRONSTADT, in Transylvania. (*See* CRONSTADT.)

KRONSTADT, a town of Russia. (*See* CRONSTADT.)

KROTOSHIN, *kro'-to-shin*, a town of Prussian Poland, 54 miles from Posen. *Manf.* Woollens, linens, leather, tobacco, and chicory. *Pop.* 8,000.

KROYA, or CROYA, *kro'-ya*, a town of Albania, 45 miles from Scutari. *Manf.* Arms. *Pop.* Estimated at 12,000.

KRUDENER, Julia Wittinghoff, Baroness Von, *kroo'-de-ner*, a celebrated German mystic. She was the daughter of the governor of Riga, and was married, at the age of 14, to the Baron Von Krudener, Russian ambassador at the court of Berlin. After spending many years in a gay and brilliant life, she suddenly retired from the world, and gave herself up to an exaltation of devotion. Imagining she had a mission from heaven to regenerate Christianity, she forthwith travelled over Germany, visiting prisons, preaching in the open air, distributing alms lavishly; being followed throughout her progress by some thousands of disciples. In 1814 she had several interviews with the allied princes, who had entered Paris, and greatly impressed the emperor Alexander, to whom it is said she predicted the return of Napoleon from the isle of Elba, and his approaching fall. From Paris she visited Switzerland, and afterwards Germany, where she recommenced prophesying; but her great influence being feared, she was banished. About 1822 she retired to the Crimea, in order to found a refuge for criminals. She published at Paris, in 1803, a romance entitled "Valerie," which was, in great part, her own autobiography. D. at Riga, 1764; D. in the Crimea, 1824.

KRUGHER, Ivan Christian, *kroo'-gair*, a German author and actor. He wrote poems and comedies, and translated into German the plays of Marivaux. B. 1722; D. at Hamburg, 1750.

KRUILOV, Ivan Andreevich, *kroo'-e-lof*, a celebrated Russian fabulist. He was the son of an officer in the Russian line infantry, who, at his death, in 1780, left behind a fairly-stocked library of miscellaneous books, which the youth eagerly devoured. Some plays and operas were included in this collection, and the perusal of these led the youth to compose something dramatic himself. He wrote an opera called the "Kafeinitza; or, Fortune-Teller by Coffee," when only 15 years of age. On his mother removing to St. Petersburg, soon afterwards, he took his opera to a German bookseller, who offered him sixty roubles for the manuscript. Young Kruilov took out the money in books, selecting Racine, Molière, and Boileau. Three years afterwards, he wrote a play, entitled "Philomela," but could not get it produced on the stage. He obtained a post in a government office, and continued, during his hours of leisure, to write essays and dramas, till the year 1801, when he became secretary to Prince Galitzin, governor of Riga, with whom he grew into great favour. The prince invited him to his country house, where he spent three years. He subsequently produced half a dozen plays, which obtained some popularity. At 40 years of age he accidentally discovered where his real powers lay. He translated several of La Fontaine's fables, and was advised by Dmitriev, the Russian poet, to persevere. He accordingly wrote some original fables, which rapidly attained the utmost degree of popularity. He continued to produce fables in verse, and, during several subsequent years, his lines were quoted by every class in Russia, from peasant to noble. He wrote 197 fables, 160 of which were original. In 1812 he obtained an appointment in the imperial library of St. Petersburg, and received many marks of favour from the emperors Alexander and Nicholas. B. at Moscow, 1768; D. at St. Petersburg, 1844.

KRUMMACHER, Frederick Adolf, *kroom'-ma'-ker*, a German divine and theological writer. He wrote various works of a religious character; the most widely circulated of which were, "The Life of St. John," "Cornelius the Centurion," "Parables," and a book of religious poetry for children. The three first of these have been translated into English, and have become popular, the "Parables" particularly so. B. at Tecklenberg, Westphalia, 1768; D. 1845.

KRUMMACHER, Gottfried Daniel, younger brother of the preceding. He officiated as preacher in the reformed church at Elberfeld. He published "Sermons on the Wanderings of the Children of Israel," and "Daily Manna," both of which have been reproduced in an English form, the latter under the title of "The Christian's Every-Day Book." B. 1774; D. 1837.

KRUMMACHER, Frederick William, son of Frederick Adolf. He acted for some time as pastor to a Lutheran community at New York. He wrote a great number of religious works, many of which have become very popular in England. His principal works are "Elijah the Tishbite," "Elisha," "Solomon and the Shulamite," "Temptation of Christ," "Glimpses into the Kingdom of Grace," and the "Church's Voice of Instruction." In 1856 he attended the annual conference of the Evangelical Alliance at Glasgow.

KUBA, *koo'-ba*, a fortified town of Russia, in the Caucasus, on the S. side of a river of the same name. *Pop.* 4,000. This place was formerly the residence of a khan.

KUBAN, *koo-ban'*, a river of S. Russia, rising near Mount Elburz, and, after a course of 380 miles, falling into the Black Sea, 20 miles from Anapa.

KUBLA-KHAN, *koo'-bla-kan*, ir. Chinese, Chi-Tsou, founder of the twentieth Chinese dynasty, that of the

Mongols or Yen. He was the grandson of Ghengis-Khan, and was proclaimed emperor of the Mongols in 1260, in succession to his brother Mangou-Khan. He reigned, at first, only in Mongolia and the countries conquered by Ghengis-Khan; but he invaded China in 1267, captured the Chinese emperor in 1279, and thus overthrew the Song dynasty, which had ruled for 319 years. He extended his conquests over Thibet, Pegu, Cochin-China, and formed the greatest empire known in history, embracing the whole of Asia and part of Europe, from the Dnieper to Japan. He patronized letters and encouraged agriculture, industry, and commerce. Marco Polo passed seventeen years at his court. D. 1294.

KUGLER, Francis Theodore, *koog'-ler*, an eminent German art-critic. After completing his collegiate studies, he devoted himself to the elucidation of the early history of painting and architecture, and travelled to Italy to make researches thereon. His great work, the "Handbook of the History of Painting from the Age of Constantine to the Present Time," was published in 1837. It was almost immediately translated into the leading European languages. In England, it was reproduced by several translators. The "Schools of Painting in Italy" was put into English by Lady Eastlake, with notes by Sir Charles Eastlake. The "German, Flemish, and Dutch Schools" were rendered by Sir Edmund Head. Kugler also wrote "Description of the Art Treasures in Berlin and Potsdam," a very important work; the "History of Frederick the Great," and other valuable contributions to literature. B. at Stettin, Pomerania, 1808; D. at Berlin, 1858.

KUHLMAN, Quirinus, *kool'-man*, a German visionary of the 17th century. He was a man of learning; but a violent attack of illness having disordered his brain, he pretended to be a prophet. After studying the writings of Behman, he was led to believe that he was in reality inspired. He published several visions, which he pretended to have received; but was at length burnt as a heretic in Russia, 1689.

KUHLOOR, *ku-loor'*, a hill state of India. *Area*, 150 square miles. *Desc.* Diversified, and producing wheat, barley, rice, millet, ginger, hemp, pepper, opium, tobacco, and fruits. *Pop.* 33,000. *Lat.* between 31° and 31° 35′ N. *Lon.* between 76° 27′ and 76° 55′ E.

KUILENBURG, *koil'-len-boorg*, a fortified town of the Netherlands, on the Lèche, 10 miles from Thiele. *Manf.* Silk fabrics, twist, and arms. *Pop.* 5,000.

KULM, *koolm*, a village of Bohemia, at the foot of the Erzgeberge mountains, where, in 1813, the French were defeated by the allied army under the command of the emperors of Russia and Austria and the king of Prussia. *Pop.* 700. Also the name of several towns in Germany, none of them with a population above 7,000.

KUMAON, *koo'-ma-on*, a province of N. Hindostan, forming a part of British India, in the presidency of Bengal. *Area*, 7,000 square miles. *Desc.* Mountainous, and to a great extent covered with wood. Where it is clear, it yields rice, hemp, and some corn. *Minerals.* Gold, copper, and lead. *Manf.* Coarse woollen and hempen fabrics, cottons, and camlets. *Pop.* 168,000. *Lat.* between 29° and 31° N. *Lon.* between 78° and 81° E.

KUR, *koor*, the ancient Cyrus, the most considerable river of Georgia, in Asia, rising in the pashalic of Akheel-Zikh, and, after a course of 500 miles, falling by several mouths into the Caspian Sea, 100 miles from Baku.

KURDISTAN, or KOORDISTAN, *koor-dis-tan'*, a region of W. Asia, shared between Turkey and Persia. *Area*, estimated at 52,000 square miles. *Desc.* Mountainous; and cattle-rearing is the chief occupation of the inhabitants. *Rivers.* The Zab Ald, Zab Asfal, and the Dryalah, all affluents of the Tigris. *Pro.* Rice, cotton, tobacco, timber, and galls. *Pop.* Estimated at about 1,000,000. *Lat.* mostly between 32° and 38° N. *Lon.* between 42° and 47° E.

KURILES, *koo'-rils*, a long range of small islands at the eastern extremity of Asia, extending from the southern point of Kamtschatka to the isle of Jesso, or Matsmai, which belongs to Japan. *Area.* The whole estimated at 3,000 square miles. *Desc.* Twenty-two of these islands are now known. Some of them are not inhabited, and several are even uninhabitable, on account of the absolute want of water. Others are fertile, well-wooded, full of game and fish. Some contain volcanoes; and they are all subject to frequent earthquakes. With the exception of the three most S. islands, which belong to Japan, this archipelago belongs to the Russian government of Irkutsk, and the inhabitants pay a tribute of furs and sea-calves, which the Russians collect every two or three years. *Pop.* Unascertained. *Lat.* between 43° 40′ and 57° N. *Lon.* between 145° and 156° E.

KURNOOL, *koor-nool'*, a district of British India, in the presidency of Madras. *Area*, 2,640 square miles. *Pop.* 274,000. *Lat.* between 14° 50′ and 16° 15′ N. *Lon.* between 77° 47′ and 79° 15′ E.

KURRACHEE, *koor-ra-che'*, the principal seaport-town of Scinde, on an inlet of the Indian Ocean, 20 miles from the W. branch of the Indus. It is of considerable military importance. *Pop.* 23,000. *Lat.* 24° N. *Lon.* 67° E.

KURSHEE, *koor-she'*, a town of Bokhara, in Central Asia, in a fertile oasis, 100 miles from Samarcand. *Pop.* 10,000.

KURUM, *koo-room'*, a river of Persia, rising in the Bakhtiyari hill-country, and, after a course of 240 miles, entering the Persian Gulf by several mouths.

KUSSNACHT, *koos'-nakt*, a village of Switzerland, on the Lake of Zurich. *Pop.* 1,700.—Another, 11 miles from Schwytz, at the N. extremity of Lake Lucerne. It is the place where William Tell escaped from Gessler.

KUSTER, Ludolph, *koos'-ter*, a German literary critic. He studied at Berlin, and afterwards travelled on the continent, and visited England, where he completed his edition of Suidas, printed at Cambridge in 1705, and for which that university conferred on him a doctor's degree. Thence he went to Berlin, where he became professor and librarian to the king. He did not, however, long retain these honours, but went to Amsterdam, where he published Iamblichus's "Life of Pythagoras," the works of Aristophanes, and an edition of Mill's Greek Testament. In 1713 he went to Paris, abjured the Protestant religion, and obtained a pension. Besides the above, he published "Historia Critica Homeri," and other works. B. at Blomberg, Westphalia, 1670; D. at Paris, 1716.

KUSTRIN. (*See* CUSTRIN.)

KUYP, Jacob, *koip*, a celebrated landscape-painter, who founded the Academy of Painting at Dort, in 1641. He copied nature with great finish and exactness.

KUYP, Albert, son of the preceding, a distinguished Dutch painter. Very little is known of the circumstances of his life, although he excelled both in landscape and cattle-painting; and, though highly esteemed in England, is comparatively unknown abroad. A picture by him, for which the late Sir Robert Peel paid 350 guineas, was originally purchased at Hoorn, in Holland, for one shilling English money.

KWI-CHOO, *kwi-choo'*, a province in the S.W. of China, with a mountainous surface. It has mines of gold, silver, and iron. *Pop.* 5,230,000.

KYD, Thomas, *kid*, an English writer in the reign of Elizabeth, who published, in 1595, a play called "Pompey the Great," taken from the French of Garnier: he wrote, also, two other plays. The three are included in Dodsley's "Old Plays." Shakspere caused several of his comic characters to parody the most bombastic portions of Kyd's dramas.

KYDERMYSTER, Richard, *kid'-er-mis-ter*, a native of Worcester, and abbot of a monastery of Benedictines at Winchcombe, in Gloucestershire, of which abbey he wrote the history; also some tracts against the Reformation. D. 1531.

KYLES OF BUTE, *kiles bute*, a narrow arm of the Firth of Clyde, Scotland, between the island of Bute and the mainland.

KYNASTON, John, *ki-nâs'-ton*, an English divine, was educated at Brasenose College, Oxford, of which he was chosen fellow in 1751. He wrote "De Impietate C. Cornelio Tacito falsò objectata;" "Oratio habita in Sacello Collegii Æneï Nasi." B. at Chester, 1728; D. 1783.

KYNWELMARSH, Francis, *kin'-wel-marsh*, an English writer of the 16th century. He was a friend of Gascoigne, whom he assisted in translating Euri-

pides' tragedy of "Jocasta." He and his brother Anthony wrote a collection of poetical pieces, some of which are to be found in the collection called the "Paradise of Dainty Devises," 1576.

KYRLE, John, *kirl*, a benevolent Englishman. Though he had only an estate of £500 a year, he bestowed large sums, in the course of his life, in charity, and built a church; but towards this last good work he obtained subscriptions from other pious and charitable persons. On all accounts, however, he deserved the fine eulogium bestowed upon him by Pope, who emphatically calls him "the Man of Ross." B. at Ross, Herefordshire.

KYTHAL, *ki-tal'*, a town of India, and the capital of a district of the same name. *Pop.* Unascertained. *Lat.* 29° 49′ N. *Lon.* 76° 28′ E.—The DISTRICT fell into the possession of the British in 1843, from the failure of heirs to the last rajah. It then comprised 516 villages.

## L.

LAALAND, or LOLLAND, *lol'-land*, an island of Denmark, in the Baltic Sea. *Area*, 460 square miles. *Desc.* Fertile and level, producing good crops of corn, hops, hemp, and apples The forests yield excellent timber. *Pop.* 56,000. *Lat.* 54° 38′ N. *Lon.* 11° 50′ E.

LAABAT, *la'-rat*, an island of the Malay Archipelago, lying to the N. of Timor-land. *Ext.* 30 miles long, by about the same in breadth. *Pop.* Unascertained.

LABADIE, John, *la'-ba-de*, a French religious impostor. He received his education among the Jesuits, and was admitted a member of that order, which, however, he quitted, to become an itinerant preacher. He pretended to have received visions, declared himself a second John Baptist, and prophesied the second coming of the Messiah. The austerity of his manners, his zeal, and affected piety, procured him many followers, particularly at Amiens, where he obtained a canonry, but, being detected in some criminal intrigues, the bishop ordered him to be put under arrest. Labadie, however, escaped to Toulouse, and became director of a convent of nuns, among whom he introduced a new rule, and the notions of the Quietists, with some additions of his own; viz., that the Scriptures are not necessary to salvation; that outward worship is of no use, but that all prayer should be mental; and that there are two churches, that of Christians in degeneracy, and the other regenerate, or "Labadists," as his followers were called. He renounced the Romish religion at Montauban, in 1650, and, after exercising the ministry there some time, he went to Geneva; being expelled whence, he removed to Middleburg, where he obtained many followers, among whom was the famous Anna Maria Schurman. Labadie sent disciples to propagate his doctrines, and to gather contributions, in different parts of Holland; on which account he was obliged to withdraw to Erfurt, and thence to Altona. His works, which are full of mysticism, are now disregarded. B. at Bourg, Guienne, 1610; D. at Altona, 1674.

LABÉ, Louisa-Charly, *la'-bai*, a French poetess, surnamed the "fair rope-maker," on account of her marriage with a manufacturer of cables at Lyons, who left her, at his death, a large fortune. Her first passion was that of arms, and she distinguished herself, in a masculine dress, at the siege of Perpignan. She had a taste for literature, and her library was enriched with the best writers, French, Italian, and Spanish; but her fine qualities were tarnished by a libertinism which equalled that of Lais. Her poems were printed at Lyons in 1555, and again in 1762. B. at Lyons, 1526; D. at the same place, 1566.

LA BEAUMELLE, Laurent de, *bo'-mel*, a French writer, who, in 1751, became professor of French literature in Denmark. He subsequently went to the court of Frederick the Great, but his quarrels with Voltaire caused him to leave Prussia. He returned to Paris, and obtained an appointment in the Bibliothèque Royale. He wrote "Memoirs of the History of Madame de Maintenon," and other works. B. 1726; D. 1773.

LABEO, Quintus Fabius, *lat'-be-o*, a Roman general. He defeated Antiochus, king of Syria, 188 B.C., and became consul 182 B.C. He was a man of liberality and talents, and is said to have assisted Terence in writing some of his plays.

LABEO, Antistius, a Roman lawyer, who refused the consular dignity when offered him by Augustus, whose projects he opposed. He composed several works, which are lost. His father was one of the conspirators who assassinated Cæsar, and was killed at the battle of Philippi. There was another LABEO, who was tribune of the people, B.C. 184. He caused the censor Metellus to be thrown from the Tarpeian rock.

LABER, *la'-ber*, three small rivers of Bavaria, tributaries to the Danube.

LABERIUS, Decimus, *lai-beer'-e-us*, a Roman knight, who wrote mimes or satirical productions for the stage. Cæsar obliged him to perform one of his own mimes against his will; on which occasion Laberius spoke a satirical prologue against Cæsar, which is preserved in Aulus Gellius. Fragments of his other works are also extant. D. 44 B.C.

LABLACHE, Louis, *la-blash'*, a celebrated Italian singer, who instructed Queen Victoria in the art of music. At 12 years of age he commenced studying for his profession at the Conservatoire of Naples. About the age of 16 he made his first appearance on the Neapolitan stage as a bass singer. His reputation as a vocalist dated from his engagement at La Scala, of Milan, in 1817. For a quarter of a century he was an established favourite at the Italian Operas of London and Paris. He retired from his profession a few years since, and took up his residence at a villa near Naples. B. at Naples, 1794; D. 1858.

LA BLETTERIE, René de, *blet'-tre*, an eminent French professor of rhetoric. He studied ecclesiastical history at the seminary of St. Magloire, and subsequently became professor of rhetoric at the College of France, and was admitted a member of the Academy of Belles Lettres in 1742. He wrote a "Life of the Emperor Julian," in 1735; a "History of Jovianus," in 1748. He likewise translated Cæsar and Tacitus. B. at Rennes, 1696; D. at Paris, 1772.

LA BOETIE, Stephen de, *bo'-ai-te*, a French author of the 16th century, and the friend of the celebrated French essayist Montaigne. At the age of 16, he translated several pieces from Xenophon and Plutarch. He became councillor in the parliament of Bordeaux at the age of 20. Montaigne eulogises him in his chapter on friendship. While still a young man, he wrote a "Discourse on Voluntary Slavery," which is marked by many bold views. B. at Sarlat, 1530; D. 1563.

LA BORDE, John Benjamin de, *la-bord'*, groom of the chamber and favourite of Louis XV. After the death of that king, he devoted himself to literature, and produced several splendidly-printed volumes; among them were, "Essay on Music, Ancient and Modern," "Pictorial Tours in France," and an essay on "Chronological History." He also wrote some plays, which were brought out at the French theatres. B. 1734; perished by the guillotine, 1794.

LA BORDE, Henry Francis, Count de, a French general. He commanded a division at the siege of Toulouse, in 1793. He served in all Napoleon's campaigns, and, in the Russian expedition, was wounded while commanding the Young Guard at Dresden. He was created a peer of France during the Hundred Days, but was banished in 1815. B. 1764; D. 1833.

LA BORDE, Alexander Louis Joseph, Count de, a French author. In early life he fought, as an officer, in the Austrian army, against his native country; but, in 1797, went to France, and devoted himself to literature. He was aide-de-camp to Louis Philippe, general of brigade of the National Guard, and prefect of the Seine, or first magistrate of Paris. He was the editor of many splendid works, a few of the most important being, "Pictorial and Historical Travels in Spain," "Pictorial Travels in Austria," "The Monuments of France," "Travels in Syria," and "Versailles, Ancient and Modern." B. at Paris, 1773; D. 1842.

LA BORDE, Leon Emmanuel Simon Joseph, Count de, son of the preceding, a modern French writer. In 1830 he became secretary of legation to the French embassy in London, and was subsequently appointed conservator of the collection of the Middle Ages and the Renaissance in the Museum of the Louvre. He is a distinguished archæologist, and, like his father, has produced many magnificent pictorial works descriptive of foreign

countries The chief of them are, "Travels in Arabia Petræa," "Travels in the East," "Researches on the Early History of Printing," "Studies on the Arts, Letters, and Industry of the Fifteenth Century;" and "The Revival of the Arts at the Court of France." B. at Paris, 1807.

LABOULAYE, Edward René Lefebvre, *la'-boo-lai*, a modern French lawyer and littérateur. After completing his legal education, he made himself known by his "History of Landed Property in Europe, from the days of Constantine until the present time," a work which was "crowned" by the Paris Academy of Belles Lettres. In 1842 he was appointed advocate to the Cour Royale; and, in 1849, he became professor of law at the College of France. By his clear and elegant style, no less than by his profound knowledge of law, he is eminently qualified to popularize, in his native country, the study of the history and principles of jurisprudence. Among the most important of his legal writings may be quoted the "Essay on the Criminal Laws of the Romans," "Review of Legislation and Jurisprudence," and the "Historical Review of French and Foreign Law." He has been successful in other departments of literature; his "Political History of the United States," "Slavery," and "Studies of Germany and the Sclavonic Nations," are all excellent. In addition to the above-mentioned works, which are selected to represent the character of his writings, a charming volume of light literature must be included in this enumeration of some of the results of his literary life; viz., the "Souvenirs d'un Voyageur," published in 1857. B. at Paris, 1811.

LA BOURDONNAIS, Bertrand Francis Mahé de, *boor'-don-nai*, a French general. He entered the service of the French East-India Company at an early age, and signalized himself on several occasions, particularly at the capture of Mahé, which name he was thenceforth permitted to bear. In 1734 he became governor-general of the Isles of France and Bourbon, both of which were much benefitted by his discreet administration. In the war of 1743, between France and England, he went to the succour of Dupleix at Pondicherry. He besieged the English at Madras, and compelled them to capitulate, in 1746. Dupleix, however, disregarded the terms that La Bourdonnais had entered into with the English, and the latter was sent in disgrace to the Isle of France. He returned to France in 1748, in order to defend his conduct against his accusers. He had no sooner landed than he was incarcerated in the Bastille, where he remained during several years. His innocence being at length established, he was released in 1752, but he died of a broken heart shortly afterwards. He left behind some "Memoirs," in which his misfortunes were vividly depicted, and which were first published in 1760. The author of "Paul and Virginia" has done full justice to the wisdom and generous qualities of the governor of the Isles of France and Bourbon, and has immortalized his name. B. at Saint Malo, 1699; D. 1753. His grandson, B. 1795, D. 1840, was a celebrated chess-player.

LABRADOR, *lăb'-ra-dor'*, a large peninsula of British North America, bounded S. by Canada and the Gulf of St. Lawrence, E. by the Atlantic Ocean, N. by Hudson's Straits, and W. by Hudson's Bay. *Area*, 170,000 square miles. *Desc.* Barren and of dreary aspect, with a mountainous and uneven surface, covered with large stones, and a poor soil, spread with coarse plants, adapted only for deer and goats and other wild animals. The climate is so severe, that neither corn nor any of the hardy kitchen vegetables are raised. The fisheries employ the greater number of the industrious portion of the inhabitants, and about 20,000 British subjects besides. The coast is also visited by between 300 and 400 United States vessels annually. The take of seals is very great every year. *Pop.* 5,000, consisting of Esquimaux and a few Europeans. *Lat.* between 51° and 62° N. *Lon.* between 55° and 78° W. —In 1496 this country was discovered by Cabot, and, in 1610, re-discovered by Hudson.

LABROSSE, Guy de, *la-bross'*, a French botanist, and physician to Louis XIII. He presented to his sovereign the ground upon which the Jardin des Plantes was founded, and was appointed the first keeper thereof. He wrote a "Treatise on the Plague," and several works on botany. D. 1641.

LA BRUYÈRE. (*See* BRUYÈRE, John de la.)

LABUAN PULO, *lăb'-u-an*, an island of the Malay archipelago, 30 miles from Borneo. *Ext.* 10 miles long and 5 broad. It is rich in coal-mines, and is well supplied with water. *Pop.* Unascertained. *Lat.* 5° 22′ N. *Lon.* 115° 10′ E.—In 1846 this island was taken possession of by the British.

LABYRINTHUS, *lăb'-i-rin'-thus*, a building, the perplexing windings of which rendered the way from it almost impracticable. There were four very famous among the ancients,—one near the city of Arsinoë, in Egypt, another in Crete, a third at Lemnos, and a fourth in Italy, built by Porsenna. That of Egypt was the most ancient, and, according to Herodotus, who saw it, superbly magnificent. It was built by twelve kings of Egypt, who reigned together, and was intended as the place of their burial. The labyrinth of Crete was built by Dædalus, in imitation of that of Egypt, and it is the most famous of all in classical history. It was the place of confinement for Dædalus himself, and the prison of the Minotaur.

LA CAILLE, Nicholas Louis de, *kail*, a French mathematician and astronomer. He was educated for the priesthood; but, having attained the degree of deacon, he devoted himself entirely to science. He allied himself with Cassini and Muraldi, and was employed with those astronomers in the verification of the arc of the meridian. The result of his labours was the demonstration of the gradual increase of the degree going from the equator to the pole. This, although long known, had never been verified by actual measurement. At the age of 25, he was nominated professor of mathematics in the Mazarin College, in which capacity he highly distinguished himself, and published for the use of his pupils treatises on geometry, optics, mechanics, and astronomy. In 1751 he went to the Cape of Good Hope to observe the astral system of the southern heavens. He remained there four years, and compiled during his stay a catalogue of stars, which has not been superseded, even at the present day. On his return to Paris, he collected his scientific works, published new editions of some, and laboured incessantly at astronomy. His devotion to science at length cost him his life; for he contracted a fever by passing his nights on cold stones, observing the heavens. B. at Rumigny, Picardy, 1713; D. 1762.

LACCADIVES, *lăk'-ka-dives*, an archipelago of low islands, lying off the Malabar or W. coast of India about 150 miles. There are 19, of considerable size, and of coral formation. The largest is about 7 miles in length and 2½ in breadth. *Pro.* Rice, sweet potatoes, cocoa- and betel-nuts. There are also some small cattle. *Pop.* in the whole, about 7,000. *Lat.* between 10° and 12° N. *Lon.* between 72° and 74° E.

LACEDÆMON, *lăs'-e-dē'-mon*, a son of Jupiter and Taygeta, the daughter of Atlas, who married Sparta, the daughter of Eurotas. He was the fifth king of Sparta, and from him and his wife the capital of Laconia was called Lacedæmon and Sparta.

LACEDÆMON, a noble city of Peloponnesus, the capital of Laconia, called also Sparta, and at the present time Misatra. It was severally known by the names of Lelegia, Œbalia, and Hecatompolis. Lelex is supposed to have been the first king, from whom it was called Lelegia. Twelve of the descendants of Lelex enjoyed the crown before the succession of the Heraclidæ in Procles and Eurysthenes. These two brothers began to reign 1102 B.C.; their successors in the family of Procles were called Proclidæ, and afterwards Eurypontidæ; and those of Eurysthenes, Eurysthenidæ, and afterwards Agidæ. This succession continued until the year 219 B.C., when, under the kings Lycurgus and Agesipolis, the monarchical power was abolished. In 191 B.C., Lacedæmon joined the Achæan league, and in 147 B.C. Laconia was conquered by Mummius, and converted into a Roman province. The inhabitants of Lacedæmon are illustrious in Grecian history for their courage, their love of liberty, and for their aversion to sloth and luxury. They were inured from their youth to labour, and their laws commanded them to make war their profession. They strengthened their bodies by manly exercises, and accustomed themselves to undergo hardships, and even to die without fear or regret. They were forbidden by the laws of their country to visit foreign

countries, lest their morals should be corrupted by an intercourse with effeminate nations. The austere manner in which their children were educated rendered them undaunted in the field of battle. Even the women were as courageous as the men. In the affairs of Greece the interest of the Lacedæmonians was often powerful, and obtained the superiority for 500 years. The authority of their monarchs was checked by the Ephori, who had the power of imprisoning the kings themselves if guilty of misdemeanours. The Lacedæmonians were also remarkable for the honour and reverence which they paid to old age.

LACEPÈDE, Bernard Germain Stephen de la Ville, Count de, *las'-e-paid*, a celebrated French naturalist. He applied himself to the study of natural science from his earliest youth, and, at the age of 18 years, made himself known to Buffon, by addressing to him several interesting memoirs. In 1776 he went to Paris, and obtained the post of assistant-demonstrator at the Royal Garden, through the interest of Buffon, to whom he proposed to continue his Natural History. On the breaking out of the revolution, Lacepède adopted its principles, and became successively commandant of the National Guard, and deputy-extraordinary for Agen in the Legislative Assembly. He was subsequently nominated senator, and, in 1803, grand chancellor of the Legion of Honour: he also held many offices of distinction under Napoleon I. His chief works are "Natural History of Quadrupeds and Serpents," and "Fishes," both of which formed continuations to Buffon's great work. B. at Agen, 1756; D. at Paris, 1825.

LA CERDA, Ferdinand de (so called), *thair'-da*, Infanta of Spain, was the eldest son of Alphonso X., king of Castile and Leon, and, dying before his father, left children, who were deprived of the succession to the Spanish throne by their uncle Sancho IV. B. 1254; D. 1275.

LA CERDA, Bernarda, Donna, a Portuguese lady, who distinguished herself by her poetical talents, and was invited to the court of Spain by Philip III., where she taught Latin to the royal children. She wrote several comedies and poetical pieces. B. at Oporto, 1595; D. 1644.

LA CHAISE, Francis d'Aix, *shaise*, surnamed Father, a celebrated French Jesuit, who was, for some time, professor of philosophy at Lyons, and became provincial of his order. In 1675, Louis XIV. chose him for his confessor, an office which the father filled till his death, 34 years afterwards. He was actively engaged in all the intrigues of the court: his interest was sought by Madame de Monteapan and Madame de Maintenon; but he embraced the cause of the latter, and favoured her marriage with Louis XIV. In religious questions, he took part in the revocation of the edict of Nantes, in 1685; in the condemnation of Fénélon. He was an energetic opponent of the Jansenists; and, on every occasion, endeavoured to advance the interests of his order. Although a man of only slender abilities, his adroitness and insinuating manner enabled him to gain a great ascendancy over the king, of whose conscience he was the keeper. He was the author of several works, particularly "A Course of Philosophy," composed in Latin, and published at Lyons in 1662. Louis XIV. built for his confessor a beautiful rustic dwelling near Paris, which was called Mont-Louis. B. at the castle of Aix, in Forez, 1624; D. 1709.—The grounds which surrounded this house have since been converted into a burial-place, called, at the present time, the Cemetery of Père la Chaise.

LACHAMBRE, Martin Cureau de, *la-shambr'*, physician to Louis XIV. He wrote several works on anatomy and physiology, which were marred by his too great credulity. He was a believer in chiromancy, astrology, &c. B. 1594; D. at Paris, 1669.

LACHLAN, *lăk'-lan*, a river of E. Australia, rising in the counties of King and Bathurst, in N.S. Wales, and, after a course of 400 miles, joining the Murumbidgee, to form the Murray River, near *lat.* 34° 30′ S., *lon.* 144° 10′ E.

LACHMI, or LAKCHMI, *lak'-me*, a Hindoo goddess, the favourite wife of Vishnu. She was pretended to be born of the waves of an ocean of milk. The mangrove and the lotus are held sacred to her. She is generally represented with breasts charged with milk, bearing in her hand a lotus-flower, or scattering the riches of the soil over the earth.

LA COLONIE, John Martin de, *kol'-o-ne*, a field-marshal in the Austrian service, who published his military memoirs at Frankfort, in 1730. He was also the author of the "History of Bordeaux." B. at Perigord, 1674; D. at Bordeaux, 1759.

LA COMBE, De Prezel Honoré, *kome*, an advocate in the parliament of Paris. He published a work on jurisprudence, a Dictionary of Anecdotes, and other works. B. at Paris, 1725.

LA COMBE, Francis, a French miscellaneous writer, who translated into the French language, Orrery's "Life of Swift," and Shaftesbury's "Letters on Enthusiasm;" He also edited "The Letters of Christina, of Sweden," and afterwards added a continuation, entitled "The Secret Letters of Queen Christina," but which has since been pronounced a literary forgery. B. 1733; D. at Montpellier, about 1795.

LA CONDAMINE, Charles Marie de, *kone'-da-mene*, a celebrated French traveller. Actuated by an indefatigable desire for knowledge, he travelled over almost the whole world, and studied nearly every science. In 1736 he was selected, with Bouguer, to make a voyage to the equator, for the purpose of determining the dimensions and the figure of the earth. In this expedition, he travelled over nearly the whole of South America, and was absent from France for ten years, during which he experienced the utmost fatigue and hardship. On his return he published his "Travels in South America," and "The Figure of the Earth, as determined by the Observations of Messieurs De la Condamine and Bouguer." He also produced several works in English and Spanish; contributed to the scientific memoirs of Paris and Berlin; and maintained a correspondence upon scientific subjects with the distinguished in every European city. He was an amiable, learned, and witty man; and while his celebrity as a traveller made him many friends, his refined humour was usually successful in warding off the attacks of his enemies. He was a member of the Paris Academy of Sciences, of the Académie Française, and of the Royal Society of London. B. at Paris, 1701; D. 1774.

LACORDAIRE, Jean Baptist Henri, *la'-kor-dair*, a celebrated French preacher. The religious zeal, which was afterwards to form so prominent a trait of his character, gave no sign of its existence in his earliest years; for, until the age of 22, he diligently pursued his studies for the profession of the law. Whatever opinions of a religious nature his mind had formed up to that period were strongly tinctured with the scepticism of Voltaire. Suddenly, in 1824, he entered the college of St. Sulpice, and, after an interval of three years, was ordained a priest. Becoming acquainted with the author of the "Essay on Indifference," he soon showed himself one of his most ardent followers. (*See* LAMENNAIS.) During the revolution of 1830, Lacordaire, in conjunction with M. de Montalembert, commenced the publication of "L'Avenir," giving to the new paper the motto "God and Liberty." The task they set themselves to accomplish by the aid of their journal was, religious, civil, and political liberty. The strong language and bold opinions of this new religious paper brought Lacordaire before the Court of Assize in the following year. Here he defended himself with the utmost eloquence, and was triumphantly acquitted. He had endeavoured, a few months previously, to join to his priestly function the title of advocate; but the council of that body refused to inscribe his name on their rolls. Not long afterwards, he, with Messrs. Montalembert and De Choux, opened, without authority, a "Free School." In France, such a proceeding was in direct opposition to law; accordingly, he and his coadjutors were ordered to close the establishment. This demand was unheeded, and it was not until force had been employed, that the heads of the school could be induced to leave the place. Lacordaire, Montalembert, and De Choux, were cited before the Chamber of Peers. Condemned to pay the minimum fine, 100 francs, the bold innovators were admitted to have gained the victory. The French clergy were strongly moved by the burning eloquence of Lacordaire and his fellow reformers. What the

result would have been it is difficult to imagine; but it is certain that the papacy felt itself threatened, for Gregory XVI., in 1832, put forth his "Encyclical Letter," in which he declared that "'the regeneration of the Church' was an absurdity, 'liberty of conscience' a mad dream, and 'liberty of the press' a fatal delusion." If Lacordaire, and the other chiefs of "L'Avenir," had given so much uneasiness to the head of the established religion of their country, their submission was most sudden and complete. The three journalists went to Rome: of Lacordaire it is said, "He prostrated himself on the tomb of St. Peter, and rose submissive and transformed." On his return to Paris he devoted himself to preaching. In 1835 he commenced his pulpit orations at the cathedral of Notre Dame, and gathered about him, says one of his French critics, "the worldly crowd by other attractions besides the sacred word. He held forth as to every topic: under the pretext of religion, he discoursed of the present generation, of every-day emotions and interests, of nationality, of liberty, of political economy, of railroads, and of Napoleon. The brilliancy of his language, the energetic audacity of his movements, captivated his hearers." From this it would appear, that a certain style of pulpit eloquence, lately exceedingly successful in England, is nothing else than an imitation of Lacordaire's manner. In 1836 he made a second journey to Rome, where he was well received, and soon afterwards composed a complete retractation of his former opinions as expressed in "L'Avenir." In 1840 he assumed the habit of a Dominican friar, and wrote his "Life of St. Dominic," wherein he justifies, with more poetical power than historical truth, the Inquisition. During the revolution of 1848 he revived his old republican ideas, and took his seat among the "Mountain" party in the Constituent Assembly. His parliamentary efforts were not very successful, however, and he soon resigned his seat. Subsequently, his voice growing very weak, he became director of the college of Sorrèze. He has published several theological works, some sermons, and funeral orations; among others, one upon Daniel O'Connell. B. in France, 1802.

LACRETELLE, P. L., *la'-kre-tel*, usually called Lacretelle the Elder, a French writer. He was a parliamentary advocate during the French revolution, and afterwards sat in the Legislative Assembly, and acted as a member of the Legislative Corps. During the Empire and the Restoration he remained unemployed, his republican principles not permitting him to serve under those governments. He was a profound and voluminous author. A complete edition of his works was commenced in 1823, and included treatises on Eloquence and Philosophy, as well as dramatic pieces, &c. He was, for some time, one of the editors of the "Minerve," a famous paper, whose politics were in opposition to the Empire and the Restoration. He also compiled the articles "Logic," "Metaphysics," and "Moral Philosophy," for the "Encyclopédie Méthodique." B. at Metz, 1751; D. 1824.

LACRETELLE, Charles Joseph, a distinguished French historian, was brother of the preceding, and is generally styled the Younger.

LACROIX, Antony Nicolle de, *la-krwaw'*, an eminent French geographer, who embraced an ecclesiastical life, and devoted himself to the pursuit of geographical knowledge. His "Géographie Moderne" was produced in 1747, and has been several times reprinted, remaining a standard work in his own country. B. at Paris, 1704; D. 1760.—He must not be confounded with another of the same name, who was a teacher of languages and of geography at Lyons, and who produced a "Universal Geography," &c. D. about 1715.

LACROIX, Paul, *la-krwaw'*, a modern French littérateur, generally known under the pseudonyme of the "Bibliophile Jacob." He has been a voluminous writer and compiler, and has produced some scores of novels, dramas, historical, philosophical, and bibliographical works. B. at Paris, 1806.

LACTANTIUS, Lucius Cælius Firmianus, *lak-tān'-she-us*, an eloquent father of the Church, was, according to some, an African, and, to others, a native of Fermo, in Italy. He studied under Arnobius, and became so famous as a rhetorician, that Constantine appointed him preceptor to his son Crispus. He formed his style upon the model of Cicero; but though he wrote with great purity and force, particularly in confuting the pagan errors and follies, he was more of a rhetorician than a theologian. He blended philosophy with divinity, and thereby involved the truths of religion in considerable obscurity. A complete edition of his works was published at Gottingen, 1736; but the best edition is that of Paris, 2 vols. 4to, 1748. Lived at the end of the 3rd and beginning of the 4th century.

LACY, John, *lā'-se*, an English actor and dramatic writer in the reign of Charles II., with whom he was a great favourite. He also wrote for the stage, and produced "The Dumb Lady," "The Old Troop; or, Monsieur Ragout," "Sir Hercules Buffoon." He is not to be mistaken for John Lacy, an English gentleman, who became the zealous friend of the French impostors, who called themselves prophets, at the beginning of the 18th century. He wrote some incoherent tracts on that subject, and was imprisoned for his zeal.

LACYDAS, *la-sī'-das*, a Greek philosopher of Cyrene, and disciple of Arcesilaus, whom he succeeded as master of the second academy. Attalus gave him a garden in which to read his lectures. He foolishly mourned the loss of a favourite goose, which he caused to be buried magnificently. He died of intemperance, B.C. 212.

LADAKH, or MIDDLE TIBET, *la-dak'*, an independent country of Central Asia, separated by the Himalayas from Cashmere, and from Chinese Turkestan by the Karakorum Mountains. On the E. it is bounded by Great Tibet, and on the N.W. by Little Tibet. *Area*, 30,000 square miles. *Desc.* Unfertile, with a severe and variable climate. The cultivation of the soil, however, is eagerly attended to, and crops of average quality of wheat, barley, and buckwheat are raised. Apples, apricots and rhubarb, are also abundantly produced. *Minerals.* Iron, lead, copper, gold, and sulphur. *Pop.* 130,000, mostly Tibetans. *Lat.* between 32° and 36° N. *Lon.* between 76° and 79° E.—This country is the great depôt for the wool of which Cashmere shawls are made.

LADISLAUS I., *la'-dis-laus*, king of Hungary, the son of Bela I., succeeded his brother Geiza in 1080. He added to his dominions Dalmatia and Crotia, reduced the Bohemians, who had revolted, expelled the Huns, and conquered part of Bulgaria and Russia. He also defeated the Tartars, and was as distinguished for his piety as for his valour. He died in 1095, and was canonized in 1198.

LADISLAUS III. succeeded Stephen V., his father, in 1272. He was a debauched prince, and divorced his lawful wife. He also ill-used the clergy, and, rendering himself an object of universal hatred, was assassinated in 1290.

LADISLAUS IV., called also Wladislas, was grand-duke of Lithuania and king of Poland, and elected to the throne of Hungary in 1440. He declared war against the Turks, and employed as his general John Huniades, who was very successful. Ladislaus, however, made peace, which gave such dissatisfaction to the pope and other Christian princes, that he was induced to break it; but he was very unfortunate afterwards, and lost his life in the battle of Varna, in 1444.

LADISLAUS V., the son of Albert of Austria, was made king on the death of Ladislaus IV., under the guardianship of John Huniades. He was very zealous against the Hussites, by whom he is said to have been poisoned in 1457.

LADISLAUS VI., was the son of Casimir IV., king of Poland, and elected king of Hungary, on the death of Matthias Corvinus, in 1490, in opposition to his own brother, Albert, and to John, the natural son of his predecessor, and to Maximilian of Austria. His reign was very turbulent, being constantly at war with the Turks and other neighbouring powers. He died in 1516.

LADISLAUS, or LANCELOT, king of Naples, called the Liberal and Victorious, succeeded his father, Charles Duras, in 1386. He was previously count of Provence and king of Hungary. He obtained the latter crown in 1403, during the imprisonment of Sigismund, who compelled him to return to Italy. On the death of his father, he was opposed by Louis II., duke of Anjou, which occasioned some bloody wars. Pope John XXIII. at first

espoused the cause of Louis, but afterwards took the part of Ladislaus, who, however, marched against Rome, and having taken it, turned his arms on the Florentines, whom he compelled to sue for peace, in 1413. B. 1376; D. at Naples, it is suspected of poison, 1414.

LADISLAUS I., king of Poland, succeeded his brother, Boleslaus II., in 1081. He defeated the armies of Prussia and Pomerania. D. 1102.

LADISLAUS II., king of Poland, succeeded his father, Boleslaus III., in 1139. He made war against his brothers on frivolous pretences, and, after several battles, was driven from his throne; but Boleslaus IV., his successor, gave him Silesia at the request of Frederic Barbarossa. D. at Oldenburg, 1159.

LADISLAUS III., king of Poland, came to the throne in 1296. He pillaged his subjects and seized the goods of the clergy, for which he was expelled, and the crown given to Wenceslaus, king of Bohemia. Ladislaus retired to Rome, but, on the death of Wenceslaus, he was recalled to Poland, where he governed with moderation and wisdom. Pomerania having revolted, he called to his aid the Teutonic knights, who repaid themselves by seizing Dantzic and other places; but Ladislaus marched against the knights, and defeated them. D. 1333.

LADISLAUS V., or WLADISLAS. (*See* JAGELLONS.)

LADISLAUS SIGISMUND VII., king of Poland and Sweden, succeeded Sigismund III., his father, in 1632. Before his advancement to the throne, he signalized himself against the Turks, whom he defeated in several actions. He also repulsed the Russians, and forced them to make peace. D. 1468.

LADOGA, or LADOSKA, *la-do'-ga*, a lake in the N. of European Russia, lying between the Baltic and Lake Onega, and surrounded by the governments of Petersburg, Wiburg, and Olonetz. *Ext.* 130 miles long and 75 broad. *Desc.* The shores are generally low, and it contains several islands and numerous rocks. Forty rivers fall into it, and its surplus waters are discharged by the Neva into the Gulf of Finland. Several canals form a line of navigation all round its S. and S.E. sides.

LADRONES, or MARIANA ISLANDS, *la-drones'*, a cluster of islands, belonging to Spain, in the North Pacific Ocean, stretching 450 miles from N. to S. They consist of about twenty islands, and only five are inhabited. *Desc.* Densely wooded and fertile, enjoying throughout most part of the year a serene and temperate climate, the heat of the sun being tempered by regular breezes from the sea. *Pop.* about 10,000. *Lat.* between 13° and 21° N. *Lon.* between 144° and 145° E. This group was discovered by Magellan, and it was at Tinian, one of them, that Commodore Anson, in his voyage round the world, landed in 1742, and of which he gives a luxuriant description.

LADRONES ISLES, a cluster of small islands off the S. extremity of China, 20 miles from Macao. *Lat.* 21° 52′ N. *Lon.* of the Great Ladrone, 113° 44′ E.

LADRONES, three small islands in the Pacific Ocean, on the coast of Veragua, 8 miles S.E. of Cape Boruca. *Lat.* 8° 20′ N. *Lon.* 83° 16′ W.

LADVOCAT, John Baptist, *lad'-vo-ka*, a learned French writer, who became doctor, librarian, and professor of the Sorbonne. The duke of Orleans, having founded a Hebrew professorship in the Sorbonne, appointed Ladvocat to it in 1752. His works are, a Geographical Dictionary; an Historical Dictionary, which has since been repeatedly enlarged; a Hebrew Grammar, &c. B. at Vaucouleurs, 1709; D. at Paris, 1765.

LADY ISLE, *laï'-de*, an uninhabited rocky islet off the W. coast of Scotland, 5 miles from Ayr. It is the only place along a great extent of coast affording a sheltered anchorage.

LADY'S ISLAND, in the Atlantic, near the coast of America. *Lat.* 42° 30′ N. *Lon.* 80° 32′ W.

LELIUS, Caius, *le'-li-us*, consul of Rome, 140 B.C. He distinguished himself as a soldier in Spain, and was no less celebrated for his eloquence and poetical genius. He was the intimate friend of Scipio Africanus the younger, and is said to have assisted Terence in his comedies. There was another consul of this name, 163 B.C. He accompanied the elder Scipio to Africa, and took part in the victories over Asdrubal and Syphax.

LAENNEC, René Théophile Hyacinthe, *lan'-nek*, a distinguished French physician, inventor of the stethoscope and of the art of "mediate auscultation." After completing his medical education at Nantes, under his uncle, a celebrated physician, and at Paris he obtained the degree of doctor of medicine in 1814. His literary acquirements were extensive, and he rapidly grew into fame as a lecturer and writer on medicine. In 1816 he became chief physician at the Hôpital Necker, and soon afterwards made known his important discovery in his "Treatise on Mediate Auscultation." His health, which had been always delicate, now grew so infirm that he was compelled to resign his large private practice and his official appointments, to repair into Brittany. In 1821 he returned, with restored health, to Paris, and was appointed professor of medicine in the College of France. Five years later his health again gave way; and it was found, by means of the system he had himself invented, that he was attacked with consumption. He retired to Brittany, and soon afterwards died. His great invention of the stethoscope, as well as his valuable works, elucidated the pathology of diseases of the chest, which till his time had been involved in the greatest obscurity. His most invaluable work, the "Mediate Auscultation," has been translated into English by Dr. Forbes. Besides this, he also produced a number of excellent treatises on medicine, and was altogether one of the greatest advancers of medical science the world has seen during the last century. B. at Quimper, Brittany, 1781; D. 1827.

LA FAYETTE, *la' fai-yet'*, the name of several counties in the United States. 1. In Louisiana. *Area*, 374 square miles. *Pop.* 7,000.—2. In Missouri. *Area*, 650 square miles. *Pop.* 14,000.—3. In Mississippi. *Area*, 790 square miles. *Pop.* 15,000.—4. In Arkansas. *Area*, 16,400 square miles. *Pop.* 16,000.—5. In Wisconsin. *Area*, 630 square miles. *Pop.* 12,000.—Also the name of several towns, with populations varying between 3,000 and 14,000.

LA FAYETTE, Louise Motier, Mademoiselle de, a French lady, celebrated for her beauty and wit. She was maid of honour to Anne of Austria. Louis XIII. became inspired with a lively passion for her, but she resisted his entreaties, and sought, in 1637, the retirement of a cloister, where she assumed the name of Sister Angelica. D. 1665.—Madame de Genlis made her the heroine of a romance, first published in 1812, entitled "Mademoiselle de la Fayette."

LA FAYETTE, Madame de. (*See* FAYETTE.)

LA FAYETTE, Gilbert Motier, Marquis de, a celebrated soldier and patriot. He came of a noble family in Auvergne, and, at the age of 20 years, fitted out a frigate at his own expense, and sailed for America, to fight in the ranks of the insurgents against British domination. Returning to France at the end of two years, he again sailed for America, with reinforcements of ships, men, and money, and distinguished himself in Virginia and at the siege of York-town. His energy and ability greatly contributed to the foundation of the republic of the United States. The renown he had acquired in America caused him to be elected, in 1787, member of the Assembly of Notables, and in 1789 deputy in the National Assembly. In this capacity he warmly defended the republican ideas then in vogue, and proposed the first declaration of the rights of man, which ultimately formed the basis of the constitution. In July, 1789, he was appointed commandant of the national guard, upon which occasion he caused his soldiers to assume a tri-coloured cockade,—blue and red, the colours of the commune of Paris, and white, the colour of the French lily,—this being the origin of what afterwards became the national colours. He protected the royal family on the 5th and 6th October, and when the people broke out into insurrection in July, 1791, he defeated them with his national guards on the Champ de Mars. On being appointed to command the army of the north, he defeated the allies at Philippeville and Mauberge. In August, 1792, he was outlawed for having arrested the commissioners of the National Assembly sent to watch him at his camp at Compiègne, where it is said he had previously invited the king to seek an asylum. Upon this, he, with a few friends, crossed the frontier, intending to take up his residence in a neutral country, but was

arrested by the Austrians, and confined in the fortress of Olmütz, in Moravia. He remained there during five years, but was released by a special article in the treaty of Campo-Formio. Strongly opposed to Napoleon's ambition, La Fayette took no part in public affairs during the Consulate and the Empire. On Napoleon's return from Elba in 1815, La Fayette was returned to the House of Representatives, where, after the defeat at Waterloo, he replied, in answer to Lucien's appeal: "We have followed your brother through the burning sands of Syria, as well as to the frozen deserts of Russia; the bleached bones of two millions of Frenchmen scattered all over the globe attest our devotion to him. That devotion is now exhausted, for his cause is no longer the cause of the nation." As a member of the Chamber of Deputies under the Restoration, he was the untiring advocate of constitutional liberty. In 1825 he visited the United States, where his journey was a perpetual ovation. During the revolution of 1830, he was nominated for the second chief of the national guard, and was one of the first to propose Louis Philippe as king of the French. The new monarch, however, soon became jealous of his popularity, and sought to counteract his great influence by proposing a measure for the abolition of the post of commander-in-chief of the national guard. This attack La Fayette forestalled by tendering his resignation, and henceforth the relations of La Fayette and Louis Philippe were of the most uncordial character. La Fayette took a distinguished part in some of the greatest events of his epoch, in the American revolution, and in those of 1789 and 1830. Although not possessed of commanding genius, he was ever actuated by patriotic and disinterested motives. But perhaps with him the qualities of the heart were superior to those of the mind. Throughout his long career, he showed a want of foresight and decision, and proved himself a general more fitted to excite popular commotion than to direct and establish national security. La Fayette left behind his "Memoirs," which were published by his family in 1837-40. B. at Chevagnac, in the department of the Haute-Loire, 1757; D. at Paris, 1834.

LAFITAU, Joseph Francis, *la'-fe-to*, a French Jesuit, who was a missionary among the Iroquois in America. He wrote the "Manners of the Native Americans compared with those of the Primitive Times," a "History of the Discoveries of the Portuguese in the New World," and other works. D. 1740.

LAFITTE, Jacques, *la'-feet*, the chief banker of France during the Empire and the Restoration. He was the son of a poor carpenter at Bayonne, and in 1787 walked to Paris, where he obtained the situation of assistant clerk in the banking-house of Perregaux, at a salary of £48 per annum. He became successively book-keeper, cashier, chief clerk, manager, junior partner, and, in 1809, succeeded to the business, and thenceforth carried it on in his name. His eminently profound and practical talents for finance procured for him the posts of regent of the Bank of France, and president of the Paris Chamber of Commerce. During a monetary crisis, in 1815, Lafitte lent the government the sum of 2,000,000 francs. In the same year, Louis XVIII., on his departure for Ghent, deposited with the banker a very considerable sum, which Napoleon I. respected. Four months afterwards, the emperor himself, when leaving Paris for the last time, lodged in the same hands the sum of 5,000,000 francs. Lafitte wished to give Napoleon a receipt, but the latter replied: "It is unnecessary. I know you, M. Lafitte; you never liked my government, but you are an honest man." In 1830 he was said to be possessed of a private fortune of upwards of £2,000,000 sterling, but in the following year the great European monetary panic took place, and the house of Lafitte fell, along with those whose creditor it was. At this juncture Lafitte sold off the whole of his private property, amounting to 10,000,000 of francs, and subsequently, after the full discharge of his liabilities, he was ascertained to have a surplus of 8,000,000 francs. At his death, his remains were attended to the cemetery of Père-la-Chaise by the most eminent personages of Paris, and his funeral oration was pronounced by Arago. B. at Bayonne, 1767; D. at Paris, 1844.

LA FONTAINE, (*See* FONTAINE, LA.)

LA GALISSONNIÈRE, Marquis de, *ga'-lees-son'-ne-air*, a French admiral, who, in 1745, was appointed governor-general of Canada, and became one of the most esteemed of the French viceroys of that colony. In 1756 Louis XV. confided to his charge the fleet destined to act against the English in the Mediterranean. He was opposed to Admiral Byng at Minorca, and co-operated at the taking of Mahon. B. at Rochefort, 1693; D. 1756.

LAGIDES, *laj'-i-dees*, an Egyptian dynasty, the chief of which was Ptolemy, son of Lagus, a general of Alexander. It ruled in Egypt from the death of Alexander until the reduction of the country into a Roman province, 30 B.C., a period of 293 years. (*See* EGYPT and PTOLEMY.)

LAGNY, Thomas Fantet, Sieur de, *lan'-ye*, a French mathematician. He was designed for the bar, but preferred geometry to jurisprudence, and was educated accordingly at Paris, by the liberality of the duke de Noailles. He became a member of the Academy of Sciences, and Louis XIV. appointed him royal hydrographer at Rochefort; but, sixteen years afterwards, he was recalled to Paris, and made librarian to the king, with a considerable pension. He wrote: "New Methods for the Extraction and Approximation of Roots;" "Elements of Arithmetic and Algebra;" "The Cubature of the Sphere;" "A General Analysis or Method of Resolving Problems;" and several papers in the Memoirs of the Academy. He was a fellow of the Royal Society of London. B. at Lyons, 1660; D. at Paris, 1734.

LAGO MAGGIORE, or LAKE OF LOCARNO, *la'-go mad'-je-or-ai*, the most W. of the great lakes of Upper Italy, inclosed by Lombardy, Piedmont, and the Swiss canton Ticino, and extending from Sesto northwards to Locarno. *Ext.* 40 miles long and 2 broad. It is traversed by the Ticino, of which it is only an expansion, and contains the Borromean Isles. Steam-packets ply upon it; but, in summer, its climate is subject to sudden thunder-storms.

LAGOS, *la'-goce*, a very ancient well-built town of Portugal, in the province of Algarva, defended by several forts, 110 miles from Lisbon. *Pop.* 7,000.

LAGOS, a town of Guinea, the capital of a slave state in the Bight of Benin. It was situate about 160 miles from Benin, and was destroyed by the British in 1851.

LAGOS, a town of the Mexican confederation, 60 miles from Guadalaxara. In its neighbourhood are some silver-mines. *Pop.* Unascertained. *Lat.* 21° 27′ N. *Lon.* 101° 32′ W.

LAGOS, a large river and bay of Western Africa. *Lat.* 6° 20′ N. *Lon.* 3° 30′ E.

LA GRANGE, *la granj*, a county of the United States, in Indiana. *Area*, 380 square miles. *Pop.* 9,000.—Also the name of several townships, none of them with a population above 2,000.

LAGRANGE, Joseph Louis de, *la'-granj*, a celebrated mathematician. At the age of 18 years he took rank among the most learned men of his time, by addressing to Euler some answers relative to the isoperimetrical problems which had engaged his attention since his tenth year. In his nineteenth year he became professor of mathematics in the School of Artillery at Turin, and soon afterwards, in conjunction with a few friends, founded the Royal Academy of the same city. In 1764, and the following years, he bore off the mathematical prize offered by the Paris Academy of Sciences. In 1766 he was invited by Frederick the Great to Berlin, to succeed Euler as president of the academy, and remained in that city during twenty years. After the death of Frederick he went to reside at Paris, where Louis XVI. had provided apartments for his use in the Louvre. He passed unscathed through the revolutionary period, and was appointed professor at the Polytechnic School. Napoleon I. gave him a seat in the Senate, and loaded him with dignities. His illustrious friend Laplace thus characterized him in his funeral oration:—"Among those who have most effectually extended the limits of our knowledge, Newton and Lagrange appear to have possessed in the highest degree the happy art of detecting general principles, which constitutes the true genius of science. This art, joined to a rare elegance in the exposition of the most abstract

theories, characterized Lagrange." "Lagrange," says Professor Hamilton, "has perhaps done more than any other analyst to give extent and harmony to such deductive researches" (the theoretical development of the laws of motion), "by showing that the most varied consequences respecting the motions of systems of bodies may be derived from one radical formula; the beauty of the method so suiting the dignity of the results as to make his great work a kind of scientific poem." Of the works of this luminary of mathematical science we have space only to enumerate the most important: these are, "Analytical Mechanics," the second edition published in Paris, 1811-15; "Theory of Analytical Functions," second edition published 1813; "Resolution of Numerical Equations," 1826; "Lessons on the Calculus of Functions." In addition to a crowd of highly important contributions to the Transactions of the learned societies of Turin, Berlin, and Paris, he produced treatises "On the Origin of Comets," "On the Calculation of Eclipses," and on the "Method of determining the Orbit of a Comet from Observations." B. at Turin, 1736; D. at Paris, 1813.

LAGRASSE, *la'-grass*, a town and parish of France, in the department of Aude, 20 miles from Carcassone. *Pop.* 1,500, mostly engaged in some iron-works in the neighbourhood.

LA GUERONNIÈRE, Louis Stephen Arthur, Viscount de, *ger-ron'-e-air*, a modern French politician and journalist. Until the year 1848 he had only appeared as a writer by contributing articles to provincial newspapers. His political predilections were, till a recent period, in favour of the "Legitimist" party. M. de Lamartine, who evinced the warmest friendship towards him, appointed him chief editor of his new journal, the "Pays," in 1850; but subsequently publicly disavowed the political views of his colleague, as expressed in the "Political Portraits" written by him for that journal. The series commenced with the portrait of the then president of the republic, but was stopped after the publication of that of the count de Chambord. Shortly afterwards, he abandoned all his former political friends, as well as suffered a total change of opinion. After the *coup-d'état* of the 2nd of December, he became one of its stoutest defenders. In 1853 he entered the Council of State, and shortly afterwards became an officer of the Legion of Honour. He has since become a contributor to the "Moniteur." B. in France, 1816.

LAGUNA, Andrew, *la-goo'-na*, a Spanish physician. He was a favourite with Charles V., at whose court he resided. He published "Annotations on Dioscorides," an epitome of the works of Galen, and a treatise on Weights and Measures. B. at Segovia, in 1190; D. 1560.

LAGUNA, or ST. CHRISTOBAL DE LA LAGUNA, the capital of Teneriffe, the principal of the Canary islands, situate on a basaltic hill, 2,000 feet above the level of the sea, surrounded by gardens. In the neighbourhood are a great number of windmills. *Pop.* 7,000. *Lat.* 28° 28′ N. *Lon.* 16° 20′ W.

LAGUNA, the name of several towns in South America, none of them with a population above 2,000.

LAGUNA-DE-MADRE, a county of the United States, in Texas, extending along the coast, nearly from the mouth of the Rio Grande del Norte to that of the Nueces. *Ext.* 100 miles long, with a breadth of 10.

LAGUS, *lay'-gus*, a Macedonian of mean extraction, married Arsinoë, daughter of Meleager, who, according to some accounts, was then pregnant by King Philip, and being willing to hide the disgrace of his wife, he exposed the child in the woods. An eagle preserved the life of the infant, and fed him with her prey. This uncommon preservation was divulged by Lagus, who adopted the child and called him Ptolemy, conjecturing that as his life had been so miraculously preserved, his days would be spent in grandeur and affluence. This Ptolemy became king of Egypt after the death of Alexander. The first of the Ptolemies was called Lagus, to distinguish him from his successors of the same name. Ptolemy, the first of the Macedonian kings of Egypt, wished it to be believed that he was the legitimate son of Lagus, and he preferred the appellation of Lagides to all other appellations. The surname of Lagides was transmitted to all his descendants on the Egyptian throne till the reign of Cleopatra, Antony's mistress.

LA HARPE. (*See* HARPE, John Francis de.)

LAHIRE, Philippe de, *la'-here*, a French mathematician, who was professor of astronomy and mathematics in the College of France, and became a member of the Academy of Sciences, in 1678. He was employed in many important public works; among the rest, one for the determination of the water-levels, preparatory to the construction of the aqueduct for supplying Paris. His chief works were treatises "On Conical and Cylindrical Sections," "On Surveying," and "On Mechanics." B. at Paris, 1640; D. at the same city, 1719.

LA HOGUE. (*See* CAPE LA HOGUE.)

LAHORE, *la-hor'*, the capital of the Punjab, in British India, standing on an affluent of the Ravee. It was formerly a great city, the occasional residence of the Great Moguls, all of whom expended considerable sums on palaces, gardens, &c. It was visited in the year 1609 by a Mr. Finch, who describes it as a magnificent residence, nearly ten miles in length, surrounded by fortifications having twelve gates. Of all its grandeur little now remains, except some handsome tombs, among which is that of the emperor Jehangire. This place has an educational establishment, in which European knowledge is taught through the vernacular language. *Pop.* estimated at 110,000. *Lat.* 31° 34′ N. *Lon.* 74° 20′ E.—After the defeat of the Sikhs, in 1849, this city was taken possession of by the British.

LAHOUL, *la-hool'*, a district of the Punjab, in British India. *Area*, 1,870 square miles. *Desc.* Encompassed by lofty mountains, two of the passes of which respectively attain an elevation of 13,300 and 16,500 feet above the level of the sea. The general height of the whole country is considerable; whilst it is traversed by numerous torrents. Good grain crops are produced. *Manf.* Woollens for domestic use. The inhabitants are a Tartar race, and followers of Lamaism. *Pop.* Unascertained. *Lat.* between 32° and 33° S. *Lon.* between 76° 45′ and 77° E.—The men of this country are mostly employed as carriers over the mountains, and they transport their goods on the backs of ponies. They wear grass shoes, and their women are loaded with rude trinkets of silver and glass beads.

LAHR, *lar*, a town of Baden, in the circle of the Middle Rhine, 18 miles from Strasburg. *Manf.* Woollens, linens, cottons, tobacco, and leather. *Pop.* 6,400.

LAIBACH. (*See* LAYBACH.)

LAIGLE, *laigl*, a town and parish of France, in the department of Orne, 18 miles from Mortagne. *Manf.* Needles, pins, and steel goods. *Pop.* 6,000.

LAINEZ, James, *lai-neith'*, a Spaniard, and one of the companions of Loyola, whom he succeeded in the generalship of the Jesuits, in 1558. He assisted at the council of Trent, where he supported the papal authority to an extravagant degree. He obtained from Paul IV. the perpetual generalship of the order, and the following extraordinary privileges: the right of making all manner of contracts without the privity or consent of the society; that of giving authority and authenticity to all comments and explanations of the constitutions; the power of making a new and altering the old, and that of having prisons independently of the secular power. Lainez refused a cardinalship. B. in Castile, 1512; D. at Rome, 1565.

LAING, Malcolm, *laing*, a Scottish historian, who studied at the university of Edinburgh, where he formed a member of the celebrated Speculative Society. He was subsequently called to the Scottish bar; but, although he displayed high forensic abilities, he never succeeded in obtaining much practice. In 1793 he commenced his literary career by editing Henry's "History of Britain." Five years later, he produced "The History of Scotland, from the Union of the Crowns, on the Accession of James VI., to the Union of the Kingdoms in the Reign of Queen Anne." He afterwards appended to the second edition of this work a "Preliminary Dissertation on the Participation of Mary, Queen of Scots, in the Murder of Darnley." He represented Orkney for some time in parliament, and enjoyed the friendship of FOX. B. in Orkney, 1762, D. 1818.

LAING, Samuel, an English traveller and writer, was brother of the preceding. He wrote some valuable

works, the chief of which were "Notes of a Traveller," "Travels in Norway," and the "Heimskringla."

LAING, Samuel, an English politician and political economist, son of the preceding. After completing his education at the university of Cambridge, he was called to the bar, in 1840. He subsequently became private secretary to Mr. Labouchere, when president of the Board of Trade. In that capacity he produced a remarkable report on British and Foreign Railways. In 1846 he returned to his practice as a lawyer; but soon afterwards became chairman of the Brighton Railway Company. In 1854 he was at the head of the Crystal Palace Company, and to his efforts the permanent establishment of that structure at Sydenham was in a great measure due. In 1852 he was returned to parliament, and soon distinguished himself therein as a conspicuous member of the railway interest. His name was connected with some extensive railway operations on the continent of Europe, and with the Great Western of Canada. In politics and finance he shares the convictions of Mr. Gladstone. B. at Kirkwall, 1813.

LAIS, *lai'-is*, a celebrated Greek courtesan, and the mistress of Alcibiades. A native of Hycara, in Sicily, she was brought to Greece when Nicias, the Athenian general, invaded that country. She first resided at Corinth, where she sold her favours for 10,000 drachmas. The expenses which attended her pleasures gave rise to the proverb "Non cuivis homini contingit adire Corinthum" ('It is not in every man's power to visit Corinth'). Her fame attracted even Demosthenes to visit her; but he is afterwards reported to have said, "I could not afford to purchase repentance at so dear a price." She afterwards went to Thessaly, where the women, jealous of her personal charms, and apprehensive of her corrupting the fidelity of their husbands, assassinated her in the temple of Venus, about 340 B.C.

LAKE, *laik*, the name of several counties of the United States. 1. In Ohio. *Area*, 220 square miles. *Pop.* 15,000.—2. In Indiana. *Area*, 463 square miles. *Pop.* 4,000.—3. In Illinois. *Area*, 468 square miles. *Pop.* 15,000.

LAKE, Gerard, Viscount, a distinguished English general. He entered the army at the age of 14, served in the Seven Years' War, and subsequently participated in the campaigns in America and in Holland. During the rebellion in Ireland in 1797-98, he acted as commander-in-chief of the British force. In 1800 he went out to India as commander-in-chief, and three years afterwards took the field against the Mahrattas, whom he signally defeated before the city of Delhi. On entering that city, he obtained possession of Shah Allum, the Mogul emperor, nominally the sovereign of India, but in reality the tool of the Mahrattas. He afterwards reduced Agra, and, by a series of brilliant successes, took from Scindiah all his possessions beyond the river Chumbul. He operated in 1804-5 against Holkar, whom he defeated after an obstinate resistance. For his distinguished services, he was created, on his return to England in 1807, a viscount, having been previously raised to the peerage, as Baron Lake of Delhi and Laswaree. B. 1744; D. 1808.

LAKE OF THE THOUSAND ISLANDS, a lake in the N.W. part of Upper Canada, British North America. It is formed where the river St. Lawrence emerges from Lake Ontario, and extends for 40 miles N.E. from Kingston. It is supposed to contain about 1,700 islands, the largest, Wolfe Island, being 10 miles in length and 6 in breadth.

LAKE OF THE WOODS, or DU BOIS, a lake of British N. America, 70 miles long and 40 wide. It is studded with forest. *Lat.* 54° 36′ N. *Lon.* 95° 20′ W.

LAKHON, *lak-hon'*, a town of Siam, on a tributary of the river Me-itam. *Pop.* Supposed to be about 20,000. *Lat.* 10° 20′ N. *Lon.* 100° 20′ E.

LALAND, *lol'-land*, an island of Denmark. (*See* LAALAND.)

LALANDE, Michael Richard de, *la'-land*, a French musician. When young, he became a chorister in the church of St. Germaine l'Auxerre, but on reaching manhood he lost his fine voice, and applied himself to the study of the violin, in hopes of being employed by Lulli at the opera; but, being refused, he broke his instrument, and studied the organ. The duke de Noailles recommended him to Louis XIV., who appointed him musical instructor to the court. He was also composer and chapel-master to the king. B. at Paris, 1657; D. at Versailles, 1726.

LALANDE, Joseph Jerome le Français de, an eminent French astronomer. He was sent to Paris for the purpose of studying jurisprudence, but his attention having been early directed to Fontenelle's "Discourses on the Plurality of Worlds," he secretly devoted himself to the pursuit of astronomical science. He attended the lectures of Lemonnier and Delille, and made such considerable progress as to be able to undertake, before he had attained his nineteenth year, a series of observations for determining the moon's distance from the earth, at the observatory of Berlin. On his return to Paris, the Royal Academy, in token of their admiration of the manner in which he had completed his task, elected him a member of their body. His reputation as an astronomer was thus permanently fixed. In 1762 he became professor of astronomy at the College of France, and filled that office during 45 years, with the greatest success. None of his contemporaries surpassed him in presenting a succinct exposition of the science of astronomy. As an author, he was eminently successful in conveying, in a clear and popular manner, the truths of his favourite science to the ordinary reader. He was an industrious observer, and contributed largely to the scientific memoirs of the French Academy. His principal works were: "Treatise on Astronomy;" "Reflections on Eclipses of the Sun;" "Compendium of Historical and Astronomical Navigation;" "Astronomy for Ladies;" "Letter on Saturn's Ring;" and "Astronomical Bibliography." B. at Bourg, in the department of Ain, 1732; D. at Paris, 1807.

LALLI, John Baptist, *lal'-le*, an Italian poet, who was employed by the duke of Parma and the pope in the government of several cities. He wrote, among other works, "The Nefarious French," "Jerusalem Forlorn," and the "Æneid Travestic." B. 1573; D. at Norsino, in Umbria, 1637.

LALLY, Thomas Arthur, Count de, *lal'-le*, a distinguished French general. He came of an Irish family that had followed James II. to France. He signalized himself at the battle of Fontenoy, and was appointed brigadier in the field by Louis XV. In 1756 he was sent to the East Indies as governor of the French possessions. He took Gondalore and Fort St. David, but was defeated before Madras; on which he retired to Pondicherry, which he was obliged to surrender to the English in 1761. On his arrival in France, he was accused of betraying French interests in India, and the popular clamour was so great that he was sent to the Bastille, and afterwards tried by the parliament, which condemned him to be guillotined, on the absurd charge of having sold Pondicherry to the enemy. He underwent his sentence with great fortitude, in 1766. His son, M. Lally de Tollendal, obtained a reversal of the sentence, and a grant of his father's estates, in 1783. B. in Dauphiny, 1702.

LAMA, *la'-ma*, the name of several towns in Italy, none of them with a population above 3,000.

LAMAR, *la'-mar*, a seaport-town of S. America. (*See* COBIJA.)

LAMARCK, John Baptiste Pierre Antoine de Monet, Chevalier de, *la'-mark*, an eminent French botanist and zoologist. He served for some time under Marshal de Broglio, but quitted the career of arms for that of science. He at first devoted himself to botany, and made the acquaintance of Buffon, who greatly assisted him. In 1779 he became a member of the Academy of Sciences, and was despatched on a travelling tour over Europe to collect rare specimens of plants for the Jardin du Roi. In 1794 he was appointed professor of zoology to that body, a post he retained until his death. His principal works were "The Natural History of Invertebrate Animals," and the "French Flora." He also wrote botanical articles for the "Encyclopédie Méthodique." B. in France, 1744; D. at Paris, 1829.

LAMARTINE, Alphonse, *la'-mar-teen*, an illustrious French poet. His family name was Du Prat, but he assumed that of Lamartine from a maternal uncle. His father was a major of cavalry in the royal service, and was imprisoned during the reign of terror; but, after the fall of Robespierre, the family retired to their country seat at Milley, where the future poet re-

ceived his first education, in the midst of a domestic serenity he afterwards depicted in his "Confidences." He was subsequently sent to finish his studies at Belley, with the "Pères de la Foi." After a short sojourn at Lyons, he made his first visit to Italy; and, towards the close of the Empire, repaired to Paris, where he devoted himself to study, to the composition of verse, and to social enjoyment. On the exile of Napoleon to Elba, he took military service under Louis XVIII.; but after the Hundred Days, he left the military for a literary career. He visited Italy for the second time in 1818. In 1820 his fame suddenly and unexpectedly commenced; in that year he produced a small and modest volume, for which he could hardly find a publisher; this was entitled "Méditations Poétiques." With the exception of some translations from Byron, French literature had, for a considerable period, been without anything like sentimental or impassioned poetry. Accordingly, this new style of verse was received with universal admiration; 45,000 copies of the volume were sold in the period of four years, and its author was hailed as a great French poet, worthy to take rank with Beranger; the latter being the poet of Imperialism and the Revolution, the former that of Religion and Royalty. A diplomatic career next opened to the popular poet; he was appointed to a post at the French embassy at Florence, and afterwards became secretary of embassy at Naples and at London, where he married a young and beautiful English lady, who was possessed of a large fortune. About this time his maternal uncle made him his heir, on condition that he should assume the name of Lamartine. He was next chargé-d'affaires in Tuscany, when some remarks made by him in his last canto of "Childe Harold," derogatory to Italian national character, led to a duel between himself and Colonel Pepé, afterwards celebrated as an Italian patriot general, wherein the poet was dangerously wounded. He composed several poetical works while sojourning in Italy; among the rest, his "Nouvelles Méditations," first published in 1823; the "Mort de Socrate," and the "Harmonies Poétiques et Religieuses." In all these a strong religious sentiment and a spirit of loyalty for the Bourbons, as well as a bitter feeling towards the Empire and the Revolution, were displayed. He was recalled to France in 1829, and was elected a member of the Académie Française. On the outburst of the French revolution of 1830, he was about to proceed to Greece, as minister plenipotentiary of Charles X. The new monarch Louis Philippe offered to retain him in his appointment, but Lamartine declined. The events which had brought about the fall of the restored Bourbons, produced a profound impression on his enthusiastic spirit. He had seen his much-loved Bourbon dynasty hurled from power by a succession of foolish acts. This year was to prove the turning point of his career. He was henceforth to commence a life of political activity; his career as a poet may almost be said to have ended at this time, for, except "Jocelyn," "La Chute d'un Ange," and a few songs, he wrote no more verse. As a politician and a prose writer, he resolved to spend the remainder of his life. Speaking of this crisis in his career, he said, "The past may be regretted, but the day must not be wasted in idle tears. I wish to enter the ranks of the people, to think, speak, act with them." He now sought to obtain a seat in the Chamber of Deputies, and successively presented himself as candidate for the suffrages of Toulon and Dunkirk, but without success. Prevented for the time from taking an active part in political affairs, he resolved to repair to the land of his aspirations and his dreams, the East. In 1832 he set sail from Marseilles, with his wife and daughter, on board a vessel which he had himself equipped, carrying with him a collection of princely presents for the chiefs of the lands he was about to visit. He travelled in oriental countries for sixteen months, but was recalled, just as he had reached Jerusalem, by the news that he had been elected as deputy by the Legitimist constituency of Bergues. He was now actively engaged in politics, and soon became a leader of the "Progressive Conservative" party; but, in 1845, he openly expressed his dislike for the government of Louis Philippe and his minister Guizot, which he characterized as one of "vulgar utility." He became an influential member of the opposition party. It may be mentioned, by the way, that his greatest oratorical achievements in the Chamber of Deputies, up to this period, had been his speeches on Eastern questions, on the abolition of the punishment of death, and against M. Arago in defence of literary studies. He wrote, too, at the same period, many small works expressive of his opinions on passing events. In 1835 he published his celebrated "Souvenirs, Impressions, Pensées, et Paysages pendant un voyage en Orient," which was almost as popular in an English translation, —"Pictures of the East," as in its original language. His great effort, however, during the last years of Louis Philippe's reign, was the "History of the Girondins," which had an immense weight in producing the fall of the minister Guizot, and in bringing about the revolution of 1848. During that eventful period, Lamartine became one of the most prominent, if not the most prominent man of the day. It was owing to his eloquence that the Chamber of Deputies refused a compromise between the revolution and the Orleans family. He risked his life in withstanding the demands of the leaders of the insurgents and their followers, that the red flag should be the colours of the new republic. "For myself," he said, "I will never consent to adopt it. The tricoloured flag has waved all over the world. It is identified with your liberties and your glory. The red flag has never waved but over the Champ de Mars, and has only been imbued with the blood of the people." He became a member of the provisional government, and the foreign minister of the Republic. He did good service to his country in that capacity, by preventing a general war of revolutionary interference, which the more violent revolutionists desired. His popularity during several months was immense; he was the particular idol of the middle classes, who beheld in him a bulwark between themselves and anarchy. Curiously enough, after a few months, his countrymen grew so indifferent towards him, that it was with difficulty he was elected to the Chamber of Deputies. When his name was announced with that of Louis Napoleon and Cavaignac for the office of president, he obtained by far the fewest votes of the trio. After the *coup d'état* of December, 1851, he retired from politics and devoted himself exclusively to literature. Indeed his means had become so straitened that a most strenuous effort had to be made by him to ward off total pecuniary ruin. A French critic observes of this circumstance, "Notwithstanding the illusory wealth bestowed upon him by the Sultan in the shape of territorial grants, notwithstanding the enormous sales of his works, notwithstanding the vast subscriptions started for his benefit in France and abroad, the ruin of his fortune by public disturbances, and by his own life of princely munificence, have condemned him to a species of literary drudgery to which he has nobly submitted, but in which he has consumed, in a number of ephemeral productions, more force and power of intellect than would have been required to produce three or four great and immortal works." In obedience to the call of pressing necessity, he has been, since his retirement from political life, one of the most industrious authors in France. To particularize a few of his most important productions, there are "The History of the Revolution of 1848," "Raphael," "Les Confidences," "Nouvelles Confidences;" these three being autobiographical; "History of the Restoration," "History of Turkey," "History of Russia," and "Fresh Travels in the East." Most of these have been translated into English and the other European languages. He has been the proprietor and director of two newspapers, the "Bien Public," published at Maçon, and the "Pays," published at Paris. His poetical and prose works have been collected and republished in several forms; but, in addition to these, he has produced a crowd of pamphlets and political effusions. M. de Lamartine's life has presented a remarkable instance of the instability both of riches and fame. After stirring to its centre the heart of his native country by his impassioned lyrics, and attaining, while yet a young man, to the pinnacle of popularity; after rendering incalculable services to the country that gave him birth, and preserving it from anarchy during the revolutionary crisis of 1848, and

during which he was the cynosure of all eyes; after prodigious industry and talent, producing a vast number of excellent books, historical and political; after inheriting from his relative, and acquiring with his wife, a considerable fortune, he is found in his old age, poor and neglected, his means embarrassed, and his countrymen forgetful of the works they once hailed with enthusiasm. In an address to a collected edition of his works, which he has been preparing, he makes an appeal to France, and to the world, unfolding these bitter circumstances of his life. It is true that this great evil of his declining days is principally due to himself; for though literature, his inheritance, and his marriage threw money into his lap, he insisted on living like a prince, and wasted his substance by foolishly trying to shine in a way for which boundless wealth was indispensable. B. at Maçon, 1792.

LAMB, Charles, *lăm*, a distinguished English essayist and humorist. He was the son of a clerk to Mr. Salt, a bencher of the Inner Temple, in which legal stronghold he first saw the light. He was sent at an early age to Christ's Hospital, where Coleridge was his schoolfellow. Reared in the very heart of the metropolis, he throughout life evinced a strong perception of the splendour, squalidness, excitement, and oddities of the great world of London. "I often shed tears," he said, "in the motley Strand, for fulness of joy at so much life." An impediment in his speech prevented his gaining an exhibition at the university, and, in 1792, he became a clerk in the India House, a post he retained during 33 years. With the exception of one terrible circumstance, his life was very uneventful. In 1796 his sister, worn out by constant toil at her needle, as well as weakened in nerves by confinement, took her mother's life in an uncontrollable fit of frenzy. Her insanity being established, she was allowed to remain in the charge of her brother, a duty which Lamb religiously fulfilled to the end of his life. She subsequently recovered her reason, and her brother, who was never married, passed his days with her, both evincing the utmost affection and devotedness to each other. He first appeared as an author in a small book of poems, published in conjunction with Coleridge and Lloyd. Although this was severely handled by the "Anti-Jacobin," Lamb was not deterred from authorship; for, some time afterwards, he produced a drama, entitled, "John Woodvill." His delightful "Essays of Elia," upon which his fame mainly rests, were first printed in the "London Magazine." He was highly esteemed by a large intellectual circle, among which may be named his life-long friend Coleridge, Leigh Hunt, Southey, Rogers, and Talfourd. The last gentleman published "Lamb's Letters," and "Final Memorials," in 1848; and those who would fully appreciate his captivating essays, and morsels of autobiography scattered through his writings, should consult these tributes to a genial and estimable man. His complete works include two volumes of verse, the "Essays of Elia," and "Specimens of English Dramatic Poets who lived about the time of Shakspere." The "Farewell to Tobacco," "Essay on Roast Pig," "Christ's Hospital thirty years ago," and the "Old Benchers of Lincoln's Inn," may be mentioned as representative bits of his refined, quaint, easy humour. In one of the last essays of Elia he records his feelings on being released from drudgery at the India House in a delightful manner. The paper is called "The Superannuated Man;" the event happened in 1825. His death was the consequence of what was thought but a slight accident. For quaint, genial, and unconventional humour, Lamb has, perhaps, never been excelled; in the present day he is entirely without even a good imitator, and, unlike Theodore Hook, and many living humorous writers, his works will preserve their freshness till long after the generation for whom they were composed. B. in London, 1775; D. at Edmonton, 1834.

LAMBALLE, Maria Theresa Louisa, of Savoy-Carignan, Princess de, *lam'-bal*. She was married to the duke de Bourbon-Penthièvre, but became a widow in the flower of youth and beauty. Being appointed, in 1774, superintendent of the household to Marie Antoinette, queen of France, she became the particular favourite of that unfortunate princess. On the flight of Louis XVI. and his family, she came to England; her attachment, however, to the queen was so great that she returned to France, and entered the prison of the Temple with her royal friend. She was dragged thence to La Force, and lastly, in September, 1792, brought before a ferocious tribunal, where she was butchered with sabres, her head and breasts cut off, and her heart taken out. These, borne on pikes, were carried about in savage triumph, and inhumanly taken to the king and his family. B. at Turin, 1749.

LAMBARDE, William, *lam'-bard*, an English lawyer and antiquary. He published a collection and translation of the Anglo-Saxon laws; and, in 1574, established an hospital for the poor at Greenwich. In 1579 he became justice of the peace for the county of Kent, and subsequently produced a work on the duties of his office, entitled, "Eirenarchia." He also wrote "Archeion; or, a Discourse upon the High Courts of Justice in England," and collected materials for another work on Great Britain; but on finding that Camden was engaged upon a similar task, he abandoned his intention of publishing it. It was subsequently issued under the title of "Dictionarium Angliæ Topographicum et Historicum." B. 1536; D. 1601.

LAMBECIUS, Peter, *lam-be'-she-us*, a learned German writer. At the age of 19 he published "Remarks on Aulus Gellius." In 1652 he was appointed professor of history at Hamburg, and, in 1660, was chosen rector of the college. He married a rich old woman, but so peevish and covetous, that, to escape her, he went to Rome, where he embraced the Roman Catholic religion. He afterwards became librarian to the emperor of Germany. B. at Hamburg, 1629; D. at Vienna, 1680.

LAMBERT, *lăm'-bert*, of Aschaffenburg, a celebrated German Benedictine, who, in 1058, made a journey to Jerusalem, and, on his return to Europe, composed a "Universal History, from the Creation of the World to the year 1050;" the greatest part of it, however, is a history of Germany. It was printed at Basil in 1660.

LAMBERT, emperor and king of Italy. He reigned conjointly with his father till 894, but afterwards became sole monarch. He was constantly at war with Berenger and Arnoul. He is said to have been assassinated while hunting, in 898.

LAMBERT, son of Adalbert II., duke of Tuscany, reigned in Tuscany 929—931. He contributed to place on the throne Hugh of Provence, his half-brother; but the latter ungratefully declared him to be a pretender, and, seizing his person, deprived him of sight.

LAMBERT, John, major-general in the parliamentary army in the reign of Charles I. He is stated to have been a student of the law on the breaking out of the struggle between the king and the parliament; but, joining the popular standard, he became a colonel, distinguished himself at the battles of Naseby and Fife, and assisted Cromwell in his advancement to the Protectorate, but opposed his taking the title of king. For this, Cromwell deprived him of his commission, but, from prudential motives, granted him a pension of £2,000 a year. Being divested of all employment, he withdrew into private life, but, on the death of the Protector, he was chosen by the Rump parliament to repress the royalist insurrection. A short time previously he took an active part in deposing Richard Cromwell; for his services he was appointed one of the council of state, and colonel of a regiment of horse. The parliament, however, growing jealous of his influence with the army, directed him to resign his commission: this he absolutely refused, and, marching to London, dispersed the parliament by force, in October, 1659. He was then appointed major-general of the army, and sent to command the forces in the north; but General Monk having defeated him, and restored the parliament, he was deserted by his army, submitted, and was committed prisoner to the Tower. At the Restoration he was tried and condemned, with Sir Harry Vane; but was pardoned, and banished to Guernsey, where he remained during upwards of 30 years. B. about 1620; D. at Guernsey, 1692.

LAMBERT, John Henry, an eminent German mathematician. He wrote a "Treatise on the Orbits of Comets," a "Treatise on the Properties of Light," and other works. He was an estimable man, and profoundly versed in the mathematical sciences, as known during his time. B. at Mülhausen, Upper Alsatia, 1728; D. at Berlin, 1777.

LAMBERT, Michael, *lam'-bair*, a French composer of

high reputation during the reign of Louis XIV., but was, in old age, surpassed by Lully, his son-in-law. His works were collected and published in 1666. Boileau, in his third satire, alludes to him. D. at Vivonne, near Poitiers, about 1610; D. at Paris, 1696.

LAMBERT, Charles Francis, a French ecclesiastic, who quitted the church, and went to Paris, where he wrote for the booksellers. He wrote the new "Telemachus," "Memoirs of a Woman of Quality," a "History of all Nations," and other works. D. 1765.

LAMBERT, St., the name of several parishes and market-towns in France, none of them with a population above 2,000.

LAMBESC, Charles Eugène de Lorraine, Prince of, *lam'-besk*, was the relative of Marie-Antoinette, whom he accompanied to France, and became colonel-proprietor of the Royal German regiment. A determined enemy of the revolution, he charged the mob assembled at the Tuileries, in July, 1789, and wounded several persons with his own hand. He was afterwards tried for the act, but obtained an acquittal. Upon this, he left France, served in the Austrian army, and reached the grade of lieut.-fieldmarshal. He left no issue, and was the last representative of one branch of the house of Lorraine. B. 1754; D. at Vienna, 1825.

LAMBESC, a town of France, in the department of the Mouths of the Rhone, 12 miles from Aix. *Pop.* 3,050.

LAMBETH, a suburb of London, forming the western extremity of that portion of the metropolis which lies on the south bank of the Thames, here crossed by several bridges. The principal public building now is Lambeth Palace, the residence of the archbishop of Canterbury, an extensive pile situate near the Thames. The architecture is irregular, and exhibits the styles of various ages. Near the river, and close to the palace, is Lambeth church, the different parts of which have been built at various periods of the 14th, 15th, and 16th centuries; and the whole was repaired and embellished in 1769. *Pop.* 252,000.

LAMBRECHT, *lām'-brekt*, two towns of Germany, neither of them with a population above 1,500.

LAMBRUN, Margaret, *lām'-brun*, a Scotch heroine, was a servant of Mary Stuart, as was her husband, who died of grief for the death of that queen. Margaret resolved to avenge the death of her husband and mistress upon Elizabeth, and, to accomplish her purpose, assumed a man's habit, and repaired to the English court; but, as she was pushing through a crowd to get near the queen, she dropped one of her pistols. This being observed, she was seized and brought before Elizabeth, who examined her strictly, and Margaret replied, "Madam, though I appear in this habit, I am a woman. I was several years in the service of Queen Mary, whom you have unjustly put to death; you have also caused that of my husband, who died of grief to see his innocent queen perish so iniquitously. Now, as I had the greatest love for both, I resolved to avenge their deaths by killing you. I have made many efforts to divert my resolution from this design, but in vain: I found myself necessitated to prove by experience the truth of the maxim, that reason nor force can hinder a woman from vengeance, when she is impelled by love." The queen calmly heard this discourse, and answered: "You are then persuaded that in this action you have done your duty, and satisfied the demands which your love for your mistress and your spouse required from you; but what think you is my duty to do to you?" Margaret asked if this question was put as a queen or a judge, and on her majesty's saying as a queen, "Then," said Margaret, "your majesty ought to grant me a pardon." "But what assurance can you give," said the queen, "that you will not repeat the attempt?" "Madam," Lambrun rejoined, "a favour which is given under restraints is no favour; and, in so doing, your majesty would act as a judge." The queen was so struck with her behaviour, that she gave her a pardon and a safe-conduct out of the kingdom.

LAMEGO, *la'-mai-go*, a town of Portugal, in the province of Beira, on a tributary of the Douro, 46 miles from Oporto. Its principal edifices are a bishop's palace and a cathedral. *Pop.* 9,000.

LAMENNAIS, Félicité Robert, Abbé de, *la'-men-nai*, a celebrated French divine. He was the son of a shipowner at St. Malo, and was intended by his father to follow a mercantile pursuit; but an unconquerable love of learning led him to acquire, almost unassisted, a considerable store of knowledge. In 1807 he became teacher of mathematics in the college of St. Malo, and, in the following year, produced his first work, entitled "Reflections on the State of the Church in France." In 1811 he took the preliminary vows of his church; in 1814 he went to Paris, where he wrote a pamphlet against Napoleon I., then in exile at Elba, for which he was forced to make his escape from the capital during the Hundred Days. He went to England, where he resided for some time as usher at a school in the vicinity of London. In 1816 he returned to France, and was ordained a priest. His remarkable "Essay on Indifference in matters of Religion" appeared the following year, and produced a profound impression. He visited Rome several years afterwards, and was offered a cardinal's hat by Leo XII., but declined the honour. During the French revolution of 1830 he warmly embraced the democratic cause, declaimed against the temporal abuses of the Church, and in "L'Avenir," with Lacordaire and Montalembert (*see* LACORDAIRE), while he defended the interests of the Roman Catholic Church, desired that religion should be "regenerated" by being brought home to the bosoms of the lower classes, since the educated people had grown indifferent to its truths. He advocated the separation of the temporal from the spiritual power of the Church. These views evoked a remonstrance from the Holy See; upon which the journal was suppressed. In 1834 he produced his "Words of a Believer," a work which completely shut him out from the ranks of the Roman Catholic clergy. The pope condemned the book, but the republican party accepted its author as an apostle of civil and religious liberty. In 1840, for his "Pays et le Gouvernement," he was sentenced to undergo a year's imprisonment. He subsequently wrote other works, all expressing his views with the old earnestness and eloquence. Before his death, every effort was made to cause him to retract, but without avail. He left some papers, which the clergy for a time prevented from being published; but, a lawsuit resulting, the documents were ordered to be printed according to their author's last wishes. B. at Saint Malo, 1782; D. 1854.

LAMI, Giovanni, *la'-me*, an Italian writer, who wrote in defence of the Nicene creed, against Leclerc and others. In 1732 he became librarian of the Ricciardi collection, and professor of ecclesiastical history at the Florence Lyceum. In 1740 he commenced the publication of a literary journal, called "Novelle Litterarie." He likewise made a selection of the inedited works contained in the Ricciardi Library, and published them under the title of "Deliciæ Eruditorum," in eighteen volumes. He had projected a History of the Eastern Churches from the Council of Florence, in 1439, but his death interrupted the plan. He was throughout life a warm opponent of the Jesuits. B. at Santa Croce, Tuscany, 1697; D. at Florence, 1770.

LAMIA, *lai'-mia*, a Greek courtesan, who became concubine to Ptolemy I., king of Egypt, with whom she was taken prisoner by Demetrius Poliocertes, who made her his mistress. The Athenians erected a temple to her, under the name of Venus Lamia.

LAMMERMUIR, or LAMMERMOOR, *lām'-mer-moor*, a ridge of moorish hills in Scotland, extending for 30 or 40 miles through the counties of Haddington and Berwick to the North Sea. Their principal summits have an elevation of about 1,500 feet above the level of the sea.

LAMORICIÈRE, Christophe Louis Juchault de, *la'-moriss'-e-air*, a celebrated French general. He was educated for his profession at the Polytechnic School, between the years 1824-26, after which he passed to the school of Metz. In 1830 he had reached the grade of lieutenant, and subsequently, in the African war, he rose with great rapidity. He was appointed captain of the Zouaves on the organization of that corps, and, in 1837, had risen to the rank of colonel. He was wounded by the explosion of a mine at the siege of Constantine; after a short sojourn at Paris, he returned to Africa, where he distinguished himself on several occasions. In 1844 he became commander of the Legion of Honour, and was appointed temporary governor of Algeria.

At this period he had attained to the rank of general. Under Marshal Bugeaud, between the years 1841-45, he displayed the highest qualites of a commander, and terminated his career two years later, by skilfully surrounding Abd-el-Kader, and causing him to surrender himself prisoner to the Duc d'Aumale. During the revolution of 1848, he rode amongst the insurgents in the costume of a colonel of the National Guard, proclaimed the abdication of Louis Philippe, and the regency of the duchess of Orleans; but his horse was killed and himself wounded, and he narrowly escaped death at the hands of the mob. The provisional government offered him the office of minister of war, which he refused. In the insurrection of June, he acted under Cavaignac, and fought against the insurgents at the Bastille, and elsewhere. At the time of the election of president, he was sitting in the Legislative Assembly, and offered no opposition to the new head of the nation. In 1849, on the Russian intervention in Hungary, he was dispatched on an extraordinary mission to the court of Russia, but did not arrive until after the Hungarians had been subdued. On again taking his seat in the Legislative Assembly, he became a strenuous opponent of the president and his party. On the *coup d'état* of December, 1851, he was arrested and at first conducted to Ham, but afterwards released, and conducted as far as Cologne by the agents of the police. He then took up his residence at Brussels, where he usually continued to live up to the year 1860, when Monsignor Merode, one of the pope's household, and formerly a soldier, sought him in his retreat, and induced him to undertake the chief command of the papal troops, a task he commenced with wonderful zeal. B. at Nantes, 1806.

Lamotte, Antoine Houdar de, *la-mot'*, a French author. He was the son of a hatter, and was educated for the legal profession; but having a love for dramatic composition, he resolved to devote himself entirely to the theatre. In 1693 he produced his first drama,—"Les Originaux," which was unsuccessful. He subsequently wrote a number of comedies and tragedies, which obtained some success; only one of them, however, keeping possession of the stage,—the tragedy of "Inez de Castro," praised by Voltaire. Lamotte became a member of the French Academy, and was appointed dramatic censor. But he is chiefly remarkable for his presumptuous attempt to translate the Iliad of Homer, without any knowledge of Greek. By way of improving that poem, he abridged it to twelve cantos, and added to it a discourse, in which he stated that the admiration for Homer and other ancient writers was only a prejudice of his time. About the age of 40 he became blind, and lost the use of his limbs. B. at Paris, 1672; D. 1731.

Lamotte, Jeanne de Valois, Countess de, a lady, who, becoming aware of the ridiculous passion of Cardinal Rohan for Queen Marie-Antoinette, suggested to the prelate the idea of purchasing for that princess a magnificent diamond necklace. She engaged herself to deliver the present to the queen, and to procure for the cardinal an interview with her. For this she was, in 1785, convicted of imposture and swindling, and was condemned to make honourable amends with a cord about her neck, to be whipped and branded, and to be confined in La Salpêtrière. She found means of making her escape, and took refuge in England, where she printed a book containing reflections on Queen Marie-Antoinette's moral character. D. in England, 1791.

Lamotte-Fouqué, Frederick Henry Charles, Freiherr de, *foo-kai'*, a celebrated German poet and novelist. His family came originally from France, but his grandfather had entered the service of Frederick the Great of Prussia. He himself entered the Prussian army in 1796, but after serving for some time, and attaining the rank of major, he retired, in consequence of ill-health. Thereupon he retired to his estate of Nennhausen, near Rathedow, and devoted himself to literature. Under the pseudonyme of Pellegrin, he published a translation of the "Numantia" of Cervantes, as well as several poems; the novel of "Alwin," and the "History of the noble Knight Galmy, and a beautiful Duchess from Brittany." He subsequently proceeded to write a succession of poems and novels of great freshness and power, chiefly in the style of the old German poets, or founded upon the old Northern mythology. In 1813 he gave to the world his exquisite tale "Undine," which has been reproduced in every European language, and has become an established favourite, in virtue of its feeling and fancy, and the decided originality of its construction. During the thirteen subsequent years he produced poems, dramas, and novels, all imbued with a romantic and chivalric feeling. In 1840 he published his "Tidings for the German Nobility," and, in 1843, a devotional work, entitled "Apostasy and Repentance; or, the Looking-glass of the Soul." He edited a collected edition of his works about the same time. B. at Brandenburg, 1777; D. at Berlin, 1843.

Lamouroux, J. V. Felix, *la'-moo-roo*, a French naturalist, who devoted himself to the study of marine productions, animal and vegetable, and was professor of natural history at Caen. He wrote many treatises for the "Classical Dictionary of Natural History," and composed a dictionary of Zoophytes for the "Encyclopédie Méthodique." In 1817 he described a new variety of wheat, which was afterwards cultivated with success in the northern provinces of France, under the name of *blé lamma*. B. at Agen, France, 1779; D. at Caen, 1825.

Lampedusa, *lam'-pai-doo'-sa*, an island of the Mediterranean Sea, about midway between the coast of Tunis and Malta. It has a circumference of about 13 miles, and, in 1813, was taken possession of by the king of Naples as a place of banishment.

Lampeto, or Lampedo, *lăm'-pe-to*, a queen of the Amazons, who boasted of being the daughter of Mars. She gained many conquests in Asia, where she founded several cities. She was afterwards surprised and destroyed, with her female attendants, by a band of barbarians.

Lamplugh, Thomas, *lămp'-lu*, an English prelate. He complied with the Presbyterians in the civil war, but conformed at the Restoration, and became D.D., principal of Alban Hall, and vicar of St. Martin-in-the-Fields. In 1676 he was ordained bishop of Exeter. When the prince of Orange landed, the bishop made a speech to the clergy and gentry, exhorting them to be loyal to James, who gave him the archbishopric of York. Notwithstanding this, he took the oaths to William and Mary. B. in Yorkshire, 1615; D. at Thorp Castle, 1691.

Lampridius, *Ælius*, *lăm-prid'-e-us*, a Roman historian, of the fourth century. He wrote the lives of the emperors Commodus, Antonius, Diadumenius, Heliogabalus, and Alexander Severus, which were included in the "Historiæ Augustinæ." (*See* Augusta Historia.)

Lamsacus, *lăm'-sa-kus*, a maritime village of Asia Minor, nearly opposite Gallipoli, on the Hellespont. It is the Lampsacus of antiquity, and was given by Xerxes to Themistocles.

Lana, Francis de, *la'-na*, an Italian mathematician, who is stated to have been the first to conceive the idea of aërostation, and to have described the subject in a work called "Magisterium Naturæ Artis," published at Brescia, in 1684. A particular dissertation on the subject, entitled "Navis Volans," tending to abate the claims of Montgolfier to this discovery, was published, from Lana's work, at Naples, in 1784. B. at Brescia, 1637.

Lanark, a royal burgh of Scotland, and the county town of Lanarkshire, 30 miles from Edinburgh. It consists of several streets and lanes, standing on a slope within half a mile of the Clyde. The public buildings are the town-house, a county hall, a council-room, court-hall and weigh-house, the prison, the parochial church, and several other places of worship. In a niche on the outside of the church is a colossal statue of the patriot Wallace, some of whose daring exploits were performed in this town. *Manf.* Muslins, and other cotton goods. *Pop.* 5,300. In the vicinity are the celebrated "Falls of Clyde."

Lanark, New, a well-built village, about a mile to the S. of the above. It owes its origin to an extensive establishment for the manufacture of cotton yarn, begun by Mr. David Dale in 1784. Great attention was paid to the morals of the children, and to their education, by the late Mr. Robert Owen, whose first attempts to establish a new system of social organization were made here. *Pop.* 2,000.

LANARK, a county of W. Australia, bounded by the Pacific Ocean on the S. and W., between *lat.* 35° and 36° S., and *lon.* 116° E.

LANARKSHIRE, *lăn'-ark-sheer*, sometimes called CLYDESDALE, from the river Clyde, a county of Scotland, bounded on the N. and N.W. by the counties of Renfrew, Dumbarton, and Stirling; N.E. by the counties of Linlithgow and Edinburgh; E. by Peebles-shire; S. by Dumfries-shire; and S.W. by Ayrshire. *Area*, 940 square miles. *Desc.* It is subdivided into three inferior divisions, called wards. The upper ward, which is nearly two-thirds of the whole county, is mostly mountainous, or at least hilly and moorish. At the S. extremity of the county, where it is bounded by Dumfries, there is a very elevated range of ground, rising, in some parts, to 3,100 feet, and others between 2,500 and 3,000 feet above the level of the sea. In proceeding down the Clyde, the prospect opens; the hills stand at a greater distance from one another, the ascents are less abrupt, and the mixture of hill and dale forms a scene at once simple and sublime. Towards the lower part of the upper ward, though the soil is in general less fertile, the country becomes more interesting. *Rivers and Canals.* The Clyde is the principal. The other streams, which are tributary to the Clyde, are the Daer, the Coulter, the Methvens, the Douglas, the Mouse, the Nethan, the Avon, Calders (North and South), Rotten Calder, Kelvin, Cart, and Leven. It has also three canals,—the Forth and Clyde Canal, which connects, by means of the firths of Forth and Clyde, the German and Atlantic Oceans; the Monkland Canal, which connects the city of Glasgow with the extensive coal-fields in the parishes of Old and New Monkland; and the Ardrossan Canal. *Pro.* The soil and climate seem to be much disposed to the growth of wood; and spontaneous copses everywhere fringe the hanging banks of the rivers. Orchards, embosomed in woods, stand all along the Clyde, by the foot of the rising slopes, and excellent crops of wheat, oats, barley, potatoes, and turnips are raised. The pastures are extensive, and the breed of draught horses is among the best in Scotland. *Minerals.* Abundant; consisting of freestone, limestone, ironstone, coal, and granite. It is calculated that the coal stretches through this county, in one solid mass, over nearly 110 square miles, or 55,000 acres, and that its average thickness cannot be less than five yards. Among the mountains, near the S. extremity of the county, are lead-mines, which have been wrought for nearly two centuries. In the same district, gold is sometimes found among the mountains, in veins of quartz, or worked down into the sand of rivulets. *Manf.* Important. At an early period, some manufactures of coarse woollen were established in Lanarkshire; also fine linen and checks, cottons, muslins, the printing of calicoes, the dyeing of Turkey red, and the preparation of various dyes, and other necessary ingredients. Glass and crystal manufactures are carried on to a great extent; the pottery manufacture, the brewing of ale and porter, and the distilling of spirituous liquors, as well as various others, are also actively pursued. *Boroughs.* There are three royal burghs,—Lanark, the county town; the city of Glasgow, and the town of Rutherglen. *Pop.* about 540,000.

LANCASHIRE, *lăn'-kă-sheer*, a maritime county of England, on the N.W. coast, stretching along the extensive bay of the Irish Sea, which is formed within the isles of Anglesey and of Man. It is bounded on the W. by the Irish Sea, E. by the mountains of Yorkshire, S. by Cheshire, and N. by Westmoreland and Cumberland. *Area*, 1,806 square miles. *Desc.* Level along the sea-coast on the west, but rugged and mountainous in the N. and E., where the long ridge called the "backbone of England" separates it from Yorkshire. In the N., Coniston Fell is the highest summit, and rises to nearly 2,600 feet above the level of the sea. *Rivers, Lakes, and Canals.* The principal are the Mersey, the Ribble, the Wyre, the Duddon, and the Irwell. There are several lakes, of which Windermere, Coniston, and Esthwaite are the chief. All the rivers tend to form large estuaries as they fall into the sea; and they are, in general, much encumbered with sand-banks. Those, however, which are not naturally navigable, have been rendered so; and such extensive canals have been formed, that all parts of the county

may be said to be joined together in one continued water communication. The principal are the Sankey Canal, the Leeds and Liverpool, the Lancaster, the Ashton-under-Line, the Rochdale, the Manchester, Bury, and Bolton canals, and the Haslinden Canal. *Pro.* The soil of Lancashire is very various, being on the higher grounds in general moorish, rocky, and barren; but it improves along the valleys, rivers, and seacoast, where the land is sufficiently adapted for the ordinary crops. Of the corn crops raised, by far the most abundant is oats. Very little barley, peas, beans, or even wheat, were formerly grown; but matters are changed in this respect. Lancashire has been long famous for its potatoes, and a variety of other vegetables are also raised, especially near the towns; and, indeed, horticulture is greatly attended to. *Minerals.* Abundant, especially coal. Extensive fields of this mineral are found in the S. and middle divisions of the county. Limestone, freestone, whin, slates, and flags also abound. Iron ore is plentiful in Furness; also copper ore, but not in great abundance. *Manf.* The most extensive of cotton, in all its branches, in the kingdom, or, perhaps, the world; also of silk, woollen and linen, hats, stockings, pins, needles, nails, watch-tools and movements, tobacco and snuff, earthenware, porcelain, paper, &c. Manchester being the principal seat of the cotton manufacture, it spreads from it on all sides. A variety of other employments, as those of bleachers, dyers, printers' tool-makers, engine and machine-makers, &c., depend for their existence on this manufacture; and there are also in the county large works for smelting iron and copper, for blowing common and casting plate-glass, and for manufacturing white-lead, lamp-black, vitriolic acid, &c. *Pop.* 2,100,000.—This county is by railways connected with all the principal parts of the United Kingdom. In the time of Edward III., it was made a county palatine, in favour of the son of Edward, John of Gaunt, who was the progenitor of the Lancastrian sovereigns; but, in the reign of Edward IV., it was re-annexed to the crown.

LANCASTER, *lăn'-kăs-ter*, the capital town of the above county, on the Lune or Loyne, over which there is a bridge, 20 miles from Preston. Nearly the whole town is built from quarries of excellent freestone in the neighbourhood. Of the public buildings, the castle, wholly occupied as the county gaol, is the most important and interesting, and is still admired for its extent, and the peculiar character of its architecture. The walls of the keep are of amazing thickness, and the apartments of uncommon dimensions. It is generally ascribed to the Saxons; but the principal part of the building was erected by Edward III. and his son John o' Gaunt, whom he created duke of Lancaster. A little to the west of the keep are the shire-hall and county-courts. Contiguous to the castle is the parish church, a spacious Gothic structure, dedicated to St. Mary. There are, besides, other places of worship, a town-hall, custom-house, assembly-rooms, theatre, mechanics' institute, various schools and charitable institutions. The Lancaster Canal passes close to the town, about a mile north-east of which is the great aqueduct bridge, by which the canal is carried over the Lune. *Manf.* Inconsiderable; consisting of sail-cloth, cotton, silk, linen, and furniture. Shipbuilding has been carried on to a considerable extent. *Pop.* 27,000.—Lancaster is in communication by railway with all parts of the kingdom.

LANCASTER, the name of several counties in the United States. 1. In Pennsylvania. *Area*, 928 square miles. *Pop.* 100,000.—2. In Virginia, on the western shore of Chesapeake Bay. *Area*, 96 square miles. *Pop.* 6,000.—3. In South Carolina. *Area*, 562 square miles. *Pop.* 12,000.—Also the name of several post-townships, none of them with a population above 5,000.

LANCASTER, the capital of Lancaster county, Pennsylvania, 22 miles from York. *Pop.* 13,000.

LANCASTER, Sir James, an English navigator, who, in 1591, sailed as commander of a squadron to the East Indies, where he touched at Ceylon and Sumatra, and, after taking several vessels and losing some of his own, shaped his course for England; but in the voyage, meeting with adverse winds, he was driven on the coast of America. He landed on a small island, and

the crew, taking advantage of his absence, cut the cable and sailed for England. He afterwards obtained a passage on board a French ship, and arrived at Rye in 1594. He went out again with another fleet, with which he committed many depredations on the coast of Brazil, and took the town of Pernambuco, where he obtained immense treasure, which he brought to England in 1595. He next commanded the fleet sent out by the newly-established East-India Company, and obtained the grant of a settlement at Achin, and also at Bantam, after which he returned to England. He maintained the existence of a north-west passage, and encouraged many attempts to discover it during his lifetime, and was knighted by Queen Elizabeth for his services. D. 1620.

Lancaster, Joseph, the founder of Lancasterian schools in most parts of the civilized world. Before he had attained his nineteenth year, he set up a school for poor children in a room lent him by his father, in the Borough-road, Southwark, and, in a short time, had ninety children under his charge. He continued his philanthropic effort of disseminating education among the lowest classes, and, in 1805, was honoured by an audience of George III. who said, "I wish that every poor child in my dominions may be able to read his Bible." The established church made him many overtures, which he, as a member of the Society of Friends, was constrained to decline. Almost unaided, he travelled over the United Kingdom, and lectured to upwards of 50,000 people on the system which he had organized: this system consisted in teaching the elements of education by mutual or monitorial instruction. Becoming insolvent, he emigrated to the United States in 1818, and pursued his educational efforts with much success in that country. He visited Canada in 1829, and obtained several grants from the parliament of Lower Canada in furthcrance of his educational projects. He became embarrassed in his means once more; but his friends subscribed to purchase a small annuity for him. B. in London, 1778; D. at New York, 1838.

Lancaster Sound extends west from Baffin Bay into Barrow Strait. *Lat.* 74° to 75° N. *Lon.* 80° W.

Lance, George, *lance*, a modern English painter, celebrated for his fruit-pieces and still-life productions. He studied high or historical art under Haydon; but it was not until he had discovered where his true powers lay that he made any marked progress. This he did accidentally, by copying a group of fruit as a study of colour. Indeed, as a copyist, he was exceedingly skilful; a proof of which may be cited in his wonderful restoration of the "Boar-Hunt," by Velasquez, now in the National Gallery, and which had been injured by a clumsy "restorer," to whom it had been intrusted to clean. Almost from the first moment of his bringing his skill to bear on the peculiar line of art for which he afterwards became distinguished, he proved that a great painter in an original line had appeared. For many years, he has sent to the exhibitions of the British Institution and the Royal Academy productions marked by skilful composition, brilliant colour, and harmonious effects. His "Fruit," "Game," "Just Shot," "Fresh from the Lake," "Just Gathered," and a host of similar works, have charmed beholders, as splendid reproductions of grapes, melons, fruit, flowers, dead birds, game or fish. The Vernon collection contains three good examples of his manner,—"Fruit," 1832; "Fruit," 1848; and "Red-cap." B. at Little Easton, Essex, 1802.

Lancelot, Dom Claude, *lance'-lot*, a celebrated grammarian, who became professor at Port Royal in 1638, and composed for the use of his pupils a series of excellent works. He shared in the persecutions to which the establishment of Port Royal was subjected, on account of its attachment to Jansenism. He wrote "New Method of learning the Latin Language," generally known as the "Port Royal Latin Grammar;" "Greek Grammar" "Greek Roots," "Italian Grammar," and other works. B. at Paris, 1615; D. at Quimperlé, 1695.

Lancelot of the Lake, the hero of a celebrated middle-age romance, which was originally written in Latin by an unknown author, and afterwards translated into the Romance tongue by the Chevalier Gautier Mapp. He was one of the knights of the Round Table, and was inspired with a lively passion for the beautiful Guinevree, wife of King Arthur. Tennyson, in his "Idylls of the King," has interwoven the adventures of this knight with those of Arthur, his kingly hero; and beautifully depicts the grief of Elaine, the maid of Astolat, who dies of unrequited love for Sir Lancelot.

Lanciano, *lan-che-a'-no*, a town of Naples, in the province of Abruzzo-Citra, 84 miles from Naples. It has a cathedral, an archbishop's palace, many churches, and several convents. *Pop.* 15,000.

Lancisi, Giovanni Maria, *lan-che'-se*, a learned Italian, who studied medicine, chemistry, botany, and geometry with equal success. He was physician to popes Innocent XI. and Clement XI., and was the author of several valuable treatises on natural history, anatomy, &c. At his death, he left to the hospital of San Spirito, at Rome, a library of 20,000 volumes, on condition that it should be free to the public. B. at Rome, 1654; D. 1720.

Landaff, or Llandaff, *lăn-daf'*, an ancient city of Wales, in the county of Glamorgan, on the Taf, now a village, though a bishop's see, 2 miles from Cardiff. The cathedral, which is now a ruin, was begun in 1120. The prevailing architecture is Gothic, though in some parts it is Saxon, with an occasional intermixture of Norman. Near the cathedral are some remains of the ancient castellated mansion of the bishop.

Landau, *lan'-dou*, a strong town of the Bavarian circle of the Rhine, near the Queich, 18 miles from Carlsruhe. It has a collegiate church, monasteries, an arsenal; and has often been taken and retaken. *Manf.* Woollens and linens. *Pop.* 3,000. From 1680 to 1815, this place was held by the French.—The name of other two small towns in Germany.

Landen, James, *lăn-den*, an English mathematician. He was a self-taught genius, and acquired a profound knowledge of abstract mathematics. He wrote some curious papers in the "Philosophical Transactions," and in 1755 he published a volume called "Mathematical Lucubrations." He was appointed agent to Earl Fitzwilliam, which employment he fulfilled till within two years of his death. In 1766 he was chosen a fellow of the Royal Society. He published two volumes of "Mathematical Memoirs," full of curious and original theorems. B. at Peakirk, near Peterborough, 1719; D. at Melton, 1790.

Landes, *land*, a maritime department in the south-west of France, bounded on the W. by the Atlantic, and on its other sides by the departments of the Gironde, the Lot and Garonne, the Gers, and the Lower Pyrenees. *Area*, 3,486 square miles. *Desc.* In the N. it is covered with extensive heaths, from which it takes its name, and in the S. it is mountainous. On the coast it has many lagoons, communicating with the sea, besides extensive downs, upon which plantations of pine are grown. *Rivers.* The Adour and the Douze. *Pro.* The usual crops of corn; but its chief source of wealth are its vines. *Minerals.* Coal, iron, bitumen, and mineral waters. *Pop.* 303,000.

Landgrave, *land'-graiv*, from the German *land graff*, 'land-judge, or lord,' a title formerly given to those who administered justice in the name of the emperor throughout the central provinces, as margrave was to those who officiated on the frontiers. In 1130, Louis III., who possessed Thuringia, first took the title of landgrave as the synonyme of sovereign. At the present time, the princes of the house of Hesse are the only landgraves.

Landon, Letitia Elizabeth, *lăn'-don*, generally known as L. E. L., an English poetess. At the early age of thirteen she displayed a vivid and inventive imagination, and produced several small poems. Her father was an army agent, and resided at Brompton, where he had for a neighbour Mr. Jerdan, the editor of the "Literary Gazette." She submitted some of her poetical effusions to that gentleman, who published them in his journal, in 1820. These first efforts were soon followed by others in the same paper, and were received with a considerable amount of attention. Her father dying soon after, and leaving his family in reduced circumstances, Miss Landon devoted herself to literature, as a means of support for herself and assistance to her relatives. Her poems in the "Literary Gazette," signed L.E.L., were now eagerly looked for, and excited great admiration. She likewise wrote

criticisms of poetry and works of fiction for the Gazette, and, as Mr. Jerdan afterwards stated, her labours for the print were little less than his own. With respect to her poems, "The Fate of Adelaide, a Swiss Romantic Tale," was published in 1821. This, her first collection, was followed by "The Improvisatore," "The Troubadour," "The Golden Violet," and others. At that period the annuals were popular, and to these L.E.L. contributed largely. She was less successful as a novelist than as a poet, for her three works of fiction, "Romance and Reality," "Francesca Carara," and "Ethel Churchill," were soon forgotten. In 1838 she was married to Mr. George Maclean, the governor of Cape-Coast Castle. She left England with her husband, and in little more than a year, was found lying on the floor of her apartment, dead. In her hand was a small phial that had contained prussic acid. At the inquest the jury discovered no cause for suspicion in her death, neither could it be thought that her end had been due to her own intentional act; for she had been in the habit of taking, according to her physician's advice, small doses of prussic acid, and she had, moreover, written to some female friends in London expressing herself perfectly happy and contented. As a poet she evinced a sentimental and melancholy cast of thought, but in private life she was of a lively and mirthful disposition. Her "Life and Literary Romains" were published by Laman Blanchard, in 1841. B. at Old Brompton, 1802; D. 1839.

LANDOR, Walter Savage, *lăn'-dor*, a modern English poet, essayist, and miscellaneous writer. He was the son of Walter Landor, Esq., a wealthy landed proprietor, of ancient family. His mother was Miss Savage, a rich Warwickshire heiress. This lady, the second wife of Walter Landor, was the mother of Walter Savage. He was educated at Rugby school and Trinity College, Oxford. The professions of the army and the law were successively proposed to him, and both in turn declined; he preferred to live an untrammelled life of literary ease on the income allowed him by his father. At the close of the last century, just as Burns, Wordsworth, Coleridge, Rogers, and other great writers, were appearing on the poetical arena, Walter Savage Landor published his first volume of poems. In 1802 he went to Paris, where he witnessed the accession of Bonaparte to the consulship for life. On succeeding to the family estates, by the death of his father, he began by expending vast sums in buildings and improvements thereon; but, in a few years, he suddenly sold off all his property, some of which had been in his family's possession during 700 years, and went abroad, intending to become a citizen of the world. During the struggle between the Spanish patriots and Napoleon I., he raised men, joined the former, and materially aided the Junta by gifts of money. He was appointed colonel in the Spanish service; but, at a later period, when the restored king, Ferdinand, had overthrown the constitution which the Spaniards had obtained for themselves, he resigned his commission, declaring that though "willing to aid the Spanish people in the assertion of their liberties against the antagonist of Europe, he would have nothing to do with a perjurer and a traitor." He had married Miss Thuillier, a young lady of Swiss extraction, residing at Bath, in the year 1811; and, after the fall of Napoleon, he, with his wife, took up his residence at Florence, where he purchased some estates. Here during thirty years he lived, making only a few visits to England at wide intervals. It was while a resident at Florence that he composed his most important works. In 1820 he printed his "Idyllia Heroica," in Latin, at Pisa. Between the years 1824-29 he brought out, in London, his "Imaginary Conversations of Literary Men and Statesmen." In 1831 he republished "Gebir," a poem, first produced in English, but translated by himself into Latin in 1813. In 1836 he published "A Satire on Satirists, and Admonition to Detractors," and in the following year, "The Pentameron and the Pentalogue." Besides these, he wrote many shorter and less important works; his dramas, "Andrew of Hungary" and "Giovanni of Naples," were first published in 1839. Mr. Landor is unquestionably greater as a prose than as a poetical writer. One of the best pictures, both of the man and his writings, has been given by Emerson, who visited him at Florence in 1833. "I had inferred," he says, "from his books, or magnified from some anecdotes, an impression of Achillean wrath, an untamable petulance. I do not know whether the imputation was just or not, but certainly, on this day, his courtesy veiled that haughty mind, and he was the most patient and gentle of hosts. He carries to its height the love of freak, which the English delight to indulge, as if to signalize their commanding freedom. He has a wonderful brain,—despotic, violent, inexhaustible, meant for a soldier; by what chance converted to letters, in which there is not a style nor a tint not known to him, yet with an English appetite for action and heroes." Limited space precludes our enumerating here many other works of this author, all of which are redolent of the same earnestness of view, combined with force and exactitude of expression so characteristic of Mr. Landor. He is an especial foe to tyranny, in whatever shape it may appear; and many of his epistles, sent to the "Examiner," and other liberal journals, carry his feelings home to the hearts of his readers. His latest productions were, "Last Fruit off an Old Tree," published in 1853, and "Letters of an American, first given to the world under the assumed name of Pottinger," in 1854. Occasionally may be seen, in the present day, an article of his in the newspaper, which displays to us the vigorous and impassioned veteran of 85, still ready to do battle against the oppressor in high places. Altogether, he is one of the most remarkable English writers the last century has seen. B. at Ipsley Court, Warwickshire, 1775.

LANDPORT, *länd'-port*, a large suburb of Portsmouth, in Hants. It contains all the buildings beyond the fortifications of Portsea-town, and between the suburbs of Southsea and Mile-end-Newton. In it is the terminus of the London and Sussex railway.

LANDSBERG, *lands'-bairg*, the name of several towns in Germany, none of them with a population above 4,000.

LANDSBERG, a well-built town of Prussia, in the province of Brandenburg, on the Warta, 40 miles from Frankfort. It carries on a brisk trade in woollens, leather, paper, and corn. *Pop.* 13,000.

LANDSEER, John, *länd'-seer*, an eminent English engraver, who was a pupil of Byrne, and in 1793 attracted some notice by his engravings of Loutherbourg's vignettes for Maclise's Bible. He subsequently produced engravings for Bowyer's "History of England" and Moore's "Views in Scotland." In 1806 he became associate engraver in the Royal Academy. Having considerable literary ability, he subsequently abandoned his profession to engage in controversy on art, and to deliver lectures. He started several publications, which met with only a short-lived success. Among others, he established "The Probe," in opposition to the "Art Journal." In 1834 he wrote a "Descriptive, Explanatory, and Critical Catalogue of the Earliest Pictures in the National Gallery," which contained some amusing matter, although the criticisms therein contained were of little value. His best engraving was from his celebrated son's "Dogs of Mount St. Bernard." He was an indefatigable exponent of his son Edwin's abilities. In an announcement relative to one of the latter's works, he said: "Edwin Landseer has an exquisite picture on hand, the best he has painted, and by far the most interesting. It is two Mount St. Gothard mastiffs discovering a poor traveller half-buried in the snow. The subject is very touching, and we have not the slightest doubt of its making a great impression." Mr. Landseer is more remembered as the father of the greatest English animal-painter, than for any particular merits of his own. B. at Lincoln, 1769; D. 1853.

LANDSEER, Thomas, an English *mezzotint engraver*, and eldest son of the preceding. He is known as the engraver of Sir Edwin Landseer's pictures, and for his spirited etchings, called "Monkeyana." The most important of his later works was his engraving of Rosa Bouheur's "Horse-fair."

LANDSEER, Charles, R.A., a modern English painter, brother of the preceding. He has painted many pictures of merit, chiefly illustrative of the works of the popular poets and novelists. He was elected an academician in 1845, and six years afterwards became keeper of the Royal Academy.

LANDSEER, Sir Edwin, R.A., an illustrious member

or the English school of artists. He is the brother of the preceding, and son of John Landseer. From his earliest years, he evinced extraordinary skill as a draughtsman, and when only 14 exhibited successful pictures of terriers, spaniels, a horse, and other small subjects. Under his father's direction he was in the habit of sketching sheep, donkeys, and other animals, on Hampstead Heath; and to this early familiarity with nature we may attribute his wonderful skill and fidelity, as exhibited in his pictures during after-life. When he was 18, he painted "The Dogs of St. Gothard," the picture alluded to in the notice of his father's life; and from that time to the present he has been at the head of English animal-painters. Although so early successful, he never lost the habits of a student, but went on increasing in power year after year. He became a Royal Academician in 1830. Sir Edwin's pictures are familiar to thousands of his countrymen, through the medium of scores of engravings. To mention even the most important of his works would require a great deal of space; but a fair idea of his wonderful powers may be gathered by all who have visited the Brompton Museum, where hang the "Peace" and "War," "High Life" and "Low Life," "Highland Music" and the "Dying Stag." In almost every printseller's window we may see "The Return from Deer-stalking," "Jack in Office," "Bolton Abbey in the Olden Time," "Return from Hawking," "A Distinguished Member of the Royal Humane Society," or "The Old Shepherd's Chief Mourner." At the French Exposition of 1855 he was the only English artist to whom was awarded the large gold medal. From a biographical sketch in the "English Cyclopædia," we extract the following criticism, as the best with which we are acquainted: "Sir Edwin Landseer is unquestionably the greatest modern painter of animals. In many respects he is unsurpassed, if equalled, by the painters of any time. Alone, almost of all the living painters of Europe, his work suggests no thought of pen or pencil. . . . . Every dog, every deer, has its own character and its own expression; and sadness, misery, satisfaction, and drollery, the passions and the feelings, the hopes and the fears, are shown to belong as much almost to the countenance of a dog as of a man. Sentiment and pathos were never before so evoked by representations of animal nature, nor even quiet humour or sharp satire; and the accompaniments are almost invariably as admirably painted as are the animals. . . . . Reflecting upon the capabilities of art, we feel that Landseer, with his marvellous executive skill, and great mental vigour, might have done much greater things than he has accomplished; but, looking over what he has effected, we cannot but feel that he is not only one of the chief ornaments of the English school, but that he must take rank, in his own walk, among the greatest painters of every age and country." B. 1803.

Land's-End, *lănds-end'*, in Cornwall, the W. extremity of England, formed of granite cliffs, about 70 feet in height. *Lat.* 50° 6′ N. *Lon.* 5° 45′ W.

Landshut, *länt'-shoot*, a town of Germany in Bavaria, on the river Iser, 40 miles from Munich. The principal portion of the town consists of two long streets, which are tolerably wide and straight, and connected by a number of lanes. The chief edifices are the palace, the provincial house of assembly, the old town-house, and the hospital for decayed citizens. There are, besides, three parochial churches; and one of them, called St. Martin's, has one of the highest spires in Germany. The university of Ingolstadt was removed to Landshut in the year 1800; but, in 1826, it was transferred to Munich. *Manf.* Woollen cloths, hosiery, tobacco, paper, cards, leather, and watches; besides breweries and distilleries. *Pop.* 10,900.—Also the name of several other towns in Germany, none of them with a population above 4,500.

Landskron, *lands'-krone*, two towns in Austria, neither with a population above 5,000.

Lane, Jane, *lain*, an English heroine, who was the principal instrument in effecting the escape of Charles II., after the battle of Worcester. That monarch, disguised in her father's livery, rode before her on horseback, from Bentley Hall, the seat of Mr. Lane, about twelve miles from Boscobel Wood, in which Charles had been concealed in an oak, to Mr. Norton's, near Bristol; and thence he went to Brighton, where he embarked for France. She was well rewarded at the Restoration, and married Sir Clement Fisher, a baronet of Warwickshire.

Lane-End, a market-town of Staffordshire, 3 miles from Stoke. It is in the Pottery district, and has a church, chapels, a market-hall, library, and various schools. *Manf.* Porcelain and earthenware. *Pop.* 15,500.

Lanfranc, *lăn'-frănk*, archbishop of Canterbury. His early manhood was spent as an advocate in the law courts of Pavia; after which he went to France, and established a school at Avranches, which was attended by students of the highest rank. On a journey to Rouen, he was robbed and left bound in a wood. Some peasants released him, and conveyed him to the abbey of Bec, where he was so kindly treated, that he became a monk therein, and, in three years, was chosen prior. William, duke of Normandy, gave him the abbey of St. Stephen, at Caen, and, after the conquest of England, advanced him to the archbishopric of Canterbury. In 1071 he went to Rome to receive the pallium from Pope Alexander II. He rebuilt the cathedral of Canterbury, and founded several churches and hospitals. He wrote against Berenger on the Eucharist, and other works, which were published at Paris, 1648. B. at Pavia, 1005; D. 1089.

Langbaine, Gerard, *läng'-bain*, a learned divine, who rose from servitor to be fellow of Queen's College, Oxford. He edited "Longinus," and several other learned works. In 1645 he was chosen provost of his college, which, with the office of keeper of the archives, he held to his death. He was esteemed by Selden, Usher, and other great men, his correspondence with whom has been printed. D. in Westmoreland, about 1608; D. 1657.—His son, Gerard Langbaine, became beadle of law at Oxford, and published an "Appendix to the University Catalogue of Graduates," and "An Account of the English Dramatic Poets." B. at Oxford, 1656; D. 1692.

Langdale, Marmaduke, *lang'-dail*, a gallant English gentleman, who, in the civil war, raised a troop in the king's service, gained some advantage over Fairfax, raised the siege of Pontefract Castle, and made himself master of Berwick and Carlisle. On the ruin of the royal cause, he went to Flanders, and was created, by Charles II., Lord Langdale. D. 1681.

Langdon, *läng'-don*, the name of several parishes in England, none of them with a population above 500.

Langeland, *lang'-e-land*, an island of Denmark, in the Baltic, between Zealand, Lauland, and Funen. *Ext.* 33 miles long, with an average breadth of 3. *Desc.* Level, and producing corn, flax, apples, timber, and cattle. *Pop.* about 17,500.

Langeland, or Longland, Robert, *läng'-länd*, an old English poet, and one of the first disciples of Wickliffe, who distinguished himself by a curious poem, entitled "The Visions of Piers Plowman," written about 1369, intended as a satire on almost every description of men, but especially the clergy. It is written in blank verse, with force and humour, in an alliterative measure. Mr. T. Wright has produced an edition of this poem.

Langenbielau, *lan'-gen-be'-lou*, a town of Prussia, 30 miles from Breslau. *Manf.* Cotton goods. *Pop.* 9,000.

Langford, *läng'-ford*, the name of several parishes in England, none of them with a population above 1,000.

Langham, *läng'-ham*, the name of several parishes in England, none of them with a population above 1,000.

Langham, Simon, an English prelate and cardinal, was abbot of Westminster, afterwards bishop of Ely, and lastly archbishop of Canterbury, in 1366. Edward III. made him treasurer of England, and Urban VIII. gave him a cardinalship, with the title of legate. D. at Avignon, 1376.

Langholm, *läng'-um*, a town and parish of Scotland, in Dumfriesshire, on the Esk, over which is a handsome bridge, 24 miles from Dumfries. It has a town-hall, a gaol, several libraries and public institutions. *Manf.* Woollen fabrics, and there are several dye-houses. *Pop.* 3,000.—This is the native place of Telford the engineer, and Meikle, the translator of the "Lusiad."

LANGHORNE, Dr. John, *lăng'-horn*, an English divine and poet. On entering into orders, he became tutor to the sons of a Lincolnshire gentleman, whose daughter he subsequently married. He wrote a poem entitled "Genius and Valour," in which he defended the Scotch against Churchill, and for which the university of Edinburgh bestowed upon him the degree of D.D., in 1766. He was a writer in the "Monthly Review," and published "Poems," "Letters of Theodosius and Constantia," "Solyman and Almena," a tale; five Sermons; "Fables of Flora, in Verse," and a translation of Plutarch's Lives. B. at Kirkby-Stephen, Westmoreland, 1735; D. 1779.

LANGLE, John Maximilian de, *langl*, a French Protestant minister, who officiated in the reformed church at Rouen for twenty-five years. He wrote a "Defence of Charles I., king of England," two volumes of Sermons, and translated from the English the "Whole Duty of Man." B. at Evreux, 1590; D. 1674.

LANGLE, Samuel de, son of the above. He was minister of the church at Rouen, whence he removed to Charenton, where he was greatly esteemed for his learning and virtues. On the persecution breaking out against the Protestants, he removed to England, and obtained a prebend of Westminster. The university of Oxford conferred on him the degree of D.D. Bishop Stillingfleet printed a letter of his on the difference between the Church of England and the dissenters. B. in London; D. 1690.

LANGLEY, Batty, *lăng'-le*, an English architect, who published many useful practical books; such as the "Builder's Jewel," the "Builder's Price-Book," and other works for masons, bricklayers, and carpenters. D. 1757.

LANGLEY, the name of several parishes in England, none of them with a population above 2,000.

LANGRES, *langr*, a fortified town of France, in the department of the Upper Marne, 18 miles from Chaumont. The cathedral is the only building worth notice. It has, besides, however, a Roman arch, a town-hall, a school of geometry, and several hospitals. *Manf.* Fine cutlery, of which it is the principal seat in France. *Pop.* 12,000.

LANGSIDE, *lăng'-side*, a village of Renfrewshire, Scotland, 2 miles from Glasgow. Here, in 1568, the troops of Mary, queen of Scots, immediately after her escape from Lochleven Castle, were defeated by the regent Murray.

LANGTOFT, Peter, *lăng'-toft*, an old English chronicler, who translated from the Latin, into French verse, Herbert Bosenham's "Life of Thomas à Becket," and also composed a chronicle in verse, which began with the Trojans and went down to Edward I. An English metrical translation of this was made by Robert de Brunne, and published at Oxford in 1725. A manuscript of the Chronicle is preserved in the Cottonian collection of the British Museum, and another is to be found in the Arundel MSS. contained in the Herald's College. Langtoft lived at the end of the thirteenth and beginning of the fourteenth century.

LANGTON, *lăng'-ton*, the name of several parishes in England, none of them with a population above 500.

LANGTON, Stephen, archbishop of Canterbury, and cardinal of St. Chrysogonus. He studied at, and became chancellor of, the university of Paris, and was created an archbishop by the pope, in opposition to King John and the clergy. John forbade Langton from entering his dominions, and banished the monks of Canterbury, for which the kingdom was laid under the papal interdict. The king was afterwards excommunicated, and his subjects absolved from their allegiance; on which he made his submission, by complying with the papal terms, after which he received the papal absolution from Langton, who, however, refused the pope's bull of excommunication against the barons for leaguing against John, at Runnymede, for which he was suspended at Rome, where he suffered also many mortifications. At length he purchased his pardon, and was permitted to return to England. He was a stanch adherent to the cause of national liberty. D. in England, in the earlier half of the 12th century; D. in England, 1228. He composed some theological works.

LANGTON, John, an English monk of the order of Carmelites, who appeared with advantage at the council of Basil, and wrote a Chronicle of England.

LANGUEDOC, *lan'-ge-dok*, an old province in the south of France, extending on the east to the Rhone, on the west to the Garonne and the borders of Gascony. It now forms the departments Aude, Ardèche, Gard, Hérault, and Tarn, with parts of Haute-Loire, Haute-Garonne, and Tarn-et-Garonne.—The CANAL of Languedoc connects the Garonne, near Toulouse, with Lake Thau, in the Mediterranean.

LANGUET, Hubert, *lan'-gai*, minister of state to Augustus, elector of Saxony, was a native of France, and converted to the Protestant faith by Melancthon. He was at Paris during the massacre of St. Bartholomew, as ambassador from the elector, and narrowly escaped with his life, after saving that of Wicholus, the printer, in whose house he lodged, and also the famous De Mornay. He was employed in several other embassies; but being suspected of favouring the Zwinglians, he quitted the service of the elector, and entered into that of the prince of Orange. He wrote a Letter to Sir Philip Sidney, and other pieces. D. at Antwerp, 1581.

LANIERE, Nicholas, *lăn'-e-eer*, a painter, engraver, and musician, who was employed to collect pictures in foreign countries for Charles I. He placed a particular mark on all which he brought to England. Pepys says, in his Diary, "that Laniere did, at the request of Mr. Hill, bring two or three of the finest prints for my wife to see that ever I did see in all my life." He was also chapel-master to Charles I., at a salary of £200 per annum. B. 1568.

LANISCAT, *la'-nis-ka*, a parish and town of France, in the department of the Côtes-du-Nord, 18 miles from Londiac. *Pop.* 3,500.

LANJAROU, *lan'-ha-roo*, a market-town of Spain, 26 miles from Grenada. It has mineral waters, and, on account of the coolness of its atmosphere, is much frequented in summer. *Pop.* 3,000.

LANKESTER, Edwin, M.D., *lăn'-kes-ter*, an English writer and lecturer on natural science, who, in his youth, was apprenticed to a surgeon. After completing his term and passing the College of Surgeons and Apothecaries' Society, he went to Germany, and graduated at Heidelberg. He became a licentiate of the College of Physicians in 1841. He is the author of several volumes on natural history, and edited the botanical portion of the "English Cyclopædia." He is a fellow of the Royal Society, and professor of natural history at New College, London. B. in Suffolk, 1814.

LANNES, Jean, *lan'-nes*, duke of Montebello and marshal of France. He was one of the most intrepid and skilful of Napoleon's generals, and was greatly esteemed by the emperor. Born of humble parents, he worked as a dyer in early life; but, joining a battalion of volunteers in 1792, he, by his courage, rapidly rose to the grade of major. In 1794 he attracted the notice of Bonaparte, who procured him a command in the army of Italy. At the battles of Montenotte and Millesino he displayed considerable bravery, and became colonel in 1796. He was made general of brigade in the following year, and sustained a brilliant part at the taking of Mantua and at the battle of Arcola. He went with the French expedition to Egypt, and rose to the rank of general of division. The French victory at Aboukir was in part due to his bravery and coolness. At the siege of Acre he was severely wounded. He left Egypt with Bonaparte, and, after returning to Paris, rendered good service to his chief during the revolution of the 18th Brumaire (9th November), 1799, for which Napoleon appointed him commander of the consular guard. After various employments, he commanded the advance guard of the French army crossing the Great St. Bernard into Italy, in 1800. At the great battle of Montebello, where the Austrians were completely beaten, Lannes displayed such great skill and bravery, that Napoleon gave him the title of Montebello when he raised him to the dukedom. He was no less distinguished at the battle of Marengo. On his return from Portugal in 1804, whither he had been sent as minister-plenipotentiary of France, Napoleon created him marshal of France, and afterwards duke of Montebello. In the German campaigns of 1805-6, he commanded the advance guard, and rendered the most signal service to his master at the battles of Austerlitz. Jena, Eylau,

and Friedland. His last great exploit was the defence of the village of Essling, where, while resisting the fierce onslaught of the Austrians, a cannon-ball struck off his right leg, and the foot and ancle of the left. Napoleon evinced more emotion at the sight of his brave marshal's mortal wound than he had ever before been known to exhibit. Lannes, throughout his military career, evinced a constantly increasing knowledge of war. Long afterwards, Napoleon, speaking of his intrepid commander, thus expressed himself:—"I found him a dwarf, and I lost him a giant." . . . . "He had great experience in war, having been in fifty-four battles and three hundred combats. He was cool in the midst of fire; possessed of a clear, penetrating eye, ready to take advantage of any opportunity that might present itself. Violent and hasty in his temper, even in my presence, he was ardently attached to me." His young widow, a beautiful and accomplished lady, was afterwards lady of honour to the empress Maria Louisa. B. at Lectoure, Guienne, 1769; D. 1809.

LANNION, *lan'-ne-one*, a town of France, in the department of the Côtes-du-Nord, 63 miles from Brieuc. *Manf.* Linen fabrics. *Pop.* 6,500.

LANSDOWNE, Henry Petty Fitzmaurice, third Marquis of, *lăns'-doun*. After receiving a preliminary course of education at Westminster school, he went, in 1795, to study under Dugald Stewart at Edinburgh, where he formed the acquaintance of a small circle of young men, nearly all of whom subsequently became famous in one line or another. These young friends formed the celebrated Speculative Society, in which Brougham, Jeffrey, Sydney Smith, Horner, and others, first practised the art of debate. From Edinburgh he went to Cambridge, in 1801, and, after a continental tour, entered the House of Commons. As Lord Henry Petty he became a prominent member of the Whig party, and, on the death of Mr. Pitt, and the accession of the Whigs to power, he became chancellor of the Exchequer, and followed Pitt in the representation of the university of Cambridge. He succeeded to the peerage as marquis of Lansdowne, in 1809. In both houses of parliament he was a stanch advocate of the abolition of slavery, and some of his best oratorical efforts were made in furtherance of the repeal of the penal laws against Roman Catholics. In 1820 he proposed a measure in favour of the principle of free trade; in 1822 he sought to obtain an inquiry into the suffering condition of Ireland. After an eighteen years' retirement from office, he became secretary of state for the Home department, under the premiership of George Canning, in 1828. He was in opposition during the Wellington administration of 1829-31, but, on becoming president of the Council in the latter year, he was an active participator in the measures taken to pass the Reform Act. He was the opposition leader of the House of Lords during Sir Robert Peel's rule, which commenced in 1841, and when his own party returned to power under Lord John Russell, in 1846, he once more led the peers from the ministerial benches. He resigned office with Lord John Russell in 1852. B. 1780.

LANTIER, Stephen Francis de, *lan'-te-ai*, a French author, who produced some celebrated works of fictitious travel, similar to Barthélemy's "Anacharsis," but in no way copied from it. These were entitled "The Travels of Antenor," "The Travellers in Switzerland," and "Travels in Spain." He also wrote some comedies, and other works. B. at Marseilles, 1734; D. 1836.

LANZAROTE, *lan'-za-ro'-tai*, the most N.E. of the Canary Isles. *Area*, 300 square miles. *Desc.* Volcanic and fertile, yielding fine fruits, barilla, and orchil. *Pop.* 18,000. At the W. end of this island is a high volcano.

LANZI, Luigi, *land'-se*, an Italian archæologist and writer on art. He entered the order of Jesuits at the age of 17, but on the suppression of the order, he devoted himself to literary pursuits. He was appointed keeper of the cabinet of medals at Florence in 1775, and thenceforth produced works on archæology and art, some of which have since been translated into every European language. His "History of the Painters" was translated by Thomas Roscoe, and republished in Bohn's Standard Library. Lanzi composed many other works, the chief of which were "Saggio di Lingua Etrusca," and others on the ancient Etruscan vases. He was likewise a graceful poet. B. in Italy, 1732; D. at Florence, 1810.

LAOCOON, *lai-ok'-o-on*, prince of the royal family of Troy, was grand-priest of Apollo. While sacrificing a bullock to Neptune, two enormous serpents issued from the sea, and attacked his two sons; and, on his attempting to defend them, the serpents seized him and squeezed him to death. This punishment was said to be inflicted for his temerity in dissuading the Trojans from allowing the wooden horse of the Greeks to enter the city, and also for hurling a javelin at its sides, as it entered within the walls.

LAODICEA, *lai'-o-di-se'-a*, two ancient cities of Asia Minor, now in ruins. The one is 20 miles from Konieh, and the other 48 miles from Allah Shehr.

LAOMEDON, *lai-om'-e-don*, son of Ilus, king of Troy, was father to Priam and Hesione. He built the walls of Troy, assisted by Apollo and Neptune. When the walls were finished, Laomedon refused to reward the labours of the gods, and, soon after, his territories were laid waste by the sea, and his subjects visited by a pestilence. Sacrifices were offered to the offended divinities, but nothing could appease the gods, according to the oracle, but annually to expose to a sea-monster a Trojan virgin. This victim was decided by lot, and when the calamity had continued for five or six years, the lot fell upon Hesione, Laomedon's daughter; but Hercules came and offered to deliver the Trojans from this calamity, if Laomedon would reward him with a number of fine horses. The king consented; but when the monster was destroyed, he refused to give them. Hercules was obliged to besiege Troy, and take it by force of arms. Laomedon was put to death after a reign of twenty-nine years, and his son Priam placed upon the throne.

LAON, *la-one'*, a town of France, in the department of the Aisne, 20 miles from Soissons. Its cathedral is a large and stately building, with five lofty towers. It has, besides, a prefecture, with a library, a town-hall, citadel, barracks, theatre, a leaning tower, college, workhouse, and various schools. *Manf.* Coarse cloth, leather, nails, and earthenware. In its neighbourhood are some vineyards. *Pop.* 11,000. Here, in 1814, a great battle was fought between the allies, under Blucher, and Napoleon I.

LAOS, *la'-os*, a series of independent states of India beyond the Ganges, extending from 12° to 18° N. *lat.*, and having the Burmese and Siamese dominions on all their sides. Neither their boundaries, areas, nor populations, however, are distinctly known to Europeans.

LAO-TSE, or LAO-TSEU, *la-o-tse'*, a Chinese philosopher, who lived a short time before Confucius. He held the doctrine of the metempsychosis, or transmigration of souls, like Pythagoras (*see* PYTHAGORAS). He wrote a book which the Chinese place among the number of their sacred works, and founded a sect called Tao-tse, which rivals that of Confucius. M. Stanislas Julien published a complete edition of his writings, at Paris, 1841. Lived about 600 B.C.

LAPARELLI, Francis, *la-pa-rel'-le*, an eminent Italian architect and mechanician. His knowledge of the art of military engineering recommended him to Cosmo I., grand-duke of Tuscany, and Pope Pius IV. intrusted him with the construction of the defensive works of Civita-Vecchia, which place he strongly fortified. Michael Angelo confided to him the execution of his designs for the church of St. Peter. In 1565 he was sent to fortify Malta against the attempts of Solyman, and there planned the city of Valetta. He afterwards engaged in the service of the Venetians. B. at Crotona, 1521; D. of the plague, at Candia, 1570.

LAPEER, *la-peer'*, a county of the United States, in Michigan. *Area*, 720 square miles. *Pop.* 8,000.

LA PEROUSE, J. F. Galaup de, *pe-roose'*, a celebrated French navigator, who, after serving as captain in the French navy with much distinction, was sent by Louis XVI., in 1785, on a voyage of discovery. He sailed with two frigates from Brest, and visited the coasts of Tartary, of Japan, and of New Holland, when, in 1788, he ceased to be heard of. Several expeditions were dispatched to discover traces of him, but in vain. In 1827, however, the wreck of his vessels was observed by Captain Dillon, in one of the

Vanikoro islands. In 1828, a French captain visited the place, and discovered that La Perouse and his men had been wrecked among the reefs surrounding the island. B. in France, 1741.

LAPIS, *la'-pees*, a town of Naples, 13 miles from St. Angelo dei Lombardi. *Pop.* 2,500.

LAPLACE, Pierre-Simon, Marquis de, *la-plass'*, a celebrated French mathematician and astronomer. As early as his 19th year he taught mathematics in a military school. He obtained letters of introduction to the celebrated philosopher D'Alembert, and went to Paris with the view of seeking an interview with him; but, finding no notice taken of his letters, he wrote a short paper on some points of mechanical philosophy which immediately procured for him the attention to his claims that he desired. D'Alembert sent for him, and, about 1769, had him appointed professor of mathematics at the Paris Military School. By his treatises, memoirs, and larger works, Laplace rapidly obtained the reputation of the greatest living mathematician since Newton. Napoleon, when first consul, appointed him minister of the interior; but, as a politician, he was very unsuccessful, and he was in a short time removed to the presidentship of the *Sénat Conservateur*. Napoleon afterwards related of his minister, that "a mathematician of the highest rank, he lost not a moment in showing himself below mediocrity as a minister. He looked at no question in its true point of view. He was always searching after subtleties; all his ideas were problems, and he carried the spirit of the infinitesimal calculus into the management of business." He was created a count by Napoleon, and a marquis by Louis XVIII. His principal works were the "Mécanique Céleste," "Analytical Theory of Probabilities," and an "Essay on Probabilities." A complete edition of his writings was published by the French government in 1843. It is quite impossible, in any short notice of the life of Laplace, to convey a proper idea of the extent and value of the great "Mécanique Céleste." To enumerate the bare contents thereof would require several pages. That inestimable contribution to science contained 4,000 quarto pages; and, it is said, might easily be expanded to thrice that number. The intention of the work was to deduce, from the discoveries of the great astronomers who had preceded Laplace, a complete and harmonious system, and to perfect the marvellous work commenced by Newton, in his discovery of the law of gravitation. He subsequently wrote his "Exposition du Systême du Monde," as an explanation of what was abstruse in his "Mécanique." Dr. Bowditch, an American writer, translated, in part, the "Mécanique Céleste." The popular work of Mrs. Somerville is a selection from it; and no inconsiderable share of what was most attractive in the earlier portions of the popular "Vestiges of Creation" was based upon the same source. Few will refuse to admit that Laplace was the greatest astronomer since Newton. B. near Honfleur, 1749; D. 1827.

LAPLAND, *lip'-land*, the northernmost country in Europe, bounded N. by the Arctic Ocean, E. by the White Sea, S. by Sweden, and W. by Norway and the Atlantic. It belongs partly to Russia and partly to Sweden and Norway. *Ext.* About 700 miles long, from Cape Orlov, on the White Sea, to the entrance of Saltersfiord, on the Atlantic; and about 550 broad. *Area*, estimated at 150,000 square miles. *Desc.* The part of Lapland lying along the N. shore of the Gulf of Bothnia consists of an extensive plain, abounding in immense forests of spruce and Scotch fir; but, at the distance of 80 miles from that sea, the ground becomes gradually elevated, till at length it rises to lofty mountains, attaining a height of from 5,500 to 6,200 feet, which, in this region, is 2,700 feet above the line of perpetual congelation. These central mountains are the highest in Lapland. *Rivers.* The principal are the Torneo, the Kemi, the Lulea, and the Kola. The Yana, the principal river in the N.E., and the Alten, the principal in the N.W., both run into the Northern Ocean. *Lakes.* Numerous, particularly in its mountainous part. *Climate.* In the maritime districts, the temperature approaches uniformity, and, whilst the winters are not severe, the summers are raw and foggy. In the interior, the winter is intensely cold, but the heat of summer is steady and fructifying. The mean annual temperature at the North Cape (*lat.* 71° 11′ 30″) is 6° higher than at Enontekis, in the interior, in *lat.* 68° 30′. Yet, at the latter, the thermometer rises in July to 61°, while at the Cape it seldom reaches 50°. *Zoology.* Hares, bears, martens, gluttons, beavers, otters, ermines, squirrels, lemings or mountain rats, foxes, and wolves: hares are the most abundant. The domestic quadrupeds are oxen, cows, dogs, sheep, and goats. The reindeer is the most valuable animal in Lapland: it serves as the principal beast of burden, its milk is highly valued, and its flesh supplies the chief nourishment of the inhabitants. *Pro.* Barley or big is the most common grain. In the low ground, rye is likewise cultivated, and occasionally oats. The berry-bearing plants also are numerous. *Minerals.* Iron, copper, lead, zinc, and arsenic. *Inhabitants.* The mountain Laps have no fixed habitation, but wander about in quest of food for their flocks of reindeer, and lodge in tents or huts, which are usually about nine feet in height and twelve in length. Their diet consists chiefly of animal food. During winter, they carry on some traffic with the Swedes. This takes place at Torneo, and other towns on the Gulf of Bothnia, and consists in exchanging skins, furs, dried fish, venison, and gloves for flannel, cloth, hemp, copper, iron, and various utensils; but particularly for spirituous liquors, meal, salt, and tobacco. *Pop.* estimated at 18,000; 9,000 of which belong to Russia, 4,000 to Sweden, and the remainder to Norway. *Lat.* between 64° and 71° N. *Lon.* between 10° and 42° E.

LA PLATA. (*See* PLATA.)

LA PUEBLA. (*See* PUEBLA, LA.)

LAR, *lar*, the capital of Laristan, in Persia, now in a state of ruins, 180 miles from Shiraz. It was formerly the capital of an Arabian kingdom. *Manf.* Cotton fabrics, gunpowder, and arms. *Pop.* 12,000. *Lat.* 27° 30′ N. *Lon.* 42° 35′ E.

LARACHE. (*See* EL-ARAISH.)

LARACOR, *lär-a-kor'*, a parish of Ireland, in the county of Meath, 2 miles from Trim. *Pop.* 2,300.—Here, in 1769, the great duke of Wellington was born.

LARBERT, *lar'-bert*, a parish of Stirlingshire, Scotland, 2 miles from Falkirk. *Pop.* 5,000. In this parish Bruce, the traveller in Abyssinia, was born. (*See* BRUCE.)

LARCHER, Pierre Henry, *lar'-shai*, a learned French writer, chiefly remarkable for his excellent translation of the Greek historian Herodotus, with notes. He had a controversy with Voltaire respecting the "Philosophy of History," by the latter. In 1809 he was appointed professor of Greek literature at the College of France. B. at Dijon, 1726; D. at Paris, 1812.

LARDNER, Nathaniel, *lard'-ner*, a learned English dissenting divine. After receiving his academical education at London, he went to Utrecht, and thence to Leyden, and, in 1703, returned to England. Soon afterwards, he became tutor to the son of Lady Treby, in which situation he continued until her ladyship's death, in 1721. In 1729 he became pastor of a congregation in Crutched Friars. He wrote an answer to Woolston on the Miracles, a "Letter on the Logos," and the "Credibility of the Gospel History," a work admirably executed. His writings abound in critical elucidations of the Scripture and early ecclesiastical history, evincing profound learning and intense application. The whole were, a few years ago, reprinted, and obtained a considerable sale. B. in Kent, 1684; D. at the same place, 1768.

LARDNER, Dr. Dionysius, a modern mathematician and philosophical writer. He was the son of a Dublin attorney, and, after receiving some education at school, was placed in his father's office. Evincing, however, a decided distaste for the profession of the law, he was entered at Trinity College, Dublin, and soon began to devote himself to scientific pursuits. It was rapidly made apparent that he had chosen the right path in life, for he gained a great number of prizes in pure astronomy, in natural philosophy, and other branches of study. In 1817 he obtained a B.A. degree, and, during the ten following years, remained at the university, publishing, at first, treatises on mathematics, and subsequently on the steam-engine. He likewise delivered a course of lectures on the latter subject at the Royal Dublin Society, for which he received the gold medal of the society. His reputation being in a

great measure established, he began to contribute to the "Edinburgh Encyclopædia" and the "Encyclopædia Metropolitana," for which he wrote elaborate treatises on pure mathematics as well as on the applied sciences. In 1828, on the establishment of the London University, he was appointed to the chair of Natural Philosophy and Astronomy, and, removing to London, set on foot a scheme for a cabinet Cyclopædia, which he gradually perfected, obtaining the co-operation of many eminent men. Sir John Herschel wrote for the series a "Preliminary Discourse upon Natural Philosophy," and a "Treatise on Astronomy;" but most of the scientific works were due to Dr. Lardner himself. In 1840 certain domestic circumstances caused him to repair to Paris, after which he went to the United States, where he delivered, with considerable success, a course of lectures, which were afterwards several times reprinted. He subsequently devoted much time to railway economy, and wrote a good deal on that and other subjects. In 1854 he started his last important work, the "Museum of Science and Art." Few men did more than he towards extending scientific knowledge among the people, and none were more eminently qualified for the work. Not only were his acquirements of the profoundest nature, but he possessed, in a peculiarly high degree, that happy faculty of throwing into popular and graphic language the most elaborate theories of science, and leading minds unaccustomed to abstruse reasoning to an appreciation of truths which would have been altogether incomprehensible if involved in the obscurity of technical phraseology. B. at Dublin, 1793; D. at Paris, 1859.

LARES, *lair'-eez*, gods of inferior power with the Romans. They presided over houses and families, and were two in number, the sons of Mercury and of the nymph Lara. Their statues were very small, and were placed in a niche behind the doors of the house, and in a corner of the hearth. Incense was burnt on their altars, and a sow was also offered on particular occasions. They have been confounded with the Penates; but these last appear rather to have presided over the dispensing of wealth, while the Lares were the deities of its conservation.

LARGO, *lar'-go*, a parish of Fifeshire, Scotland, 3 miles from Leven. *Pop.* 2,800.—In it, Alexander Selkirk, the original of the "Robinson Crusoe" of De Foe, was born in 1676.

LARGS, *largs*, a seaport-town of Ayrshire, Scotland, 20 miles from Glasgow. *Pop.* 3,000.—Here, in 1263, Alexander III. gained a victory over Haco, king of Norway.

LARISSA, *la-ris'-sa*, a town of European Turkey, the capital of Thessaly, on the Salembria, or ancient Peneus, 75 miles from Salonica. The streets are ill-built, narrow, and dirty, and the houses, in many parts, wretched. *Pop.* 20,000. *Lat.* 39° 48′ N. *Lon.* 22° 47′ E.

LARISTAN, *la-ris-tan'*, a province of Persia, extending along the northern coast of the Persian Gulf. *Area*, estimated at 15,000 square miles. *Desc.* Mostly a sandy waste, interspersed with salt steppes. Silk, camels, and salt are the principal products. *Pop.* Unascertained, and chiefly consisting of wandering tribes.

LA ROCHEFOUCAULD, François, Duke de, *rosh'-foo-kolde*, a celebrated French author and statesman. He was at first known as the prince de Marillac, and signalised himself on various occasions by his courage; but was chiefly remarkable for his profound knowledge of mankind, and for his intriguing spirit. Smitten with the duchess de Longueville, he, to please her, joined the ranks of the Fronde, but being afterwards restored to favour, was appointed, in 1661, chevalier of the king's commands, and next, governor of Poitou. He spent his old age in the society of Madame de la Fayette and Madame de Sévigné. He wrote "Memoirs of the Reign of Anne of Austria," and a book of maxims, first printed in 1665, under the title of "Reflections and Sentences, or Moral Maxims." This little work has made the author celebrated as much by the perfection of its style as by the boldness of its paradoxes. According to it, self-love is the sole motive of all human actions, which was an opinion sufficiently natural with a man who had dwelt all his life at court. An egotist, an intriguer, and loose liver, Rochefoucauld had only too frequently given practical effect to his own maxims. B. at Paris, 1605 or 1613; D. 1680.

LA ROCHEFOUCAULD-LIANCOURT, Francis, Duke de, was grand-master of the wardrobe to Louis XV. and Louis XVI., and in 1789 deputy to the States-general. Although attached to the king, he showed himself zealous for the well-being of the people. He took part in the recall of Necker, after the fall of the Bastille. Named military commandant at Rouen after the closing of the Assembly, he offered an asylum to Louis XVI. Deprived of his rank in 1792, he visited the United States, but returned to France after the 18th Brumaire (November 9th, 1799). He devoted himself to philanthropic enterprises, established manufactures, founded a school of art and science, and materially contributed to the introduction of vaccination throughout his native country. He entered the Chamber of Peers in 1814; but his liberal opinions subsequently brought him under the displeasure of Charles X., whereupon he occupied himself with his philanthropic schemes. He was long known under the name of Liancourt only, but added to it that of Rochefoucauld upon the death of his cousin. He wrote, among other works, "The Prisons of Philadelphia," and "Travels in the United States." B. 1747; D. 1827.

LA ROCHEJAQUELEIN, Henry de, *rosh-zhak'-lā*, a famous Vendean chieftain, who commanded at the battle of Fontenay in 1793, and preserved the Vendeans from total rout at the battle of Luçon. He likewise took part in the disastrous engagement at Chollet. On the death of Lescaire, he was, although only 22 years of age, proclaimed general-in-chief. He twice combated the republican troops near Antrain, and took possession of Laval, La Flèche, and Le Mans. Driven from the last city, he crossed the Loire, and intrenched himself in the forest of Vézin. He was slain in an engagement near Chollet, in 1794. His address to his soldiers, on being appointed to the chief command, was: "If I recoil, kill me; if I advance, follow me; if I fall, avenge me." D. 1773.

LA RODA, *ro'-da*, a town of Spain, 24 miles from Albacete. *Pop.* 4,600.—This place is famous for the defence it made against the Carlists in 1810.

LARREY, Dominique Jean, Baron, *lar'-rai*, a celebrated French surgeon, who became surgeon-in-chief of the imperial army. After completing his education under his uncle, and at the hospital of Toulouse, he repaired to Paris, where he obtained employment as naval surgeon. In that capacity he visited North America; but, returning to Paris at the outbreak of the Revolution, he joined the French army of the Rhine in 1792. He first attracted the notice of his superiors by his invention of "flying ambulances," which enabled the wounded to be carried off the field, even under a warm fire. He first met Napoleon at the siege of Toulon, where the future emperor was at the time acting as lieutenant of artillery. After tilling, for some time, the functions of professor of military surgery, he, in 1798, went with the French expeditionary army to Egypt, and on his return published his "Historical and Surgical Account of the Army of the East in Egypt and Syria." This work was written in 1803, and from that time Larrey's rise was very rapid, till, in 1812, he became baron of the empire and surgeon-in-chief. His numerous papers attest his profound theoretical knowledge, while his many bold and successful operations, conducted during Napoleon's wars, have established his fame as one of the first of modern surgeons. Napoleon said of him, that "he was the most virtuous man he had ever known." An instance of his courage and humanity occurred after the battles of Bautzen and Würchen. Among the wounded were some 12,000 men who, it was suspected, had voluntarily mutilated themselves. Napoleon ordered his surgeons to examine them, and declared that if found guilty they should be shot. Larrey, with some difficulty, obtained time to properly examine them, for, as none doubted the guilt of the men, their instant execution was called for. But after a time, Larrey drew up a report declaring that all the accused were innocent. The excellent man anticipated dismissal, but received, instead, a handsome present from Napoleon. B. in France, 1766; D. at Lyons, 1841.

Lascaris, Theodore, *las-kar'-is*, emperor of Nicea, was the son-in-law of the emperor Alexis Angelus. After the taking of Constantinople by the crusaders, in 1204, he formed in Asia Minor a new kingdom, comprising Bithynia, Lydia, and Phrygia, of which Nicea was the capital. He combated simultaneously his father-in-law, Alexis, and the sultan of Iconium; but nevertheless maintained his throne until his death in 1222. His successors were his son-in-law, John Ducas (*see* John III.), and his grandson, Theodore Lascaris, called the Young, who reigned from 1255 to 1259. This latter was succeeded by John Lascaris. (*See* John IV.)

Lascaris, Constantine, a learned Greek, descended from the imperial Greek family of that name, who went to Italy on the taking of Constantinople by the Turks, in 1453. He settled at Messina, where he taught Greek with reputation, and had a number of scholars. He wrote a Greek grammar, and other works. D. about the close of the 15th century.

Lascaris, Andrew John, surnamed "Rhyndacenus," a learned Greek, of the same family as the preceding, who was employed by Lorenzo de' Medici to collect books in Greece. On his return he was invited to France by Louis XII., who appointed him ambassador to Venice. When Leo X. ascended the papal chair, Lascaris went to Rome, and became director of the Greek college. He revived the use of the capital letters of the Greek alphabet, and wrote epigrams in that language. B. about 1445; D. 1530.

Lassa, *las'-sa*, 'land of the divine intelligence,' a city of Asia, the capital of Great Tibet. It is chiefly distinguished as the residence of the Dalai Lama, or great head of the Shaman religion. Hence it is usually crowded with royal and noble personages from all parts of Asia, who come to present their homage, and to offer splendid presents to this earthly divinity. It has a vast temple of Buddha, covering many acres of ground, and surmounted by a gilded dome. Contiguous to this structure, on its four sides, are four monasteries, in which it is said 4,000 recluses reside. It is a place of trade in wool, goat's-hair, silk, cashmere and linen fabrics, velvets, bezoar, fruits, bullion, and precious stones. *Pop.* Unascertained. *Lat.* 29° 30' N. *Lon.* 90° 40' E.

Laswade, *las'-waid*, a parish and village of Scotland, in Mid-Lothian, 5½ miles from Edinburgh, in a romantic country. *Manf.* Gunpowder and paper. It has an iron and brass foundry and oatmeal-mills. *Pop.* 6,000.

Latakia, or Latakieh, *la-ta-ke'-a*, a seaport of Syria, in the pashalic of Tripoli, 70 miles from Tripoli. It consists of an old and new town, but has greatly fallen into decay. In 1822 an earthquake reduced a great part of the new town to ruins. It has a trade in tobacco, for which it is famous; cotton, wax, sponge, and scammony. *Pop.* 7,000. It is the ancient Laodicea.

Latham, Robert Gordon, *lat'-tham*, an eminent modern philologist and ethnologist. His education was received at Eton and King's College, Cambridge, where, in 1833, he took the degree of B.A. He afterwards became fellow of his college, and took the M.D. degree. He displayed, even from the outset of his career, a profound acquaintance not only with the classical but also with the European languages. On being appointed professor of English literature at University College, shortly after its establishment, he commenced the publication of a series of works which have entitled him to the foremost place as a philosophical investigator of the English language. The chief of these works is his "English Language;" but he has followed up the subject with his "History and Etymology of the English Language," and other smaller works. As an ethnologist he has laboured with distinguished success; the "Varieties of Mankind," "Ethnology of the British Colonies," "Ethnology of Europe," and "Man and his Migrations," having thrown immense light upon the relations between the languages and the races of mankind. Although he has ceased to fulfil the active duties of the medical profession, Dr. Latham has held many important appointments in connection therewith; he is fellow of the Royal College of Physicians, and has officiated as assistant physician of Middlesex Hospital. The ethnological department of the Crystal Palace has been arranged by him; and, besides being vice-president of the Ethnological Society, he is a member of many learned societies, both on the continent of Europe and in America. B. in Lincolnshire.

Latheron, *lath'-e-ron*, a parish of Scotland, in Caithness-shire, 14 miles from Wick. It has some ancient remains and valuable fisheries. *Pop.* 8,300.

Latimer, Hugh, *lat'-i-mer*, an English prelate and martyr. He received his education at Cambridge, where, at the beginning of the Reformation, he was very zealous for popery; but on conversing with Bilney, the martyr, he renounced the Romish tenets, and became as ardent on the other side. He now laboured earnestly in preaching the gospel, and his fame reaching Henry VIII., he sent for him, and was so pleased with his discourses as to confer on him the bishopric of Worcester. But Latimer was no time-server; on the contrary, he expostulated with the king for his cruelties. He afterwards resigned his bishopric; and, on the fall of Lord Cromwell, his patron, he was sent to the Tower, where he remained till the accession of Edward VI., who would have restored him to his diocese, but he refused. He then resided with Cranmer, whom he assisted in framing the homilies, and in completing the work of reformation. When Mary came to the throne, he was committed to the Tower, whence he was sent, with Ridley and Cranmer, to Oxford, to hold a conference with some popish divines. In that dispute he conducted himself with remarkable clearness and simplicity; and when it was over, sentence was passed upon him and Ridley, who were burnt at the same stake, 1555. Latimer, after recommending his soul to God, thus cheered his brother sufferer: "We shall this day, my lord, light such a candle in England, as shall never be extinguished." His sermons have been often printed. B. in Leicestershire, about 1472.

Latona, *la-to'-na*, a daughter of the Titan Cœus, celebrated for the favours which she granted to Jupiter. Juno, always jealous of her husband, sent the serpent Python to persecute her. Latona wandered from place to place in the time of pregnancy, continually alarmed for fear of Python. She was driven from heaven, and Terra refused to give her a place where she might rest and bring forth. Neptune, moved with compassion, caused the island of Delos to rise out of the Ægean Sea; Latona there gave birth to Apollo and Diana. Juno obliged her to fly from Delos. After having wandered over the greatest part of the earth, and experienced the violence of Niobe and Tityus, she at length, though exposed to the resentment of Juno, became a powerful deity, and saw her children receive divine honours. Her worship was generally established where her children received adoration, particularly at Argos, Delos, and other places where she had temples.

Latouche-Treville, Louis de, *la-toosh' tre-veel'*, a French admiral. He became captain in 1780, and, during the wars between the English and French, signalized himself by many acts of bravery. In 1799—1801 he commanded the flotilla collected at Boulogne, ostensibly for the invasion of England. B. at Rochefort, 1745; D. at Toulon, 1805.

La Tour d'Auvergne. (*See* Auvergne.)

Latreille, Pierre André, *la-trail'*, a celebrated French naturalist. From his earliest years, he devoted himself to entomology, and ultimately became the most distinguished professor of that department of science in his native country. He contributed treatises thereon to the "Encyclopédie Méthodique," and to the Proceedings of many learned bodies. The entomological portion of the "Animal Kingdom" was written by him, although published under the name of Cuvier. Of this part, Mr. Swainson says, "It is the most elaborate and the most perfect in its details that has yet been given to the world, and possesses the advantage of being founded on a consideration of the entire structure of these animals; and hence gives us the first example in theory of the natural principle of classification." Latreille wrote a general history of insects for an edition of Buffon; "Genera Crustaceorum et Insectorum;" and "General Considerations on the Natural Order of Animals composing the classes Crustacea, Arachnides, and Insects." He was a chevalier of the Legion of Honour, a member of the Academy of Sciences, and correspondent of the Linnæan

Society of London. B. at Brives, France, 1762; D. at Paris, 1833.

LATUDE, Henri Mazers de, *la-tood'*, a Frenchman, who was confined in the Bastille and other prisons during 35 years. When about the age of 24, hoping to gain the patronage of Madame de Pompadour, mistress of Louis XV., he informed her of a plot against her life; but the intelligence proving to be an invention of his own, he was mercilessly condemned to the long incarceration he endured. He was released in 1784, and left behind his memoirs, containing many interesting details. B. in Languedoc, 1725; D. at Paris, 1825.

LAUBAN, or LUBAN, *low'-ban*, a town of Upper Lusatia, on the Queis, 60 miles from Dresden. *Manf.* Woollen, cotton, linen, and tobacco. *Pop.* 6,500.

LAUD, William, *lawd*, a celebrated English prelate, was the son of a clothier at Reading, in Berkshire. He received his early education at the grammar-school of his native town. In 1589 he entered of St. John's College, Oxford, of which he was elected fellow in 1593. While at the university, Laud showed himself "at least very popishly inclined;" and Dr. Abbot, master of University College, and afterwards archbishop of Canterbury, "so openly branded him for a papist, or at least popishly inclined, that it was almost made an heresy (as I have heard from his own mouth) for any one to be seen in his company, and a misprision of heresy to give him a civil salutation as he walked in the streets." These are the words of his contemporary, Heylin, who wrote his life. Laud's first preferment was the living of Stanford, in Northamptonshire. In 1608 he took the degree of D.D., and became chaplain to Neill, bishop of Rochester. In 1611 he was elected president of his college, and, in 1616, preferred to the deanery of Gloucester by the king, one of whose chaplains in ordinary he had previously become. The year following he attended King James to Scotland. In 1620 he obtained a prebend of Westminster, and, a year afterwards, was made bishop of St. David's. In 1622 he held his celebrated conference with Fisher, the Jesuit, in presence of the marquis of Buckingham and his mother. At the coronation of Charles I. he officiated as dean of Westminster. He succeeded Archbishop Abbot, in 1633, in the see of Canterbury. At this time he had reached the height of power, and was generally regarded as the prime minister of Charles I. Laud's statesmanship began with a fierce persecution of the Puritans. Alexander Leighton, for having published a book, entitled "Sion's Plea," was sentenced by the Star Chamber to have his ears cut off, his nose slit, and to be publicly whipped. Similar severities were subsequently practised upon Burton, Prynne, and others, for what Laud termed "libels against the hierarchy of the Church." The high-placed and zealous churchman did not consider these sentences sufficiently severe, for he says in his diary, in 1637, "I have received the copy of the sentence against Paterson, and am verily of your lordship's mind, that a little more quickness in the government would cure this itch of libelling, and something that is amiss besides." The end of his intolerable reign speedily arrived, however: on the breaking out of the revolution, his palace was assaulted by the mob, and, in 1640, he was impeached by the House of Commons, and sent to the Tower, but not brought to trial till three years afterwards, when he ably defended his conduct. Though no treason was proved, the House of Commons passed an act of attainder against him, which the Lords were compelled to affirm, and he was beheaded on Tower Hill, 1644. In justice to Archbishop Laud, it must be said that he was a man of piety, and was possessed of considerable learning; while his benefactions to the university of Oxford prove him an ardent supporter of learning. B. at Reading, 1573.

LAUDER, *law'-der*, an ancient royal burgh of Berwickshire, Scotland, 16 miles from Kelso, in a parish of the same name. It was often the place of meeting for the parliament of Scotland, and has a town-house, several libraries, and schools. *Pop.* 1,200.

LAUDER, a river of Scotland, in Berwickshire, joining the Tweed near Melrose.

LAUDER, Sir Thomas Dick, a modern Scotch littérateur, who contributed to "Blackwood's Magazine," "Simon Roy, gardener, of Dumphail," and other papers. In 1830 he wrote an interesting account of the great floods in the province of Moray and the adjoining districts. He was likewise author of "Highland Rambles, with long Tales to shorten the way," "Legendary Tales of the Highlands," a "Memorial of the Royal Progress in Scotland in 1842," and other works. He was a fellow of the Royal Society. B. 1784; D. near Edinburgh, 1848.

LAUDERDALE, *law'-der-dail*, anciently the western district of Berwickshire.

LAUDERDALE, J., Duke of, one of the commissioners charged by the Covenanters to treat with Charles I. He subsequently fought under the royal standard; and, when Charles I. was beheaded, entered England with Charles II., but was taken prisoner at the battle of Worcester, and thrown into prison, where he remained during nine years. Becoming prime minister in 1670, he retained power until 1682. D. 1682.

LAUDOHN, or LOUDON, Gideon Ernest, *low'-done*, an eminent German general, was of a noble family, which came originally from Scotland. In 1731 he entered the Russian service; but although he behaved with great gallantry, he only obtained a lieutenancy; on this he went into the Austrian service in 1742, and obtained a captain's commission. After the peace, in 1748, he was raised to the rank of major. At the beginning of the Seven Years' war, he was appointed lieutenant-colonel of Croats, and displayed brilliant military talents against the king of Prussia. In 1757 he was made major-general, and the year following invested with the military order of Maria Theresa. The same year was gained the great battle of Hochkerchen, the merit of which is generally attributed to Laudohn, who also gained the battle of Kunnersdorf, for which the empress Elizabeth of Russia presented him with a magnificent sword. He afterwards defeated the Prussians at Landshut, and took the town of Glatz. At the conclusion of the war, in 1763, he was rewarded with a pension and a barony. In 1766 he was nominated a member of the aulic council of war, and, in 1778, elevated to the dignity of field-marshal. In the Turkish war he served with additional reputation, and, in 1789, added Belgrade to the imperial dominions. Being seized with fever at his head-quarters in Moravia, in consequence of an operation he underwent for an obstruction in the urethra, his impatience under the medical applications, the impetuous ardour of his character, and the knowledge, above all, of his importance in the war, contributed to irritate his mind, and promote the violence of the disorder. He resisted the applications of cataplasms, before and after the incisions were made, with a fatal obstinacy, which raised the inflammation to such a height that his death ensued. B. at Tootzen, 1716; D. 1790.

LAUENBURG, *low'-en-boorg*, a duchy of the German confederation, on the right bank of the Elbe, adjacent to Hamburg, and included, since 1815, in the dominions of Denmark. It is bounded on the N. by Lubeck, on the E. by Mecklenburg-Schwerin, on the W. by Holstein, and on the S. by the Elbe. *Desc.* Flat and sandy in the centre. *Rivers.* The Delvenane and the Stecknitz. *Pop.* 47,000. *Lat.* between 52° 20′ and 53° 48′ N. *Lon.* between 10° 13′ and 11° 3′ E.

LAUENBURG, the capital of the above duchy, 30 miles from Hamburg, has a considerable transit trade. *Pop.* with suburbs, 4,000.

LAUENBURG, a town of Prussia, in Pomerania, 68 miles from Koslin. *Manf.* Woollens and linens. *Pop.* 4,500.

LAUGHTON, *law'-ton*, the name of several parishes in England, none of them with a population above 1,000.

LAUJAR, or LANJAR, *low'-har*, a town of Spain, 18 miles from Almeira, on the slope of the Sierra Nevada. *Manf.* Cloth. *Pop.* 3,000.

LAUNCESTON, *lans'-ton*, a market and borough town of Cornwall, on the Attery, 12 miles from Tavistock. The principal object of interest is the castle, the ruins of which still prove it to have been a very strong and important fortress. It has, besides, an ancient church, a guildhall, various schools, and a union workhouse. *Pop.* 6,000.

LAUNCESTON, a district of Tasmania, bounded on the N. by Bass's Strait, on the S. by the district of Campbeltown, on the W. by Norfolk Plains, and on

the E. by the Pacific Ocean. *Area*, 3,800 square miles. *Desc.* Mountainous, and watered by the Tamar. *Pop.* 11,000.—The CAPITAL town is of the same name, and is 30 miles from Port Dalrymple. It is the residence of a civil commandant, and has a considerable traffic with S. Australia and Victoria. *Pop.* 6,000.

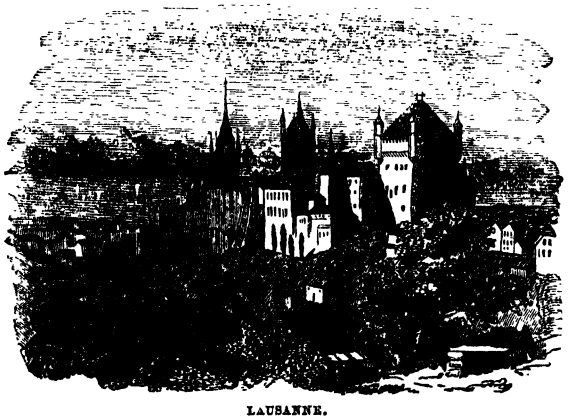
LAUPEN, *lo'-pen*, a small town of Switzerland, on the Sarine, 12 miles from Bern. In 1339 a battle was here fought between the Swiss and the Austrians, in which the latter were defeated.

LAURA. (*See* PETRARCH.)

LAUREL MOUNTAINS, *lor'-el*, in the United States, run west of the Alleghany ridge, across Virginia into Kentucky, where they take the name of the Cumberland Mountains.

LAUREL RIVER, a river of Kentucky, which runs into the Cumberland.

LAURENCE, ST., *lor'-ence*, the name of several parishes in England, none of them with a population above 500.



LAURENCE, ST., or CLARK ISLAND, an island in Behring Sea. *Ext.* 80 miles long, with a breadth of 30. *Lat.* 63° N. *Lon.* 170° W.

LAURENCEKIRK, *lor'-ence-kirk*, a village and parish of Kincardine-shire, Scotland, 8 miles from Montrose. *Manf.* Snuff-boxes and linens. *Pop.* 1,700.

LAURENS, *lor'-ens*.—1. A district of South Carolina, between Enoree and Saluda rivers. *Area*, 920 square miles. *Pop.* 24,000.—2. A county of Georgia, on the Oconee. *Area*, 763 square miles. *Pop.* 7,000.—Also, a township in New York, 70 miles from Albany. *Pop.* 2,500.

LAURENT, ST., *lor'-awng*, the name of numerous places in France, none of them with a population above 4,000.

LAUSANNE, *lo-san'*, the capital of the Swiss canton of the Pays de Vaud, delightfully situate on three eminences, above a mile to the north of the Lake of Geneva, and 40 miles from Bern. From the uneven surface,

LAUSANNE.

the streets are steep and irregular, and the houses not well built. The principal buildings are the cathedral, a venerable building in the Gothic style, situate on the highest of the eminences; the castle, the town-house, arsenal, hospital, charity-school, riding and drawing schools, several good libraries, cabinets of natural history, and other institutions. *Manf.* Woollen cloths, leather, paper, and jewellery. The beautiful and picturesque views presented by the lake and the surrounding mountains, render Lausanne a place of much attraction. *Pop.* 17,300. Under the French it was the capital of the department Leman.

LAUSIGK, *lou-seek'*, a town of Saxony, 20 miles from Leipsic. *Manf.* Woollens and linens. *Pop.* 2,500.

LAUTER, *lou'-ter*, a river of Rhenish Bavaria, rising in the Vosges mountains, and, after a course of 45 miles, joining the Rhine at Lauterburg.

LAUTER, a town of Saxony, in the circle of Zwickau. In its neighbourhood are coal-mines and vitriol-works. *Pop.* 2,500.

LAUTERBURG, *lo'-ter-boorg*, a town of France, 14 miles from Landau. It has some iron-works. *Pop.* 2,500.—In 1793 the French forced the famous lines of Lauterburg, and took this place.

LAUTERBRUNNEN, *lou'-ter-broon'-nen*, a parish and village of Switzerland, 33 miles from Oberland. *Pop.* about 2,000. In a valley here the sun does not appear before 7 a.m., because of the height of the surrounding mountains.

LAUZUN, Antoine Duke de, *lo'-zu(r)n*, a celebrated favourite of Louis XIV. The French king had already appointed him governor of Berri and mareschal-de-camp, and promised him the grade of grand master of of artillery; but the duke having been indiscreet enough to boast of the king's favour, the latter revoked his promise. Upon this the irritated Lauzun so far forgot himself as to break his sword before the king, declaring he would no longer serve a faithless monarch. He was thereupon incarcerated in the Bastille, but was released after a few days' confinement, restored to favour, and even promised the hand of the duchess de Montpensier, grand-daughter of Henry IV. A court intrigue broke off the marriage, but, according to some, it was secretly contracted. To recompense him for this disappointment, Louis XIV., in 1671, gave him the command of the French army in Flanders. Lauzun, however, soon afterwards gave offence to Madame de Montespan, then all-powerful, and was suddenly disgraced and thrown into prison, where he remained for ten years. He went to London in 1688, and was intrusted by James II. with escorting the queen of England to France. He afterwards appeared at court, but never regained his former high position. B. in France, about 1632; D. 1723.

LAVAL, *la'-val*, a town of France, on the Mayenne, 40 miles from Rennes. Its principal edifices are a castle, cathedral, town-hall, linen-hall, theatre, college, public library, hospitals, and schools. *Manf.* Linen thread and fabrics, cotton handkerchiefs and calicoes. There are some dye-works, marble-works, and tanneries. *Pop.* 20,000. This place suffered greatly in the Vendean war, towards the close of the last century.

LA VALETTE, G. Parisot de, *va'-let*, forty-eighth grand-master of the Knights of Malta, to which dignity he was elected in 1557. Under his command, Malta withstood the attacks of a force sent against it by Solyman II., consisting of 40,000 men and 200 vessels, during four months. He subsequently built the town called after his name, and rendered the island of Malta impregnable. B. 1494; D. 1568.

LA VALLIÈRE, Louise Françoise de, *val'-le-air*, a mistress of Louis XIV. She was at first maid of honour to the duchess of Orleans, afterwards wife of Charles I., king of England. Mdlle. de la Vallière became the French king's mistress in 1661. She was granted vast possessions, and was created duchess. Her feeble nature had something of the religious in its composition, and in a freak of remorse she twice took refuge in a convent, whence the king each time recalled her to court. At length, after being neglected by Louis for Madame de Montespan, she, in 1674, finally took refuge in a Carmelite convent, and there passed the remainder of her life in the exercise of an austere piety. She left behind some pious reflections on the forgiveness of God. B. in Louvain, 1644; D. 1710.

LAVATER, John Gaspard Christian, *la-va'-ter*, the author of the celebrated works on physiognomy. He was a Swiss divine, and became pastor of the church of St. Peter, at Zurich. He cultivated letters, and produced a variety of works, relig ous and poetical,

besides his famous writings on physiognomy. About the age of 25, Lavater began to study the faces of those whom he met, and sought to discover a corresponding resemblance between their mind and features. During several years he collected portraits of the people with whom he had become acquainted, made sketches of others, and after much observation he endeavoured to raise physiognomy to the rank of a science, by producing his works, entitled "Essays on Physiognomy,"

LAVATER.

and the "Art of knowing Mankind by Physiognomy." His books have been translated and reproduced in many forms, and are popular throughout the world. At first he hailed the French revolution with enthusiasm; but after the death of Louis XVI., his mind underwent a complete change, and when the French invaded Switzerland, Lavater preached against them, in the pulpit and in the public places. Massena stormed Zurich in 1799, and Lavater, while encouraging his townsmen to repel the aggressors, was wounded by a grenadier, or, as some assert, by an assassin whom he knew, but whose name he would never divulge. Lavater was a pious man, of brilliant talents, mingled with a considerable share of mysticism. He died of the effects of his wound, in 1801. B. at Zurich, 1741.

LAVAUR, *la-vore'*, a town and parish of France, on the Agout, 22 miles from Toulouse. *Manf.* Silk damasks; and it is the entrepôt for the silk goods of Upper Languedoc. *Pop.* 7,400.—In the 13th century, this was the stronghold of the Albigenses.

LAVER, *lai'-ver*, the name of several parishes in England, none of them with a population above 600.

LAVERNA, *lă-ver'-na*, the goddess of thieves and dishonest persons with the Romans, who raised her an altar near one of the gates of the city, which, from that circumstance, was called the gate of Laverna.

LAVOISIER, Antoine-Laurent, *la-vwoi'-ze-ai*, a celebrated French chemical philosopher. He was the son of a wealthy man, and was educated with the greatest care at the Collége Mazarin, and became equally versed in mathematics, botany, astronomy, and chemistry. But the great discoveries recently made by Dr. Black and others in chemistry, induced him to devote himself to that branch of philosophical learning. In 1764, when only 21 years of age, he obtained the prize from the Academy for the best treatise on lighting the streets of Paris, so as to combine the several properties of economy, distinctness of vision, and facility of observation. Two years afterwards, he was chosen member of the Academy, to whose Proceedings he contributed a number of valuable scientific papers. In 1769 he became one of the farmers-general of the revenue, and was subsequently appointed superintendent of the saltpetre-works of France. He was the inventor, or rather compiler, of a new theory of chemistry, which was received with applause in Germany and France, though strenuously opposed by Dr. Priestly, whose "phlogistic" hypothesis it tended to overthrow. In 1789, he published his "Elements of Chemistry," a work of great value and importance. Besides this work, he wrote "Chemical and Philosophical Miscellanies," and a "Report of the Commissioners charged with the Examination of the Principles of Animal Magnetism." During the Reign of Terror he was, quite unjustly, accused of having mixed certain noxious ingredients with tobacco; and, notwithstanding his talents and virtues, was dragged before the revolutionary tribunal, who condemned him to death. He asked for time to complete some experiments with which he was engaged, but was informed that the republic did not want chemists. Brande, the celebrated English chemist, thus characterizes the French philosopher:—"He has in some measure suffered by the misguided zeal of some of his admiring commentators, who, not satisfied with allowing him due merit for the logical precision and sagacity of induction which he brought into chemistry, have represented him as having the experimental activity of Priestly and the laborious diligence of Scheele. But Lavoisier, though a great architect in the science, laboured but little in the quarry: his materials were chiefly shaped to his hand, and his skill was displayed in their arrangement and combination." B. at Paris, 1743; guillotined, 1794.

LAVORO, *la-vo'-ro*, a province of Naples. (*See* TERRA-DI-LAVORO.)

LAW, Edward, first Lord Ellenborough, *law*, a celebrated English judge. After completing his education at St. Peter's College, Cambridge, he became a student of law at the Inner Temple. On being called to the bar, he rapidly rose to the first posts of his profession. Between the years 1788-95 he was engaged as the leading counsel in defence of Warren Hastings: in 1801 he became attorney-general, entered the House of Commons, and received the order of knighthood. The following year he was created Lord Ellenborough, and was appointed lord chief justice of the court of King's Bench. In 1813 he was one of the commissioners to investigate the conduct of the princess of Wales; in 1814 he was one of the judges at the trial of Lord Cochrane (*see* DUNDONALD, Earl of), and, four years afterwards, acted in the same capacity at the trial of William Hone. (*See* HONE.) He retired from the bench in the same year. Lord Brougham thus describes him:—"The Term Reports bear ample testimony to the vigour of this eminent individual's capacity during the eighteen years that he filled the first place among the English common-law judges. . . . He was somewhat irascible, and even violent; but no one could accuse him of the least partiality. His honest and manly nature ever disdained as much to trample overbearingly on the humble, as to crouch meanly before the powerful. . . . He dispatched business with great celerity, and, for the most part, with success. But causes were not sifted before him with that closeness of scrutiny, and parties were not suffered to bring forward all they had to state with that fulness and freedom which can alone prevent misdecision, and insure the due administration of justice." B. at Great Salkeld, Cumberland, 1750; D. in London, 1818.

LAW, John, a famous projector of financial schemes. He was the son of a goldsmith at Edinburgh, and having acquired a considerable knowledge of practical mathematics, and particularly excelling as an accountant, he was appointed to arrange the revenue accounts of Scotland, an employment which turned his mind towards finance. He was at first, however, only remarkable for his loose course of life, and for his talents as a gambler. Forced to quit England for having killed a person in a duel, he wandered over the continent of Europe, deriving his subsistence mainly from the gaming-table. In 1716 he went to Paris, and succeeded in gaining the confidence of the regent, duke of Orleans, who authorized him to establish a bank, and appointed him manager of it. To this was soon afterwards added the Mississippi Company, a scheme which had for its objects the paying off the national debt, and the enriching of its subscribers. Ultimately, the

company was granted the entire monopoly of the trade of France, from the Cape of Good Hope eastward to all the other parts of Africa, to Persia, India, China, Japan, and the isles, even to the Straits of Magellan and Le Main. Finally, Law's establishment was created the Royal Bank in 1718, and, in 1720, he was nominated comptroller-general of finance. The project became extravagantly popular, and every one appeared anxious to convert his gold and silver into paper; but the bubble at length burst, and many thousands of families, once wealthy, were reduced to poverty. Law became the object of general execration, and was obliged to quit France. He wandered about Germany during several years, and died in indigence at Venice, in 1729. B. at Edinburgh, about 1681.

Lawes, Henry, *laws*, an English musician. He became a gentleman of the chapel royal, and one of the band of Charles I. In 1653 he published his "Ayres, Dialogues, &c." He set to music the "Comus" of Milton, with whom he was intimate. He also wrote music for the songs of Waller and other poets of his time, and composed the coronation anthem for Charles II. B. at Salisbury, 1600; D. 1662.—His brother William was an excellent musician: he was commissary in the royal army, and was killed at the siege of Chester, in 1645.

Lawrence, St., *lor'-ence*, one of the largest rivers in North America, issuing from Lake Ontario, and forming the outlet of the great lakes Superior, Huron, Michigan, Erie, and Ontario. In different parts it is known by different names, and from Lake Ontario to the Gulf of St. Lawrence, it has a course of 770 miles. From Lake Ontario to Montreal, the distance is 190 miles. In this part of the river there are numerous islands, shoals, and rapids, and it spreads out, also, into large lakes. To Montreal ships of 600 tons can ascend with little difficulty; thence the navigation is continued by canals to Kingstown and Lake Ontario. About 90 miles below Montreal, the influence of the tide ceases entirely. At Quebec, the river is 2 miles across, and continues gradually increasing in breadth, until it enters the Gulf of St. Lawrence, where, from Cape Rosier to the Mingan settlement, on the Labrador shore, it is near 105 miles wide. From the beginning of December until the middle of April, the water communication is totally suspended by the frost. The basin of the St. Lawrence is estimated to contain 297,000 square miles, of which 91,000 are covered with waters of the lakes. *Length*, 1,800 miles. The great Victoria Bridge, built by Robert Stephenson, crosses this river in the neighbourhood of Montreal. (*See* Montreal.)

Lawrence, the name of several counties and townships in the United States, none of them with a population above 16,000. The counties are in Alabama, Tennessee, Mississippi, Ohio, Kentucky, Illinois, Indiana, and Arkansas.

Lawrence, Gulf of St., which receives the waters of the St. Lawrence river, is formed between the western part of Newfoundland, the eastern shores of Labrador, and parts of the provinces of New Brunswick, Nova Scotia, and the island of Cape Breton. *Ext.* 280 miles long, by the same in width. It communicates with the Atlantic Ocean by three different passages, and contains many islands Its fisheries are very important. *Lat.* between 46° and 54° N. *Lon.* between 58° and 65° W.

Lawrence, a town of the United States, in Massachusetts, 26 miles from Boston. *Manf.* Linen and cotton goods. *Pop.* 9,000.

Lawrence, Sir Thomas, a celebrated English painter. He was the son of an innkeeper, first established at Bristol, and afterwards at Devizes. The latter place was much frequented by the rich and fashionable, on the road to Bath. Young Thomas Lawrence, while yet in petticoats, drew . kenesses with astonishing skill, and, as he was moreover possessed of great personal beauty, he soon attracted the notice of his father's customers. At the age of 13, he obtained a prize from the Society of Arts for a crayon copy of the Transfiguration. In 1787 his father went to London, and obtained an introduction for his son to Sir Joshua Reynolds, who liberally encouraged the young artist. In the same year he exhibited seven female portraits at Somerset House, and from that time his fame rapidly became established. After becoming associate of the Royal Academy, he was nominated principal painter in ordinary to George III., in 1792. George IV., when prince-regent, commissioned him to paint the portraits of those sovereigns, warriors, and statesmen who had restored peace to Europe; and in 1814 he began his work with the portraits of the king of Prussia and Blucher. The whole collection is now exhibited in the Waterloo Hall of Windsor Castle. Of these portraits Dr. Waagen says: "All cannot be equal in merit. I was particularly pleased with those of the pope, Cardinal Gonsalvi, and the emperor of Austria. Besides the graceful and unaffected design, the clear and brilliant colouring, which are peculiar to Laurence, these are distinguished by greater truth of character, and a more animated expression, than is generally met with in his pictures." In 1815 he was knighted, and from that time to his death he was the most popular portrait-painter in England. On the death of Benjamin West, he was chosen president of the Royal Academy. Three of his best works are in the National Gallery,—John Kemble, Mrs. Siddons, and Benjamin West. D. at Bristol, 1769; D. in London, 1830.

Lawrence, Sir Henry Montgomery, a distinguished British officer. He was the eldest son of Lieutenant-Colonel Alexander William Lawrence, some time governor of Upnor Castle, who distinguished himself by his gallantry at Seringapatam. Having received his early education at the diocesan school of Londonderry, and afterwards at the Royal Military College, Addiscombe, he entered the military service of the Hon. East-India Company, in 1821, as a cadet in the Bengal artillery. He soon acquired the reputation of one of the most able and intelligent officers in the service; and, having seen some active service in the Cabul campaign in 1843, he was raised to the rank of major. In the same year he became British resident at Nepaul. He afterwards played a distinguished part in the campaigns on the Sutlej, soon after which he was made a military companion of the Bath, and at the same time promoted to the rank of lieutenant-colonel. In 1846 he was appointed resident at Lahore. It was for his able services in the administration of this important office that he was made a K.C.B. (civil) in 1848. In the following year he was appointed by Lord Dalhousie president of the board for the reduction and government of the recently annexed province of the Punjab, where his administrative talents were admirably proved. On the outbreak of the Indian mutiny, he showed himself one of the firmest and most able officers in the Company's service. He fortified and defended Lucknow with great skill and bravery; but his valuable life was lost to his country while commanding a sortie from the garrison. B. at Mattura, Ceylon, 1806; killed near Lucknow, 1857.

Lawrence, Stringer, an eminent general in the service of the East-India Company, who, out of gratitude for his services, erected a monument to his memory in Westminster Abbey. B. 1697; D. 1775.

Lawson, Sir John, *law'-son*, a brave English admiral, who rose from the lowest station to the command of a ship. He served the Parliament with great fidelity, but co-operated with Monk in effecting the Restoration, for which he received the thanks of both houses. He served under the duke of York, as rear-admiral, and was killed in the engagement with the Dutch fleet in 1665.

Laxas, *lax'-as*, a river of central America, watering the country between Lake Nicaragua and the Pacific, and entering the lake 16 miles from Nicaragua.

Layard, Austen Henry, *lai'-yard*, a modern English politician and traveller. The greater portion of his youth was spent at Florence, where he devoted himself to literature and the fine arts. He went to London, with the intention of becoming a student of the law, but, abandoning that idea, set out for the East, where he acquired the Turkish and Arabic languages, and adopted the dress and manners of the people with whom he sojourned. He subsequently went to Persia, with the intention of exploring the remains of Susa, and discovered the tomb of Daniel. About the year 1844 he began examining the ruins at Nimroud, and, under great difficulties, succeeded in excavating many sculptures, which have proved of the highest value in elucidating the history of Assyria and Babylonia. The

immense remnants of antiquity now in the British Museum, were floated down the river Tigris upon rafts sustained by inflated skins, and were shipped for England at Bagdad. An account of his labours was afterwards narrated by him in his works, entitled "Nineveh and its Remains," "Monuments of Nineveh," and "Discoveries in the Ruins of Nineveh and Babylon." In 1848 he became attaché to the British embassy at Constantinople, and, in the following year, he again examined the mounds at Nineveh. When it is remembered that, as Mr. Layard says, "Nineveh had been almost forgotten before history began," and that, until his discoveries, all that remained of that city, as well as of Babylon, might have been carried in "a little hand-box," we may conceive how great have been his services to the cause of historical investigation. In 1851 he acted for a short period as under-secretary of state for foreign affairs, and, in the year following, was returned to the House of Commons as member for Aylesbury. He became D.C.L. of the university of Oxford in 1848, and, in 1856, was elected lord rector of the university of Aberdeen. His visit to the Crimea, while the allied French and English armies were before Sebastopol, caused him to become one of the principal advocates for the commission of inquiry into the condition of the British army, that subsequently sat. B. at Paris, 1817.

Laybach, Government of, *lai'-bak*, one of the divisions of Austrian Illyria, now comprised in Carinthia and Carniola.

Laybach, or Laibach, the capital of the preceding government, on the Laybach, 28 miles from Trieste. It has three suburbs, a town-house, a cathedral, and many other handsome public buildings. *Manf.* Linen fabrics, porcelain, and refined sugar. *Pop.* 17,000. *Lat.* 46° 1′ 48″ N. *Lon.* 14° 30′ E.—This place was taken in 1799 by Bernadotte, and in 1809 by Macdonald; and is well known from the congress which was held in it in 1821, the object of which was the extinction of the constitutional government, as established at Naples after the insurrection in 1820.

Laybach, a river of Germany, rising near Adelsberg, under the name of Poik, and losing itself in the grotto of Adelsberg. It afterwards reappears, but is lost again until it arrives at Upper Laybach, where it becomes navigable.

Lé, *lai*, a city of central Asia, the capital of Little Tibet, built at an elevation of upwards of 10,000 feet above the level of the sea. It is the great rendezvous between Chinese Tartary and the Punjab, and is the chief mart for shawl-wool, brought from the former country. *Pop.* 4,000. *Lat.* 34° 10′ N. *Lon.* 77° 40′ E.

Lea, *le*, a river of England, rising near Luton, in Bedfordshire, and, after a course of 40 miles, falling into the Thames at Blackwall.

Lea, the name of several parishes in England, none of them with a population above 1,000.

Leadhills, *led'-hills*, a village of Lanarkshire, Scotland, on the most elevated ground that is to be met with in the south part of that county, 42 miles from Glasgow. In the hills, rich lead-mines have been long worked; and from the concourse of miners, the two villages of Leadhills and Wanlockhead have gradually arisen. *Pop.* 1,000.—Allan Ramsay, the poet, was born here.

Leake, *leke*, the name of several parishes in England, none of them with a population above 2,300.

Leake, a county of the United States, in Mississippi. *Area*, 635 square miles. *Pop.* 6,000.

Leake, Richard, master-gunner of England, who distinguished himself in several naval actions, particularly in the engagement with Van Tromp, in 1673. He was then on board the *Royal Prince*, which had lost all her masts; most of her guns were dismounted, and 400 of her men killed or wounded; notwithstanding which, he defended the ship against a superior force, and brought her to Chatham. He was afterwards made master-gunner of England, and storekeeper of the ordnance at Woolwich. B. at Harwich, 1629; D. 1686.

Leake, Sir John, an English admiral, son of the preceding, with whom he served in the action with Van Tromp. In 1702 he expelled the French from Newfoundland, and on his return was made rear-admiral of the blue. The year following he assisted Admiral Rooke in taking Gibraltar, for which he was knighted. In 1705 he saved that important fortress from the combined attacks of France and Spain. The same year he was engaged in the reduction of Barcelona, and in 1706 he so seasonably relieved that place, that King Philip was obliged to raise the siege. On the death of Sir Cloudesley Shovel, he was appointed admiral of the white, and commander-in-chief of the fleet. He retired on a pension, on the accession of George I. B. at Rotherhithe, 1656; D. 1720.

Leamington, or Leamington Priors, *lem'-ing-ton*, a market-town and watering-place of Warwickshire, noted for its mineral spring, 2 miles from Warwick. Its principal buildings are a Gothic church, assembly, concert, and reading-rooms, a theatre, museum, and the baths. *Pop.* 16,000.—It is connected with Warwick by railway.

Leander, *le-an'-der*, a young Greek of Abydos, who was drowned while swimming across the Hellespont to meet his mistress Hero.

Leao-Tong. (*See* Ching-King.)

Lebanon, *leb'-a-non*, 'the white mountain,' a mountain-chain of Syria, extending from the vicinity of Antioch S. to near Sidon. Its culminating peak is Jeb-el-Makhmel, 12,000 feet above the level of the sea. Here dwell the Druses, the most compact and united sectarians in Asia. They occupy the whole of the southern range of the Lebanon chain, the western slope of Anti-Lebanon, and Gʼ bl-il-Sheikh, where they hold exclusive possession of upwards of forty towns and villages, and, with the Maronites, share 200 more. Eighty villages in other parts of Lebanon are also peopled by them. They owe their origin to a Persian, Mohammed Ben-Ismail-ed-Derazy, who settled in Egypt in 1017, but who, on account of his fanaticism, was driven from the country, and forced to take refuge in the valley of Wady-el-Teim. Here he propagated his dogmas, which were afterwards modified by Hamza, whom the Druses venerate as their real founder.

Lebanon, a county of the United States, in Pennsylvania. *Area*, 376 square miles. *Pop.* 28,000.—Also the name of several townships, none of them with a population above 8,000.

Lebid, *le-bid'*, an Arabian poet, who was employed by Mahomet to answer the satires which were written against him. D. at the age of 140.

Lebong, *le-bong'*, a lofty ridge of the main range of the Himalaya Mountains, India, in the district of Kumaon. The summit of the pass is nearly 19,000 feet above the level of the sea. *Lat.* 30° 20′ N. *Lon.* 80° 39′ E.

Lebrun, Charles, *le'-bru(r)*, a celebrated French painter, who went to Rome, where he studied under Poussin. On his return to France, he was presented by Cardinal Mazarin to Louis XIV., who appointed him court painter, and director of the Academy of Artists and of the Gobelin manufactory. His chief works were "The Battles of Alexander;" he was likewise the author of several valuable works, the principal of which were "The Physiognomy of Men and Animals," and "On the Character of the Passions." B. at Paris, 1619; D. 1690.

Lecce, *letch'-ai*, a well-built city of Naples, in the province of Otranto, 20 miles from Otranto. Its principal buildings are a castle, cathedral, several other churches, convents, a royal college, town-hall, theatre, hospital, and government house. *Manf.* Woollens, cottons, silks, lace, thread, and snuff. *Pop.* 15,000.

Lech, *lek*, a river of Germany, rising in the Vorarlberg, and, after a course of 150 miles, falling into the Danube, 25 miles from Augsburg.

Le Clerc, Sebastian, *le(r) klair*, an eminent French artist. Pope Clement XI. knighted him, and Louis XIV. appointed him his engraver in ordinary. He engraved above three thousand pieces, and was the author of treatises on Geometry, Architecture, and Perspective. B. 1637; D. 1714.

Le Clerc, John, an eminent writer and critic, was brother of the last-mentioned. He was ordained a minister; but, having embraced the Arminian doctrines, he left his native country, and in 1682 went to London, where he officiated for some time in two French congregations. The climate of England not agreeing with his constitution, he went to Amsterdam, and became professor of philosophy, Hebrew, and

belles lettres in the Remonstrant College. In 1686 he commenced a literary journal, entitled "Bibliothèque Universelle et Historique," which gained great celebrity, and was continued till 1693. From 1703 to 1713 he conducted another, entitled "Bibliothèque Choisie," which was followed by his "Bibliothèque Ancienne et Moderne," from 1714 to 1729. He also published systems of Logic, Ontology, and Pneumatology. Besides these, he published several miscellaneous pieces, editions of ancient and modern authors, a translation of the Bible into French, &c. He was, with all his learning and industry, a man of excessive vanity. B. at Geneva, 1657; D. at Amsterdam, 1736.

Leclerc, Victor Emmanuel, a distinguished French general, who obtained the hand of Pauline, sister of Bonaparte, whom he greatly assisted after his return from Egypt. In 1802 he was appointed commander-in-chief of the expedition to St. Domingo, where he fought against the negro general, Toussaint L'Ouverture, but fell a victim to the climate, in the same year. B. 1772.

Lectoure, *lek-toor'*, a town of France, in the department of the Gers, on the Gers, 20 miles from Auch. *Manf.* Serges and coarse woollens. *Pop.* 6,500.

Leczna, *lekz'-na*, a royal town of Poland, on the Wiepry, 15 miles from Lublin. *Pop.* 2,500.

Leda, *le'-da*, a daughter of king Thestius, and wife of Tyndarus, king of Sparta. Being seen bathing in the river Eurotas by Jupiter, the god, struck with her beauty, resolved to deceive her. He persuaded Venus to change herself into an eagle, while he assumed the form of a swan, and, after this metamorphosis, Jupiter, as if fearful of the cruelty of the bird of prey, fled to the arms of Leda, who willingly sheltered the trembling swan. The caresses with which Leda received the swan enabled Jupiter to avail himself of his situation, and, in nine months after, she brought forth two eggs, from one of which sprang Pollux and Helena, and from the other Castor and Clytemnestra. The two former were deemed the offspring of Jupiter, and the others claimed Tyndarus for their father.

Ledbury, *led'-ber-re*, a market-town of Herefordshire, on the Hereford and Gloucester canal, 12 miles from Hereford. Its church is a large building, in the Saxon style. *Manf.* Ropes, lines, and sacks for meal. In its vicinity are marble-quarries, hop-grounds, and cider-orchards. *Pop.* 5,000.

Ledru-Rollin, Philippe, *led'-roo rol'-lă*, a French politician and political writer. He was educated for the profession of the law, and commenced practising as an advocate in 1832. From that year until 1848, he was extensively employed in defending political prisoners, and, both in his speeches and writings, proved himself one of the most vehement members of the ultra-liberal party in France. When the revolution of 1848 burst forth, his influence in the Chamber of Deputies became only second to that of Lamartine; and, on the establishment of the provisional government, he was nominated minister of the interior, in which position he zealously endeavoured to republicanize his native country. On becoming a candidate for the presidency, his name was third on the list; Louis Napoleon and Cavaignac being first and second, and Lamartine last. Subsequently, he became a most violent opponent of Louis Napoleon's government, and, after stirring up the people of Paris into an insurrection, in June, 1849, he fled to England, where he has ever since resided. In 1850 he published a work called "The Decline of England," wherein he severely condemned the country whose hospitable laws shielded him from the resentment of the authorities then paramount in his native country, and from which he had fled. B. at Mons, 1807.

Ledyard, John, *led'-yard*, an American, rendered remarkable by his adventures. His father dying while he was young, he was left poor and friendless. After spending some years among the Indians, he took passage from New York to London as a common sailor. In 1766 he went with Captain Cook on his third voyage, as corporal of marines; was with that great navigator when he was killed, and, some years afterwards, wrote an account of his voyage. Conceiving the daring idea of traversing the unexplored regions of America, from Nootka Sound to the eastern coast, he left England in 1786, to prosecute his journey, with only ten guineas in his pocket. He travelled through Denmark and Sweden, and after unsuccessfully attempting to cross the Gulf of Bothnia on the ice, he passed round it, and arrived at St. Petersburg in 1787. He entered that city without money and almost without clothing, but contrived to obtain a small sum, and permission to travel with a convoy to Yakutsk, in Siberia. He had reached the latter place, in 1788, when he was suddenly arrested by order of the empress Catherine, escorted to the frontiers of Poland, and informed that he would be hanged were he again found in Russia. He arrived in England after undergoing the severest hardship, and very soon afterwards set out, under the auspices of the Society for Promoting African Discovery, to explore the regions of Africa. It is narrated that on being asked when he would be able to start, his reply was, "To-morrow morning." He left London in June, 1788, and two months afterwards reached Cairo, where, being attacked by a bilious disorder, he died at the beginning of the following year. B. at Groton, Connecticut, 1751; D. 1789.

Lee, *le'*, a river of Cheshire, which joins the Wever. —2. Of Ireland, falling into Cork harbour, after a course of 35 miles.—3. Of Ireland, falling into Tralee bay.

Lee, the name of several parishes in England, none of them with a population above 3,700.

Lee, the name of several counties in the United States, with populations varying between 5,000 and 12,000. They are in Virginia, Iowa, Georgia, and Illinois.—Also the name of several townships, none of them with a population above 3,500.

Lee, Samuel, a nonconformist divine, who obtained the living of Bishopsgate, London, whence he was ejected at the Restoration. About 1686 he went to New England, but, on hearing of the Revolution, he embarked for his native country, and was taken by the French. He wrote a "Description of Solomon's Temple," and a "Discourse on the Ten Tribes." B. in London, 1625; D. in France, 1691.

Lee, Nathaniel, an English dramatic writer, was the son of a clergyman, and educated at Westminster school, whence he removed to Trinity College, Cambridge, where he took his bachelor's degree. Being disappointed of a fellowship, he went to London, and made an attempt as an actor, but without success, on which he turned tragic poet. His first piece was "Nero, Emperor of Rome," which came out in 1675, and had a favourable reception. He continued to write a play every year till 1681, when he began to show symptoms of insanity. These increasing, he was confined in Bedlam, whence he was discharged in 1688. He wrote two plays after this, but never entirely recovered his senses, and died in 1690, in consequence of a drunken frolic. Lee had some power in depicting the passions, but his language is rant and bombast. Of all his plays, "Alexander the Great" is the only one remembered. D. in the latter part of the 17th century.

Leech, John, *leech*, a modern English draughtsman, who has gained great popularity by the effectiveness of his sketches, which have appeared in "Punch" and other periodicals. He was educated at the Charterhouse school, and studied drawing at the Royal Academy. B. in London, about 1816.

Leeds, *leeds*, the principal woollen-manufacturing town of England, in the West Riding of Yorkshire, 28 miles from Sheffield. It stands on the Aire, across which it communicates with its suburbs, Holbeck and Hunslet, by bridges. The houses are, in general, well built, and in the modern part of the town are handsome and elegant. In the other parts, the streets are narrow, crooked, and in some places dirty. Till the reign of Charles I. Leeds had but one church; but it is now well supplied, and St. Peter's, the parish church, is a plain but spacious and venerable structure, of considerable antiquity. The number of dissenting meeting-houses is also considerable, and there are several charitable institutions for the sick and infirm. The remaining public buildings worthy of notice are the gaol, court-house, the King's Mills, the waterworks, charity-schools, national and Lancasterian schools, circulating library, and the Leeds Philosophical and Literary Society. Besides these, there are the Commercial Rooms, containing news and concert rooms, the Central Market, the Free

and South markets, the Corn-exchange, cavalry barracks, with a large parade-ground, a music-hall, theatre, and public baths. The infirmary has a large annual income, and there is a school of medicine in connection with a public dispensary. There are, besides, various charitable endowments, estimated to produce upwards of £5,000 per annum. The most remarkable buildings of Leeds, however, are the cloth-halls. It is here that all the great sales of woollen cloth take place. The Mixed-Cloth Hall was erected in 1758, at the expense of the manufacturers, to remedy the evil of exposing the goods in the street, as had formerly been the practice. It is a quadrangular building, inclosing an open area. It is thoroughly lighted, and the colours of the goods can be seen as distinctly as in the open air. The White or Undyed Cloth Hall is upon the same plan with the others. It was built in 1775. The markets for mixed and white cloths are held on Tuesdays and Saturdays. *Manf.* The staple article is woollen cloth. Superfine cloths are manufactured on a great scale; also swandowns, tollinets, kerseymeres, shalloons, stuffs, Scots camlets, grograms, burdets, calamancoes, blankets, carpets, and silks. There are also manufactures of canvas, linen, sacking, thread, flat and green glass, fine and coarse pottery; besides several foundries, machine-works, chemical works, and soap-factories. *Pop.* 173,000.

LEEDS, a town of the United States, in Maine, 20 miles from Augusta. *Pop.* 2,000.

LEEDS, a parish of British North America, Upper Canada, 15 miles from Kingston. *Pop.* Unascertained.

LEEK, *leek*, a market-town of Staffordshire, 12 miles from Macclesfield. It has a church, several meeting-houses for dissenters, almshouses, a town-hall, mechanics' institute, and workhouse. *Manf.* Silks and ribbons. *Pop.* 13,500.—It is connected with Macclesfield and Uttoxeter by railway.

LEER, *leer*, a town of Hanover, on the Leda, 18 miles from Aurich. *Manf.* Hosiery, linens, soap, iron wares, tobacco, and vinegar. *Pop.* 7,000.—This place has a considerable shipping trade.

LEESBURG, *lees'-berg*, a town of the United States, in Virginia, 35 miles from Washington. *Pop.* 2,000.

LEEUWARDEN, *loi-var'-den*, a town of the Netherlands, and the capital of the province of Friesland, on the Ee, 28 miles from Groningen. It is intersected by numerous canals. The chief public buildings are the arsenal, the town-house, an edifice belonging to the prince of Orange, and a large and handsome church. *Manf.* Linen, paper, and printing establishments. *Pop.* 28,000.

LEEWARD ISLANDS, *loo'-ard*. The terms Leeward and Windward, applied to the West-India islands, were given them from their situation in a voyage from the ports of Spain to Carthagena, or Porto Bello. The islands which lie to leeward extend from Porto Rica to Dominica, and comprise the British islands of Anguilla, St. Christopher's, Antigua, Dominica, Monserrat, and the Virgin group. The French islands are Marie Galante and Guadaloupe, with all the Swedish, Danish, and most of the Dutch possessions in this archipelago.

LEFÈBVRE, Francis Joseph, *le(r)-faibr'*, duke of Dantzig and marshal of France. He was the son of a miller, and, on the outburst of the French revolution, had reached the grade of sergeant-major in the French guards. During the subsequent events, his rise was extremely rapid: in 1794 he became general of division. After distinguishing himself at Fleurus, at the passage of the Rhine, at the battles of Altenkirchen and of Stockach, he was made marshal in 1804. He fought at Jena, and took Dantzig, hitherto considered impregnable, in 1807. He performed signal services in Spain and in Austria, and became a peer of France in 1819. Marshal Lefèbvre was a staunch adherent to the fortunes of Napoleon, and while in command of the 17th military division, whose headquarters were at Paris, greatly assisted him on the 19th Brumaire. B. at Rouffach, in Upper Alsace, 1755; D. at Paris, 1820.

LEFKOSIA, *lef-ko'-se-a*, the capital city of the island of Cyprus. It stands mostly in its centre, and has one fine Gothic edifice. *Manf.* Carpets and red leather. *Pop.* 12,000.

LEFORT, Francis, *le(r)-for'*, a general and admiral in the service of Russia. He served at first in the French Swiss Guards, but afterwards went to Russia, where the czar, Theodore Alexowitch, gave him a captain's commission. On the death of that prince, he greatly assisted in obtaining the proclamation of Peter, whose intimate friend and councillor he became. The czar nominated him general of his troops, admiral of his navy, and viceroy of Novgorod. Lefort urged his master to carry out many important reforms, accompanied him in all his journeys, assisted him to civilize the Russians and to create a marine and an army. He likewise defeated the Turks, and organized a system of finance. On learning his death, Peter is reported to have said, "Alas! I have lost my best friend." B. at Geneva, 1656; D. at Moscow, 1699.

LEGENDRE, Adrien-Marie, *le(r)'-zhandr*, a celebrated French mathematician, who, in 1787, was engaged with Cassini and Méchain in connecting the observatories of Greenwich and Paris by a chain of triangles. His whole life was devoted to teaching and enlarging the boundaries of mathematical science. His "Elements of Geometry" is a standard work, and has been translated into English by Sir David Brewster. His principal works, in addition to the preceding, were an "Essay on the Theory of Numbers," and "New Method for determining the Orbit of Comets." He was likewise an industrious contributor to the Memoirs of the Paris Academy of Sciences. B. at Paris, 1751; D. at the same city, 1833.

LEGGE, George, *leg*, Baron Dartmouth, an eminent naval commander, was brought up under Admiral Sprague, and at the age of 20 obtained the command of a ship. In 1673 he was appointed governor of Portsmouth, master of the horse, and gentleman to the duke of York. In 1682 he was elevated to the peerage, and the year following sent to raze the fortifications of Tangier. James II. appointed him master of the horse, general of the ordnance, and constable of the Tower. He had also the command of the fleet when the prince of Orange landed, but was prevented from acting by contrary winds. At the Revolution he was committed to the Tower, where he died in 1691. B. 1647.

LEGHORN, *leg'-horn* (Italian, LIVORNO, *le-vor'-no*), a town and seaport of Italy, in the grand-duchy of Tuscany, on the Mediterranean, 48 miles from Florence. It is situate in a marshy district, and is of a square

LEGHORN.

form. The streets are in general wide, straight, clean, and well paved, and the private houses are for the

most part well built; but there are few public buildings of interest. At one of the corners of the great square stands the Duomo, or high church, a Gothic fabric, remarkable only for its vault. Exclusive of this, there are several other churches, an Arminian chapel, an elegant synagogue, and a Turkish mosque. The ducal palace is a building of little importance. On the side of the harbour is a fine marble statue of Ferdinand I. The other public structures are the arsenal, the theatre, the public baths, hospitals, and schools. The N. part of the city comprises many wharfs and warehouses, and is intersected by canals. The maritime accommodation consists of a roadstead, and an outer and an inner harbour. The outer harbour, which is the real port, is difficult to enter: it is protected by a mole of 600 paces in length. The inner harbour (la Darsena) is only a small basin. On one side of the port is the Lazzeretto, said to be the finest establishment of the kind in Europe, and consisting of a variety of buildings, divided into squares, through which there is a constant and free circulation of air. The warehouses are airy and extensive; and the merchandise, after being opened, remains untouched for a certain time. The lighthouse of Leghorn stands on a rock, and is brilliantly illuminated at night. Leghorn supplies the interior of Italy with the produce of the rest of Europe, of the Levant, and of the colonies. In return, it exports the produce and manufactures of the adjacent part of Italy. The chief branch of manual industry is the working of coral and alabaster. The other manufactures are silk, leather, paper, glass, and soap. *Pop.* 85,000. *Lat.* 43° 30′ 7″ *N. Lon.* 10° 17′ 7″ E. In the 16th century, Leghorn was made a free port by Cosmo de' Medici; and it is to this circumstance that its prosperity may be chiefly attributed.—It is connected with Florence and Pisa by railway.

LEGRAND, Antoine, *le(r)-graw'*, a French monk, who was an enthusiastic professor of the Cartesian philosophy. He wrote many books in elucidation of the greater work of Descartes. (*See* DESCARTES.) B. at Douai, about 1629; D. in England, about 1700.

LEGRAND, James William, a celebrated French architect. He was extensively employed in the construction and restoration of great edifices at Paris. He published, among other valuable architectural works, "Galerie Antique," "Edifices de Paris," and began a complete history of architecture, which, if finished, would have extended to thirty volumes. B. at Paris, 1753; D. 1806.

LEIBNITZ, Godfrey William, Baron de, *libe'-nitz*, a celebrated German philosopher. His father was professor of moral philosophy in the university of Leipsic, but died when his son was six years old. At the age of 15 he began his studies at Leipsic, whence he removed to Jena. In 1664 he was admitted M.A. at the former university, and about the same time applied to the study of the Greek philosophers; but having chosen the law for his profession, he took his doctor's degree in that faculty, after which he obtained a post at the court of the elector of Mayence. In 1672 he was at Paris, where he formed an acquaintance with several mathematicians. He next visited London, where he was introduced to Newton, Boyle, and other eminent men. He subsequently engaged in a bitter dispute with Sir Isaac Newton, relative to the discovery of the method of fluxions, to the merit of which invention Leibnitz laid claim. The Royal Society of London, however, decided in favour of the English philosopher. The elector of Hanover, George I., employed him in writing the "History of the House of Brunswick." In 1700 he was admitted a member of the Academy of Sciences at Paris, and on the erection of that of Berlin, was appointed perpetual president. In 1711 he was made aulic counsellor to the emperor, and Peter the Great of Russia appointed him privy counsellor of justice, with a pension. He was a profound mathematician and metaphysician, and a man of lively genius, but vain and avaricious. His works are, "Scriptores Rerum Brunsvicensium," "Codex Juris Gentium Diplomaticus," "Miscellaneous Questions of Philosophy and Mathematics," "Essays of Theodicea on the Goodness of God and the Liberty of Man," "Metaphysical Tracts," Poems, Latin and French. A complete edition of his works, in 6 vols., was published at Geneva, in 1767. B. at Leipsic, 1646; D. at Hanover, 1714.

LEICESTER, a town of England, the capital of Leicestershire, on the Soare, in the centre of the finest wool district in the kingdom, 20 miles from Rugby. The houses are, in general, modern. It contains eight churches, one of which is St. Nicholas's, in the Saxon style, consisting only of a nave and south aisle, with a square tower at the west end. There are, besides, other buildings for public worship, a county and town gaol, infirmary, asylum for indigent lunatics, an exchange, guildhall, assembly-rooms, theatre, museum, and mechanics' institute. There are also many valuable charities and excellent schools. *Manf.* Woollens and hosiery, of which it is the principal seat in the kingdom. There are also large lace manufactories. *Pop.* 61,000. Leicester was a populous city at the time of the Conquest. A station on the Midland Railway.

LEICESTER, two townships in the United States, one in N. York and the other in Massachussetts. Neither has a population above 3,000.

LEICESTER, Robert Dudley, Earl of. He was son of John Dudley, duke of Northumberland, who was executed in 1553 for asserting the claims of his daughter-in-law, Lady Jane Grey. Robert Dudley had been nominated master of the ordnance in the reign of Queen Mary, but on the accession of Elizabeth he rose rapidly into favour, and had numerous honours and places heaped upon him, and her majesty proposed him to Mary, queen of Scots, for a husband. Dudley appears to have indulged the ambitious idea of sharing his sovereign's throne; and, to effect it, he is suspected to have murdered his own wife, the beautiful Amy, daughter of Sir John Robsart, whom he married at an early age. In 1560 this lady was found dead at Cumnor, but no positive proof of her being murdered has ever been adduced. The great novelist Sir Walter Scott, in his "Kenilworth," has somewhat distorted the historical facts of the case; but his work has taken such a hold on common opinion, that she is generally believed to have been murdered at her husband's instigation. In 1564 he was created earl of Leicester. About 1572 he is said to have privately married Lady Sheffield, although he never acknowledged her as his wife; however, he had by her a son called Robert, whom he called in his will his "base son." He afterwards married the countess dowager of Essex, and, finding Lady Sheffield intractable to his proposals for a separation, is said to have taken her off by poison. In 1584 a book was printed, entitled "Leicester's Commonwealth," which was a severe attack upon his public and private character. The year following he was appointed governor of the Protestant Low Countries, at the request of the inhabitants; but his proceedings there did not satisfy the queen, and he returned to England the same year. In 1588 he was made lieutenant-general of the army assembled at Tilbury, and died the same year; B. about 1532.

LEICESTERSHIRE, *les'-ter-sheer*, an inland county of England, nearly in the centre of the kingdom, bounded on the N. by the counties of Derby and Nottingham, S. by Warwick and Northampton, E. by Lincoln and Rutland, and W. by Warwick and Derby; and between these, for a short way, also by Staffordshire. *Area*, 800 square miles. *Desc.* Between flat and hilly, the hills having sufficient slope to carry off the water, and yet almost nowhere of sufficient altitude to prevent the highest cultivation. The soil may be generally described as a fine mixture of sand and clay, partaking, however, on the whole, more of the nature of clay than of sand. *Rivers.* The Soare, a tributary of the Trent; the Wreak, and the Eye. There are also numerous smaller streams. By means of these, aided by canals and railways, the navigable communications of the county have been greatly improved. *Pro.* More than half the land is constantly in pasture. There are many large dairies. The Stilton cheese is made near Melton Mowbray, and the county is noted for a useful and beautiful breed of black horses. The swine are also of a superior breed. The food for such a number of animals is obtained from the meadows, the pastures, and arable grounds. Along the banks of the rivers, especially those of the Soare, the natural meadows are rich and extensive. *Minerals.* Chiefly

coal and lime. In some parts the limestone affords a rich lead-ore. Ironstone is found in abundance on Ashby Wolds; also large quantities of slate, freestone, and clay for bricks. *Manf.* These consist almost entirely of its great staple, wool, which is combed and spun, and converted into hosiery. *Pop.* 231,000.

LEICHLINGEN, *lishe'-ling-en*, a district of Rhenish Prussia, on the Wupper, 12 miles from Dusseldorf. *Manf.* Cutlery and woollen cloths. *Pop.* about 12,000.

LEIGH, *le*, a market-town of Lancashire, 7 miles from Bolton. *Manf.* Fustians, cambrics, and muslins. Coal abounds in the neighbourhood. *Pop.* 27,000. A station on the Bolton and Liverpool Railway.—Also the name of numerous other places in England; none of them with a population above 3,000.

LEIGHTON, Alexander, *lai'-ton*, a Scotch physician. He became noted for his sufferings on account of tracts which he published against Charles I. and the Church of England. For these his nose was slit, his ears cut off, and a public whipping was inflicted on him. In 1640 the parliament appointed him keeper of Lambeth Palace, then converted into a state prison. He died insane in 1644. B. at Edinburgh, 1587.

LEIGHTON, Robert, archbishop of Glasgow, was son of the *preceding*. He was an exemplary parish priest, and the magistrates of Edinburgh chose him president of their college. Soon after the Restoration, Charles II. nominated him bishop of Dunblane, which diocese he governed with great moderation. On account of the violent animosities between the Episcopalian and Presbyterian parties, he resigned his see, but the king constrained him to accept the archbishopric of Glasgow, in which station he made another effort at moderation, but in vain; on which he resigned his dignity. He then led a retired life in Sussex. His principal work is a "Commentary on St. Peter's Epistles." D. at Edinburgh, 1613; D. in London, 1684.

LEIGHTON BUZZARD, a market-town of Bedfordshire, near the Ouse, 40 miles from London. *Manf.* Lace and straw plaits. It has, besides, a trade in cattle, corn, and grocery. *Pop.* 7,000.

LEINE, *li'-ne(r)*, a river of Germany, in Upper Saxony, falling into the Nesse.—Another of Lower Saxony, rising in the Harz, and, after a course of 130 miles, falling into the Aller, at Hudemahlen.

LEINSTER, *lens'-ter*, the eastern province of Ireland, bounded on the N. by Ulster, W. and S.W. by Connaught and Munster, and S. and E. by the sea. It comprises the counties of Carlow, Dublin, Kildare, Kilkenny, King's and Queen's, Longford, Louth, Meath, Westmeath, Wicklow, and Wexford. *Area*, 7,472 square miles. *Pop.* 1,640,000.—It gives the title of duke to the Fitzgerald family, whose head is sole duke and premier of Ireland.

LEIPPA, or LEIPA, *lipe'-pa*, a town of Austrian Bohemia, 24 miles from Leitmeritz. *Manf.* Woollens, cottons, glass, and earthenware. *Pop.* 7,000.

LEIPSIC, or LEIPZIG, *lipe'-sic*, a city of Germany, in Saxony, on the White Elder, 60 miles from Dresden. It was formerly fortified, but has long been dismantled. The town is divided into four quarters, and has several churches, hospitals, and one spacious square. Among the public edifices are the exchange, the town-house, the cloth-hall, the church of St. Nicholas, the Roman Catholic chapel, the theatre, the arsenal, an orphan-house, a foundling-hospital, an institute for the deaf and dumb, a house of correction, with a separate ward for lunatics, and various schools. The university of Leipsic was founded in 1409: it has a library, containing several rare and beautiful editions of the classics, many oriental manuscripts, and a variety of antiquities, gems, medals, and natural curiosities. *Manf.* Linen, silk, velvets and velveteens, soap, playing-cards, leather, hosiery, tobacco, jewellery, snuff, chocolate, musical instruments, with engraving and dyeing establishments. It is, besides, a great entrepôt of trade. A large part of its business is carried on at the three great fairs, which take place at the New Year, Easter, and Michaelmas. The book trade forms a remarkable and a peculiar object in the commerce of Leipsic, which, in this respect, is the grand emporium of Germany. *Pop.* 70,000. Leipsic was taken by Frederick II. in 1745, and again in 1756. In the autumn of 1813 its environs became the scene of several most sanguinary actions, in one of which the French, under Napoleon I., were defeated by the allies. It has communication by railway with Berlin, Dresden, Magdeburg, Halle, Weimar, and Zwickau.

LEISNIG, *lise'-nig*, a town of Saxony, 23 miles from Leipsic. *Manf.* Woollens, linens, and tobacco-pipes. *Pop.* 1,600. Schwartz, the reputed inventor of gunpowder, was born here.

LEITH, *leeth*, a town of Scotland, in the county of Edinburgh, formerly called Inverleith, 2 miles from Edinburgh, of which it is the seaport. It is divided into two districts, called South and North Leith, communicating by drawbridges across the harbour, and is now connected with Edinburgh by Leith Walk. The town is mostly situate on the south side of the river or Water of Leith, and, with the exception of the modern streets, is irregularly built, with narrow lanes, and the houses mostly old-fashioned and inconvenient. The public buildings are the parish church, and several other churches and chapels. Adjacent to the parish church is James the Sixth's hospital, founded by the kirk-session in 1614. There is also the high school of Leith, the exchange, containing the assembly-room, coffee-room, sale-rooms, subscription-library, and reading-room. The custom-house, which contains also the excise-office, stands on the north side of the harbour. To the east of the town are the baths of Seafield. The edifice in which these are contained is light and elegant, and there is attached to it an excellent hotel. The prison was erected in 1565. In 1800 other extensive improvements were projected; a magnificent suit of wet docks was planned, and two of these beautiful basins were soon opened for shipping. These docks comprehend nearly eight acres, together with three graving docks; and a Victoria Dock recently formed. The harbour of Leith has been gradually improved by the extension of wooden and stone piers into the sea, and, at the extremity, by a light-house. *Commerce.* Leith carries on an extensive trade with the Baltic, and other countries of Europe; such as Holland, France, Spain, Portugal, and the Mediterranean; also with the West Indies and America; besides a coasting trade to the different parts of England and Scotland. The Greenland fishery is also prosecuted with great activity. *Manf.* Unimportant: they consist of rope, canvas, glass, soap, sugar-refining, preserved meats; and there are several breweries, iron-works, and cooperages. Ship-building, also, is carried on to a considerable extent. *Pop.* between 30,000 and 40,000. *Lat.* 55° 58′ 9″ N. *Lon.* 3° 10′ 5″ W.—In 1541 it was burned by an English fleet, and, in 1549, it was taken possession of by French troops, who came to the assistance of Mary of Guise. In 1832, it was made a parliamentary borough.

LEITH RIVER, or WATER OF LEITH, forms the harbour of Leith, but is otherwise unimportant for commercial purposes.

LEITMERITZ, *lite'-mer-itz*, a town of Austrian Bohemia, 34 miles from Prague. It has a gymnasium and an academy of philosophy. *Pop.* 7,200.

LEITRIM, *le'-trim*, a maritime county of Ireland, in the province of Connaught, bounded S. by Roscommon and Sligo, W. by the Bay of Donegal, N. by Donegal and Fermanagh, and E. and S.E. by Cavan and Longford. *Area*, 650 square miles. *Gen. Desc.* Extremely uneven, being composed of bogs and high mountains, which afford sufficient herbage for the breeding of cattle. The valleys are fertile and well watered. *Rivers.* The Shannon, Blackwater, and Bonnet. *Lakes.* Allen, Melvin, and Gill. *Pro.* Potatoes, barley, rye, wheat, and oats in greater abundance. *Minerals.* Iron, lead, and copper. *Manf.* Chiefly linen goods for home consumption. *Pop.* 112,000.

LEKEUX, John, *le-kw'*, a celebrated architectural engraver, whose works on Gothic architecture were greatly instrumental in reviving the study of that style of art in England. His most important works were the engravings in Britton's "Architectural Antiquities of England," Pugin's "Architectural Antiquities of Normandy," Neale's "Westminster Abbey," and the "Memorials of Oxford and Cambridge." D. in London, 1784; D. 1846.

LE LABOUREUR, John, *la'-boo-rer*, a French writer. He was at first a gentleman's servant, but afterwards entered into holy orders, and became prior of Juvigné, commander of the order of St. Michael, and almoner

to the king. He wrote the History of the Marshal of Guebriant, with the genealogy of Budos and some other houses in Brittany; he also published an edition of the "Memoirs of Michael du Castelnau," and other works. B. at Montmorency, 1623; D. 1675.

LELAND, John, *le'-land*, an eminent English antiquary. He was educated at Christ's College, Cambridge, and All Souls College, Oxford. On entering into orders, he became chaplain to Henry VIII., who gave him the title of king's antiquary. By virtue of the royal commission, he searched various cathedrals and religious houses for curious records and other remains of antiquity; in which employment he spent six years, travelling over every part of the kingdom. In 1545 he presented his collections to the king, under the title of "A Newe Yeare's Gifte." This, however, was only the beginning of what he proposed to execute; but while he was intent on his studies, he became insane, in which state he continued till his death. His "Itinerary" and "Collectanea" were published by Hearne, in 1710. B. in London, at the beginning of the 16th century; D. 1552.

LELAND, John, a learned English divine, whose labours in defence of Christianity procured him the degree of D.D. from two universities in Scotland. His principal works were a "Defence of the Christian Religion" against Tindal, a "View of the Deistical Writers that have appeared in England," "The Advantage and Necessity of the Christian Revelation," and "Family Devotions." B. in England, 1691; D. 1766.

LELAND, Dr. Thomas, a learned divine, who wrote a "History of Ireland," "The Life of Philip of Macedon," and "The Principles of Human Eloquence," which last was attacked by Warburton. He also translated the Orations of Demosthenes. B. at Dublin, 1722; D. 1785.

LELY, Sir Peter, *le'-le*, a famous painter. He studied under Grebber at Haarlem, after which he went to England, where he at first painted landscapes and historical subjects; but, finding more encouragement given to portrait-painting, he turned his attention to that branch of his art, and became unrivalled in the

SIR PETER LELY.

graceful rendering of heads; the hands of his portraits were remarkably fine and elegantly turned. He was in great favour with Charles I. and Charles II., by the latter of whom he was knighted, and for whom he painted the voluptuous beauties of his court. This collection is now contained at Hampton Court. B. at Soest, Westphalia, 1617; D. in England, 1680.

LEMAN LAKE. (*See* GENEVA, LAKE OF.)

LEMAN, a river in Devonshire, joining the Exe near Tiverton.

LEMBERG, *lem'-bairg*, a city of Austrian Poland, on the Peltew, a branch of the Dniester, 185 miles from Cracow. It was once fortified, but the ramparts are now converted into streets and public walks. The lofty towers and cupolas of the cathedral and the churches, and the height and massiveness of the houses, built of freestone, give the town an air of grandeur. It is the seat of a civil and military governor, and of both a Greek and an Armenian archbishop. The public institutions are a university, literary institute, two gymnasia, and numerous schools and charities. *Manf.* Woollens, linens, jewellery, breweries, and distilleries. *Pop.* 50,000.

LEMBERG, a parish and village of France, in the department of the Moselle. *Pop.* 2,000.

LEMERY, Nicolas, *lem'-e-re*, a celebrated French chemist, who, in 1683, visited England, being of the reformed religion, then violently persecuted in his own country. He was well received by Charles II., and great offers were made to induce him to continue there; but in 1686 he returned to France and turned Roman Catholic. In 1699 he was made associate chemist to the Royal Academy, and the same year became a pensionary. He wrote a "Course of Chemistry," which went through many editions; a "Universal Pharmacopœia;" a "Treatise on Simple Drugs;" a "Treatise on Antimony." B. at Rouen, 1645; D. 1715. His son Louis became physician to the king, and to the Hôtel-Dieu at Paris. He was also a member of the Academy of Sciences, and the author of a "Treatise on Aliments," another on "Worms in the Human Body," and several papers in the Memoirs of the Academy. D. 1743.

LEMGO, *lem'-go*, a town of Westphalia, on the Bega, 16 miles from Minden. It has several churches, a palace, gymnasium, a seminary for noble ladies, and an orphan asylum. *Manf.* Woollens, linens, and meerschaum pipes. *Pop.* 4,500.—This was formerly one of the Hanse towns.

LEMNOS, STALIMENE, or LIMNE, *lem'-nos*, an island of European Turkey, in the Archipelago, between Monte Santo and the Hellespont. *Area*, 160 square miles. *Desc.* Mountainous, and fertile in oil, wine, corn, and fruits. *Pop.* 8,000.—The TOWN of Lemnos, the capital, has a harbour, and 1,000 inhabitants.

LEMON, Mark, *lem'-on*, a modern littérateur and publicist, connected for a long period with "Punch" and the "Illustrated London News." B. 1809.

LEMON, George William, an English divine and lexicographer, who published, in 1789, an "Etymological English Dictionary," in 1 vol., which displayed considerable industry and learning. B. 1728; D. 1797.

LE MONNIER, Peter Charles, *le(r)-mon'-ne-ai*, a French astronomer, was member of the Academy of Sciences and of the National Institute, and accompanied Maupertuis in his journey towards the north pole for measuring a degree of the meridian. His principal works were, "Astronomical Institutions," "Lunar Nautical Astronomy," and "Tables of the Sun, and Corrections for those of the Moon." B. at Paris, 1715; D. 1799.

LEMURES, *lem'-u-rees*, the manes of the dead among the Romans, who supposed that the souls of men, after death, wandered over the world and disturbed the peace of the living. The good spirits were called *lares familiares*, and the evil ones were known by the name of *larvæ* or *lemures*: they terrified the good, and continually haunted the impious. The Romans celebrated festivals in their honour, called *Lemuria* or *Lemuralia*, in the month of May. They were originally instituted by Romulus, to appease the manes of his brother Remus, and were at first termed *Remuria*, which was afterwards corrupted into *Lemuria*.

LEN, *len*, a river of England, in Kent, falling into the Medway at Maidstone.

LENA, *le-na'*, a river of Asiatic Russia, rising in the mountains N.W. of Lake Baikal, and after a course of 2,400 miles, falling into the Arctic Ocean by numerous mouths, between *lat.* 72° and 73° N., and *lon.* 125° and 130° E.

LENAWEE, *len-a-wee'*, a county of the United States, lying to the E. of Michigan. *Area*, 735 square miles. *Pop.* 27,000.

LENCLOS, Ninon de, *lan'-klo*, a celebrated French lady. Her mother wanted to place her in a convent, but was prevented by her father, who was a man of gaiety. Ninon lost her parents at the age of 15, and possessing great charms and a lively temper, she was followed by some of the greatest men, but would never unite herself in marriage. She was the friend of Molière and Fontenelle, and had a fine understanding; but it has been truly observed of her, that though she thought like Epicurus, she lived like Lais. She is, however, represented to have been perfectly unmercenary in her amours; and her wit and behaviour were such, and so low the moral tone of the time, that even virtuous ladies courted her acquaintance. She was held in great respect by men of genius, who consulted her upon their works. There are a few genuine letters by her in the works of St. Evremond, but those under her name, addressed to Villarceaux, De Sévigné, &c., are fictitious. B. at Paris, 1615; D. 1706.

LENCZICZ, or LECZYA, *lenk'-zikz*, a fortified town of Poland, on the Bsura, 80 miles from Warsaw. *Pop.* 1,000.

LENFANT, James, *lan(g)'-fa*, a French Protestant divine, who was educated at Geneva, and became minister of the French church at Heidelberg; but on the invasion of the Palatinate, in 1688, by the French, he retired to Berlin. He published histories of the councils of Constance, Basle, and Pisa; he likewise translated the New Testament into French, with notes and a learned introduction, in conjunction with Beausobre. He was also author of a History of Pope Joan; Sermons; "A Preservative against Uniting with the Church of Rome," &c. B. at Bazoche, France, 1661; D. at Berlin, 1728.

LENGLET, Nicholas du Fresnoy, *lan'-glai*, a French writer. He became secretary to the French ambassador at Cologne, and librarian to Prince Eugene. His works are voluminous, but incorrect: the best is his "Method for Studying History," which has been translated into English. B. at Beauvais, 1674; D. 1755.

LENKERAN, or LANKERAN, *len-ke-ran'*, the most southern town of Russian Trans-Caucasia, 40 miles from the mouth of the Kur, in the Caspian Sea. It belongs to the Russians, and is now of considerable commercial importance. *Pop.* Unascertained.

LENNARD, Samson, *len'-nard*, an English soldier, who was with Sir Philip Sidney at the battle of Zutphen. He published some translations from the Latin and French. D. about 1630.

LENNOX, Charlotte, *len'-nox*, a lady who was the intimate friend of Dr. Johnson and Richardson the novelist. She wrote a popular novel, entitled "The Female Quixote," which was followed by "Shakspere Illustrated," in which she gave the novels and histories on which the plays of Shakspere are founded. She likewise published some historical pieces and translations. B. at New York; D. 1804.

LENOIRE, *le-nor'*, a county of N. Carolina, U.S. *Area*, 358 square miles. *Pop.* 8,000.

LENOX, *len'-ox*, a post-township of Massachusetts, U.S., 100 miles from Albany. *Pop.* 8,000.—Another in Madison county, New York. *Pop.* 2,300.

LENS, *lens*, a parish and town of France, in the department Pas-de-Calais, 9 miles from Arras. *Pop.* 10,000.—Here, in 1648, a battle was fought between the Spanish forces and those of the prince of Condé, who gained the victory.

LENS, a town of Belgium, on the Dender, 9 miles from Mons. *Pop.* 2,000.

LENTHAL, William, *lent'-al*, an English lawyer, and speaker of the Long Parliament. In 1639 he was elected to parliament for Woodstock, and, in 1640, was chosen speaker; in which capacity he made a considerable fortune by joining the ruling party. He was also master of the rolls, a commissioner of the great seal, and chancellor of the duchy of Lancaster. He was removed from his office in 1653; but, the year following, he became speaker of the parliament called by Cromwell, and subsequently acted as speaker of the Rump Parliament. At the Restoration he was exempted from the act of indemnity, but obtained a pardon from the king. Several of his speeches and letters were published. B. at Henley-on-Thames, 1591; D. 1662.

LENTINI, *len-te'-ne*, a town of Sicily, near a lake of the same name, 15 miles from Catania. Its inhabitants have an active fishery on the lake. *Pop.* 5,200.

LEOBEN, *lai-o'-ben*, a town of Austria, in Upper Styria, on the Mur, 80 miles from Vienna. In the neighbourhood are iron-mines. *Pop.* 2,500.—Here the peace of Leoben was concluded between Austria and France in 1797.

LEOMINSTER, *lem'-ster*, a borough and market-town of Herefordshire, on the Lugg, 12 miles from Hereford. It has a church, a large and irregular building, besides places of worship for other denominations; a town-hall, gaol, market-house, charitable institutions, and various schools. *Manf.* Hats and gloves; there is also some trade in felts and leather. *Pop.* 5,300.

LEOMINSTER, a township of the United States, in Massachusetts, 35 miles from Boston. *Pop.* 3,500.

EMPERORS OF THE EAST.

LEO I., or the Elder, *le'-o*, emperor of the East, ascended the throne in 457. He was a Thracian, of obscure birth, but attained the highest military rank, and was proclaimed emperor by the soldiers in succession to Marcianus. He confirmed the decrees of the Council of Chalcedon against the Eutychians, and renewed the war against the Vandals; but was unfortunate, through the treachery of his general Aspar, whom he put to death with his family in 471. The Goths, to revenge the fate of Aspar, poured into the empire, which they ravaged to the walls of Constantinople. D. 474.

LEO II., or the Younger, was the son of Zeno and of Ariadne, daughter of Leo I. He succeeded his grandfather in 474, under the guardianship of his father, who caused himself to be proclaimed emperor a few months afterwards. Leo II. is said to have been put to death by his own father, after reigning for only ten months.

LEO III., called the Isaurian, from the country of his birth, where his parents were poor mechanics. Leo entered into the army, and became general-in-chief of the army of Asia, under Justinian II. In 716 he marched against Theodosius III., who had been proclaimed emperor on the deposition of Justinian II.; and Theodosius resigned his crown to him in the following year. The Saracens, having ravaged Thrace, laid siege to Constantinople, which was bravely defended by Leo, who compelled them to retire. His reign, however, was tyrannical, and he drove the patriarch Germanus from his seat, in which he placed Anastasius. He was also guilty of burning the library at Constantinople, containing a quantity of medal[illegible] and above 30,000 volumes. The popes Gregory II. and Gregory III. having excommunicated him, he prepared an armament to invade Italy; but the ships were destroyed by a storm. D. 741.

LEO IV., the son of Constantine Copronymus, and grandson of Leo III., succeeded his father in 775. [illegible] his time the controversy raged between the Iconoclasts and or image-breakers, and their adversaries, both of w[illegible] he protected by turns. He repulsed the Saracens, in Asia. B. at Constantinople, 751; D. 780.

LEO V., or the Armenian, from the country of w[illegible] gal he was a native. He rose to the rank of genera[illegible] ng his valour; but being accused of treason, the em[illegible] rly Nicephorus disgraced him, and imprisoned him [illegible] ns, convent. Michael Rhangabus, on ascending the thro[illegible] of in 811, restored him to his rank; but Leo, profiting [illegible] the misfortunes of his master, headed a military revolt, and was elected emperor by the troops in 813. He was one of the most violent of the Iconoclastic princes. Assassinated, 820.

LEO VI., styled the Philosopher, was the son and successor of Basilius, the Macedonian, and ascended the throne in 886. The Hungarians, Saracens, and Bulgarians having united against the empire, he called to his assistance the Turks, who entered Bulgaria, which they ravaged with fire and sword. Leo drove the patriarch Photius from his seat; and Nicholas, one of the successors of Photius, excommunicated the emperor; for which Leo deposed him. He wrote some books, the most interesting of which is a treatise on Tactics, printed at Leyden in 1612. B. 865; D. 911.

POPES.

LEO I., Pope, surnamed the Great, was an Italian by birth, and had been employed by Celestin I. and

Sixtus III. on several important missions. He succeeded the latter in 440, and distinguished himself by his zeal against the Manichæans, Pelagians, and Eutychians. In his time the council of Chalcedon was called; and, while sitting in the East, Attila and the Huns ravaged the West, and advanced towards Rome. The emperor Valentinian applied to the pope, who went to meet Attila, and, by the power of his eloquence, prevailed with him to leave Italy. Genseric, however, sacked Rome in 455. He left behind many epistles and sermons, which have been printed. He was succeeded by Hilarius I. D. 461.

LEO II. was a native of Sicily, and succeeded Agathon, in 682. He pretended to have an authority over the Eastern church, and was succeeded by Benedict III. D. 683.

LEO III. succeeded, in 795, Adrian I. In 799, Leo was seized while riding in a religious procession, and almost killed; but he recovered, and retired to Germany. Charlemagne restored him to his seat, and he crowned that monarch emperor of the West. On the death of Charlemagne, a new plot was formed against the pope, who caused the conspirators to be put to death. D. 816.

LEO IV., a Roman, succeeded Sergius II. in 847. The Saracens having invaded the Ecclesiastical States, he marched against them and obtained a complete victory; after which he put the city of Rome into a state of defence, and founded the town of Leopolis. D. 855.

LEO V., a Benedictine monk, who, in 903, succeeded Benedict IV., but was deposed by his chaplain Christopher. The annals of the papacy during the tenth century are very confused, and there is no mention of Leo's subsequent life.

LEO VI. became pope in 928, in succession to John X. He is said to have been put to death by Marozia. (*See* MAROZIA.)

LEO VII. was elected in succession to John XI., son of Marozia. He negotiated a peace between Hugo, king of Italy, and Alberic, duke of Rome, the son of the celebrated Marozia. He is said to have been an irreproachable man and zealous ecclesiastic, and was succeeded by Stephen VIII. D. 939.

LEO VIII. was elected pope on the deposition of John XII., in 963, under the patronage of the emperor Otho I. On Otho's withdrawal, John re-entered Rome, and drove away Leo; but John dying soon afterwards, Benedict V. was chosen pope. The emperor Otho subsequently took Rome, and, exiling Benedict, reinstated Leo VIII. D. about 965.

LEO IX., who bears the distinction of a saint in the Roman calendar, was born of an illustrious family, became bishop of Toul, and, in 1049, was chosen pope. He convened several councils to reform the manners of the ecclesiastics and to condemn the errors of Berenger. The Normans having marched into Italy, in 1053, he went against them at the head of a German army; but was defeated, taken prisoner, and conducted to Benevento. Some sermons and letters of his are extant. D. 1054.

LEO X., Giovanni de' Medici, second son of Lorenzo de Magnificent. (*See* MEDICI.) At the age of 11, he was made an archbishop by Louis XI., king of France, and, at 14, Julius II. invested him with the dignity of legate, and he served as such in the army which was defeated by the French, near Ravenna, in 1512. He was taken prisoner after that battle; but the soldiers showed the most superstitious veneration for his person, as the representative of the pope. He was elected to the papacy in 1513, and his coronation was celebrated with unusual pomp. Leo was fond of magnificence; but he had a taste for letters, and liberally patronized men of learning and genius, particularly poets. He terminated the disputes which had subsisted between his predecessor and Louis XII. of France, concluded the council of Lateran, and formed a splendid library, which he enriched with inestimable manuscripts. A conspiracy to murder him was discovered in 1516, and Cardinal Petrucci, the chief of it, was hanged. Leo formed two great projects; the one to effect a general association of the Christian powers against the Turks, and the other to complete the church of St. Peter. To aid these schemes, he issued plenary indulgences, by which the purchasers procured the pardon of their sins. These indulgences being carried into Germany, occasioned the secession from the church of Rome, or Reformation, commenced by Luther. (*See* LUTHER.) Leo, however, throughout his life took little notice of the great religious movement. A war also broke out between the emperor Charles V. and Francis I. of France, who both courted the alliance of the pope. If not an exemplary pope, he was at least a splendid and magnificent prince, and a noble patron of art and learning. He is the subject of Roscoe's fine biography, entitled the "Life and Pontificate of Leo X." B. 1475; D. 1521.

LEO XI. was of the family of the Medici, and was elected pope in 1605, at a very advanced age, and died in less than a month afterwards.

LEO XII. was of a noble family of the Romagna, and became pope in 1823, in succession to Pius VII. He embellished Rome, encouraged letters, and enriched the library of the Vatican. He was succeeded by Pius VIII. D. 1829.

---

LEO, the name of six kings of Armenia, who reigned between the years 1123—1375. These princes were constantly at war either with the crusaders or with the Turks. The last of the name, Leo VI., was driven from his kingdom by the sultan of Egypt, and took refuge in France, where he died, 1393.

LEO, archbishop of Thessalonia, was one of the revivers of Greek literature and a good mathematician. Flourished during the 9th century.

LEO, John, surnamed Africanus, a Moor of Granada, who wrote, in Arabic, a "Description of Africa," and the "Lives of the Arabian Philosophers." D. about 1526.

LEO, Leonardo, a celebrated Italian composer, who was the master of Piccini, Jomelli, and other famous musicians. His many operas are now unknown, but his masses and other sacred works are still regarded as master-pieces of church music. B. at Naples, 1694; D. at the same city, 1755.

LEO ALLATIUS. (*See* ALLATIUS.)

LEO THE GRAMMARIAN, one of the authors of the "Byzantine History." Lived in the 11th century.

LEON, *lai-one'*, one of the great divisions of Spain, situate in the N.W., and still distinguished by the title of a kingdom. It is surrounded by Estramadura, Old Castile, Galicia, and Portugal, and has the form of an irregular oblong, 200 miles in length from N. to S., and 168 in breadth from E. to W.

LEON, an old province of Spain, occupying the northern part of the ancient kingdom of Leon, and surrounded by the Asturias, Palencia, Toro, Valladolid, Zamora, and Galicia. *Area*, 5,894 square miles. *Pop.* 268,000.

LEON, the capital of the foregoing kingdom and province, situate at the confluence of the Sorio and Bernesga, 174 miles from Madrid. It is now a heterogeneous mixture of dirty streets filled with beggars, splendid churches, and half-ruined family mansions. The cathedral of Leon surpasses in grandeur and beauty all similar edifices in the kingdom, and is one of the finest monuments of Gothic architecture which exists. *Manf.* Linen-weaving, stocking-knitting, and glove-making. *Pop.* 6,000.

LEON, ISLA DE, an insulated tract on the S.W. coast of Spain, containing Cadiz, on a promontory which projects from it. It is separated from the mainland by the channel of Santi Petri. *Ext.* 10 miles long, with an average breadth of 2.

LEON, a large town of Spain, in the above island, 11 miles from Cadiz. Like other towns of Spain, it displays a striking contrast of grandeur and poverty. The town-hall, in the great square, is a handsome building, and its arsenal is noted for its great extent. It has an excellent marine observatory. *Pop.* 10,000.

LEON, the capital of the province of Nicaragua, in South America, standing at the extremity of the Lake of Leon, 10 miles from the Pacific Ocean. It contains many convents and churches, an hospital, and a university. *Pop.* 23,000. *Lat.* 12° 25′ N. *Lon.* 86° 50′ W. —The LAKE is 35 miles long and 15 broad, and communicates with the Lake of Nicaragua by the river Tipitapa.

LEON, a town of Mexico, in the government of Guanaxuato, 40 miles from Guanaxuato. *Pop.* Un-

ascertained.—Also the name of several rivers of South America.

Leon, New, a department of the Mexican confederation. *Area*, 21,000 square miles. *Desc.* Mountainous in general, though abounding with tracts of considerable fertility. *Rivers.* The principal is the Tigre. *Pro.* The usual crops of countries bordering on the tropics. *Minerals.* Lead, silver, gold, and salt. *Pop.* 102,000. *Lat.* between 24° and 27° N. *Lon.* between 99° and 100° W.

Leonard, St., *lai'-o-nar*, the name of numerous places in France, with populations varying between 2,000 and 7,000.

Leonardo Bonacci, *lai-o-nar'-do*, surnamed "of Pisa," a celebrated Italian mathematician, who first introduced in Europe the study of algebra. His work was never published, but is preserved in manuscript at Rome. Lived at the beginning of the 13th century.

Leonards, St., *len'-ards*, a watering-place of Sussex, immediately adjoining Hastings. It is a favourite summer resort, with a fixed population of about 1,500.—St. Leonards Forest is an inclosed tract of about 10,000 acres, 2 miles from Horsham. It is a portion of the ancient wood of Anderida, which, in the Saxon period, comprised the weald of Sussex, Surrey, and Kent.

Leoni, Jacomo, *lai'-o-ne*, a Venetian architect, who settled in England, and there published, in 1742, an excellent edition of "Palladio's Architecture." D. 1746.

Leonicenus, Nicholas, *le-o-ni-se'-nus*, professor of medicine at Ferrara, was the first who translated Galen's works, to which he added commentaries and illustrative notes. He likewise reproduced, in Italian, the "Aphorisms of Hippocrates," and other works. B. 1428; D. 1524.

Leonidas, *le-on'-i-dăs*, king of Sparta, a celebrated hero, who opposed Xerxes when he invaded Greece, and fought the whole Persian host at the Straits of Thermopylæ with such bravery as to check the progress of the invader. At last a detachment of the Persians, led by Ephialtes the Trachinian, by a secret path up the mountains, came down on the rear of the Spartans, and obtained a complete victory. Out of the 300, only one man escaped, and he was treated with ignominy by his countrymen, for leaving so glorious a field, where death was more honourable than life. A monument was afterwards erected upon the spot, with this inscription: "Stranger, tell the Lacedæmonians that we lie here, obeying their laws." This battle happened 480 B.C.

Leopold I., *le'-o-pold*, emperor of Germany, was the second son of Ferdinand III. and of Mary Anne of Spain. He became king of Hungary in 1655, king of Bohemia in 1657, and emperor in 1659. He contended against France and the Turks, and suffered in his war with both: France took from him Alsace, and many frontier places of the empire; and the Turks would have captured Vienna, had they not been compelled to raise the siege by John Sobieski, king of Poland. In 1697, Prince Eugene of Savoy concluded the war by totally defeating the Turks at Zenta, in Hungary. B. 1640; D. 1705.

Leopold II., the son of Maria Theresa of Austria and her husband, Francis of Lorraine, succeeded his father, in 1765, in the duchy of Tuscany, which he governed with great wisdom, and finally abolished the Inquisition in that country. In 1790 he succeeded the emperor Joseph II., and removed to Vienna, where, by his judicious and liberal measures, he consolidated the power of his empire. He concluded a peace with the Turks, and was preparing for a war with the French, when he was carried off by a fever. He was succeeded by his son Francis. (*See* Francis II.) B. 1748; D. 1792.

Leopold, duke of Lorraine, was the son of Charles, the fifth duke, and of Eleanora of Austria. He distinguished himself as a soldier, and after the peace of Ryswick, in 1697, was reinstated in his duchy, which had been taken from his father by the French. He restored his country to a flourishing condition, maintained the poor, and assisted the nobility who had been reduced. He founded a university at Cuneville, and was a liberal patron of the arts and sciences. B. 1679; D. 1729.

Leopold, George Christian Frederick, king of the Belgians. He was the third son of Francis Anthony Frederick, duke of Saxe-Saalfeld-Coburg, and is brother of the duchess of Kent, and consequently uncle to her majesty Queen Victoria, as well as to her consort, Prince Albert. In 1816, while Prince Leopold of Saxe-Coburg, he married the Princess Charlotte Augusta, only child of the prince-regent, afterwards George IV. The highest hopes were formed of that union; and, as the husband of the heiress-apparent to the throne of Great Britain, Leopold obtained the highest esteem. After the sudden death of the Princess Charlotte, in 1817, he continued to live in retirement at Claremont, and was created by the king field-marshal and member of the privy council. In 1830, the Belgian provinces were lost to the crown of Holland, in consequence of the revolution of Brussels. A provisional government was formed, and the throne of Belgium was offered to the duke de Nemours, son of Louis Philippe. That prince declining it, Leopold was next solicited to accept the crown. After at first refusing, he was induced to ascend the throne of Belgium in 1831. Leopold promised, in his opening speech to the Belgian parliament, to encourage industry and to rule according to the principles of civil and religious liberty; a promise which he has fully redeemed. In 1832 he contracted a matrimonial alliance with Louise-Marie-Thérèse, princess of Orleans, and eldest daughter of Louis Philippe; by which union he has had a family, consisting of the Prince Royal Leopold, duke of Brabant, the count of Flanders, and the Princess Charlotte. B. 1790.

Leopolo, San, *lai'-o-po'-lo*, a German colony of Brazil, in the province of Rio-Grande-do-Sul. *Area*, 2,500 square miles. *Desc.* Fertile, and traversed by navigable streams. *Pro.* Maize, wheat, manioc, and sugar-cane. *Pop.* Unascertained. *Lat.* between 29° and 30° S.—The capital town of the colony is of the same name, and has a population of 9,000.

Leotaud, Vincent, *lai'-o-to*, a distinguished French mathematician, who published a work entitled "Examen Circuli Quadraturæ," in which he proved the impossibility of demonstrating the quadrature of the circle. D. 1672.

Lepanto, *le-păn'-to*, a seaport-town of Greece, 12 miles from Patras. *Pop.* 3,000.

Lepanto, Gulf of. (*See* Corinth, Gulf of.)

Lepe, *lai'-pai*, a seaport-town of Spain, near the Atlantic. 12 miles from Huelva. *Pop.* 3,100.

Lepidus, Marcus Æmilius, *lep'-i-dus*, one of the triumvirs with Octavius and Mark Antony. He obtained Africa as his share of the empire, on the death of the dictator; but was deprived of it by Augustus, whereupon he retired into private life. D. in obscurity, 13 B.C.

Lepsius, Charles Richard, *lep'-se-us*, a German archæologist, who published, in 1837, a short treatise on the hieroglyphics of Egypt, and other works. In 1842 he went to Egypt, as chief of a party of learned men, for the purpose of investigating the antiquities of that country. He discovered several monuments of the Pharaoh dynasty, and excavated the tombs of fifty of the Ethiopian kings of Egypt. He likewise contrived to obtain a ground-plan of the celebrated temple of the Memnonium. After his return, in 1846, he published many valuable works in connection with his researches; among the rest, "Letters from Egypt," which have been translated into English; "The Chronology of Egypt," and the "Monuments of Egypt and Ethiopia." B. in Prussian Saxony, 1811.

Lepton, *lep'-ton*, a town in the West Riding of Yorkshire, 4 miles from Huddersfield. *Pop.* about 4,000.

Lerebours, N. J., *ler'-e-boor*, a distinguished optical-instrument-maker, who constructed most of the apparatus for the Paris Observatory. B. in France. 1762; D. at Paris, 1840.

Lerici, *ler'-e-chē*, a seaport of the island of Sardinia, on the Gulf of Spezzia, 5 miles from Spezzia. *Pop.* 5,300.

Lerida, *ler'-e-da*, a town of Spain, in Catalonia, on the Segre, 80 miles from Barcelona. The streets are narrow and ill-paved, excepting on the quay, which extends the whole length of the town. It is a bishop's see, has a cathedral, several parish churches, and a

military hospital. Its university, formerly in repute, was suppressed by Philip V. *Pop.* 17,000.—In 1707 this place was stormed by the French, and in 1810 taken by them, under Suchet.

LERINS ISLES, *ler'-ĕ*, a group in the Mediterranean Sea, in the department of Var, consisting of the islands of St. Marguerite and St. Honorat.

LERMA, *lair'-ma*, an ancient town of Spain, 23 miles from Burgos. *Pop.* 3,000.

LERMA, a town of the Mexican confederation, standing to the S.W. of Mexico. It is 8,550 feet above the level of the sea. *Pop.* 4,000.

LERMONTOV, Michael Ivanovitch, *ler-mon-tof'*, a Russian poet and novelist. He served as officer in the imperial guards until the year 1837, when, in consequence of a poem which he wrote upon the death of the Russian poet Pushkin, the emperor Nicholas sent him to the Caucasus. This poem was first printed in 1850, in Herzen's "Polar Star," a Russian periodical published in London. While serving with the army of the Caucasus, he wrote his novel, "A Hero of Our Own Times," which was afterwards translated into English. He likewise produced many beautiful poems, the action of which is chiefly laid in the mountains of the Caucasus. Just as his fame was beginning to spread over Europe, the writer fell in a duel before he had attained his 30th year. His complete works were published in St. Petersburg in 1842, and were subsequently translated into German. In Russian literature, he takes rank immediately after Pushkin. B. 1811; D. 1841.

LERWICK, *ler'-wik*, the chief town of the Shetland Islands, on the spacious harbour called Lerwick or Brassay Sound, 20 miles from Sumborough Head. It consists of one principal street next the quay, with several lanes branching off. It is the seat of the Shetland courts of law, and is defended by a fort. *Manf.* Straw-plait. *Pop.* 3,000, mostly employed in the herring and whale fisheries.

LESAGE, Alain René, *le(r)-saj'*, a celebrated French novelist, who, after completing his education at the Jesuits' college at Vannes, was engaged in a financial post in Brittany; but, in 1692, went to Paris, and devoted himself to literary pursuits. He commenced by translating and imitating several Spanish works, and, in 1707, produced his first dramatic work,—"Crispin the Rival of his Master." In the same year he published "The Devil on Two Sticks," the plot of which was borrowed from the Spanish author Guevara. In 1708 he composed his comedy of "Turcaret," wherein he ridiculed the farmers-general, whose opposition nearly prevented the production of the piece upon the stage. In 1715 appeared the first part of his greatest work, "Gil Blas;" but the conclusion was not made public until 1735. He was likewise the author of a considerable number of comedies and other humorous dramatic pieces. His fame, however, chiefly rests upon his "Gil Blas," which has appeared in numerous translations, and has been reprinted in a hundred different editions. An attempt was made to dispute the originality of the plot of this celebrated fiction; but it was never shown that Lesage was not the true inventor of it. One of his sons became a celebrated actor, under the name of Montmenil. B. at Sarzeau, 1668; D. 1747.

LESBOS, *les'-bos*. (*See* MITYLENE.)

LESINA, *les'-e-na*, anciently called Pharos, an island in the Adriatic, on the south coast of Austrian Dalmatia. *Ext.* 40 miles long, with an average breadth of from 2 to 6. *Desc.* Undulating and fertile, producing wine, figs, rosemary-oil, anchovies, and marble. *Pop.* 13,000.—Its principal town is of the same name, and has a population of 2,200.

LESINA, a town of Naples, in the province of Capitanata, 30 miles from Foggia. It is situate on the borders of a salt lagoon, extending for 12 miles along the shores of the Adriatic. *Pop.* 1,500.

LESLEY, John, *les'-le*, bishop of Ross, in Scotland, who accompanied Queen Mary from France to Scotland, and soon after became bishop of Ross and a privy counsellor. He zealously defended the Romish religion; and when Queen Elizabeth appointed commissioners to meet at York to consider the complaints made against Mary by her subjects, Lesley appeared in behalf of his mistress, whose cause he pleaded with great ability. He also tried many expedients to procure her liberty, for which he was committed to the Tower; but, in 1573, he recovered his liberty, on condition of quitting the kingdom. While abroad, he endeavoured to interest many foreign princes in the cause of Mary, and wrote several pieces in her defence. Being appointed vicar-general by the bishop of Rouen, he was, while visiting that diocese, seized by the Huguenots, who would have sent him to England; but he recovered his liberty by paying a ransom. He afterwards obtained the bishopric of Constance. His principal work is a history of Scotland, entitled, "De Origine, Moribus, et Rebus gestis Scotorum." B. 1527; D. 1596.

LESLIE, John, *les'-le*, bishop of Clogher. His first preferment was the bishopric of the Orkneys, whence he removed to Raphoe, in Ireland, where he built a stately palace, in which he endured a long siege against Cromwell, but was at last forced to surrender. In 1661 he was translated to Cloghea. D. 1671, aged above 100 years.

LESLIE, Charles, a theological controversialist, who, after receiving his education at Trinity College, Dublin, went, in 1671, to England, where he commenced the study of the law. A few years afterwards, he entered upon holy orders, and became chancellor of Cloyne, in Ireland. Although a fervent Protestant, he throughout his life manifested the greatest devotion to the cause of the Stuarts, and accompanied the Pretender both in France and in Italy. In his old age, he sought permission to return to his native land. George I. acceded to his request, and he thereupon took up his residence at Glaslough, in Ireland. His theological writings excited much attention in his time; and one of them, entitled "A Short and Easy Method with Deists," is still regarded as of considerable value. In addition to pamphlets against Hoadley, Locke, and Burnet, he published controversial pieces antagonistic to Quakers, Jews, Socinians, Deists, Presbyterians, and Roman Catholics. His own views were those of a zealous Protestant, combined with an advocacy of high monarchical principles. B. in Ireland, about 1650; D. there, 1722.

LESLIE, Charles Robert, R.A., a distinguished artist. He has been claimed as an American citizen, but was in reality born in London, where his parents were staying at the time. His father and mother were both born in America; but the ancestors of his father settled originally in America about the year 1745. When six years of age he was taken to Philadelphia, and was there sent to school, and subsequently apprenticed to a bookseller. Having shown considerable talents for design, he was sent to London in 1813, with letters of introduction to Benjamin West, at that time president of the Academy. As a student of the Royal Academy, he evinced great industry, and in the year 1820 exhibited his first picture, "Anne Page and Master Slender." He became an R.A. in 1826. In 1833, to the surprise of his friends, he accepted the post of drawing-master to the United States Military Academy: but he soon returned to England. As an illustrator of the productions of Shakspere, Pope, Goldsmith, Addison, and Cervantes, he achieved great triumphs. His delineation of Sancho Panza has never been equalled. Of his best pictures, it will be sufficient to enumerate "Uncle Toby and the Widow" and "Sancho Panza and the Duchess," both of which are in the national collection at the South-Kensington Museum. Leslie's technical skill was exceedingly great, and his refined and graceful humour admirably fitted him to give pictorial reproductions of situations in the comedies of Shakspere and Molière. He was also a clear and pleasant writer, and wrote "Memoirs of the Life of John Constable" and a "Handbook for Young Painters." D. in London, 1794.

LESLIE, Sir John, an eminent natural philosopher, who, after completing his education at the universities of St. Andrews and Edinburgh, and travelling as tutor in the United States, returned to Scotland, and, obtaining letters of introduction to individuals of literary and scientific celebrity, set out for London, where he for some time gained a subsistence by translating and compiling scientific works. In 1805 he became professor of mathematics in the university of Edinburgh, not without considerable opposition on the part of the

clergy, who objected to the appointment on account of Leslie's referring to Hume in a laudatory manner in one of his treatises. In 1809 he obtained the chair of natural philosophy, upon the death of Professor Playfair; and from that period until his death he produced a succession of valuable works on subjects connected with natural philosophy. In 1832 he was knighted. He contributed treatises on Achromatic Glasses, Acoustics, Climate, Cold, Dew, Meteorology, &c., to the "Encyclopædia Britannica," and also furnished the "Edinburgh Review" and the "Edinburgh Transactions" with many excellent papers. Among his larger works may be cited "The Elements of Geometry," "Elements of Natural Philosophy," and an "Account of Experiments and Instruments depending on the Relation of Heat to Moisture." He was also the inventor of the differential thermometer. B. at Largo, Fifeshire, 1766; D. in Scotland, 1832.

LESMAHAGO, or ABBEY GREEN, *les-ma-hai'-go*, a village and parish of Lanarkshire, Scotland, on the Nethan, 6 miles from Lanark. It has a collegiate church and collieries in its neighbourhood. *Pop.* 8,000.—The Falls of Clyde are in this parish.

LESSEN, *les'-sen*, a town of Germany, not far from Brunswick, in the district of Wolfenbüttel. *Pop.* 4,100.

LESSEPS, Ferdinande de, *les'-sep*, an eminent French engineer and diplomatist, who has represented the interests of his native country, as vice-consul and consul, in Spain, Portugal, Cairo, and other places. In 1854 he formed the project of cutting a canal through the Isthmus of Suez; but, although Robert Stephenson, and other eminent engineers, English and continental, have pronounced the idea to be impracticable, M. de Lesseps has energetically defended his plan, and has commenced the work under the auspices of the Egyptian government. His views on the question were given to the world in a pamphlet entitled "Percement de l'Isthme de Suez," in 1856. B. at Versailles, 1805.

LESSINES, *les-seen'*, a town of Belgium, in Hainault, on the Dender, 20 miles from Mons. *Manf.* Chicory and salt. *Pop.* 5,000.

LESSING, Gotthold Ephraim, *les'-sing*, an eminent German poet and general writer, who, after studying at Leipsic, went to Berlin, where he made himself known by the publication of his celebrated fables. He subsequently produced his "Letters on Literature," which greatly contributed to improve the taste of his countrymen. In 1760 he accepted the post of secretary to the governor of Breslau; in 1770 he was appointed keeper of the Wolfenbüttel library, and soon afterwards produced his famous tragedy "Emilia Galotti." He enriched the literature of Germany with masterpieces of different kinds, especially in the departments of biography, archæology, and the drama. B. at Kamentz, in Upper Lusatia, 1729; D. 1781.

LESSING, Karl Gotthelf, brother of the preceding, was the author of several comedies exhibiting great liveliness and humour. He likewise wrote the biography of his brother, which was published, together with some of his posthumous works, in 1793. B. 1740.

LESSING, Karl Friedrich, nephew of the poet, a painter of some celebrity in Germany. His best pictures are "Passage of the Crusaders to the Holy Sepulchre," "The Royal Mourners," and "The Death of Frederick II." B. at Breslau, 1808.

LESSOE, or LASSOE, *les-so'*, an island of Denmark, in the Cattegat, 12 miles from Jutland. *Area*, 42 square miles. *Desc.* Level, and encompassed by banks. *Pop.* 2,500, mostly occupied in fishing and agricultural pursuits.

L'ESTRANGE, Sir Roger, *le-straing'*, an English writer. He received a liberal education, and, in 1639, attended Charles I. in his expedition to Scotland. He adhered to the royal cause, and, in 1644, was condemned as a spy; but, after remaining in confinement four years, he made his escape, and endeavoured to stir up an insurrection in Kent, which failed; whereupon he went abroad. In 1653 he returned to England, under shelter of Cromwell's act of indemnity. After the Restoration he was appointed censor of the press: he also set up a newspaper, called the "Public Intelligencer," which was discontinued on the publication of the "London Gazette," in 1665. In 1679 he commenced another paper, called the "Observator," designed to vindicate the court measures: this procured him the honour of knighthood. He was an industrious writer, and besides his own pamphlets, which were numerous, he published translations of several books, particularly Josephus, from the French version of D'Andilly; Seneca's Morals, Erasmus's Colloquies, and Quevedo's Visions. B. in Norfolk, 1616; D. 1704.

LESUEUR, Eustache, *les-soo'-er*, a celebrated French artist, surnamed the "Raphael of France." He studied under Vouet, and, early in life, attracted the notice of Poussin. Displaying great disregard of court patronage, he worked only for private individuals and for religious establishments, and, while still young, retired to a cloister. He was the first painter in France during the reign of Louis XIV., and surpassed Lebrun, his rival, in grace and vigour. Among the most important of his works were the "Life of St. Bruno," in twenty-two subjects; "St. Paul preaching at Ephesus," and "The Martyrdom of St. Lawrence." B. at Paris, 1617; D. 1655.

LESUEUR, Jean François, an eminent French composer, who became chapel-master to several cathedrals in France, and subsequently professor at the Conservatoire de Musique. He composed five grand operas, the most successful of which were "The Cavern" and "Paul and Virginia." He also wrote a treatise on Ancient Music, which is highly esteemed, as casting new light upon the obscure subject of the art of music among the Greeks. The emperor Napoleon I. created him a knight of the Legion of Honour, and appointed him his director of music. B. near Abbeville, 1763; D. 1837.

LETHE, *le'-the*, in Greek, 'oblivion,' one of the rivers of Hell, whose waters the souls of the dead drank after they had been confined for a certain space of time in Tartarus. The draught caused them to forget whatever they had done, seen, or heard before, as the name implies.

LETOURNEUR, Pierre, *le-tour'-noor*, a French author, who was the first to make the works of Shakspere known to his countrymen, through the aid of translation. He also translated the poems of Young and Ossian, and the novel of "Clarissa Harlowe." B. at Valognes, 1736; D. at Paris, 1788.

LEUCA, CAPO DI, *lai'-oo-ka*, the most S.E. extremity of Italy, 25 miles from Otranto. *Lat.* 39° 48′ 6″ N. *Lon.* 18° 22′ 5″ E.

LEUCE, or the ISLE OF SERPENTS, *loo-se'*, a high islet, 22 miles from the delta of the Danube, in the Black Sea.

LEUCHARS, *lu'-kars*, a village and parish of Scotland, in Fifeshire, 6 miles from St. Andrews, with a station on the Edinburgh and Dundee Railway. *Pop.* 2,000.

LEUCTRA, *luke'-tra*, a village of Greece, in Bœotia, 6 miles from Thebes, famous for the victory of Epaminondas over the Lacedæmonians, B.C. 371.

LEUK, or LOUECHE, *look*, a celebrated bathing-place of Switzerland, 5,000 feet above the level of the sea, and 15 miles from Sion.

LEUTHEN, *loi'-tain*, the name of several villages in Germany, one of which, in Prussian Silesia, is noted for being the scene of the defeat of the Austrians, in 1757, by Frederick the Great, of Prussia.

LEUWENHOEK, Anthony van, *loi'-ven-he(r)k*, a celebrated microscopical observer, who acquired a great reputation by his experiments and discoveries. To the Royal Society of London, of which he was a member, he forwarded about one hundred papers on the Blood, Blood-vessels, Muscles, the Eye, the Brain, &c. His other writings were collected and published in 1699: of these an English version was produced in 1800. B. at Delft, Holland, 1632; D. at the same place, 1723.

LEVANT, *le-vănt'*. This term properly signifies the East; but it has been commonly applied to the eastern coasts of the Mediterranean, more especially those of Asia Minor and Syria, frequented by Europeans for mercantile purposes.

LEVANTE, *lai-van'-tai*, the most E. province of Sardinia. *Area*, 450 square miles. *Pop.* 80,000.

LEVEN, LOCH, *lo'-ven*, a lake of Scotland, in the county of Kinross, about 12 miles in circumference. It contains four islands, on one of which stood the castle of Loch Leven, anciently a royal residence. Here Queen Mary was confined, in 1567-8, and signed her abdication of the Scottish crown. She escaped from it in 1568, to meet with an imprisonment of much

longer duration and more fatal termination in England. Loch Leven abounds with pike, perch, eels, char, and very fine trout.

LEVEN, a river of Scotland, rising in Loch Lomond, and, after a course of 7 miles, joining the Clyde, at Dumbarton Castle.—Another in Fifeshire, rising in Loch Leven, and, after a course of 14 miles, entering the Firth of Forth at Leven.

LEVEN, a town of Fifeshire, Scotland, at the mouth of the Leven, 9 miles from Kirkaldy. *Manf.* Linen and tiles. It also has iron-works. *Pop.* 2,100.

LEVEN, a river of England, in Lancashire, forming the channel of communication between Windermere and Morecombe Bay.

LEVEN, BLACK and WHITE, two small rivers of England, in Cumberland.

LEVENHAUPT, Adam Louis, Count Von, *lai'-ven-houpt*, a Swedish general, who served under Charles XII., and fought in several battles against the Russians. Taken prisoner by the latter in 1709, he spent ten years in captivity. D. in Russia, 1719.

LEVENTO, or LEVENZO, *lai-vain'-to*, a village of Sardinia, on the Mediterranean, 12 miles from Nice. *Pop.* 1,500.—Here General Massena was born.

LEVER, *le'-ver*, the name of several places in England, none of them with a population above 4,000.

LEVER, Charles James, a modern novelist, distinguished for his fictions illustrative of Irish life and character, and for the vigour and variety of his incidents. He studied at Trinity College, Dublin, and afterwards took the M.D. degree at Gottingen. After being attached to the British legation at Brussels, and spending some time in the practice of his profession, he abandoned it for literature. At the outset of his career in this latter employment, he was, perhaps, the most popular author of the day; his "Harry Lorrequer," "Charles O'Malley," "Tom Burke," &c., were in every one's hands. During his after-career, his style became more thoughtful and sober: "The Knight of Gwynne" is an example of this. Several popular novels, known to have issued from his pen, were published anonymously; the best of them being "Con Cregan; or, the Irish Gil Blas," and "The Diary of Horace Templeton." At the time this notice is written, he is engaged in contributing a fiction, entitled "A Day's Ride," to the pages of "All the Year Round." For a long period he has resided almost exclusively on the continent. B. at Dublin, 1808.

LEVERRIER, Urban Jean Joseph, *le-ver'-re-ai*, a modern French astronomer, celebrated for his discovery of the planet Neptune. His first scientific labours were in chemistry; for, in 1837, he published two treatises on the combinations of phosphorus, as well as taking some part in the chemical department of the "Dictionary of Conversation;" but, in the year 1846, he had acquired sufficient celebrity as an astronomer to obtain admission to the Paris Academy of Sciences, and, a few months later, made known his great discovery. The same results had been attained by the English astronomer Adams. (*See* ADAMS.) Each, however, had laboured in ignorance of the other's pursuits; but the French astronomer was the first to publish the discovery. Leverrier soon rose to the highest honours which his country bestows upon scientific men: he was made officer of the Legion of Honour, director of the Board of Longitude, and professor of the Faculty of Sciences. The Royal Society of England likewise awarded to him, as well as to Adams, its Copley medal, the highest honour in its power to bestow, electing him a member at the same time. B. at St. Lo, France, 1811.

LEVERTON, *le'-ver-ton*, the name of several parishes in England, none of them with a population above 2,300.

LEVI, *le'-vi*, the third son of Jacob and of Leah. He was guilty of a dreadful massacre of the Sichemites, whose prince had violated the chastity of his sister Dinah. He went into Egypt with his father and brethren. His family were consecrated to the service of God. B. in Mesopotamia, 1748 B.C.; D. in Egypt, 1611 B.C.

LEVINGSTON, James, Earl of Callendar, *lev'-ing-ston*, a famous soldier of Scotland, was gentleman of the bedchamber to Charles I., who created him Lord Levingston of Almont in 1633, and afterwards earl of Callendar. In the civil war, he at first joined the parliament; but afterwards distinguished himself by his activity in the king's service. He took Carlisle, where he found a considerable supply of ammunition, and endeavoured to rescue Charles from his confinement in the Isle of Wight. D. 1672.

LEVIZAC, Lecontz de, *lev'-e-zak*, a French grammarian, who, during many years, taught his native language in England. Among several excellent elementary works, may be named his "French Grammar," first published in 1797; "French and English Dictionary," and "Dictionary of Synonymes." D. in London, 1813.

LEWES, George Henry, *loo'-es*, a modern English littérateur, who has been an industrious and excellent contributor to the "Edinburgh," "Westminster," "Foreign," "Quarterly," and other reviews, to Blackwood's and Fraser's magazines, and to the "Morning Chronicle" and other newspapers. On the establishment of the "Leader" newspaper, in 1849, he became its literary editor; but ceased to have any connection with the print in the year 1854. He has distinguished himself in historical, philosophical, and scientific literature. We have space to mention only his most popular works in each of these departments. "The Life and Works of Goethe," and "The Life of Maximilian Robespierre," are at the head of the first; the "Biographical History of Philosophy," the "Exposition of Comte's Positive Philosophy," and a popular treatise on Physiology, being his most important productions in the two latter walks. His play called "The Game of Speculation" was produced under the pseudonym of Slingsby Lawrence, and was one of the best and most attractive contributions to theatrical literature. B. in London, 1817.

LEWES, a borough and market-town of Sussex, on the Ouse, 8½ miles from Brighton. It contains several churches, some of which are of ancient date, and other buildings for public worship. It has also a free grammar-school, a shire-hall, a house of correction, barracks, county gaol, schools, and a theatre. *Manf.* Paper; but the principal trade consists in corn and malt.—Here, in the 13th century, Henry III. was defeated by Simon de Montford, and imprisoned in the castle.

LEWIS, *loo'-is*, one of the largest and most northerly islands of the Hebrides, on the coast of Scotland, parted by two arms of the sea into two divisions, the southern of which is called Harris, and the northern Lewis. *Area*, estimated at from 70 to 80 square miles. *Desc.* The coastline is greatly indented, and much of the surface is covered with peat. *Pro.* Barley and potatoes. Cattle-rearing is followed, and fishing and domestic manufactures give employment to many of the inhabitants. *Pop.* 23,000. *Lat.* between 57° 40′ and 58° 32′ N. *Lon.* between 6° and 7° W.

LEWIS, the name of several counties in the United States. 1. In New York. *Area*, 1,122 square miles. *Pop.* 25,000.—2. In Virginia, formed in 1816, from part of Harrison county. *Area*, 600 square miles. *Pop.* 11,000.—3. In Kentucky. *Area*, 316 square miles. *Pop.* 8,000.—4. In Missouri. *Area*, 520 square miles. *Pop.* 7,000.

LEWIS, kings of France. (*See* LOUIS.)

LEWIS, Sir George Cornewall, Bart., M.P., a modern English statesman and historian. He studied at Eton and Christ Church, Oxford, and was called to the bar in 1831, although he never practised. After filling various subordinate posts under the Government, he was appointed poor-law commissioner in 1839, secretary of the Board of Control in 1847, under-secretary of the Home department in 1848, and secretary of the Treasury in 1850. Three years previously, he had been elected M.P. for Herefordshire, but lost his seat in 1852. He was again returned to Parliament for Radnor in 1855, and was soon afterwards made chancellor of the Exchequer under Lord Palmerston, an office he vacated in 1858. His first important literary production was a translation of Müller's "History and Antiquities of the Doric Race," which, together with the "Inquiry into the Credibility of Early Roman History," may be considered the most profound of his historical efforts. Among his political works, the following are the best: "On the Use and Abuse of Political Terms," "Treatise on the Method of Reason-

ing in Politics," and the "Government of Dependencies." In 1854 he became editor of the "Edinburgh Review," a post he resigned upon taking office as chancellor of the Exchequer. In politics, as well as in literature, he has shown a liberal and painstaking, rather than a brilliant and original, turn of mind. B. 1806.

**Lewis**, John Frederick, a distinguished modern artist, and President of the Society of Painters in Water-colours. In early life he painted both in oil and water, and engraved his works himself. He has achieved the greatest success in both Spanish and Eastern subjects. His Spanish pictures were exhibited during the years 1835—1840; the best of them being,—"A Fiesta in the South of Spain," "The Death of the Bull," and "The Suburbs of a Spanish City." Since the year 1840, he has almost exclusively painted scenes of Arab and Turkish life, a task for which he qualified himself by a long sojourn in the East. The "Halt in the Desert," the "Arab Scribe," and "Armenian Lady," afford examples of his great power of drawing and brilliant colour. In 1855 he obtained the greatest mark of honour open to a water-colour artist; viz., the presidentship of the Society of Painters in Water-colours. B. in London, 1805.

**Lewis**, Matthew Gregory, an English novelist. He was the son of a wealthy man, who was deputy-secretary at war. After studying at Christchurch, he went to Germany, where he became acquainted with Göthe, and imbibed a taste for the mysterious and the tragic. The best-known of his romances is the "Monk," first published in 1794; a work charged with horrors and libertinism of spirit. He was nevertheless a kind and charitable man, as was evidenced by his treatment of the slaves upon the Jamaica estates he inherited from his father. He was a fluent versifier, and his "Alonzo the Brave" and "Bill Jones" are still found to contain interest. In 1812 he produced a drama, entitled, "Timour the Tartar," and subsequently a work called "Residence in the West Indies," since reprinted in Murray's Home and Colonial Library. B. in London, 1775; D. at Sea, 1818.

**Lewis Island**, in the Dampier Archipelago, lying off the N.W. coast of Australia, in *lat.* 20° 30′ S.; *lon.* 116° 30′ E.

**Lewis River**, a river of N. America, rising on the W. side of the Rocky Mountains, and, after a course of 900 miles, entering the Columbia, 413 miles above its mouth.

**Lewisham**, *loo'-ish-am*, a town of Kent, on the Ravensbourne, 5 miles from London. It is the residence of several opulent families retired from business. The church is a handsome building, containing some fine monuments. *Pop.* 15,000.

**Lewistown**, the name of two townships in the United States, neither with a population above 4,000.

**Lew-Kew Islands**. (*See* Loo-Choo.)

**Lexington**, *lex'-ing-ton*, a central district in South Carolina. *Area*, 834 square miles. *Pop.* 13,000.

**Lexington**, a post-township of Middlesex county, Massachusetts, U.S., 11 miles from Boston. *Pop.* 2,000. Here the first battle was fought in the American war, on April 19th, 1775, and ended disastrously for the British.—Also the name of several other places, none of them with a population above 3,000.

**Lexington**, a post-town of Kentucky, U.S., on Town Fork, a small stream which enters the Elkhorn 70 miles from Louisville. It is regularly laid out, and contains a court-house, a market-house, a Masonic hall, banks, a public library, a university, a female academy, and several places of worship. *Manf.* Hardware goods, and cottons and woollens. It has also paper-mills, rope-walks, breweries, and distilleries. *Pop.* 10,000.

**Leyden**, *li'-den*, a city of the Netherlands, in South Holland, on the Rhine, 22 miles from Amsterdam. The form of the town is oblong, and is traversed by canals, which, by their various intersections, form upwards of 60 petty islands, connected together by above 100 small bridges, mostly of wood. The principal streets are broad, well paved, and somewhat raised in the middle; so that no water can remain on them. The street in which the Stadthouse is situate, is accounted among the finest in Europe. It extends, in the form of a crescent, from one end of the town to the other. The houses are for the most part of brick, built with the gable-ends to the street. Many of them are five or six stories high. Of public buildings, the Stadthouse is a magnificent structure, with a stone front. The church of St. Peter is a large and handsome building in the Gothic style. In the centre of the town is a very ancient castle or fort, considered as a work of the Romans. The other public buildings are the arsenal, the custom-house, and the hospitals. The university, founded in 1575, was formerly famous throughout Europe. Connected with it are museums of natural history, cabinets of comparative anatomy, an Egyptian museum, botanic garden, and an extensive library. There are, besides, many learned institutions. *Manf.* These have greatly declined; but it has a considerable trade in butter, cheese, and grain. Printing, especially the printing of classical books, was formerly a great branch of trade; but it is now much reduced. *Pop.* 40,000. *Lat.* 52° 9′ 5″ N. *Lon.* 4° 29′ 5″ E. In 1573, Leyden sustained a long siege from the Spaniards; in 1655 it was ravaged by the plague, and, in 1807, was greatly injured by an explosion of gunpowder.

**Leyden**, a town of New York, U.S., 108 miles from Albany. *Pop.* 2,500.

**Leyden**, Lucas Van, a Dutch painter in oil, distemper, and on glass; also an eminent engraver. His picture of the "History of St. Hubert" procured him a great reputation. Many of his works are contained in the galleries of English connoisseurs. B. at Leyden, 1494; D. 1533.

**Leyland**, *lai'-land*, a parish in Lancashire, 6 miles from Preston. It comprises several townships, and has numerous endowed schools. *Pop.* 14,000.

**Leyte**, *lai'-e-tai*, an island of the Malay archipelago, lying to the S. of Samar. *Ext.* 130 miles long, with an average breadth of 35. It produces cotton, rice, ebony, and other fine woods. *Pop.* 95,000.

**Leytha**, *li'-ta*, a tributary of the Raab, in Germany, and forming part of the boundary between Austria and Hungary. After a course of 90 miles, it joins an arm of the Danube, at Altenburg.

**Leyton**, *lai'-ton*, a parish of Essex, 5 miles from London, on the Eastern Counties Railway. *Pop.* 4,000.

**Lhwyd**, Edward, *thlooud*, a Welsh antiquary, who employed a considerable part of his life in searching into the Welsh antiquities, in the execution of which task he perused or collected a great deal of ancient and valuable matter from their MSS.; transcribed all the old charters of the monasteries that he could meet with; travelled several times over Wales, Cornwall, Scotland, Ireland, Armoric Bretagne, countries inhabited by the same people; compared their antiquities, and made observations upon the whole. Many of his observations were inserted in Gibson's edition of Camden's "Britannia." He also published, in 1707, the "Archæologia Britannica; or, an Account of the Languages, Histories, and Customs of the Original Inhabitants of Great Britain, &c.," folio. He left in MS. a Scottish or Irish-English dictionary, and other proofs of his learning and industry. D. 1709.

**Liancourt**, *le'-an-koor'*, a parish and town of France, in the department Oise, 5 miles from Clermont. *Pop.* 1,500.—It is a station on the Paris and Brussels Railway.

**Libanius**, *li-bai'-ne-us*, an ancient sophist. He became so eminent a teacher at Constantinople, that some other professors procured his banishment, on the charge of magic. He then went to Nicomedia, where he obtained a great number of disciples; amongst whom was Julian, afterwards called the Apostate. His remains were published at Paris in 1606, and in 1627. B. at Antioch, Syria, 314; D. about 395.

**Libanus**, *lib'-a-nus*, a lofty mountain of Syria, the ancient Lebanon. (*See* Lebanon.)

**Libau**, *le-bou'*, a seaport-town of European Russia, in Courland, on the Baltic, 70 miles from Memel. It is inclosed by walls, and has a considerable trade in wine, fruit, and salt herrings. *Pop.* 9,000.

**Liberia**, *li-beer'-e-a*, an independent negro republic of W. Africa, established in 1823. *Area*, 20,000 square miles. This country has been, by the American Colonization Society, purchased from time to time, and has been greatly improved. It produces coffee, indigo, camphor, ginger, arrow-root, hides, ivory, and gold dust. *Pop.* 200,000, of whom a fourth are free blacks

from the United States, and the remainder aborigines or captives released from slave-ships. *Lat.* between 4° 50′ and 7° N. *Lon.* between 6° 50′ and 12° 39′ W.

LIBERTAS, *li-ber'-tăs*, a goddess of Rome, who had a temple on Mount Aventine, raised by T. Gracchus. She was represented as a woman in a light dress, holding a rod in one hand and a cap in the other, both signs of independence; as the former was used by the magistrates in the manumission of slaves, and the latter was worn by slaves who were soon to be set at liberty.

LIBERTY, *lib'-er-te*, a county of Georgia, on the coast. *Pop.* 9,000.—Also the name of several townships, none of them with a population above 5,000.

LIBETHAN, *le'-be-tan*, a free town of Hungary, 14 miles from Neustrol. It has mines of iron and copper. *Pop.* 1,600.

LIBOURNE, *le-boorn'*, a trading town of France, in the department of the Gironde, 18 miles from Bordeaux. It is inclosed by walls, and has a cavalry barracks. *Manf.* Woollen stuffs, cordage, glass; and there are shipbuilding-yards. *Pop.* 13,000.—This place was founded by Edward I. of England, in 1286.

LIBYAN DESERT, *lib'-i-an*, a region of N. Africa, including portions of Egypt, Tripoli, and Barca.

LICATA. (*See* ALICATA.)

LICHFIELD, *lich'-feeld*, a city of Staffordshire, on the Grand Junction Canal, 16 miles from Birmingham. It is neat and well built, and consists of three or four principal streets and some smaller ones. It is the residence of the dignitaries of the church, and a number of good families are in consequence attracted to the place. The cathedral is supposed to have been founded in 667, and was afterwards much enlarged and improved. It is one of the noblest religious edifices in the kingdom, extending 411 feet in length and 67 in breadth. In the centre rises an elegant steeple to the height of 258 feet, and two smaller ones at the west end. The interior is finished with corresponding elegance and splendour. Over the great west doors that open into the nave is placed a very splendid circular window, constructed at the expense of James, duke of York, in the reign of Charles II. A number of interesting monuments are dispersed through the church. St. Mary's chapel is uncommonly rich and beautiful. Besides the cathedral, there are a variety of buildings, all of which, except a few houses, belong to the church. The library belonging to the cathedral contains the Gospels of St. Chad and other literary rarities. The bishop's palace is situate at the north-east corner; the deanery-house stands west from the palace. The other public buildings are the market-house, the guildhall, and gaol; also a theatre, various schools, and a free grammar-school, at which were educated Addison, Woolaston, Ashmole, Garrick, and Johnson. Nearly opposite to it is the Hospital of St. John, originally a monastery. There are, besides, several other charitable institutions. *Manf.* Carpets; and there are several breweries. *Pop.* 7,300.

LICHTENAU, *leezh'-te-nou*, the name of several towns in Germany, none of them with a population above 1,600.

LICHTENBERG, *leezh'-ten-bairg*, a principality of Germany, in the S. of Rhenish Prussia. *Area*, 220 square miles. *Desc.* Well wooded and hilly. *Pop.* 40,000.

LICHTENSTEIN, *leezh'-ten-stine*, a town of Saxony, 42 miles from Leipsic. It stands at the foot of a mountain crowned by a castle. *Pop.* 4,300.

LICHTERVELDE, *leezh'-ter-veld*, a parish and town of Belgium, 12 miles from Bruges. *Manf.* Leather and tobacco. *Pop.* 6,000.

LICINIUS, Caius, *li sin'-e-us*, a Roman tribune, of a plebeian family, who rose to the rank of tribune, when he obtained the surname of Stolo, or Useless Sprout, on account of the law which he enacted forbidding any one to possess more than 500 acres of land; alleging as his reason, that when they cultivated more, they could not pull up the useless shoots (*stolones*) which grew from the roots of trees. He also made another law, which allowed the plebeians to share the consular dignity with the patricians; and he himself became one of the first plebeian consuls, B.C. 364.

LICINIUS, C. Flavius Valerius, emperor of the East, was the son of a Dacian peasant. He became a soldier in the Roman army, and Maximinus subsequently made him his coadjutor in the empire, and gave him the government of Pannonia and Phœacia. Constantine had a great esteem for him, and bestowed his sister on him in marriage; but afterwards a serious difference broke out between the two emperors, which ended in the death of Licinius, after several battles, A.D. 324.

LICKING, *lik'-ing*, a county of Ohio, U.S. *Area*, 640 square miles. *Pop.* 40,000.

LICKING, a river of the United States, rising in Kentucky, and joining the Ohio opposite Cincinnati.—Another in Ohio, which joins the Muskingum.

LICORDIA, *le-kor'-de-a*, a town of Sicily, 6 miles from Calagirone. *Pop.* 7,000.

LIEBENAU, *le'-be-nou*, the name of several towns in Germany, none of them with a population above 3,000.

LIEBIG, Justus, Baron Von, *le'-big*, a distinguished German chemist. In early life he served in an apothecary's establishment, but was afterwards sent to the university of Bonn, and, still later, to Erlangen, where he took the M.D. degree. In 1822 he went to Paris, where he devoted himself to the study of chemistry. The first result of this labour was the composition of a paper on "Fulminates," which on being read, in 1824, at the Institute of France, brought the young chemist under the notice of Baron Humboldt, who was then residing at Paris. Through Humboldt's influence, Liebig was soon after appointed extraordinary professor of chemistry at Giessen, where, in 1826, he founded a laboratory for teaching practical chemistry. This was the famous Giessen establishment, in which the best chemists of Germany and England have been educated. With the assistance of Hofmann, Will, Fresenius, and others, Liebig there originated or tested almost every theory of importance in chemical science. To Liebig the department of organic chemistry is greatly indebted for numerous discoveries of the highest importance. As he is a clear and elegant writer, the result of his profound labours has been made palpable to the mind of the least professional person. Merely to enumerate those books which have been translated and published in England will afford a fair notion of his great labours. These are,—"Chemistry in its application to Agriculture and Physiology;" "Principles of Agricultural Chemistry;" "Animal Chemistry; or, Chemistry in its application to Physiology and Pathology;" "Researches on the Chemistry of Food," and "Familiar Letters on Chemistry." This last has done more to popularize the study of chemistry than any other single book ever written. Liebig's great talents and distinguished services have been appreciated very extensively. In 1845 he was made a grand-baron by the grand-duke of Hesse; in 1840 he became fellow of the Royal Society of England, and was also requested to fill several professorships; which offers he refused. He is a fellow of almost every learned body on the continent of Europe and in America; and, in 1854, a subscription, amounting to £1,000, was raised in Europe for the purpose of presenting him with five pieces of plate. Although we have only quoted those works of Liebig which have been reproduced in England, he has been the author of a large number of others. Altogether, he may be pronounced as the greatest living explorer of that section of natural science known as Organic Chemistry. B. at Darmstadt, 1803.

LIECHTENSTEIN, principality of, *leezh'-ten-stine*, a small independent state of South Germany, inclosed by a part of the Tyrol and the Swiss canton of St. Gall. *Area*, 42 square miles. *Pop.* 8,000.

LIÈGE, *le'-aizh*, a province of Belgium, in the south-east part of the kingdom, and comprising a part of the forest of Ardennes. *Area*, 1,112 square miles. *Desc.* The aspect of the country is that of an undulating plain, except in the south and east, where it is hilly, and covered with extensive forests. *Rivers.* The principal is the Maese. Of the subordinate streams, the most considerable are the Ourthe, the Looss, and the Semoys. It is celebrated for its mineral waters. *Pop.* 461,000.

LIÈGE, the capital of the above province, stands on the Maese, which, on entering the town, divides into a number of branches, 54 miles from Brussels. The town is compact, but some of its parts consist of miserable streets, narrow, dirty, and thinly inhabited;

others have broad streets, neat squares, quays, and promenades. In general, however, it is an ill-built town, without that cleanliness and neatness which mark most towns of the Netherlands. The public buildings are, the cathedral church of St. Lambert, built in the eighth century, a Gothic edifice, but by no means of elegant achitecture; the town-hall, the church of St. Paul, the theatre, the arsenal, and the lyceum, or great provincial school. The fountains, particularly one near the centre of the great square, deserve the attention of the tourist. *Manf.* Arms, as well as cannon, muskets, and rifles; also clock-work and nails; cloth, serge, black lace, earthenware, glass, vitriol, and verdigris. It has, besides, some sugar-refineries, tanneries, and distilleries. *Pop.* 80,000. From 1793 to 1814 Liège was the capital of the French department of Ourthe.

**Liegnitz**, *leeg'-nitz*, a town of Prussian Silesia, at the conflux of the Katzbach, the Schwartzwasser, and the Niesse, 40 miles from Breslau. The principal objects of interest are the old palace of the princes, the castle, the council-house, the public school, the Lutheran churches, the college formerly belonging to the Jesuits, the Catholic church of St. John, and the superb chapel where the dukes of Liegnitz and Brieg were buried. *Manf.* Woollen cloths, and, in its vicinity horticulture is much practised. *Pop.* 16,000. Here, in 1760, the Austrian army was totally defeated by the Prussians under the command of Frederick the Great.

**Lienz**, *leents*, a town of Austria, on the Drave, 40 miles from Brunecken. It has a college, convents, and iron-works. *Pop.* 2,000.

**Lierre**, *le'-air*, a town of Belgium, at the junction of the two Nethes, 10 miles from Antwerp. It contains several churches and an hospital. *Manf.* Cotton and woollen goods; there are also distilleries and breweries to a great extent. *Pop.* 14,000.

**Liff and Benvie**, *lif, boo'-vo*, a united parish of Scotland, 4 miles from Dundee. *Pop.* 19,000, largely employed in weaving.

**Liffey**, *lif'-fe*, a river of Ireland, on whose banks stands the city of Dublin. It rises in the mountains of Wicklow, about 12 miles from the capital, and, after a course of 50 miles, falls into the Bay of Dublin.

**Ligarius**, Quintus, *li-gair'-e-us*, proconsul in Africa, who conducted himself so well in that station, that, at the desire of the people, he was appointed perpetual governor. He opposed Cæsar, who pardoned him after the defeat of Scipio. Not thinking himself safe, he absented himself from Rome, on which account Tubero accused him; but Ligarius was defended by Cicero and acquitted. He was one of the conspirators with Brutus and Cassius against Cæsar.

**Ligne**, Charles Joseph, Prince de, *leen*, a celebrated general in the service of Austria, famous for his wit, the graces of his person, and for his military talents. He distinguished himself under the Austrian standard during the Seven Years' War, and in the subsequent campaigns, becoming, in 1771, lieutenant-general. He was a favourite with Maria Theresa, and particularly with Joseph II., who, in 1782, sent him to Russia on a mission to Catharine II. He became the intimate friend of Catharine, and was charged to participate with the Russian general Potemkin in acting against the Turks. In 1789 he greatly contributed to the taking of Belgrade. He subsequently fell under the displeasure of the successors of Joseph II., but was, nevertheless, created field-marshal by Francis II. in 1808. De Ligne's reputation as a wit was of the highest order in continental society. He was an industrious writer, and left behind some thirty volumes of journals, military memoirs, &c. A selection from these, under the title of "Letters and Opinions of the Prince de Ligne," was published by Madame de Staël in 1809. D. at Brussels, 1735; D. 1814.

**Ligny**, *leen'-ye*, a village of Belgium, in the province of Namur, 8 miles from Fleurus. It was the scene of an obstinate battle between the Prussians and French, on the 16th of June, 1815, two days before the battle of Waterloo.

**Ligonier, John, Earl of**, *lil'-go-neer*, field-marshal of the English army, who served in all the wars of Queen Anne, under the duke of Marlborough, with the greatest distinction, and was employed in every succeeding war. B. 1678; D. 1770.

**Ligor**, *le-gor'*, a state of the Malay peninsula, in the Strait of Malacca. *Pop.* 150,000. *Lat.* between 7° and 9° N.

**Ligorio**, Peter, *le-gor'-e-o*, a painter and architect of Naples, whose designs, after the antique, make thirty volumes in folio. Ligorio was nominated architect of the church of St. Peter at Rome, in the pontificate of Paul IV., but was deprived of that post afterwards, and was succeeded by Michael Angelo. D. 1580.

**Lilburne**, John, *lil'-burn*, an enthusiast, who, in 1636, became assistant to Dr. Bastwick, and was employed by him in circulating his seditious pamphlets, for which Lilburne was whipped, pilloried, and imprisoned. In his confinement he wrote several virulent tracts against the church; but in 1640 he regained his liberty, and was rewarded by parliament with a grant of £2,000 out of the estates of the royalists. He then entered into the army, and became a colonel, in which capacity he behaved gallantly at the battle of Marston Moor; but, publishing a libel against the earl of Manchester, he was confined in the Tower. In 1648 he was released and remunerated; but he still continued writing libels, particularly against parliament, for which he was heavily fined and banished. Lilburne withdrew privately to Holland, where he joined the royalists, and proposed to restore the king for £10,000, which offer was treated with contempt. B. at Durham, 1618; D. 1657.

**Lillo**, George, *lil'-lo*, an English tragic writer, who carried on the business of a jeweller during many years with great success. His plays, founded on common incidents, are constructed with the purpose of showing how easy is the advance from small to greater crimes. His best play is the "Fatal Curiosity." His "George Barnwell" was usually acted on boxing-night, it having been held to convey a useful lesson to young men; but the custom may be said to have died out. B. 1693; D. 1739.

**Lilly**, William, *lil'-le*, an English astrologer. After receiving some education, he went to London, and became book-keeper to the master of the Salters' Company, on whose death he married his widow. In 1632 he became the pupil of Evans the astrologer, and soon excelled his master. He was employed by both parties during the civil wars, and even Charles I. is said to have made use of him. Lilly was certainly consulted respecting the king's projected escape from Carisbrook Castle. He, however, gained more from the parliament party; and the predictions contained in his almanacks had a wonderful effect upon the soldiers and common people. After the Restoration, he was examined respecting the king's executioner, who, he affirmed, was Cornet Joyce. His principal works are, "Christian Astrology;" "A Collection of Nativities;" "Observations on the Life and Death of Charles, late King of England;" "Annus Tenebrosus, or the Black Year." B. at Diseworth, Leicestershire, 1602; D. 1681.

**Lily**, William, an eminent English grammarian, who, after completing his education at Oxford, went on a pilgrimage to the Holy Land. In this journey he learned the Greek language at Rhodes. On his return to England, in 1509, he was appointed master of St. Paul's school; which trust he discharged with great reputation, and educated many eminent scholars. His "Latin Grammar," which was ordered by royal authority to be used in all schools, was not wholly of his own composition, part of it being written by Cardinal Wolsey, and part by Erasmus and Colet. He likewise wrote several grammatical pieces. B. at Odiham, Hampshire, about, 1468; D. in London, of the plague, 1523.

**Lima**, *le'-ma*, or *lil'-ma*, a province of Peru, which contains several districts, and is bounded on the N. by Truxillo, E. by Tarma and Guancavelica, W. by the Pacific, and S. by Arequipa. *Area*, 38,000 square miles. *Pop.* 190,000.

**Lima**, a city of South America, and capital of Peru, on the river Limac, over which is an elegant stone bridge, 6 miles from its port, Callao, on the Pacific. The form of the city is triangular; the base, or longest side, extending along the banks of the river. It is surrounded with a brick wall, flanked with numerous bastions, having, in its circumference, seven gates and three posterns. The streets are broad, parallel, or at

right angles; some running from north to south, and others from east to west, forming squares of houses, each 150 yards in front. They are well paved, and furnished, from the river, with streams, which are arched over, and rendered subservient to cleanliness and many other conveniences. The houses, though low, are generally commodious, and of a handsome appearance. They are constructed of wood, on account of the frequent earthquakes; but in such a manner as to resemble stone buildings. The grand square in the middle of the city is of great extent and beauty. The east side is occupied by the cathedral and the archbishop's palace, both of which are lofty and magnificent buildings, partly constructed with stone. In the north side is the viceroy's palace, containing the courts of justice and several public offices. On the west side is the town-house and city prison; and the south is occupied with private houses, which have fronts of stone, adorned with elegant porticos. The other principal buildings are churches and chapels, which are partly built of stone, and decorated in the most splendid style with paintings and ornaments of the greatest value; convents, which are numerous, and, by curious carved and painted woodwork, are made to resemble the finest architecture. There are several colleges and institutions for religious instruction, and many charitable foundations, hospitals for different objects, and numerous schools. Outside the walls are the public cemetery, baths, and promenade. *Manf.* Gold, lace, and glass. From the fertility of its neighbourhood, large quantities of provisions and live stock are produced. For a long period, Lima formed the grand entrepôt for all the W. coast of S. America, and it still has a large trade. *Pop.* estimated at about 70,000. *Lat.* 12° 2′ 50″ S. *Lon.* 77° 5′ 30″ W.—As rain is seldom or ever seen at Lima, thunder and lightning are not known: the want of rain is supplied by irrigation from the rivers. It is, however, subject to the great calamity of earthquakes, and has been, at various times, nearly destroyed from this cause. One of the most dreadful of these was that of the 20th of October, 1687. During this concussion, the sea retired considerably from its bounds, and returning in mountainous waves, totally overwhelmed Callao and the neighbouring parts, together with the inhabitants. Other earthquakes took place in 1607, 1699, 1716, 1725, 1732; but all these were less terrible than the one which occurred on the 28th of October, 1746.

Limborch, Philip Van, *lim'-bork*, a learned divine, who, in 1686, published a "System of Theology," which passed through four editions. The same year he had a dispute with Orobio, a Spanish Jew, an account of which was published under the title of "De Veritate Religionis Christianæ amica Collatio cum erudito Judæo." Besides the above, he published the "History of the Inquisition," and other works. B. at Amsterdam, 1633; D. 1712.

Limburg, *lim'-boor*, a province of the Netherlands, in the S.E. part of the kingdom, bounded by Prussia and the provinces of Liège, S. Brabant, Antwerp, and N. Brabant. *Area*, 850 square miles. *Desc.* Level; and the rearing of live stock forms the principal branch of rural industry. *Minerals.* Iron, coal, calamine, and turf. *Manf.* Woollens and linens, leather, and tobacco. *Pop.* 190,000.

Limburg, a town of the Netherlands, on the Weze, 16 miles from Liège. *Pop.* 2,000.

Limburg, a province of Belgium, inclosed by Dutch Limburg, Antwerp, Brabant, and Liège. *Area*, 930 square miles. *Desc.* Level; and producing live stock as the greatest branch of rural industry. *Minerals.* Iron, coal, and peat. *Manf.* Woollens and linens. *Pop.* 210,000.

Limburg-on-the-Lahn, *lim'-boorg*, a walled town of Germany, 32 miles from Mentz. It has a ducal palace and various schools. *Pop.* 3,300.—Another, in Prussian Westphalia, 22 miles from Arnsberg. *Pop.* 2,500.

Limehouse, *lime'-hous*, a parish of Middlesex, forming a suburb of London, 3 miles from St. Paul's Cathedral. Adjoining it are the West-India Docks. *Pop.* 30,000.

Limerick, *lim'-e-rik*, an inland county of Ireland, in the province of Munster, bounded on the N. by the river Shannon, which separates it from the county of Clare, S. by Cork, N.E. and E. by Tipperary, W. by Kerry. *Area*, 1,061 square miles. *Desc.* The surface, though diversified by small hills, is not, generally speaking, mountainous, excepting on the S.E., where it is bounded by the Galtees, a lofty ridge, which extends into Tipperary, and on the borders of Kerry, where the ground rises, and forms a grand amphitheatre of low but steep hills, which extend in a wide area from Loghill to Drumcolloher. The land throughout is generally fertile. *Rivers.* The principal are the Maig, the Feale, the Galo, the Blackwater, and the Shannon. *Pro.* The usual crops, and dairy and stock farms are extensive. Large quantities of corn, butter, and cider are exported. *Pop.* 210,000.

Limerick, a city of Ireland, and the capital of the above county, on the Shannon, about 60 miles from its mouth, and 55 miles from Tipperary. It stands on an island, and on both banks of the river. In all the old parts of the town, the streets are narrow and gloomy; but they have been augmented by several handsome streets and convenient quays, in which the houses are uniformly built. The principal public buildings are the custom-house, the cathedral, the bishop's palace, parish churches, friaries, convents, schools, an infirmary, asylums, hospitals, county and city court-houses and gaols, an exchange, chamber of commerce, a linen-hall, and markets. *Manf.* Unimportant: the principal are lace and fishing-hooks. There are, however, numerous flour-mills, distilleries, breweries, tanneries, and foundries. Shipbuilding is carried on, and a considerable export and import trade. *Pop.* 55,000. *Lat.* 52° 40′ N. *Lon.* 8° 35′ W. Limerick has always been deemed a place of importance. It was taken by the English in 1174; in 1651 it was taken by Ireton, the son-in-law of Cromwell; in 1690 it was unsuccessfully besieged by King William III. in person; in 1691 it surrendered to General Ginkle, afterwards earl of Athlone. Before the Conquest, it was the seat of the kings of Thomond.

Limestone, *lime'-ston*, a county of Alabama, U.S., on the N. side of Tennessee river. *Area*, 550 square miles. *Pop.* 17,000—Also a river in Tennessee, the N.E. branch of the Nolachucky river.

Limmat, *lim'-ma*, a river of Switzerland, rising in Lake Zurich, and, after a course of 18 miles, joining the Aar, at Brugg.

Limoges, *le-mozh'*, a town of France, in the department of the Upper Vienne, on the Vienne, 110 miles from Bordeaux. A number of the streets of this town are crooked; but it is not without handsome edifices, and several of its squares and fountains are greatly admired. The cathedral is said to have been built by the English. It is the seat of a national college, university, academy, and of several learned societies. *Manf.* Cotton and woollen cloths, porcelain, pottery, and paper. *Pop.* 42,000.—This town was besieged and taken by the English in 1370. It is the birthplace of Marmontel.

Limoux, *le'-moo*, a town of France, in the department of the Aude, on the Aude, 12 miles from Carcassone. *Manf.* Fine broad-cloths; and it has tanneries, oil-mills, and yarn-factories. *Pop.* 8,000.

Linacre, or Lynacre, Thomas, *lin'-a-ker*, an eminent English physician, who, after completing his academical studies, went to Italy, where he studied under the same preceptor with the sons of Lorenzo de' Medici, and, acquiring the Greek language, was enabled to peruse the works of Aristotle and Galen in their original tongue, being, it is said, the first English physician who had done so. On his return, he took his doctor's degree, and was made professor of physic at Oxford. Henry VII. appointed him preceptor to Prince Arthur; he also became physician to the king, and to Henry VIII. He founded two medical lectures at Oxford and one at Cambridge, and may be considered the first founder of the College of Physicians in London. Anxious to improve the practice of physic in England, he applied to Cardinal Wolsey, and obtained a patent, by which the physicians of London were incorporated, that illiterate and ignorant medicasters might no longer be allowed to practise the art of healing. Linacre was the first president, and held the office as long as he lived. In 1509 he entered into orders, and obtained the precentorship of York, which he resigned on being made prebendary of Westminster. He was a man of

great natural sagacity, a skilful physician, and one of the best Greek and Latin scholars of his time. He translated some of the best pieces of Galen, and wrote the "Rudiments of Grammar" for the Princess Mary, and other works. B. at Canterbury, about 1460; D. 1520.

LINARES, *le-na'-rais*, a town of Spain, 22 miles from Jaen, near the Guarregas. *Pop.* 7,000.

LINCOLN, *lin'-kon*, a city of England, the capital of Lincolnshire, on the Witham, 47 miles from Derby. It is a city of high antiquity, is the see of a bishop, and has greatly declined from its former splendour. It consists chiefly of two long streets, with several smaller cross and parallel ones. Of the public buildings, by far the principal is the cathedral, or minster, an elegant specimen of Gothic architecture. It has three lofty towers,—one in the centre, the highest in the kingdom, and two at the western end, all richly decorated. The grand western front is the most distinguished for the beauty and magnificence of its architecture. This cathedral was first founded in 1086, and was rebuilt in 1283. Besides the cathedral, there are several parish churches. The other public buildings and institutions are the castle, the county and city gaols, the county hospital, several schools, an assembly-room, a theatre, asylum, union workhouse, market-house, libraries, and mechanics' institute. Few places in the kingdom afford so many remains of antiquity as Lincoln. *Manf.* Unimportant; but it has several breweries and an export trade in flour. *Pop.* 22,000.—At the time of the Conquest, and for a long period after that event, this was one of the richest ports in the kingdom; but, during the wars of the barons and the civil commotions, it invariably suffered greatly.

LINCOLN, the name of several counties in the United States. 1. In Maine, on both sides of the Kennebeck, at its mouth. *Area*, 824 square miles. *Pop.* 79,000.—2. In the west part of North Carolina. *Area*, 270 square miles. *Pop.* 9,000.—3. In Georgia, on Savannah River. *Area*, 195 square miles. *Pop.* 6,000.—4. In West Tennessee, on Elk River. *Area*, 332 square miles. *Pop.* 6,000.—5. In Kentucky. *Area*, 370 square miles. *Pop.* 12,000.—6. In Missouri. *Area*, 576 square miles.

LINCOLNSHIRE, *lin'-kon-sheer*, a maritime county of England, on the eastern coast, lying between the estuaries of the Humber and the Wash, and bounded on the E. by the German Ocean; N. by the river Humber, which divides it from Yorkshire; W. by the counties of York, Nottingham, and Leicester; and S. by the counties of Rutland, Northampton, and Cambridge. *Area*, 2,611 square miles. *Desc.* Lincolnshire, though but little diversified in its aspect and surface, yet presents three great natural divisions,—the Wolds, the Heaths, and the Fens. The Wolds commence near Spilsby, and extend, in a north-westerly direction, to Barton-on-the-Humber. They are, on an average, nearly 8 miles in breadth. The Heaths, north and south of Lincoln, extend from the Humber to Grantham, and were formerly barren, but are now chiefly inclosed and cultivated. Along the foot of the Wolds is a low land, which forms a district called the Marsh, a long and rather narrow strip, extending from Wainfleet, on the Wash, to the Humber. To the south of this is the district of the Fens, which forms the northern termination of the great fenny district, which extends so widely over the counties of Norfolk, Cambridge, Bedford, and Huntingdon. *Rivers.* The principal are the Trent, Welland, Witham, Glen, and Ancholme. The county is also intersected by various canals, which give it the advantage of inland communication. *Prq.* The Fens form one of the richest tracts in the kingdom. They are adapted to all the ordinary crops, especially oats, which are raised in great quantities; but they are chiefly devoted to grazing. Many of the unimproved Fens are devoted to the breeding and rearing of geese, their quills and feathers being in great request; and immense quantities being sent to the London and other markets. Immense numbers of wild fowl are also caught in these fens by decoys. The soil of the Wolds consists of sand and sandy loam, upon flinty loam, with a substratum of chalk. Besides the ordinary live stock, a great number of rabbits are bred in this district. The soil of the Heaths is in general a good sandy loam, on a bed of limestone. These high grounds, which were formerly open, wild, and heathy, are now mostly inclosed, and produce all the ordinary crops. The number of sheep in the county is very great, and it has been long famous for its breed of horses. *Manf.* Unimportant. *Pop.* 408,000. —The number and beauty of the parish churches have been frequently remarked.

LINDEN, *lin'-den*, 'limes,' the name of numerous villages in Germany, with small populations.

LINDLEY, John, LL.D., *lind'-le*, a distinguished English botanist. The son of a nursery-garden proprietor at Norwich, he, from his earliest years, evinced the greatest inclination for the study of botany. After translating Richard's "Analyse du Fruit" from the French, and contributing some valuable papers on botany to the Transactions of the Linnæan Society, he went to London, where he was engaged by Mr. Loudon to assist in the production of the "Encyclopædia of Plants." His first work of importance was published in 1832. This was the "Introduction to Systematic and Physiological Botany." For more than a quarter of a century, Dr. Lindley has filled the chair of botany at University College, London, and has contributed to the science of which he has been an untiring exponent, a great number of exceedingly important works. "The Ladies' Botany," written upon the model of Rousseau's "Botanical Letters," has proved one of the most popular books of science ever brought out in England. Of a similar character are his "School Botany" and the "Botany" which he wrote for the "Library of Useful Knowledge." Since the year 1841 he has been horticultural editor of the "Gardener's Chronicle." He is Ph.D. of the university of Munich, fellow of the Royal, Linnæan, and Geological societies, and corresponding member of many continental and American learned bodies. B. at Catton, near Norwich, 1799.

LINDO, *lin'-do*, the ancient capital of the island of Rhodes, with a small harbour, 22 miles from Rhodes. It is the birthplace of the artists Chares and Laches, who executed the Colossus of Rhodes, also of Cleobulus, one of the seven wise men of Greece.

LINDSAY, Sir David, *lind'-sai*, a Scotch poet. In 1512 he became gentleman-usher to the young prince, afterwards James V., who subsequently appointed him master of the herald's office. He wrote several poems, some of which have been printed, particularly his satires on the clergy. B. about the end of the 15th century; D. about 1568.

LINDSEY, Rev. Theophilus, an English divine, who, in 1772, abandoned all his benefices in the Established Church to found a congregation of Unitarians at London. He was the pastor of this congregation during twenty years, and wrote several excellent works, the chief of which were, "An Historical View of the State of the Unitarian Doctrine and Worship, from the Reformation to our own time," and a Vindication of his friend Dr. Priestly. B. 1723; D. in London, 1808.

LINFORD, *lin'-ford*, the name of several parishes in England, none of them with a population above 500.

LINGARD, Rev. John, D.D. LL.D., *lin'-gard*, an eminent English historian. He was a priest of the Roman Catholic Church, and was educated in France. He held appointments in the Roman Catholic College at Ushaw, near Durham, and commenced authorship in 1805, by contributing to the *Newcastle Courant* a series of letters, which were afterwards republished under the title of "Catholic Loyalty vindicated." Besides several controversial works, he wrote a "History of the Antiquities of the Anglo-Saxon Church," and made a translation of the New Testament into English. His great work was the "History of England from the first Invasion by the Romans to the Accession of William and Mary, in 1688." This has passed through many editions, and is generally allowed to be a work of great learning and research. The theological views of the writer colour many of his statements, as was to be expected; nevertheless his religious opinions are never put forth in an offensive manner. For his services to literature, he was granted a pension of £300 per annum by the queen. The last years of his life were spent in retirement at Hornby, near Lancaster. B. at Winchester, 1771; D. 1851.

LINGEN, or LINGA, ISLE, *lin'-ga*, an island in the

Eastern seas, lying off the island of Sumatra, and 100 miles from Singapore. *Ext.* 40 miles long, with a breadth of 20 at its extreme point. *Desc.* In general low, but healthy, and producing fruits and fine timber. *Pop.* estimated at 12,000. *Lat.* 0° 20′ S. *Lon.* 104° 40′ E.

LINGEN, *ling'-en*, a town of Hanover, 36 miles from Osnabruck. *Manf.* Woollens, linens, leather, and starch. *Pop.* 3,000.

LINKOPING, *lin'-che(r)-ping*, a town of Sweden, and capital of a district of the same name, on the Stoeng, 110 miles from Stockholm. It has a cathedral, an old castle, a town-hall, house of assembly, and gymnasium. *Pop.* 5,000. The DISTRICT is mountainous and well wooded, with an area of 4,255 square miles, and a population of 207,000.

LINLEY, Thomas, *lin'-le*, an English musical composer, who set the music to Sheridan's opera, the "Duenna," and wrote the accompaniments to the airs in the "Beggar's Opera," which are still in use. His "Twelve Ballads," though now neglected, are exquisite melodies. Together with his son-in-law, Sheridan, and Dr. Ford, he was during many years engaged in the management of Drury-lane theatre. B. at Wells, about 1725; D. 1795.

LINLEY, William, son of the preceding, wrote two comic operas, and compiled "The Dramatic Songs of Shakspere;" an excellent work. He likewise composed a large number of glees, characterized by grace and feeling. B. about 1767; D. 1835.

LINLITHGOW, *lin'-lith-go*, an ancient royal burgh, and the capital of Linlithgowshire, 17 miles from Edinburgh. It consists of one street and several lanes, and contains the remains of ancient magnificence. At the north side of the town stands the royal palace, a large quadrangular building, with towers at each corner. In this building is the room in which Queen Mary was born, on the 8th December, 1542. This palace was burnt in 1746, by the royal army, on their march to the battle of Falkirk. It is now roofless; but, even in ruins, it exhibits a most majestic appearance. At the south-east corner of the palace is the church, a noble structure, of Gothic architecture, with a fine spire, ornamented with an imperial crown. The other public buildings are the town-house and prison. *Manf.* Leather and glue. Brewing and distilling, to some extent, are also carried on. *Pop.* about 5,000.—Linlithgow was constituted one of the principal burghs in the kingdom in the reign of David I., and has been the scene of many memorable transactions in the ancient history of Scotland.

LINLITHGOWSHIRE, or WEST-LOTHIAN, a county of Scotland, bounded on the N. by the Firth of Forth, E. by Mid-Lothian, S. by Mid-Lothian and Lanarkshire, and W. by the latter county and Stirling. *Area*, 115 square miles. *Desc.* The surface is diversified by flat tracts and small hills, whilst every description of soil is to be found within the limits of the shire. The richest carse clay, and some of the best loams, are in it, as well as a large portion of gravel and sandy soil. Agriculture is greatly improved, and large crops of turnips are grown. The other kinds of produce are the same as in the other Lothian counties. *Rivers.* The chief are the Almond and the Avon, which forms the western boundary for 12 miles. Small streams, however, run in every direction. *Minerals.* Abundant. Coal is found all over the county; also limestone and marl. In the hills of Bathgate lead-mines were formerly wrought. Ironstone and freestone are likewise found in various parts. *Manf.* Unimportant. The chief articles of traffic are salt, lime, freestone, and coal. *Pop.* 32,000.

LINN, *lin*, a county of the United States, in Iowa. *Pop.* 6,000.—Another in Missouri. *Area*, 650 square miles. *Pop.* 5,000.

LINNÆUS, or VON LINNÉ, Carl, *lin'-ne-us*, a celebrated Swedish naturalist, was the son of a clergyman. After struggling with poverty during several years, he succeeded in gaining the notice of Professor Rudbeck, of the university of Upsal. That botanist took him into his house, and made him his assistant lecturer, giving him the use of a fine library and garden. In 1732 he went on his celebrated journey to Lapland, the results of which were published in his "Flora Lapponica." After residing for some years in Holland and visiting England, he was, in 1740, appointed professor of physic and botany in the university of Upsal. He also became physician to the king, who created him a knight of the Polar Star, and conferred on him a pension, with a patent of nobility. He was the founder and first president of the Academy of Stockholm, and a member of several foreign societies. Linnæus travelled into Norway, Dalecarlia, Desert Lapland, Germany, Holland, France, and England, in eager pursuit of his favourite science. He invented a new method of dividing plants into classes, and extended the same to animals. The ardour of Linnæus's inclinations to the study of nature, and the uncommon application which he bestowed upon it, gave him a most comprehensive view both of its pleasures and usefulness. Availing himself of the advantages which he derived from a large share of eloquence and an animated style, he never failed to display, in a lively and convincing manner, the relation subsisting between the study of nature and the public good, and to incite the great to countenance and protect it. Under his culture, botany raised itself in Sweden to a state of perfection unknown elsewhere, and was thence disseminated throughout Europe. His pupils dispersed themselves all over the globe, and, with their master's fame, extended both his science and their own. He lived to see the sovereigns of Europe establish several public institutions for the study of natural history, and even professorships appointed in divers universities for a similar purpose. Linnæus's system of classification first gave to botany a clear and precise language; and, although his system was an artificial one, it yet paved the way for other discoverers, and undoubtedly led to the natural system of Jussieu. His chief works were: "Systema Naturæ," "Bibliotheca Botanica," "Hortus Cliffortianus," "Critica Botanica," "Flora Lapponica," "Genera Plantarum," "Amœnitates Academicæ," and "Materia Medica." B. in the province of Smaland, Sweden, 1707; D. 1778.—His son Charles LINNÆUS was professor of medicine at Upsal. B. 1738; D. 1783.

LINNHE, LOCH, *lin'-he*, an arm of the sea, on the west coast of Scotland, between the counties of Argyle and Inverness. *Ext.* 20 miles long, with a breadth of 8. It has several branches, which take the names of lochs Etive, Leven, and Creran.

LINSTEAD, *lin'-sted*, the name of several parishes in England, none of them with a population above 1,000.

LINTON, *lin'-ton*, the name of several parishes and places in England, none of them with a population above 3,000.

LINTON, the name of two parishes in Scotland, neither with a population above 2,000.

LIN-TSING, *lin-tsing'*, a city of China, in the province of Sham-tung, 70 miles from Tsi-nan. It has both mosques and temples, besides a colossal golden idol. *Pop.* Unascertained.

LINWOOD, *lin'-wood*, a town of Renfrewshire, Scotland, 4 miles from Paisley. *Pop.* 1,300, mostly employed in cotton-weaving.

LINZ, or LINTZ, *lintz'*, the capital of Upper Austria, at the influx of the Traun into the Danube, 96 miles from Vienna. It is well built, on both sides of the Danube, communicating by a bridge and defended by a circle of thirty-two detached forts. The church of St. Ignatius is a large and fine building, as is the castle and meeting-place of the States. Besides these, it has many churches, public schools, a public library, an institute for the deaf and dumb, a magnificent theatre, gymnasium, lyceum, custom-house, and barracks. *Manf.* Cotton and silk goods, gold lace, tobacco, cards, gunpowder, leather, and looking-glasses. *Pop.* 32,000.

LIO, *le-o'*, a village of India, in Bussahir, on the Spite, composed of about twenty Tartar families, all professing Lamaism. It stands on an eminence, in a fertile tract, luxuriant with fruit-trees. *Lat.* 31° 50′ N. *Lon.* 78° 37′ E.

LIPARI ISLANDS, *lip'-a-re*, a group of islands in the Tuscan Sea, belonging to Sicily, and situate between the N. coast of that island and the Italian continent. *Pop.* in the group, 22,000. *Lat.* between 20° and 38° 50′ N. *Lon.* between 13° 15′ and 15° 39′ E.

LIPARI, an island of the Tuscan Sea, the largest of the above group, to which it gives name. It has a circumference of about 20 miles, and is highly culti-

vated, producing grapes, figs, and olives in large quantities. *Minerals.* Pumice-stone, which it sends to all parts of the world, sulphur, soda, and nitre. *Pop.* 15,000. *Lat.* 38° 28′ N. *Lon.* 15° 12′ E. Its principal TOWN is of the same name, and has a population of 1,000.

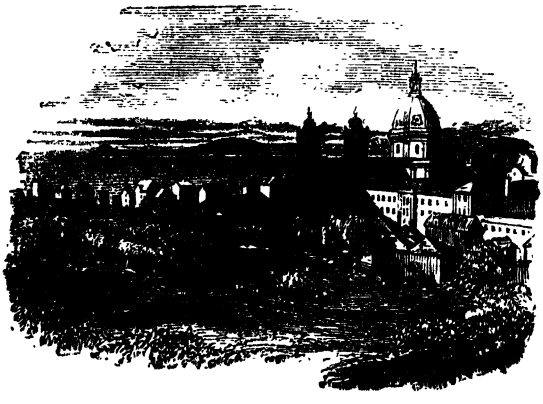
LIPETZK, *le-petzk'*, a town of Russia, 84 miles from Tambov. *Manf.* Woollens principally. *Pop.* 8,000.

LIPPE, *lip'-pe*, a river of Germany, rising 3 miles from Lippspring, and, after a course of upwards of 100 miles, joining the Rhine, at Wesel.

LIPPE-DETMOLD, *det'-molt*, a principality of Germany, divided between Hanover, Prussian Westphalia, and Pyrmont. *Area*, 440 square miles. *Pop.* 107,000.

LIPPE-SCHAUENBURG, *show'-en-boorg*, a principality of Germany, inclosed by Hanover, Hessen-Schaumburg, and Prussian Westphalia. *Area*, 208 square miles. *Pop.* 26,000.

LIPPI, Fra Filippo, *lip'-pe*, a celebrated Italian painter, whose life was a most romantic one. He was captured by a pirate, and carried to Africa, but was released by his master for having executed his portrait in chalk on a wall. He worked for Alfonso I. at Naples, and was employed by Cosmo de' Medici at Florence. His greatest picture was the "Adoration of the Virgin." B. at Florence, 1412; D. 1469.



LIPPSPRING, *lip'-spring*, a town of Prussian Westphalia, 35 miles from Minden. *Pop.* 1,600.

LIPPSTADT, *lip'-stat*, a town of Germany, 38 miles from Munster. *Manf.* Woollen goods. *Pop.* 5,000.

LIPSIUS, Justus, *lip'-se-us*, a learned critic, who studied civil law at Louvain, and, in 1567, became secretary to Cardinal Granvelle, at Rome. In 1579 he became professor of history at Leyden. B. 1547; D. 1606. His changes in religion were remarkable; being a Roman Catholic, then a Lutheran, afterwards a Calvinist, and lastly a Catholic again. His learning was great, but his superstition contemptible, attributing some of his pieces to the inspiration of the Virgin Mary. His works were published at Antwerp, in 6 volumes folio, 1637. The principal were, a "Commentary on Tacitus," "Saturnalia," "De Militiâ Romanâ," "Electorum," "Satira Menippæa," "De Amphitheatris," "De Rectâ Pronunciatione Linguæ Latinæ."

LIRIA, *le'-re-a*, a town of Spain, in the province of Valencia, and 20 miles from the city of that name. *Manf.* Linen, soap, and earthenware; also brandy-distilleries. *Pop.* 9,000.

LISBON, *lis'-bon* (Portuguese, LISBOA, *lees-bo'-a*), the capital of Portugal, stands on the N. bank of the Tagus, near its mouth in the Atlantic. It is built along the river, in the form of a half-moon, on three hills,

the most W. of which begins at a stream flowing between the city and Belem. The second hill, reckoning from the W., is a continuation of the first, being separated from it only by a narrow valley: here the streets are all crowded and narrow. The slope of the hill on the E. side leads to the centre of the city. The city is here at its greatest breadth; and in this quarter are the principal squares, the public walks, and the best edifices. On the bank of the Tagus is a square, containing the exchange, the custom-house, and the India-house. In front it has the principal quays, of great beauty. This square has, in its centre, a colossal statue of Joseph I. on horseback. Three streets, leading from it to the N., join the Rocio, a square of much larger dimensions. The third hill begins with the eminence containing the fort or castle, and extends, with some interruptions, to the E. limits of the town. This quarter is very old, and consists of narrow, crowded, irregular, and ill-paved streets. The castle occupies the highest ground in the whole city, but is of no importance in a military view. Lisbon contains a large number of parish churches, chapels, convents or monasteries, and various hospitals. There are also numerous squares, great and small. The principal edifices are,—the patriarchal church, the royal monastery of Belem, the church of St. Roque, belonging formerly to the Jesuits; and the building in the form of a cross, called the New Church, the largest structure erected in Lisbon since the earthquake. The royal hospital, and the palace of the Inquisition, a large and elegant building, stand in the Rocio. Near that square is the public walk, an oblong garden laid out in alleys; and, farther to the north, one of the five theatres of Lisbon, with the square for exhibiting bull-fights. But of architectural curiosities, the greatest is the aqueduct of Alcantara, which, though not more than half a mile in length, passes, in one part, through a tunnel, in another, across a defile. It is partly of Roman, and partly of Gothic architecture: the principal arch is Gothic, of the width of 107 feet, and is accounted one of the finest specimens of the kind in Europe. Of the public institutions, one of the principal is the Academy of Sciences, a geographical academy, the College of Nobles, the Royal Marine Academy, the Academia real das Guardas Marinhas, and the Royal Academy of Fortification. Lisbon is the seat of the public offices, not only of the government, but of the Church, and contains the royal palaces of Bemposta and Necessidades. Its commerce is considerable, but has greatly declined since the independence of Brazil. *Manf.* Fire-arms, powder, silks, porcelain, paper, soap, and jewellery. *Pop.* 280,000. *Lat.* 38° 42′ 26″ N. *Lon.* 9° 8′ 25″ W. In 1755, 60,000 lives were lost, and a great portion of this city destroyed, by an earthquake. In 1807 it was occupied by the French, and was afterwards the scene of important operations between the British and French armies, until the latter were finally driven from the Portuguese capital.

LISBON, several townships of the United States, none of them with a population above 6,000.

LISBURN, *lis'-burn*, a town of Ireland, in the county of Antrim, on the Lagan, 7 miles from Belfast. Its public buildings are a fine cathedral, with a lofty steeple; a large market-house, an infirmary, a fever hospital, linen-hall, assembly-rooms, and various schools. *Manf.* Principally linen. *Pop.* 7,000.—It communicates by railway with Belfast.

LISIEUX, *le'-ze-u(r)*, a town of France, in the department of Calvados, on two small rivers,—the Orbec and the Gassey, 28 miles from Caen. The only remarkable buildings are an ancient cathedral and an episcopal palace. *Manf.* Cotton, linen, and flannel. It has, besides, some tanneries, dye-works, and brandy-distilleries. *Pop.* 12,000.

LISKEARD, *lis-kard'*, an irregularly-built market-town and borough of Cornwall, 16 miles from Plymouth. The church consists of three spacious aisles; and there are meeting-houses for Quakers, Independents, and Methodists. It has, besides, a town-hall, union workhouse, philosophical society, and various schools. *Manf.* Serges and tanning. In the neighbourhood are tin, copper, and lead mines. *Pop.* 6,500.

LISLE, or LILLE, *leel*, a city of France, formerly the capital of French Flanders, and now of the department of the North, situate on the Deule, in a dead flat, 26 miles from Arras. The Deule is navigable, and is divided into several branches, part of which supply the moats or great ditches of the citadel and town. The form of Lisle is that of an irregular oval, and its circumference between four and five miles, exclusive of the earthen ramparts which surround the town, and which are in their turn surrounded by a moat. The city presents an imposing appearance, from its extent, its fortifications, canals, squares, and public buildings. Few cities of France can compare with it in the straightness and width of its streets, the regularity of its buildings, and the general air of neatness which it possesses. The principal square is the Place d'Armes. Among the public buildings are several churches, convents, hospitals, the barracks, the exchange, the town-hall, formerly a palace of the dukes of Burgundy, the mint, the corn-market, and the theatre. The most interesting institutions are the Literary Society, the College of Surgery, the School of Drawing and Painting, the Riding-school, the Academy of Music, the Public Library, the Gallery of Pictures, and the Botanic Garden. The Deule is crossed in the town by several bridges, and along part of a canal is the fine esplanade, near to which is the handsome Pont Royal. The citadel, the masterpiece of Vauban, is the first in Europe, after that of Turin. It is a mile in circuit, and is surrounded by a double moat. *Manf.* Camlets, serges, and other woollen stuffs; cotton, calico, linen, silk, velvet, lace, carpets, soap, starch, paper, beet-root sugar, tobacco, leather, glass, earthenware, and an extensive fabricature of gold coin. *Pop.* 77,000. *Lat.* 50° 38′ N. *Lon.* 3° 2′ W.—The origin of this town is ascribed by tradition to Julius Cæsar. Louis XIV. took it from the Spaniards in 1667. It surrendered, in 1708, to the duke of Marlborough and Prince Eugene, and at the peace of Utrecht it was restored to France. It is connected by railway with Brussels and Ghent.

LISLE, a town of France, in the department of Vaucluse, 12 miles from Avignon. It has a traffic in silk, woollen stuffs, and leather. *Pop.* 5,200.

LISLE, Sir George, *lile*, a gallant English officer, was the son of a bookseller in London; but on the breaking out of the civil wars, he entered into the royal army, where he behaved so well as to rise to a command. At the battle of Newbury, when it grew so dark that his men could not distinguish him, he put his shirt over his clothes, that they might be encouraged by his presence and example. He bravely held the town of Colchester a long time against the Parliamentary forces, and surrendered as prisoner of war, but was put to death by the victors, in 1648.

LISLE, Joseph Nicholas de. (*See* DELISLE.)

LISMORE, *lis-mor'*, one of the Western Islands, on the coast of Scotland, in Argyleshire, 7 miles from Oban. It has the remains of a castle, and a cathedral. *Pop.* 1,500.

LISMORE, an episcopal city of Ireland, in the county of Waterford, on the Blackwater, over which is a stone bridge, 26 miles from Cork. It was formerly a considerable city, but is now a small, mean place. Its castle is a magnificent pile. *Pop.* 2,400.—It is the birthplace of Congreve the dramatist, and Boyle the philosopher.

LISSA, *lis'-sa*, a town of Prussian Poland, near the borders of Silesia, 44 miles from Posen. It has a castle, churches, and a synagogue. *Manf.* Woollens, leather, and tobacco. *Pop.* 10,000; of whom nearly half are Jews.—Another town, in Bohemia, 20 miles from Prague. *Pop.* 1,200.

LISSA, a mountainous island in the Gulf of Venice, near the coast of Austrian Dalmatia, 33 miles from Spalatro. It produces wine, olives, almonds, and figs. *Pop.* 3,000.—From 1810 to 1815 this island was held by the British, when it had a population of 12,000, mostly engaged in English manufactures.

LISTOWEL, *lis'-to-el*, a market-town of Ireland, in the county of Kerry, 16 miles from Tralee. *Pop.* 2,200.

LITCHFIELD, *litch'-feeld*, a county of Connecticut, U.S. *Area*, 885 square miles. *Pop.* 50,000.—Also the name of several townships, none of them with a population above 4,000.

LITHGOW, William, *lith'-go*, an extraordinary Scotch traveller, who went through various parts of Europe and the East on foot, and in his travels experienced many singular adventures. At Malaga, he was seized by the Inquisition, and put to the torture; but escaped with his life, and on his arrival in England was presented to James I. on a feather bed, being so mangled as to be incapable of standing. On his recovery, he applied to Count Gondomar, the Spanish ambassador, who promised him a reparation, but deceived him, which so provoked Lithgow, that he assaulted him at court, for which he was sent to the Marshalsea, where he remained a prisoner nine months. He published a curious account of his travels. D. 1640.

LITHUANIA, *lith'-u-ai'-ne-a*, the former name of an extensive tract of country lying between Poland and Prussia, and now comprised in the Russian governments of Wilna, Grodno, and Minsk. It is very flat, generally sandy, and intersected by vast marshes and bogs.

LITRY, or LITTRY, *le'-tre*, a town of France, in the department of Calvados, 9 miles from Bayeux. In its neighbourhood is an extensive coal-field. *Pop.* 2,300.

LITTAU, *lit'-tou*, a town of Moravia, 8 miles from Olmutz. *Manf.* Woollens and muslins. *Pop.* 3,000.—It is a station on the railway to Prague.

LITTLE, William, *lit'-tel*, an ancient English historian, known also by the name of Gulielmus Naubrigensis. He was a monk of the abbey of Newborough, in Yorkshire, where, in his advanced years, he composed a "History of England, from the Norman Conquest to 1197," in five books. B. 1136.

LITTLE ROCK, a city of the United States, and the capital of Arkansas, 90 miles from the junction of the river of that name with the Mississippi. *Pop.* 5,000.

LITTLETON, *lit'-tel-ton*, the name of several parishes in England, none of them with a population above 300.

LITTLETON, or LYTTLETON, Thomas, a celebrated English judge. His family name, Westcote, was changed by him, in compliance with the wishes of his maternal grandfather. After receiving a liberal education, he entered of the Inner Temple. His abilities procured him the place of steward of the court to Henry VI., and, in 1455, he went the northern circuit as a judge. Edward IV. appointed him one of the judges of the court of Common Pleas, and, in 1475, he was created knight of the Bath. He compiled his famous book on "Tenures," according to Sir Edward Coke, while he was judge; but it was not printed until after his death. His third son, Thomas, was knighted by Henry VII., for apprehending Lambert Simnel. The eldest son, Sir William, died at his seat in Worcestershire, in 1508. Sir Thomas Littleton's book of "Tenures" still remains an indispensable text-book of the law: it is generally printed with Sir Edward Coke's Commentary.

LITTORALE, or LITORALE, *lit'-to-ral*, or *lit-to-ra'-lai*, a district of the Austrian empire, extending along the north coast, from Fiume to Dalmatia. *Area*, 150 square miles. *Pop.* 23,000.—It includes the towns of Trieste, Fiume, Buccari, and Porto Re.

LIVADIA, or LIVADHIA, *li-vai'-de-a*, or *le-va-de'-a*, formerly an extensive province of European Turkey, so named by the Turks from the town of Lebadea. It is now Greece.

LIVENZA, *le-vain'-dza*, a river of Venetia, rising in Udine, and, after a course of 70 miles, falling into the Adriatic Sea, 28 miles from Venice.

LIVERMERE, *liv'-er-meer*, two parishes of Suffolk, neither with a population above 400.

LIVERPOOL, *liv'-er-pool*, a town of Lancashire, and one of the principal trading and seaport-towns in Great Britain, on the Mersey, about 4 miles from the Irish Sea, and 185 from London. It has a length of about 5 miles, and a breadth of about 2½ at its widest points. It stretches along the river, and has docks and basins having an aggregate water area of nearly 200 acres. Among the largest of the docks are the King's, Queen's, Brunswick, Albert, Salthouse, Canning, Waterloo, Prince's, George's, Clarence, Nelson, Victoria, Trafalgar, Collingwood, Wellington, Stanley, Huskisson, Sandon, and Salisbury. The streets are mostly spacious, airy, and some of them elegant. The older and more confined parts of the town have been greatly improved, whilst the public buildings are

formed in a style of elegance and splendour suitable to the taste and opulence of its inhabitants. The principal of these are the Town-hall, erected at a cost of upwards of £110,000. The hall occupies the side of a square, the other three sides being formed by the Exchange Buildings, the lower story of which is an arcaded walk; Corn-exchange, Lyceum, Athenæum, Wellington rooms, infirmary, workhouse, bluecoat-school, dispensary, and asylum for the blind. Besides these, there is St. George's Hall, built in the Corinthian order, and containing the assize courts, a concert-room, and a hall for public meetings. The churches and chapels are numerous, and many of them of great architectural beauty. There are also places of worship for almost every denomination. The charitable institutions are also numerous and well conducted. Among these may be noticed the dispensary for dispensing medicines to the sick poor, an hospital for decayed seamen and their widows and children, a fever hospital, a ladies' charity, for the relief of poor married women in childbed, a penitentiary for unfortunate women, the Strangers' Friend society, and several others. The institutions established for literary and scientific pursuits are, the Royal Liverpool Institution, where public lectures are given. To this institution is attached a philosophical apparatus and a museum of natural curiosities. A botanic garden was also established in 1801, at an expense of about £10,000. The Collegiate, a fine building in the Gothic style, and the Mechanics' Institute. In the centre of the area before the town-hall is a superb group of bronze statuary, supposed to be the largest in the kingdom, to commemorate the death of Lord Nelson. There is also a statue erected to the duke of Wellington. The Custom-house is a plain building. The Corn-exchange is spacious, fronted with stone. The borough gaol is built on a plan furnished by the celebrated Mr. Howard. It has several large open and covered market-houses for provisions, besides a fish-market and a pedlars'. The trade of Liverpool is most extensive; and it is to this, rather than to manufactures, that it owes its importance. It has, however, sugar-refineries, breweries, roperies, glass-works, brass and iron-foundries, soda-works, and manufactures of watches and jewellery. Shipbuilding is carried on to a considerable extent. The trade of Liverpool to all parts of the globe is very great, and has been largely extended by the construction and arrangement of the docks. Nearly all the raw cotton imported into Great Britain is brought into it; and from it an immense emigration takes place every year. In the vicinity are many windmills for grinding corn, which have a very striking appearance. *Pop.* about 400,000. *Lat.* 53° 24′ 48″ N. *Lon.* 3° 0′ 1″ W.—Liverpool is by railway connected with all the great towns of England and Scotland; by steam with the principal ports of America, and the cities of Glasgow, Dublin, Cork, and Bristol; whilst its canal system also gives it connection with the principal towns of England. It is the birthplace of Mrs. Hemans, the poetess.

LIVERPOOL, a village on the Lake of Onondaga, New York, U.S., 130 miles from Albany. In its neighbourhood are numerous salt-springs. *Pop.* Unascertained.

LIVERPOOL, a town of N. America, on the Bay of Fundy, Nova Scotia, 70 miles from Halifax. *Pop.* Unascertained.

LIVERPOOL, CAPE, a headland of British N. America, in *lat.* 70° N., *lon.* 129° W.

LIVERPOOL PLAINS, a squatting district of East Australia. *Pop.* 4,000. *Lat.* between 31° and 32° S. *Lon.* between 150° and 151° E.

LIVERSEDGE, *liv'-er-sedj*, a township of the West Riding of Yorkshire, about 5 miles from Huddersfield. *Manf.* Woollens. *Pop.* 7,000.

LIVIA, *liv'-i-a*, a celebrated Roman lady, wife of Tiberius Claudius Nero, by whom she had the emperor Tiberius and Drusus Germanicus. Augustus fell in love with her, and married her while she was pregnant. She prevailed on Augustus to adopt her children by Drusus; but she was suspected of poisoning the emperor to procure the throne for her son Tiberius, who treated her with ingratitude, and when she died, A.D. 29, refused her funeral honours.

LIVINGSTON, *liv'-ing-ston*, the name of several counties of the United States. 1. *Area*, 236 square miles. *Pop.* 8,000.—2. In New York. *Area*, 560 square miles. *Pop.* 45,000.—3. In Louisiana. *Area*, 786 square miles. *Pop.* 4,000.—4. In Michigan. *Area*, 575 square miles. *Pop.* 15,000.—5. In Missouri. *Area*, 536 square miles. *Pop.* 5,000.—6. In Illinois. *Area*, 1,026 square miles. *Pop.* 2,000. Also the name of two townships, one in N. York and the other in N. Jersey, neither with a population above 3,000.

LIVINGSTONE, David, *liv'-ing-stone*, a distinguished African traveller, who, under considerable difficulties, continued to pursue the studies of medicine and theology while engaged in a cotton factory at Glasgow. He subsequently requested to be sent as missionary to China; but England being at the time at war with that country, he embarked, in 1840, for Africa. After residing some time at the Cape of Good Hope, in order to acquire the dialects spoken in the interior, he embarked upon his religious labours, and lived chiefly with the Bechuanas, to whose customs he accommodated himself, and to whom he preached the doctrines of Christianity. In 1849 he set out, and succeeded in verifying the existence of Lake Ngami. He undertook a second expedition in the following year, but was arrested by illness. In 1851 he penetrated beyond the chief city of the Makalolo tribe, and found a vast country, fertile, with navigable rivers, and rich in mineral wealth, and, at the same time, inhabited by a friendly and industrious people. After undergoing the severest hardships, he reached the Portuguese station of St. Paul, on the west coast of Africa. He afterwards set out to traverse the continent towards the south, and reached Quillimane in 1856. Returning to England, he was rewarded with the gold medals of the Geographical societies of London and Paris. He published, in 1857, a narrative of his labours and adventures, under the title "Missionary Travels and Researches in South Africa," a work which excited considerable interest. In 1858 he left England, provided with a steam-yacht of light draught, to ascend the African rivers, and with scientific apparatus to enable him to accurately determine his observations.

LIVIUS ANDRONICUS. (*See* ANDRONICUS.)

LIVIUS, Titus, *liv'-i-us* (LIVY, *liv'-e*), an illustrious Roman historian. Very little is known respecting his life. He appears to have resided at Rome, and to have been on intimate terms with Augustus, who made him tutor to his grandson Claudius. His history was originally produced in 142 books; but out of that number only 35 are now extant; the rest are irrecoverably lost. It began with the foundation of Rome, and ended with the death of Drusus, in Germany, B.C. 9. The work is popular on account of its beautiful style; but its author was deficient in "that love of truth, diligence, and care in consulting authorities," which are the first requisites of a truly great historian. The best German translation is that by Wagner; Baker's is, perhaps, the best English reproduction. A literal translation has been published in Bohn's Classical Library. D. at Patavium (Padua), B.C. 59; D. A.D. 17.

LIVONIA, *li-vo'-ni-a* (Germ. LIEFLAND, *leef'-lant*), a maritime province of European Russia, bounded on the N. by Esthonia, S. by Courland, W. by the Gulf of Livonia, and on the E. by other Russian governments. *Area*, including the island of Oesel, in the Baltic, 20,450 square miles. *Desc.* It consists of a vast tract of level country, interspersed with numerous marshes and lakes. *Pro.* Rye, wheat, barley, buckwheat, and oats. The rearing of cattle is carried on to a large extent. *Manf.* Cotton and woollen stuffs, glass, sugar, and tobacco. *Pop.* about 900,000. *Lat.* between 56° 30′ and 56° 20′ N. *Lon.* between 24° and 28° E.

LIVONIA, or RIGA, the GULF of, is an inlet of the Baltic Sea, between Courland and Livonia. *Ext.* 100 miles long, by 80 broad. *Lat.* between 57° and 58° 30′ N. *Lon.* between 22° and 24° E.

LIVORNO, *le-vor'-no*, a town of the Sardinian states, in Piedmont, on the Po, 17 miles from Vercelli. It has a trade in cattle and wool. *Pop.* 4,000.

LIVORNO, a city of Italy. (*See* LEGHORN.)

LIVUMA, *li-vu'-ma*, a considerable river of Africa, which falls into the Indian Ocean behind Cape Delgado.

LIXURI, *leex-oo'-re*, a town of the Ionian island of Cephalonia, 5 miles from Argostoli. It is the see of a Greek bishop. *Pop.* 6,000.

LIZARD ISLAND, *liz'-ard*, in the S. Pacific Ocean, lying off the E. coast of Australia. *Lat.* 14° 40′ S. *Lon.* 145° E.

LIZARD POINT, in Cornwall, the most S. promontory of England, 23 miles from the Land's End. *Lat.* 49° 57′ 55″ N. *Lon.* 5° 11′ 17″ W.

LLAN, *lăn*, 'a church,' a prefix to numerous places in England and Wales, generally with small populations.

LLANBADARN FAWR, *lăn-ba-darn′ vowr*, an ancient market-town and parish of Wales, in Cardiganshire, 1 mile from Aberystwith. *Pop.* 13,000.

LLANDAFF, *lăn-daf″*, a parish and city of S. Wales, on the Taff, 3 miles from Cardiff. The city is a mere hamlet, but is noted for its cathedral. It is the see of a bishop. *Pop.* of parish, about 2,000.

LLANDEILO FAWR, *lăn-dī′-lo*, an irregularly-built market-town of S. Wales, in Caermarthenshire, on the Towy, which is crossed here by a stone bridge, 14 miles from Caermarthen. *Manf.* Flannels; and there are several tanneries. *Pop.* 6,000. Near this town is Grongar Hill, where the last struggle was, in 1282, made for the independence of Wales.

LLANDOVERY, *lăn-do′-ve-re*, a well-built market-town and parish of S. Wales, in Caermarthenshire, on the Towy, 20 miles from Brecon. *Pop.* 2,000.

LLANELLY, *lă-neth′-le*, an irregularly-built town of Wales, in Caermarthenshire, at the mouth of the Bury river, 16 miles from Caermarthen. It depends chiefly on the coal and iron in the neighbourhood, which have given rise to extensive manufactures. It has four docks, and imports copper from Cornwall. *Pop.* 14,000. It communicates with both Caermarthen and Swansea by railway.

LLANERCHYMEDD, *lăn-er-kim′-eth*, a market-town of Wales, in the island of Anglesey, 11 miles from Holyhead. *Manf.* Welsh snuff. *Pop.* 100.

LLANGADDOCK, *lăn-găth′-ok*, a market-town and parish of Wales, in Caermarthenshire, between the rivers Brane and Sawthy, 22 miles from Brecon. *Manf.* Coarse woollens and stockings. *Pop.* 3,000.

LLANGOLLEN, *lăn-goth′-len*, a market-town of Wales, in Denbighshire, on the Dee, over which is a bridge, 26 miles from Shrewsbury. It is a mean-looking town, with a few narrow streets. Its neighbourhood, however, is much admired for its scenery. *Manf.* Flannels. *Pop.* 6,000.—On a conical hill not far from this town, are the ruins of Cadr Dinas Brau, a castle of great antiquity.

LLANIDLOES, *lăn-id′-less*, a town and parish of N. Wales, on the Severn, 20 miles from Montgomery. *Manf.* Flannels and woollen stuffs. *Pop.* 3,500.

LLANOS, *l-ya′-noce*, a market-town of Spain, in Catalonia, 30 miles from Gerona. *Pop.* 2,300.

LLANRWST, *lăn-roost′*, an irregularly-built market-town of N. Wales, in Denbighshire, on the Conway, 12 miles from Aberconway. It has a church, an elegant chapel, designed by Inigo Jones, and the tomb of the great Llewellyn, the last Celtic prince of Wales. *Manf.* Welsh harps. *Pop.* of parish, 4,000.—In the vicinity the scenery is beautiful.

LLANTRISSENT, *lăn-tris′-sent*, an ill-built borough and market-town of Wales, in Glamorganshire, finely situate on the brow of a lofty hill, 9 miles from Cardiff. It has a town-hall and market-house, and is the seat of the quarter-sessions for the hundred. The church is a large Norman building. *Pop.* of parish, about 4,300.

LLERENA, *l-yai-rai′-na*, an ancient town of Spanish Estramadura, 63 miles from Seville. *Pop.* 6,500.—Near this place, the troops under Combermere defeated the French under Drouet, in 1812.

LLEUENY, *lu-en′-e*, a river of Wales, in Breconshire, falling into the Wye.

LLOYD, Robert, *loid*, an English poet, who was some time an usher in Westminster school, and while in that situation published a poem called the "Actor." On account of his irregularities, he was obliged to resign his place in the school, after which he subsisted almost entirely on charity, particularly that afforded by his friend Churchill. He was the author of the "Capricious Lover," a comic opera, and other dramatic works. D. 1764.

LLOYD, Nicholas, an English divine, who compiled an "Historical, Geographical, and Poetical Dictionary," to which Hoffman and the editors of Moreri were much indebted. It was first printed at Oxford in 1670. B. 1631; D. 1690.

LLUMAYOR, *l-yoo-ma′-yor*, a town of the island of Majorca, in the Mediterranean Sea, 18 miles from Palmas. *Manf.* Woollens and linens. *Pop.* 7,300.

LLYWELYN AB GRUFFYDD, *loo-el′-in*, the last sovereign of Wales, who reigned from 1254 to 1282. He was a brave prince, and resisted the ambition of Edward I., king of England, a long time; but at last fell, and with him the independence of the Welsh as a distinct nation.

LLYWELYN AB SITSYLT, a Welsh prince, who succeeded to the principalities of South Wales and Powys, in 998. In 1021, Anlaff, at the head of a Scotch army, invaded his territories, and was joined by Hywil and Mercdydd, sons of Edwin ab Einion. Llywelyn marched against them, and defeated them, but fell in the battle.

LOANDO. (*See* ST. PAUL DE LOANDO.)

LOANDO, *lo-an′-do*, an island of Africa, immediately off the coast of Angola. *Ext.* 20 miles long, with an average breadth of 1.

LOANGO, *lo-ang′-o*, a considerable country of Western Africa, to the north of the Zaire or Congo. Its limits are not well defined, but it is supposed to extend from Cape St. Catharine to the Zaire, a coast of upwards of 400 miles. Loango proper occupies only the centre of this space, excluding Mayomba on one side, and Malemba on the other. *Desc.* Flat and fertile along the coasts. *Pop.* Unascertained. (*See* ANGOLA, BENGUELA, and CONGO.)

LOANGO, CITY OF, the capital of the kingdom of Loango, about four miles in circuit. *Pop.* 15,000. *Lat.* 4° 40′ N. *Lon.* 12° 30′ E.

LOANO, *lo-a′-no*, a town of the Genoese territory, on the Gulf of Genoa, 35 miles from Genoa. *Pop.* 3,000.

LOBAU, *lob′-ou*, a town of Saxony, 13 miles from Bautzen. In its neighbourhood crystals, known by the name of "Lobau diamonds," are found. *Pop.* 4,000.

LOBAU, an island in the Danube, a few miles below Vienna, at the place where the French passed that river, to fight the memorable battle of Aspern, in 1809.

LOBAU, a town of Prussia, 40 miles from Marienwerder. It is inclosed by walls, and has a convent. *Manf.* Woollens. *Pop.* 3,500.

LOBBES, *lob*, a parish and town of Belgium, 10 miles from Charleroi. *Pop.* 2,000. This was the scene of an engagement between the Austrian and French troops, in 1794.

LOBENSTEIN, *lo′-ben-stine*, a town of Upper Saxony, on the Lemnitz, 12 miles from Schleiz. *Manf.* Woollens. *Pop.* 5,000.

LOBO, Jerome, *lo′-bo*, a Portuguese Jesuit, who travelled through Abyssinia as a missionary, and published a curious account of that country, which was rendered into French by Legrand, whence it was translated into English by Dr. Samuel Johnson. D. at Lisbon, 1678.

LOBOS, *lo′-bos*, one of the smaller Canary Islands.

LOBOS, a small island at the mouth of the La Plata, 15 miles from Cape St. Maria.

LOBOS, islands in the Pacific Ocean, near the coast of Peru. *Lat.* 6° 25′ and 6° 45′ S. *Lon.* 80° 44′ and 81° 10′ W.

LOBSENS, *lob′-sens*, a town of Prussian Poland, 34 miles from Bromberg. *Manf.* Woollens. *Pop.* 3,000.

LOCARNO, *lo-kar′-no*, capital of the Swiss canton of the Ticino, near Lake Maggiore, 8 miles from Belinzona. *Pop.* 3,000.

LOCCUM, *lok′-kum*, a market-town of Hanover, 26 miles from Hanover. *Pop.* 2,000.

LOCH BROOM, *broom*, an extensive arm of the sea, running between the counties of Cromarty and Ross. It contains numerous islands. *Lat.* 58° N. *Lon.* 5° 15′ W.—There is a parish of the same name in Rossshire. *Pop.* 5,000.

LOCHABER, *lok-a′-ber*, a district of Scotland, in Inverness-shire. It is wild and mountainous, and has in its neighbourhood lochs Leven, Linnhe, and Eil.

LOCHAR MOSS, *lok′-ar*, a bog or morass in Dumfriesshire, Scotland, beginning at the Solway Firth, and running into the parish of Dumfries. *Ext.* 10 miles long, with a breadth of from 2 to 3.

LOCHES, *losh*, a town of France, in the department of the Indre-and-Loire, 24 miles from Tours. *Manf.* Principally woollens. *Pop.* 3,500.

LOCHGILPHEAD, *lok-gilp'-hed*, a village of Argyleshire, Scotland, 20 miles from Inverary. It stands on Loch Gilp, a branch of Loch Fyne. *Pop.* 2,000.—It has steam communication with Glasgow.

LOCHIE, *lok'-e*, a town of Forfarshire, Scotland, 2 miles from Dundee. *Pop.* 4,000.

LOCHMABEN, *lok-ma'-ben*, a parish and royal burgh of Scotland, in Dumfriesshire, 8 miles from Dumfries. It has a town-house and a church. *Pop.* 3,000.

LOCHNAGAR, *lok-na-gar'*, one of the Grampian Hills, in Aberdeenshire, Scotland. *Height*, 3,777 feet above the level of the sea. It is celebrated in Byron's song of "Loch-na-gar."

LOCHWINNOCH, *lok-win'-nok*, a parish of Scotland, in Renfrewshire. *Pop.* 4,130, partly employed in the manufacture of cotton goods. In this parish is a magnetic rock, also the lake of Castle Semple, which covers an area of 200 acres.

LOCHY, *lok-e'*, a river of Scotland, in Perthshire, which, after a course of 15 miles, falls into Loch Tay.—Also one in Inverness-shire, falling into the sea near Fort William.—Also a LAKE, forming one in the chain of the Great Caledonian Glen. *Ext.* 9 miles long, by 1 broad.

LOCK, Matthew, *lok*, an eminent English composer, who set the music to "Macbeth," the instrumental music to the "Tempest," and wrote many other excellent pieces. He is also stated to have composed the music for the public entry of Charles II. into London. B. at Exeter, about 1635; D. 1677.

LOCKE, John, a celebrated English philosopher, who was educated at Christ Church, Oxford. After taking his degree in arts, he entered on the study of physic; but, making the acquaintance of Lord Ashley, afterwards earl of Shaftesbury, who became his patron, and urged him to apply to the study of politics, Locke followed his advice, and rendered himself serviceable to his lordship and his party, who, having obtained the grant of Carolina, employed him in drawing up the constitution for the government of that province. Lord Shaftesbury being appointed chancellor in 1672, made Locke secretary of presentations, which place he lost the year following, when his patron was deprived of the great seal. He continued, however, his secretaryship of the Board of Trade, of which Lord Shaftesbury was president. In 1674 that commission was dissolved, and Locke, being apprehensive of consumption, went to Montpellier, and continued abroad till 1679, when he was sent for by Lord Shaftesbury, who was appointed president of the council; but, in 1682, that nobleman, to avoid a prosecution for high treason, withdrew to Holland, and was accompanied by his friend. In 1684, Mr. Locke was removed from his student's place at Christ Church, by the king's command; and, the year following, the English envoy demanded him of the States of Holland, on suspicion of his being concerned in Monmouth's rebellion, which occasioned him to keep private several months, during which he was employed in finishing his "Essay on Human Understanding," which, however, was not published till after the revolution of 1688, when he returned to England. He spent the latter years of his life at Oates, in Essex, the seat of Sir Francis Masham, who invited him to reside in his family. His "Letters on Toleration" were published to promote the scheme which King William had so much at heart,—of reconciling all sects of Christians. In his retirement he also wrote several of his works. His principal works are an "Essay on Human Understanding," "Letters on Toleration," "Treatise on Civil Government," "Thoughts concerning Education," and letters and miscellaneous pieces. B. at Wrington, near Bristol, 1632; D. 1704.

LOCKE, Joseph, an English civil engineer. He studied under George Stephenson, the eminent railway engineer, and acted as one of his assistants during the construction of the Manchester and Liverpool Railway. He was subsequently extensively employed as engineer of various railways, both in England and on the continent of Europe. The Paris and Rouen, Rouen and Havre, Paris and Lyons, Caen and Cherbourg, Barcelona and Mattaro, the Dutch, Rhenish, and several other lines, were constructed under his auspices. In 1847 he was returned to parliament as member for Honiton; whereupon he took his place among the liberals. He was a fellow of the Royal Society, and vice-president of the Institution of Civil Engineers. B. at Attercliffe, near Sheffield, 1805; D. 1860.

LOCKERBIE, *lok'-er-be*, a town of Scotland, in Dumfriesshire, 12 miles from Dumfries, noted for having the largest lamb-fair in Scotland. *Pop.* 2,000.—It has a station on the Carlisle and Glasgow Railway.

LOCKHART, John Gibson, *lok'-hart*, a modern English writer, author of the "Life of Sir Walter Scott," and other valuable contributions to literature. He was the son of a minister of the Presbyterian Church of Scotland, and was educated at Glasgow university, and afterwards at Balliol College, Oxford. After a short sojourn in Germany, he went to Edinburgh in 1816, intending to practise the law at the Scottish bar. He soon, however, became a prominent member of a small band of Scotch writers, whose chief was Wilson. In 1817, on the establishment of "Blackwood's Magazine," Lockhart was one of its principal writers. The Toryism of the new periodical, and of its writers, caused both to become especial favourites with Sir Walter Scott, whose political views were of the same nature. Lockhart, in a short time, became an intimate friend of the great novelist, who advanced his interests on every occasion. In 1820 he married Sophia, eldest daughter of Scott, and went to reside near Abbotsford. During the succeeding five years he worked with great industry and success in literature. He produced, among others, "Valerius, a Roman story;" "Adam Blair, a story of Scottish Life;" the "Life of Burns," the "Life of Napoleon;" and published his translations of the Spanish Ballads. In 1826 he became editor of the "Quarterly Review," and retained the appointment until 1853. In biography and biographical sketches he was particularly excellent, as is attested by his "Life of Scott," and the smaller piece, entitled "Theodore Hook." His health becoming delicate, he resigned the editorship of the "Quarterly Review," and went to Rome in 1853; but, after a short stay, he took up his residence in Scotland. B. at Cambusnethan, Scotland, 1794; D. at Abbotsford, 1854.

LOCKPORT, *lok'-port*, a township of the United States, in N. York, 20 miles from Buffalo. It is the capital of the county of Niagara, and stands on the Erie Canal. *Manf.* Woollens and cottons. *Pop.* 13,000.

LOCKWOOD, *lok'-wood*, a township of the West Riding of Yorkshire, 2 miles from Huddersfield. *Pop.* 5,500. —It has medicinal waters.

LOCKYER, Nicholas, *lok'-yer*, a Puritan divine, who was chaplain to Cromwell, and provost of Eton College; but, at the Restoration, he was ejected from that place and from a living in the city. D. 1684.

LOCLE, LE, *lokl*, a town of Switzerland, on the French frontier, 10 miles from Neufchatel. *Manf.* Watches and lace. *Pop.* 9,000.

LODEINOJE-POLE, *lo-dai-no'-je-pole*, an inland town of Russia, on the Svir, 32 miles from Olonetz. *Pop.* 1,000.—Here the nucleus of the Russian navy was formed by Peter the Great.

LODÈVE, *lo-daiv'*, a town of France, in the department of Herault, on the Lergues, 30 miles from Montpellier. Its streets are narrow and ill built. *Manf.* Cloth, silk stuffs, and hats. *Pop.* 12,000.

LODGE, Thomas, *lodj*, an English author of the 16th century. The records of his life are very obscure, but he is believed to have been, in turns, lawyer, soldier, physician, and author. He was an industrious writer, and translated the works of Josephus and Seneca. Two of his plays have been preserved in Dodsley's Collection. In 1840 Mr. Collier, in his book entitled "Shakspere's Library," reprinted his novel "Rosalynde;" whence it was seen that many of its leading incidents were identical with those in Shakspere's "As you like it," the great poet, and not the obscure novelist, being, however, the borrower. B. about 1556; D. it is supposed of the plague, 1625.

LODI, *lo'-de*, a well-built town of Austrian Italy, on the Adda, 20 miles from Milan. Its cathedral and numerous convents claim the attention of the traveller. The most remarkable of its churches is one painted partly in fresco and partly in oil, by Callisto, a scholar of Titian. It is the see of a bishop, the seat of a gymnasium, has many churches, an hospital, a theatre, a public library, and numerous schools. *Manf.* Silk,

porcelain, linens, chemicals; and it has an active trade in Parmesan cheese, on account of which an immense number of cows are fed in the vicinity. *Pop.* 20,000.—This place was founded by the emperor Frederick I., in 1158. In 1796 the bridge of Lodi was carried by Bonaparte, in a most daring manner, with the bayonet, and a decisive victory gained over the Austrians.

Lodi Vecchio, or Old Lodi, *vek'-ke-o*, lies 4 miles to the W. of Lodi, and was founded by the father of Pompey the Great. In 1111 it was almost destroyed by the Milancse. *Pop.* 3,000.

Lodomeria. (*See* Galicia.)

Lofoden, *lo-fo'-den*, a group of islands within the Arctic Circle, in the North Sea. During the fishing season, they are visited by an immense number of boats from the coasts of Norway and Finmark. They are exposed to severe tempests, and near the S. of the group is the Maelstrom, a dangerous whirlpool, occasioned by the swell of the ocean during the N.W. winds. *Pop.* 4,000. *Lat.* between 67° 30′ and 69° 30′ N. *Lon.* between 12° and 17° E.

Logan, John, *log'-an*, a Scotch divine and poet, who, in 1781, published the "Philosophy of History," which he had delivered as lectures at Edinburgh. The same year he printed his poems in one volume. His last publication was a pamphlet, entitled, "A Review of the Principal Charges against Mr. Hastings," for which the publisher was tried and acquitted. B. in Scotland, 1748; D. in London, 1788.

Logan, a river of Scotland, in Lanarkshire, falling into the Nethan.

Logan, several counties:—1. In the S.W. part of Kentucky, U.S. *Area*, 600 square miles. *Pop.* 17,000. —2. In Ohio. *Area*, 440 square miles. *Pop.* 20,000.— 3. In Virginia. *Area*, 700 square miles. *Pop.* 5,000.— 4. In Illinois. *Area*, 540 square miles. *Pop.* 6,000.— Also the name of several townships with small populations.

Logan Mountains separate the sources of the river Darling from those of the Logan, in E. Australia. *Lat.* 28° S. *Lon.* 152° E.

Loggan, David, *log'-gan*, an eminent line-engraver, who went to London during the Commonwealth, and settling there, was extensively employed. His plates of the colleges of Oxford and of Cambridge were excellent specimens of art. During the reign of Charles he engraved nearly all the illustrious personages of the time. B. at Dantzic, 1635; D. in London, 1693.

Loggun, *log-goon'*, a country of Africa, lying to the S. of Lake Tchad. *Desc.* Fertile, with a healthy climate. Its inhabitants are celebrated for their skill in the manufacture and dyeing of cotton goods. *Pop.* Unascertained.

Logie, *lo'-ge*, the name of several parishes in Scotland, none of them with a population above 3,000.

Logrono, *lo-grone'-yo*, a town of Spain, in the province of Burgos, on the Ebro, 60 miles from Burgos. It has several churches, convents, an hospital, and a theatre. *Manf.* Leather and hats. *Pop.* 7,000.—In 1808 and 1823 it was taken by the French, being of importance as a military post.

Loharoo, *lo-ha-roo'*, a district of India, subject to the N.W. Provinces. *Area*, 200 square miles. *Pop.* 20,000. *Lat.* between 28° and 28° 50′ N. *Lon.* between 75° and 76° E.

Lohr, *lore*, a town of Bavaria, on the Maine, 20 miles from Wurtemberg. *Manf.* Paper; and there are some iron-works. *Pop.* 4,000.

Loing, *lwing*, a river of France, rising at St. Colombe, in the department of Yonne, and, after a course of 70 miles, falling in the Seine at Moret.

Loir-and-Cher, *lwaw, shair*, a department of France, including the southern portion of the province of Orléannois. *Area*, 2,360 square miles. *Desc.* Generally level, and containing numerous lagoons. It occupies a portion of the basin of the Loire, and is watered by that river, the Loir, the Cher, the Cosson, and the Beuvron. *Pro.* Wine, hemp, fruit, and grain. Sheep and horses are reared, and are both numerous and excellent. *Manf.* Woollens, leather, glass, cottons, beetroot sugar, paper, and gloves. *Pop.* 263,000.

Loire, La, *lwaw*, a river of France, rising in the mountains of the Cevennes, at an elevation of 3,940 feet, and, after a course of upwards of 500 miles, falling into the Bay of Biscay, about 40 miles below Nantes. It is connected by canals with the Seine, Saône, and the Vilaine.

Loire, a department of France, adjoining the departments of the Rhone and the Isère. *Area*, 1,920 square miles. *Desc.* Generally mountainous, being partly traversed by the Cevennes, and partly by the mountains of the Forez. *Rivers.* The Loire and its affluents. *Pro.* Corn, potatoes, chestnuts, and hemp; it also produces wine, and silkworms are extensively reared. *Minerals.* Coal, iron, granite, marble, flint, and porphyry; there are also some excellent mineral springs. *Manf.* Silk, iron and steel goods, glass, cottons, laces, paper, cloths, and leather. *Pop.* 475,000.

Loire, a town of France, in the department of the Rhone, 14 miles from Lyons. *Pop.* 1,500.

Loire, Haute, or Upper, a department in the S.E. of France, situate to the south of the preceding, and adjoining the departments of Puy-de-Dôme, the Ardèche, and the Lozère. *Area*, 1,920 square miles. *Desc.* Mountainous, with Mont Mazan, 5,793 feet high, of the Cevennes, for its culminating point. The soil is generally unfertile, and agriculture in a backward state. *Pro.* Corn and potatoes; some wine is produced, but it is of inferior quality. Bees are kept, and silkworms extensively reared. *Minerals.* Coal, gypsum, antimony, building-stone, and potter's clay. *Manf.* Lace, silks, paper, and leather. *Pop.* 305,000.

Loire Inférieure, or Lower, a department in the W. of France, formed of the S.E. portion of the ancient province of Brittany, and bounded by the Atlantic and the departments of the Ille-and-Vilaine, Maine-and-Loire, Vendée, and Morbihan. *Area*, 2,730 square miles. *Desc.* Level generally. *Rivers.* The Loire, Brivé, Erdre, Vilaine, Acheveau, Ognon, Maine, and Moin. Lagoons are numerous, and that of the Grand Lieu is the largest in France. *Pro.* Grain and pale wines. Bees are largely kept, and cattle are extensively reared. *Minerals.* Coal, iron, salt, and turf. *Pop.* 536,000.

Loiret, *lwaw'-rai*, a river of France, rising 2 miles from Orleans, and, after a course of 10 miles, joining the Loire near Orleans.

Loiret, a department in the N.W. of France, comprising a portion of the *ci-devant* Orléannois and the Gatinois, and bounded by the departments of the Seine-and-Oise, the Seine-and-Marne, the Yonne, the Cher, the Loir-and Cher, and the Eure-and-Loir. *Area*, 2,640 square miles. *Desc.* Level, and watered by the Seine and its affluents. *Pro.* Grain, wine, saffron, lint, and timber. Apples are largely cultivated; bees and fowls are abundant; and the herds of sheep and cattle are excellent. *Manf.* Cloths, woollen caps, cottons, leather, paper, pottery, and beet-root sugar. *Pop.* 342,000.

Lokeren, *lo'-ker-en*, a town of Belgium, in East Flanders, on the Darme, 12 miles from Ghent. *Manf.* Woollens, cottons, and tobacco. It also has a trade in corn, flax, and linen. *Pop.* 17,000.

Lokhvitza, *lok-vitz'-ka*, a town of Russia, 80 miles from Poltawa. *Pop.* 6,000.

Lokman, *lok'-man*, an Abyssinian philosopher, of whom hardly any authentic particulars are known. He appears to have been of low origin, and some say he was a slave. It is related that he obtained his liberty on the following occasion. His master having given him a bitter melon to eat, he ate it all. Surprised at his exact obedience, his master asked how it was possible for him to eat such a nauseous fruit? The slave replied, that he had received so many favours from the kindness of his master, that it could be no wonder if, once in his life, he ate a bitter melon from his hand. This generous answer immediately procured him his liberty. There are so many circumstances related of him that agree with what is said of Æsop, and their fables are so much alike, that both are conjectured to have been one and the same person. Lokman's Fables were printed in a collection by Galland, at Paris, in 1724.

Lollard, Walter, *lol'-lard*, the founder of a religious sect in Germany, about 1315. After gaining many followers on the continent, he went to England, where he also had numerous disciples. The Lollards were, according to some, grossly licentious and heretical; but as to this we have only the testimony of their enemies. Lollard himself was burnt at Cologne in 1322.

Lombard, John Louis, *lom'-bar*, an eminent French writer on military tactics. He was educated for the

legal profession, but quitted it to become professor of artillery, first at Metz, and afterwards at the military school of Auxonne. He translated into French "Robins's Principles of Gunnery," and wrote, "Aide Mémoire," for the use of French artillery officers; "Treatise on the Flight of Projectiles," &c. B. at Strasburg, 1723; D. 1794.

LOMBARDO-VENETIAN KINGDOM, *lom-bar'-do*, the name given, after the congress of Vienna, in 1815, to the whole of Austrian Italy, comprising both Lombardy and the former Venetian territory. *Area*, 18,063 square miles. *Desc.* It may be regarded as a vast plain, situate in the basin of the Adriatic, having on the N. Switzerland and the Tyrol; on the E. the Adriatic and Illyria; on the W. Piedmont; and on the S. the Pontifical States, Modena, and Parma. *Rivers.* The Po and its affluents, all of which fall into the Adriatic. *Lakes.* The finest of N. Italy are comprised within its boundaries, and Lago Maggiore forms its W. limits. *Pro.* Maize, wheat, rye, oats, barley, hemp, and flax; cheese is largely made, and wine is manufactured. *Minerals.* Iron, coal, copper, lead, arsenic, marble, alabaster, clay, and precious stones. *Manf.* Silks, cottons, cloth, glass, pottery, and paper. *Religion.* Catholic. *Pop.* 5,000,000. *Lat.* between 44° 47′ 10″ and 46° 40′ 25″ N. *Lon.* between 8° 33′ and 13° 43′ E.—This kingdom was formed in 1814, and recognized by the congress of Vienna. From 1848 to 1853 it was in a state of siege, and, by the treaty of Zurich, signed in November, 1859, Lombardy was made over to Piedmont by Austria, Piedmont incurring the obligation of a debt of £10,000,000. (*See* ITALY.)

LOMBARDY, *lum'-bar-de* (Ital. LOMBARDIA, *lom-bar-de'-a*), a country of Northern or Upper Italy. The name, though properly applicable only to the vale of the Po, is commonly given to the whole tract of country between the frontiers of Switzerland and Tuscany. It is the country of the Lombards, or Longobards, and forms the W. part of the Lombardo-Venetian kingdom, the E. part of Piedmont, and Modena and Parma.

LOMBLEM, *lom'-blem*, an island of the Malay archipelago, lying to the E. of Flores. *Ext.* 40 miles long, with a breadth of 16. *Pop.* Unascertained. *Lat.* 8° 20′ S. *Lon.* 123° 40′ E.

LOMBOCK, *lom'-bok*, an island of the Malay archipelago, separated from the island of Bally by the Straits of Lombock, and from the Sumbawa by the Straits of Allas. *Area*, estimated at about 1,400 square miles. *Desc.* A well-watered plain, lying between two ranges of mountains running along the N. and S. coasts. *Pro.* Rice, coffee, and maize. *Pop.* estimated at 250,000. *Lat.* between 8° 12′ and 9° 1′ S. *Lon.* between 115° 44′ and 116° 40′ E.

LOMMATSH, *lom-matsh'*, a town of Saxony, 20 miles from Dresden. *Manf.* Woollens, linens, leather, and tobacco. *Pop.* 3,000.

LOMMEL, *lom'-mel*, a village of Belgium, in North Brabant, 20 miles from Hassalt. *Pop.* 2,300.

LOMNITZ, *lom'-nitz*, the name of several towns in Germany, none of them with a population of more than 3,000.

LOMOND, LOCH, *lo'-mond*, a lake of Scotland, in Dumbartonshire, remarkable for the picturesque scenery on its shores. It is 16 miles from Glasgow, and is the largest lake in Scotland. *Ext.* Upwards of 20 miles long, with a breadth of between 7 and 8 at its widest points. It contains 30 islands, and receives several rivers. The river Leven carries off its own superfluous waters, and discharges them into the Firth of Clyde. It is overlooked by BEN LOMOND, which attains an elevation of 3,190 feet above the level of the sea.

LOMONOSOV, *lo'-mo-no-sof'*, a Russian poet, and the father of modern Russian literature, was son of a fisherman, and, having fled from his father, he took refuge in a monastery, where he received his education, which he afterwards improved at a German university. In 1741 he returned to his native country, and became member of the Academy of Petersburg, and professor of chemistry. In 1761 he was honoured with the title of councillor of state. The odes of Lomonosov are greatly admired for originality of invention, sublimity of sentiment, and energy of language; and compensate for the turgid style which, in some instances, has been imputed to them, by that spirit and fire which are the principal characteristics in this species of composition. Pindar was his great model. He enriched his native language with various kinds of metre. His works, in 3 vols. 8vo, consist of pieces in verse and prose, the last being chiefly philosophical dissertations. B. near Kholmazar, Russia, 1711; D. 1765.

LOMZA, *lom-za'*, a town of Poland, 70 miles from Sawalki. *Manf.* Paper; and it has an arsenal. *Pop.* 3,500.

LONADO, or LONATO, *lo-na'-to*, a town of Austrian Italy, in the Milanese, 13 miles from Brescia. It is defended by a citadel, and remarkable as the scene of a victory gained by Napoleon I. over the Austrians, in 1796.

LONDA, *lone'-da*, a town of Tuscany, 17 miles from Florence. *Pop.* 2,000.

LONDERZEEL, *lone'-dair-zail*, a town of South Brabant, 12 miles from Brussels. *Pop.* 4,500. It is a station on the railway between Ghent and Mechlin.

LONDINIÈRES, *lon-din'-e-air*, a market-town of France, 8 miles from Neufchatel. *Pop.* 1,000.

LONDON, *lun'-dun*, the capital of England, and the metropolis and seat of government of the British empire. The most usual acceptation of the word "London" comprises the ancient city proper of that name, the city of Westminster, the borough of Southwark, and their respective suburbs. The cities of London and Westminster are situate in the county of Middlesex, on the northern bank of the river Thames; and the borough of Southwark is on the southern bank, in the county of Surrey. To each of these principal divisions of London many neighbouring villages have been successively annexed, and some of these suburbs are situate in Essex, and others in Kent. The opposite banks are connected by nine bridges. The length of the metropolis from Limehouse on the E. to Kensington on the W. is 7½ miles; but it may be considered to extend, in reality, from Plumstead to Hammersmith. The breadth, from Holloway to Camberwell, is said to be nearly 12 miles, and the circumference of the whole cannot be less than 30 miles. On the Surrey side, the length may be taken from Woolwich to Walworth, as these places are now nearly joined together. The united area of London city, Westminster city and liberty, Finsbury, Marylebone, Tower Hamlets, Southwark, and Lambeth, is 31,498 acres. There is strong reason to believe that London was the *Civitas Trinobantum* of Cæsar. In 610 a church was erected on the site of the present cathedral of St. Paul, and a Witenagemote, or council of wise men, was held here in 833. It was afterwards constituted, by Alfred the Great, the capital of England. In 925 King Athelstan had a palace in it, and, during successive reigns, the dimensions of the city were gradually extended. The White Tower, in the Tower of London, was erected by William I. in 1078; and William Rufus, in 1097, founded Westminster Hall. In 1255 a conduit in Cheapside was supplied with water by leaden pipes, and in 1340 tolls were imposed for paving the streets in and near the city. The streets were first lighted with lanterns in 1416; and, in 1443, the supply of water being found insufficient, pipes were laid from Paddington. A statute was passed in 1542, for paving some of the streets; and it appears that the Strand was then only partly built. So rapid now became the increase of London, that Queen Elizabeth and King James each issued proclamations against any farther extension of the city. About 1661 a great many streets in St. James's parish were built, and finished, particularly St. James's Street, Pall Mall, and Piccadilly; and other streets ordered to be widened. In 1665 London was almost desolated by the great plague; and, in the following year, a dreadful conflagration broke out, and destroyed 13,000 houses, and most of the churches and corporation halls. In rebuilding the city, many important improvements were effected, by the widening of the streets, and by constructing the houses of more substantial materials. In 1685 Spitalfields and St. Giles's were much increased by the French Protestant manufacturers, who left their native country in consequence of the revocation of the edict of Nantes. In 1689 the district called the Seven Dials was built, and the suburbs to the east of the Tower were also greatly ex-

tended. Soho Square was built at the close of that century, and, in a few years afterwards, Hanover Square, Cavendish Square, and the streets adjacent Bedford Row, Red-Lion Square, Hatton Garden, &c. were finished. The streets from Leicester Square to St.-Martin's Lane north, and to the Haymarket and Soho west, and thence nearly to Knightsbridge, were added in the reign of George I., or early in that of George II. In 1730 two new parishes were formed, St. George, Bloomsbury, and St. Anne, Limehouse; and, about the same time, the north side of Oxford Street was partly built, and many streets near it were completed. The extension of the metropolis since the middle of the last century has proceeded with unprecedented rapidity, and covered the fields, gardens, and marshes in the vicinity with new squares and streets. For some years after 1810, the progress of building appeared to be checked. But latterly the metropolis has again been greatly extended, particularly on the north side. The direction of the main streets accompanies the course of the river Thames from east to west; and the cross streets run mostly in a transverse direction from north to south. There are two chief lines of streets from west to east; one, which may be called the northern line, commences at the north side of Hyde Park, and, under the successive names of Oxford Street, St. Giles's, Holborn, Skinner Street, Newgate Street, Cheapside, Cornhill, and Leadenhall Street, is continued to Whitechapel and Mile-end, on the Essex road. The southern line commences at the south side of Hyde Park, and consists of Piccadilly St.-James's Street, Pall Mall, Charing Cross, the Strand, Fleet Street, Ludgate Hill, St. Paul's Churchyard, Cannon Street, and Tower Street; whence, crossing Tower Hill, it may be said to be further extended two miles along the river-side, in Wapping. One of the great features of London are the parks. These are six in number;—Hyde Park, which is the largest and most fashionable; St. James's Park; the Green Park; Regent's Park, in the north; Victoria Park, in the east; and Battersea and Kennington Parks, on the south. Besides these, there are Kensington Gardens, with which Hyde Park communicates at several points. The subterranean works, which have been constructed for the accommodation of the inhabitants of London, consisting of sewers, drains, water-pipes, and gas-pipes, are most extensive and curious. The houses are mostly built of brick, and the principal squares are Belgrave, Eaton, Grosvenor, Portman, Berkeley, St. James's, Hanover, Cavendish, Bedford, Russell, Bloomsbury, Tavistock, Euston, Brunswick, Finsbury, and Lincoln's-Inn Fields. The principal public structures in the metropolis, east of Temple Bar, are the Tower, the Mint, the Trinity-house, the Bank, the Mansion-house, the Royal Exchange, the East-India House, the Auction Mart, the Commercial Mart, the Custom-house, the Excise-office, Guildhall, the bridges of London, Southwark, and Blackfriars; the Monument, the Post-office, Whitecross Street prison, St. Luke's Hospital; the churches of St. Paul's, St. Stephen's, Walbrook, St. Mary-le-Bow, and St. Bride's, Fleet Street. The markets are numerous; comprising Covent Garden and Farringdon, for fruits and vegetables; Leadenhall, for poultry; Hungerford and Billingsgate, for fish; and the New Market, built on the site of Copenhagen Fields, in the north, for meat. The White Tower was erected by William the Conqueror for the purpose of intimidating the citizens, and the other buildings and fortifications have been added to it at different periods. The whole is surrounded by a ditch, and divided from the river by a wharf, on which is a platform, mounted with cannon. The Tower was inhabited as a palace by several English sovereigns, till the reign of Queen Elizabeth. Since her time it has been chiefly used as a state prison and depository for arms, records, and property belonging to the Crown. It contains the ordnance-office, the record-office, the jewel-office, the horse-armory, the Spanish armory, the grand storehouse, the small armory, barracks for the garrison, &c. The Trinity-house, a naval establishment, is a very handsome building on the north side of Great Tower-Hill. A noble pillar, 202 feet high, called the London Monument, stands on the east side of Fish-Street Hill. It was erected by Sir Christopher Wren, to commemorate the great fire of 1666. The cathedral church of St. Paul holds the most distinguished rank among the modern works of architecture in the British empire. The first stone was laid June 21st, 1675, and the last in 1710; the work being completed in 35 years, by one architect, Sir Christopher Wren. The plan is a Latin cross, with an additional arm or transept at the west end, and a semicircular projection at the east end, for the altar. A dome rises from the intersection of the nave and transept, and is terminated by a lantern, surmounted by a ball and a cross, of copper gilt. The dimensions of this vast fabric are 510 feet long, 250 broad, and, with the dome, 370 feet high. The entire ascent to the ball is by 616 steps. This cathedral contains monuments erected to the memory of many eminent persons deceased, and cost £747,974. Besides St. Paul's, London comprises a vast number of churches, with towers and spires in almost every style of architecture. The inns of court are the Inner and Middle Temple, Lincoln's Inn, and Gray's Inn. Each of these is composed of several large houses, surrounding squares, and which are divided into numerous sets of chambers, inhabited by barristers, students, attorneys, and solicitors. The principal public buildings west of the city, exclusive of the royal palaces and houses of the nobility, are Westminster Abbey, Westminster Hall, the seat of the king's courts of record,—viz., the courts of Chancery, Exchequer, King's Bench, and Common Pleas; the House of Lords and House of Commons; the Horse-guards, or War-office; the Admiralty; the Treasury; the offices of the secretaries of state; Somerset House, a grand and extensive stone building in the Strand, appropriated to various public uses and offices; the Penitentiary-house, Millbank; the court of insolvent debtors; the Opera-house; the theatres of Covent Garden, Drury Lane, the Haymarket, and others. The British Museum is a noble building, with a magnificent reading-room, recently opened for the benefit of those engaged in literary pursuits. It is in Great Russell-Street, Bloomsbury. The most remarkable churches in this direction are those of St. George, Hanover Square, and St. Marylebone. Southwark contains the county gaol for Surrey, Guy's Hospital, St. Thomas's Hospital, the Magdalene Hospital in Blackfriars Road, and the new Bethlem Hospital for lunatics, erected in St. George's Fields, on the demolition of the old hospital in Moorfields. The bridges which unite the divisions of the metropolis, built on the opposite banks of the Thames, are London Bridge, till the middle of the 18th century the only bridge connecting the Middlesex and Surrey banks; Westminster, which is being erected to replace the old one of the same name; Blackfriars, and Waterloo, one of the noblest structures of the kind in the world: it was begun in the year 1811 and opened in 1817, on the anniversary of the battle of Waterloo. It consists of nine equal arches, each of 120 feet span; the piers are 20 feet thick, and adorned with Tuscan columns; the width within the parapets is 42 feet. It cost upwards of £1,000,000, which was raised by subscription. Hungerford Suspension-bridge, which, while we write (1860), is being removed, to be replaced by another, destined for railway travelling; Southwark Bridge, uniting Bankside, Southwark, with Queen Street, Cheapside; Vauxhall Bridge, crossing the Thames from Millbank to Vauxhall; Chelsea Bridge, a new bridge near to old Battersea Bridge, recently erected to unite the Battersea side of the river with the Chelsea side. Two miles below London Bridge is Thames Tunnel, which was commenced in 1825, by Sir Isambard Brunel as the engineer, and opened in 1846. The public charities of London (exclusive of parochial establishments) are numerous, and apply to every case of infirmity or distress. Among these may be named St. Bartholomew's, St. Thomas's, and Christ's hospitals. St. Bartholomew's, in Smithfield, and St. Thomas's, in Southwark, were appropriated to relieve the diseased; and Christ's Hospital to maintain and educate the young and helpless. The other hospitals are Bethlem, the Charter-house, near Smithfield; Guy's, built by Thomas Guy, bookseller, in 1701, and endowed by him with £240,000, at his death; St. Luke's; the Foundling Hospital, in Guildford Street; St. George's Hospital, near Hyde-Park Corner; the London Hospital, Whitechapel; the Middlesex Hospital, Berners Street;

the Westminster Hospital; and several others; with numerous dispensaries, establishments, and houses for the benefit of the poor and the afflicted, as well as the unfortunate. There is no city in the world where charity of every description is dispensed with such a liberal hand as in London. The lord mayor, aldermen, and common council, form the court of common council, which constitutes the legislature of the city, to frame all laws for its internal government. The lord mayor is the chief magistrate in the city, and the aldermen are perpetual justices of the peace for the city, and the chief magistrates in their respective wards. The other principal executive officers of this corporation, are the recorder, common serjeant, town clerk, and two sheriffs. Since 1837, London has been the seat of a university, with which many colleges throughout the country are connected. The literary and scientific institutions are numerous: among these may be mentioned, the Royal Society, incorporated 1663, under the presidency of Sir Isaac Newton; the Royal Geographical Society; the Society of Antiquaries; the Board of Agriculture; the Society for the Encouragement of Arts, Manufactures, and Commerce; the Royal Institution; the London, Surrey, and Russell institutions; the Linnæan Society, devoted to botany and natural history; the Philosophical Society of London; the British Mineralogical Society; the Entomological, Horticultural, Geological, Mathematical, Medical, Medical and Chirurgical, and City Philosophical societies. The British Museum is the grand national depository of antiquities, sculpture, natural and artificial curiosities, scientific collections, manuscripts, and printed books. It was established by act of parliament, in 1753, in consequence of the will of Sir Hans Sloane. Several institutions have been established for promoting the fine arts; namely, the Royal Academy, instituted in 1768, and chiefly indebted for its prosperity to its first president, Sir Joshua Reynolds; the British Institution, in Pall Mall, devoted to the exhibition and sale of pictures by modern artists. An annual exhibition of paintings is made at the Royal Academy. The National Gallery is in Trafalgar Square, where are also fountains, which frequently play, and several monuments erected to commemorate public men. There are other monuments of various kinds erected in various parts of the city. For musical performances there are the Opera-house, in the Haymarket, and the new building in Covent Garden; besides numerous public rooms, scattered throughout the metropolis. The theatres are also numerous, and the public gardens in the vicinity offer every kind of entertainment to the pleasure-seeking citizen. Newgate is the gaol of London and Middlesex, and is situate in the Old Bailey. There are, besides, various other prisons, as the Queen's Bench, for debtors sued in that court, and other persons confined under its sentences; the Marshalsea, in Southwark; the House of Correction for the county of Middlesex; the Penitentiary-house, Millbank, built for the purpose of changing the punishment of transportation for a term of years into confinement and labour; and various model prisons. London is also a vast emporium of maritime commerce, and its vessels trade to the remotest parts of the world. This is likewise immensely facilitated by a large number of railway termini. These are now, on the N. the Great Western, the North-Western, and the Great Northern. At the North-Western station there are, besides, the North London, the North and South-West Junction, and the North Union. On the S.E. the London, Brighton, and South Coast, the South-Eastern, and the London and Greenwich. On the S.W. the London and South-Western. On the E. the Eastern Counties, the Northern and Eastern, the London and Blackwall, in conjunction with the London, Tilbury, and Southend. The telegraphic communication is also very extensive; and it is in contemplation to tunnel the northern parts of the city, and erect a general central railway terminus in the City itself, that the intercourse with all parts of the kingdom may, by greater concentration, be rendered still more rapid and easy. At a very early period London became the seat of an extensive trade. From London Bridge down the Thames, for several miles, the space is occupied by her shipping. This space is divided into the upper, middle, and lower pools, and the space between Limehouse and Deptford. To provide further accommodation for her vessels, the West-India Docks were formed by a company, and opened in 1802. These docks are formed across the narrowest part of the Isle of Dogs, and comprise two docks, one of 30 acres, for unloading the ships arrived from the West Indies, and the other of 24 acres, for loading outward-bound ships. The London Docks were executed by similar means. This dock was opened in 1805, and is used for the general trade of the port. The East-India Docks are situate at Blackwall: the loading dock is 780 feet long and 520 wide, and the discharging dock contains 18½ acres. About 5,000,000 tons of shipping enter the port annually. *Manf.* These are of every kind; but consist chiefly of silk, cutlery, jewellery, watches, japan-ware, cut-glass, books, cabinet-work, carriages, and other fine goods and articles of elegant use. The southern bank of the Thames is lined with manufactories, such as iron-foundries, dye-houses, soap and oil manufactories, glass-houses, distilleries, hat-manufactories, &c.; and in many other parts are breweries, shipbuilders' yards, oil-cloth and paper manufactories, vinegar-works, and chemical manufactories on a large scale. The manufactures of silk in Spitalfields, and of watches in Clerkenwell, employ large numbers of workpeople. *Pop.* in 1851, 2,027,528. *Lat.* of St. Paul's Cathedral, 51° 30′ 49″ N. *Lon.* 0° 5′ 48″ W. of Greenwich Observatory.

LONDON, NEW, a county of Connecticut, U.S. *Area*, 550 square miles. *Pop.* 52,000.—2. A city, port of entry, and half-shire town, in New London county, Connecticut, on the Thames. Its harbour is one of the best in the States, and is defended by forts. *Pop.* 10,000. This place was, in 1781, burned by the British.

LONDONDERRY, or DERRY, *lun'-dun-der'-re*, a maritime county of Ireland, bounded S. by Tyrone, W. by Donegal, N. by the Atlantic Ocean, E. by the county of Antrim, from which it is separated by loughs Neagh and Beg. *Area*, 810 square miles. *Desc.* Mountainous in the centre and in the south, elsewhere generally low; but the appearance of the county is not uniform. *Rivers.* The Foyle, the Bann, and the Roe. *Pro.* Potatoes are the principal crop. In some parts oats, barley, wheat, and flax are cultivated, and rye on the higher soils. Poultry is abundant, and eggs are exported. *Manf.* Linen is the great staple of the county. *Pop.* 102,000. This county is almost wholly owned by the twelve London companies, to which it was granted by James I. after the rebellion of its chiefs. Hence the prefix of London to its ancient name.

LONDONDERRY, the capital of the above county, is pleasantly situate on the Foyle, 120 miles from Dublin. It contains, within the walls, four main streets, which cross at right angles, and form, with the smaller streets and lanes, a sort of parallelogram. The ground on which the town stands is hilly. The old walls, flanked with bastions, which were built in the year 1614, still remain in fine repair, and are an ornament to the place. The principal buildings are a cathedral, a Gothic structure, built in the year 1633, and having a tower and a spire 178 feet high; a bishop's palace, a deanery, various places of worship, schools, a mechanics' institute, gaol, an infirmary, a small theatre, a linen-hall, town-hall, district lunatic asylum, union workhouse, custom-house, and barracks, erected in honour of the Rev. G. Walker, who defended the city during its memorable siege. The wharfs and quays, with a good portion of the city, are without the walls. It has an extensive trade with the West Indies and America. The harbour is deep, wide, and tolerably secure. *Pop.* 20,000. *Lat.* 54° 59′ 6″ N. *Lon.* 7° 19′ W. This town is of great antiquity, and has often suffered from the effects of war. In 1688 it was besieged by King James from December, 1688, till August, 1689, when the siege was raised. It has steam communication with Glasgow and Liverpool, and railway communication with most parts of Ireland.

LONDONDERRY, Robert Stewart, second marquis of, a celebrated English diplomatist and minister, more generally known as Lord Castlereagh. He first entered the British parliament in 1794, but did not make his maiden speech until the following year. In 1796 he became Viscount Castlereagh, and, in the first parliament after the Union, he sat for the county

Down. During the Pitt and Addington administrations he was in office as either privy councillor, president of the Board of Control, or secretary of state for war and the colonies. In 1807 he joined the Portland ministry, and being generally believed as answerable for the conduct of the war, he became, after the disastrous Walcheren expedition, perhaps the most unpopular of public men. His policy led to a duel between himself and Mr. Canning, at that time secretary for foreign affairs, in which the latter was severely wounded. He resigned shortly afterwards, and remained out of office until 1812, when he received the appointment of secretary of state for the foreign department, and on the death of Mr. Perceval he became ministerial leader of the House of Commons. At the peace of Paris, May, 1814, he represented the king of England, as he also did at the congress of Vienna some months later, and again, in 1815, after the battle of Waterloo. For these duties his dignified person and manners peculiarly fitted him. In 1818 he was created knight of the Garter, and on the death of his father, three years afterwards, he became marquis of Londonderry. As a statesman, his views were narrow and unphilosophical; his oratory was unequal, sometimes approaching brilliancy, but often inelegant and involved; but his great talents for business, combined with his firmness and charm of manner, caused him to achieve higher things than more richly-gifted men. B. in Ireland, 1769; D. by his own hand, 1822.

LONDONDERRY, several townships of the United States, none of them with a population above 3,000.

LONG, LOCH, *long*, a branch of the Firth of Clyde, extending for 20 miles between Dumbartonshire and Argyleshire. It averages a breadth of between 1 and 2 miles.

LONG ISLAND, the name of various inconsiderable islands in the Eastern seas, in the West Indies, and the United States, and in other parts of the globe.

LONG ISLAND, an island belonging to the state of New York, U.S. It extends from the city of New York, in an easterly direction, to New-York Bay. *Ext.* 115 miles long and 20 broad. *Area*, 1,500 square miles. *Desc.* Level in the S., and hilly in the N. *Pop.* 215,000. On this island is Brooklyn, an important suburb of New York. (*See* BROOKLYN.)

LONG-ISLAND SOUND divides Long Island from Connecticut. *Ext.* 110 miles long, with a breadth ranging between 2 and 20.

LONG KEY, the name of several islands in the West Indies, in the Bay of Honduras, and one in the Bahama group, S. of Crooked Passage.

LONG NIDDRY, *nid'-dre*, a decayed village of Scotland, in the county of Haddington, 12 miles from Edinburgh.

LONGANNAT, *lon-gän'-nat*, a village of Scotland, in Perthshire, famous for an excellent quarry.

LONGBEARD, William, *long'-beerd*, a priest in the reign of Richard I., who excited an insurrection about 1196; and, by his eloquence, irritated the people against the government, for which he was torn in pieces by horses, with some of his companions.

LONGDON, *long'-don*, the name of several parishes in England, none of them with a population above 2,000.

LONGFELLOW, Henry Wadsworth, *long'-fel-lo*, an eminent American poet. While at Bowdoin College, he wrote verse for the "United States Literary Gazette;" and, although intended for the law, his tastes were, from the earliest period, decidedly literary. Accordingly, he eagerly embraced the proposal of making him professor of modern languages in his college, and set out for Europe in order to qualify himself for the post. He travelled in France, Germany, Italy, Spain, Holland, and England, and studied the language and literature of each country. He returned to his native country in 1829, and entered upon his duties; commencing his literary career about the same period, by contributing biography and criticism to the "North-American Review." His first important prose work was produced in 1835, with the title "Outre-Mer, or a Pilgrimage beyond the Sea." On the resignation of Mr. Ticknor, the professorial chair of modern languages and literature in Harvard University was offered to him; upon which he again visited Germany, and, on this occasion, extended his travels to Denmark, Sweden, and Switzerland. In 1836 he entered upon his duties at Harvard University, and soon afterwards gave to the world those works upon which his reputation chiefly rests. His prose romance "Hyperion" was published in 1840; "Kavanagh," a poetico-philosophical tale, in 1849. His poems were published in the following order:—"Voices of the Night," 1841; "Ballads," and translated verse, 1842; "Evangeline," 1847; "The Golden Legend," 1851; "The Song of the Hiawatha," 1855; "Miles Standish," 1859. Longfellow's verse is that of a polished and refined man; intensely national, he is yet imbued with a lofty appreciation of the great efforts of European genius. Göthe, Jean-Paul, and other German writers have had an especially marked influence on his writings. His sympathies are too universal to be bounded by mere nationality. If he has not the quaint beauty, the fine depth of thought of Tennyson, or the ruder power of Browning, he is nevertheless a true poet, and an ornament to modern literature. B. at Portland, Maine, United States, 1807.

LONGFORD, *long'-ford*, an inland county of Ireland, in Leinster, bounded W. by Roscommon, N. by the counties of Leitrim and Cavan, and E. and S. by Westmeath. *Area*, 420 square miles. *Desc.* Generally fertile, though much interspersed with bogs, mountains, morasses, and fens. *Rivers.* The Shannon forms the western boundary of the county. It is, besides, intersected by the Inny, the Camlin, and the Fallen, with numerous other inferior streams. *Lakes.* Lough Gawnagh is the largest. *Pro.* Oats, potatoes, and butter. Grazing-farms are numerous. *Pop.* 83,000.

LONGFORD, a town of Ireland, and capital of the above county, on the river Camlin, 40 miles from Sligo. It has a church, a Roman Catholic cathedral, county gaol, infirmary, and a barracks. *Pop.* 4,300.

LONGFORGAN, *long-for'-gan*, a parish of Perthshire, Scotland, 6 miles from Dundee. It includes a part of the Carse of Gowrie, celebrated in Scottish song. *Pop.* 2,000, employed in weaving and quarrying.

LONGINUS, Dionysius, *lon-ji'-nus*, a celebrated Athenian philosopher and rhetorician. He was related to Plutarch, and spent the early part of his life in travelling, after which he settled at Athens, where he taught the Platonic philosophy and rhetoric with great reputation; but was called thence by Zenobia, queen of Palmyra, to be tutor to her children. The queen was then at war with the emperor Aurelian, and, being defeated by him near Antioch, was compelled to shut herself up in Palmyra. The emperor summoned her to surrender, and she returned an answer, drawn up by Longinus, which filled him with anger; he laid siege to the city, which was surrendered to him A.D. 278. The queen and Longinus endeavoured to fly to Persia, but were overtaken and made prisoners. The queen, intimidated, laid the blame of vindicating the liberty of her country on its true author, and the brave Longinus was carried away to immediate execution. He composed critical remarks on the ancient Greek authors, but only a part of his inestimable "Treatise on the Sublime" exists. It has been many times translated into English.

LONGLAND. (*See* LANGELAND, Robert.)

LONGOBARDI, *lon'-go-bar'-de*, a maritime town of Naples, on the Mediterranean, 12 miles from Paola. *Pop.* 2,300.

LONGOBUCCO, *lon'-go-book'-ko*, a town of Naples, in the province of Calabria Citra, 20 miles from Cosenza. *Pop.* 9,000.

LONGUÉ, *lon'-gai*, a town of France, department of the Maine-and-Loire, 12 miles from Baugé. *Manf.* Linen cloth. *Pop.* 4,300.

LONGUS, *lon'-gus*, a Greek author, of whom we have four books of pastorals in prose, entitled "The Loves of Daphnis and Chloe," much admired for their elegance and simplicity. He is supposed to have lived about the 4th or 5th century.

LONGWOOD, *long'-wood*, a chapelry of England, in the W. Riding of Yorkshire, 2 miles from Huddersfield. *Pop.* 3,300.

LONGWOOD, St. Helena, the residence assigned to Napoleon I. in that island. (*See* ST. HELENA.)

LONGWY, *lawng'-ve*, a strongly fortified town of France, 32 miles from Metz. *Manf.* Cotton fabrics, distilleries, and tanneries. *Pop.* 3,500.—This is called the "iron

gate of France," and was, in 1792, taken by the Prussians, and again by the allies in 1815.

LONLAY L'ABBAYE, *lon'-lai lab'-bai*, a town of France, in the department of the Orne, 5 miles from Domfront. *Pop.* 4,000.

LONMAY, *lon'-mai*, a parish of Aberdeenshire, Scotland, 5 miles from Frazerburgh. *Pop.* 2,000.

LONS-LE-SAULNIER, *lawngs le(r) sole'-ne-ai*, a town of France, in the department of the Jura, on the Solvan, 50 miles from Dijon. Salt-works of considerable extent are established here, taking their origin from a salt-well, which is always full, and which was discovered in the 4th century. *Manf.* Bonnets and stockings. It has, besides, both tanneries and dye-works. *Pop.* 10,000.

LOOCHOO ISLANDS, *loo-tchoo'*, a group in the North Pacific Ocean, lying to the S. of Japan, and about 400 or 500 miles to the east of China. They consist of 36 islands, of which, however, only one, called the Great Loochoo, is of importance. *Ext.* About 65 miles long, with an average breadth of 15. *Desc.* The climate and soil seem to be among the happiest on the globe; the fruits and vegetable productions are of the most exquisite nature. The inhabitants are diminutive in their stature; they are, however, strong, well made, and athletic. Their disposition appears to be peculiarly gay, gentle, and amiable, though they evince a strong aversion to receive strangers into their country. The capital of Great Loochoo, and of the archipelago, is Kintching, situate about 5 miles from its port of Napakiang. *Pop.* Unascertained. *Lat.* 26° 14′ N. *Lon.* 127° 52′ 1″ E.

LOO CHRISTY, *loo kris'-te*, a town of the Netherlands, 5 miles from Ghent. *Pop.* 4,000.

LOODIANA, *loo'-de-a'-na*, a township of Hindostan, 110 miles from Lahore. It has a flourishing shawl-manufacture. *Pop.* 20,000.—In 1848 a hurricane swept over this place, and proved very destructive to human life.—A DISTRICT of British India, with an area of 720 square miles, and a population of 121,000 males only. *Lat.* between 30° 35′ and 31° N. *Lon.* 76° 25′ E.

LOOE, EAST and WEST, *loo*, a market, borough, and seaport-town of Cornwall, at the mouth of the river Looe, 20 miles from Launceston. *Pop.* 1,000.—West Looe has a population of 700. They are now only fishing-villages; but, in the reign of Edward III., E. Looe sent twenty ships to the siege of Calais.

LOONEE, *loo-ne'*, a river of Western India, rising in *lat.* 26° 37′ N., *lon.* 74° 46′ E.; and, after a course of 320 miles, falling into the Runn of Cutch, in *lat.* 24° 42′ N.; *lon.* 71° 11′ E.

LOPE DE VEGA. (*See* VEGA.)

LORCA, *lor'-ka*, a town of Spain, in the province of Murcia, on the Sangonera, 30 miles from Murcia. It is divided into the Upper and Lower town, of which the former has narrow, crooked, and ill-paved streets; the latter being regularly and neatly built. It contains several churches and monasteries, a bishop's palace, a college, and two hospitals. *Manf.* Saltpetre and linen cloth. *Pop.* 41,000. *Lat.* 37° 25′ N. *Lon.* 1° 22′ W.—This place was formerly, on account of its castle, considered the key of Murcia.

LORD HOOD'S ISLAND, in the Pacific Ocean. *Lat.* 21° 30′ S. *Lon.* 135° 33′ W.

LORD HOWE'S ISLANDS, a group in the Pacific Ocean. *Lat.* 5° 30′ S. *Lon.* 159° 24′ E.—The name of another group in the Pacific. *Lat.* 31° 30′ S. *Lon.* 159° 10′ E.—Also the name of one of the Society Islands.

LORENZO DE' MEDICI. (*See* MEDICI.)

LOREO, *lor'-ai-o*, a town of Italy, in the Venetian province of Rovigo, 26 miles from Venice. *Pop.* 3,200.

LORETO, *lo-rai'-to*, a town of Naples, 4 miles from Civita di Penare. *Manf.* Paper; and there are dye-works. *Pop.* 7,000.

LORETTO, *lo-rait'-to*, a fortified city of Italy, in the Pontifical States, 12 miles from Ancona, and not far from the influx of the Musone into the Adriatic. *Pop.* 8,000.—This place took its rise from a famous chapel to the Virgin, over which a magnificent church has been built. Its suburb, Monteresle, is more elegant than the city itself. There is a governor's palace and public fountains deserving of notice; but the sacred shrine is the principal object of attraction. Rosaries and relics for the use of pilgrims constitute the only trade of the place.

LORGUES, *lorg*, a town of France, in Provence, on the Argens, 6 miles from Draguignan. *Manf.* Woollen, linen, and hempen cloths. *Pop.* 5,000.

L'ORIENT, *lor'-e-a*, a fortified and regularly-built seaport of France, in the department of the Morbihan, on the bay of Port Louis, 28 miles from Vannes. The harbour is ample, secure, and of easy access, and bordered by fine quays, on which are large and commodious buildings. It has still some trade, particularly with the French colonies; and is a place of importance, on account of its magazines for the use of the imperial navy. *Manf.* Hats, gold lace, and earthenware; and it has an active trade and pilchard fisheries. *Pop.* 26,000.

LORRAINE, *lor-rain'*, an old province in the N.E. of France, lying between Champagne and Alsace, and now divided into the four departments of La Meuse, La Moselle, La Meurthe, and Les Vosges.

LORRAINE, Claude. (*See* CLAUDE.)

LORRAINE, Charles de Guise, called Cardinal de, was the son of the first duke of Guise, and was created archbishop of Rheims at the age of 15 years. A covetous and ambitious man, he enjoyed almost unlimited power under Henry II. and Francis II. He displayed considerable talent at the council of Trent, and at the conference at Poissy, in 1561. He was the author of some sermons, letters, and discourses. His efforts towards establishing the Inquisition in France were successfully resisted by the chancellor L'Hopital and the parliament. B. 1525; D. at Avignon, 1574.

LORRIS, William de, *lor'-re*, a French poet, who wrote the "Romance of the Rose." D. about 1260.

LOS, ISLES OF, *los*, a group, consisting of three, off the W. coast of Africa. They belong to England.

LOS ANGELOS, *ăn'-je-los*, a county of the United States, in Carolina. *Area*, 18,000 square miles. *Pop.* about 10,000.

LOSINI, *lo-se'-ne*, an island of Austria, in the Gulf of Quarnero, immediately to the S. of Cherso. *Ext.* 20 miles long, with a breadth of 3. *Pop.* Unascertained.

LOSSNITZ, *losse-nitz'*, a town of SAXONY, 50 miles from Dresden: it is inclosed by walls. *Manf.* Woollen and linen fabrics. *Pop.* 5,300.

LOSTOCK, *los'-tok*, a village of England, 6 miles from Bolton. *Pop.* 700.

LOSTWITHIEL, *lost-with'-el*, a borough and parish of Cornwall, of which it was formerly the capital, 5 miles from Bodmin. It has a trade in tanning and woolstapling. *Pop.* 1,200.

LOT, *lo*, a department in the south of France, corresponding to the old district of Quercy, in Guienne, adjacent to the departments of the Dordogne, the Aveyron, and the Upper Garonne. *Area*, 1,530 square miles. *Desc.* Mountainous and fertile. *Rivers.* The Lot and the Dordogne. *Pro.* Corn and fruit. Wine is abundant. *Manf.* Unimportant. *Pop.* 297,000.

LOT, a river of France, rising in Mont Lozère, and, after a course of 250 miles, joining the Garonne near Aiguillon.

LOT-AND-GARONNE, *ga-ron'*, a department in the south-west of France, bounded by the departments of the Dordogne, the Lot, the Gers, the Landes, and the Gironde. *Area*, 1,852 square miles. *Desc.* Fertile in general, but barren in the marshes and the districts termed "Landes." *Rivers.* The Garonne, the Lot, the Gers, and the Baise. *Pro.* Corn, chestnuts, prunes, and wine. *Manf.* Tobacco, brandy, vinegar, sailcloth, linens, woollens, cottons, and gloves. *Pop.* 312,000.

LOT, *lot*, the son of Haran, and nephew of Abraham, by whom he was brought up. He afterwards settled at Sodom, where he was taken prisoner by the king of Edom, but was rescued by Abraham. When Sodom was about to be destroyed, two angels came to Lot and obliged him to quit the place, with his wife and daughters, the former of whom, for looking back, was converted into a pillar of salt.

LOTHAIRE I., *lo-thair'*, emperor of Germany, was eldest son of Louis-le-Débonnaire, and was associated with him in the empire in 817, and named king of the Lombards in 820. He afterwards dethroned his father, and imprisoned him in a monastery; upon which his brothers Louis and Charles joined their forces against him, and defeated him at Fontenay, in 841. Two years afterwards, a treaty was concluded between the three brothers, by which Lothaire retained the title of

emperor, with Italy and some French provinces beyond the Rhine and the Rhone. Louis had a tract of country bordering on the Rhine, and Charles became king of France. D. 855.

LOTHAIRE II., emperor of Germany and duke of Saxony, between 1125 and 1137. He died in Italy, on his return from an expedition against Roger, king of Sicily.

LOTHAIRE, king of France, was the son of Louis IV., whom he succeeded in 954. He made war against the emperor Otho II. D. 986.

LOTHAIRE, king of Lorraine, was son of the emperor Lothaire I. D. 869.

LOTHIANS, THE, *lo'-the-ans*, an extensive and fertile district of Scotland, divided into three shires; viz., East-Lothian, or Haddingtonshire; Mid-Lothian, or Edinburghshire; and West-Lothian, or Linlithgowshire.

LOUDON, *low'-don*, a county of Virginia, U.S., on the Potomac. *Area*, 473 square miles. *Pop.* 21,000, of whom a fourth are slaves.

LOUDON, John Claudius, a writer of considerable celebrity on agricultural and botanical subjects. Between the years 1820-43 he produced a number of works of the highest importance to the scientific farmer, the gardener, and the botanist. The Encyclopædias of Gardening, Agriculture, Plants, Cottage Farm, and Villa Architecture, may be quoted as examples of his great industry and usefulness. B. at Cambuslang, Lanarkshire, 1783; D. 1843.

LOUDON, MRS., wife of the preceding, wrote several valuable works, chiefly connected with botany; such as "The Ladies' Flower-Garden," "Botany for Ladies," "The Ladies' Country Companion," &c.

LOUDOUN, *low'-don*, a parish of Ayrshire, Scotland, 4 miles from Kilmarnock. *Pop.* 4,800.—In the neighbourhood, at LOUDOUN HALL, Bruce, with his forces, encountered the troops of the earl of Pembroke in 1307.

LOUDUN, *loo-du(r)'*, a town of France, in the department of Vienne, 30 miles from Poictiers. *Pop.* 4,500. —This place is famous for being the seat of the Protestant synod held in 1611 and 1612.

LOUÉ, *loo'-ai*, a town of France, in the department of Sarthe, 16 miles from Le Mans. *Manf.* Paper and linen. *Pop.* 2,300.

LOUGAN, *loo'-gan*, a river of Norway, rising by many heads in the Langefield Mountains, and, after a course of 200 miles, falling into the Glommen, 30 miles from Christiana.

LOUGHBOROUGH, *luf'-bru(r)*, a market-town and parish of Leicestershire, 9 miles from Leicester. The town consists of one principal street, with four smaller ones crossing at right angles. It has a church and several other places for public worship, schools, a union workhouse, barracks, public library, newsrooms, and a theatre. *Manf.* Woollen and cotton hosiery, machinery, and lace. *Pop.* 11,500.—It is a station on the Midland Counties Railway.

LOUGHGALL, *lok-gawl'*, a parish of Ireland, in Ulster, 5 miles from Armagh. *Pop.* 8,000.

LOUGHGUILE, *lok-gile'*, a parish of Ireland, in Ulster, 8 miles from Ballymoney. *Pop.* 5,000.—A great portion of the land consists of bog.

LOUGHREA, *lok-ra'*, a well-built town of Ireland, in the county of Galway, 20 miles from Galway. It has a parish church, several chapels, schools, and a nunnery. *Manf.* Linens. *Pop.* 4,000.

LOUHANS, *loo'-han*, a town of France, in the department of the Upper Saone, 30 miles from Macon. *Pop.* Unascertained. It is a commercial depôt for goods passing between Switzerland and Lyons.

LOUIN, *loo'-ä*, a town of France, in the department of the Two Sèvres. *Pop.* 1,500.

LOUIS, ST., *loo'-is*, a county of Missouri, U.S. *Pop.* 106,000.

LOUIS, ST., capital of Missouri, U.S., on the Mississippi, 18 miles below the junction of the Missouri. It has many churches, a Roman Catholic cathedral, convent, orphan-asylum, episcopal college, a city hall, theatre, concert-hall, museum, arsenal, the St. Louis University, and numerous academies and schools. *Manf.* Leather, machinery, cordage, beer, brandy; and it has numerous corn, saw, and oil mills. *Pop.* 80,000. This place was founded by the French, in 1764, and is the principal western depôt of the American Fur Company.

LOUIS, ST., *loo'-ee*, an island, town, and port, belonging to the French.—The ISLAND is at the mouth of the river Senegal, W. Africa, and the town is upon it, with a population of about 12,000. *Lat.* 16° 2′ N. *Lon.* 16° 31′ W.

LOUIS, ST. (*See* MARANHAM.)

LOUIS, ST., a town of the Island of Bourbon, in the Indian Ocean, 20 miles from St. Paul. *Pop.* 10,000.

LOUIS, ST., *loo'-is*, a river of North America, in Wisconsin. After a course of 120 miles, it falls into Lake Superior, at its W. extremity.

LOUIS I., surnamed le Débonnaire, *loo'-e*, emperor of the West, and king of France, succeeded his father Charlemagne in 814. In 817 he associated his eldest son, Lothaire, with himself in the empire, and gave to his other two sons, Pepin and Louis, the kingdoms of Aquitaine and Bavaria. This division gave such offence to Bernard, king of Italy, the illegitimate son of Pepin, eldest son of Charlemagne, that he raised an army against the emperor, who put himself at the head of his troops, and marched into Italy. On his approach, the soldiers of Bernard fled, and the king was taken prisoner by his uncle, who deprived him of his eyes, Bernard dying during the operation. In 829 Louis created his younger son, Charles, whom he had by Judith of Bavaria, king of Germany; on which his other sons rose against him, and, depriving him of his crown, shut him up in a monastery, where he died, 840.

LOUIS II., surnamed the Young, was only son of Lothaire I., and was created king of Italy in 844, and ascended the imperial throne in 855. B. about 822; D. 875.

LOUIS III., called the Blind, was the son of Boson, king of Provence, and Ermengarde, daughter of the emperor Louis the Young. He succeeded his father at the age of 10, and in 900 contested the imperial throne with Berenger, who, having surprised him at Verona, deprived him of his eyes. D. about 923.

LOUIS IV., the son of the emperor Arnulphus, whom he succeeded in 899. The empire was a scene of desolation during his reign, being constantly ravaged by the Hungarians. D. 911.—He was the last prince in Germany of the Carlovingian race.

LOUIS V., commonly called Louis of Bavaria, was the son of Louis the Severe, duke of Bavaria. He was elected emperor in 1314, and at the same time Frederick le Bel was chosen at Cologne by another party of electors, which occasioned a war between them. Frederick was taken prisoner, but gained his liberty by renouncing his claim in favour of his rival. Pope John XXII. being opposed to that arrangement, in 1322 issued his bull of deposition against Louis, who, in return, appealed to a general council, and marched into Italy, where he procured the election of Peter de Corbiere (Nicholas V.), and by whom he was crowned at Rome. Five electors, on the other hand, chose Charles of Luxemburg to be emperor; on which the civil war was about to be renewed, when Louis was killed by a fall from his horse, in 1347.

LOUIS I., king of France. (*See* LOUIS I., emperor of the West.)

LOUIS II., the Stammerer, so called from a defect in his speech, was the son of Charles the Bald, crowned king of Aquitaine in 867, and succeeded his father as king of France in 877. He was obliged to deliver up Provence to Boson, by whom it was erected into a kingdom. His children were Louis and Carloman, who divided the kingdom between them, and a posthumous son, who was afterwards Charles the Simple. B. 846; D. at Compiègne, 879.

LOUIS III., the son of the preceding, and brother of Carloman, enjoyed the kingdom with his brother. He defeated Hugh the Bastard, son of Lothaire, marched against Boson, king of Provence, and opposed the progress of the Normans. He died without issue, 882.

LOUIS IV. was son of Charles the Simple, and ascended the throne in 936. He invaded Normandy, but was defeated and taken prisoner in 944. He regained his liberty the following year, after being obliged to concede Normandy to Richard, son of Duke William, and Laon to Hugh, father of Hugh Capet. He after-

wards recovered the latter territory, and died of a fall from his horse, 954.

Louis V., surnamed the Fainéant, or Do-nothing, succeeded his father Lotharius in 986, and soon after took the city of Rheims. He was preparing to march to the assistance of the count of Barcelona, who was pressed by the Saracens, when he is said to have been poisoned by his queen, 987. After his death, the crown devolved by right to his uncle Charles, duke of Lower Lorraine; but that prince being disliked by the French, it was conferred on Hugh Capet.

Louis VI., called the Big, the son of Philip I., succeeded to the throne in 1108. His reign was disturbed by wars with the Normans, and also by feuds among his vassals. He also quarrelled with Henry I. of England, and thus was commenced the wars between the English and French, which lasted during three centuries. He was a good and wise monarch, and was ably supported by his minister, the Abbé Suger. D. 1137.

Louis VII. was the son and successor of the preceding. He had a dispute with Pope Innocent II. on the right of presenting to benefices, and was excommunicated by that pontiff, who also laid his kingdom under interdict. Thibault, count of Champagne, being devoted to the pope, Louis declared war against him, and ravaged his country. A reconciliation afterwards took place between them, and Louis, by the persuasions of St. Bernard, engaged in a crusade, but was defeated by Saladin, and, on his return to Europe, was taken at sea by the Greeks, and delivered by the general of Roger, king of Sicily. Having divorced his queen, Eleanor, she married Henry of Normandy, afterwards Henry II. of England, to whom she brought, as her dower, the provinces of Poitou and Guienne. This produced a new war between England and France, which lasted, with a little intermission, twenty-one years. B. 1120; D. 1180.

Louis VIII., surnamed Cœur-de-Lion, was the son of Philip Augustus. He signalized himself in several expeditions during the lifetime of his father, and ascended the throne in 1223. He took Avignon and several places from the English; but died of a pestilential disease in his camp at Montpensier, in Auvergne, in 1226. B. 1187.

Louis IX., called Saint Louis, the son of the preceding, by Blanche of Castile, ascended the throne in 1226. He maintained a successful war against Henry III., king of England, which ended in a peace favourable to Louis, who, having been seized with a dangerous illness, made a vow that, if he recovered, he would take the cross for the purpose of regaining the Holy Land from the infidels. Being restored to health, he spent four years in preparing for this expedition, and, in 1248, embarked for the East with a great force, leaving his kingdom to the care of his mother. After taking Damietta, he passed the Nile, and obtained two great victories over the Saracens. At length famine and disease attacked his army, and the king, with his nobles, fell into the hands of the infidels. Louis, to recover his liberty, consented to pay a large ransom, to deliver up Damietta, and to conclude a truce for ten years. After spending four years in Palestine, he returned to France. In 1270 he undertook another expedition against the infidels, but died in his camp before Tunis, in Africa, the same year. He was canonised in 1297. B. at Poissy, 1215.

Louis X., surnamed Hutin, an old French term for 'quarrelsome,' succeeded Philip the Fair, his father, in 1314, being before king of Navarre, in right of his mother. He recalled the Jews to his kingdom, and made a successful war against the count of Flanders. B. at Paris, 1289; D. at Vincennes, 1316.

Louis XI., son of Charles VII. He distinguished himself by his valour in his youth, particularly against the English, whom he compelled to raise the siege of Dieppe, in 1443; but the glory he hereby acquired was tarnished by his rebelling against his father, who died of a broken heart, in 1461. Louis, on ascending the throne, treated France as a conquered country, for which several of the nobility formed a league against him, and some of his own family joined the malcontents. After a severe but indecisive battle at Montlheri, in 1465, a peace was concluded, by which Louis gave to the leaguers all their demands; but not fulfilling his engagements, the war was rekindled, and he was made prisoner by the duke of Burgundy, who compelled him to make a peace still more disadvantageous than the former. In 1474, the dukes of Burgundy and Brittany formed a league with Edward IV., king of England, against Louis, who, by negotiation, contrived to disengage the English monarch from the alliance, by a treaty at Amiens, in 1475. The duke of Burgundy was, in consequence, obliged to conclude a peace for nine years. Louis was a singular compound of firmness and superstition. His most prominent trait was, however, duplicity of disposition; his constant maxim being "He who cannot dissemble knows not how to reign." But, by protecting the middle classes and favouring industry, he was a benefactor of his country. B. 1423; D. 1483.

Louis XII., surnamed the Father of his People, was the son of Charles, duke of Orleans. He succeeded Charles VIII. in 1498, and took Milan, Genoa, and Naples; but, after ravaging Italy, the French were expelled in 1513. Henry VIII. of England, the Venetians, and the Swiss attacked Louis in his own dominions, and he was obliged to sue for peace. D. 1515.

Louis XIII. was the son of Henry IV. Being only nine years old at the death of his father, the kingdom was placed under the regency of his mother, Mary de' Medici. The Marshal d'Ancre had an uncontrolled sway at court till 1617, when he was assassinated, with the king's consent, and his wife was condemned to death as a sorceress. Vitri, the perpetrator of this act, was made a marshal of France; the bishop of Luçon, afterwards Cardinal Richelieu, became prime minister. Rochelle, the stronghold of the French Protestants, was taken by the cardinal, after a long siege, in 1628. After this event, so fatal to the Protestant interest in France, Louis assisted the duke of Mantua against the duke of Savoy, and entered on the campaign in person, in which he showed skill and bravery. In 1631 a treaty was concluded, by which the duke was confirmed in his estates. The year following, Gaston of Orleans, only brother of the king, revolted, out of dislike to Richelieu, and was assisted by the duke de Montmorency, who, being wounded and taken prisoner in 1632, was beheaded at Toulouse. Gaston took refuge with the duke of Lorraine, who, for protecting him, lost his whole dominions. This was followed by a war with Spain, which lasted twenty-five years, and was attended with various success; but greatly impoverished the nation, and discontented the people. Louis and his minister, the cardinal, were attacked with a mortal disease nearly together: the latter died in 1642, and the king in the following year.

Louis XIV., son of the preceding, being only five years old on the death of his father, the regency was intrusted to the hands of the queen-mother, Anne of Austria, under whom Mazarin acted as prime minister. The nation was then involved in a war with Spain and the emperor of Germany, which was maintained with glory to the French arms by the prince of Condé and the famous Turenne. France pushed her conquests into Flanders, Artois, Lorraine, and Catalonia. The Swedes, who were in alliance with Louis, gained a great victory over the imperialists in Bohemia; Turenne took Treves and re-established the elector; Condé gained the battle of Nordlingen, took Furnes and Dunkirk, and defeated the archduke on the plains of Sens, in 1648, after reducing Ypres. The Spanish fleet was defeated on the coast of Italy by the French. This year a separate peace was made between Louis, Ferdinand III., Christina queen of Sweden, and the states of the empire. By this treaty, Metz, Toul, Verdun, and Alsace were attached to France; but while Louis was successful abroad, his kingdom was distracted by internal divisions: the Parisians, irritated against Mazarin and the queen-mother, and headed by the duke de Beaufort and the prince of Condé, took up arms. During this revolt, known as the civil war of La Fronde, the king, his mother, and the cardinal were obliged to fly. The Spaniards, profiting by these troubles, made several conquests in Champagne, Lorraine, and Italy. In 1651, the king assumed the government; but Mazarin returning to power the year following, the civil war was renewed. Condé headed the malcontents, and defeated the marshal d'Hocquincourt at Bienau, but soon after-

wards he was attacked by the royal army and made prisoner. In the mean while, the archduke Leopold took from the French Gravelines and Dunkirk, and Don John of Austria made himself master of Barcelona; but domestic tranquillity being restored, these losses were repaired. Turenne gained several battles, and took a number of places, which produced a peace between France and Spain in 1659. The principal article in this treaty was the marriage of the king with the infanta Maria Theresa. The minister of finance, Fouquet, being condemned to banishment for peculation, was succeeded by Colbert, one of the ablest ministers and financiers that ever lived: arts and commerce were cherished and flourished; foreign colonies were established; and at home was founded the Academy of Sciences and another of painting and sculpture. On the war breaking out between England and Holland, Louis joined with the latter; but after a few naval actions, peace was concluded in 1668. On the death of Philip IV., father of the queen, Louis laid claim to the vacant throne, and marched into the Low Countries, where he took a number of towns, particularly Lisle. His progress gave such alarm, that a treaty was entered into between England, Holland, and Sweden, to check his ambition; but, just as the treaty was completed, peace was restored between Louis and Spain. In 1672 the French king made an attack on Holland, and reduced some of the provinces in a few weeks. This invasion produced a new confederacy against Louis, between the emperor of Germany, Spain, and the elector of Brandenburg, in which all the allies were unsuccessful, and which terminated, in 1678, by the treaty of Nimeguen. Amidst all his glory, Louis committed an act of impolitic cruelty by the revocation of the edict of Nantes, granted by Henry IV. in favour of the Protestants. This measure drove from France a vast number of ingenious mechanics and others, who settled in England and Holland. About this time another league was formed against France by the prince of Orange, the duke of Savoy, and the electors of Bavaria and Brandenburg. To this league were afterwards added the emperor of Germany and the king of Spain. The dauphin had the command of the French army, and opened the campaign by taking Philipsburg, in October, 1688; but he was soon forced to retreat before a superior force. In 1690 the French were more successful; but were defeated in the naval action off La Hogue, by Admiral Russell, in 1692. Louis, in person, took Namur, and Luxemburg gained the battles of Steenkirk and Nerwinde. In 1626, Savoy made a separate peace with France, which was followed by a general one at Ryswick, in 1697. The tranquillity of Europe, however, was again broken by the death of Charles II., king of Spain, in 1700. He left his crown to Philip of France, duke of Anjou, who assumed the title of Philip V. In opposition to him, the archduke Charles laid claim to the throne, and was supported by the emperor of Germany, by Holland, and England. Prince Eugene had the command of the imperial forces, with which he took Cremona. In 1704, Eugene and Marlborough gained the great battle of Hochstet; the year following, Nice and Ville-Franche were taken by the French, who also gained a dearly-bought victory at Cassane, over Eugene; on the other hand, Barcelona surrendered to the archduke, and Gironne declared in his favour; the battle of Ramilies was gained by the duke of Marlborough, and Prince Eugene saved Turin by defeating the duke of Orleans. In 1708, Lisle was retaken by the allies, who also gained the battle of Oudenarde, and the imperialists made themselves masters of Naples. The year following, the French lost Tournay, and suffered a defeat at Malplaquet. In 1713, a treaty of peace was signed at Utrecht by France, Spain, England, Savoy, Portugal, Prussia, and Holland; and the next year peace was concluded with the emperor at Radstadt. Louis, by his first wife, had issue one son, Louis, dauphin of France, who died in 1711, leaving three sons, Louis, Philip, and Gaston. Louis XIV. had several illegitimate children by his mistresses. Without forgetting the intolerance and cruelty of Louis towards those of a different religion from himself, it must be allowed that he was a remarkable and able man. One great fact stands forth prominently during his reign,—he was well served. But when we perceive how uniformly gracious he was towards those under his command; how quick at discovering merit; how unwilling to change the agents of his will; we may cease to wonder that a stern man and absolute monarch should find even great intellects to obey his behests with zeal and devotion. His reign of 72 years was a brilliant epoch. It gave birth to Condé, Turenne, and Vauban; to Colbert and Louvois; to Corneille, Racine, Molière, La Fontaine, Boileau, Bossuet, Fénélon, Lebrun, and Perrault. The most celebrated of Louis' many mistresses were, Mesdames de la Vallière, de Montespan, Fontanges, and de Maintenon; with the latter of whom, he, at the close of his life, when he had become serious and devout, engaged in a secret marriage. The best works to consult relative to this remarkable reign, are Voltaire's "Le Siècle de Louis XIV.;" some pieces of the king, published in 1806, under the title of "Works of Louis XIV.;" the "Memoirs of De Retz," and those of Saint-Simon. An abridged translation of the latter was produced by Mr. Bayle St. John in 1857. Louis XIV. was B. 1638; D. 1715.

LOUIS XV. was the great-grandson of the preceding, and succeeded him in 1715, at the age of five years, under the regency of Philip, duke of Orleans. In 1723 he was declared of age. The beginning of his reign was troubled by the Mississippi scheme of the famous Law, which ruined thousands of people. (*See* LAW.) On the death of the duke of Orleans, in 1723, he was succeeded, as prime minister, by the duke of Bourbon, who was displaced in 1725, when Cardinal Fleury entered upon that station. The same year the king married the daughter of the king of Poland. On the death of the last-mentioned monarch, in 1733, Louis supported the election of his queen's relation Stanislaus against the elector of Saxony, which occasioned a war, known as the War of the Polish Succession, between France, Austria, and Russia. Stanislaus, however, was forced to abandon the throne; but the French were successful in Italy, on which a peace was concluded in 1738. On the death of the emperor Charles VI., in 1740, the succession of the house of Austria was disputed by four persons, and Louis declared himself against Maria Theresa, daughter of the late emperor, contrary to his own engagements. He supported the pretensions of the elector of Bavaria, who called himself Charles VII. That prince took Prague, where he was crowned king of Bohemia; but, in 1742, the city was retaken, and the allies, with the king of Great Britain at their head, gained the battle of Dettingen. In 1744, Louis took the field in person, and captured Courtray, Menin, and Ypres; he was also present at the battles of Fontenoy and Lawfeld. These advantages were accompanied by the taking of Ghent, Ostend, Brussels, Bergen-op-Zoom, and other places. On the other hand, the troops of the duke of Saxony and of the queen of Hungary ravaged Provence, and the English completely ruined the French commerce at sea; which effected the peace of Aix-la-Chapelle in 1748. In 1755 a new war broke out between France and England, in which the latter power had Prussia for an ally, while Austria leagued with France. At first the French were very successful, by taking Port Mahon, defeating the duke of Cumberland at Hastenbeck, and forcing the English general and his army to capitulate at Closter-seven. The electorate of Hanover was conquered; but, in 1757, the French and Austrians were defeated at Rosbach: this was followed by other losses, both by land and sea, particularly of Canada. Nor was the face of affairs altered for the better by the famous family compact in 1761, by which all the families of the house of Bourbon allied as in a common cause. A treaty of peace was signed at Paris in 1763. The year following, the order of the Jesuits was abolished in France.—He was a debauched and feeble-minded monarch, and to his acts was chiefly due the storm that broke over the head of his unfortunate successor. B. at Fontainebleau, 1710; D. 1774.

LOUIS XVI., the son of Louis the Dauphin and of Maria Josephine, daughter of Frederick Augustus, king of Poland. On the death of his father, in 1765, he became the heir to the throne, and, in 1770, he married Marie Antoinette, archduchess of Austria. In 1774 he succeeded to the crown of France. At that period the finances were in an exhausted state, commerce was

nearly ruined, the marine dismantled, and the national debt enormous. To repair the condition of public affairs, Vergennes was made secretary of state, and Turgot had the direction of the finances; Malesherbes was appointed a member of the council, Sartine had the management of the marine department, and Maurepas was placed at the head of the administration. The first act of Louis was very popular; he dispensed with the customary tax paid by the people at the beginning of every new reign. In 1774 the parliament was recalled, and affairs began to assume a favourable aspect, when, unfortunately, the French government, always jealous of England, took part with the revolted Americans, and a ruinous war ensued between the two countries, which, though it terminated in the loss of the colonies to the English, brought about a bloody revolution in France. The finances of the latter country were completely exhausted, and the Cardinal de Brienne, who succeeded Calonne as minister, framed imposts which laid such intolerable burdens upon the people, that the parliament refused to register them. For this the members were exiled to Troyes, but were afterwards recalled by Louis, who, at their request, convened the States-General of three orders,—clergy, nobility, and commons. This assembly met in May, 1789. The public mind became violently agitated; the people of Paris arose, and, the 14th of July of that year, stormed the Bastille. In October, the armed mob, with a prodigious number of women, marched to Versailles, which palace they forced, murdered the guards, and searched in vain for the queen, who would have shared the same fate, had she not escaped from her bed. The result of this insurrection was, the leading of the king and his family in triumph to Paris, amidst all the insults of a lawless rabble. In February, 1790, Louis was forced to accept the new constitution; but, notwithstanding all his concessions, finding himself a mere prisoner at Paris, and exposed daily to new injuries, he resolved to escape. Accordingly, in the night of June 21, 1791, he and his family quitted the Tuileries; but, at Varrenne, his person was recognised, and he was conducted back to Paris, where he became a prisoner in his own palace, and suffered the vilest indignities. War was declared against France by the emperor and the king of Prussia, and the duke of Brunswick marched into the country, but was forced to retreat. In the mean time, the people were wrought up to a pitch of savage ferocity by factious leaders, and assaulted the Tuileries. The king and family sought refuge in the National Assembly, who ordered them to be sent to the Temple. The Legislative Assembly gave way to the National Convention, which brought Louis to a mock trial. His defence was conducted by Malesherbes, Tronchin, and Deseze; and his own deportment was, as it had uniformly been during his confinement, firm and modest, dignified and resigned. In January, 1793, he was adjudged to death for conspiring against the public good, and, on the 21st of the same month, ascended the scaffold on the Place Louis XV., and would have addressed the people, but was prevented by the noise of drums purposely placed there. Louis XVI. had all the virtues that adorn private life; but he was deficient in firmness and, perhaps, even singleness of purpose. He was an accomplished prince, and was fond of mechanics; as a locksmith, he was particularly skilful. B. 1754.

Louis XVII., second son of the preceding, was at first styled duc de Normandie, and after the death of his elder brother, Louis-Joseph, in 1789, became dauphin of France. Imprisoned in the Temple with his relatives, he was, after his father's death, styled monarch by the royalists and foreign powers. A cobbler, named Simon, was appointed his gaoler, with the derisive title of tutor. He died in 1795, it is suspected of poison, but it is more probable that his life was brought to a premature close by the harsh treatment to which he had been subjected in prison. Many impostors have sought to pass for the veritable Louis XVII., but have succeeded in obtaining but a small number of dupes. This prince was born in 1785.

Louis XVIII., brother of Louis XVI. As count of Provence, he had, during the first period of the Revolution, shown a liberal disposition, and voted both in the Assembly of Notables and in the States-General against the government of his brother. Observing, however, the violent tendencies of the Jacobins, he resolved to quit France, and took his departure shortly after Louis XVI., in June, 1791. More fortunate than his brother, he succeeded in effecting his escape out of France, and reached Brussels. In 1792, he placed himself at the head of 6,000 men, and joined the Prussian army that was marching on France; but the defeat of Valmy destroyed all his hopes. On the death of Louis XVII., in 1795, the count of Provence assumed the title of king, as Louis XVIII., and was recognized by the foreign powers. After residing at various places on the continent of Europe, he went to England, and lived at Hartwell, in Buckinghamshire, until the events of 1814. On the fall of Napoleon I., in May of that year, Louis was placed on the throne of France by the allies. His first act was to declare himself a constitutional and not an absolute monarch. In June, 1814, he laid before the legislature a charter, which afterwards became the base of the law of the kingdom. The sudden return of Napoleon from Elba, in March, caused Louis to be abandoned by the army and a considerable portion of the nation. At this juncture he fled, and took refuge at Ghent; but after the battle of Waterloo, in June, 1815, he was once more placed upon the throne, which he retained till his death. Louis XVIII. was, for a Bourbon, a sufficiently enlightened and liberal prince: he was a witty and cultivated man. He left no children, and was succeeded by his brother, Charles X. B. 1755; D. 1824.

Louis-Philippe, king of the French, was eldest son of Louis-Philippe-Joseph, duc d'Orléans, styled Philippe-Egalité. Louis-Philippe bore the title of duc de Chartres until the death of his father, in 1793, after which he was usually styled duc d'Orléans. Between the years 1785 and 1792, he served in the French revolutionary army, and signalized himself at Valmy and Jemappes. Being cited, together with his faithful friend General Dumourier, to appear before the Committee of Public Safety, and well knowing the sanguinary nature of that tribunal, which had, seven months before, sent his father to the guillotine, he fled across the Belgian frontier, and took refuge in the Netherlands, then under the sway of Austria. He was cordially received by the latter power, and a commission was offered to him, but he refused to fight against his native country. After travelling through Germany in disguise, he went to Switzerland, and at Zurich met his sister Adelaide, known as Mademoiselle d'Orléans, whom he shortly afterwards placed with Madame de Genlis, in a convent near Baumgarten. His funds being now exhausted, he sought and obtained the post of professor in the college of Reichenau, where, under the assumed name of Chabaud, he taught mathematics and geography during eight months. Thence he went to Baumgarten; but, being discovered by the French authorities, he set out for Hamburg, in the hope of obtaining a vessel for America. Disappointed in this expectation, he travelled on foot through Norway, Sweden, and Finland, as far as the North Cape. The Directory having offered to release his two brothers, the duc de Montpensier and the count de Beaujolais, if Louis would consent to emigrate to America, he went on board a vessel, and sailed for the United States in 1796. After an adventurous life in the New World, the three Orleans princes returned to Europe in 1800, and took up their residence in England. The duc de Montpensier died at Twickenham in 1807, and his brother, the count de Beaujolais, in the following year, at Malta, whither he had been accompanied by the duc d'Orléans. In the same year Louis went to reside with his mother and sister at Palermo, at which place the king of Naples and Sicily was dwelling, under British protection, Murat occupying the throne at Naples. In 1809 he married the king's daughter, the Princess Amélie. With the exception of a visit to Spain, in 1810, he continued to live at Palermo till 1814, when, on hearing the news of Napoleon's fall, he immediately set out for Paris. On Napoleon's return from Elba, Louis Philippe sent his family to England, and himself took the command of the Army of the North, in obedience to the command of Louis XVIII. He again went to Twickenham, and remained there during the Hundred Days, but was recalled to Paris to take his seat in the Chamber of Peers. Being regarded with peculiar jealousy by Louis XVIII., he

ted Paris, and did not return to France until 1827, a he went to reside at Neuilly, where he lived in usion till he was summoned to the throne as king he French, in 1830. During seventeen years he ed his elective throne, France, in the mean while, g wealthy and tranquil. He maintained peace urope, and added the colony of Algeria to France. hough he had obtained and earned the title of apoleon of Peace," his rule was characterized audulent policy towards his allies,—the marriage son the duc de Montpensier to a Spanish princess g a notable instance; while at home, his restless sub-, tired of what Lamartine termed his government vulgar utility," and harassed by illiberal restric-s, burst out into a revolution in 1848. Had Louis-lippe been inclined to turn the bayonets of his diery upon his people, it may be doubted whether would have lost his throne. But his fall may be ributed no less to his kindness of heart, than to his ant of firmness on that occasion. He fled Paris in disguise, and reached Newhaven in March, 1848. The queen of England assigned Claremont as his residence, and there he continued to dwell, till his death, in 1850. B. at Paris, 1773.

LOUIS, dauphin of France, was son of Louis XV. and Maria Leczinska. He was father of Louis XVI., Louis XVIII., and Charles X. B. 1729; D. 1765.

LOUISA, *loo-e'-sa*, a county of Virginia, U.S. *Area*, 428 square miles. *Pop.* 17,000.—Another in Iowa. *Area*, 412 square miles. *Pop.* 5,000.

LOUISBURG, *loo'-is-berg*, a town of the island of Cape Breton, on the S.E. side of the island. Its streets are regular and broad, consisting, for the most part, of stone houses, with a large parade at a little distance from the citadel. It has a safe and capacious harbour, more than half a mile broad and 6 miles long. The principal, if not the only trade, is the cod fishery. *Pop.* Unascertained.—Louisburg was taken from the French by the English, in 1745, but restored in 1748, by the treaty of Aix-la-Chapelle. It was again taken by the English in 1758, and its fortifications demolished.

LOUISIADE, *loo-is'-i-ad*, an archipelago in the Pacific Ocean, lying to the S.E. of New Guinea, and extending about 400 miles in length, by about 160 in breadth, where broadest. The inhabitants are of the Papuan race. *Lat.* nearly 10° S. *Lon.* of the centre, 152° 25' E.

LOUISIANA, *loo'-e-se-a'-na*, one of the United States, bounded N. and W. by the Missouri territory, S. by the Gulf of Mexico, and E. by the Mississippi territory. *Area*, 46,430 square miles. *Desc.* The south-eastern part is mostly included in the delta of the Mississippi, and the south-western part is generally level prairie, and much of its area very productive. The north-western part is a thick forest, with low alluvial soil upon the rivers, which is of great fertility; but, at a distance from the streams, the land is high, broken, and sterile. *Rivers.* The Mississippi, with its numerous branches. *Lakes.* These mostly consist of expansions or overflowings of the rivers; and Partchartrain is the largest. *Zoology.* Panthers, deer, immense numbers birds; and the rivers swarm with alligators. *Pro.* orn, cotton, sugar, indigo, rice, sweet potatoes, pumpkins, plums, cherries, figs, peaches, grape vines, and most kinds of garden vegetables. Oranges, and the fruits of southern climates generally, flourish. On the prairies, cattle and mules are extensively reared. The exports of Louisiana, since the country came into the possession of the United States, have been rapidly increasing. The produce received from the upper country, from the shores of all the rivers of which the Mississippi is the common channel, is immense. The principal town is New Orleans. *Pop.* 520,000, of whom nearly half are slaves.—This country was, in 1682, named by the French, after Louis XIV., and was purchased by the United States in 1803. In 1812 it was admitted into the Union. A large portion of the population are of both Spanish and French descent.

LOUISVILLE, *loo'-is-vil*, a post township of New York, U.S., on the St. Lawrence, 160 miles from Albany. *Pop.* 2,500.

LOUISVILLE, a city of Kentucky, U.S., is pleasantly situate on an elevated and beautiful plain, on the S. bank of the Ohio, immediately above the rapids, 125 miles from Cincinnati. It has several churches, an Ohio court-house, a gaol, theatre, market-house, churches, hospitals, and various schools. *Manf.* Woollens, and there are flour-mills and iron-foundries. It has a considerable trade to New Orleans and on the Ohio, the rapids being avoided by a short canal. *Pop.* 50,000.

LOULÉ, *loo'-lai*, a town of Portugal, in Algarva, on a river of the same name, 9 miles from Faro. *Pop.* 5,000.

LOUP, ST., *loo*, the name of several towns and parishes in France, none of them with a population above 3,000.

LOURCHES, *loorsh*, a town and parish of France, in the centre of Bouchain. *Pop.* 3,000.

LOURDES, *loord*, a town of France, in the department of the Upper Pyrenees, 6 miles from Argates. It is commanded by a strong castle, now used as a prison. *Pop.* 4,500.—This place has extensive Roman remains, and was fortified by Julius Cæsar.

LOURICAL, *loo'-re-kal*, a town of Portugal, 18 miles from Coimbra. *Pop.* 3,000.

LOUTH, *louth*, a maritime county of Ireland, bounded on the S. and S.W. by Eastmeath, on the W. by Monaghan and Cavan, N. by Armagh, and N.E. by the Bay of Carlingford, which separates it from the county of Down, and on the E. by the Irish Channel. *Area*, 315 square miles. *Desc.* It is in general a rich and well-cultivated tract, in which there is little waste ground. *Rivers.* The principal is the Boyne. Several other small ones cross the county, and fall into the Bay of Dundalk. *Pro.* Wheat, barley, oats, and vegetables. *Manf.* Linen to a great extent. *Pop.* 108,000.

LOUTH, a town of Lincolnshire, 25 miles from Lincoln. *Manf.* Carpets, paper, and soap. *Pop.* 11,000. A station on the East Lincolnshire Railway.

LOUTHERBOURG, Philip James de, *loo'-tair-boorg*, an eminent landscape-painter, who, after obtaining considerable success in his profession at Paris, went to London, in 1771, and was for some time engaged as scene-painter at the Opera-house; a branch of art in which he is said to have been without a rival. B. at Strasburg, 1740; D. in London, 1814.

LOUVAIN, *loo'-vā*, a town of Belgium, in South Brabant, on the Dyle, 16 miles from Brussels. Its walls, which are of brick, have a circuit of nearly seven miles, but are now partly converted into promenades. There are few public edifices deserving attention. The town-hall is, however, admired as a fine specimen of Gothic architecture, and the collegiate church is inferior to few in Belgium. The great Hospital des Invalides, and the buildings of the university, founded in 1426, and suppressed in 1835, are also objects of interest. *Manf.* Linen and woollens, lace, cotton twist, and glass. It is noted for its beer, and has a trade in corn and hops. *Pop.* 30,000.—Under the French, Louvain was the capital of the department Dyle. It is connected by railway with Mechlin and Tirlemont.

LOUVAINE, *loo-vain'*, a town of France, in the department of the Maine-and-Loire. *Pop.* 1,500.

LOUVAN, *loo'-van*, a river of Norway, rising in the district of Christiana, and, after a course of 100 miles, falling into the Skager-rack.

LOUVAT, *loo'-va*, a river of Russia, which, after a course of 170 miles, enters Lake Ilmen, 20 miles from Novgorod.

L'OUVERTURE, Toussaint, *loo'-vair-toor*, a negro, who, in 1795, assisted the French general Laveaux in driving the English and Spanish from the island of St. Domingo. He subsequently became commander-in-chief of the army of St. Domingo, and, in 1800, he caused himself to be named president. In 1812 he refused to recognize General Leclerc, who was sent to re-establish French authority, but was compelled to capitulate and was transported to France, where he died in prison, 1803. B. at St. Domingo, 1743.

LOUVET DE COUVRAY, John Baptist, *lou-vai de(r) koov'-rai*, a French writer, and one of the members of the National Convention. He had the courage to oppose Robespierre when at the height of his power, yet escaped the vengeance of the tyrant. He wrote a romance, entitled the "Amours of the Chevalier Faublas," a political journal called the "Sentinel," a "Justification of Paris," and an account of himself, and the dangers which he passed through. B. at Paris, 1764; D. at Paris, 1797.

LOUVIERS, *loo'-ve-ai*, a town and parish of France, in the department of the Eure, 16 miles from Rouen.

It has a church, public library, a theatre, and various schools. *Manf.* Cotton goods, machinery, and soap. *Pop.* 11,000.—This place was sacked both by Edward III. and Henry V. of England.

LOUVOIS, François-Michel-Letellier, Marquis de, *loo-vwaw'*, prime minister to Louis XIV. To him are principally attributable the devastation of the Palatinate and the revocation of the edict of Nantes. After having served the "Grand Monarque" during 36 years, he fell under Louis XIV.'s displeasure, and was only saved from disgrace by a sudden death. He was one of those men whose talents we may admire, while we abhor his acts. The Hôtel des Invalides was founded by him. B. at Paris, 1641; D. 1691.

LOUZA, *loo'-za*, a town of Portugal, at the foot of Mount Louza, which supplies Lisbon with snow and ice, 12 miles from Coimbra. *Pop.* 3,500.

LOVAT, Simon Fraser, Lord, *luv'-at*, a Scottish chieftain, who, in 1715, took Inverness from the rebels; but, on the breaking out of the second rebellion in 1745, declared for the Pretender, for which he was taken prisoner and sent to London, where, in 1747, he was sentenced to be beheaded. B. near Inverness, 1668.

LOVE, Christopher, *luv*, a Presbyterian divine, who was beheaded on Tower Hill for conspiring against the government of Cromwell. He wrote some books on practical divinity. Beheaded 1651.

LOVE, James, an English actor and dramatic writer. His real name was Dance, and his father was surveyor to the city of London. His son was a performer on Drury-Lane stage many years, and excelled in the character of Falstaff, but was not equal to Henderson. He wrote a comedy and some other pieces. D. 1774.

LOVELACE, Richard, *luv'-laice*, an English poet. He was a zealous royalist, and suffered much for his attachment to Charles I. His poems are elegant, and he wrote also two plays—"The Scholar," a comedy, and "The Soldier," a tragedy. B. in Kent, 1618; D. 1658.

LOWELL, *lo'-el*, a city of the United States, in Massachusetts, 20 miles from Boston. It has several churches, a lyceum, literary and mechanics' institutions, and a great number of schools. *Manf.* Cottons principally. It is the seat of that manufacture in the United States. It has, besides, powder-mills and bleach-fields. *Pop.* 35,000.—The condition of the workpeople is said to be very satisfactory, whilst their morals are exemplary. It is connected with Boston both by canal and railway.

LOWENBERG, or LUMBERG, *loom'-bairg*, a town of Silesia, on the Bober, 16 miles from Leiguitz. *Manf.* Woollens, linens, and cottons. *Pop.* 5,000.

LOWER, *lo'-er*, the prefix of several townships in the United States, none of them with a population above 5,000.

LOWESTOFT, *lo'-stoft*, a market-town of Suffolk, on a hill looking down upon the sea, 20 miles from Norwich. It has a parish church, assembly-rooms, a theatre, baths, and reading-rooms. Here is also an elegant hot-bath. Being built on the most easterly land of England, it has two lighthouses, and has its harbour defended by forts and a battery. *Manf.* China-ware and ropes; but it depends chiefly on the herring, cod, mackerel, and sprat fisheries. *Pop.* 7,000.—It is the terminus of a branch of the Eastern Counties Railway, and is connected with Norwich by canal.

LOWICZ, *lo'-iks*, a town of Poland, 44 miles from Warsaw. It has several monasteries, a gymnasium, and a normal school. *Manf.* Linen-weaving and tanning. *Pop.* 7,500.

LOWNDES, *lounds*, several counties in the United States. 1. In Georgia. *Area*, 1,650 square miles. *Pop.* 8,500.—2. In Alabama. *Area*, 870 square miles. *Pop.* 22,000.—3. In Mississippi. *Area*, 590 square miles. *Pop.* 20,000.

LOWTH, William, *louth*, a learned English divine, who wrote "Commentaries on the Four Greater Prophets," "Directions for the Profitable Reading of the Holy Scriptures," "A Vindication of the Divine Authority and Inspiration of the Old and New Testament," in answer to Leclerc, and other important works. B. in London, 1661; D. 1732.

LOWTH, Robert, a learned English prelate, son of the above, who, in 1741, was elected professor of poetry at Oxford, and in that capacity delivered his admir lectures, which were printed at Oxford in 1753, u the title of "Sacred Poetry of the Hebrews." passing through various minor grades of the ch he became bishop of London in 1777. Besid above work, Bishop Lowth published a transl Isaiah from the Hebrew, an English Gram "Life of William of Wykeham," the Life of his in the "Biographia Britannica," a Poem on th alogy of Christ, some controversial letters with Warburton, and sermons on public occasions. B. D. 1787.

LOXA. (*See* LOJA.)

LOXA, *lox'-a*, the capital of a province of the s name, in Quito, 75 miles from Cuerza. It is situat a valley, about 7,000 feet above the level of the s The finest chinchona bark grows in the neighbourh *Pop.* 5,000. *Lat.* 3° 59′ S. *Lon.* 79° 15′ W.

LOYALTY ISLANDS, *loi'-al-te*, a group of five, in Pacific Ocean, lying to the E. of New Caledonia. T three largest are inhabited. *Pop.* Unascertained.

LOYOLA, Ignatius, *loi'-o-la*, the founder of the order o Jesuits. He was youngest son of a Spanish nobleman o high birth, was brought up to the military profession and obtained a commission in the Spanish army; but breaking his leg at the siege of Pampeluna, he made vow to the Virgin, that if he recovered he would go a pilgrimage to Jerusalem, and devote himself to religious course of life, which resolution he fulfilled. After studying Latin a short time at Barcelona, he commenced preaching, and began to gather disciples, for which he was imprisoned; but still persevered in adding to the number of the brethren of the Order of

IGNATIUS LOYOLA.

Jesus, as they were called, and for which, at length, he obtained a confirmation by Pope Paul III. This order increased prodigiously during the lifetime of Loyola, who, however, was not the author of the pernicious maxims which afterwards disgraced it. (*See* JESUITS.) B. 1491; D. 1556.

LOZERE, *lo'-zair*, a department in the south of France, bounded by the departments of the Cantal, the Upper Loire, the Ardèche, the Gard, and the Aveyron. *Area*, 1,973 square miles. *Desc.* Infertile, and traversed by the Cevennes mountains. *Rivers.* The Allier, Tarn, Lot, Truyère, and Gard. *Pro.* Chestnuts, potatoes, and wine; sheep are reared in large numbers, and the greater portion of the inhabitants subsist on potatoes and chestnuts. *Minerals.* Iron, lead, copper, antimony, and silver. *Pop.* 145,000.

LUBAR, *loo-bar'*, a market-town of Russia, in Slutsh, 47 miles from Jitomir. Pop. 3,590.

## Lubben

LUBBEN, *loob'-ben*, a town of Lower Lusatia, on an island formed by the Spree and the Birste, 50 miles from Berlin. *Manf.* Linens, woollens, tobacco, beer and brandy. *Pop.* 5,000.

LUBBENAU, *loob'-be-nou*, a town of Lower Lusatia, on the Spree, 40 miles from Frankfort. *Manf.* Linens, woollens, and distilling. *Pop.* 3,100.

LUBECK, *loo'-bek*, a principality of Northern Germany, belonging to Oldenburg. It is composed of two detached portions, inclosed by Lauenburg and Holstein. *Area*, 168 square miles. *Pop.* 25,000.

LUBECK, a free city of Germany, on the Trave, a navigable river, which joins the Baltic about 8 miles below. It is the principal of the four free Hanse towns, and is the capital of a small territory, 35 miles from Hamburg. It is surrounded by walls, which are planted with rows of trees, and carefully preserved as walks for the inhabitants. The principal buildings are a cathedral and four parish churches, of which that of St. Mary is a large and elegant building; an exchange, mint, arsenal, hospitals, schools, a society of useful arts, and a theatre. The council-house is a Gothic building, in which the Hanseatic League formerly assembled. *Manf.* Woollens, silk, cotton, paper, tobacco, iron goods, soap, and playing-cards. *Pop.* 30,000. *Lat.* 53° 52′ 1″ N. *Lon.* 10° 41′ 5″ E.—Lubeck was built on its present site about the year 1140. In 1220 it was declared a free city of the empire, and in 1241 it entered into a treaty with Hamburg, which laid the foundation of the Hanseatic League. In 1806, Blucher, after the battle of Jena, took refuge in Lubeck, which was carried after a sanguinary action.—The territory of the town of Lubeck has an area of 128 square miles, and a population of 50,000.

LUBECK, a post-township of Maine, U.S., 180 miles from Augusta. It has a good harbour. *Pop.* 3,000.

LUBEN, *loo'-ben*, a town of Prussian Silesia, on the Kalterbach, 14 miles from Leignitz. *Manf.* Woollen-weaving. *Pop.* 4,300.

LUBIANA. (*See* LAYBACH.)

LUBLIN, *loob'-lin*, a town of Poland, on the Bistritza, 85 miles from Warsaw. It is the capital of a province of the same name, and has a castle standing on a high rock. Its principal public buildings are a cathedral, the Sobieski palace, a town-hall, college, a theatre, hospitals, and schools. *Manf.* Woollen cloths. *Pop.* 17,000.—The PROVINCE has an area of 11,975 square miles, and a population of about 1,000,000.

LUBNY, or LUBNU, *loob-noo'*, a town of European Russia, government of Pultava, or Pultawa, on the Sula, 80 miles from Pultava. *Pop.* 6,000.—Charles XII., of Sweden, besieged this place for a considerable time, but was unsuccessful in taking it.

LUCANUS, Marcus Annæus, Lucan, *lu-kai'-nus*, a Latin poet. Going at an early age to Rome, his verses caused him to become the favourite of the emperor Nero; but being foolish enough to enter into competition with his imperial patron, who was desirous of being considered the first poet of his time, he was forbidden to publish any more poetry. He was subsequently condemned to death for conspiring against the life of Nero. The only poem of his at present extant is the "Pharsalia," which describes the war from the commencement to Cæsar's meeting with Cleopatra in Egypt. B. at Bætica, in Spain, 38; D. 65.

LUCCA, *luk'-ka*, or *look'-ka*, a duchy of Italy, surrounded by Tuscany, Modena, and the Mediterranean. *Area*, 435 square miles. It is considered one of the most fertile regions of Italy, and was, in 1847, ceded to Tuscany. *Pop.* 266,000. *Lat.* between 43° 46′ and 44° 47′ N. *Lon.* between 10° 12′ and 10° 42′ E.

LUCCA, the capital of the above duchy, stands in a plain watered by the Serchio, 12 miles from Pisa. It has a circuit of about 3 miles, and its ramparts are planted with trees. In general the streets are wide and the houses well built. The palace of the princess contains in the interior some valuable paintings. Several of the churches are built of Carrara marble. The theatre is neat, but small. The celebrated baths are on the banks of the Serchio, and there is a university, a large school, and an academy of arts and sciences. *Manf.* Cloth and silk; and it trades in olive-oil, for which it is particularly famous. *Pop.* 25,000. *Lat.* 43° 5′ N. *Lon.* 10° 3′ E.—In the time of the Romans, this place was frequently the head-quarters of Julius Cæsar. In 1805, Napoleon I. made it a principality, and gave it to Bacchioli, his sister's husband. In its vicinity are the reputed baths of Nero.

LUCE, *luce*, a river of Scotland, in Wigtonshire, which falls into the Bay of Luce.

LUCE, BAY OF, or GLENLUCE BAY, a spacious bay in Wigtonshire, Scotland. *Ext.* About 19 miles broad at its entrance, and 7 at its head. Its length is about 17 miles. Its quicksands are frequently destructive to shipping.

LUCENA, *loo-thai'-na*, a city of Spain, in the province of Cordova, 32 miles from Cordova. *Manf.* Soap, linen, and cloth, besides saltworks near it. Its neighbourhood is famed for its fruit. *Pop.* 17,000.

LUCENA, the name of several parishes and villages in France, none of them with a population above 2,000.

LUCERA, *loo-chair'-a*, a town of Naples, in the Capitanata, 12 miles from Foggia. It is inclosed by old walls, has a cathedral, a royal college, museum, and a bishop's palace, considered the finest building in Apulia. *Pop.* 14,000.

LUCERNE, *loo-sairn'*, a canton lying almost in the centre of Switzerland, and inclosed by the cantons of Zurich, Schweitz, and Unterwalden. *Area*, 588 square miles. *Desc.* Level in the N., but mountainous in the S., with a generally fertile soil. *Rivers.* The principal is the Emmen. *Lakes.* The Baldegg and Sempach Lucerne and Zug form part of its E. limits and wine; but cattle-rearing and dairy h the principal branches of industry. *Pop.* is the chief of the Swiss Roman Catholic

## Lucerne

LUCERNE.

LUCERNE, the capital of the above canton, stands on both sides of the Reuss, 25 miles from Zurich. It is built on a gentle eminence, surrounded by a wall and towers, and contains several handsome edifices, with neat groups of houses on the lake. Of the public buildings, the principal are the town-hall, the watch-tower, the arsenal, gaol, theatre, and several covered bridges. The churches are of Gothic architecture; and there are both monasteries and convents. *Pop.*

10,500. *Lat.* 47° 3′ 27″ N. *Lon.* 8° 18′ 35″ E. This is one of the three seats of the Swiss diet.

LUCERNE, a lake of Switzerland, between the cantons of Unterwalden, Lucerne, Schweitz, and Uri. *Ext. Length*, 25 English miles, with a breadth of from half a mile to 2 miles. Its scenery is remarkably picturesque, and a steamer plies on the water, from one end to the other, twice a day in summer.

LUCHON. (*See* BAGNÈRES DE LUCHON.)

LUCIA, St., *lu'-she-a*, one of the Windward Islands, in the West Indies, about 30 miles to the S. of Martinique. *Desc.* It exhibits a variety of hills; amongst others, two that are remarkably round and high, said to be volcanoes. At the foot of them are fine valleys, having a good soil, and well watered. The elevated parts are covered with thick forests; but the climate is not generally healthy. *Pop.* 25,000. *Lat.* 13° 40′ N. *Lon.* 61° W.—In St. Lucia are several commodious bays and harbours, with good anchorage. The English first settled in this island in 1637; in the year 1763 it was ceded to France. The English took it in the year 1779, but restored it at the peace in 1783; again in the year 1794.

LUCIAN, *lu'-she-an*, a celebrated Greek writer. His father, who was poor, placed him with a sculptor; but, disliking that business, he applied to the law, which profession he also abandoned, and devoted himself to philosophy and eloquence. Marcus Aurelius had a great esteem for his talents, and appointed him registrar of Egypt. His works, which are written in the Attic dialect, consist mostly of satirical dialogues, abounding with witticisms, but profane and obscene. The best editions of Lucian are those of Lehman and Didorf. Tooke, Bloont, and Franklin have given English translations of his writings. D. at an advanced age, about 200.

LUCILIUS, Caius, *lu-sil'-e-us*, a Roman satirist, who served under Scipio in his expedition against the Numantians. He is considered by some as the author of ··al satire; but only a few of his verses remain, ·· the "Corpus Poetarum" of Maittaire. , B.C. 103.

Pope, *lu'-she-us*, succeeded Cornelius in ·· martyred the year following.

·US II., a native of Bologna, succeeded Celestin II. in 1144, and died in 1145, of a blow which he received in a popular commotion.

LUCIUS III. succeeded Alexander III. in 1181. The Roman people having risen against him, he retired to Verona, but afterwards returned to Rome, and, by the help of the Italian princes, subdued his enemies. A new commotion compelled him, however, to retire again. He made a constitution for the extirpation of heresies, which laid the foundation of the Inquisition. D. at Verona, 1185.

LUCKAU, *loo'-kou*, a town of Prussia, 52 miles from Frankfort. *Manf.* Woollens, linens, and powder. *Pop.* 4,600.

LUCKENWALD, *look'-en-vald*, a town of Prussian Saxony, 32 miles from Berlin. *Manf.* Woollens, linens, leather, iron goods, beer, and spirits. *Pop.* 7,500.—It is a station on the Berlin and Anhalt Railway.

LUCKIMPOOR, *look-im-poor'*, a town of Assam, in Further India. It stands in a district of the same name, in the presidency of Bengal. *Lat.* 27° 20′ N. *Lon.* 94° 3′ E.—The DISTRICT has an area of 2,950 square miles, and a population of 30,000.

LUCKNOW, *luk'-nou*, a city of Hindostan, and capital of a district of the same name, in the province of Oude, on the river Goomtee, which falls into the Ganges, 170 miles from Benares. The streets are narrow and very irregular; but it has an imposing appearance, the gilt domes of the mosque, and the mausoleum of Asoph ad Dowleh, imparting to it, from a distance, an appearance of splendour. The nabob's gardens are handsome, and previous to the Sepoy rebellion of 1857, the British military cantonments were about 4 miles from the city. *Pop.* Estimated at between 200,000 and 300,000. —In 1857, this place was besieged by the rebels, but was bravely defended by the troops under Brigadier Inglis, who had the command of the garrison. Sir Colin Campbell came, relieved the garrison, and effected one of the most masterly retreats on record in the annals of Indian warfare.

LUCON, *loo'-kawng*, a parish and town of France, in the department of La Vendée, 16 miles from Fontenoy. *Manf.* Porcelain, and it has an active export trade. *Pop.* 5,000.

LUÇON, LUZON, or LUCONIA, *loo'-thon*, the principal of the Philippine Islands, in the Eastern archipelago, on which stands Manilla, the metropolis. *Area.* Estimated at 56,000 square miles, of which the Spanish portion is more than one half. *Desc.* The country is, for the most part, mountainous, being intersected in its whole length by an elevated ridge, from which other ridges diverge, and spread over the whole island. In some places, the detached mountains assume a conical figure, in the midst of extensive plains. The climate is moist, but it is temperate, considering the situation of the island within the tropics, and the soil is fertile. *Pro.* Cotton, indigo, sugar, tobacco, coffee, wax, ebony, besides all sorts of tropical produce. *Minerals.* Rock-salt, iron, gold, and copper. There are several volcanoes in this island, which is under the dominion of the Spaniards, whose government is very tyrannical. The inhabitants are mostly Malays, but in the wilder parts the Papuan race are found. *Pop.* 2,270,000. *Lat.* between 13° and 19° N. *Lon.* from 120° to 124° E.

LUCRETIA, *lu-kre'-she-a*, a celebrated Roman lady, was the daughter of Lucretius, governor of Rome, and the wife of Collatinus, a relation of Tarquin. Her husband being at the siege of Ardea, a conversation took place, one evening at supper, between him and the three sons of Tarquin, respecting the prudence of their wives. At length it was agreed upon to ride to Rome to see how the ladies were employed. The daughters-in-law of Tarquin were regaling with some companions of their own age, while Lucretia was engaged with her maidens in working upon wool. The dispute having terminated in her favour, the young men returned to the camp; but Sextus, the eldest of the king's sons, conceived a violent passion for Lucretia, which he was determined to gratify, without any regard to the principles of honour. Accordingly, some days after, he secretly left the camp and visited Lucretia, who treated him with the civility due to his rank. After supper he was conducted to his chamber; and, when he thought that the family were asleep, he stole softly, with a sword in his hand, to Lucretia's room, and made use of every effort to prevail over her virtue. Finding his artifices fruitless, he threatened, that, after slaying her, he would kill a slave, and lay the body by hers; then report that, having caught them together, he had slain them both. This menace succeeded; for the dread of dishonourable reproach prevailed over Lucretia, and the base seducer returned in the morning to the camp. Lucretia, the next day, sent for her father and her husband, to whom she related the shocking circumstance. They endeavoured to console her, but in vain, for, drawing forth a dagger, she plunged it into her breast. Lucretia's death occasioned the liberty of the Romans, who, excited by Brutus, expelled the Tarquins from their city. Sextus fled to a town of the Gabii, where he soon after perished, 509 B.C.

LUCRETIUS, Titus Carus, *lu-kre'-she-us*, a Roman poet and philosopher, was born of a good family, and educated under Zeno and Phædrus, both of the Epicurean sect. Cicero highly commends him for his learning and eloquence. His poem "On the Nature of Things" is elegant, but is founded on the doctrines of Epicurus. Lucretius has been translated into English, with notes, by Creech, and has been published in Bohn's "Classical Library." B. 95 B.C.; D. 52 B.C.

LUCULLUS, Lucius Licinius, *lu-kul'-lus*, a celebrated Roman general and consul, who gained a great victory over Mithridates, on the borders of the Granicus, B.C. 74, and conquered Bithynia. He also defeated Tigranes, king of Armenia, father-in-law of Mithridates, and took his capital; but the severity of Lucullus to his soldiers gave such offence, that he was recalled, and the command given to Pompey. On his return to Rome, he obtained a triumph, and then retired to a private life, possessed of immense riches. He collected a prodigious library, and patronized learned men. B. about 115 B.C.; D. 49 B.C.

LUDLOW, Edmund, *lud'-lo*, an English parliamentary general, who studied first at Oxford, and afterwards in the Temple; but the civil wars breaking out, he quitted the law for the army, and served under the earl of

Essex. He was a firm republican, and was one of the members of the high court of justice which sentenced Charles I. to the scaffold. On the death of Ireton, he had the command of the army in Ireland; but was deprived of it for opposing the usurpation of Cromwell. In the parliament under Richard Cromwell, he obtained a seat, and was restored to his command in Ireland, but was again recalled. Just before the restoration of the king, he went to Vevay, in Switzerland, where he resided till 1688, when he ventured to return to England; but the House of Commons applying to King William to cause him to be apprehended, he withdrew again to Vevay, where he died, in 1693. B. about 1620.—His memoirs, which are curious and accurate, were printed after his death.

LUDLOW, a well-built market-town of Shropshire, on the Teme, over which is a stone bridge, 25 miles from Shrewsbury. The public buildings are the church, a very spacious and stately-looking edifice, extending in length 228 feet, and 73 in breadth; the market-house, and the town-hall. There are several charities, both for education and for the relief of the distressed. *Pop.* 5,400.

LUDWIGSBURG, *lood'-vigs-boorg*, a well-built town of Germany, in Wurtemberg, on the Neckar, 7 miles from Stuttgart. It has a palace, several churches, arsenal, theatre, lyceum, orphan asylum, and workhouse. *Manf.* Woollen, cotton, and linen fabrics, leather, earthenware, needles, and jewellery. *Pop.* 8,300.

LUGANO, *loo-ga'-no*, a town of Switzerland, on Lake Lugano, 16 miles from Como. It is one of the three capitals of the canton Ticino, and is an entrepôt of the trade between Switzerland and Italy. Near it are many grottos. *Pop.* 5,000.

LUGANO, LAKE OF, a lake in the south of Switzerland, in the canton of the Ticino, mostly encompassed by lofty wooded and precipitous mountains. *Ext.* 16 miles long, with an average breadth of 2. Along its shores an active navigation trade is carried on.

LUGO, *loo'-go*, a city of Spain, in Galicia, near the Minho, 50 miles from Santiago. It has a cathedral of Gothic architecture, with several churches and convents. *Manf.* Leather and thread stockings. *Pop.* 7,500.—In the time of the Romans, the mineral baths of this place were famous.

LUGO, a town of Italy, in the province of Ferrara, on the Senio, 32 miles from Ferrara. It has a large annual fair, and is an important place of trade. *Pop.* 10,000.

LUITPRAND, *lwe'-pran*, a Lombard historian, was secretary to Berengarius, regent of the kingdom of Italy, who also employed him as his ambassador to Constantinople. He afterwards became bishop of Cremona, and was sent, in 962, by Otho I., emperor and king of Italy, on a mission to Rome. In 968 he went on an embassy to Constantinople, where he was thrown into prison by the orders of Nicephorus Phocas, for his zeal in defending the interest of his master. After remaining in confinement some months, he returned to Italy. He wrote the History of the Affairs of Europe in his time, and other works valuable for their historical information. D. at Pavia, early in the 10th century; D. about 970.

LUKE, St., *luke*, the Evangelist. His native country is unknown: Eusebius and Jerom state that he was born at Antioch; but Clement, Tertullian, and Origen make no mention of the fact. According to some, he was one of the seventy disciples sent forth by Christ. Tradition affirms that, subsequently to St. Paul's first liberation from prison, St. Luke went to Achaia, and there wrote his gospel and the Acts of the Apostles, and that he died at an advanced age.

LULLY, Raymond, *lool'-le*, called, according to the custom of his age, the Enlightened Doctor. Falling in love with a young woman who had a cancer, he applied himself to the study of chemistry and physic, for the purpose of discovering a remedy for her complaint, in which he is said to have succeeded. He afterwards became a preacher, and went on a mission into Mauritania, where he was stoned to death by the natives in 1315. His works on theology, physic, philosophy, chemistry, and law, have been frequently printed, but are very obscure. B. at Palma, Majorca, 1234.

LULLY, Jean-Baptiste, a celebrated musician. He became page to Mademoiselle de Montpensier, niece of Louis XIV., who caused him to be taught music, in which he acquired such excellence as to be made superintendent of music to that king. Lully composed a number of operas and the music of several of Molière's plays. D. at Florence, 1633; D. at Paris, 1687.

LUMPKIN, *lum'-kin*, a county of the United States, in Georgia. *Area*, 546 square miles. *Pop.* 9,000.

LUNAWARA, *loo-na-wa'-ra*, a small state of India, in the division of Guzerat. *Area*, 900 square miles. *Pop.* Unascertained. *Lat.* between 22° 50′ and 23° 16′ N. *Lon.* between 73° 20′ and 73° 47′ E.

LUNCARTY, *lun-kar'-te*, a village of Scotland, 4 miles from Perth, where the Danes were defeated, in 990, by Kenneth III.

LUND, *loond*, a town of Sweden, in the province of Scania, 5 miles from the Baltic, and 21 from Copenhagen. It has a cathedral, and is famous for its university, founded in 1668. *Pop.* 4,500. *Lat.* 55° 42′ 26″ N. *Lon.* 13° 12′ 42″ E.

LUNDY ISLAND lies at the mouth of the Bristol Channel, about 10 miles from Hartland Point. *Area*, 2,000 acres. It is defended, except on its east side, by lofty rocks, and has a lighthouse, mansion-house, and produces good butter. Formerly it was a noted stronghold of pirates.

LUNE, *lune*, a river of England, rising in Westmoreland, and, running through Lancashire, falls into the Irish Sea.—Another of Westmoreland and Durham, which falls into the Tees.

LUNEBURG, *loo'-ne-boorg*, a district of Hanover, formerly a principality of the German empire, lying along the left bank of the Elbe, and forming part of the N.W. frontier of Hanover. *Area*, 4,335 square miles. *Rivers.* Besides the Elbe, it is watered by the Aller, the Ilmenau, the Oker, the Jeetze, the Fuhse, and some smaller streams. *Pop.* 330,000.

LUNEBURG, a walled town of Hanover, the capital of the above district, on the Ilmenau, 68 miles from Hanover. It is inclosed by walls, and has several hospitals, a gymnasium, a military school for nobles, and a cavalry barracks. *Manf.* Woollen, linen, cotton stuffs, and soap; it has also a trade in horses, and a very fine salt-spring. *Pop.* 13,000.—It is a station on the Hanover and Harburg Railway.

LUNEGIANA, *loo-nai-ja'-na*, a former canton of Tuscany, incorporated with Parma since Tuscany became possessed of Lucca.

LUNEL, *loo-nel'*, a town of France, 14 miles from Montpellier. *Manf.* Brandy; and it has a trade in raisins and wine. *Pop.* 6,500.

LUNENBURG, *lu'-nen-berg*, a county in the S. of Virginia, U.S. *Area*, 410 square miles. *Pop.* 13,000, of whom half are slaves.—Also the name of several townships, none of them with a population above 2,000.

LUNEVILLE, *loon'-veel*, a well-built town of France, in the department of the Meurthe, near the junction of the Vezouze and the Meurthe, 15 miles from Nancy. The principal public edifices are the castle, the large and handsome church of St. James, surmounted by two elegant towers; the town-hall, barracks, and principal hospital. The palace was long the residence of Stanislaus, king of Poland. *Manf.* Woollen cloth, yarn, and gloves. *Pop.* 16,000.—Here was concluded the first treaty between Austria and the French republic, in 1801.

LURGAN, *lur'-gan*, a town of Ireland, county of Armagh, Ulster, 15 miles from Armagh. *Manf.* Linens and muslins. *Pop.* 4,300.—It is a station on the Belfast and Ulster Railway.

LUS, *lus*, a province of Beloochistan, bounded on the S. by the Indian Ocean, and on its other sides by Mukran, Jhalawan, and Scinde. *Area*, 5,200 square miles. *Desc.* Generally mountainous; but fertile along the banks of its rivers. *Pop.* 60,000. *Lat.* between 25° and 26° N. *Lon.* between 65° 30′ and 67° E.

LUSATIA, *lu-sai'-she-a*, an old province of the German empire, with the title of a margraviate, lying between the Elbe and Oder, and surrounded by Brandenburg, Bohemia, Silesia, and part of Saxony. It now forms the circle of Bautzen, in Saxony, and part of the regencies of Potsdam, Lignitz, and Frankfort, in the kingdom of Prussia.

LUSIGNAN, *loo-seen'-yawng*, a town of France, in the department of La Vienne, 14 miles from Poitiers. *Pop.*

1,500.—This place is the cradle of the Lusignan family, which, during the crusades, became the sovereigns of Jerusalem and Cyprus.

LUSIGNAN, Guy de, a celebrated French nobleman, who went to the Holy Land in the time of the crusades, and espoused Sibylla, daughter of Amaury, king of Jerusalem, whom he succeeded; but he afterwards conceded that title to Richard I., king of England, and received the isle of Cyprus in return. D. 1194.

LUSIGNY, *loo-seen'-ye*, a town of France, in the department of the Aube, 8 miles from Troyes. *Pop.* 1,000.—Here, in 1814, Napoleon I. rejected the terms of peace offered by the allies.—The name of several other small towns in France.

LUSS, *luss*, a parish of Scotland, on Loch Lomond, in Dumbartonshire. *Area*, 33 square miles. *Pop.* 1,000.

LUSSAC, *loos'-sak*, the name of several parishes and towns in France, none of them with a population above 3,000.

LUSSIN. (*See* LOSINI.)

LUTHER, Martin, *lu'-ther*, the great religious reformer, was the son of Hans Luther, a miner and metal-worker. In 1501 he was sent to the university of Erfurt, where he studied philosophy and the civil law; but walking one day in the fields with a fellow-student, his companion was struck dead by lightning, which so affected Luther, that he determined to retire from the world. He accordingly entered a monastery of the order of St. Augustine, where he led a pious and studious life; and there happening to meet with a Latin Bible, he read it with the utmost care and avidity, and was struck with the manifest difference between the doctrines of the gospel and the practices of the Roman church. This impression became deeper in 1512, when he went to Rome on some business connected with his monastery. On his return he was

MARTIN LUTHER.

created D.D., and became professor of divinity at the university of Wittenberg, then founded by Frederick, elector of Saxony. In 1517, Leo X. published plenary indulgences, the purchasers of which obtained forgiveness of all sins committed by them. These pardons were sold in Germany by the Dominicans, in the most shameful manner, and gave offence to all religious persons, and to Luther, in particular, who published a "Thesis on Indulgences," at Wittenberg, in which he exposed, in the strongest manner, the iniquity of the odious traffic. The propositions of Luther's Thesis were opposed by Tetzel, the papal agent; but the people at large were convinced that the truth lay on the side of Luther. The dispute growing serious throughout Germany, the emperor earnestly pressed the pope to exert his influence to put a stop to it; and, accordingly, Luther was cited to appear at Rome, which he prudently declined. Leo also demanded the elector Frederick to deliver Luther up to the papal legate, which he refused, at the same time requesting that the cause might be heard in Germany. To this the pope consented, and Luther appeared before Cardinal Caietano, at Augsburg, to whom he gave a full account of his faith; but being required to make an implicit submission to the decrees of the pope, he zealously refused. On this, Leo issued a bull, threatening to excommunicate all who should presume to deny his power to grant plenary indulgences. Luther, on the other hand, appealed, in a public declaration, from the pope to a general council. The followers of Luther increased rapidly; Erasmus approved of his conduct in a great measure, and corresponded with him, but had not the courage to declare himself fully. The learned and amiable Melancthon attached himself firmly to Luther, and, by his prudence and moderation, rendered him essential service. In 1519, Luther had a dispute at Leipsic, with Eckius, professor of divinity at Ingoldstadt. In 1520 the pope issued a formal condemnation of Luther, which was immediately termed, by the reformer, "the execrable bull of antichrist;" and, calling the students of Wittenberg together, he flung the pope's bull and decretals into the fire. The year following, he attended the diet of Worms, by virtue of a safe-conduct from the emperor Charles V.; and when his friends endeavoured to dissuade him from going, by urging the case of Huss, he said, that "if there were as many devils at Worms as tiles upon the houses, he would go." He was here required to retract his opinions, and to promise submission to the pope, both which he resolutely refused. On his return through a wood, he was seized by a party of horse, who conveyed him to a castle belonging to the elector of Saxony, where he was so secretly kept, that no one knew what was become of him, except the persons concerned in the affair. In the mean time, the emperor published an edict against him, and put under the ban of the empire those who should defend him. Luther, however, was secure in his retreat, which he called his Hermitage and his Patmos; and employed his time in conferences with his chosen friends, and in writing books. After an absence of ten months, he again made his appearance at Wittenberg, where he wrote a severe reply to Henry VIII. of England, who had published a book against him on the doctrine of the Eucharist. About this time he published a translation of the New Testament into German, which was universally read, though proscribed by imperial authority. In 1523, Erasmus was prevailed on to write against Luther, and chose for his subject the freedom of the human will, which he defended against the reformer, who replied in a treatise entitled "De servio Arbitrio," which was answered by Erasmus in another, called "Hyperaspistes." In 1525, Luther married Catharine von Bora, a nun, who had escaped from a convent; on which his enemies accused him of immorality and impiety; but Luther defended his act on scriptural grounds. In 1529 the emperor convened a diet at Spires, to procure aid from the German princes against the Turks, and to devise means for allaying religious disputes. In this assembly it was ordered that the mass should be universally observed throughout the empire. Against this decree the electors of Saxony and Brandenburg, and other princes, entered their protest; on which account the reformed party acquired the name of Protestants. These princes then entered into a league for their mutual defence against the emperor. In 1530 was drawn up by Melancthon the Confession of Augsburg, which was received as the standard of the Protestant faith in Germany. In 1535, Luther's translation of the Bible into German was published. In 1537, Luther was attacked with a dangerous illness, but recovered, and went on writing books, and labouring to promote the great work of reformation. The mind of Luther was ardent and impetuous, but honest, and earnestly bent on the discovery and propagation of religious truth. His manners were becoming his profession, and his whole life evinced a zeal for the glory of God and the welfare of man. He was a multifarious and voluminous writer; a complete edition of his works, in 26 vols., was published at Erlangen, in 1833. A translation of Luther's "Table

Talk" was published in London, 1819; a work which, together with his Letters and Sermons, will be found deeply interesting to the general reader. B. at Eisleben, Saxony, 1483; D. 1546.

LUTON, *lu'-ton*, a market-town of Bedfordshire, 18 miles from Bedford. It lies between the ranges of the Chiltern Hills, and has a Gothic church, an hospital, and a union workhouse. *Manf.* Straw hats. *Pop.* 13,000.

LUTTERBERG, *loot'-ter-bairg*, a town of Germany, 23 miles from Brunswick, in the district of Hartz. *Pop.* 1,300. Here Christian IV., king of Denmark, was defeated by Tilly, in 1626.

LUTTERWORTH, *lut'-ter-werth*, a market-town of Leicestershire, on the Swift, 14 miles from Leicester. The pulpit in the church, which is a large and handsome building, is the same in which the celebrated Wickliffe addressed his congregation. There is also a portrait of the great reformer, who died here in 1384. *Manf.* Hosiery and ribbons. *Pop.* 2,500.

LUTTICH. (*See* LIÈGE.)

LUTZEN, *loot'-sen*, a town of Prussian Saxony, in the principality of Merseburg, 11 miles from Leipsic. *Pop.* 2,000. This place is memorable as the scene of two engagements; one in 1632, in which Gustavus of Sweden was killed; and the other in 1813, when the French, under Bonaparte, defeated the combined forces of Prussia and Russia.

LUXEMBURG, GRAND DUCHY OF, *loox'-em-boorg*, a state of Europe, inclosed by France on the S., on the N. and E. by Rhenish Prussia, and on the W. by Namur. It was formerly annexed to Belgium, but by the revolution of 1830, it was dismembered, and, in 1839, divided between the Netherlands and Belgium. The Dutch portion has an area of 990 square miles, and a population of 190,000; the Belgian portion has an area of 1,695 square miles, and a population of 190,000.—French LUXEMBURG is now comprised in the department of the Moselle.

LUXEMBURG, the capital of the above province, on the Alsetz, and one of the strongest places in Europe, 46 miles from Arlon. It is divided into the Upper and Lower town, communicating by many steps and irregular winding streets. The only public building worth notice is the governor's castle. *Manf.* Woollen cloth, stockings, and the finer earthenware. There are also a cannon-foundry and iron-forges. *Pop.* 12,000. It was taken by the French in 1795, and finally lost by France in 1814.

LUXEMBURG, Francis Henry de Montmorency, Duke of, a famous general and marshal of France, was the posthumous son of Francis de Montmorency, count of Bouteville, beheaded under Louis XIII. for fighting a duel. At the age of 15, he was at the battle of Rocroi, under the great Condé. He served as lieutenant-general at the taking of Franche-Comté, in 1668, and in the Dutch campaign of 1672, about which time he effected a famous retreat with an army of 20,000 men against 70,000. In 1675 he was made marshal of France. In 1690 he gained the battle of Fleurus, which was followed by the victories of Leusen, Steinkirk, and Nerwinde. B. 1628; D. 1695.

LUXEUIL, *loox'-e(r)-e*, a town and parish of France, in the department of the Upper Saone, 10 miles from Lune. *Manf.* Cutlery, hardware goods, and paper. *Pop.* 4,300.

LUXOR, *lux'-or*, a village of Upper Egypt, on the right bank of the Nile, 2 miles from Carnac. It stands on a portion of the site of the ancient Thebes, and has one of the most magnificent ancient temples extant. The celebrated obelisk, known as that of Luxor, was transported to Paris, and placed in the Place de la Concorde. (*See* THEBES.)

LUZERN, a canton of Switzerland. (*See* LUCERNE.)

LUZERNE, *lu-zern'*, a county of the United States, in Pennsylvania. *Area*, 1,265 square miles. *Pop.* 57,000.—Also the name of several townships, none of them with a population above 2,000.

LUZON. (*See* LUCON.)

LYCOMING, *li-kom'-ing*, a county of Pennsylvania, U.S. *Area*, 928 square miles. *Pop.* 28,000. Also a township on Lycoming Creek *Pop.* 2,000.

LYCOPHRON, *lik'-o-fron*, a poet and grammarian, who lived at the court of Ptolemy Philadelphus, and formed one of the seven poets known as the Pleias. He was a voluminous writer, but only one of his poems has come down to our own times,—that entitled "Cassandra," which is a long and enigmatical work that has been much commented on by the Greek grammarians. Ovid states that he was killed by an arrow. Lived in the third century B.C.

LYCURGUS, *li-kur'-gus*, the famous Spartan lawgiver. The records of his birth and of the period of his existence are very obscure; but he is stated to have been the son of Eunomus, king of Sparta, and brother of Polydectes, who succeeded his father. After the death of Polydectes, his widow offered the crown to Lycurgus, though she was then with child; but he refused, and faithfully discharged the duty of regent and guardian during the minority of his nephew Charilaus. When the young prince came of age, Lycurgus left Sparta, and travelled into several countries to observe their laws and manners. On his return home he found the kingdom in a state of confusion; the king endeavoured to reign despotically, and the people would not obey. Lycurgus undertook to reform the government, and introduced the most rigorous laws, yet such as were admirably adapted to civilize a disordered people. After this he quitted Sparta, and is supposed to have died in Crete, at an advanced age, about 870 B.C.

LYCURGUS, an Athenian orator. He is said to have studied philosophy under Plato, and rhetoric under Isocrates. He was the friend of Demosthenes, and a zealous advocate for liberty. One of his orations is included in Reiske's collection of Greek orators. D. about 323 B.C.

LYDFORD, *lid'-ford*, the name of three parishes in England, none of them with a population above 2,000.

LYDGATE, John, *lid'-gait*, an Augustine monk of St. Edmund's Bury, in the reign of Henry VI. He was a poet and successor of Chaucer. As a poet he was most versatile and prolific. Ritson, in his "Bibliographica Poetica," has enumerated no fewer than 251 short works by him. The "History of Troy," "Story of Thebes," and "Fall of Princes," are his best poems. He is also said to have been a good mathematician and an accomplished scholar. B. about 1375; D. about 1461.

LYDUS, Joannes Laurentius, *lī'-dus*, a celebrated Greek writer, who, during forty years, filled several important posts at the court of the emperor Justinian. Three of his works have survived; these being treatises on the "Magistrates of the Roman Republic," on "The Months," and on "Omens and Prodigies," all of which were included in Bekker's "Corpus Scriptorum Historiæ Byzantinæ," published at Bonn, 1837. B. about 490; D. about 560.

LYE, Edward, *lī'*, an English clergyman, who devoted himself, with the greatest success, to the study of the Saxon and Gothic languages and literature. Besides other important works, he gave to the world a "Dictionary of the Anglo-Saxon and Gothic Languages," which was published in 1772, a few years after the compiler's death. B. at Totness, 1704; D. 1767.

LYELL, Sir Charles, *lī'-el*, a distinguished modern geologist. He was educated at Exeter College, Oxford, and ultimately commenced practice at the bar; but his private means making him independent of his profession, he gave himself exclusively to the study of geology. In 1832 he was named professor of geology at King's College; but this appointment he soon afterwards resigned. From the commencement of the publication of the Geological Society's Transactions, he was a regular and valuable contributor. In 1830 appeared the first volume of his great work, "The Principles of Geology." This was completed in 1834, passed through many editions, and attracted the attention of the whole geological world. Another extraordinary book by him was produced in 1838, entitled "Elements of Geology." These two works have exercised the most marked influence upon geological inquiry, since the date of their first publication. The intention of these works was fully stated by Sir Charles Lyell himself:—"The 'Principles' treat of such portions of the economy of existing nature, animate and inanimate, as are illustrative of geology, so as to comprise an investigation of the permanent effects of causes now in action, which may serve as records, to after-ages, of the present condition of the globe and its inhabitants. Such effects are the enduring

monuments of the ever-varying state of the physical geography of the globe,—the lasting signs of its destruction and renovation,—and the memorials of the equally fluctuating condition of the organic world. They may be regarded as a symbolical language, in which the earth's autobiography is written. In the 'Elements of Geology,' on the other hand, I have treated briefly of the component materials of the earth's crust, their arrangement and relative position, and their organic contents, which, when deciphered by the aid of the key supplied by the study of the modern changes above alluded to, reveal to us the annals of a grand succession of past events,—a series of revolutions which the solid exterior of the globe and its living inhabitants have experienced in times antecedent to the creation of man." Sir Charles Lyell made two visits to the United States of America, and published many memoirs relative to the geology of the New World. The continent of Europe was also travelled over, and its geological facts described by him. A general account of his journeys in America was published by Sir Charles Lyell, entitled "Travels in North America," and "A Second Visit to the United States." His scientific observations, both in the New World and on the continent of Europe, were produced in the "Transactions of the Geological Society," reports of the British Association, and in English and American scientific journals. His great services to the cause of geological science obtained for him, in 1848, the honour of knighthood. He was twice elected president of the Geological Society, and in 1855 his university conferred upon him the title of D.C.L. D. at Kinnordy, Forfarshire, 1797.

LYME, *lime*, the name of several townships in the United States, none of them with a population above 3,000.

LYME REGIS, *re'-gis*, a market, borough, and seaport of Dorsetshire, 9 miles from Bridport. It is noted for its excellent artificial harbour, round which are several small forts. The principal buildings are a parish church, custom-house, town-hall, and assembly-rooms. *Pop.* about 4,000.—Here the Dutch fleet, in 1672, was defeated. It is the birthplace of Admiral Summers, the discoverer of the Bermudas. In 1839 it was visited by an earthquake, which caused considerable alarm.

LYMINGTON, *li'-ming-ton*, a borough, market, and seaport-town of Hampshire, opposite Yarmouth, in the Isle of Wight, now a considerable resort for seabathing. It is 12 miles from Southampton, and has a church, town-hall, custom-house, theatre, baths, and workhouse, besides shipbuilding-yards and salt-works. *Pop.* 5,300.

LYNCHBURG, *linch'-berg*, the capital of Campbell county, Virginia, U.S., 160 miles from Washington. It has several churches and chapels. *Manf.* Tobacco, cottons; and there is an iron-foundry. *Pop.* 9,000.

LYNCOMBE, *lin'-kum*, a parish of Somersetshire, contiguous to Bath. It has a Roman Catholic college. *Pop.* 10,000.

LYNDHURST, *lind'-hurst*, a parish and village of Hampshire, 8 miles from Southampton. *Pop.* 1,600.—In the neighbourhood, the spot is shown where William Rufus was slain, in the New Forest. All the forest courts are held at Lyndhurst, where is also the residence of the lord warden of the forest.

LYNDHURST, John Singleton Copley, Lord, a celebrated modern English judge and statesman. His father, an eminent painter, had emigrated to America, where the future English peer first saw the light. When about two years of age, his father took him to England, where he was ultimately educated, first by a private tutor, and afterwards at Trinity College, Cambridge. He was elected fellow of his college, and received the appointment of "travelling bachelor;" upon which he visited the United States. On his return to England, he commenced the study of the law, and in 1797 was called to the bar. Although his great abilities were generally admitted amongst the members of his own profession, still he was almost unknown to the general public till the year 1817, when he assisted Sir Charles Wetherell in defending Watson and Thistlewood on their trial for high treason. His singular talents, as displayed on this occasion, recommended him to the governing party of the time; and, although he had hitherto evinced liberal views in politics, he embraced the offers made to him by the Tory party. In 1818 he became chief-justice of the county palatine of Chester; and soon afterwards entered parliament for the borough of Yarmouth, in the Isle of Wight. In 1819 he rose to the grade of king's serjeant, and was in the same year knighted and appointed solicitor-general. In the following year he conducted the prosecution in two great trials,—the Cato-Street conspirators, and that of Queen Caroline in the House of Lords. He became attorney-general in 1824, and in 1826 he was made master of the Rolls. When the question of the Roman Catholic emancipation came before the House of Commons, in 1827, he energetically opposed the measure; but two years afterwards he strenuously supported it, declaring that he "felt no apprehension for the safety of the church." He had previously accepted the chancellorship, and had been created Lord Lyndhurst. In 1830 he was appointed chief baron of the Exchequer, and in that capacity earned the highest distinction as an acute and impartial judge. During the proceedings consequent upon the introduction of the Reform Bill into the House of Lords, so strenuous was his opposition, that he was regarded as the head of the Conservative party in the Upper House. At one period it was actually proposed to him to form a new ministry, in conjunction with the duke of Wellington; a project which fell to the ground on account of the refusal of Sir Robert Peel and other moderate Conservatives to join his cabinet. In 1834, the great seal was confided to him under the Peel administration; but he retired with his party a short time afterwards. In 1841, however, Sir Robert Peel returned to power; whereupon Lord Lyndhurst, for the third time, accepted the chancellorship, and retained it until the retirement of his chief, in 1846. From that period, his speeches in the House of Lords became fewer in number, but carried no less weight with his hearers. When past the great age of 80 years, he delivered remarkable speeches relative to the war with Russia, on Cambridge University reform, the Wensleydale peerage, and the defences of the country. D. at Boston, United States, 1772.

LYNE, *line*, a river of Scotland, rising on the borders of Edinburghshire, and, after a course of 20 miles, falling into the Tweed above Peebles.—Another, of England, in Staffordshire, which falls into the Trent.—Another, of Northumberland, which falls into the sea.

LYNN, *lin*, a township of Massachusetts, U.S., 13 miles from Boston, much frequented by sea-bathers. *Pop.* 15,000.

LYNN REGIS, or KING'S LYNN, a borough, market-town, and seaport of England, in Norfolk, on the Ouse, about 10 miles from its mouth, and 26 from Ely. Four rivulets run through the town, over which are a number of small bridges. On the land side, the town is wholly surrounded with a deep fosse, flanked by a strong wall, formerly defended by nine bastions, but now much dilapidated. The public buildings are the church of St. Margaret, St. Nicholas's chapel, a neat old building; the chapel of St. James, now converted into an hospital; the Exchange, or custom-house; the Guildhall, an ancient building of stone; the new theatre, gaol, mechanics' institute, market-house, several hospitals and schools. It has an active export and import trade in coal, wine, corn, timber, hemp, wool, and Canadian produce. *Pop.* 20,000.—From this place steamers ply to Hull, and it has a station on the East-Anglian Railway.

LYONS, or more properly LYON, *li'-ons* (Fr. *le'-ong*), a large and celebrated city in the S.E. of France, the capital of the department of the Rhone, situate on the tongue of land inclosed between the Rhone and the Saone. It is surrounded by a rampart, and is more remarkable for its trade than for its elegance. The streets are dark and gloomy except in the more modern parts of the town, such as the square of Louis le Grand, and the quays along the Rhone, where they display considerable elegance. Of the public buildings, the most noted are the town-hall and the large hospital called Hôtel-Dieu. The cathedral, one of the oldest churches in France, is a large building in the Saracenic style, and the church of Ainay deserves attention as a relic of antiquity; but of the other churches of the city, those of the Chartreux and St. Nizier alone deserve to

be visited. The other buildings are the archiepiscopal palace, the arsenal, the exchange, and the mint. Lyons has a variety of antiquities, the remains of an aqueduct, a theatre, reservoirs, and mosaics. Of its literary institutions, there are an academy of sciences, founded in 1700, and an academy of fine arts in 1724. It has a primary and secondary school, school of design called "Institution de la Martinière," a national college, and the residences of many foreign consuls. *Manf.* For these Lyons is celebrated; particularly for its extensive fabrics of silk, gold and silver brocade, plain, double, and striped velvet, richly embroidered taffeta, and satin; also gold and silver laces or galoons, gauze, ribbons, and silk stockings; hats, leather, carpets, and coloured paper. The printing and bookselling of this place are the next to Paris in importance. In regard to population and commercial importance, it is the second city of France. The quays, which extend along the Rhone, are bordered with rows of trees, and are little inferior in beauty to those of Paris. *Pop.*178,000. *Lat.*45°45′44″N. *Lon.* 4° 49′ 34″E. Lyons was founded about 42 years before the Christian era, and suffered greatly during the revolution, from the conflicts of hostile parties. It is the birthplace of Germanicus, the emperors Claudius, M. Aurelius, and Caracalla; of the botanist Jussieu, Jacquard, and Camille Jourdan, and is connected by railway with Marseilles, Paris, and the Loire at Roanne.

Lyons, or Lyon, Gulf of, the N. W. part of the Mediterranean Sea, extending along the S. coast of France, from the coast of Catalonia to the Gulf of Genoa.

Lyons, Edmund, Lord, a distinguished British admiral. He was sent, at a very early age, to Hyde-Abbey School, near Winchester; but little time was spent in a merely school education, as he entered the navy as a volunteer of the first class in 1800, when he was but ten years and a half old. He was first sent on board the *Royal Charlotte* yacht, and, after seeing some service in the Mediterranean, accompanying Sir John Duckworth's expedition to the Dardanelles, and assisting at the demolition of the redoubt on Point Pesquies, on the Adriatic shore, he returned to England in 1807. In the mean time the battle of Trafalgar had been fought. The same year he went to the East Indies, where he remained for the next five years, and where he attained the rank of lieutenant. In the Indian seas he gained considerable distinction, obtaining honourable mention as among the first to scale the castle of Belgica, in the island of Banda Neira, in 1810. For this he was appointed flag-lieutenant to Rear-Admiral Drury. But his most important service was the storming of Fort Marrack, which he took, with scarcely any loss. Returning home in ill health, he was promoted to the command of the *Rinaldo*, 10, in which vessel he formed one of the squadron which, in 1813, escorted Louis XVIII. to France, and the allied sovereigns to England. In 1828 he assisted at the blockade of Navarino, and superintended the naval expedition sent to co-operate with the French in the reduction of the castle of Morea, the last remnant of the Ottoman power in the Peloponnesus. He was afterwards employed in cruising about the Mediterranean, and on one celebrated occasion entering the Black Sea in the first British man-of-war that had ever passed the Bosphorus, and actually visiting the scene of his future labours—Sebastopol. In 1835, Captain Lyons, who had in the mean time received the honour of knighthood and the insignia of several orders, exchanged the naval for the diplomatic profession, being appointed minister plenipotentiary at the court of Athens, which post he filled from 1835 until 1849. In 1849 he was appointed British minister to the Swiss confederation, and, in 1851, was sent to Stockholm in a similar capacity. There he remained until, in November, 1853, war being then imminent, he was appointed second in command of the Mediterranean fleet. If at the outset only second in command, Sir Edmund Lyons was from the first the ruling spirit of the British fleet, and to him was due, in an incalculable degree, the success which attended the English arms on the shores of the Euxine. He it was who organized and conducted the expedition to the Crimea, prepared the means of landing, and superintended all so closely, that, "in his eagerness, he left but six inches between the keel of his noble ship and the ground below it." Not only in this matter of the transport of the troops, but also in every subsequent stage of the expedition, Sir Edmund Lyons gave the most valuable assistance to Lord Raglan and his successors. At the battle of the Alma, he supported the French army by bringing the guns of his ship to bear on the left flank of the Russians. On the first bombardment of Sebastopol, his ship, the *Agamemnon*, was nearest to the Russian batteries. He was present at Balaklava and at Inkermann. It was he who, having conveyed the English soldiers to the Crimea, saved them from being compelled to leave it—baffled, if not vanquished. A day or two after the battle of Balaklava, he learnt, to his astonishment, that orders had been issued to the naval brigade to embark as many guns as possible during the day, for Balaklava was to be evacuated at night,—of course surrendering to the enemy the greater portion of the guns. On his own responsibility the admiral at once put a stop to the execution of this order, and went in search of Lord Raglan, who, it appears, had come to the resolution of abandoning Balaklava, in consequence of the opinion expressed by the engineers, that, after the loss of the redoubts in the rear, lately held by the Turks, the English strength ought to be concentrated on the plateau. Sir Edmund Lyons strongly opposed these views, and having shown to Lord Raglan that the engineers had been mistaken once, he argued they might be wrong again; and he positively declared the insufficiency of Kamiesch as a harbour for the allied armies, and that the abandonment of Balaklava meant the evacuation of the Crimea in a week. After some conversation, Lord Raglan said, "Well, you were right before, and this time I will act upon your advice." Sir Edmund obtained leave to countermand the orders which had been issued; Balaklava was maintained as the base of operations, and the army was saved from what might have proved an inglorious defeat, if not a terrible disaster. This was, perhaps, the most important of all the services rendered by the admiral, and he well deserved the peerage which it earned for him. After a short command in the Mediterranean, he was summoned to escort her majesty to Cherbourg,—the last public duty he fulfilled. D. near Christchurch, Hants, 1790; D. 1858.

Lys, *leeze* (Dutch *lice*), a navigable river of France and Belgium, which, after a course of 100 miles, falls into the Scheldt at Ghent.

Lysander, *li-sian'-der*, a famous Spartan commander in the Peloponnesian war. He prevailed on Ephesus to withdraw from its alliance with Athens, and he entered into a league with Cyrus the Younger. He also defeated the Athenian fleet, after which the city itself fell into his hands; and thus terminated the Peloponnesian war, which had lasted 27 years. Lysander overturned the democracy, and restored the government of the Archons. After this he endeavoured to seat himself on the throne of Sparta, but was unsuccessful. He was slain, fighting against the Thebans, 395 B.C.

Lysias, *li'-se-as*, one of the ten Athenian orators. He assisted Thrasybulus against the Thirty Tyrants. Plutarch mentions 425 of his orations; but of these only 35 remain, with fragments of some others. Editions of his orations have been published in English, by Taylor and others. B. at Athens, 458 B.C.; D. about 378 B.C.

Lysias, general of Antiochus Epiphanes, king of Syria, who sent him against Judas Maccabæus, by whom he was surprised and defeated, with the loss of 5,000 men. Lysias saved himself by flight, and, after the death of Epiphanes, returned to power, as regent, under Antiochus Eupator. He laid siege to Jerusalem; but learning that Philip, who disputed the regency with him, had taken possession of the capital of Syria, he raised the siege, marched against Philip, and defeated him. Both Eupator and himself were subsequently abandoned by their partisans, and slain by their guards, B.C. 162.

Lysimachus, *li-sim'-a-kus*, one of the generals of Alexander the Great, after whose death he made himself master of Thrace, where he built a town called by his own name. He afterwards seized Macedonia, and expelled Pyrrhus from the throne. He was killed in battle by Seleucus, 282 B.C.

Lysippus, *li-sip'-pus*, a celebrated Grecian sculptor,

who is said to have been a self-taught artist. His greatest works were the statue of a man wiping and anointing himself after bathing, which was placed before Agrippa's baths at Rome, and a statue of the sun, represented in a car drawn by four horses, at Rhodes. Flourished in the 4th century B.C.

LYTHE, *lithe*, a parish of the N. Riding of Yorkshire, 3 miles from Whitby. *Pop.* 3,300.

LYTTELTON, Edward, Lord, *lit'-tel-ton*, keeper of the great seal in the reign of Charles I. In 1644 he was made colonel of a regiment in the king's army at York. D. 1645.

LYTTELTON, George, Lord, an English writer, who was educated at Eton and Christ Church, Oxford. On his return from travel on the continent, he obtained a seat in parliament, where he distinguished himself as a frequent speaker on the side of the opposition; on which account he became secretary to Frederick, prince of Wales, who adhered to that party. In 1744, on the resignation of Sir Robert Walpole, he was made one of the lords of the Treasury. In 1756 he became chancellor of the Exchequer; his qualifications for which office seem to have been but sufficiently small, as he is said to have been unable to master the simplest rules of arithmetic. He was raised to the peerage in 1757, and soon afterwards devoted himself exclusively to literature. His principal works are "Observations on the Conversion of St. Paul," "Dialogues of the Dead," "History of Henry II.," and Poetical Works. Dr. Johnson has included his life amongst those of the English poets written by him. He was a great patron of the modern system of landscape gardening. B. 1709; D. 1773.

LYTTELTON, Thomas, Lord, son of the preceding, was a young nobleman of promising talents, but of dissipated manners. His death is said to have been preceded by a very extraordinary circumstance. He saw in a dream, or otherwise, a young woman dressed in white, who warned him of his dissolution in three days from that time. On the third day, his lordship had a party to spend the evening with him, and about the time predicted said, he "believed he should jockey the ghost;" but, a few minutes afterwards, he was taken faint, and carried to bed, whence he rose no more. D. 1779.—The "Quarterly Review," in 1852, endeavoured to set up a claim for this young nobleman to be considered the author of the "Letters of Junius" (*see* JUNIUS); but the hypothesis was soon abandoned.

LYTTON, Sir Edward Lytton Bulwer, *lit'-ton*, a celebrated English novelist and dramatic writer. Immediately after leaving the university of Cambridge, in 1826, he commenced his literary career by the publication of a volume of poems, entitled "Weeds and Wild Flowers." His first novel, "Falkland," was published anonymously in the following year, and was followed, in 1828, by "Pelham," a witty and brilliant work of fiction, the success of which decided its author to continue his labours in the same path. The limits of our space forbid us even to enumerate the many fine novels produced by Sir Edward between "Pelham" and his latest successes in the same walk,—"The Caxtons" and "My Novel." As a poet, he displayed grace, feeling, and musical versification; while, as a playwright, he was the author, among other similar productions, of the most popular play of modern days,—"The Lady of Lyons." In 1831 he entered parliament as member for St. Ives, and attached himself to the Whig party. After a long absence from the House of Commons, he was returned as representative for Herts in 1852, whereupon he became an adherent of the political views of Lord Derby, and, on the accession of the Conservatives to power, formed a member of the ministry, as colonial secretary. A man of prodigious industry, he showed himself equal to the highest efforts in literature; fiction, poetry, the drama, all were enriched by his labours. As a politician, he could scarcely be included in the first rank, and his oratory, though sufficiently fluent and impressive, could not be deemed of the highest order. In 1843 he succeeded, on the death of his mother, to the Knebworth estates, worth £12,000 a year, and, on that occasion, obtained the royal license to take his mother's maiden name, Lytton, for his surname, and became henceforth known as Sir Edward Bulwer Lytton. During the Melbourne administration of 1835, he was created a baronet, and, in 1856, he became lord rector of the Glasgow University. B. at Haydon Hall, Norfolk, 1805.—Both the wife and son of Sir Edward have distinguished themselves in literature; the first as the authoress of several fashionable novels, written in a sarcastic style, and the latter as the writer of several volumes of poems, produced under the pseudonym of "Owen Meredith."

## M.

MAAB, *mad*, a town of Hungary, in the Hegyalla mountains, 5 miles from Tokay. It is famous for its vineyards. *Pop.* 6,000.

MAAS, Nicholas, *mas*, a celebrated Dutch painter, who excelled in portraits and *genre* subjects. Three of his elaborately-finished pictures are in the National Gallery. B. at Dort, 1632; D. at Amsterdam, 1693.

MAAS, or MAESE. (*See* MANSE.)

MAASTRICHT. (*See* MARSTRICHT.)

MABILLON, Jean, *ma'-be-yawng*, a learned French writer, who assisted Father D'Acherz in compiling his "Spicilegium." The congregation of St. Maur appointed him to superintend their edition of the works of St. Bernard. He afterwards published the "Acts of the Saints of the Order of Benedictines." Colbert sent him to Germany in 1683, to search for manuscripts and other works tending to illustrate the history of France. Mabillon returned with several valuable literary treasures, of which he published an account in a relation of his journey; he afterwards went to Italy for the same purpose. Though his learning and acquirements were immense, he was extremely modest and diffident. B. 1632; D. at Paris, 1707.

MABLY, Abbé de, *ma'-ble*, an eminent French writer on historical subjects, and also the author of a celebrated work,—"The Public Law of Europe, as founded on Treaties." B. at Grenoble, 1709; D. at Paris, 1785.

MABUSE, or MAUBEUGE, John, *ma-booze'*, a celebrated artist, who was employed by Henry VIII., whose children he painted. B. at Maubeuge, Hainault, 1499; D. it is supposed, 1562.

MACADAM, John Loudon, *mak-ăd'-am*, a Scotch surveyor, who invented the system of road-making called after his name. His system was made known in two works, entitled respectively "A Practical Essay on the Scientific Repair and Preservation of Public Roads," and "Remarks on the Present State of Road-making." According to this invention, excellent roads were formed by laying down layers of broken granite or other hard stone, which became hardened into a solid mass by the traffic passing over them. For this invention, he was, in 1827, granted a sum of £10,000 by the government, and offered a baronetcy, which last honour he declined. In the same year he was appointed general surveyor to the commissioners intrusted with the management of the metropolitan roads. B. in Scotland, 1756; D. 1836.

MACAO, *ma-kai'-o*, an island and town of China, in the bay of Canton, and separated from the continent only by a narrow channel, 70 miles from Canton. Here the Portuguese were allowed to build a town and form a settlement, in return for the assistance they gave the Chinese against the pirates by whom the coasts were infested. It was, at one time, a place of the greatest importance to the Portuguese, but it has greatly decayed. Its principal edifices are a collegiate church and other churches, and Chinese temples. At one end of the town is the house where Camoens composed a large portion of his "Lusiad." (*See* CAMOENS.) It has several educational establishments, and its harbour is defended by six forts. *Pop.* 50,000, of whom about 40,000 are Chinese. *Lat.* 22° 11′ N. *Lon.* 113° 32′ E.

MACARTHUR, *mäk-ar'-thur*, the name of two rivers in Australia and of one in New South Wales.

MACARTHY ISLAND, *mäk-är'-the*, lies off the W. coast of Africa, in the river Gambia, 130 miles from its mouth. *Area*, 3 square miles. *Pop.* about 2,000, mostly liberated Africans. This island belongs to Great Britain.

MACARTNEY, George Macartney, Earl of, *mä-kart'-ne*, a distinguished British nobleman, who, after receiving a liberal education, and travelling on the continent, was, in 1764, appointed envoy extraordinary to the

empress of Russia. In 1767 he was constituted ambassador extraordinary to the same court, but soon afterwards he returned, and was employed as secretary to Lord Townsend, viceroy of Ireland. In 1768 he represented Cockermouth in parliament. In 1772 he was nominated a knight of the Bath. In 1775 he went out as governor of the island of Granada; and, in 1776, was created an Irish peer, by the title of Lord Macartney. He continued in Granada till 1779, when, on the capture of those islands by the French, he was made prisoner and sent to France. In 1780 he was appointed governor of Madras, where his conduct obtained such universal approbation that, in 1785, he was appointed governor-general of Bengal; but this office he declined accepting, and returned to England. In 1786 he received a flattering testimony of respect from the Court of Directors, who granted him an annuity of £1,500 for life. The same year he fought a duel with Major-general Stuart, whom he had superseded in India: in this affair his lordship was slightly wounded. In 1792 he was selected to proceed on his most remarkable employment, namely, the embassy to the emperor of China, which mission occupied nearly three years. After his return, he was created an earl of Great Britain. He wrote a "Sketch of the Political History of Ireland," and a "Journal of the Embassy to China." B. near Belfast, 1737; D. at Chiswick, 1806.

MACASSAR, or MANKASSER, *ma-kas'-sar*, the chief settlement of the Dutch in the island of Celebes, 250 miles from Borneo. It is on the S.W. coast, and is mostly inhabited by Chinese, who have an extensive trade, principally with China. It is defended by Fort Rotterdam. *Pop.* estimated at 150,000. *Lat.* 5° 9' S. *Lon.* 119° 12' E.—In 1810 it surrendered to the British, but, in 1814, was restored to the Dutch.

MACASSAR, STRAITS OF, the channel or arm of the sea which separates the islands of Borneo and Celebes. *Ext.* about 350 miles long, and from 110 to 140 miles wide.

MACAULAY, Catherine, *ma-kaw'-lai*, an English historian. Her principal works were, "The History of England from James I. to the Accession of the House of Hanover," 8 volumes, once very popular, but now considered worthless; "The History of England from the Revolution;" "Letters on Education," 8vo; and "Observations on the Reflections of Mr. Burke on the French Revolution." B. in Kent, 1733; D. 1791.

MACAULAY, Lord, a celebrated English historian, orator, essayist, and poet. He was the son of Zachary Macaulay, a Scottish presbyterian, of stern principles and life. His mother, whose maiden name was Mills, had been a schoolmistress at Bristol, was the daughter of a Quaker, and had been trained under the care of the celebrated Hannah More. His father's sister, having been the wife of Thomas Babington, a merchant, the future historian received those names at the baptismal font. From his birth he exhibited signs of superiority and genius, and, more especially, of that power of memory which startled every one by its quickness, flexibility, and range. While he was yet a boy, he was in incessant request to "tell books" to his youthful companions; and at that early date he was in the habit of repeating and declaiming the longest "Arabian Night" as fluently as Schehezerade herself. A little later, he would recite one of Scott's novels, story, characters, and scenery, almost as well as though the book were in his hands. His household books were, however, the Bible and the "Pilgrim's Progress;" and many a strong passage of description or vituperation, salted as they are with biblical words, shows how familiar he had been with scriptural phraseology in early youth. From school he went to the university of Cambridge, where he earned reputation by his verses and his oratory, and by his youthful contributions to Charles Knight's "Quarterly Magazine." He graduated B.A. in 1822, and M.A. in 1826. He had already entered himself of Lincoln's Inn, and been called to the bar. His real entry into literature was through the gates of the "Edinburgh Review," his first effort being the brilliant essay on Milton. During twenty years this first contribution was followed by many others, some from books, some from life, of which the best were unquestionably those on Hastings and Clive, original efforts of his genius working on new material, the gathering of his own eye and ear in the country which they so splendidly describe. His political career was commenced in 1830, under the auspices of Lord Lansdowne, who, seeing an article on the ballot by the young barrister, at once sought him out, and introduced him to parliament as member for Calne. The government made him secretary of the Board of Control for India, and thus secured his talents for the service of the Whigs, an appointment which may be called the best party move in the present generation. In 1834 he went to India as member of the Supreme Council of Calcutta, in two years and a half made a very considerable addition to his fortune, and came back to England to acquire fame. For a few years he united both politics and letters, representing Edinburgh in the House of Commons, and writing articles for the "Edinburgh Review." A quarrel with his constituents broke his connection with the House of Commons, and restored him to literature. It is true, the citizens of Edinburgh again chose him as their representative in 1852; but he was little more than a nominal member, for he only spoke once or twice, and then on questions of no public moment. During the last twelve years of his life his time had been almost solely occupied with the "History of England," four volumes of which were completed and published. Although he was generally believed to be closely engaged with the continuation of his History, he frequently turned aside for other literary tasks; such as the memoirs of Oliver Goldsmith, William Pitt, and others, given—literally given, to Mr. Black for his edition of the "Encyclopædia Britannica." At the time this notice is penned, it is not positively known to what extent the materials left by Lord Macaulay will be available for publication: there is hope, however, that the narrative is complete down to the death of William III. Of his History, a literary journal of influence remarked: "The verdict of mankind on the merits of this very considerable contribution to the history of England is not likely to be unanimous: the taste of contemporaries is never decisive. Lord Macaulay's ambition was to stand in the same rank with Hume. The Messrs. Longman have paid to him the revenues of a prince; we have heard, on the best authority, of one single cheque from publishers to historian for £20,000!" Besides the "History" and the "Essays," he wrote a collection of beautiful national ballads, the well-known "Lays of Ancient Rome." His parliamentary and miscellaneous speeches have also been given to the world in a more accessible form than the pages of Hansard. In 1849 he was elected lord rector of the university of Glasgow: about the same time he became a bencher of Lincoln's Inn. In 1850 he was appointed honorary professor of ancient history in the Royal Academy; three years later, he was rewarded with the Prussian order of Merit, and, in 1857, his honours culminated in his creation as Lord Macaulay. A distinguished French critic paid the following tribute to the English historian:—"Lord Macaulay's history is well adapted to exalt our souls. On beholding the struggles, the efforts, and—why should we not add—the weaknesses of the men who have founded the greatness and the liberty of England, we have learned not to despair of generations which seem to be the most debased. We do not doubt that men of all times and of all countries will thus find in the writings of Lord Macaulay an inexhaustible source of information. He combined with the exact knowledge of facts, which is but the smallest part of the historian's talent, an astonishing variety of judgment, of ingenious parallels, and of elevated considerations, of which the fruit will never be lost. He brought to the study of events, and to the estimate of character, the constant application of those moral laws with which genius itself cannot dispense, and which avenge themselves in a late triumph on those who have disregarded them. It is by this that he has his place among those who have not merely charmed humankind, but who deserved to instruct them. It is to the honour of our age that the loss of such men is deplored not only in the country in which it occurs. The death of Lord Macaulay has been felt wherever there are men who know how to honour noble talent, a life without a stain, and the love of liberty based upon the laws." The great man's remains were consigned to the companionship of the glorious dead in Westminster Abbey. B. at Rothley Temple, Leicestershire, 1800; D. 1859.

MACBETH, *măk-beth'*, a usurper and tyrant of Scotland, in the 11th century. He murdered his kinsman Duncan at Inverness, and then seized upon the throne. He also put to death MacGill and Banquo, the most powerful men in his dominions. Macduff next becoming the object of his suspicions, he escaped into England; but the inhuman tyrant wreaked his vengeance on his wife and children, whom he caused to be butchered. Macduff and Malcolm, son of Duncan, having obtained assistance from the English, entered Scotland and forced Macbeth to retreat into the Highlands, where he was soon afterwards slain in battle by Macduff. The above incidents are closely followed in Shakspere's tragedy.

MACCABEES, *măk'-ka-bees*, a Jewish family, celebrated for heroically resisting the Greek kings of Syria, in the second century before the Christian era. The head of the family was Mattathias, a valiant chieftain, who courageously opposed the orders of Antiochus Epiphanes, to compel the Jewish people to worship idols. He incited his countrymen to revolt, and was proclaimed by them general. He died in the midst of his successes, B.C. 166, leaving five sons,—Judas, Simon, Jonathan, John, and Eleazar.

MACCABEES, Judas, third son of the preceding, and his successor in military command. He continued his father's career of victory, defeated the Syrians in many engagements, and at length became master of Judæa, and purified the temple, B.C. 164. Antiochus himself marched against Judas, but was stricken with a mortal illness on the way. Lysius, and the young king Antiochus Eupator, subsequently invaded Judæa with 100,000 foot, 20,000 horse, 32 elephants, and 300 war-chariots. Judas was compelled to retreat, after a glorious battle, in which his youngest brother, Eleazar, died heroically. Judas was afterwards slain in battle with the Syrians, B.C. 160.

MACCABEES, Jonathan, brother of the preceding. (*See* JONATHAN.)

MACCABEES, Simon, brother of the preceding, whom he succeeded. He took Gaza, and entered into an alliance with Demetrius Nicator, king of Syria, by which the independence of Judæa was recognized. He subsequently carried on a war against Antiochus Sidates, whose generals he compelled to retreat from Judæa. He was assassinated after a glorious administration of ten years, by Ptolemy, his son-in-law.

MACCABEES, Eleazar. (*See* ELEAZAR.)

MACCABEES, the name of seven brothers, of Judæa, who, with their mother, suffered martyrdom at Antioch, during the persecution of Antiochus Epiphanes, B.C. 168. They did not belong to the same family as the preceding.

MACCLESFIELD, *măk'-kels-feeld*, a market-town of Cheshire, on the river Bollin, 18 miles from Manchester. It consists of four principal streets and some smaller ones, and has an old church, a town-hall, ancient gaol, assembly-rooms, theatre, and various schools. *Manf.* Cottons and silks. *Pop.* 40,000. A canal, which joins Peak Forest, connects this town with Manchester and London.

MACCLURE, Sir Robert John Le Mesurier, *măk-klure'*, the discoverer of the north-west passage. He was educated by General Le Mesurier, who had adopted him as his son. After spending some time at Eton, he was transferred to Sandhurst, from which place he, with three other youths, ran away, and went to France. The general, finding that he had a strong inclination for the naval service, obtained for him the appointment of midshipman on board the *Victory*. Having attained the rank of lieutenant in 1836, he volunteered to serve in the exploring expedition then about to be sent to the Arctic seas. Returning from this voyage in little more than a year, he was appointed to the *Hastings*, and went out to Canada, where he acted for a period as superintendent of the dockyard at Quebec. In 1848 he was made first-lieutenant in Sir John Ross's expedition in search of Sir John Franklin and his crew, and, on returning to England, in 1849, he was promoted to the grade of commander. In 1850 he again set out in search of Franklin, being appointed second in command of the expedition, under Captain Collinson. The *Investigator*, Macclure's ship, parted from the *Enterprise*, commanded by Captain Collinson, in a gale, in the Straits of Magellan, and never met again. The *Enterprise* was unable to enter Behring's Straits, and bore away to Hong-Kong to pass the winter; but Macclure, shortly afterwards, succeeded in getting through, and reached Kotzebue Sound. Shortly afterwards, he was met by Captain Kellet, in the *Herald*, and directed to return; but Macclure resolved to proceed on his own responsibility. Beset by ice, he struggled onward, doubled Capes Bathurst and Parry, and discovered a land, upon which were high mountains and verdant valleys, which he named Baring's Island. He subsequently met, upon Prince Albert's Island, a race of aborigines, who had never hitherto held communication with Europeans. Finally, sailing up Prince of Wales Straits, he penetrated into Barrow Straits; that is to say, into the Atlantic Ocean: thus discovering, in 1850, the long-sought north-west passage. On his return to England, he was knighted, and received a reward of £5,000 for his services. D. at Wexford, Ireland, 1807.

MACCRIE, Thomas, *măk'-kre'*, a Scottish writer on ecclesiastical history and polemics. After completing his education, he was licensed as a clergyman by the presbytery of Kelso, and was at once chosen as pastor by a congregation at Edinburgh. In 1812 he produced his "Life of John Knox," a work popular with the educated, no less than the uneducated classes of Scotland, marked as it is by great learning and research. Of a similar character was the "Life of Andrew Melvill." He was at once a strong partisan of Presbyterianism and a simple, pious, and good man. B. in Berwickshire, 1772; D. 1835.

MACCULLOCH, John Ramsay, *măk-kul'-lok*, an eminent statistical writer. Soon after the commencement of the Edinburgh "Scotsman" newspaper, he was employed upon its staff, and ultimately became editor of the same print. He likewise contributed a series of valuable articles to the "Edinburgh Review." His most important labours were, however, the compilation of his Dictionaries of Commerce, and Geography, and the publication of several works relative to political economy. For his services to literature, he received a pension of £200 per annum, and was appointed comptroller of the Stationery office. The titles of his best works are: "A Dictionary, Practical, Theoretical, and Historical, of Commerce, and Commercial Navigation;" "A Statistical Account of the British Empire;" "A Dictionary, Geographical, Statistical, and Historical, of the various Countries, Places, and Principal Natural Objects in the World;" and a "New Edition of Adam Smith's Wealth of Nations." B. in Scotland, about 1790.

MACDONALD, Stephen, *măk-don'-ald*, duke of Tarentum, and marshal of France, who was descended from a Scotch family long settled in France. He distinguished himself at the battle of Jemmappes, and served under General Pichegru in the Low Countries. He crossed the Waal on the ice, under a severe fire, a signal feat of bravery, which ensued in the capture of the Dutch fleet. He was then appointed general of division. In 1798 he was named governor of Rome; subsequently he made a clever retreat before the superior forces of Suwaroff. Having fallen into disgrace for his defence of General Moreau, he remained for a long time without employment; but in 1809 the emperor gave him the command of a division. He performed signal service at the battle of Wagram, and was honoured with the grade of marshal of the empire, and subsequently became duke of Tarentum. He also fought at Lutzen, Bautzen, and Leipsic. After the abdication of Napoleon, he was nominated a member of the Chamber of Peers. In 1816 he became grand chancellor of the Legion of Honour. The latter portion of his life was passed in retirement. B. in France, 1765; D. at Paris, 1840.

MACERAKAI, *măk'-e-rait'-kai*, a county of the United States, in Illinois. *Area*, 576 square miles. *Pop.* 8,000.—Also a town in New York, 120 miles from Albany. *Pop.* 2,000.

MACERATA, *ma-chai-ra'-ta*, a town of Italy, in the States of the Church, on an eminence near the river Chienti, 20 miles from Ancona. It has a university, Jesuits' college, academies, and a public school. *Pop.* 20,000. Under the French, this was the capital of Musone.

MACGILLICUDDY'S REEKS, *măc'-gil-li-kud'-de*, the loftiest mountain-range in Munster, Ireland, running

for about 10 miles between lakes Killarney on the E. and Carra on the W. In the immediate neighbourhood of Killarney, it takes the name of the Glena-Purple Mountain. The highest peak is Carrantual, which attains an elevation of 3,410 feet.

MACGILLWRAY, William, *mäk-gil'-rai*, an eminent Scotch naturalist, who, from the post of assistant to Dr. Jameson in the museum of the Edinburgh University, rose to be professor of civil and natural history in Marischal College, Aberdeen. He was an industrious observer of nature, and contributed valuable reports thereon to various English and Scotch scientific publications. Among the principal of his larger works may be mentioned "History of British Birds," "History of British Quadrupeds," and "Natural History of Dee-Side." D. at Aberdeen, 1852.

MACHIAVELLI, Nicholas, *mak'-e-a-vail'-le*, a celebrated Italian politician and writer. He came of a poor but old family of the Florentine republic, and became secretary and historiographer of the republic of Florence, an office he lost in 1512, when the Medici family re-entered Florence. A year afterwards he was accused with being concerned in a conspiracy against the Medici, and was put to the torture. He, however, declared that he had nothing to confess, and was subsequently released, according to a pardon sent from

MACHIAVELLI.

Rome by Leo X. He resided during several years in privacy, and occupied himself with the composition of most of his many works. In 1521 he was again employed by the Medici on several important missions. He wrote, among other works, "The Golden Ass," in imitation of Lucian and Apuleius; "Discourse on the First Decade of Livy," a "History of Florence," and a treatise, entitled "The Prince." This last work contains the most pernicious maxims of government, founded on the vilest principles. B. at Florence, 1469; D. at the same city, 1527.

MACHYNLLETH, *mak'-in-leth*, an ancient market-town of North Wales, in Montgomeryshire, near the Dovey, 30 miles from Montgomery. *Manf.* Flannel and cottons. *Pop.* 1,700. Here, in 1402, Owen Glendower assembled a parliament.

MACK, Charles Baron von, *mak*, a celebrated Austrian general, who served with distinction in the Low Countries against the French, in 1792-93. In 1798 he was dispatched to command the Neapolitan army against the French. Being defeated by Macdonald and taken prisoner, he was sent to Paris, whence he made his escape, and returned to Austria. In 1805 he assumed command in Bavaria, but was compelled to surrender, with his army of 30,000 men, to Napoleon. For this he was condemned to death; but the sentence was commuted to imprisonment in the fortress of Spielberg, where he remained during two years. B. in Franconia, 1752; D. at Vienna, 1828.

MACKAY, Dr. Charles, *mäk'-ai*, a modern littérateur and poet, who has edited and contributed to the best newspapers, London and provincial, and for several years was employed as editor of the "Illustrated London News." As a poet and song-writer, he has attained considerable popularity. His chief poems are "Voices from the Crowd," "Voices from the Mountains," "Town Lyrics," "The Salamandrine," and "A Man's Heart." He has also produced a novel, and several volumes of the keepsake and annual class. At the time this notice is penned, he is acting as editor of the "London Review." In 1848, the University of Glasgow conferred upon him the degree of LL.D. B. at Perth, 1812.

MACKEAN, *mä-keen'*, a county of Georgia, U.S. *Area*, 1,122 square miles. *Pop.* 6,000.

MACKENZIE, Sir Alexander, *mä-ken'-se*, a celebrated traveller, who emigrated to Canada when a young man, and resided for eight years at the head of the Athabasca Lake, to the west of Hudson's Bay. He was afterwards dispatched on an exploring expedition, discovered the great river known by his name, and reached the great Northern Ocean in *lat.* 69°. In 1792 he again set out on a journey, the object of which was to reach the Pacific. He succeeded in this enterprise, and returned in safety. A narrative of his expeditions was published by himself, in 1801, under the title of "Voyages from Montreal on the River St. Lawrence, through the Continent of North America, to the Frozen and Pacific Oceans." For his services he was knighted, about the year 1802. B. in Scotland, about 1760; D. 1820.

MACKENZIE, Henry, a Scottish writer. He was one of the attorneys of the Scottish court of Exchequer. He afterwards went to London, where, in 1771, he published his first and best novel, "The Man of Feeling." He subsequently wrote 'The Man of the World," and "Julia de Roubigné," and edited, in succession, two papers on the model of the "Spectator," called the "Mirror" and the "Lounger." He likewise produced several plays, and a volume of dramatic works translated from the German. In 1804 he obtained the appointment of comptroller of taxes for Scotland, in recognition of his services to the Tory party. In the last years of his long life, he contributed nothing to literature. B. at Edinburgh, 1745; D. at the same city, 1831.

MACKENZIE'S RIVER rises in the great Slave Lake, British North America, and falls into the Frozen Ocean in *lat.* 70° N. and *lon.* 135° W. It was discovered and first navigated in 1789, by Alexander Mackenzie. Its course is estimated at 900 miles.—Also the name of a river in North Australia, and of two groups of islands in the North Pacific Ocean.

MACKINTOSH, *mäk'-in-tosh*, a county of Georgia, U.S. *Pop.* 6,000.

MACKINTOSH, Sir James, an eminent lawyer and writer, who at first studied medicine, and obtained his diploma as physician; but having a most decided inclination towards politics and the law, he acted for some time as foreign correspondent of the "Oracle" newspaper, and afterwards set to work vigorously to qualify himself for practice at the bar. In 1791 he completed his "Vindiciæ Gallicæ," wherein he defended the principles of the French revolution against Burke. This work, which was highly successful, led to his becoming acquainted with Fox, Sheridan, and other leading Whigs; but, although he gave much of his time to politics, he did not neglect his legal studies. In 1795 he was called to the bar. In 1799 he produced his "Introductory Discourse," relative to international law, a work which attracted towards him the notice of the highest men in the kingdom. About the same time he was granted the use of Lincoln's-Inn Hall, for the purpose of delivering therein a course of lectures "On the Law of Nature and Nations." His success was triumphant; he obtained "an auditory such as was never seen on a similar occasion. All classes were there represented; lawyers, members of parliament, men of letters, and country gentlemen, crowded to hear him." His political opinions next underwent

considerable modification, and, applying himself more energetically to his profession, he soon began to acquire the reputation of an eloquent counsel. His speech during the action brought against M. Peltier, a French royalist, for a libel on Bonaparte, excited the greatest admiration, and, despite the efforts of the First Consul, was extensively read in France, in a French translation made by Madame de Staël. In 1804 he went to India, having received the recordership of Bombay, and been knighted on the occasion. As an Indian judge, his administration was characterized by humanity and wisdom. While in the East Indies, he founded the Literary Society of Bombay, and produced a plan for forming a comparative vocabulary of the Indian languages. On his return to England, he was offered a seat in parliament, with a prospect of high employment, by Mr. Perceval; a proposal which, together with those made later by Canning and Lord Liverpool, he respectfully declined. In 1813, however, he entered the House of Commons, where, though not eminent as a parliamentary debater, he nevertheless distinguished himself by several great oratorical efforts, on important and special questions, such as Roman Catholic emancipation, the abolition of slavery, municipal and parliamentary reform, and the amelioration of the criminal code. In 1818 he became professor of law and general politics at the East-India College, Haileybury, an appointment he retained with much advantage to the students, until the year 1824. It was expected that, when the Whigs came into power, in 1830, Sir James Mackintosh would be appointed to an important office; but, like Burke and Sheridan, he was destined to experience the slight which that party so often puts upon merely able men, who have no "connections" of a patrician nature. The only appointment his party could give him was that of "Commissioner for the Affairs of India," a post which, 18 years before, he had declined at the hands of the Tories. On the Reform Bill he made an extraordinary speech, but, his health failing, he never again took a prominent place in debate. For many years he had maintained the intention of writing a History of England; and after arriving in England from India, he commenced the preliminary labour of collecting materials for the great task. But his political employments, combined with his love of social enjoyment, left him no time to carry out his project. His Essays in the "Edinburgh Review," indeed, appear to have been a species of compromise made with his own conscience, for abandoning a duty he had imposed upon himself. After his death, his "History of the Revolution in England in 1688" was published. It was but a fragment of the great work, but a fine philosophical one, nevertheless. He also wrote a brief survey of English literature, and a Life of Sir Thomas More, for "Lardner's Cyclopædia;" a Dissertation on the Progress of Ethical Philosophy, for the "Encyclopædia Britannica." His "Miscellaneous Works" were published in 3 vols. B. at Aldourie, near Inverness, 1765; D. 1832.

Macklin, Charles, *mák'-lin*, a comedian and dramatic writer. His real name was MacLaughlin, which he altered to Macklin. He became a performer in the Lincoln's Inn company in 1725, and not long after was tried for killing another player in a quarrel, and found guilty of manslaughter. His features were so strongly marked, that Quin exclaimed, "If God writes a legible hand, that fellow's a villain." His greatest character was Shylock, his performance of which drew from Mr. Pope this remarkable compliment:—

"This is the Jew
That Shakspere drew."

Macklin wrote ten plays, two of which, "Love à la Mode" and "The Man of the World," possess considerable merit, and are frequently performed. B. about 1690; D. 1797.

Maclaurin, Colin, *mák-law'-rin*, an eminent Scotch mathematician, who received his education at the university of Glasgow, where he applied himself assiduously to the study of the mathematics. In 1717 he obtained the mathematical professorship in the Marischal College of Aberdeen, and, two years afterwards, became a fellow of the Royal Society of London. In 1725 he was chosen professor of mathematics at Edinburgh. In 1742 he published his "System of Fluxions," the most important of his works. In 1745, having taken an active part in fortifying Edinburgh against the Pretender and the rebels, he was compelled to fly, on which he took refuge with Archbishop Herring, at York. Maclaurin was a good as well as great man: his peculiar merit as a philosopher was, that all his studies were accommodated to general utility; and, in many places of his works, is found an application even of the most abstruse theories to the perfecting of the mechanical arts. Besides the above work, he wrote several papers in the Philosophical Transactions; "Geometria Organica," "On the Percussion of Bodies," "A Treatise of Algebra," and an "Account of Sir Isaac Newton's Philosophical Discoveries." B. at Kilmoddan, Argyleshire, 1698; D. 1746.

Maclean, *mă-kleen'*, a county of Illinois, U.S. *Area*, 1,065 square miles. *Pop.* 11,000.

Maclise, Daniel, *ma-kleese'*, an eminent modern painter, who, from his earliest years, evinced a decided predilection for art; and, although placed in a banking house at Cork, quitted it at the age of 16, and gave himself up to the study of drawing and painting, maintaining himself the while by selling sketches and portraits. He went to London in 1828, and entered the Royal Academy, where he rapidly advanced in his studies, and carried off the medals for drawing from the antique, for drawing from the life, and for painting the best historical picture. After spending several months in Paris, he exhibited his first picture at the British Institution in 1833, after which period he acquired, with extraordinary rapidity, the highest reputation. In 1835 he became A.R.A., and five years later he was elected a Royal Academician. His range of subjects has been very large, as the enumeration of a few of his best pictures will show. "Robin Hood and Richard Cœur de Lion," "Chivalrous Vow of the Ladies and the Peacock," "Banquet Scene in Macbeth" "The Sleeping Beauty," and "The Play Scene in Hamlet," which last, despite its defects of mannerism and disagreeable colour, is unquestionably the production of a master. It may be seen in the British collection at the South Kensington Museum. Maclise has likewise been extensively employed as a portrait-painter, particularly by the intellectual classes. His portraits of Sir Edward Bulwer Lytton, Dickens, Ainsworth, and Macready, are well known. B. at Cork, 1811.

Macmahon, Marie-Patrice-Maurice, Count de, marshal of France, *mák-ma'-hon*, is descended of an Irish family, which, after living with distinction for many centuries in Ireland, risked all for the last of the Stuart kings. The Macmahons, carrying their national traditions and historic name to France, mingled their blood by marriage with the old nobility of their adopted country, and obtained, with the hand of an heiress, the magnificent castle and extensive estates of Sully. The present general's father, the count de Macmahon, who was an officer of high rank, a peer of France, a Grand Cross of the order of St. Louis, and a personal friend of Charles X., espoused a lady of the ducal house of Caraman, and left four sons and four daughters. Of that numerous family, the youngest is the hero of Malakhoff and of Magenta. He was educated partly at his father's and partly at the seminary for young men destined for the priesthood in that city. He afterwards entered the military school at St. Cyr, on leaving which, in 1825, he entered the French military service, and in 1830 joined the army of Algeria, where he soon distinguished himself alike by his gallantry and his intelligence. After the combat of the Col de Terchia, in which he was aide-de-camp to General Achard, the latter said to him, "Can you carry to Colonel Rullières, at Blidah, the order to change his march? As the mission is dangerous, I will give you a squadron of light dragoons as an escort." The young officer refused the escort, declaring that it was either too little or too much, and preferred going alone. On arriving at about half a mile from Blidah, he saw groups of the enemy's horsemen on each side, as well as behind him; but he went firmly on, knowing that a deep precipice, called the ravine of Bhdah, was a little way in front of him. He there drove his horse, a high-blooded animal, at the tremendous chasm, and the animal, without hesitation, sprang into mid-air. The rider held his seat immovably, and escaped unhurt, but was obliged to abandon his charger, which

had its fore-legs broken. Not one of the Arabs ventured to take the desperate leap, and the young officer reached Blidah in safety. He rose rapidly through the different grades, and attained that of general of brigade in 1848. For a time he occupied the position of governor of the province of Oran, and afterwards of Constantina; and in 1852 became general of division. In 1855, when General Canrobert left the Crimea, General Macmahon was selected by the emperor to succeed him in the command of a division; and, when the chiefs of the allied armies resolved on assaulting Sebastopol, he had assigned to him the honourable and perilous post of carrying the works of the Malakhoff. The manner in which he performed that duty is too fresh in the memory of our readers to need mention; and his able conduct at the battle of Magenta, where, although he had received no orders to do so, he pressed forward and arrived in time to secure the victory to the French, a piece of service which gained him the highest rank in the French army. D. at Autun, about 1807.

MACMIN, *măk-min'*, a county of Tennessee, U.S. *Area*, 608 square miles. *Pop.* 14,000.

MACON, *ma'-kawng*, a town of France, in the department of the Saone-and-Loire, on the Saone, 37 miles from Lyons. It has a neat quay, bordered with good buildings, along the bank of the river. The streets are, however, narrow, winding, and dirty. The chief buildings are the town-hall, the theatre, a cathedral, the hôtel de ville, a national college, and schools. *Manf.* Watches and jewellery. *Pop.* 15,000.

MACON, *mā'-kon*, the name of several counties in the United States.—1. In Carolina. *Area*, 776 square miles. *Pop.* 7,000.—2. In Georgia. *Area*, 375 square miles. *Pop.* 8,000.—3. In Alabama. *Area*, 933 square miles. *Pop.* 28,000.—4. In Illinois. *Area*, 469 square miles. *Pop.* 4,000.—5. In Missouri. *Area*, 825 square miles. *Pop.* 7,000.—Also a city in Georgia, 26 miles from Milledgeville. *Pop.* 5,000.

MACOUPIN, *ma-koo'-pin*, a county of the United States, in Illinois. *Area*, 864 square miles. *Pop.* 14,000.—Also a river, from which the above county takes its name. It falls into the Illinois.

MACPHERSON, James, *măk-fer'-son*, a Scotch poet. His first work, and that which brought him mostly into notice, was a translation of poems attributed by him to Ossian. These poems possessed great beauty; but their authenticity was disputed by Dr. Johnson and other writers, and as zealously maintained by the editor and Dr. Blair; it is now, however, generally admitted that Ossian's poems are a forgery. In 1773 Macpherson published a translation of the "Iliad" into heroic prose, a work of little value. He was also the author of an "Introduction to the History of Great Britain and Ireland," "A History of Great Britain, from 1660 to the Accession of the House of Hanover," and of some political pamphlets in defence of Lord North's administration, for which he obtained a place and a seat in the House of Commons. D. in Inverness-shire, 1738; D. 1796.

MACQUARIE, *mak-qua'-re*, a county of New South Wales. *Area*, 2,800 square miles. *Pop.* 3,000.—Also a river of E. Australia, formed by the junction of the Fish and Campbell rivers, and, after a course of 280 miles, losing itself in marshes, in *lat.* 30° 45′ S.; *lon.* 147° 10′ E.—Also a river of Tasmania.—Macquarie is likewise the prefix to numerous places in New South Wales.

MACQUARIE ISLAND, in the Pacific Ocean. *Ext.* 25 miles long, with a breadth of 4. *Desc.* Mountainous, but well wooded. *Lat.* 52° 41′ S. *Lon.* 169° E.

MACRI. (*See* MAKRI.)

MACROBIUS, Ambrosius Aurelius Theodosius, *ma-kro'-be-us*, a Latin writer of the 5th century, is supposed to have been a Greek, but whether a Christian or pagan is unknown. He wrote a commentary on Cicero's "Dream of Scipio;" and also "Saturnalia, or Miscellanies."

MADAGASCAR, *măd-a-gas'-kar*, an island of the Indian Ocean, situate at some distance from the E. coast of Africa, being separated from that continent by the channel of Mozambique. *Ext.* 1,030 miles long, and about 360 at its broadest part. *Desc.* It possesses great variety of surface, being intersected throughout its whole length by a chain of lofty mountains, dividing it in two parts, though approaching nearer to the E. than the W. coast. The soil is, in general, fertile with rich pasturage and magnificent forests. *Pro.* The forests abound in valuable trees and medicinal plants. The other products are rice, sugar, silk, potatoes, pepper, cotton, indigo, cocoa-nuts, the banana, honey, and wax. Large numbers of horses and camels are reared, with numerous herds of oxen, some of which grow to an enormous size, sheep, and swine. *Minerals.* Coal, gold, silver, lead, copper, and iron. *Manf.* Jewellery, chains, necklaces, carpets, cotton, and sugar. An active export and import trade is carried on in native produce, and linen, ribbons, glass, and Spanish piastres. *Pop.* Variously estimated at from 2,000,000 to 4,000,000. *Lat.* between 11° 58′ and 25° 39′ S. *Lon.* between 43° 20′ and 50° 31′ E. The French, after establishing settlements at Bourbon and Mauritius, formed several settlements in different parts of the island, but were repeatedly driven out by the hostility of the natives. In 1835 Christianity was introduced to the island, but, in 1845, all the Europeans were expelled by the natives. Feticism is the prevailing superstition.

MADDALENA, LA, *mad-da-lai'-na*, an island off the N. coast of Sardinia, 10 miles from Longo-Sardo. It has a small town, with a good harbour. *Pop.* 1,500.

MADDALONI, *mad-da-lo'-ne*, a town of Naples, in the province of Terra di Lavora, 13 miles from Naples. It has a royal college, and an aqueduct, which conveys water to the cascades in the royal gardens.

MADDEN, Sir Frederic, *măd'-den*, an eminent antiquarian writer, who, in 1826, entered the library of the British Museum, and rose to the grade of keepership of the department of Manuscripts in 1837. Both alone and in conjunction with other learned gentlemen, he has produced many valuable works, the chief of which are an edition of the earliest English version of the Bible, made by Wycliffe and his followers; an abridged translation of M. Silvestre's "Universal Paleography," and several of the old metrical romances of the 13th century. He became a knight of the Hanoverian order in 1832. D. at Portsmouth, 1851.

MADEIRA ISLES, *mā-deer'-a*, a group belonging to Portugal, off the W. coast of Africa, in the Atlantic Ocean. They consist of Madeira, Porto Santo, and the Desertas; but Madeira is the principal. *Ext.* 30 miles long and 12 broad. *Desc.* It consists altogether of a collection of lofty mountains, the highest upwards of 6,000 feet. On the declivity of these mountains all the productions of the island are raised. Vines form the chief object of cultivation, but small quantities of wheat, barley, oats, coffee, and arrowroot are produced. Goats and hogs abound, and the rabbit is very common in the mountainous districts. Bees are plentiful, and the honey they produce is very delicate. The peasants, like most mountaineers, are healthy and vigorous, but wretchedly poor; whilst the Portuguese gentry live in a proud and retired manner, associating little with the English, or with strangers. The city abounds in churches; and in the country, at every fifty yards is found a chapel. In the city of Funchal the most opulent portion of the inhabitants consist of British merchants engaged in the wine trade. The commerce of the island consists almost entirely in the export of its wine, in return for which Britain exports to Madeira, clothing, household furniture, and ornaments; also provisions, particularly herrings, dried fish, and potatoes. On account of the salubrity of its climate, the island is much resorted to by invalids. *Pop.* 120,000, of whom about 400 or 500 are British. In 1431 this island was settled by the Portuguese. Adjacent to Madeira is Porto Santo, a small island, and the Desertas, which, with Madeira itself, as we have said, compose the group of the Madeiras. Funchal, the capital, is in *lat.* 32° 37′ N.; *lon.* 17° 6′ W.

MADELEY, *măd'-le*, a market-town of Shropshire, near the Severn, 13 miles from Shrewsbury. It has a church, market-house, and an iron bridge across the Severn. *Manf.* Porcelain. In the vicinity are iron-works and coal-mines. *Pop.* 9,000.

MADEIRA, *ma-dair'-a*, a large, abundant, and navigable river of Peru. It is formed by the junction of the Beni and Mamoré, and, after a course of 1,800 miles, enters the Amazon in *lat.* 3° 24′ 18″ S.

MADISON, *măd'-i-son*, the name of several counties in the United States. 1. In New York. *Area*, 680

square miles. *Pop.* 45,000.—2. In Virginia. *Area*, 260 square miles. *Pop.* 10,000.—3. In the north of Georgia. *Area*, 272 square miles. *Pop.* 6,000.—4. In Alabama, on the north side of the Tennessee river. *Area*, 905 square miles. *Pop.* 25,000.—5. In Kentucky. *Area*, 490 square miles. *Pop.* 22,000.—6. In Ohio. *Area*, 420 square miles. *Pop.* 12,000.—7. In Illinois, on the Mississippi. *Area*, 655 square miles. *Pop.* 20,000.—8. In Louisiana. *Area*, 655 square miles. *Pop.* 9,000.—9. In Indiana. *Area*, 370 square miles. *Pop.* 14,000.—10. In Missouri. *Area*, 653 square miles. *Pop.* 7,000.—11. In Arkansas. *Area*, 963 square miles. *Pop.* 6,000.—Also the name of several townships, the largest in Indiana, with a population of 9,000.

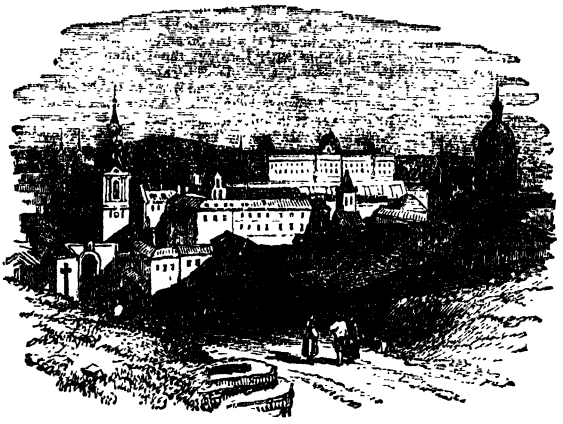
MADISON, James, president of the United States of America, who commenced his political career in 1776. In the first congress after the constitution in 1789, he was a member, and became president in 1809, an office he filled during two terms. B. in Virginia, 1751; D. 1836.

MADISON'S RIVER, one of the three head streams of the Missouri, which it joins in *lat.* 45° 22′ 34″ N.

MADJICOSUNA ISLANDS. (*See* BADUXANAS.)

MADOG, *ma-dog'*, the son of Owain Gwynedd, a Welsh prince, who is said to have gone to sea in ten ships with 300 men, in 1170, after which no tidings were ever heard of him. It is supposed that Madog reached the American continent, as it is said there was a tribe of white Indians on the northern branches of the Missouri river who spoke the Welsh language.

MADONIAN MOUNTAINS, *mă-do'-ne-an*, a group in the island of Sicily, between the rivers Grande and Pollina.



MADOX, Thomas, *măd'-ox*, an English antiquary and historiographer royal, who published, in 1702, a "Collection of Ancient Charters and Instruments of divers kinds, taken from the Originals, from the Conquest to the Reign of Henry VIII." In 1711 appeared his "History and Antiquities of the Exchequer," which was reprinted in 1769. His last work was the "Firma Burgi; or, Historical Essay concerning the Cities, Towns, and Boroughs of England."

MADRAS, PRESIDENCY OF, *mă-drăs'*, one of the divisions of British India, bounded on the N. by the Bombay presidency, the Berar and Nizam territories, and the smaller states within the confines of Bengal; E. and S.E. by the Bay of Bengal; S. by the Indian Ocean; and S.W. and W. by the Arabian Sea. *Ext.* From Priaghy to Cape Comorin, 950 miles long, with a breadth of 450 from the city of Madras to Golamelly. *Coastline*, 1,727 miles, nearly destitute of harbours for large ships. The districts under the immediate jurisdiction of the governor and council at Madras, are N. and S. Arcot, Bellary, Canara, Chingleput, including Madras, Coimbatoor, Cuddapah, Guntoor, including Pulnaud, Madura, including Dindigal, Malabar, Masulipatam, Nellore, Rajahmundry, Salem, Tanjore, Tinnevelly, and Trichinopoly. These are the regulation districts. The non-regulation districts are Ganjam, Kurnool, and Vizagapatam. Over each of these districts there is a European judge and a collector, with the requisite establishments. There are, also, four provisional courts of circuit and appeal, to which the above-mentioned judges are subordinate; and a supreme court of appeal, stationary at Madras. (For further particulars see HINDOSTAN, INDIA (BRITISH), and the several articles comprised in the presidency.)

MADRAS, called by the natives CHENNAPATAM, a maritime city and fortress of British India, and the capital of the above presidency. It was founded in the year 1640, on a small territory 5 miles in length by 1 in breadth, but which has now an area of 30 square miles. No worse position could have been chosen, as it is situate on a flat sandy shore, where the surf runs with extreme violence, and where it is surrounded by salt-water creeks or rivers, which prevent the introduction of a stream of fresh water into the town. The original fortress was a small square, which now contains the public offices. To the S. of this stands the church, near to which is the residence of the governor; and to the N. of the old fort is the exchange. All the offices of government and courts of justice are in the fort, which is called Fort St. George; but the governor, and all the principal inhabitants, have houses at a short distance in the country, where they mostly reside. The nabob of the Carnatic has also a palace a short distance from the Esplanade, and there is a cathedral called St. George's, and a handsome mosque. The native, or Black town, is nearly a mile to the north of the fort. It has some good streets and bazars; but the houses are very irregular. There are also several churches, and chapels of various religious denominations, and a cenotaph to the marquis of Cornwallis. Madras is an episcopal see, and there is also a Roman Catholic bishop. It is the seat of all the chief government offices for the presidency, and is the principal commercial emporium of the Coromandel coast. Its trade is considerable with Europe, the United States, China, Ceylon, Pegu, the Isle of France, and different parts of India; but, owing to the want of a navigable river, and the difficulty of landing goods on account of the heavy surf, it labours under great disadvantages. The climate of Madras is very hot. *Pop.* estimated at between 700,000 and 800,000. *Lat.* 13° 4′ 1″ N. *Lon.* 80° 14′ E. The site of this city formed the first acquisition of the British in India, who, in 1639, obtained permission to erect a fort here. The French took possession of Madras in 1744, and entirely destroyed the Black town and every building which stood within 300 yards of the fort. Out of the ruins they constructed an excellent glacis. The city was restored to the British at the peace of Aix-la-Chapelle, in 1749, since which period it has been gradually increased and improved, and is now one of the strongest fortresses in India.

MADRID, *ma-drid'*, the capital of Spain, in New Castile, on the left bank of the river Manzanares, about 300 miles from the sea on each side, on a table-land nearly 2,000 feet above its level. It is of an oblong form, surrounded by a high wall, with fifteen gates, three of which are erected as triumphal arches, with trophies, inscriptions, and other ornamental work. The old streets are narrow and crooked, but many others are wide, straight, and regular; and some of them equal those of the finest cities in Europe. The squares are numerous, but most of them are very small; the best are the Plaza Mayor and the Puerta del Sol. The private houses are generally low, with grated windows; those of the first grandees are distinguished only by their magnitude. The only exceptions are the palaces of the families of Berwic, Altamira, and Veraguas. The houses of the dukes of Infantado, Alba, Medina-Celi, and some others, possess valuable collections of paintings. The churches are also distinguished by the same simplicity. The most remarkable churches are St. Jerome's, with a portal richly ornamented with Gothic sculpture; the church of St. Isidore, with a fine front; that of the Mendicant Friars, which is one of the largest in the city; the church of the Incarnation; that of the Visitation, or las Salesas, a large building, richly ornamented with paintings, statues, and marble pillars. The monument of the bishop of Placencia, in the chapel called del Obispo; the silver tabernacle, in the church of St. Martin; the altar and monument of Joan of Austria, in the church of the Franciscan nuns, are worthy of notice. Of the other public buildings, one of the most remarkable is the Saladero, a large and handsome edifice, also the quarters of the guards, the largest building in Madrid; the custom-house, post-office, prison, and the council-house. The royal armory contains a valuable collection of the armour of different ages. There are several theatres, a bull-ring, and two palaces on a large scale—the Palacio Real, at the western extremity of the city; and the Buen Retiro, founded by Philip IV., at the eastern. Both are insulated buildings; the Palacio Real is of a square form, and contains a large collection of paintings, by the best masters of Flanders, Italy, and Spain; also the crown jewels and other regalia. The Buen Retiro has very extensive gardens, and also a large collection of paintings. Of the public walks, the principal is the Prado, which runs along a great part of the east, and part of the north side of the city. It forms a broad walk, planted with trees, for carriages, and an alley on each side for pedestrians. Madrid enjoys almost always a cloudless sky, and a pure and serene atmosphere; but the air is extremely keen, from its elevated site and the vicinity of the snowy mountains of Guadarrama. The great school of Madrid occupies a building which formerly belonged to

the Jesuits. There is a botanical garden; also a chemical school, classes for engineering, for anatomy, and the practice of medicine; academies for the study of history, painting, sculpture, and architecture; also for the Spanish language. The charitable institutions are numerous. The principal industrial establishments are manufactories of carpets and porcelain. Paper, jewellery, hats, and silks, are also extensively made. *Pop.* 220,000. *Lat.* 40° 24′ 57″ N. *Lon.* 3° 41′ 15″ W.

MADRID.

Madrid is not an ancient city, its name being first mentioned in history as a castle sacked by the Moors in 1109. It was occupied early in 1808 by French troops, who were finally obliged to quit it in 1813. The French troops, under the duke d'Angoulême, again entered it in May, 1823. It is the birthplace of many of the kings of Spain, and eminent men; among whom may be noted the brothers Velasquez, Alonzo de Ercella, Lopez de Vega, Ca'deron de la Barca, and Minez. Here Joseph Bonaparte was placed on the throne of Spain by his brother, Napoleon I.

MADRID, NEW, a town of Missouri, U.S., near the bank of the Mississippi. *Pop.* 2,000.

MADRILEJOS, *ma'-dre-lai-hose*, a neat and well-built town of Spain, in New Castile, 40 miles from Toledo. *Manf.* Serges and woollens generally. *Pop.* 5,500.

MADURA, *ma-door'-a*, an ancient city, and capital of a district of the same name, in the S. of India, 33 miles from Dindigul. *Pop.* Unascertained.—The DISTRICT has an area of 10,700 square miles, with a population of 1,760,000. *Lat.* between 9° 5′ and 10° 54′ N. *Lon.* between 77° 15′ and 79° 15′ E.

MADURA, an island of the Malay Archipelago, situate off the N. coast of the island of Java, from which it is separated by a narrow channel, called the Strait of Madura. *Area*, estimated at 1,330 square miles. *Desc.* The country throughout is fertile and tolerably cultivated; but it is, on the whole, inferior in this respect to Java. *Pop.* 300,000. The Dutch invaded this island about the year 1747, and made slaves of a great number of the inhabitants.

MÆANDER, *me-ăn'-der*, a river of Asia Minor. (*See* MENDERE.)

MÆCENAS, Caius Cilnius, *me-se'-nas*, the intimate friend of Augustus, and so liberal a patron of men of letters, that his name has been proverbialized to express persons of the same disposition, and it was chiefly to him that Virgil and Horace owed the means which enabled them to devote themselves to poetry. According to Horace, he was descended from the kings of Etruria. Augustus, one day, being on the tribunal, passing sentence of death on several persons, Mæcenas sent him a paper, with this inscription: "Come down, butcher;" which struck the emperor so forcibly, that he immediately descended from his seat. He was the great friend of Virgil and Horace, who immortalized him in their works. He distinguished himself also in the field, particularly at the battles of Modena and Philippi. When Augustus and Agrippa went to Sicily, Mæcenas had the administration of the government, though he was not a man of ambition. He wrote some tragedies, which are lost. D. 8 B.C.

MÆLAR, LAKE, *mai'-lar*, a lake of Sweden, running inland from the Baltic about 70 miles. It is surrounded by the districts of Stockholm, Nykoping, Upsal, and Westeras. It contains upwards of 1,200 islands, and has a breadth ranging between 2 and 21 miles. On the strait which connects it with the Baltic the city of Stockholm is built.

MAESE, MAAS, or MEUSE, *mai'-se*, the German name of a river of Europe, which rises in the French department of the Upper Marne, enters the Netherlands to the north of Charleville, and, after a course of 400 miles, falls into the German Ocean below Rotterdam.

MAESEYICK, *mai'-sai-eek*, a town of Belgium, 20 miles from Hassalt. *Pop.* 4,000.—It is the birthplace of the brothers Van Eyck, the inventors of painting in oil.

MAESTRICHT, *maisc'-treecht*, a town of the Netherlands, and capital of the duchy of Limburg, on the Maese, where that river is joined by the small stream of the Jaer, 110 miles from Amsterdam. It communicates with the suburb of Wyck, on the opposite side, by means of a stone bridge 500 feet in length. It is tolerably well built, the principal street extending from the bridge to the other extremity of the town; but the best dwelling-houses are in a street which runs parallel to it. The market-place and the place d'armes are two handsome public squares. Of the public buildings, the principal are the town-hall and the church of St. Gervais; the college, once occupied by the Jesuits; the theatre, and the citadel, which is built on a mountain, where are found some remarkable petrifactions. Maestricht is one of the strongest places of the Netherlands. It is surrounded by walls and ditches, but its principal strength consists in a number of detached bastions. *Manf.* Leather, flannel, stockings, and different kinds of coarse cloth; also hardware goods, and extensive breweries and distilleries. *Pop.* 31,000. This town was taken by the French in 1794; and from 1795 till 1814 it was the capital of the French department of the Lower Meuse.

MAFRA, *ma'-fra*, a town of Portugal, 20 miles from Lisbon, with a convent and a royal palace. *Pop.* 3,000.

MAGADOXA, *mag-a-dox'-a*, an Arabian town of Eastern Africa, the principal entrepôt between the river Juba and Capo Gardafui. It is inclosed by strong walls, but is very unhealthy. *Pop.* about 4,000. *Lat.* 2° 2′ N. *Lon.* 45° 25′ E.

MAGALHAENS, commonly, but erroneously, called MAGELLAN, Ferdinand, *ma-gel'-lan*, a famous Portuguese navigator. In 1510 he served under Albuquerque, and distinguished himself by his bravery, and by his exact knowledge of the Indian seas. On his return to Portugal he aspired to the rank of commander, but, being disappointed, he entered into the service of the emperor Charles V., who gave him the command of a fleet, with which, in 1520, he discovered the straits called by his name, at the extremity of South America; after which he took possession of the Philippine islands, in the name of the king of Spain. He was slain at those islands in a skirmish with the natives, in 1521. Of this expedition, only one vessel, with 18 men, returned to Europe.

MAGALHAENS, STRAIT OF. (*See* MAGELLAN.)

MAGDALEN RIVER, *măg'-da-len*, a river of Canada, falling into the St. Lawrence.

MAGDALENA, *mag-da-lai'-na*, a large river of S. America, rising on the frontier of Ecuador, in *lat.* 2° N., and *lon.* 76° W., and, after a course of 800 miles, enters the

sea, 63 miles from Carthagena, in *lat.* 11° 2′ N.—The name, also, of several other smaller rivers.

MAGDALENA, the most N. department of New Granada, S. America. *Area*, estimated at about 50,000 square miles. *Desc.* Mountainous in the S. and E., and in other parts diversified with hill and dale. *Pop.* 340,000.

MAGDALENA, SANTA, a bay on the N.E. coast of Malta, 4 miles from Valetta.

MAGDALENA, the most S. of the Marquesas islands, in the Pacific Ocean.—Another, in Senegambia, lying to the S. of Cape Verd.

MAGDALENE ISLANDS, *măg'-da-lene*, in the Gulf of St. Lawrence. *Lat.* 47° 13′ and 47° 42′ N.

MAGDEBURG, *mag'-de-boorg*, a fortified city of the Prussian states, in the province of Saxony, on the Elbe, 80 miles from Berlin. It is one of the strongest fortresses in Germany, being surrounded by a number of outworks, and having a citadel on an island in the river, with an arsenal and storehouses. The town itself is divided into five parts;—first, the Old Town, the Neumarkt, and the Friedrichstadt, or tower fort; next, the New Town, and the quarter called Sudenburg. Of its squares, or open spaces, the principal are the Cathedral square, which has a number of neat houses; the Old Market, and the Prince's Market, adjoining to the public walks. The principal public buildings are,—the royal exchequer, the ducal palace, the regency-house, the government-house, the new and old arsenals, and the cathedral, which is of the 12th century, and is built of freestone, with two spires. There are, besides, numerous churches, convents, hospitals, and schools. There are likewise several public libraries and collections of paintings. *Manf.* Woollens, linens, stockings, hats, leather, tobacco, soap, and wax, besides extensive breweries and distilleries. *Pop.* 70,000. Magdeburg is a town of old date, having been mentioned in history in the reign of Charlemagne. It suffered greatly in the wars of the 16th and 17th centuries. In 1806 it was taken by the French, and annexed to their kingdom of Westphalia.

MAGDELAINE, LA PRAIRIE DE LA, or LA PRAIRIE, *măg'-de-lain*, a flourishing place on the river St. Lawrence. *Pop.* Unascertained.

MAGELLAN. (*See* MAGALHAENS.)

MAGELLAN, or MAGALHAENS, STRAITS OF, *ma-gel'-lan*, a passage between the Atlantic and Pacific oceans, at the S. extremity of the continent of America, and separating it from the island of Tierra del Fuego. *Ext.* Nearly 300 miles long, extending from Cape Virgin, in the Atlantic, to Cape Desire, in the Pacific Ocean; in some places several miles over, and in others not much more than a mile. They were discovered and passed through in the year 1520, by Ferdinando Magellan, or Magalhaens, a Portuguese in the service of Spain. *Lat.* 52° 30′ to 54° S. *Lon.* 70° to 77° W.

MAGENDIE, François, *ma-zhen'-de*, a celebrated French physician and physiologist, who, after a brilliant career as a student, became, in 1818, physician to the Hôtel-Dieu. He was elected member of the Academy of Sciences in 1819, and, in 1831, he obtained the appointment of professor of anatomy in the College of France. His valuable contributions were very numerous: his "Elements of Physiology" was a standard text-book, during many years, in France, Germany, and England. He pointed out that non-nitrogenous substances were devoid of nutrition; proved that the veins were organs of absorption; that strychnia acts upon the spinal cord, destroys the nerves of respiration, by paralysis; that prussic acid was a remedy for certain forms of cough; and finally, like Sir Charles Bell, demonstrated the precise functions of the spinal nerves. In recognition of his great services to science, he was made commander of the Legion of Honour. B. at Bordeaux, 1783; D. 1855.

MAGENTA, *ma-jain'-ta*, a town of Austrian Italy, 24 miles from Pavia. *Pop.* 4,000.—Here, in June, 1859, a great battle was fought between the French and Austrians, in which the latter were defeated. The French were commanded by General Macmahon, who received the title of duke from this field.

MAGEROE, *mag'-ge-ro*, an island at the N. extremity of Norwegian Lapland, containing Capo North. It is inhabited by a few Lapps and Norwegians. *Lat.* 71° 11′ 30″ N. *Lon.* 26° 0′ 45″ E.

MAGGIORE, LAKE. (*See* LAKE MAGGIORE.)

MAGINDANAO, or MINDANAO, *ma-kin-da-na'-o*, the most S. of the Philippine Islands, in the Asiatic archipelago. *Area*, estimated at 36,000 square miles. *Desc.* The interior is intersected by lofty chains of mountains, with intervening plains, which afford pasture for vast herds of cattle. The country is also well wooded, and, in many parts towards the seacoast, is covered with impenetrable jungle and forests. There are no ravenous wild beasts on the island; on which account deer, wild cattle, buffaloes, hogs, goats, and horses multiply fast; the latter being of a small breed, but remarkable for their spirit. *Pro.* Rice, wax, cassia, tobacco, and rattans. *Pop.* Unascertained. *Lat.* 5° 40′ to 9° 55′ N. *Lon.* 119° 30′ to 125° E. (*See* PHILIPPINE ISLANDS.)

MAGINDANAO, the principal town of the above island, about 6 miles up the Pelangy. It is the residence of the sultan of Mindanao. Opposite stands the town of Selangan, containing 200 houses. *Lat.* 7° 9′ N. *Lon.* 124° 40′ E.

MAGLIABECCHI, Anthony, *mal'-ye-a-bak'-ke*, a learned Italian, who acquired such a store of knowledge as to be appointed librarian to the grand-duke of Tuscany. He corresponded with most of the learned men in Europe, and astonishing things, bordering on the marvellous, are told of his memory. His delight was wholly in books and manuscripts, and he refused preferment and riches. An old cloak served him for a garment by day and a covering by night. He had one straw chair for his table, and another to sleep on. B. at Florence, 1633; D. 1714.

MAGLIANO, *mal'-ye-a-no*, the name of several small towns of Italy, none of them with a population above 2,500.

MAGNENTIUS, *măg-nen'-she-us*, a German, who rose, from being a private soldier, to the first employments in the empire. The emperor Constans had a great esteem for him, and, in a mutiny amongst the troops, delivered him from the fury of the soldiers, by covering him with his robe. Magnentius murdered his benefactor in 350, and assumed the title of emperor; but Constantius II. avenged the death of his brother, and, after a bloody battle, Magnentius was defeated; whereupon he killed himself, 353.

MAGNETICAL ISLAND, *măg-net'-i-kal*, lies in Halifax Bay, off the E. coast of Australia. *Lat.* 19° 8′ S. *Lon.* 146° 45′ E.—It was discovered by Captain Cook, in 1770.

MAGNUS, Albertus. (*See* ALBERTUS MAGNUS.)

MAGNUS BAY, ST., *măg'-nus*, a safe and commodious bay of the mainland of Shetland. It runs 7 miles inland, and has a width of from 8 to 11 miles.

MAGUS MUIR, *mag'-gus mure*, a moor in Fifeshire, Scotland, not far from St. Andrews.

MAHANUDDY, *ma-ha-nud'-de*, a river of Hindostan, which, after a course of 500 miles, falls into the Bay of Bengal, in *lat.* 20° N.

MAHAVILLYGUNGA, *ma'-ha-vil-le-goon'-ga*, the principal river of Ceylon, rising in the centre of the island, and entering the Indian Ocean by several mouths at Trincomalee.

MAHMOUD, *ma'-mood*, the founder of the Gasnevide dynasty, obtained from Ileh-khan the empire of Khorassan, in 997. He extended his territories by conquest, and formed a vast kingdom, extending from the banks of the Ganges to the Caspian Sea. He held his court at Balkh and Ghisni, and was the first eastern potentate who took the title of sultan (emperor) instead of *emir* (commander), which had been previously borne by his predecessors. D. 1030.

MAHMOUD I., sometimes called Mahomet V., sultan of the Ottoman Turks, was son of Mustapha, and ascended the throne at Constantinople, in 1730. He, however, interfered but little in the government of his kingdom, choosing rather to live a life of luxury, while the cares of state devolved upon his ministers. B. 1696; D. 1754.

MAHMOUD II., sultan of Turkey, was placed upon the throne by Mustapha Bairaktar, chief of the janissaries, in 1808. Under his reign, despite his greatest exertions, the decadence of Turkey was greatly accelerated. In 1812, Bessarabia was ceded to Russia by the peace of Bucharest. Between the years 1812 and 1817, Servia, Moldavia, and Wallachia were evacuated, and the Ionian islands proclaimed their independence.

In 1820, Greece broke out into insurrection, and, after a struggle of eight years, threw off the Turkish yoke. A fresh war next broke out between Turkey and Russia, and the latter power was only prevented from taking possession of Constantinople by the intervention of the European powers, which brought about the peace of Adrianople, in 1829. During this time, Ali, pacha of Janina, had defied the sultan, and Mehemet Ali, pacha of Egypt, had rendered himself independent. The extermination of the janissaries in 1826, and the introduction of some details of civilization, weakened the Turkish power, but did not benefit Mahmoud. In 1833 he was thrice defeated by the Egyptians, and the treaty of Unkiar-Skelessi left him at the mercy of Russia. He was about to engage in a new war with Mehemet Ali, when his death took place. B. 1785; D. 1839.—He was succeeded by his eldest son, Abdul-Mejid. (*See* ABDUL-MEJID.)

MAHOMET, in Arabic MOHAMMED, *mah'-ho-met*, or *mo-ham'-med*, the founder of the Mussulman religion. He came of the noble family of Koreish. Losing his father in his infancy, his guardianship devolved on his uncle, Abou Taleb, who employed him to go with his caravans from Mecca to Damascus. In this employment of camel-driver he continued till he was 25 years of age, when he married Kadiohah, a rich widow, becoming thereby one of the wealthiest men in Mecca. He soon made himself remarked for his religious zeal; and having observed in his travels the infinite variety of sects which prevailed, he conceived the project of reforming the religion of his country, and uniting the various sects into the worship of one God. He accordingly spent much of his time in a cave near Mecca, seemingly alone, and employed in meditation and prayer; but in reality he called to his aid a Persian Jew, well versed in the history and laws of his persuasion, and two Christians, one of the Jacobite and the other of the Nestorian sect. With the help of these men, he framed his "Koran," or "Alcoran" (*see* ALCORAN), or the book which he pretended to have received at different times from heaven, by the hands of the angel Gabriel. At the age of 40, he publicly assumed the prophetical character, calling himself the apostle of God. At first he had only his wife and eight other followers; but in three years his disciples were considerably more numerous. On these he imposed the most marvellous tales, but well adapted to deceive ignorant and superstitious minds. He pretended to have passed into the highest heavens in one night, on the back of a beautiful ass called Al Borak, and accompanied by the angel Gabriel. There he had an interview with Adam, Abraham, Moses, David, and Jesus Christ, who acknowledged his superiority, which was confirmed to him by the Deity himself. This romance staggered even some of his best friends; and a powerful confederacy being formed against him, he was forced to quit Mecca, and to seek a refuge in Medina. This retreat occasioned the foundation of his empire and of his religion. The Mohammedans adopt it as their chronological standard, calling it the *Hegira*, that is, the *Flight* or *Persecution*, being the first day of our July, 622 A.D. Mahomet had still a number of disciples, upon whom he inculcated this principle, that they were not to dispute for their religion by word, but by the sword. This was a doctrine well adapted to a lawless and wandering people, and was soon carried into practice by them. The Jewish Arabs were the first who experienced its effects. Mahomet committed upon them the most shocking cruelties, put numbers to death, sold others for slaves, and distributed their goods among his soldiers. A faith thus propagated could not but succeed in a country like Arabia. He rewarded his adherents by plunder, and held out to them a certain happiness of the most sensual kind hereafter. In 627 he made a treaty with the inhabitants of Mecca, which two years afterwards he violated, and stormed the place with fire and sword. Having made himself master of Arabia, he extended his conquests into Syria, where he took several cities, and laid some of the princes under tribute. While engaged in this victorious career, a Jewess poisoned some meat which was laid before him, and of which he and his companions ate heartily. One of them died immediately, but the prophet lingered some time. When the woman was examined, she declared that she had perpetrated the deed on purpose to try whether he was really a true prophet. Of the effects of this poison he died, 632 A.D., and of the Hegira 8, aged 62. After the death of Kadichah, he had several wives and concubines, by whom he had many children, but left only a daughter, named Fatima, who married his successor, Ali. It is a vulgar error, that the body of Mahomet was laid in a steel coffin, and suspended in his tomb at Medina between two magnets. The "Koran" of this impostor contains a good deal of practical morality, drawn from the Scriptures, but blended with extravagant tales and blasphemous doctrines. It has been well translated into English by Sale, and into French by Du Ryer and Savary.

MAHOMET I., emperor of the Turks, was the son of Bajazet I., and succeeded his brother Mousa in 1413. He re-established the glory of the Ottoman empire, which had been ravaged by Tamerlane, and fixed the seat of government at Adrianople, where he died, in 1421, aged 47.

MAHOMET II. succeeded his father, Amurath II., in 1451. He made many conquests, and was the first who assumed the title of grand signior. After a long and victorious career, he died as he was about to lead an attack against the Knights of St. John, at Rhodes. Mahomet is said to have been a freethinker, and to have ridiculed throughout the religion in which he was brought up. His letters, translated into Latin, were published in 1520. B. 1429; D. 1481.

MAHOMET III. succeeded his father, Amurath III., in 1595. He commenced his reign by strangling nineteen of his brothers, and drowning ten of his father's wives. He entered Hungary, took Agram by capitulation, and then massacred the whole garrison. The archduke Maximilian marched against him, and nearly obtained a complete victory, when Mahomet, who had made a false retreat, suddenly returned to the charge, and routed the imperialists. He was afterwards less successful, and obliged to sue for peace to the Christian princes whose states he had ravaged. D. 1603.

MAHOMET IV. became emperor in 1654, after the tragical death of his father, Ibrahim I. The Turks were at this time engaged in a war with the Venetians, and made themselves masters of the isle of Candia in 1669, after losing 100,000 men. Mahomet marched in person against Poland, and, having taken several places, made peace with that country, on condition of an annual tribute being paid to him. John Sobieski, irritated at this treaty, raised an army, and the year following defeated the Turks near Choczim. He also obtained a number of other advantages over them, and a peace was concluded, favourable to Poland, in 1676. In 1683 the Turks laid siege to Vienna, on which Sobieski marched to its relief, and routed the besiegers. The year following, a league was entered into against the Turks, between the emperor, the king of Poland, and the Venetians. The janissaries, attributing their misfortunes to the indolence of the sultan, deposed him in 1687, and gave the sceptre to his brother Soliman III., who sent him to the same prison whence he had himself been taken. Mahomet died there 1691.

MAHOMET V. (*See* MAHMOUD I.)

MAIDA, *mai'-da*, a town of Naples, in Calabria Ultra, 7 miles from Meastro. It is noted for the defeat of the French by the British, in an action near it, in 1806. *Pop.* 4,000.

MAIDENHEAD, *mai'-den-hed*, a well-built market-town of Berks, on the Thames, 26 miles from London. It has a chapel, an endowed school, and several charities. *Pop.* 4,000. The Thames is here crossed by a viaduct of the Great Western Railway.

MAIDENS, *mai'-dens*, a cluster of rocks of the E. coast of Ireland, 6 miles from Larne. They are surrounded by dangerous reefs. The two highest of the rocks have lighthouses on them. *Lat.* 54° 55′ N. *Lon.* 5° 44′ W.

MAIDSTONE, *maid'-stone*, a market and borough town of Kent, on the Medway, which is here navigable for vessels of 50 or 60 tons, and is crossed by a bridge of five arches, 8 miles from Rochester. The town consists chiefly of four principal streets, which cross each other in the market-place, with some smaller ones branching off at right angles. The principal public buildings are, the church, known as "the Pilgrim's Chapel," which extends 227 feet in length and 91 in breadth; court-

hall, the county gaol, theatre, a free grammar-school, and other schools. Here are, also, neat and extensive barracks, handsome and commodious assembly-rooms, a philosophical society, mechanics' institute, library, and several banks. The archbishop of Canterbury had formerly a palace here, the remains of which are still considerable. There was a college, founded by Archbishop Courtenay, much of which is still remaining, and has been converted into dwelling and warehouses. The principal produce of the neighbourhood is hops; and Maidstone is the first hop-market in the kingdom. *Manf.* Linen thread; and in the vicinity are various paper-mills, a distillery, iron-foundries, and breweries. *Pop.* 21,000. Here, in the time of Henry VIII., the first English hops were raised; and, in 1648, the town was stormed by the parliamentary troops.

MAIMONIDES, Moses, *mai-mon'-i-dees*, or Moses Ben MAIMON, a celebrated Jewish rabbi. He is commonly called Moses Ægyptus, because he lived in that country as physician to the sultan. He was versed in several languages and sciences, but particularly mathematics and medicine. He was also learned in theology, and the Jews account him as second only to Moses the legislator. He wrote a "Commentary upon the Old Testament," a "Digest of the Hebrew Laws," and other valuable works. B. at Cordova, Spain, about 1133; D. 1203.

MAINE, *main*, the most N.E. state of the United States, bounded N. W. and N. by Lower Canada, E. by New Brunswick, S.E. and S. by the Atlantic, and W. by New Hampshire. *Area*, 30,000 square miles. *Desc.* Somewhat elevated, with a diversified surface. A tract, commencing on the W. side of the district, about 160 miles in length and 60 in its greatest breadth, is mountainous. There is also a small mountainous tract in the N. extremity. The remainder of the district may be considered generally as a moderately hilly country. *Rivers.* The principal are the Penobscot, Kennebec, St. Croix, and St. John. It has, besides, several lakes and bays, some of which are among the best in the United States. *Pro.* The principal is grass, Indian corn, wheat, barley, rye, flax, timber, apples, and cherries. The climate is subject to great extremes, both of heat and cold. *Minerals.* Iron, lead, and marble. *Manf.* Principally cotton goods. The chief article of export is lumber. *Pop.* 585,000.

MAINE, one of the largest rivers of Germany, formed by the two streams called the Red and White Maine, rising in Bavaria, and, after a course of 280 miles, falling into the Rhine opposite Mentz.

MAINE, LOWER, an old province in the W. of France, now comprised in the departments of Mayenne, Sarthe, and part of Berne.

MAINE-ET-LOIRE, *main-ai-lwawr*, a department of the N.W. of France, formed of the old province of Anjou. *Area*, 2,781 square miles. *Desc.* Diversified by hills and plains. *Pro.* Lint, hemp, fruits, grain, and cattle. *Minerals.* Granite, marble, flint, and slate. *Manf.* Linens, ginghams, and calicoes. *Pop.* 520,000. *Lat.* between 46° 59′ and 47° 45′ N.

MAINLAND OF SHETLAND, or ZETLAND, *main'-land*, the largest of the Shetland islands. *Ext.* 60 miles long from N. to S., and from 6 to 18 broad. *Desc.* The interior is craggy, mountainous, and barren; but, along the shores, verdant spots, marshy plains, and indifferently-fertile tracts are interspersed. The coast is deeply indented with inlets of the sea. There are many small fresh-water lakes, and some mineral springs impregnated with iron. Agriculture is little attended to. The hills are mostly covered with heath, and afford good pasture for black cattle and sheep. There is also a very small but hardy breed of horses called Shetland ponies, and a peculiar breed of swine, the flesh of which is esteemed very delicate. Eagles, hawks, ravens, and other birds of prey are numerous. Swans, in great numbers, annually visit the small lakes; and geese, ducks, and sea-birds everywhere abound. *Pop.* about 16,000. (*See* ORKNEY, SHETLAND.)

MAINTENON, Frances d'Aubigné, Marchioness de, *mān'-te-nawng*, the mistress, and afterwards wife, of Louis XIV. In 1651 she married the celebrated comic poet Scarron, who taught her the Latin, Spanish, and Italian languages. In 1660 she became a widow in very narrow circumstances; but the queen allowed her a pension, with which she retired to a convent at Paris. The death of her patron deprived her of her pension, and reduced her to great difficulties; but, by means of her old friend Madame de Montespan, the king's mistress, she obtained the renewal of her pension. By the command of his majesty she undertook the education of the children he had by Madame de Montespan, which trust she discharged with great fidelity. In this situation she acquired an ascendancy over the mind of the king, who, in 1674, purchased for her the estate of Maintenon, which name she assumed. In 1685 the king made her his wife; but the marriage was never publicly avowed. On the death of Louis, she retired to St. Cyr, an institution she had herself founded for poor girls of good family. B. 1635; D. 1719.

MAIRE, LE, STRAITS OF, *le(r)-mair'*, a passage from the Atlantic to the Pacific Ocean, between Tierra del Fuego and Staten Land, about 15 miles long and as many broad.

MAIRE, James LE, a Dutch navigator, who sailed from the Texel in 1615, with two vessels. In the following year he discovered the straits which bear his name, in South America. After visiting New Guinea, he sailed to Batavia, where he was made prisoner, and the only vessel he had left was confiscated, under the pretence of his having infringed on the rights of the Dutch East-India Company. D. on his passage to Europe, in 1616.

MAIRWARRA, *mair-war'-ra*, a mountainous tract of Rajpootana, India. *Ext.* About 100 miles long, with an average breadth of 15. It contains iron, antimony, copper, and lead. *Pop.* 40,000. *Lat.* between 25° 25′ and 26° 10′ N. *Lon.* between 73° 50′ and 74° 30′ E.

MAIXANT, ST., *maix'-a*, a town of France, in the department of the Two Sèvres, on the Sèvre-Niortoise, 36 miles from Poitiers. *Manf.* Woollen goods principally. *Pop.* 4,500.

MAJORCA, *ma-jor'-ka* (Span. MALLORKA, *mal-yor'-ka*), the principal of the Balearic Isles, in the Mediterranean, lying about 100 miles to the east of Spain, and subject to that crown. *Area*, 130 square miles. *Gen. Desc.* It is almost surrounded by a chain of mountains, a branch of which penetrates towards the centre of the island. The climate is usually temperate. There are a number of salt marshes. Coral is found, and game is plentiful. The horned cattle are diminutive; but the sheep and hogs are large. A great quantity of sheep and goat-milk cheese is made and exported to Spain. The soil produces oranges, vines, olives, and other fruits, which rival those of Portugal. The wool of Majorca is, in general, of good quality. They have few manufactures. *Pop.* variously estimated, perhaps 250,000. Majorca and Minorca were the Balearic islands of the ancients. (*See* BALEARIC.)

MAKALLAH, or MAOULLAH, *mak-al'-la*, a seaport-town of Arabia, in a small bay on the S. coast, about 300 miles from Aden. It is the most commodious station on this coast for shipping to obtain supplies of provisions. It has a trade in gums, hides, senna, coffee, and other native produce. *Pop.* about 500, including foreigners. *Lat.* 14° 30′ N. *Lon.* 49° 6′ E.

MAKER, *mai'-ker*, a village and parish of England, 2 miles from Plymouth. On a height is a battery for the defence of Plymouth Sound. *Pop.* 3,018.

MAKO, *ma'-ko*, a market-town of Hungary, on the Maros, 20 miles from Szegedin. *Pop.* 23,000.—In the neighbourhood large quantities of wine are made.

MAKOWAR, *ma-ko'-ar*, two small islands in the Red Sea.

MAKRI, *ma-kre'*, two towns of Asia Minor; the first, 50 miles from Rhodes, with some remains of antiquity; and the second, 75 miles from Adrianople. Neither of them has a population above 4,000.

MALABAR, *mal'-a-bar*, an extensive province of Hindostan, in the presidency of Madras. It is bounded N. by the province of Canara, S. by Cochin, E. by a chain of lofty mountains denominated the Western Ghauts, and W. it is washed by the North Indian Ocean. *Area*, about 6,000 square miles. *Desc.* This province consists either of flat land washed by the sea, or of different ranges of hills, extending to the foot of the mountains, intersected by a number of mountain-streams. *Pro.* Teak timber, sandal-wood, cocoa-nuts, black pepper, tobacco, cotton, rice, ginger, coffee, and sugar. *Minerals.* Iron ore is found in the hills.

*Pop.* about 1,500,000; comprising Hindoos, Mussulmans, Christians, and Jews. *Lat.* between 10° 15′ and 12° 18′ N. *Lon.* between 75° 15′ and 76° 55′ E.—On the downfall of Tippoo Saib, this country was annexed to the British dominions. The Hindoos are divided into castes, several of whom still practise some revolting superstitions.

MALABAR POINT, a noted promontory on the island of Bombay, near which is a celebrated temple of the Hindoos. It has a residency for the use of the governor. *Lat.* 18° 56′ N. *Lon.* 72° 51′ E.

MALACCA, *ma-lok'-ka*, a considerable country of India beyond the Ganges, situate on the W. coast of the Malay peninsula, connected with Siam by the isthmus of Kraw. At all other points it is surrounded by the sea, having, on the W., the Indian Ocean and the Straits of Malacca, which separate it from Sumatra; on the E., the Gulf of Siam and the Sea of China. *Area*, 1,000 square miles. *Desc.* The country is traversed by a chain of lofty mountains, and covered with extensive forests and marshes, so that it is very difficult to penetrate into the interior. *Pro.* Rice, sago, pepper, rattans, timber, cocoa-nuts, gums and ivory. The fruits are excellent and plentiful; but grain is but scantily produced. Game is also scarce. *Minerals.* Tin and gold-dust. *Pop.* 55,000. *Lat.* between 2° and 3° N. *Lon.* between 102° and 103° E.—Formerly this country was ruled chiefly by numerous petty states, and wars were frequent. In this turbulent system, usurpation and all kinds of violence were habitually practised. The influence of these causes, joined with seafaring and piratical habits, formed a character which rendered the Malays the terror of Asia. The Papuas, or oriental negroes, inhabit the interior. Malacca, in 1825, was exchanged, by the Dutch, for Benecoolen, from the British, and placed under the Bengal presidency. In 1851, however, it was separated from Bengal, and, with Prince of Wales Island and Singaporo, was placed under the administrative control of a governor.

MALACCA, the capital of the above country, is situate on the W. coast, upon the straits which bear its name, 130 miles from Singapore. The principal public buildings are a court-house, town-house, gaol, barracks, and hospitals. *Pop.* about 12,000. *Lat.* 2° 14′ N. *Lon.* 102° 12′ E.—In 1508 this town was visited by the Portuguese, and afterwards stormed by them. It was then taken by the Dutch, who retained possession of it till 1795, when it was subjected by a British force. After the formation, however, of the settlement at Pulo Pinang, or Prince of Wales Island, the garrison and stores were withdrawn from Malacca, and the whole place dismantled.

MALACCA, STRAITS OF, a narrow sea between the island of Sumatra and the country of Malacca, from the equator to *lat.* 5° N.

MALACHI, *măl'-a-ki*, the last of the twelve minor prophets. He lived in the time of Nehemiah, in the reign of Artaxerxes Longomanus, and is said to have died young. He prophesied the coming of John the Baptist, under the name of Elias.

MALAGA, *mal'-a-ga*, a city of Spain, in Granada, on the coast of the Mediterranean, situate at the inland extremity of a deep bay, 65 miles from Gibraltar. The town is commanded by an old Moorish fortress, called the Gibralfaro, and is of a circular form, surrounded by a double wall, with a number of stately towers. The city is of Moorish construction, and combines a number of contrivances for mitigating the extremes of heat, and for enjoying the tranquillity of retirement. The streets are narrow, the houses are large, and, in general, each has a court into which the windows open. The public buildings are obscured by private houses, and the city does not even contain a good square. The principal buildings are the custom-house and the cathedral. The cathedral is very large, and is partly of Roman and partly of Moorish architecture, though erected in the 16th century. The interior is finished with exquisite taste. The bishop's palace is in front of the cathedral. The Alameyda, or public walk, is also very fine. The harbour of Malaga is capable of containing about 450 merchant vessels. A fine mole, of 700 yards in length, runs out into the sea, and two smaller ones have been subsequently built. The rivers Guadalmedina and Guadalorce discharge their waters at this place into the ocean. The great export is fruit and wine, the finest of which is called "Mountain" and "Lagrimas." *Manf.* Linen, woollen, sailcloth, paper, rope, hats, leather, and soap. *Pop.* 66,000. *Lat.* 36° 43′ 5″ N. *Lon.* 4° 26′ E.—Malaga was founded by the Phœnicians. It fell into the hands of the Moors in 714, and was not wrested from them until 1487, when Ferdinand the Catholic took it. In 1810 it was taken by the French, and remained in their possession till the year 1812. It has, at different times, suffered severely by the plague.

MALATESTA MALATESTI, Lords of Rimini, *mal-a-tais'-ta*, a great Italian family during the middle ages, and the head of the Guelph party at Rimini. The tragedy which occurred in the household of one of this family forms one of the finest episodes in Dante's "Inferno." After being despoiled of their possessions by Pope Clement VIII., in 1528, the family retired to Venice, and their names were afterwards recorded in the annals of that republic.

MALAUCENNE, *mal'-lo-sen*, a town of France, in the department of the Vaucluse, 16 miles from Orange. *Manf.* Silk-spinning. *Pop.* 3,500.

MALAY PENINSULA, *ma-lai'*, the most S. portion of continental Asia, and of its S.E. peninsula of Further India. The Isthmus of Kraw connects it on the N. with Siam; on the E. it has the Gulf of Siam, and on the S. and W. the Straits of Malacca. *Area*, 45,000 square miles. *Desc.* Traversed throughout its centre by a mountain-chain, rising between 3,000 and 5,000 feet, and well watered. *Pro.* Fine timber, areca, bamboos, sago, caoutchouc, cinnamon, tobacco, coffee, sugar, cloves, cotton, and indigo. Ivory and horns are also produced. *Minerals.* Tin is the principal. *Pop.* 375,000. *Lat.* between 1° and 13° N. *Lon.* between 98° and 104° E.

MALAYSIA, or MALAY ARCHIPELAGO, *ma-lai'-se-a*, a name given to the islands of the Malay Archipelago principally inhabited by the Malay race, and comprising Borneo, the Sunda Isles, Celebes, Moluccas, Philippines, &c.

MALCHIN, *mal'-shin*, a town of Germany, in Mecklenburg-Schweriu, 24 miles from Gustrow. *M. of.* Chiefly weaving and tanning. *Pop.* 4,000.

MALCOLM, *măl'-kom*, the name of four kings of Scotland, who reigned between the 10th and 12th centuries. The most celebrated was Malcolm III., son of that Duncan immortalized in Shakspere's "Macbeth." After the murder of his father, he took refuge in England; but, upon the fall of Macbeth, in 1057, he recovered possession of the Scottish crown. He afterwards engaged in a war with William Rufus, and was slain fighting against the English, in 1093.

MALCOLM, Sir John, a celebrated British officer, and author of the "History of Persia." He went to India at the age of 13, and, after serving with distinction in both political and military capacities, was appointed, in 1803, minister plenipotentiary to Persia. On his return to England, in 1812, he was knighted, and three years afterwards he published his "History of Persia," a most valuable contribution to literature, derived from native sources. He returned to India in 1817, and acted as second in command in the campaigns against the Mahrattas and Pindarees. On the conclusion of this war, he was nominated to the civil and military command of Central India, which, during his administration, became tranquillized and prosperous. He returned to England in 1821, but again went out to the East, in 1827, as governor of Bombay. He finally left India in 1830, and soon afterwards entered parliament. He was the author of a "Life of Lord Clive," "Political History of India," and a "Memoir on Central India." B. in Scotland, 1769; D. 1833.

MALDAH, *mal-da'*, a district of British India, in the presidency of Bengal. *Area*, 1,000 square miles. *Desc.* Fertile and well watered, producing wheat, barley, rice, and oil-seeds. *Pop.* 435,000. *Lat.* between 24° 30′ and 25° 25′ N. *Lon.* between 87° 50′ and 88° 30′ E. In 1765 this district came into the possession of the British.

MALDEGHEM, *mald'-gem*, a village and parish of Belgium, East Flanders, 17 miles from Ghent. *Manf.* Tobacco and beer, and there are calico-printing works and oil-mills. *Pop.* 7,000.

MALDEN, *măl'-den*, a township of the United States, Massachusetts, connected with Charlestown by a bridge over the Mystic river. *Pop.* 4,000.

MALDIVE ISLANDS, *mâl'-dives*, a cluster of small islands, of coral formation, in the Indian Ocean, about 300 miles from the S.E. coast of Hindostan. They are divided into 17 groups, separated from each other by narrow channels, which are unsafe for ships of burthen. The greatest breadth of the chain is from 60 to 80 miles. *Pro.* Millet, fruit, and poultry. The islands carry on a considerable trade with each other, and also with India. The climate is intensely hot, and unhealthy for Europeans. *Pop.* about 180,000. *Lat.* between 0° 45′ S. and 7° 6′ N. *Lon.* between 72° 48′ and 73° 48′ E. The inhabitants of these islands live under a sultan who pays an annual tribute to the British government in Ceylon.

MALDON, *mawl'-don*, an ancient borough and market-town of England, in Essex, on the Chelmer, 9 miles from Chelmsford. The public buildings are, the principal church of All Saints; St. Mary's church, a spacious building, said to have been built before the year 1056; St. Peter's, now united to All Saints, near which is the town-hall, a large old brick building. At the W. end of the town is an extensive range of barracks. There are, besides, a gaol, union workhouse, a library, and various schools. *Pop.* of borough, about 5,000.

MALDONADO, *mal-do-na'-do*, a town of S. America, in the government of Buenos Ayres, near the N. entrance of the Plata, and sheltered from the S.E. winds by a small island, which bears the same name. *Pop.* Unascertained. *Lat.* 34° 50′ S. *Lon.* 55° 30′ W.

MALE, or MOHL, *mole*, the principal island of the Maldive group, about 5 miles in circumference. It is the residence of the sultan, and is fortified. *Pop.* about 2,000.

MALEBRANCHE, Nicholas, *mal'-branch*, one of the most illustrious disciples of Des Cartes, whose philosophy he devoted his life to propagate and explain. His works were numerous, and of the highest excellence. B. at Paris, 1638; D. at Paris, 1715.

MALEGNANO, *mal'-lain-ya'-no*, a village of Austrian Italy, where the Austrians were dislodged by the French under the command of Baraguay d'Hilliers, June, 1859.

MALESHERBES, Christian William Lamoignon, *mals'-hairb*, an eminent French lawyer, whose talents procured him the place of president of the court of Aids in 1750, which post he held with great reputation for upwards of twenty years, and then retired to his paternal estate. In 1775 he was recalled from his retreat, and made minister of state for the interior. Under his administration, prisons were visited, and numerous abuses removed, but the year following he resigned. At the beginning of the Revolution he conceived a hope that it would have been productive of good, but the illusion soon vanished. He voluntarily pleaded the cause of the unfortunate Louis XVI., and defended him with all the ardour of conscious rectitude. This excellent man was condemned to death, with his daughter and grand-daughter, by the revolutionary tribunal, in 1794. He wrote a treatise on Rural Economy, "Thoughts and Maxims," and two Memoirs on the Civil State of the Protestants. D. 1721.

MALINES, a town of Belgium. (*See* MECHLIN.)

MALLET, David, *mâl'-let*, a Scotch poet. He was tutor to the sons of the duke of Montrose, with whom he travelled, and on his return settled in London, where he became an author by profession. In 1740 he published a "Life of Lord Bacon," which is a very insignificant work, and totally unworthy of the subject. The duchess of Marlborough left him a legacy of £1,000 to write the life of her husband; on which it was observed, that as he had forgot Bacon was a philosopher, so he would probably omit to notice Marlborough as a general: of this life, however, he never wrote a line. Frederick, prince of Wales, appointed him his undersecretary. Lord Bolingbroke left him his philosophical works, which he published after the author's death. His poetical works were collected and published by himself in 1759. B. in Perthshire about 1700; D. 1765.

MALLEVILLE, *mal'-veel*, a town of France, in the department of the Aveyron. *Pop.* 2,300.

MALLICOLLO, *mal-li-kol'-lo*, one of the largest of the New Hebrides, in the S. Pacific Ocean. *Area*, 600 square miles. *Lat.* 16° 25′ 20″ S. *Lon.* 167° 57′ 23″ E.

MALLING, *mawl'-ling*, the name of three parishes in England, none of them with a population above 2,000.

MALLORCA, an island of the Mediterranean. (*See* MAJORCA.)

MALLOW, *mâl'-lo*, a town of Ireland, in the county of Cork, on the Blackwater, over which is an excellent stone bridge, 32 miles from Limerick. Its chief structures are a fine church, a good market-house, and a horse-barrack; infirmary, gaol, union workhouse, and news-room. It has a mineral spring, which is the hottest in Ireland. *Pop.* of borough, about 7,000. A station on the Great South-Western Railway.

MALMEDY, *mam'-de*, a town of the Prussian province of the Lower Rhine, on the Warge, 23 miles from Aix-la-Chapelle. *Manf.* Woollens, lace, muslins, glue, and soap. *Pop.* 4,400.

MALMESBURY, *mams'-ber-e*, a district of the Cape Colony, S. Africa. *Pop.* about 10,000.

MALMESBURY, William of, an old English historian, whose father was a Norman, his mother being an Englishwoman. He was early in life placed in the monastery whose name he is known by, and became its librarian. He wrote "The History of the Kings of England," "The History of the Prelates of England," and many less-important works. His History of the Kings terminates at the year 1142, and has been reprinted in Bohn's Antiquarian Library. He is regarded as one of the most truthful and impartial of the early historians. B., it is supposed, in Somersetshire, about 1095; D. about 1150.

MALMESBURY, James Harris, first Earl of, an English diplomatist, was son of the celebrated James Harris, author of "Hermes." (*See* HARRIS, James.) He was appointed ambassador to the court of Frederick II. of Prussia in 1772, and subsequently filled the same post in Russia and at the Hague. In 1794 he negotiated the marriage between the prince of Wales and Caroline of Brunswick; and many valuable details of the mission were afterwards published by him in his "Diary." His last employments were in 1796-7, at Paris and Lille, for the purpose of obtaining a treaty of peace with the French republic. His "Diaries and Correspondence" were published in 1844. B. at Salisbury, 1746; D. 1820.

MALMISH, *mal'-mish*, a town of Russia, on the Viatka, about 80 miles from Kasan. *Pop.* 2,000.

MALMO, *mal'-me(r)*, a district of Sweden, occupying its S.W. extremity. *Area*, 1,780 square miles. *Desc.* Level, and one of the most fertile provinces of the kingdom. *Pop.* 255,000.

MALMO, the capital of the above district, stands 16 miles from Copenhagen. It has a citadel and an artificial harbour. *Manf.* Woollens, soap, and tobacco. *Pop.* 11,000.

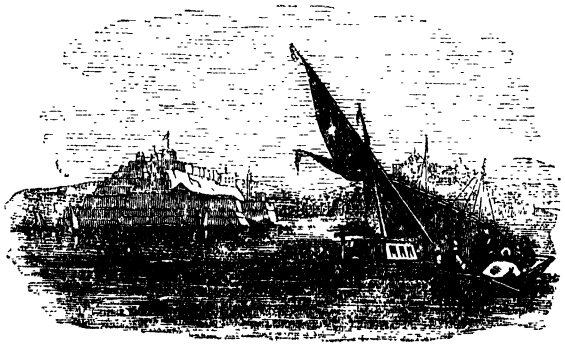
MALMSBURY, an ancient market and borough town of Wiltshire, near two tributary streams of the Avon, 20 miles from Bath. Its castle is demolished; but there are some remains of its abbey. It has a union workhouse, an abbey-house, and several endowed schools. *Manf.* Woollens. *Pop.* 2,500.

MALO, ST., *mal'-lo*, a seaport of France, in the department of the Ille-and-Vilaine, on the small island of Aaron, which communicates with the continent by means of a mole, 40 miles from Rennes. The entrance to the town at the end of the mole is strongly defended by bastioned walls and a castle. There are also ramparts around the town; and on the north side it is inaccessible, in consequence of rocks and fortifications. The principal public buildings are the cathedral, the town-hall, the episcopal palace, communal college, exchange, theatre, chamber of commerce, school of navigation, and a naval arsenal. The harbour is large, and has recently had added to it a floating dock. *Manf.* Rope, fishing-nets, blocks, snuff, and soap. It has an active trade both in fish and provisions. *Pop.* 10,000.—It is the birthplace of Cartier, the discoverer of Canada.

MALOI-JAROSLAWITZ, *mal'-loi-ja-ros'-la-vitz*, a town of Russia, in the government of Kaluga, 38 miles from Kaluga. It is noted for being the scene of a most sanguinary action between the French and Russians, in October, 1812. Also the name of other small towns in Russia.

MALONE, *ma-lone'*, a town in Franklin county, New York, U.S., 40 miles from Platsburg. It has a state arsenal. *Pop.* 5,000.

MALONE, Edmund, an Irish lawyer, who devoted his



life to literature, and became celebrated for his commentaries and editions of Shakspere's works. B. at Dublin, 1741; D. 1812.

MALPLAQUET, *mal'-pla-kai*, a village of France, in the department of the North, 9 miles from Mons. It was the scene of a sanguinary battle, in 1709, between the French and the allies, commanded by the duke of Marlborough and the Prince Eugene.

MALSEN, or MALCESINE, *mal'-sen*, a town of Austria, on the Lake of Garda, 22 miles from Verona. *Pop.* 2,500.

MALSTROM, or MOSKOESTROM, *mail'-strom*, a violent whirlpool on the coast of Norway. *Lat.* 68° 8' N. *Lon.* 13° 46' E.

MALTA, *mal'-ta*, an island of the Mediterranean, nearly opposite to the S. angle of Sicily, from which it is distant about 60 miles. *Ext.* 17 miles long, with a breadth of 8 at its widest part. *Area*, 95 square miles. *Desc.* Its coast is in general steep and rugged, and well fortified throughout. The two small islands of Gozo and Comino are separated from it only by a narrow channel. Every spot is cultivated with the greatest care, and the soil, when deficient, is supplied in ship-loads from Sicily: hence, it may be considered as wholly artificial. *Climate.* Healthy, and resembling Africa rather than Europe. Frost and snow are unknown, and ice is largely imported from Sicily. *Pro.*

MALTA.

Most of the productions, both of Europe and the tropical climates, which have been tried here, have succeeded. Indigo and saffron are cultivated, and also cotton, which has been exported to a great extent. The honey of Malta is in high repute. *Manf.* Coarse cottons, jewellery, and cabinet-work. *Pop.* including Gozo and Comino, about 130,000. *Lat.* of Cape Valetta, on the N. side, 35° 53' 8" N. *Lon.* 14° 31' 2" E.—Malta was possessed by the Carthaginians, Romans, and afterwards by the Saracens, who were driven from it by the Normans. They retained it till its occupation, in the 16th century, by the Knights of St. John of Jerusalem, who fortified it, and participated in all the attacks made upon the Turks by the Christian powers, both by sea and on the coast of Africa. In 1565 it was besieged by the Turks: after losing four months in reiterated attacks, and sacrificing a great part of their army, they were obliged to re-embark, and, from that time, they forbore from all further attempts on the island. In 1798 it surrendered to Bonaparte, and received a French garrison. Being afterwards blockaded by a British squadron, it was forced to surrender, through famine, in 1800; and by the treaty of Paris, in 1814, was confirmed to Britain. In no fortress in Europe are the defences more imposing. Its administration consists of a governor and a council of seven persons, appointed by the British crown.

MALTBY, *malt'-be*, the name of two parishes in England, one in Yorkshire and the other in Lincolnshire. Neither has a population above 1,000.

MALTE-BRUN, Conrad, *mill'-te bru(r)n*, a celebrated Danish geographer. He commenced by writing poems and treatises in favour of liberty, for which he was exiled in 1796. After taking refuge in Sweden for a short time, he went to Paris in 1800, where he was engaged as foreign editor of the "Journal des Débats," and published a number of highly-important geographical works, the chief of which are "Geography, Mathematical, Physical, and Political," "Summary of Universal Geography," and "Annals of Voyages and Travels." B. in Jutland, 1775; D. at Paris, 1826.

MALTHUS, Rev. Thomas Robert, *mill'-thus*, an English clergyman of the established church, who wrote several works on population and on political economy, which then, and since, attracted considerable attention. With respect to the famous essay on population, the author's propositions were, that the population, when unchecked, doubles itself every twenty-five years, or increases in a geometrical ratio; the means of subsistence, on the other hand, could not be made to increase faster than in an arithmetical ratio. He then proceeded to show that the natural check for this was misery, which, together with vice, shortens human life. Mr. Malthus is said to have been much misconceived; he was certainly plentifully abused for his seemingly cold-hearted theories; it is clear, however, that he was a good and philosophic man. Besides the works already mentioned, he wrote a number of others bearing on the same subjects. B. near Dorking, Surrey, 1766; D. at Bath, 1834.

MALTON, *mal'-ton*, a borough and market-town of the N. Riding of Yorkshire, on the Derwent, which is here crossed by a spacious stone bridge, 18 miles from York. There are two towns, the Old and the New. The houses are mostly of stone, and, in general, well built. There are two parish churches, and places of worship for various denominations. The remains of the castle are still visible, and there are a town-hall, theatre, public rooms, a library, workhouse, and several schools. Near New Malton is a mineral spring. Large quantities of corn, butter, and bacon-hams are exported to Hull. *Pop.* 8,000.—It is a station on the York and North Midland Railway. In the reign of Stephen this town was burned, and, on being rebuilt, took the name of New Malton.

MALVERN, GREAT and LITTLE, *mal'-vern*, two villages in Worcestershire, 8 miles from Worcester. The first is noted for its mineral springs, which are the means of drawing many invalids to its neighbourhood. It has a church, the remains of its once celebrated monastery. *Pop.* 4,000.—LITTLE MALVERN has not more than 100 inhabitants.

MALVERN HILLS, a range of hills in the counties of Worcester and Hereford. From N. to S. they extend about 9 miles. Near their centre is an ancient British fortress, called Herefordshire Beacon, 1,444 feet above the level of the sea.

MALWAH, *mall'-wa*, an old province of Central Hindostan, now comprised in the states of Bhopaul, Gwelior, Indore, Raggher, &c. It is an open table-land, diversified with conical-shaped hills, and is the region in which several of the Indian rivers have their rise. The tribe called Bheels are numerous in this territory, and have been organized into a military corps. *Lat.* between 22° and 25° N. *Lon.* between 74° and 76° E.

MALWAN, or SOONDEROOG, *mal'-wan*, a town and fortified island of Hindostan, 200 miles from Bombay, to which presidency it belongs. It was formerly a great resort of pirates. *Lat.* 15° 52' N. *Lon.* 73° 47' E.

MAMERS, *mal'-mair*, a town of France, in the department of the Sarthe, on the Dive, 24 miles from Le Mans. *Manf.* Woollens, cottons, and hempen goods. *Pop.* 6,000.

MAMMOLA, *mam'-mo-la*, a town of Naples, on the Locano, 8 miles from Gerou. *Pop.* 6,300.

MAMORE, *mal'-mo-rai*, a river of Quito, formed by the junction of the Chaparee and Rio Grande; and,

after a course of 400 miles, it enters the Madera, in *lat.* 11° 55′ S.

MAN, ISLE OF, MONA, or MENAVIA, an island of Great Britain, in the Irish Sea, nearly equidistant from the coasts of England, Scotland, and Ireland. *Ext.* about 30 miles long, and 10 or 12 broad, terminating in a sharp point towards the north. On the south is a small island, called the Calf of Man. *Desc.* The interior and central part is mountainous, Snifield attaining an elevation of 2,000 feet. The towns and villages are almost all situate along the coast; and the interior is mostly divided into small farms, or left in a state of nature, covered with heath and gorse. The soil is rather unproductive. *Pro.* Wheat, oats, barley, potatoes, and flax. Large numbers of cattle are fattened for exportation, and butter forms an article of commerce. Poultry of all kinds are numerous; also eggs and fish. Immense numbers of sea-fowl breed among the rocks, especially on the Calf of Man, and there is a small but excellent breed of horses. *Minerals.* Lead, iron, and copper. There are also quarries of slate and stone. *Manf.* Coarse hats, cotton goods, and linen cloth, are made in different parts of the island. Liverpool is the port in England in which nearly all the trade of the Isle of Man centres. *Gov.* The Isle of Man is ruled by a governor, a council of public affairs, and the House of Keys, the representatives of the people, now a self-elected body. The whole island is under the ecclesiastical jurisdiction of a bishop, who is styled bishop of Sodor and Man, and is, besides, sole baron of the isle, and possesses other important privileges. *Pop.* 53,000. *Lat.* of the Calf of Man, 54° 3′ N. *Lon.* 4° 49′ W.—The duke of Athol was formerly lord proprietor of this island; but, in 1806, the sovereignty was purchased of him by the English government for the British crown, and, finally, in 1826, certain remaining privileges were given up by the duke, on receiving £116,000. This island was a great station of the Druids, of whose circles it contains numerous remains. In its schools the Manx, a dialect of the Celtic, as well as the English, is taught.

MANA, *ma′-na*, a town of British India, in the district of Kumaon, N.W. Provinces. It is nearly 10,500 feet above the level of the sea, and is deserted by its inhabitants in winter, when it is buried by the snow. Its trade is principally with Chinese Tartary, through the Mana Pass, which has an elevation of 18,000 feet.

MANAAR, *man-ar′*, an island off the N.W. coast of Ceylon. *Ext.* 18 miles long, by 2½ broad. *Lat.* 9° 6′ N. *Lon.* 79° 58′ E.

MANAAR, GULF OF, an inlet of the Indian Ocean, between the S. extremity of Hindostan and the island of Ceylon. It is about 120 miles wide at its entrance.

MANACOR, *man′-a-kor*, a town of the island of Majorca, 30 miles from Palma. It is situate in a fertile plain, and is a bishop's see. *Pop.* 10,000.

MANASSEH, *ma-nas′-sa*, king of Judah, succeeded his father, Hezekiah, at the age of 12 years. The commencement of his reign was disgraced by a series of crimes and idolatrous abominations, and "innocent blood filled Jerusalem from one end to the other." In 677 B.C. Esarhaddon, king of Assyria, invaded his dominions, and carried Manasseh captive to Babylon, where his misfortunes produced repentance. After a long captivity, the king of Babylon gave him his liberty, and restored him to his kingdom. On his return to Jerusalem, he established the worship of the true God. There is a fine prayer by him in the Apocrypha. B. 641 B.C.

MANCHA, LA, *man′-cha*, an old province in the central part of Spain, to the S. of Old Castile, and now comprised in the province of Ciudad Real. It is almost entirely surrounded by mountains, forming parts of the Sierra de Oca, the Sierra de Alcaraz, and the well-known Sierra Morena.—Sancho Panza, the squire of Don Quixote, in the novel of Cervantes, was chosen as a representative of the peasantry of this country.

MANCHA REAL, *rai′-al*, a town of Spain, in Andalusia, 7 miles from Jaen. *Manf.* Woollen and linen goods. *Pop.* 4,000.

MANCHE, LA, *mansh*, a maritime department of France, bounded W. and N. by the English Channel, S.E. by the department of Calvados, and S. by that of Ille-and-Vilaine. *Area*, 2,617 square miles. *Desc.* It comprises the western part of Normandy, and, although marshy in some parts, is nevertheless fertile in grain, hemp, lint, and apples. Its cattle are excellent, and its horses the best in France. *Rivers.* The Douve, Merdiret, Selune, Vire, and Lause. *Manf.* Linens, cottons, and lace; also iron, copper, and zinc goods. *Pop.* 601,000.

MANCHESTER, *măn′-ches-ter*, a city of Lancashire, and, with Salford, the adjacent borough, the great centre of the cotton trade, 161 miles from London. It is situate on the Irwell, which has been rendered navigable from Liverpool. The greater part of the town lies on the left or E. bank of the river; but the district of Salford, formerly a suburb, is built entirely on the W. bank, and is joined to the opposite side by six bridges. The town has received many improvements, and now covers an area of about 3,000 acres. The central parts consist of a great number of streets, lanes, alleys, and courts, all crowded with warehouses, factories, and shops; but towards its extremities, among the more modern buildings, are very handsome and elegant dwelling-houses, either standing alone, or forming rows, places, parades, &c. The churches and chapels are numerous, and the Collegiate or Christ Church is now erected into a cathedral. The Collegiate, usually called the Old Church, is a fine Gothic structure, richly ornamented in the cathedral style. The whole breadth is 120 feet from E. to W.; the whole length is 210 feet. Some of the other churches deserve notice; as St. George's at Hulme, St. Luke's at Cheetham, and Trinity church at Salford. No town is more distinguished by the number of its charitable institutions. Cheetham Hospital, commonly called the College, is intended for the maintenance and education of eighty boys, from the age of six to fourteen, and has a large library and a museum. The Infirmary is a handsome set of buildings, opposite Piccadilly: it includes a large general hospital, a dispensary, and a lunatic hospital and asylum. There are, besides, a lying-in hospital, the Ladies' Auxiliary Society, the House of Recovery, or fever-ward, the Strangers' Friend Society, instituted in 1791, an hospital for persons afflicted with diseases in the eye, also a lock hospital and penitentiary; the Manchester poor-house; besides various other charitable institutions and associations for different purposes. The charity-schools are numerous in Manchester; also the Sunday schools. There is a royal Lancasterian school, and a smaller establishment on the same plan; also two national schools, on Dr. Bell's system, the grammar-school, Manchester New College, removed from York in 1840, and the principal Unitarian college in England (it is in connection with the University of London); the Royal School of Medicine, and Lancashire Independent college. Of the associations for promoting literature and science, the principal are the Literary and Philosophical Society, founded in 1781; the Royal Institution; Geological, Statistical, Architectural, Phrenological, Botanical, and Natural History societies; besides mechanics' institutes, School of Design, and Victoria Gallery. The Exchange, for the resort of the merchants and tradesmen, is a very fine and spacious building, built in the Doric style. In the lower floor is the news-room, a magnificent hall, comprising an area of 4,060 feet, and upper rooms for public dinners, meetings, &c., on a corresponding scale. The other buildings are the Corn Exchange, Concert-hall, Assembly-rooms, Salford and Chorlton town-halls, the New Bailey prison, founded in 1787; various asylums, theatres, a barracks, and Victoria bridge. There is a statue of the duke of Wellington; but it is as a manufacturing city that Manchester derives its importance. *Manf.* Of these, the principal, and the source of most of the rest, is that of cotton. Being the centre of this trade, it extends around it in all directions, to Furness and Derby on the north and south, and to Leeds and Liverpool on the east and west. It is, besides, the general depôt from which the raw material is distributed through all parts of the district, and in which all this scattered merchandise is again collected, when finished, into a centre, to be again expanded over a wider circle; to be sent to Hull, Liverpool, and London, and thence all over the world. The principal articles are velvets, fustians, dimities, calicoes, checks, tickings, jeans, shirtings, ginghams, quiltings, hand-

kerchiefs, nankeens, diapers, muslinets, muslins, cambrics, and almost every kind of fancy cotton and cotton and silk goods. The spinning trade is most extensive, and considerable quantities of yarn are annually exported. Weaving by power-looms, or looms worked by machinery, is also carried on to a great extent, and the erecting and keeping up of the various and complicated machinery, which is constantly at work, is, in itself, a source of very great business in and around Manchester. This gives rise to great iron-foundries, and other works of a similar kind, and to the invention even of new machines to facilitate its operations. Besides the weaving and spinning, the printing, dyeing, and bleaching businesses are largely pursued. The hat-manufacture is also very extensive, and there are large chemical-works, besides a great number of other manufactories. By means of the canals which proceed from it to different parts of the country, Manchester enjoys a communication by water both with the eastern and western seas, being situate directly in the line of navigation which here extends across the island from shore to shore, while it is equally open to the north and south by various branches from the main trunk. *Pop.* in 1851, 401,321, Salford inclusive.—Manchester is in connection by railway with all the principal places in the kingdom, and is the birthplace of the celebrated duke of Bridgewater, Henry Dalton, and the father of the great Sir Robert Peel.

MANCHESTER, several townships in the United States, none of them with a population above 14,000. The largest is in the state of New Hampshire, 20 miles from Concord.

MANCHOORIA, *man-choo'-re-a*, an extensive region of E. Asia, forming a great division of the Chinese empire, bounded on the N. by the government of Nakutsk, E. by the Sea of Japan and the Gulf of Tartary, S. by Corea and the Yellow Sea, and W. by Mongolia. *Area*, estimated at 34,000 square miles. *Desc.* A mountain-chain runs along the coast, and has prevented the interior from being explored by Europeans; but it is said that large quantities of corn, pease, and ginseng are sent to China, and that rhubarb, timber, and live stock are abundant. Its centre is traversed by the Amoor; but beyond this, little more is known of the country. *Pop.* Unascertained, being principally nomades. *Lat.* between 39° and 50° N. *Lon.* between 117° and 142° E.

MANCO-CAPAC, *man'-ko ka'-pak*, founder and first inca of the empire of Peru. He civilized and reunited the different tribes of Peruvians, to whom he pretended that he was born of the sun. After his death, he was worshipped as a deity. He is said to have flourished about 1025. His dynasty endured 500 years, but became extinct soon after the conquest of Peru by Pizarro.

MANDAN DISTRICT, *man'-dan*, a territory belonging to the United States, situate between the Wisconsin territory and the Rocky Mountains, and bounded on the N. by British America, and on the W. by the northern fork of Platte River. *Area*, estimated at 300,000 square miles. *Desc.* Mostly an immense prairie, traversed by the Upper Mississippi, the Yellow-stone river, and the principal pass leading into the Oregon territory across the Rocky Mountains.

MANDARA, *man-da'-ra*, a state of Central Africa, lying to the S. of Bornou. It is a mountainous country, inhabited by Mahometans, whose principal manufacture consists of iron wares.

MANDEVILLE, Sir John, *măn'-de-veel*, an English traveller, who spent 34 years in visiting various countries, travelling in Palestine, Egypt, and a large portion of Asia. He lived for three years at Pekin, and on his return published a relation of his voyages, which abounds in much curious matter, but blended with the most extravagant fictions. The first English edition of his travels was printed by Winkyn de Worde, at Westminster, in 1499. D. at St. Albans, about 1300; D. at Liège, 1372.

MANDINGO, or MANDING, *man-din'-go*, a mountainous territory in W. Africa, bounded E. by Bambarra, N. by Foolsdoo, S. and W. by Gadou and Jallonkadoo. *Desc.* Rocky and barren, and contains no towns of any consequence, except Kamalia. The whole region is watered by the Niger in its early course. The Mandingoes have now spread themselves over most of Africa, and this country is supposed to be their cradle. *Lat.* between 10° and 14° N. *Lon.* between 12° and 16° W.

MANDURIA, *man-doo'-re-a*, an ancient town of Naples, 6 miles from Cassano. *Pop.* 8,000.

MANEROO, or BRISBANE DOWNS. (*See* BRISBANE.)

MANES, *mai'-nees*, a name given, in the Etruscan and Roman mythologies, to the souls of the dead. They were reckoned among the infernal deities, and were worshipped with great solemnity, particularly by the Romans. Virgil introduces his hero as sacrificing to the infernal deities, or to the Manes, a victim whose blood was received in a ditch.

MANETHO, *mai-ne'-tho*, an Egyptian historian, who flourished in the time of Ptolemy Philadelphus, at Mende, or Heliopolis. He belonged to the priestly caste, and composed, in Greek, a History of Egypt, of which a fragment only has come down to us; there is, however, a complete work by him on the Influence of the Stars.

MANFRED, *măn'-fred*, king of Naples and Sicily, was a natural son of the emperor Frederick II. After the death of his brother Conrad, he became regent of the kingdom, during the minority of Corradino, his nephew. Pope Innocent IV. exciting a revolt against him, he was driven from his kingdom; but he reconquered it a year afterwards, and caused himself to be crowned in 1258. Pope Urban IV. excommunicated him, and offered his kingdom to Charles of Anjou. Manfred perished in a desperate battle with the latter near Benevento, 1266.

MANFREDONIA, *măn-frai-do'-ne-a*, a town of Naples, in the Capitanata, on a bay of the Adriatic, 20 miles from Foggia. It is surrounded by walls, and its port is sheltered by a mole. *Pop.* 7,500. This town was, in the 13th century, founded by Manfred.—The GULF of the same name is an inlet of the Adriatic, and is about 15 miles long, and 30 wide at its entrance.

MANG, *măng*, a river of Ireland, rising in the mountains of Kerry.

MANGALORE, called also COUBIAL BUNDER, *măn-ga-lor'*, a seaport and fortress of Hindostan, on the E. shore of the Indian Ocean, 130 miles from Seringapatam. *Pop.* 12,000, exclusive of the military. *Lat.* 12° 49′ N. *Lon.* 75° E.

MANHEIM, or MANNHEIM, *man'-hime*, a town of Germany, in the grand-duchy of Baden, at the confluence of the Neckar and the Rhine, 36 miles from Mentz. Manheim was a petty village when, in 1606, it was chosen for the site of a town, by the then reigning elector-palatine. It has since advanced rapidly; the present palace was built, and the town fortified, according to the rules of the celebrated Cohorn. It presents a very fine view from a distance, being built with the greatest regularity. The palace belonging to the grand-duke occupies the side next the Rhine, and was erected in 1720. It contains several handsome apartments, with a gallery of paintings, cabinets of antiquities and natural history, and a large library. The observatory is a noble building, with a curious tower 108 feet in height. The custom-house resembles a palace, and is surrounded with colonnades, under which are shops. The other public buildings are the convents of the Augustines and Capuchins, now both secularized; the arsenal, the merchants' hall, the theatre; the Lutheran, the Calvinist, and Catholic churches; hospitals, the workhouse, the orphan-house, and the church that belonged to the Jesuits. It has a gymnasium, with drawing and music schools; also a mercantile school, and other literary institutions. *Manf.* Tinsel-ware resembling gold, tobacco, ribbons, shawls, linen, and playing-cards; there are also bleaching-grounds and tanneries. It has a bridge of boats over the Neckar, and a flying-bridge over the Rhine. *Pop.* 25,000.—This place has sustained several sieges. It has a station on the Main-Neckar Railway.

MANHEIM, the name of several townships in the United States, none of them with a population above 4,000.

MANI, *ma'-ne*, an heresiarch of the 3rd century. He was a native of Persia, and taught that there were two principles of all things, co-eternal and co-equal; that all good proceeded from the former, and all evil from the latter; that the good being was the author of the New Testament, and the bad of the Old; the one the creator of the body, and the other of the soul. His followers became numerous, and were denominated

Manichæans. Mani was exiled by order of Sapor, king of Persia, for failing to cure his son, and was subsequently flayed alive by Hormisdus, successor of Sapor, in 274.

MANIAGO, *man-s-a'-go*, a market-town of Austria, 25 miles from Udine. *Manf.* Iron and steel. *Pop.* 4,000.

MANILIUS, Marcus, *ma-nil'-i-us*, a Latin poet in the time of Tiberius. His "Astronomicon" was discovered by Poggius in the 16th century. The best edition is that of Bentley, London; and there is an English translation by Creech.

MANILLA, *ma-nil'-la*, a town of the island of Lucon, and the capital of the Spanish settlements in the Philippines, situate on the banks of a bay of the same name, on the S.W. coast. The city proper communicates with the suburb Bidondo, the seat of most of the trade, by a bridge over the river Passig. It contains many handsome private houses, and, notwithstanding the frequent earthquakes, it has some magnificent churches. The largest and best part of the town is occupied by monasteries and convents; but it has a university, a missionary college, and a large number of schools and hospitals. There is also a government cigar-manufactory. The chief exports are cordage, resinous substances, pitch and tar, cloths, rushes, rattans, indigo of an excellent quality, rice, cotton, copper, and cochineal, with a large proportion of treasure. *Pop.* the suburbs inclusive, about 150,000; of whom about 5,000 are Europeans. *Lat.* 14° 35′ N. *Lon.* 121° 2′ 4″ E.—In the year 1645, great part of this city was destroyed by an earthquake, and, in 1762, it was taken by the English, and a million sterling was exacted for its ransom.

MANIN, Daniel, *ma'-nĕ*, an illustrious Italian patriot, formerly president of the Venetian republic. The son of a distinguished advocate, young Manin was educated for the profession of the law. About 1825 he married, and went to reside at Mestre, a small town near Venice. There he practised as an advocate, and occupied his leisure with historical studies, taking no part in the discussions or proceedings of the secret societies then existing in Italy, but hating Austrian rule, and aspiring for the independence of Venice with the whole force of his nature. That such a man should come into collision with the Austrian government was perfectly natural; and, at the beginning of 1848, he was imprisoned for the liberal opinions expressed by him as advocate during several trials. A few months later, the Austrians were driven from Milan; the insurrection quickly spread throughout the Italian peninsula, and at Venice, Count Zichy, the Austrian governor, was forced to surrender. Manin here stepped forth, and exhorted his countrymen to act like men who were worthy of freedom. He organized a government, at the head of which he was placed, with Tomaseo; formed a committee of defence, created ten battalions of *garde mobile*, and improvised a corps of artillery. When Charles Albert took the field against the Austrians, in the name of Italy, the Venetians agreed to a fusion with Lombardy and Piedmont, under the name of a kingdom of Northern Italy. The defeat of the Piedmontese, however, destroyed that compact, and left Venice to defend herself alone against Austria; thereupon a republic was proclaimed, Manin being named chief triumvir, and the military command confided to the Neapolitan general Pepé. Venice was besieged by the Austrians in August, 1848, but held out heroically until the end of the same month in the following year, and did not surrender before it had been subjected to a fearful bombardment. According to the terms of capitulation, Manin was permitted to go into exile, and thereupon retired to Paris, where he supported himself in honourable independence by giving lessons in Italian. During the last years of his life he communicated to the English, French, and Sardinian press his views as to the independence and unification of Italy, with the king of Piedmont at its head, views which, ere long, it may be hoped, may be completely realized. D. at Venice, 1804; D. at Paris, 1857.

MANITOULIN ISLANDS, *man'-i-too-lin*, a chain in Lake Huron, Canada.

MANKASSER. (*See* MACASSAR.)

MANLIUS, *mǎn'-le-us*, a township of Onondago county, New York, U.S., 10 miles from Syracuse. *Pop.* 6,500.

MANLIUS CAPITOLINUS, Marcus, *kap-i-to-lī'-nus*, a celebrated Roman consul and commander, who, when Rome was taken by the Gauls, retired into the Capitol, and preserved it from a sudden attack made upon it in the night. The dogs which were kept in the Capitol made no noise; but the geese, by their cry, awoke Manlius, who had just time to repel the enemy. Geese from that period were always held sacred among the Romans, and Manlius was honoured with the surname of Capitolinus. He afterwards endeavoured to obtain the sovereignty of Rome, for which he was thrown from the Tarpeian rock, 381 B.C.

MANLIUS TORQUATUS, *tor-kwaī'-tus*, a famous Roman, who displayed great courage in his youth as military tribune. In a war against the Gauls he accepted a challenge given by one of the enemy, and having slain him, took his chain (*torques*) from his neck; on which account he assumed the name of Torquatus. He was the first Roman advanced to the dictatorship without being previously a consul. But he tarnished his glory by putting his son to death for engaging in single combat with an enemy contrary to his order. This gave great disgust to the Romans, and, on account of his severity in his government, all edicts of extreme rigour were called "Manliana Edicta." He flourished 340 B.C.

MANNESDORF, *man'-nes-dorf*, the name of several towns in Austria, none of them with a population above 2,000.

MANNINGHAM, *mǎn'-ning-ham*, a township of the W. Riding of Yorkshire, 1 mile from Bradford. *Manf.* Woollen goods. *Pop.* 10,000.

MANOSQUE, *ma'-nosk*, a town of France, in the department of the Lower Alps, near the Durance, 30 miles from Digne. *Manf.* Serge, twist, leather, and wine. *Pop.* 5,200.—In 1708 it was dreadfully shaken by an earthquake.

MANPOOR, *man-poor'*, a town of India, 140 miles from Agra. *Pop.* 4,000.

MANRESA, *man-rai'-sa*, a town of Spain, in Catalonia, 29 miles from Barcelona. It has a castle and a church, a barracks, and various schools. *Manf.* Silk and cotton fabrics, broadcloths, ribbons, gunpowder, and brandy. *Pop.* 14,000.

MANS, LE, *ma*, a town of France, in the department of the Sarthe, near the Sarthe, 40 miles from Angers. The streets are airy and clean. The only public buildings or institutions worth notice are, the cathedral and other churches, the public library, the museum, and the hospitals. *Manf.* Linen, sail-cloth, flannel, serge and druggets, leather, gloves, paper, soap, and wax candles. *Pop.* 23,000.—Here the final struggle between the Vendean troops and the French republicans took place, in 1793.

MANSFIELD, *mănz'-feeld*, a market-town of Nottinghamshire, on the river Maun, 14 miles from Nottingham. It consists of two principal streets and several smaller ones. It has a church, in the later Gothic style, a free grammar-school, a charity school, a small theatre, moot-hall, and a union workhouse. *Manf.* Cotton-spinning, hosiery, and lace. It has, besides, iron-foundries, and a large trade in malt. *Pop.* 11,000. Mansfield is a place of great antiquity. The story of the Miller of Mansfield happened in the time of Henry II., or perhaps later. It stands on the borders of Sherwood Forest, and has a station on the Midland Railway.

MANSFIELD, the name of several townships in the United States, none of them with a population above 4,000.

MANSFIELD, William Murray, Earl of, an illustrious lawyer. He received his education at Westminster School, whence he was elected student of Christ Church, Oxford, in 1723. After taking his degree as M.A., he went abroad, and on his return, entered of Lincoln's Inn, where he was called to the bar. His eloquence and legal acquirements soon gained him an extensive practice, and when he pleaded, the court was crowded. Pope, with whom he was intimate, complimented him with the appellation of "silver-tongued Murray." In 1742 he became solicitor-general, and was elected member of parliament. In 1751 he was made attorney-general, and in 1756 chief justice of the King's Bench; soon after which he was created Baron Mansfield. In 1776 his lordship was created an earl. His conduct on the bench at the

trials of the publisher of Junius's letters, and of Wilkes, caused him to become very unpopular, and during the famous riots of 1780 his house in Bloomsbury Square was burnt down by the mob, who also threatened his life. By that disaster, he lost a prodigious number of valuable manuscripts and books; yet, when the House of Commons voted him a compensation for the injury, he refused to accept it. After filling his high office with great dignity many years, he resigned it on account of his infirmities, in 1783. His reputation is that of a great lawyer, an upright man, and elegant scholar. His remains were interred in Westminster Abbey. D. at Perth, 1704; D. 1793.

MANSFIELD ISLAND is in Hudson's Bay, British North America. Its length is estimated at about 70 miles.

MANSOURA, *man-soo'-ra*, a town of Lower Egypt, built by the Saracens as a bulwark against the invasion of the Christians, 34 miles from Damietta. A fourth part of it is in ruins; but it contains several mosques and a government cotton-factory. *Pop.* Unascertained. —Here, in 1798, a garrison, consisting of French, was massacred.

MANTELL, Gideon Algernon, *măn'-tel*, a distinguished English geologist, who, while pursuing his profession as surgeon at Lewes, studied the geological formations of Sussex with the greatest assiduity and success. His works written upon the science of geology are peculiarly attractive to the general reader, in consequence of the elegant and lucid style in which the information is conveyed. The first of these works was published in 1822, and was entitled "The Fossils of the South Downs," which was followed by "Illustrations of the Geology of Sussex." For his great discoveries of the iguanodon and its colossal allies, the Geological Society, in 1835, awarded him the Wollaston medal and fund. In 1825 he was elected a fellow of the Royal Society, and this learned body also marked its sense of his discovery of the iguanodon by awarding him the royal medal. In 1839 he went to reside at Clapham. About the same time the trustees of the British Museum purchased his collection of fossils for £5,000. His well-spent life had two phases,—original discovery and popular teaching. At the former we have glanced in mentioning his discovery of the gigantic fossil; and in proof of his labours in the latter direction, we may mention the delightful "Wonders of Geology," and "The Medals of Creation," works long and deservedly held in the highest esteem by the general reader. Dr. Mantell was also an industrious contributor to scientific transactions; and in the "Zoology and Geology" of Agassiz and Strickland no less than 67 articles have been attributed to him. D. at Lewes, Sussex, about 1790; D. 1852.

MANTELO CAPE, *mant'-te-lo*, the S.E. extremity of the island of Eubœa, Greece. *Lat.* 37° 57′ N. *Lon.* 24° 32′ E.

MANTES, *mants*, a town of France, in the department of the Seine-and-Oise, on the Seine, 30 miles from Paris. *Pop.* 4,500.—A station on the railway to Rouen.

MANTINŒA, *măn-te-ne'-a*, anciently a city of the Morea, 9 miles from Tripolitza. It is famous for the victory and death of Epaminondas, 363 B.C.

MANTUA, *măn'-tu-a* (Ital. MANTOVA, *mant'-to-va*), a fortified city of Austrian Italy, situate partly on two islands formed by the waters of the Mincio, and partly on the mainland, 22 miles from Verona. Mantua is, both by nature and art, one of the strongest places in Europe. It is entered by bridges, flanked with redoubts, and is built on a plain of tolerable regularity, divided by a canal into two nearly equal parts. Most of the streets are broad, regular, and well paved; the houses of stone, and in general well built; and the public squares are spacious and elegant. Of the latter, the most noted is the Piazza di Virgilio, used as a promenade. In its centre stands Virgil's monument, a column of marble. The principal public edifice at Mantua is the cathedral, a beautiful building, surmounted by a fine dome, and adorned in the interior with rows of Corinthian pillars and a number of paintings. The churches of the city are numerous. The other buildings are the Corto, with its hall; the Palazzo della Giustizia; the palace of the Gonzaga family, and the one which, from its shape, bears the singular name of the Palazzo di T, which has a fine fresco. Besides these may be mentioned the university buildings, the arsenal, the Jewish synagogue, the cavalry barracks, and the public library. Mantua contains likewise several valuable collections of paintings, and a gallery of antiquities, belonging to the Academy of Arts and Sciences. *Manf.* Silk, woollen, and linen fabrics, leather, paper, parchment, and cordage. *Pop.* 30,000. *Lat.* 45° 9′ 32″ N. *Lon.* 10° 47′ 1″ E.—Mantua can boast of an antiquity almost equal to that of Rome. It shared the prosperity of that metropolis, suffered under her disasters, experienced all the vicissitudes of the middle ages, and, like other Italian cities, emerged from them into liberty and independence. It was surrendered to the French under Bonaparte in February, 1797; was taken by the allies in 1799; again ceded to the French in 1801, from whose possession it was finally taken in 1814. Under the French, up to that period, it was capital of the French department Mincio.

MANUEL, Comnenus, *măn'-u-el*, emperor of the East, was the son of John Comnenus, whom he succeeded in 1143, to the prejudice of Isaac, his eldest brother, whom his father had disinherited. Roger, king of Sicily, invaded the empire in his reign; but Manuel expelled him, and then turned his arms against Dalmatia and Hungary, with various success. He also marched into Egypt, which country he would have conquered, had he not been betrayed by Amaury, king of Jerusalem, his ally. D. 1120; D. 1180.

MANUEL, Palæologus, emperor of Constantinople, was the son and successor of John IV. The Turks having invaded his dominions, he applied to the Latins for succour, but without effect, on which he resigned his sceptre to John VII., his son, and took a religious habit. D. 1319; D. 1425.

MANUTIUS, or MANUZIO, *ma-nu'-she-us*, the name of three celebrated printers of Venice; Aldus, the father, and his two sons, Paul and Aldus. His editions of the classics were long held in great estimation. He introduced the form still called Italic printing. B. 1447; D. at Venice, 1515.—Paul had for some time the care of the Vatican library at Rome, and acquired, by reading Cicero often, an elegant Latin style. He wrote Commentaries upon that author, and published several other works, the best of which is his treatise "De Legibus Romanorum." D. 1574.—Aldus, the younger, was also a learned printer, and had the care of the Vatican press, notwithstanding which, he died poor, in 1597. He wrote a "Treatise on Orthography;" "Commentaries on Cicero;" three books of Epistles; the Lives of Cosmo de' Medici and Castruccio Castricani.

MANYTCH, *man'-itch*, a river of Russia, rising in the S. of Astrakan, and, after a course of 300 miles, joining the Don near Tcherkask.

MANZANARES, *man'-tha-na'-raiz*, a river of Spain, in New Castile. After a course of 40 miles, it joins the Henares, 8 miles below Madrid.

MANZANARES, a river of S. America, which, after a course of 50 miles, enters the Caribbean Sea, close to the city of Cumana.

MANZANARES, or MANÇANA, a town of Spain, 27 miles from Ciudad Real. It has an old castle, a church, an hospital, and a cavalry barracks. *Pop.* 9,000.—The neighbourhood is celebrated for both its saffron and its wine.

MANZONI, Alessandro, *man-zo'-ne*, a celebrated Italian poet and novelist, who, after completing his education at Milan and Pavia, went to Paris, in 1803. While in the French capital, he produced a poem in blank verse, of strongly deistical opinions, but after his return to Italy, in 1807, he became a zealous Roman Catholic, and his subsequent poetical works were imbued with a devotional feeling. He is known throughout Europe as the author of a fine historical novel, called "The Betrothed Lovers," which has been translated into English, French, and German, and is allowed to be worthy of taking rank with the best productions of Sir Walter Scott. After the death of his first wife, in 1833, Manzoni continued to live in retirement near Milan. B. at Milan, 1784.

MAOUNA, or MASSACRE ISLAND, *ma-oo'-na*, one of the Navigators Islands, in the South Pacific Ocean. *Lat.* 14° 22′ S. *Lon.* 171° W.—This island takes its name from the fact of eleven of the companions of

La Perouse, the French navigator, having been massacred upon it.

MAPES, or MAP, Walter, *maips*, an old English poet, who was chaplain to Henry II., by whom he was dispatched on a mission to the court of Louis VII. of France. He wrote some satirical and convivial poems, in Latin, which were edited and published by Thomas Wright, in 1841. He was also the author of several prose works, both in Latin and Norman-French, from which a large portion of the romance of the Round Table is said to be taken. Mapes rose to high posts in the church; but, after he became archdeacon of Oxford, in 1196, no further mention is made of him. D. probably in Herefordshire, about the middle of the 12th century.

MARACAIBO, *ma-ra-ki'-bo*, a province of the Caraccas, in S. America, which consisted of several cantons, and had, in 1839, a population of about 30,000.

MARACAIBO, the capital of the department and province of Zulia, stands on the lake of the same name, at 18 miles' distance from the sea. There are a great number of houses at Maracaibo built with chalk and sand, and with a great deal of taste; but the best houses are covered with a sort of reed, which grows on the banks of the lake. This mixture of houses covered with tiles and with reeds gives to the city the appearance of a village, and exposes it to constant danger from fire. *Pop.* 14,000. *Lat.* 10° 41′ N. *Lon.* 71° 40′ W. A bar of quicksand, which has but 10 or 12 feet depth of water, entirely excludes large vessels, and with difficulty admits small ones.

MARACAIBO, a large lake of the Caraccas, in the province of Venezuela. *Ext.* about 100 miles long and 70 broad. It receives several rivers, and communicates, by a strait, with the Gulf of Maracaibo, 20 miles long, and between 5 and 10 across.

MARACAIBO, GULF OF, is an inlet of the Caribbean Sea, containing several small islands, and extending N. and S. about 75 miles, and having a breadth of 150. It has, on the E., the peninsula of Paraguana.

MARACAY, or MORACAO, a town of S. America, in the province and government of Venezuela, on the lake Valencia, 55 miles from Caraccas. Three-fourths of its houses are built of stone, and with as much elegance as solidity. The streets are not paved; the sand is raised in consequence, by the wind, and is exceedingly incommodious. The inhabitants are active and industrious. *Pop.* 8,400.

MAREOTIS, LAKE, *mar'-e-o'-tis*, a lagoon of Lower Egypt, lying to the S.E. of Alexandria. It has communication on the N. with Lake Madieh. *Ext.* 40 miles long, with a breadth of 18.

MARAGA, or MARAGHA, *ma-ra'-ga*, a city of Persia, in the province of Aderbijan, in a low valley, 12 miles from Lake Urumea. It is well built, has a spacious bazar, and is encompassed with a high wall. *Pop.* 15,000. *Lat.* 37° 20′ N. *Lon.* 46° 25′ E. Here is the tomb of Holagou, a descendant of Zenghis Khan, the founder of an observatory on a neighbouring mountain. The marble in its vicinity is highly valued in Persia, and, being nearly transparent, is used for windows at the baths of Tabriz.

MARAGA, a small town of Upper Egypt, on the left bank of the Nile.

MARAIS, *ma'-rai*, a natural division of the department Vendée, in France. It comprises all that part of the coast formerly covered by the sea, and has a fertile soil but an unhealthy climate.

MARAJO, or JOANNES, *ma-ra'-zho*, an island in the Atlantic, off the N. coast of Brazil, between the estuaries of the rivers Amazon and Para. *Ext.* About 150 miles long, and the same broad. *Desc.* Fertile, though abounding in marshes. *Pop.* 20,000. *Lat.* from the equator to 2° 20′ S. *Lon.* from 48° 30′ to 51° 30′ W.

MARALDI, James Philip, *ma-ral'-de*, a celebrated Italian mathematician and astronomer, who was employed under Cassini, in constructing the great meridian through France. He left behind a valuable catalogue of the fixed stars, and a body of important "Observations." B. at Nice, 1665; D. 1729.

MARANHAM, or MARANAN, *ma'-ran-yam*, a province of Brazil, which comprehends the island of that name, and part of the adjacent continent. It is bounded E. by the province of Seara, N. by the Atlantic, W. by the province of Para, S. by Gorgas. *Area*, estimated at 67,000 square miles. *Desc.* Mountainous but fertile, although it is to a large extent covered with forests. *Pro.* Cotton, rice, gums, dyewoods, and fruits. *Pop.* 200,000.—A river of the same name, rising in the Sierra Itiquira, and, after a course of 300 miles, falling into the Atlantic, in *lat.* 2° 30′ S.; and *lon.* 44° 30′ W.

MARANHAM, a large island of Brazil, at the mouth of the rivers Miarim, Itapienni, and Monyi, on the north side of the above province. *Ext.* 31 miles long, with a varying breadth. On its W. side is the CITY of the same name, and the capital of the province. It has a college, theatre, hospital, numerous convents, and an episcopal palace. Its harbour is defended by two forts, and it exports rice, cotton, and sarsaparilla. Its principal import consists of slaves. *Pop.* about 30,000. *Lat.* 2° 31′ 7″ S. *Lon.* 44° 18′ W.

MARANO, *ma-ra'-no*, a town of Naples, 6 miles from Naples. It is the capital of a canton. *Pop.* 7,500.

MARANON, a river of S. America. (*See* AMAZON.)

MARANS, *ma'-ra*, a town of France, in the department of the Lower Charente, 11 miles from La Rochelle. *Pop.* 5,000.

MARASH, *ma'-rash*, a pashalic of Asiatic Turkey, inclosed by the pashalics of Sivas, Adana, Karamania, Aleppo, and Diarbekir. It is traversed by the principal chain of the Taurus mountains. *Lat.* between 36° 3′ and 38° 30′ N. *Lon.* between 36° and 38° 40′ E. The CAPITAL is of the same name, and stands 60 miles from the Gulf of Scanderoon.

MARAT, John Paul, *ma'-ra*, a notorious demagogue, who went to Paris, where he studied physic, and set up as an empiric, selling his nostrums at an extravagant price. On the first outbreak of the Revolution, in 1789, he became a leader among the most violent of the revolutionary factions. In his first journal, the "Publiciste Parisien," he attacked Necker, and other eminent men. This was followed by his "Friend of the People," in which he excited the troops against their generals, the people at large against their king, and declared in print that France could never become happy until 270,000 heads had been struck off by the guillotine. Named deputy of the department of Paris in the Convention, he appeared there armed with pistols. The most atrocious murders were committed by his means, and he appeared to delight in nothing but the effusion of blood, when he was assassinated, in the midst of his career, while taking a bath, by Charlotte Corday. (*See* CORDAY.) Marat published a work on Man, or "Principles of the Reciprocal Influence of the Soul and Body," and tracts on Electricity and Light, in which he attacked the Newtonian system. B. near Neufchâtel, 1744; assassinated, 1793.

MARATHON, *mär'-a-thon*, a village on the E. shore of Attica, 20 miles from Athens. It is famous for the victory of Miltiades over the Persians, 490 B.C.

MARATTI, Carlo, *ma-ral'-te*, an eminent Italian painter. He became the pupil of Andrea Sacchi, and chiefly applied himself to painting female saints. Pope Clement IX. gave him a pension, and conferred on him the order of knighthood. He was also painter in ordinary to Louis XIV. B. at Camurano, in the March of Ancona, 1625; D. at Rome, 1713.

MARAZION, *ma-rai'-she-on*, a market-town of Cornwall, situate on an arm of the sea, 3 miles from Penzance. It imports timber, coals, and iron, for the use of the neighbouring mines. *Pop.* 1,400. *Lat.* 50° 7′ N. *Lon.* 5° 17′ W.—St. Michael's Mount, with a quay and harbour, lies opposite to it, and can be approached at low water by means of an artificially-formed footway.

MARBLEHEAD, *mar'-bel-hed*, a post-township of Massachusetts, 15 miles from Boston. *Pop.* 6,000, principally employed in the fisheries.

MARBLETOWN, *mar'-bel-toun*, a township of the United States, New York, 6 miles from Kingstown. *Pop.* 4,000.

MARBURG, *mar'-boorg*, a town of Germany, the capital of Upper Hesse-Cassel, on the Lahn, 48 miles from Cassel. Its principal public building is the church of St. Elizabeth. It has also a university, hospital, infirmaries, orphan-house and workhouse, and several charitable institutions. *Manf.* Linens, tobacco, leather, and pipes. *Pop.* 8,000.—A station on the railway to Frankfort.

MARBURG, a town of the Austrian states, in Styria,

on the Drave, 35 miles from Gratz. *Manf.* Rosagnolio and leather. *Pop.* 5,500.

MARCEL, ST., *mar'-sel*, the name of several towns in France, none of them with a population above 3,000.

MARCELLINUS, *mar-sel-li'-nus*, a pope and saint, succeeded Caius in 296. He signalized himself by his courage in a severe persecution. The Donatists charged him with having sacrificed to idols; from which he was vindicated by Augustine. D. 304.

MARCELLO, Benedict, *mar-sail'-lo*, an eminent composer, denominated in Italy the *Prince of Music*. This highly-gifted man was equally eminent as a poet, philosopher, and musician. His compositions in music were numerous. His principal prose work was his "Teatro alla Moda" (the Fashionable Stage), intended as a ludicrous criticism on modern operas. B. at Venice, 1686; D. 1739.

MARCELLUS I., *mar-sel'-lus*, Pope, succeeded Marcellinus. The emperor Maxentius banished him from Rome for excommunicating an apostate. D. 310.

MARCELLUS II. was secretary to Paul III., who made him a cardinal, and one of the presidents at the council of Trent. He succeeded Julius III. in 1555, but died a few weeks after his election.

MARCELLUS, Marcus Claudius, a famous Roman general, who, after the first Punic war, had the command of an expedition against the Gauls, where he obtained the *spolia opima*, by killing with his own hand Viridomarus, the king of the enemy. Soon after he was intrusted to oppose Hannibal in Italy, and was the first Roman who obtained any advantage over him. Marcellus, in his third consulship, was sent with a powerful force against Syracuse. He attacked it by sea and land, but his operations proved ineffectual, the invention of the philosopher Archimedes baffling all the efforts and destroying all the great and stupendous military engines of the Romans, during three successive years. (*See* ARCHIMEDES.) The perseverance of Marcellus at last gave him the victory. After the conquest of Syracuse, Marcellus was called upon to oppose Hannibal a second time. He displayed great military talents in his operations against this general, but was not, however, sufficiently vigilant against the snares of his adversary. He imprudently separated himself from his camp, and was killed in an ambuscade, B.C. 208.

MARCH, *march*, a market-town of Cambridge, on the Nen, 25 miles from Cambridge. It has some trade in coals, timber, and corn. The church is elegant and spacious. *Pop.* 6,300.—It has a station on the East Anglian Railway.

MARCH, or MORAVA, *marsh*, a river of Austria, flowing through Moravia, and, after a course of 180 miles, joining the Danube 8 miles from Presburg.

MARCH OF ANCONA. (*See* ANCONA.)

MARCHE, *marsh*, an old province of central France, now forming the department Creuse, and parts of Indre, &c.

MARCHENA, *mar-chaï'-na*, a town of Spain, 30 miles from Seville. *Manf.* Woollens. *Pop.* 12,000.—In its neighbourhood are sulphur-baths.

MARCIANUS, *mar-shi-aï'-nus*, a Thracian of obscure family, who obtained the imperial throne on the death of Theodosius II., in 450. His reign, though it lasted little more than six years, was marked by peaceful and energetic measures. B. about the end of the 4th century; D. 457.

MARCIGNY, *mar-seiv'-ye*, a town of France, in the department of the Saone-and-Loire, 14 miles from Charolles. *Manf.* Damasks. *Pop.* 3,400.

MARCILLAC, *mar'-see-yak*, the name of several parishes and towns in France, none of them with a population above 2,000.

MARCO-POLO. (*See* POLO.)

MARCOUF, ST., *mar-koof'*, two small islands off the N. coast of France, in the department Manche, defending the roadstead off Cape La Hogue. They were taken by the British in 1795, but restored to France at the peace of Amiens.

MARDEN, *mar'-den*, the name of several parishes in England, none of them with a population above 3,000.

MAREMMA, LA, *ma-raim'-ma*, a marshy region of Italy, forming the S. part of Tuscany. It formerly contained several of the most flourishing Etruscan cities, but is now mostly an unhealthy desert.

MARENGO, *ma-ren'-go*, a village of Sardinia, Piedmont, near the Bormida, 3 miles from Alessandria. It stands on the border of a great plain, where, on the 14th June, 1800, Bonaparte defeated the Austrians under General Melas.

MARENNES, *ma-ren'*, a seaport-town of France, in the department of the Lower Charente, 25 miles from Rochelle. It has a brisk traffic in salt, wine, and brandy. *Pop.* 6,000.

MARKOTIS, an extensive lake of Egypt. (*See* MARÆOTIS.)

MARKUIL, *mar'-re(r)e*, the name of several parishes and villages in France, none of them with a population above 2,000.

MARGARET, ST., *mar'-ga-ret*, the name of several parishes in England, none of them with a population above 1,000.

MARGARET, ST., the name of several parishes in Leinster, Ireland, none of them with a population above 1,000.

MARGARET, daughter of Waldemar III., king of Denmark, and wife of Haquin, king of Norway, was placed on the throne of both kingdoms, on the death of her son Olaus, in 1387. The Swedes, dissatisfied with their king Albert, offered their crown to Margaret, who accepted it, and defeated Albert in 1395. Three years afterwards, the states of Denmark, Sweden, and Norway passed a law, known by the name of the Union of Calmar, by which the three kingdoms were united, and the monarchy limited. Margaret, however, violated the conditions of the union, and was called the Semiramis of the North. B. 1352; D. 1411.

MARGARET, daughter of René of Anjou, king of Sicily, and wife of Henry VI., king of England. In the civil wars between the houses of York and Lancaster, she displayed the character of a heroine. Her husband being taken prisoner, in 1455, by the earl of Warwick, she levied forces, set Henry at liberty, and entered London in triumph. But, in 1460, her army was defeated at Northampton, and Henry again became a prisoner; the queen, however, escaped into Scotland, and collected another army, with which she marched against the duke of York, who fell in the battle of Wakefield. She next defeated Warwick at Barnet Heath; but was routed, after a bloody contest, at Towton; on which she fled to France, to implore succour from Louis XI., who refused her any assistance. This intrepid woman then returned to England, where she was joined by several of her party, but was defeated at Hexham. In 1471 she was taken prisoner, and, in 1475, she purchased her liberty by a large ransom. She then returned to France, where she died, in 1482. B. 1423.

MARGARET, countess of Richmond and Derby. She married Edmund, earl of Richmond, by whom she had a son, who became king of England, by the title of Henry VII. After being a widow some time, she married Sir Henry Stafford, on whose death she united herself to Thomas, Lord Stanley, created earl of Derby in 1485. The countess was a liberal patron of learning, and founded two colleges at Cambridge,—Christ's and St. John's. She also instituted in that university a theological professorship, and endowed a school at Torrington, in Devonshire. She translated from the French a work entitled "The Mirroure of Golde for the Sinful Soule," also the fourth book of Thomas à Kempis' "Imitation." B. 1441; D. 1509.

MARGARET of Valois, queen of Navarre, and sister to Francis I., king of France, was the daughter of Charles of Orleans, duke of Angoulême. In 1509 she married Charles, duke of Alençon, two years after whose death she became the wife of Henry d'Albret, king of Navarre, by whom she had Jeanne d'Albret, mother of Henry IV. Margaret assisted her husband in improving his dominions, and she greatly encouraged the Protestants. Besides other works, she wrote the "Heptameron," a collection of tales, after the manner, and with more than the license of Boccaccio. B. 1492; D. 1549.

MARGARITA, SANTA, *mar-ga-re'-ta*, a town of Sicily, 40 miles from Girgenti. It is the capital of a canton. *Pop.* 7,000.

MARGARITA, SANTA, an island off the W. coast of Lower California.

MARGARITA, a town of European Turkey, 5 miles from Parga. *Pop.* 5,000.

MARGARITTA, *mar'-ga-rit-ta*, an island in the Caribbean Sea, on the coast of Cumana, from which it is separated by an arm of the sea. *Ext.* 45 miles long, with a breadth of between 5 and 20. *Desc.* Fertile in the interior, but barren along the coasts. *Pro.* Maize, coffee, sugar, cotton, and bananas. A great deal of poultry and large stock are reared. *Manf.* Cotton hosiery. *Pop.* 15,000. *Lat.* 11° N. *Lon.* 64° W. The CHANNEL of Margaritta lies between the island and the mainland, and is 20 miles across. All ships from Europe pass through it for Barcelona, Cumana, and La Guayra.

MARGATE, *mar'-gait*, a seaport-town of England, at the mouth of the Thames, and N.E. extremity of the coast of Kent, 16 miles from Canterbury. In 1724 it was but a trifling fishing-town; but being well adapted for sea-bathing, it has grown into importance. The older part of the town stands in a low situation along the shore, and consists of a number of small and irregular streets. The part which formed the village of St. John's now forms the High Street. From this the land rises towards the north; and on this slope the New Town has been built, consisting of neat and excellent modern buildings, and several spacious squares. Its principal buildings are a modern Gothic church, an almshouse, infirmary, national school, assembly-rooms, town-hall, market-house, and baths. The vicinity abounds with agreeable walks and rides. Its harbour was formed by a stone pier, which suffered greatly from a storm on January 14th, 1808, which swept away the bathing-rooms, and part of the High Street. A new pier was built at an expense of £90,000; and the promenade has a handsome raised and inclosed walk on it. Margate is chiefly supported by the numerous visitors who resort hither in summer, and the business which their residence occasions. It carries on also a considerable trade in corn and fish sent to the metropolis, in coals imported from Newcastle and Sunderland, and in timber, iron, tar, tin, and hemp, from Memel and Riga. *Pop.* 11,000.—It is in constant communication with London by steamboats, and with the metropolis, Canterbury, and Ramsgate by branches of the South-Eastern Railway.

MARGUERITE, ST., *mar'-ge-reet*, a river of Lower Canada, joining the Saguenay, 14 miles from its mouth, in the estuary of the St. Lawrence.

MARGUERITES, a town of France, in the department of the Gard, 4 miles from Nimes. *Manf.* Carpets. *Pop.* 2,000.

MARIA LECZINSKA, *ma-ri'-a lek-zins'-ka*, daughter of Stanislas, king of Poland, married Louis XV. in 1725. D. 1768.

MARIA, SANTA. (*See* SANTA MARIA.)

MARIA THERESA, *tai-rai'-sa*, archduchess of Austria, queen of Hungary and Bohemia, and empress of Germany, was the daughter of the emperor Charles VI. and of Elizabeth Christina, of Brunswick Wolfenbuttle. Her father having lost his only son, the archduke Leopold, constituted Maria Theresa the heiress of his estates. In 1713 was formed the famous Pragmatic Sanction, by which, in default of male issue, the succession passed to the eldest of his daughters. She married, in 1736, Francis Stephen of Lorraine, afterwards emperor, by the name of Francis I. In 1740 her father died, which event plunged Europe into war. Frederick of Prussia invaded Silesia, to which conquest he added Moravia. The elector of Bavaria aspired to the crowns of Bohemia and the empire, and was supported by France, in violation of the Pragmatic Sanction. He was crowned emperor at Frankfort, in 1742. Meanwhile, Maria Theresa threw herself upon her Hungarian subjects, to whom, with her child in her arms, she made this pathetic address:—"Abandoned by my friends, persecuted by my enemies, attacked by my nearest relations, I have no other resource than in your fidelity, in your courage, and constancy: I commit to your hands the child of your kings." At this spectacle, the warlike Hungarians drew their sabres, and exclaimed, as with one voice, "Moriamur pro rege nostra Maria Theresa" (We will die for our queen Maria Theresa). A powerful army was formed, with Kevenhuller at its head, which recovered several important places. Maria formed a treaty with England, which supplied her with money and troops, and, what was of greater consequence, detached Prussia from the league, on condition of his retaining Silesia and Gratz. Maria Theresa was crowned queen of Bohemia, at Prague, in 1743; and, in June of the same year, the king of England and his son, the duke of Cumberland, in person, gained a great victory at Dettingen. The king of Sardinia now declared himself for the queen of Hungary, who, in 1745, had placed the imperial crown on the head of her husband, at Frankfort. After eight years of war, a peace was concluded at Aix-la-Chapelle, by which Maria Theresa was secured in her rights. (*See* FREDERICK II.) She employed the interval of peace in organizing her armies, repairing or constructing fortifications, regulating and encouraging commerce, founding military schools, and in erecting colleges of learning. She also caused observatories to be built at Vienna, Gratz, and Tyrnau, which she supplied with the best instruments. The wounded and infirm soldiers found an asylum in hospitals, and the widows and children of officers were liberally provided for. In 1756 this calm was disturbed by the king of Prussia, who marched into Saxony and Bohemia; Count Daun, however, eventually forced the Prussians to raise the siege, by gaining the victory of Chotzemitz. On this occasion, Maria Theresa instituted the military order called by her name. After many engagements, peace was concluded in 1763, leaving Austria and Prussia with the same boundaries as before the war. Her husband died in 1765, and she never put off her mourning attire till her death. In 1772 she, somewhat unwillingly, joined the king of Prussia and the empress Catharine in the dismemberment of Poland. By the death of Maximilian Joseph, elector of Bavaria, in 1777, war was rekindled between Austria and Prussia, but was terminated in 1779, by the peace of Teschen, which added to the former state a small portion of Bavaria. Maria Theresa was one of the most energetic and noble of rulers; and so well and wisely had she governed her people, that she descended to the grave earning, and fully meriting, the name of mother of her country. B. 1717; D. at Vienna, 1780.

MARIA'S ISLAND, an island in the great Southern Ocean, lying about 3 miles off the coast of Van Diemen's Land. *Lat.* 42° 42' S. *Lon.* 148° 29' E.

MARIAMNE, *ma-ri-ăm'-ne*, the wife of Herod the Great, by whom she had two sons, Alexander and Aristobulus, and two daughters. Herod passionately loved Mariamne, but she had little affection for him, especially after he put to death her brother Aristobulus. When Herod went to Rome to court the favour of Augustus, he left secret orders with Josephus and Sohemus to destroy Mariamne and her mother, if any misfortune should happen to him. Mariamne having obtained this secret from Sohemus, upbraided Herod, at his return, with his inhumanity, for which he put both her and Sohemus to death, B.C. 28.

MARIANA, Juan, *ma-re-a'-na*, a celebrated Spanish historian, who at the age of 17, entered the order of the Jesuits. He distinguished himself by a famous book, entitled "De Rege et Regis Institutione," in which he justified the assassination of heretical princes: it was burnt at Paris by order of parliament. His greatest work is "The History of Spain," written first in Latin and afterwards in Spanish. Besides the above, and several other learned works, he wrote a "Treatise on Weights and Measures," and another on the "Faults of Government and Society," in Spanish. B. at Talavera, 1536; D. 1623.

MARIANA, a town of Brazil, on the Rio del Carmen, 8 miles from Villa Rica. It stands in a plain upwards of 3,000 feet above the level of the sea, and has a cathedral, convents, and an episcopal palace. *Pop.* 5,300.

MARIANNE ISLANDS. (*See* LADRONES.)

MARIAS LAS TRES, *ma-re'-as las trais*, 'the Three Marys,' three small islands in the state of Xalisco, in Mexico. The largest has a length of 15 miles and a breadth of 8. They are uninhabited, except when visited by seamen. *Lat.* between 21° and 22° N. *Lon.* between 106° and 106° 30 W.

MARIAZELL, or ZELL, *ma'-re-a-tsel'*, a market-town of Styria, near the limits of Austria, 59 miles from Vienna. It is noted for a shrine and an image of the Virgin, which attracts hither about 100,000 pilgrims annually. *Pop.* 1,000.

MARICA, *ma'-re-ka*, a town of Brazil, 23 miles from Rio de Janeiro. *Pop.* of district 7,000.

MARIE, ST., *ma'-re*, a town of France, in the department of the Lower Pyrenees, near Oleron. *Pop.* 4,000. —The name of some other places belonging to France.

MARIE ANTOINETTE, *ma'-re an'-twoi-net'*, queen of France and archduchess of Austria, was the daughter of the emperor Francis I. and of Maria Theresa. In 1770 she married the dauphin of France, afterwards Louis XVI. At the celebration of the ceremony, in May of that year, two tremendous thunderstorms happened; and at the fête given by the city of Paris, a few weeks afterwards, above 1,200 persons perished by the falling of a building erected for letting off fireworks, and a great number of spectators fell into the Seine and were drowned. The dauphiness, on that melancholy occasion, sent all the money she possessed to the lieutenant of police, for the relief of the distressed. At the death of a monarch in France, it was the custom for the people to pay a tax to the new queen; this she caused to be dispensed with, when, by the demise of Louis XV., she ascended the throne. When the Revolution burst forth, in 1789, the public fury was directed against her; but she supported herself, amidst the vilest indignities and brutal scenes, with unshaken fortitude. On the famous 6th of October, when the frantic mob led the royal family in triumph from Versailles to Paris, and uttered dreadful exclamations against the queen, she presented herself before them alone, when her intrepid air for a period disarmed their malice, and turned their menaces into applause. On that memorable journey the mob carried before the carriage the heads of two of the king's guard on pikes. The courage of the queen, after being arrested at Varennes and conducted back to the Tuileries, remained unshaken. In the Temple her behaviour was marked by heroic fortitude. When apprised of the condemnation of her husband, she felicitated him on the termination of his sufferings, and upon his near approach to an immortal crown. (*See* LOUIS XVI.) In July, 1793, she was separated from her son, which excited in her the most affecting grief; and in August she was conducted in the night to the Conciergerie, where she was confined in a dark and damp dungeon. In October she was brought to trial on the charge of having embezzled the public property, corresponded with foreign enemies, and transmitted large sums to the emperor. Accusations of crimes the most unnatural were also produced; to which she opposed a spirit and resolution of conscious innocence. Though nothing was proved, sentence of condemnation was passed against her, which she heard with triumph. On the 16th of the same month she was conducted in a cart to the scaffold, where, after elevating her eyes to heaven, she suffered the fatal stroke. Her body was thrown into a grave and consumed by quicklime. Her misfortunes had made great ravages in her beautiful countenance, and altered the colour of her hair. Marie Antoinette possessed an accomplished mind; she spoke the French language with purity, and the Italian as her own tongue. She also understood Latin, and had a perfect knowledge of geography and history. She was kind-hearted and honest; thoughtlessness was perhaps the greatest vice that could be attributed to her; and it caused her to be most unjustly slandered on several occasions. She left a son, who died in prison. (*See* LOUIS XVII.) B. at Vienna, 1755; guillotined, 1793.

MARIE-AUX-MINES, *o-meen'*, a town and parish of France, in the department of the Upper Rhine, 14 miles from Colmar. *Manf.* Cotton goods and hosiery. *Pop.* 12,000.

MARIE DE' MEDICI, *me-de'-che*, daughter of Francis I., grand-duke of Tuscany, married Henry IV. of France, in 1600. The union was rendered unhappy in consequence of the jealous, obstinate, and violent character of the queen; but, although she was constantly quarrelling with Henry, the most reliable historians acquit her of the odious charge with which some writers have sought to brand her,—that of being privy to the king's murder. On the death of Henry IV. in 1610, she was named regent; but her administration was disgraced by the countenance she afforded to unworthy favourites. She even quarrelled with her son, afterwards Louis XIII., who was compelled to quit the court. A reconciliation was, however, effected between them by Richelieu. That minister subsequently forced her to leave France. The remainder of her life was spent in exile, in England, Belgium, and Germany. In 1642 her death took place, at Cologne, where she was almost without the common necessaries of life. B. at Florence, 1573.

MARIE GALANTE, *ma'-re ga-lant'*, one of the French W. India islands, 20 miles from Dominica. *Pro.* Coffee, sugar, cotton, and cocoa. *Pop.* 14,000. It was, in 1493, discovered by Columbus.

MARIEFRED, *ma'-re-fred*, a town of Sweden, 38 miles from Nykoping. It stands in a bay of Lake Maelar, and has in its vicinity the palace of Gripsholm. *Pop.* 1,000.

MARIENBACH, *ma-re'-en-bak*, a Bohemian village, celebrated for its cold chalybeate and saline baths. It is situate in a valley lying to the N. of Pilsen.

MARIENBERG, *ma-re'-en-barg*, a town of Saxony, 35 miles from Dresden. *Manf.* Lace and linen. *Pop.* 5,000.

MARIENBOURG, a fortified town of Belgium, 30 miles from Namur. *Pop.* 800.—This place was occupied by the French from 1659 to 1815.

MARIENBURG, *ma'-re-en-boorg*, a market-town of Russia, in Livonia, 58 miles from Pokov. *Pop.* 2,000.

MARIENBURG, a town of West Prussia, in the government of Dantzic, on the Nogat, 26 miles from Dantzic. Its castle was long the seat of the grand master of the Teutonic order. *Manf.* Woollen, linen, and cotton goods. It has, also, extensive distilleries and breweries. *Pop.* 7,200.

MARIENWERDER, *ma'-re-en-vair'-der*, the capital town of the province of West Prussia, on the Nogat, 3 miles from the Vistula, and 145 from Dantzic. It has a cathedral, a school of arts and agriculture, and an hospital. *Manf.* Woollens; and there are breweries and distilleries. *Pop.* 8,000.

MARIETTA, *mā-re-et'-ta*, a township of the United States, on the Ohio, 96 miles from Columbus, in the state of Ohio. This is the oldest town in the state. *Pop.* 4,500.

MARIGNANO, *ma-reen-ya'-no*, a town of Naples, on the Lambro, 8 miles from Lodi. *Pop.* 5,000.

MARIGNANO, MELEGNANO, or MALAGNANO, *mel'-en-ya'-no*, a town of Lombardy, 12 miles from Milan. *Pop.* 4,000.—Here, in June, 1859, a brilliant action took place between the French troops and those of the Austrians, in which the latter were defeated.

MARINO, John Baptist, *ma-re'-no*, an Italian poet. His father having discarded him for refusing to study the law, he became secretary to the grand admiral of Naples, after which he went to Rome, where he was patronized by Cardinal Aldobrandino. His principal poem was entitled "Adonis," dedicated to Louis XIII., at the time when Marino was at Paris, whither he had been invited by Marie de' Medici. He afterwards retired to his native city. B. at Naples, 1569; D. 1625.

MARINO, a market-town of Italy, in the States of the Church, near Lake Albano, 12 miles from Rome. *Pop.* 5,000.

MARINO FALIERO. (*See* FALIERO.)

MARINO, SAN, or SAMMARINO, a small but independent state in the north-east of Italy, surrounded by the papal dominions. It is one of the smallest and most ancient states of Europe. *Area*, 21 square miles. *Desc.* It consists of a rocky mountain, upwards of 2,000 feet high, and a small surrounding territory, on both of which stand the capital and several villages. The population are chiefly occupied with rural pursuits, but manufactures of silk are carried on. *Gov.* Republican, with an executive, composed of 12 members, popularly elected. Justice is administered by a foreigner, elected for three years, and incapable of re-election; and the presidents are chosen every six months. *Army*, 80 men, forming the guard of the regency. *Pop.* 7,600. *Lat.* 43° 50′ N. *Lon.* 12° 21′ 24″ E.

MARINO, SAN, the capital of the above state, stands on the side of the mountain, 12 miles from Rimini. It has several churches and three small castles, besides other fortifications. *Pop.* 6,000.—This town is built round a hermitage, founded in 1441, by Marinus, a native of Dalmatia, and is accessible only by one road.

MARION, *mair'-e-on*, the name of several counties in the United States. 1. In Georgia. *Area*, 520 square miles. *Pop.* 11,000.—2. In Alabama, between the

Tuscaloosa and the Tombigbee. *Area*, 1,000 square miles. *Pop.* 8,000.—3. In Mississippi, on Pearl River. *Area*, 1,544 square miles. *Pop.* 4,500.—4. In Ohio, formed in 1820, in the Indian Reservation. *Area*, 303 square miles. *Pop.* 13,000.—5. In Tennessee. *Area*, 583 square miles. *Pop.* 7,000.—6. In Kentucky. *Area*, 332 square miles. *Pop.* 12,000.—7. In Indiana. *Area*, 316 square miles. *Pop.* 25,000.—8. In Illinois. *Area*, 575 square miles. *Pop.* 7,000.—9. In Missouri. *Area*, 425 square miles. *Pop.* 13,000.—10. In Arkansas. *Area*, 535 square miles. *Pop.* 3,000.—11. A district of S. Carolina. *Area*, 1,000 square miles. *Pop.* 20,000.—Also the name of several townships, none of them with a population above 3,000.

MARIOTTE, Edme, *ma'-re-ot*, an eminent French mathematician, who was admitted a member of the Academy of Sciences at Paris, in 1666. He distinguished himself by his hydraulic experiments. His principal works are "A Treatise on Philosophy," "On the Motion of Waters," "On the Movement of Pendulums," "Experiments on Colours," "Treatise on Levels." The whole were published in a collected form at Leyden, in 1717. D. 1684.

MARIPOSA, *ma'-re-po'-sa*, a county of the United States, in the centre of North America. *Area*, estimated at 7,950 square miles. *Pop.* 10,000.—The mineral wealth of this district is great, gold being found in considerable quantities.

MARITIMO, *ma-re-te'-mo*, an island of the Mediterranean Sea, situate off the W. coast of Sicily. *Ext.* 4 miles long, with a breadth of 2. It is the ancient Hiera.

MARIUPOL, *ma'-re-oo-pol*, a town of European Russia, on the Sea of Azof, 140 miles from Ekaterinoslav. It has a port at the mouth of the Kamisus. *Pop.* 5,060.

MARIUS, Caius, *ma'-ri-us*, a celebrated Roman, who was seven times consul. He was of obscure origin, and in his youth was a husbandman; which employment he quitted for the army, and became a lieutenant under Scipio, who, when asked, one night at supper, where as good a general as himself might be found when he was dead, replied, placing his hand on the shoulders of Marius, "Here, perhaps." Marius ended the war with Jugurtha, whom he conducted in triumph to Rome. After this, he served against the Cimbri and other barbarous nations who had invaded Italy; but he tarnished the glory of his victories by the basest cruelties to the vanquished, especially the women. Plutarch reports that, having experienced some disadvantages in contending with the Cimbri, he was warned, in a dream, to avert the wrath of the gods by sacrificing his daughter Calpurnia, which inhuman direction he obeyed. In his sixth consulate he had Sylla for his rival, who marched to Rome with his army, and obliged Marius to quit the city. After wandering some time, he was recalled to Rome by Cinna, with whom he was chosen consul, B.C. 86, in which year he died, of excessive drinking. B. at or near Arpinum, about 157 B.C.—His son, MARIUS THE YOUNGER, had all the ferocious character of his father. He usurped the consular dignity, 82 B.C.; but was defeated by Sylla, and slew himself at Prænestæ.

MARIVAUX, Peter Carlet de Chamblain de, *ma'-re-ro*, a celebrated French writer, whose comedies and romances are distinguished by their moral tendency. His best works are "The Poor Philosopher," "Marianne," "Le Paysan Parvenu," "Pharsamon." He also wrote a work entitled "The French Spectator." B. at Paris, 1678; D. 1763.

MARIZZA, or MARITZA, *ma-ritz'-a*, the ancient Hebrus, a river of European Turkey, in Romania, rising in the N.E. of the Balkan, and, after a course of 260 miles, falling into the Gulf of Enos, in the Ægean Sea.

MARJAOW, *mar'-ja-o*, a town of British India, in the presidency of Madras, 12 miles from Onore. *Pop.* Unascertained.—This is supposed to be the ancient Musiris.

MARK, St., *mark*, the Evangelist, was the disciple of St. Peter, who employed him in writing the gospel which bears his name; and in his first epistle calls him his son. He is believed to have been the John, surnamed Mark, to whose mother's house St. Peter retired when released from prison, and who accompanied St. Paul and Barnabas in their travels. He wrote his gospel for the use of the Roman Christians, about A.D. 72. He is said to have founded the church of Alexandria.

MARK, a pope and saint, succeeded Sylvester I. in 336, and died the same year. There passes under his name an epistle addressed to St. Athanasius.

MARK ANTONY. (*See* ANTONIUS, Marcus.)

MARKET DEEPING, *mar'-ket de'-ping*, a market-town of Lincolnshire, 86 miles from London. *Pop.* 1,000.

MARKET DRAYTON, *drai'-ton*, a market-town of Salop, on the Fern, 18 miles from Shrewsbury. It has a church, erected in the reign of King Stephen. *Pop.* 5,000.

MARKET-JEW. (*See* MARAZON.)

MARKHAM, Gervase, *märk'-ham*, an English author, who was a captain in the army of Charles I., and distinguished himself by his valour. He wrote some dramatic pieces, and others on Husbandry, Horsemanship, Fowling, and Military Discipline. D. at Nottingham, 16—.

MARKINCH, *mar'-kinch*, a village and parish of Fifeshire, Scotland, 10 miles from Cupar. *Pop.* of parish, 6,000.

MARKLAND, Jeremiah, *mark'-land*, a learned critic. In 1723 he distinguished himself by his "Epistola Critica," after which he published "Remarks on the Epistles of Cicero to Brutus, and of Brutus to Cicero; with a Dissertation on Four Orations ascribed to Cicero." He wrote several other works, and assisted many learned men in their labours. B. in Lancashire, 1693; D. near Dorking, Surrey, 1776.

MARKT, *markt*, the prefix to numerous small places in Germany.

MARLBOROUGH, *marl'-bur-o*, an irregularly-built market-town of Wiltshire, on the Kennet, 26 miles from Salisbury. It has an old church of St. Mary, displaying various styles of architecture; St. Peter's is adorned by a lofty square tower, with battlement and pinnacles; a grammar-school and the vestiges of a castle, in which Henry III. held a parliament. *Manf.* Sacking and ropes. *Pop.* 5,200. This place gave the title of duke to the celebrated general of the reign of Queen Anne, and now to the family of Spencer-Churchill.

MARLBOROUGH, the name of various townships in the United States, none of them with a population above 3,000.—Also the name of a district in S. Carolina. *Area*, 450 square miles. *Pop.* 12,000.

MARLBOROUGH, John Churchill, Duke of, an illustrious English general and statesman. He received but an indifferent education, for his father, Sir Winston Churchill, a royalist gentleman of ancient family, took him to court at the age of 12 years, where he became page to the duke of York, and, in 1666, obtained a commission in the guards. His first service was at the siege of Tangier, against the Moors, and, on his return to England, he became the favourite of the duchess of Cleveland, who gave him £5,000, with which he purchased an annuity for life. He served afterwards under the great Turenne, who was so pleased with his person and bravery, as to call him the "Handsome Englishman," and further declared that he would one day prove a master in the art of war. He distinguished himself so gallantly at the siege of Maestricht, that the king of France publicly thanked him at the head of the regiment. On his return to England he was made lieutenant-colonel, gentleman of the bedchamber, and master of the robes to the duke of York. He attended that prince to Holland and Scotland, and about this time married Miss Sarah Jennings, maid of honour to Princess, afterwards Queen Anne. In 1682 he was shipwrecked with the duke of York, in their passage to Scotland, on which occasion his royal highness expressed the utmost anxiety to save his favourite. The same year he was made a peer, by the title of Baron Eymouth, in Scotland; and when James came to the crown, he was sent to France to notify the event. In 1685 he was created Lord Churchill of Sandridge, and, soon afterwards, materially assisted in suppressing Monmouth's rebellion. He continued to serve King James with great fidelity till the arrival of William of Orange; whereupon he went over to that prince, an act of treachery which has been stigmatized by several writers, and not unjustly, as fraught with base ingratitude. His own apology was a regard for the religion and constitution of his country. King

William created him earl of Marlborough in 1689, and appointed him commander-in-chief of the English army in the Low Countries. He next served in Ireland, and reduced Cork, with other strong places. But in 1692 he was suddenly dismissed from his employments, and committed to the Tower; whence, however, he was soon released. After the death of Queen Mary, he was restored to favour; and at the close of that reign he had the command of the English forces in Holland, and was appointed ambassador extraordinary to the States, who chose him captain-general of their forces. On the commencement of Queen Anne's reign, he recommended a war with France and Spain, which advice was adopted. In the first campaign of 1702 he took a number of strong towns, particularly Liège. He

MARLBOROUGH.

returned to England the following winter, and received the thanks of both houses, and the honour of a dukedom from the queen. In 1704 he joined Prince Eugene, with whom he fought the French and Bavarians at Hochstedt, and obtained a complete victory, taking Marshal Tallard prisoner. Just before this event, he had been created a prince of the empire. In the winter he returned to England, bringing with him Marshal Tallard, and 26 other officers of rank, 121 standards, and 179 colours. He again received the thanks of parliament, and the grant of the manor of Woodstock, with the hundred of Wotton. In 1706 he fought the famous battle of Ramilies, in which his life was frequently in the most imminent danger, a cannon-shot taking off the head of Colonel Bingly as he was helping the duke to remount. This victory accelerated the fall of Louvain, Brussels, and other important places. He arrived in England in November, and received fresh honours and grants from the queen and parliament. A bill was passed to settle the titles upon the male and female issue of his daughters; and Blenheim House was ordered to be built to perpetuate his gallant services. He had also a pension of £5,000 a year granted him. The following campaign presented nothing worth recording; but the ensuing one was pushed with such vigour, that the French king was glad to enter into a negotiation for peace, which, however, had no effect. In 1709, Marlborough defeated Marshal Villars at Malplaquet; for which victory a general thanksgiving was solemnized. In the winter of 1711 he returned to England, having added considerably to his laurels; but soon after was dismissed from his employments. To add to this disgrace, a prosecution was commenced against him for applying the public money to his private purposes. Thereupon he went into voluntary banishment, accompanied by his duchess, and remained abroad till 1714, when he landed at Dover, amidst the

acclamations of the people. Queen Anne was just dead, and her successor restored the duke to his military appointments; but his infirmities increasing, he retired from public employment, having survived his intellectual faculties. After his death, his remains were interred with great pomp in Westminster Abbey. B. in Devonshire, 1650; D. 1722.

MARLBOROUGH, Sarah, Duchess of, wife of the preceding, was a lady of strong mind, but overbearing passions. For a long time she exercised over the weak and easy nature of Queen Anne a most commanding influence. The queen threw off all royal etiquette when corresponding with the haughty duchess. In this romantic affair, Queen Anne was simple "Mrs. Morley," while the duchess was styled as "dear Mrs. Freeman." In the end, however, the queen felt her yoke to be intolerable, and after a long struggle for power, the duchess was dismissed the court, the duke, her husband, sharing in her disgrace. She outlived the duke several years. D. 1744.

MARLOW, GREAT, *mar'-lo*, a borough and market-town of Buckinghamshire, near the Thames, which is here crossed by an iron suspension-bridge, 5 miles from Maidenhead. The church is a large and ancient building, and there are charity-schools and almshouses. *Manf.* Paper, lace, and silk. It has a trade in coals and timber; also in meal and malt. *Pop.* 6,500.

MARLOW, LITTLE, a parish 2 miles from Great Marlow. *Pop.* 1,000.

MARLOWE, Christopher, an English dramatic writer. He studied at the university of Cambridge, and took there a M.A. degree in 1587. It is said he subsequently became a writer for the stage, and, perhaps, an actor. His course of life appears to have been very bad, and he met his death in a disgraceful quarrel. The plays which have been attributed to him are,—"Dr. Faustus;" "Edward the Second;" "The Jew of Malta;" "Tamburlaine the Great;" "Lust's Dominion;" "Dido, Queen of Carthage;" and "The Massacre at Paris." All these works have reached our times in a very imperfect condition, owing to the carelessness of the printers; but they convey, nevertheless, abundant proof of the great power their author possessed of drawing characters more than human in their intense malignity and terrible depth of villany. Marlowe was the link between Shakspere and the old "Moralities." B. about 1565; killed, 1593.

MARMAGNAC, *mar'-mon-yak*, a town of France, in the department of the Cantal, 6 miles from Aurillac. A chapel excavated out of the rock is to be seen here. *Pop.* 3,000.

MARMANDE, *mar'-mand*, a town and parish of France, in the department Lot-and-Garonne, on the Garonne, 30 miles from Agen. It has a town-hall, commercial college, and court-house. *Manf.* Linens and woollens. *Pop.* 8,500.—Steamboats ply from this place to Bordeaux daily.

MARMONT, Marshal. (*See* RAGUSA, Duke of.)

MARMONTEL, John Francis, *mar'-mon-tel*, a celebrated French writer. In early life he was professor of philosophy at Toulouse. In 1745 he went to Paris, and obtained the friendship of Voltaire. His talents and virtues procured him a pension and the place of historiographer of the royal buildings, and also the management of a journal called the "Mercure;" but, having written a satire against a nobleman of distinction, he was sent to the Bastille. On obtaining his release, he recommenced his literary career, and wrote some tragedies and an opera; but his fame rests principally, if not wholly, upon his "Moral Tales," a work universally known and esteemed. The French Academy appointed him perpetual secretary in 1789. During the Revolution he led a retired life, and though reduced to destitution, remained secure amidst all the violent scenes of that event. In 1797 he was chosen deputy of the Council of Ancients by the department of Eure. Besides his dramatic pieces and "Moral Tales," he wrote the romance of "Belisarius," "The Literary Observer," "The Charms of Study," an epistle; a French translation of Lucan's "Pharsalia," "Poétique Française," "The Incas; or, the Destruction of the Empire of Peru," "Essay on the Revolutions of Music," "Elements of Literature," and several articles in the French "Encyclopédie." B. in France, 1723; D. 1799.

MARMORA, *mar'-mo-ra*, an island in the Sea of Marmora, which takes its name from it. *Ext.* 12 miles long, with a breadth of 5. Its principal products are wine and marble. *Pop.* Unascertained.

MARMORA, or MARMARA, a sea in the basin of the Mediterranean, between Asiatic and European Turkey. *Ext.* About 170 miles long and 55 broad. By the channel of Constantinople, or the Bosphorus, it communicates with the Black Sea, and by that of the Dardanelles with the Mediterranean.

MARMORA, Alfonso, Count della, a modern Piedmontese general, who received his education in the military school of Turin. In 1823 he entered the artillery as lieutenant, and rose, during the ensuing twenty-five years, through the intermediate grades, till, at the latter period, he attained the rank of major-general. During the struggle between Piedmont and Austria, in 1848, he held office as minister of war; and on the abdication of Carlo Alberto, he was appointed to reorganize the shattered army. In 1855 he went out to the Crimea, as commander-in-chief of the Piedmontese army of 15,000 men, which had been sent thither to co-operate with the English and French against the Russians. B. at Turin, 1804.

MARMORICE, *mar'-mo-reece*, a seaport town of Anatolia, in Asiatic Turkey, with a fine harbour, 28 miles from Rhodes. *Pop.* Unascertained. *Lat.* 36° 52′ N. *Lon.* 28° 31′ E.

MARNE, *marn*, a river of France, rising in the department of Upper Marne, and, after a course of upwards of 200 miles, joining the Seine on the right, at Charenton.

MARNE, a department in the N.E. of France, including part of the province of Champagne, and contiguous to the departments of the Ardennes, the Meuse, and the Aube. *Area*, 3,214 square miles. *Desc.* A considerable portion consists of sandy plains, which have been planted with Scotch firs, and thus rendered profitable. *Rivers.* The Seine and the Marne. *Pro.* The usual cerealia; but wine is the principal product. *Minerals.* Stones for making millstones. *Manf.* Woollens and bonnets. *Pop.* 375,000.

MARNE, UPPER, a department in the N.E. of France, including the S. part of Champagne, and contiguous to the departments of the Meuse, the Vosges, and the Upper Saone. *Area*, 2,460 square miles. *Desc.* Its surface is elevated and mountainous. *Rivers.* The Marne, Meuse, and the Aube. *Pro.* Grain, wine, and timber. *Minerals.* Iron, the mines of which are amongst the most important in France. *Manf.* Cutlery, cotton-spinning, and weaving. *Pop.* 270,000.

MARNES, *marns*, a town of France, in the department of the Two Sèvres. *Pop.* 2,200.

MAROCHETTI, Baron, *mar-o-ket'-te*, an eminent modern sculptor, who, having commenced the practice of his profession at Turin, went to Paris, and afterwards to London, where he remained, constantly employed by the most fashionable circles. The English public became acquainted with him during the Great Exhibition of 1851, when he contributed his colossal model of Richard Cœur-de-Lion, which was placed in the open air on the western end of the Crystal Palace. He was afterwards extensively employed by the royal family and the highest nobility to carve busts, &c. In 1856, he produced a bust of her majesty in stained marble, and two years before he executed a colossal equestrian statue of the queen, for the citizens of Glasgow. One of his last works, but by no means his best, was the monument to the English soldiers who died at Scutari, and which was inaugurated by her majesty in 1856. Although, perhaps, the most extensively patronized, he is far from being the first sculptor of the day.

MARONI, or MARAWINA, *ma-ro'-ne*, a small river of Guiana, which runs into the Atlantic. *Lat.* 5° 52′ N. *Lon.* 55° 14′ W.

MAROS, *ma'-rosh*, the name of several villages in Hungary, none of them with a population above 2,000.

MAROS, a river of Transylvania, rising near the frontier of Moldavia, and, after a course of nearly 400 miles, joining the Theiss opposite Szegedin.

MAROZIA, *mar-o-ze'-a*, a Roman lady, who married, about 906, Alberic, count of Tusculum and marquis of Camerino. Becoming a widow while still young, she exercised, by her beauty and intriguing spirit, great influence over the most powerful nobles of Rome, and during many years set up or deposed popes almost at her mere whim. She made herself mistress of the city, and caused, in succession, the election of Sergius III. in 904, Anastasius III. in 911, and Landon in 913. In 928 she deposed John X., who had been elected through the influence of Theodora, her sister and rival, and put him to death, with the assistance of Guido, duke of Tuscany, her second husband. In 931 she seated in the pontifical chair her son, under the title of John XI. (*See* John XI.) In the following year she married her third husband, Hugh of Provence, who became king of Italy; but that monarch having struck Alberic, eldest son of Marozia, he, out of revenge, roused the Roman youths, and massacred the guards of his father-in-law, who sought safety in flight. Marozia was imprisoned in the castle of St. Angelo, where she died.

MARPLE, *mar'-pel*, a township of Cheshire, 5 miles from Stockport. *Pop.* 3,500.

MARPURGH, Frederic William, *mar'-poorg*, an eminent German writer on the theory of music. Of his personal history scarcely anything authentic is known, further than that he was either counsellor of war to Frederick II., or secretary to one of his ministers. His "Manual of Harmony and Composition" is so correct and sound that it has earned the title of the "Musical Euclid." Dr. Burney remarks of Marpurgh, that "he was the first German theorist who could patiently be read by persons of taste, so addicted were former writers to prolixity and pedantry." He was also the author of several other, but less important works. B. in Prussia, 1718; D. 1795.

MARQUESAS, or MENDOCA ISLANDS, *mar-kai'-sas*, a group in the S. Pacific Ocean, four of which were discovered by Mendana, a Spanish navigator, in 1595, and the rest by Captain Cook in 1774. They have since been visited by several navigators. They are 13 in number, and the principal of them, named Nukuheena, has a circumference of 70 miles. *Desc.* Mountainous, but fertile, and producing pulse, sugarcane, bamboos, yams, cotton, nuts, and swine. *Pop.* 20,000, mostly in a savage state. *Lat.* between 8° and 11° S. *Lon.* 140° W.

MARQUETTE, *mar-ket'*, the name of two counties in the United States. 1. In Wisconsin. *Area*, 860 square miles. *Pop.* 9,000.—2. In Michigan. *Area*, 3,880 square miles. *Pop.* 9,000.

MARRAST, Armand, *mar-rast'*, an eminent modern political writer, who, after completing his education, went to Paris, where he soon distinguished himself by his brilliant attacks upon the government of Charles X. In 1830 he started "La Tribune," in which Louis Philippe and his ministry were subjected to an unceasing flow of the most pungent satire. Fines and law expenses, however, put an end to that remarkable journal, and at one time its former editor was compelled to seek refuge in England. He subsequently became sub-editor of "Le National," then under the guidance of the unfortunate Armand Carrel. (*See* CARREL.) When the latter fell, in a duel with Girardin, Marrast succeeded to the editorship in chief of "Le National," and therein contributed, in no slight degree, to bring the government of Louis Philippe into contempt, as well as to produce the great crisis of 1848, which resulted in the loss of his throne by the old monarch. After the fall of the Lamartine administration, Marrast retired into private life. "Le National" was suppressed under the government of Louis Napoleon. B. in France, 1802; D. 1852.

MARRYAT, Frederic, *mär'-re-ät*, a celebrated English novelist. Before he had commenced the first line of his first novel, he had proved himself a man of heroic mould in many desperate conflicts. After receiving some education at various schools in the vicinity of London, he entered the navy at the age of 14. His first ship was the famous *Impérieuse*, 44 guns, commanded by that brilliant seaman Lord Cochrane, afterwards earl of Dundonald. Under this celebrated chief, the young sailor fought in upwards of fifty engagements, between the years 1806—1809. The reputation for bravery and skill which he had acquired under his first commander was continued, and increased during his after-career. On five occasions he rescued sailors from drowning by leaping overboard to their assistance. After various services, he was gazetted commander in 1815; in 1823 he sailed in command of the *Larne*, 18 guns, to the East Indies, where he co-operated in the attack

on Rangoon. For his services he received the thanks of the governor-general, and, after his return home, became C.B.; a further honour was bestowed upon him by the Royal Humane Society, which awarded its gold medal to him, in token of his efforts at saving seamen's lives. He served with the Channel fleet during the interval 1823—1830. At the age of 40 he took up the novelist's pen, and produced, in rapid succession, a series of excellent works of fiction, most of them depicting life at sea. To enumerate a few of them will suffice for the present purpose:—"Peter Simple," "Jacob Faithful," "The King's Own," "Japhet in Search of a Father," "Midshipman Easy," "Rattlin the Reefer," "Poor Jack," the "Pirate and Three Cutters," "Masterman Ready." The preceding are his best novels, but almost everything he wrote was excellent. In 1837 he produced a most valuable work, entitled "A Code of Signals for the use of vessels employed in the merchant service," for which Louis Philippe bestowed upon him the cross of the Legion of Honour. The code is now in use both in the English and foreign navies. For several years before his death he was incapacitated from literary labour by shattered health. It must be mentioned that the sole reason why this bold and skilful seaman did not rise in his profession, was that he had given free utterance to his opinions against the practice of impressment. He was a fellow of the Royal Society. B. in London, 1792; D. in Norfolk, 1843.

MARS, *mars*, the god of war, was son of Jupiter and Juno, or, according to Ovid, of Juno alone. The amours of Mars and Venus are greatly celebrated. In the wars of Jupiter and the Titans, Mars was seized by Otus and Ephialtes, and confined for fifteen months, till Mercury procured him his liberty. During the Trojan war, he took the side of the Trojans, and defended the favourites of Venus with uncommon activity. His temples were not numerous in Greece; but in Rome he received unbounded honours, and the warlike Romans were proud of paying homage to a deity whom they esteemed as the patron of their city, and the father of the first of their monarchs. Mars was generally represented in the naked figure of an old man, armed with a helmet, a pike, and a shield. He generally rode in a chariot drawn by furious horses, which the poets called Flight and Terror. The Greeks called him Ares, and he was the Enyalus of the Sabines, the Camulus of the Gauls, and the Mamers of Carthage. Mars was the father of Cupid, Anteros, and Harmonia, by the goddess Venus. He was also the reputed father of Romulus. He presided over gladiators, and was the god of hunting and of every manly and warlike exercise.

MARSALA, *mar-sa'-la*, a fortified town of Sicily, in the Val di Mazzara, at the western extremity of the island, 15 miles from Trapani. It exports wine, oil, wheat, and barilla. *Pop.* 21,000.—This is the ancient Lilybæum, for a long period the capital of the Carthaginian dominions in Sicily. Here landed, in 1860, the gallant band of Italian patriots who, under Garibaldi, won Sicily and Naples for Victor Emmanuel II.

MARSDEN, William, *mars'-den*, a distinguished Orientalist, who was educated at various schools in Dublin, with the view of proceeding to Trinity College, and entering the church. His father was, however, induced to send him out to India when he had attained his 16th year. He reached Bencoolen in 1771, and entered the civil service of the government. While fulfilling the duties of secretary, he mastered the Malay language, and acquired a large and valuable store of local knowledge, which, at a later period, he turned to good account in his writings. After residing at Sumatra during eight years, he returned to England, where he made the acquaintance of Sir Joseph Banks, who introduced him to most of the scientific and learned men of the day. In 1782 he published his excellent "History of Sumatra." The success of this work was, from the outset, very decided; and through the influence of distinguished persons, whose acquaintance he had made, he became second secretary, and afterwards chief secretary, of the Admiralty. While he held that appointment, the battles of St. Vincent, Camperdown, the Nile, and Trafalgar took place; and, during that stirring and glorious period, Mr. Marsden's efforts were marked by untiring energy, integrity, and intelligence. In 1807 he retired upon a pension of £1,500 per annum; and five years afterwards he produced his "Grammar and Dictionary of the Malay Language," which was followed, after several years' interval, by a "Translation of the Celebrated Travels of Marco Polo." His other important works were "Numismata Orientalia; or, Description of Eastern Coins," and some treatises on the Polynesian or East Insular Languages. In 1831 he voluntarily gave up his pension to the public; an act of liberality which elicited the warmest thanks of the House of Commons. At his death he bequeathed his collection of coins and medals to the British Museum, and his library to King's College. B. at Dublin, 1754; D. 1836.

MARSEILLAU, *mar'-sai-yo*, a parish and town of France, in the department of Herault, 15 miles from Beziers. Near it are salt-works. *Pop.* 4,000.

MARSEILLES, *mar-sails'* (Fr. *mar'-sail*), a commercial city in the S. of France, the capital of the department of the Mouths-of-the-Rhone, on the Mediterranean, and on the E. coast of the Gulf of Lyons. It is inclosed by a succession of rocky hills, extending in the form of a crescent, until each extremity reaches the sea. The form of Marseilles is nearly square; it is surrounded by walls, and divided into the Old and New town, the former composed of narrow and dirty streets, the latter equal in beauty to any town of France, and separated from the other by one of the finest streets in Europe. The public buildings, with the exception of the Hôtel-de-Ville, are not remarkable for architectural beauty. The principal are, the arsenal, constructed in 1690; the ancient cathedral, a Gothic edifice, said to have been built on the ruins of a temple of Diana; a theatre, built on the model of the Odeon at Paris; many religious houses, numerous hospitals, the governor's palace, and the concert-hall. One of the finest public institutions is the Lazaretto, outside of the town, about 200 paces to the north. The literary institutions are, an academy of sciences, a medical society, a college royal, and a navigation school. The public library is large, and there are a cabinet of natural history, botanical garden, and an observatory, from which a most picturesque view of the town, the port, and the surrounding country is obtained. The port of Marseilles may be called a small salt-water lake, completely sheltered from all winds. The entrance does not exceed a hundred yards, being confined by two projecting rocks, one on each side; on which are situate two forts for its defence. It is further protected by other works, and is completely surrounded by quays. *Commerce.* Marseilles has long enjoyed a large share of the foreign trade of France, and its harbour is the most commercial in the empire. *Exp.* Light woollens, silk, and colonial produce, to the Levant and the north coast of Africa. Being a central point for the trade with Spain and Italy, it sends to the latter the woollens of Languedoc and Dauphiny, linens, liquors, oil, hardware, and lead. It has, also, extensive transactions with Holland, England, the Baltic, North America, and the West Indies. To England, and other northern countries, the exports consist of wine, brandy, olive-oil, preserved fruit, soap, silks, gloves, French shawls, &c. *Manf.* The most important are soap, coral articles, silk, and embroidered stuffs, woollens, cotton and chintz, plain and coloured linen, hats, caps, leather, and sail-cloth; also china, earthenware, alum, sulphur, vitriol, salt, and lead. There are, besides, refineries for sugar, and manufactures of vinegar and liquors. Another branch of industry is the pickling and preparing for exportation of capers, olives, and other fruits, as well as large quantities of fish. *Pop.* 196,000. *Lat.* 43° 17′ 8″ N. *Lon.* 5° 22′ 2″ E.—Marseilles is one of the most ancient towns of France, having been founded by the Phoceans, about 600 B.C. It preserved its liberty under the Romans, and was long celebrated for the cultivation of the arts and letters. In 1481 it was united by Louis XI. to the crown of France. In 1649 it was visited by the plague, and again by it in 1720, 1721, and 1722, when it carried off 50,000 of the inhabitants. During this last dreadful visitation, M. de Belfunce (the "Marseilles good bishop" celebrated by Pope), the canon Bourgeret, the magistrate Moustier, and the commandant Langeron, by their intrepid and indefatigable humanity, did

the most signal honour to themselves and to human nature.

MARSHALL, *mar'-shal*, the name of several counties in the United States, the largest in Mississippi, with a population of 30,000. None of the others have a population above 20,000.

MARSHAM, Sir John, *mar'-sham*, a learned English writer, who, after studying the law, became one of the *six* clerks in Chancery. During the civil wars, he adhered to the royal cause, and in 1660 was chosen member of parliament for Rochester. Charles II. conferred on him the honour of knighthood. He is distinguished for his "Diatribe Chronologica," or a Chronological Dissertation, wherein he examines the principal difficulties which occur in the chronology of the Old Testament; an enlarged edition of which work he afterwards produced. B. in London, 1602; D. 1685. His son, Sir John Marsham, made large collections for a history of England, but never published them. He also wrote a "History of the English Boroughs."

MARSICO NUOVO, *mar'se-ko*, an episcopal city of Naples, 18 miles from Potenza. *Pop.* 7,500.—In 1857 this place was nearly destroyed by an earthquake.

MARSIGLI, Count Louis Ferdinand, *mar'-seel-ye*, an Italian naturalist. He served with reputation in the imperial army, and in 1683 was taken prisoner by the Tartars, who sold him to the Turks. The year following he was ransomed, and obtained a colonel's commission. He was afterwards advanced to the rank of marshal; but when the Count d'Arco was condemned, for giving up the fortress of Brisach to the duke of Burgundy, Marsigli, who commanded under him, was dismissed the service. He then retired to Bologna, where he formed a museum, and erected a printing-office; the first he bequeathed to the senate, and the last to the Dominicans. He also founded the Academy of Arts and Sciences at that place. Count Marsigli was a member of the Academy of Sciences at Paris, and of the Royal Society of London. He wrote, among other important works, "A Philosophical Essay on the Sea," "A Description, Historical, Geographical, &c., of the Danube," and "A Treatise on the Bosphorus." B. at Bologna, 1658; D. 1730.

MARSTON, John, *mar'-ston*, an English dramatic writer of the time of Elizabeth and James I. He is said to have been a student of Corpus Christi College, Oxford, and an intimate friend of Ben Jonson; but beyond these facts, nothing is known of the circumstances of his life. Nine of his plays have been printed separately; one of them, "The Malcontent," is a very fine production; it is said, however, to have been altered from Webster. His miscellaneous poems were collected and edited in 1764. He also assisted Ben Jonson and Chapman in writing "Eastward Hoe."

MARSTON, the name of numerous parishes in England, none of them with a population above 1,500.

MARSYAS, *mar'-si-as*, a celebrated piper of Celænæ, in Phrygia. He was so skilful in playing on the flute, that he was generally deemed the inventor of it. Marsyas was enamoured of Cybele, and he travelled with her as far as Nysa, where he had the imprudence to challenge Apollo to a trial of his skill as a musician. The god accepted the challenge, and it was mutually agreed that he who was defeated should be flayed alive by the conqueror. Each exerted his utmost skill, and the victory, with much difficulty, was adjudged to Apollo: the god, upon this, tied his antagonist to a tree, and flayed him alive. Marsyas is often represented on monuments as tied, his hands behind his back, to a tree, while Apollo stands before him with his lyre in his hands. At Celænæ, the skin of Marsyas was shown to travellers for some time; it was suspended in the public place, in the form of a bladder or a football.

MARTABAN, *mar-ta-ban'*, a seaport in the British province of Pegu, 10 miles from Maulmain. *Pop.* 6,000. *Lat.* 16° 30′ N. *Lon.* 97° 35′ E.—The British province of the same name has an area of 12,000 square miles, and a population of 60,000. It produces cotton, indigo, and valuable woods.

MARTEL, Charles. (*See* CHARLES MARTEL.)

MARTIAL, Marcus Valerius, *mar'-she-al*, a Latin epigrammatic poet. From some hints contained in his own works, it is ascertained that he went to Rome when young, and remained there during 35 years, after which he retired to his native place, Bilbilis, in Spain. The emperor Domitian conferred on him many favours, and raised him to the office of tribune. Martial, in return, complimented him as more than human; but, after his death, he painted his enormities in glowing colours. His epigrams are very pointed and severe. The best edition of Martial is that of Schneidewinn, 1842. D. about 103.

MARTIGUES, LES, *mar'-teeg*, a town of France, in the department of the Mouths-of-the-Rhone, on the Lake of Berre, 22 miles from Marseilles. It has fisheries on the lake, boat-building, and a trade in wine. *Pop.* 9,000.

MARTIN, *mar'-tin*, two counties of the United States. 1. In N. Carolina. *Area*, 340 square miles. *Pop.* 9,000.—2. In Indiana. *Area*, 334 square miles. *Pop.* 6,000.

MARTIN, St., an island in the West Indies, the S. portion belonging to the Netherlands, and the N. to France. *Area*, 30 square miles. *Desc.* Hilly and tolerably healthy. *Pro.* Sugar, rum; and large numbers of cattle are reared. *Pop.* of the Dutch portion, 3,000; of the French, 4,000. *Lat.* 18° 4′ N. *Lon.* 63° 8′ W.

MARTIN, St., several parishes in England, none of them with a population above 2,000.

MARTIN, St., numerous parishes and places in France, none of them with a population above 1,000.

MARTIN I., Pope, succeeded Theodore in 649. He held a council at Rome, in which the heresy of the Monothelites was condemned. This giving offence to the emperor Constantius, he caused Martin to be sent to Constantinople, whence he was removed to the Crimea, where he died of ill-usage, in 655.

MARTIN II. succeeded John VIII. in 882. He condemned Photius, patriarch of Constantinople. D. 884.

MARTIN III., a Roman, succeeded Stephen VIII. in 942. He founded many churches and charitable institutions. D. 946.

MARTIN IV., a Frenchman of noble birth, succeeded Nicholas III. in 1281. He excommunicated the emperor Michael Palæologus, and Peter III., king of Aragon, and gave the kingdom of the latter to Charles de Valois, son of Philip the Hardy, king of France. D. 1285.

MARTIN V. (Otho Colonna) was elected pope in 1417, after the abdication of John XXIII. and of the antipopes Benedict and Gregory. His inauguration was very pompous, and he was attended, in a submissive manner, by the emperor and the elector-palatine. He persecuted the followers of Huss in Bohemia, and presided at the council of Constance, in 1418. D. 1431.

MARTIN, John, a modern English painter, of considerable originality. Having in early life evinced a desire to become an artist, his father apprenticed him to a Newcastle coachmaker, for the purpose of learning herald-painting; his indentures were, however, cancelled after a short time, and he was placed in the studio of Bonifaccio Musso, an enamel painter. In 1806 he went to London with his master, who obtained employment for him in the firm of Mr. C. Muss, his son. Martin, speaking of his life at that period, says, "By close application, till two or three o'clock in the morning, in the depth of winter, I obtained that knowledge of perspective and architecture which has since been so valuable to me. I was at this time, during the day, employed in Mr. C. Muss's firm, painting on china and glass; by which, and making water-colour drawings, and teaching, I supported myself; in fact, mine was a struggling artist's life when I married, which I did at 19." In 1812 he resolved to paint a large picture; he set to work, and in a month produced "Sadak in search of the Waters of Oblivion." This obtained a place in the Royal Academy Exhibition, and was purchased for 50 guineas. Thus encouraged, the painter worked diligently, and became, for a period, the most generally popular artist in his native country. He produced a number of striking works, which, as depicting awe-inspiring subjects, in a manner characterized by fervid imagination and a feeling for the grandeur of nature, captivated the general public, and caused Martin to be regarded as possessing a "sublime style." There was, however, too much trick and mannerism, and too great a want of the real principles of art in his paintings, for them to last beyond a certain

period of popularity. To enumerate some of his most attractive pictures, these were "Belshazzar's Feast," "The Seventh Plague," "The Fall of Nineveh," "The Eve of the Deluge," and "The Destruction of Herculaneum." He outlived the extravagant popularity which greeted his first efforts, and his last pictures, illustrative of the "Last Judgment," were coldly received. He devoted considerable time to projects for the sanitary improvement of the metropolis, published some pamphlets on the subject, and took out patents for sewer-pipes, &c. At one time, his services were eagerly sought by publishers as an illustrator of books; and for one set of drawings,—those made for an edition of Milton's poems, he is said to have been paid 2,000 guineas. B. in Northumberland, 1789; D. 1854.

MARTIN, Claude, a Frenchman, who attained the rank of major-general in the English service in India. He received a good mathematical education at a public school, and at the age of 20 entered the army with one of his brothers. His regiment was sent to India with General Lally, and in the war of 1756 he behaved with great gallantry; but, being ill-treated, he deserted into the English service, in which he signalized himself by many acts of bravery. Being employed to make a map of the estates of the nabob of Oude, he recommended himself to his patronage. The nabob loved the European arts, in which he was assisted by Martin, who opened a profitable bank and other commercial institutions under his protection, and thereby gained prodigious wealth. Having settled at Lucknow, he built there a magnificent but curious work, in a style of his own, and in which he could enjoy all the mildness and coolness of a European climate, with the fervour of the Asiatic. He also erected another on the banks of the Ganges, which was fortified in the European manner. He formed a large museum of natural history; constructed an immense garden, stocked with a prodigious variety of plants; and built an observatory, which he furnished with the best astronomical instruments. At his death, his great wealth was distributed principally in charity. He founded at Lyons a school of commerce and industry, which is called La Martinière, after him. B. at Lyons, 1732; D. 1800.

MARTINEAU, Harriet, *mar'-te-no*, an eminent modern authoress. She was descended from a family of French extraction, which, on the revocation of the edict of Nantes, commenced and carried on, during several generations, the business of silk-manufacturers at Norwich. In early youth she displayed great earnestness of character, and an unremitting eagerness to acquire knowledge. Her talent for literary composition was also very decided. Her father becoming embarrassed in his commercial affairs, Harriet, the youngest of eight children, resolved to support herself by literature. She commenced accordingly by publishing, in the year 1823, a volume of "Devotions for Young People," which was succeeded by her "Christmas Day" and "The Friend," in the two following years. Some tales and tracts occupied her pen up to 1830, when she published a more ambitious work entitled "Traditions of Palestine." About the same time she gained the prizes offered by the British and Foreign Unitarian Association for three tracts on the "Introduction and Promotion of Christian Unitarianism among the Roman Catholics, the Jews, and Mahometans." Her next efforts were the "Illustrations of Political Economy," which, although they had been rejected by the Society for the Diffusion of Useful Knowledge and several publishers, proved a most decided success. "Illustrations of Taxation" and "Poor-Law and Paupers" appeared next; and in 1837 she gave to the world her "Society in America," which was the result of her visit to the United States. "Deerbrook" and "The Hour and the Man" were the subsequent productions of her pen; but, although two excellent novels, they did not attain great popularity. Between the years 1839-44, her health was exceedingly delicate; but, on her recovery, she took up her pen with her former energy, and produced "Life in the Sick Room," "Forest and Game-Law Tales," "The Billow and the Rock," and "Eastern Life, Past and Present," which last contained her travelling impressions of Syria and the Holy Land. Mr. Charles Knight having been compelled to relinquish the composition of "The History of England during the Thirty Years' Peace," Miss Martineau undertook the task, and was generally allowed to have produced a most interesting and valuable contribution to historical literature. She next published, in conjunction with Mr. Atkinson, a volume containing opinions relative to religious belief, which astonished the world by being directly opposite to those she had hitherto displayed. About 1856 she went to reside at a pleasant cottage she had built for herself at Ambleside. Her pen was next employed in the service of the "Westminster" and other reviews, and in occasional contributions to the daily and weekly press. Her last work of importance was a condensed reproduction of "Comte's Positive Philosophy." B. at Norwich, 1802.

MARTINI, Martin, *mar-te'-ne*, a Jesuit, who resided many years in China, of which country he wrote some curious memoirs. He returned to Europe in 1651, but is said to have again visited China. He wrote "China Illustrata;" a history, in Latin, of the wars of the Tartars against China, and "Relation of the Number and Quality of Chinese Christians." B. 1614; D. 1661.

MARTINIQUE, *mar-te-neek'*, an island in the W. Indies, and one of the largest of the Windward group. *Desc.* Mountainous and volcanic. *Pro.* Sugar, coffee, cassia, cotton, indigo, cocoa, ginger, &c. *Pop.* 125,000. *Lat.* between 14° 24′ and 14° 53′ N. *Lon.* between 60° 50′ and 61° 18′ W.—This island was, in 1493, discovered by the Spaniards. In 1635 a French colony was founded on it, and in 1762 it was taken by the English, but restored in the following year. In 1794 it was again taken by the English, and held till 1809. In 1815 it was finally relinquished by them, and now belongs to France.

MARTON, *mar'-ton*, the name of several parishes of England, none of them with a population above 2,000.

MARTOS-Y-FUENSANTA, *mar'-tose e foo'-ain-san'-ta*, a town of Spain, in the province of Jaen, and 16 miles from the town of that name. It stands on a hill, and has several churches. *Pop.* 12,000.

MARTYN, John, *mar'-tin*, an eminent English botanist, who, in 1720, translated "Tournefort's History of the Plants growing about Paris," which induced him to make a similar catalogue of the plants about London. He co-operated with Dillenus in forming a society of botanists, which continued till 1726. About this times he read botanical lectures in London, and on the death of Bradley was chosen professor of botany at Cambridge. He became, in 1727, a member of the Royal Society. He practised physic in the city, and afterwards at Chelsea, but, in 1752, he retired to Streatham. His principal works were several treatises in Latin on botany; a Translation of the Georgics and Bucolics of Virgil, with notes; translation of Boerhaave's treatise on the Powers of Medicine; Harris on the Diseases of Infants; and an abridgement of Philosophical Papers from the Memoirs of the Academy of Sciences at Paris. B. in London, 1699; D. at Chelsea, 1761.

MARTYR, Peter, *mar'-tir*, an Italian diplomatist, who was employed by Ferdinand V., king of Castile and Aragon, in the education of his children. He also obtained some ecclesiastical benefices, and wrote a history of the discovery of America, in Latin, also a curious relation of his embassy to Egypt, in 1500, and a collection of letters relating to the history of Spain. B. 1455; D. 1523.

MARTYR, Peter, a celebrated Protestant divine, whose family name was Vermilius; but his parents gave him that of Martyr, from one Peter, a martyr, whose church stood near their house. After receiving a private education, he entered an Augustine monastery at Fiesoli. He became a distinguished preacher, and held an appointment in the cathedral of Naples, which he relinquished after reading the writings of Luther and other reformers. This change in his religious sentiments rendering it expedient for him to quit Italy, he went to Strasburg, where he married a nun, who, having adopted the principles of the Reformation, had fled from her convent. On the invitation of Edward VI. he went to England, and was made professor of divinity at Oxford, and canon of Christ Church. But in the succeeding reign he was obliged to leave the kingdom; on which he went to Switzerland. His wife died at Oxford, and, in the reign of Mary,

her remains were taken up and buried beneath a dunghill; but when Queen Elizabeth came to the throne, they were honourably interred in Christ Church. Peter Martyr wrote some pieces against the errors of the church of Rome, and commentaries upon the Holy Scripture. B. at Florence, 1500; D. at Zurich, 1562.

MARVELL, Andrew, *mar'-vel*, an English poet and politician. At the age of 13 he was sent to Trinity College, Cambridge, and, in 1657, he became assistant to Milton, as Latin secretary. In the parliament which met at the Restoration, he was chosen to represent his native town. He distinguished himself by his integrity as a senator, and by his wit as a writer against the corruptions of the court. Charles II. delighted in his conversation, but could never prevail upon him to support his measures. The following anecdote, so strongly depicting his political incorruptibility, was narrated in a small work published in 1784. "The borough of Hull, in the reign of Charles II., chose Andrew Marvell, a young gentleman of little or no fortune, and maintained him in London for the service of the public. His understanding, integrity, and spirit were dreadful to the then infamous administration. Persuaded that he would be theirs for properly asking, they sent his old school-fellow, the Lord-Treasurer Danby, to renew acquaintance with him in his garret. At parting, the lord-treasurer, out of pure affection, slipped into his hand an order on the Treasury for £1,000, and then went to his chariot. Marvell, looking at the paper, calls after the treasurer, 'My lord, I request another moment.' Then went up again to the garret, and Jack, the servant-boy, was called. 'Jack, child, what had I for dinner yesterday?' 'Don't you remember, sir? You had the little shoulder of mutton that you ordered me to bring from the woman in the market.' 'Very right, child; what have I for dinner to-day?' 'Don't you know, sir, that you bid me lay by the blade-bone to broil?' 'Tis so, very right; child, go away. My lord, do you hear that? Andrew Marvell's dinner is provided; there's your piece of paper. I want it not. I know the sort of kindness you intended. I live here to serve my constituents; the ministry may seek men for their purpose; I am not one.'" The close of his political career was brought about, according to Mr. Dove, in the following way. "Marvell had now rendered himself so obnoxious to the usual friends of a corrupt court, and to the heir presumptive, James, duke of York, that he was beset on all sides by powerful enemies, who even proceeded so far as to menace his life. Hence he was obliged to use great caution, to appear seldom in public, and frequently to conceal the place of his abode; but all his care proved ineffectual to preserve him from their vengeance; for he died at the age of fifty-eight years, not without strong suspicions (as his constitution was active and vigorous) of having suffered under the effect of poison." Although his fame as a wit, satirist, and poet, was considerable during his time, it is as a man of great political integrity that he is remembered. A complete edition of his works was published, with his life prefixed, in 1776. B. in Yorkshire, 1620; D. 1678.

MARY, *mair'-e*, the mother of Jesus Christ, was of the tribe of Judah, and of the royal house of David. She espoused Joseph, but, when betrothed, she miraculously conceived by the Holy Ghost, agreeably to the declaration of the angel Gabriel. When delivered, she went into Egypt with the child, and afterwards settled at Nazareth. Little is said of her in the Gospels, and nothing after the ascension of our Saviour, but that she resided with St. John the Evangelist, to whose care she was intrusted by our Lord. The Roman church pretends that she was immaculate, and ascended to heaven without passing through death; whence it holds the feast called the Assumption of the Virgin.—Mary, the wife of Cleophas, is called the sister of the Virgin. She was the mother of the apostles James the Less, Simon, and Jude. She accompanied our Lord to his crucifixion, and was one of the women to whom his resurrection was announced by the angels.

MARY I., queen of England, was the daughter of Henry VIII., by Catharine of Aragon, his first wife. Her education was liberal, and she acquired so great a knowledge of the Latin language as to undertake a translation of the paraphrase by Erasmus on St. John's gospel, which, however, she did not complete. During the life of her father she experienced many marks of his fierce temper; and the treatment which her mother had experienced contributed much towards increasing her dislike to Henry, and to the alterations which he introduced into the Church. During the reign of Edward, she could not be prevailed upon to join in communion with the Protestant divines; on this account, that amiable prince was persuaded by his minister, the duke of Northumberland, to set aside his sisters from the succession, and to declare Lady Jane Grey his heir. At his death, in 1553, that lady was proclaimed queen; but her reign lasted only a few days. The partisans of Mary became numerous, and she entered London without opposition. In putting to death Lady Jane and her husband, Lord Dudley, she betrayed that sanguinary and revengeful temper which was soon displayed in a violent persecution of the Protestants; even Cranmer, to whom she is said to have been indebted for her life, could not escape her bigotry and cruelty. In 1554 she married Philip of Spain, eldest son of Charles V., with whom she lived on indifferent terms. A disappointment, occasioned by a supposed miscarriage, and aggravated by the loss of Calais, produced a fever, of which she died, in 1558, and with her ended the domination of the papal power in England. B. at Greenwich, 1516.

MARY II., queen of England, the wife of William III., was the daughter of James II., by Anne Hyde, daughter of the earl of Clarendon. At the age of 15 she was married to William, prince of Orange, with whom she went to England, in 1689. The same year, parliament having declared the crown vacant by the abdication of James, conferred it upon William and Mary. She was of a meek disposition, and did not interfere in matters of government, except when her husband was absent. (*See* WILLIAM III.) She died, without issue, of the small-pox, in 1694. B. 1662.

MARY STUART, *stu'-art*, the daughter of James V., king of Scotland, by Marie of Lorraine, daughter of the duke of Guise. She was only eight days old when her father died; on which she became heiress to the throne. Henry VIII. of England endeavoured to unite the two kingdoms, by a marriage between his son Edward and the infant queen of Scots; but his offer being rejected, he sent his troops into Scotland, where they took and plundered Edinburgh, but were soon obliged to return. In 1548, Mary was contracted to Francis, dauphin of France, at which court she acquired those accomplishments which rendered her an object of universal admiration; and there, also, she imbibed those prejudices which proved the source of her misfortunes. In 1558 the marriage was celebrated, and, by the direction of their father-in-law, Mary and her husband assumed the title of king and queen of England, on the supposed ground of the illegitimacy of Elizabeth; an act of ridiculous ambition, which was afterwards fatal to Mary. In 1559 Henry II. died, and Francis became king of France; but, in less than two years, he left Mary a widow; on which she returned to her native country, after an absence of nearly thirteen years, and, says Robertson, "a stranger to her subjects, without experience, without allies, and almost without a friend." Scotland was at that time a prey to fanatical zeal. The Presbyterian party, goaded to desperation by the fierce intolerance of the Roman Catholic clergy, carried the work of reformation to the extreme, by destroying abbeys, cathedrals, libraries, and even the monuments of the dead. Such was the state of the kingdom at the landing of Mary, who, the first Sunday after her arrival, ordered mass to be said in her chapel; an act which gave great offence to the people. Mary, nevertheless, proclaimed that any attempt towards a change or subversion of the established church should be treated as a capital offence. Although she held several conferences with Knox, during one of which she was bathed in tears before the Reformer's fierce eloquence, Mary could not be induced to change her religious opinions. Several offers of marriage were made to Mary, who rejected them, and bestowed her hand on Henry, Lord Darnley, son of the earl of Lennox, a young nobleman of prepossessing appearance, but weak and impetuous in mind and temper, and mean and intemperate in his habits. This inau-

spicious marriage soon ended in disgust, and the enemies of both took the advantage of widening the breach. They persuaded Darnley that David Rizzio, an Italian musician, whom the queen had appointed as her foreign secretary, had supplanted him in her affections. A conspiracy was formed, and one night, while the queen was at supper with the countess of Argyle, Henry conducted his confederates to the royal apartment, where Rizzio was murdered in the presence of Mary, who was then advanced in pregnancy. The next favourite at the court of Scotland was James Hepburn, Earl Bothwell, a man of considerable talents, but of unprincipled mind. By his arts he gained an ascendancy over the mind of Mary, who appointed him lieutenant of the Marches. In 1566 she was delivered of a son, afterwards James VI. of Scotland and I. of England. Darnley was soon afterwards seized with a strange distemper, while staying at his father's house at Glasgow. He returned to Edinburgh; but, instead of proceeding to Holyrood Palace, went to a solitary house, which was blown up ten days afterwards, the body of the king being found in the garden, without any marks of violence upon it. This deed occasioned universal horror, and as it left no doubt that Bothwell was the principal cause, he was brought before the privy council, but, after a mock trial, was acquitted. His influence over Mary increasing, he laid aside the mask, and, 1567, seized the queen, and carried her to the castle of Dunbar, where, by entreaties and force, he prevailed on her to marry him. This is the great stain on the character of this ill-fated woman, which has called forth the condemnation of her enemies and her advocates. A confederacy of the most powerful lords in the kingdom was formed against Mary and Bothwell; but, after a time, the queen abandoned the earl, and was taken first to Edinburgh, and afterwards to the castle of Lochleven. The lords of the confederacy forced her to sign a renunciation of her crown in favour of her son, and he was accordingly crowned at Stirling. After this, the enemies of Mary, who had suffered Bothwell to quit the kingdom, caused different persons to be executed for being concerned in the king's murder. Mary, after nearly a year's confinement, escaped from her prison in the island of Lochleven, and raised a large army; but the regent Murray marching against her, the royal party was defeated. On this, Mary fled into England, and implored the protection of Elizabeth, who acted with great duplicity for some time, and at length declared that no assistance could be afforded her unless she submitted to a legal trial. After some difficulties, this was agreed to, and the cause was to be determined at York, by a commission, which finally removed to London, where it was declared that "nothing had been produced whereby the queen of England could conceive or take any evil opinion of her good sister, for anything yet seen." Mary was, notwithstanding, kept in close confinement. The duke of Norfolk formed the design of marrying Mary, in which he was encouraged by several of the English nobility, and also by the regent, Murray; but this being discovered by Elizabeth, the duke was sent to the Tower, whence he was not released till he promised to renounce all correspondence with the queen of Scotland; but afterwards renewing his ambitious project, he was tried and executed. After a long confinement at Coventry, Mary was removed to Fotheringay Castle, where she was to undergo the mock formality of a trial, on the charge of fomenting conspiracies against Elizabeth. When brought before the commissioners, she disclaimed their authority and asserted her innocence; but though no proof appeared of the charges, she was declared guilty of conspiring against the life of Elizabeth. Mary received the tidings with complacency, being wearied by her unparalleled persecutions. Many foreign powers interested themselves in her behalf, and her son James endeavoured to save her life, but in vain. She was beheaded in the castle of Fotheringay, February 8, 1587, after praying to God to forgive all who had thirsted for her blood. Thus fell Mary Stuart, a princess of uncommon beauty and accomplishments as well as misfortunes. Her remains were interred in Peterborough Cathedral, whence they were removed by her son, after he had ascended the English throne, and deposited in Westminster Abbey. B. 1542.

MARY, queen of Hungary, was sister to the emperor Charles V., and married, in 1521, Louis, king of Hungary, who soon after was killed at the battle of Mohatz. His widow was appointed governor of the Low Countries in 1531, and in that station behaved with great courage and prudence. She headed the troops in several actions, and was so fond of hunting as to be called Diana and the Huntress. She favoured the Protestants, and had a taste for literature. Between her and Henry II., king of France, there was a great animosity, and she committed considerable ravages in the French provinces. Henry, on his part, invaded Flanders, and destroyed the palace of Mary, who, in return, carried devastation into Picardy. The Spanish soldiers called her the mother of the camp. She resigned the government in 1555. D. in Spain, 1558.

MARY of England was daughter of Henry VII., and married Louis XII. in 1514. Becoming a widow in the following year, she was united to the duke of Suffolk. B. 1497; D. 1534.

MARY, an Anglo-Norman poetess in the 13th century, was born in France, but resided chiefly in England. She was the authoress of a collection of fables, entitled "Ysopet" (the Little Æsop). M. Legrand d'Aussy published her fables in modern French prose.

MARY, ST., the name of several parishes in England and Wales, none of them with a population above 3,000.

MARY'S, ST., a county of Maryland, U.S. *Area*, 315 square miles. *Pop.* 15,000.—Also a parish in Louisiana. *Area*, 720 square miles. *Pop.* 10,000.

MARY'S, ST., a river of the United States, dividing Georgia from East Florida, and falling into the sea, *lat.* 30° 43′ N., *lon.* 81° 40′ W.—An inconsiderable town of the same name is situate at its mouth.

MARY'S ISLANDS, ST., in the Gulf of St. Lawrence. *Lat.* 50° 20′ N. *Lon.* 60° W.

MARY'S RIVER, ST., or ST. MARY'S STRAITS, a river or strait of North America, connecting lakes Huron and Superior, and containing four large and several smaller islands.

MARYBOROUGH, *mair'-e-bur-o*, a town of Ireland, in Queen's county, near the Barrow, 43 miles from Dublin. *Pop.* 2,300.—It has a station on the Great South and West Railway.

MARYLAND, *mair'-e-land*, one of the United States, bounded N. by Pennsylvania and Delaware, E. by Delaware and the Atlantic, S.W. and W. by Virginia. It is intersected from north to south by Chesapeake Bay, along which, on each side, it extends 196 miles in length, to the northern line which separates it from Pennsylvania and Delaware. *Area*, exclusive of the bay, 9,356 square miles. *Desc.* On the eastern side of the Chesapeake, with the exception of a small part of the northern extremity, is an extensive plain, low and sandy, and much intersected by rivers and creeks, having but few springs, and abounding in many places with stagnant water. The Maryland part of the peninsula, included between the Delaware and Chesapeake bays, is much lower and more uniformly level than the Delaware part; it is also more intersected by rivers and creeks, and the land is of better quality. The country on the western shore of the Chesapeake, below the falls of the rivers, is similar to that on the eastern shore. Above these falls, the country becomes gradually uneven and hilly, and, in the western part of the state, it is mountainous. *Rivers.* The Potomac and the Susquehanna. *Pro.* Wheat, Indian corn, hemp, flax, sweet potatoes, honey, maple-sugar, wool, silk, apples, pears, peaches, plums, and cherries, of which there is an abundance. *Minerals.* Copper, iron, coal, lead, cobalt, lime, alum, manganese, and some gold. *Manf.* Cotton and woollen goods; and there are extensive iron-works, besides breweries, distilleries, tanneries, and shipbuilding-yards. *Pop.* about 600,000, of whom a sixth are slaves. *Lat.* between 38° and 39° 44° N. *Lon.* between 75° 10′ and 79° 20′ W.—*In 1634*, Lord Baltimore was the first to colonize this territory.

MARYLAND-IN-LIBERIA, a colony of free blacks, on the W. coast of Africa, founded by the state of Maryland, in the United States. It is partially peopled by emigrants from the United States.

MARYLEBONE, or ST. MARYLEBONE, *mar'-re-le-bon*, a parish of Middlesex, forming the N.W. quarter of London, having Westminster on its S. side and Finsbury on its E. *Pop.* about 60,000.

MARYPORT, *mair'-e-port*, a market-town and seaport of Cumberland, at the mouth of the river Ellen, which divides it into two parts, 7 miles from Cockermouth. The inhabitants are mostly employed in trade and fisheries. The place is greatly resorted to for sea-bathing, exports coals, and has an extensive cotton manufactory, iron-work, glass-house, and salt-works; shipbuilding is also carried on. *Pop.* 6,000.

MASACCIO, Thomas, *ma-sa'-che-o*, a celebrated Italian painter. He was accounted the principal artist of the second age of modern painting, from its revival under Cimabue. Fuseli says of him, "Masaccio was a genius, and the head of an epoch in the art. He may be considered as the precursor of Raffaelle, who imitated his principles, and sometimes transcribed his figures." His most perfect works are the frescoes of S. Pietro del Carmine, at Florence, where vigour of conception, truth, and vivacity of expression, are supported by surprising harmony of colour. B. 1401; D. 1443.

MASAFUERO, *ma'-sa-fwa'-ro*, an island in the South Pacific Ocean, west of Juan Fernandez, wooded and uninhabited. *Ext.* 10 miles in circumference. *Lat.* 33° 45′ S. *Lon.* 80° 46′ W.

MASANIELLO, *ma'-san-e-el-lo*, real name Tommaso Aniello, a fisherman of Naples, who, in 1647, headed an insurrection of his countrymen, besieged the viceroy, the duke of Arcos, in his palace, and compelled him to capitulate. During seven days, Masaniello was master of Naples; but, at the end of that time, he was assassinated by some emissaries of the viceroy, in a riot. His story has been often dramatized, and he forms the hero of two operas, entitled "Masaniello" and "The Dumb Girl of Portici."

MASBATE, *mas-ba'-tai*, one of the Philippine islands, lying due south of the island of Luzon. *Ext.* 70 miles long, with an average breadth of 20.

MASCAGNI, Paul, *mas-kan'-ye*, a celebrated Italian anatomist, who was professor at Siena, Pisa, and Florence, and was elected an associate of the College of France. He completed the fine collection of anatomical preparations contained in the Museum of Florence. Several learned works were produced by him; among the rest, "Universal Anatomy," which appeared after his death, at Pisa, illustrated by many fine engravings, and which is one of the most complete and valuable works of its class. B. in Tuscany, 1732; D. 1815.

MASCALI, *mas-ka'-le*, a town of Sicily, Val di Demona, at the foot of Mount Etna, 15 miles from Catania. It has an active trade in wine, corn, timber, fruit, and lava. *Pop.* 4,000.

MASCARA, *mas-ka'-ra*, a town of Algeria, 45 miles from Oran. *Pop.* 3,300.—This was the residence of Abd-el-Kader, to whom it was ceded in 1841, after being taken and nearly destroyed by the French, in 1835.

MASCAT, or MUSCAT, *mus-kat'*, a large seaport of Arabia, standing on a peninsula in the Arabian Sea. It is the capital of the imanat of Mascat, and, in 1507, was taken by Albuquerque. For nearly 150 years after, it continued in possession of the Portuguese. About the year 1648, however, it was retaken by the natives, who have ever since retained it. It trades with the British settlements in India, the Malay peninsula, the Red Sea, and the east coast of Africa. The government of the Imaum is the most civilized and orderly of any either in Persia or Arabia. Accordingly, Mascat is resorted to as a sort of magazine for goods, by vessels from every port in Persia and Arabia. It carries on a very large trade, by caravans, with the Arabs of the interior. The town is walled round and strongly fortified. The harbour is defended by forts, and a large fleet may moor there in safety. It is the residence of a British consul. *Pop.* estimated at 30,000 or 40,000. *Lat.* 23° 38′ N. *Lon.* 59° 15′ E.

MASCAT, IMANAT OF, comprises the E. portion of the Arabian peninsula, and is both an extensive and a powerful state, having an army of 20,000. The Imaum has unrestricted power, and possesses the most effective naval force of any native prince from the Cape of Good Hope to Japan.

MASCHERONI, Lorenzo, *mas-kai-ro'-ne*, an Italian mathematician, who published notes on the "Integral Calculus" of Euler, and assisted in the experiments performed by the Institute of Bologna, with a view of proving the figure of the earth by the descent of bodies. The invention, however, which has rendered his name conspicuous, was his celebrated *Geometria del compasso*, 'the compass geometry.' B. at Bergamo, 1750; D. at Paris, 1808.

MASCLEF, Francis, *mas'-klai*, a French divine, who devoted himself to the study of the Oriental languages. He wrote grammars of the Hebrew, Syriac, and Chaldee languages, and other works. B. at Amiens, 1662; D. 1728.

MASERES, Francis, *ma'-seir*, an eminent English mathematician, who was descended from an old French family. He was educated at Cambridge, and adopted the law as his profession. After spending some years in America as attorney-general for Canada, he returned to England in 1773, and afterwards became cursitor-baron of the Exchequer, deputy-recorder of London, &c. He was not only an able mathematician, but a most munificent patron of the science. At his own expense, he reprinted many valuable works relating thereto. His own works were, "Elements of Plane Trigonometry," "Principles of the Doctrine of Life Annuities," and an "Appendix to Friend's "Principles of Algebra." Between the years 1791—1807 he published, at his own expense, a collection of works on Logarithms, in 6 large volumes, entitled, "Scriptores Logarithmici." At a later period, he produced reprints of the optical treatises of James Gregory, Descartes, Huygens, Barrow, and Halley. B. in London, 1731; D. at Reigate, 1824.

MASHAM, Mrs. Abigail, *măsh'-ăm*, the favourite of Queen Anne. She was cousin of the duchess of Marlborough, and was by her placed in the queen's service as waiting-maid. She subsequently supplanted the duchess, and obtained a powerful influence over the queen. Harley, afterwards earl of Oxford, entered into an alliance with her, and the pair, during some time, virtually ruled at court. Her husband, Mr. Masham, was raised to the peerage, and both took a large share in the secret negotiation with France for placing the Pretender on the English throne. After the death of the queen, she retired into private life. D. 1734.

MASHAM, a market-town of the North Riding of Yorkshire, on the Ure, 16 miles from Richmond. *Manf.* Woollen yarns and flax. *Pop.* 3,000.

MASIUS, Andrew, *ma-si'-us*, a learned grammarian, who became counsellor to the duke of Cleves. His principal works are, "A Syriac Lexicon and Grammar," and "A Commentary on the Book of Joshua." B. 1516; D. 1573.

MASKELYNE, Rev. Nevil, *măs'-ke-line*, an eminent English astronomer. He was educated at Cambridge, and, in 1755, took orders; but becoming acquainted with Bradley, the astronomer, he assisted him in his scientific labours. In 1761 he made a voyage to St. Helena, to observe the transit of Venus. Four years afterwards, he became astronomer royal, and, in 1767, commenced the publication of the world-famous "Nautical Almanack." In 1790 he gave to the world some of the results of his official labours at the Greenwich Observatory, in a work entitled "A Standard Catalogue of Stars." B. in London, 1732; D. 1811.

MASON, William, *mai'-son*, an English poet and divine, who, in 1748, published a poem, entitled "Isis," which being considered as an attack on the university of Oxford, was answered by Mr. Warton in another, called "The Triumphs of Isis." In 1754 he entered into orders, was appointed chaplain to the king, and presented to the living of Aston, in Yorkshire. He also obtained the precentorship of York cathedral, which leading his mind to church music, he composed a book on that subject. Gray, the poet, appointed him one of his executors; and Mason wrote the life, and published the letters, of his friend. He also composed the epitaph on Gray's monument in Westminster Abbey. In the American war, Mr. Mason showed himself a warm defender of the rebels, as they were termed; for which he was struck out of the list of royal chaplains. The horrors of the French revolution are said to have caused an entire change in his political opinions. His "Elfrida" and "Caractacus," two dramas on the Greek model, are esteemed the best of his works. He also wrote a poem, entitled "The English Garden," and translated into English verse Du Fresnoy's "Art of Painting," to which Sir Joshua Reynolds added valuable notes. B. 1725; D. 1797.

MASON, Sir John, an eminent English statesman. Becoming a favourite with Henry VIII., he was employed in several embassies, and made a member of the privy council. He afterwards served Edward VI., and contrived to hold his places under Mary. Queen Elizabeth made him treasurer of her chamber, and he was chosen chancellor of the university of Oxford. His favourite maxim was, "Do, and say nothing." B. at Abingdon, Berks, about 1500; D. 1566.

MASON, the name of three counties in U.S. 1. In Virginia. *Area*, 372 square miles. *Pop.* 8,000.—2. In Kentucky, on the Ohio. *Area*, 195 square miles. *Pop.* 20,000.—3. In Illinois. *Area*, 468 square miles. *Pop.* 6,000.

MASOVIA, *ma-so'-ve-a*, the name of a former palatinate of the interior of Poland, bounded N. and E. by the Vistula, S. by the palatinates of Sendomir and Kalisch, and W. by Prussian Poland. It is now named the province of Warsaw.

MASQUE DE FER, *mask-de(r)-fair*, or the "Iron Mask," the name of an unknown person in France, who was conveyed in the most secret manner to the castle of Pignerol in 1666, whence he was transferred to the isles St. Margaret in 1686. He was a man taller than ordinary, and extremely well made. His accomplishments were evidently great, and he had a fine taste for music. He always wore a mask, according to some, of velvet, while others assert it to have been of steel, furnished with springs, which was so constructed as to allow him free liberty to eat and drink. His keepers treated him with the greatest respect. At Pignerol he was intrusted to the charge of an officer named St. Mars, on whose appointment as lieutenant of the isles, this unknown personage accompanied him, as he finally did to the Bastille, where he died in 1703, and was buried under the name of Marchiali. Two gentlemen, who were prisoners in the room over him, contrived to hold some conversation with him by means of the chimney, and found that he was a man of general learning; but he informed them that a discovery of his name and rank would be death both to him and them. Numerous conjectures have been formed, and dissertations written, on this historical subject, which, nevertheless, still remains in impenetrable obscurity. It has been conjectured that he might have been the count de Vermondois, son of the duchess de la Vallière, thus imprisoned for having given a blow to the Dauphin; or a twin-brother of Louis XIV., so disposed of to prevent rivalry between the two brothers. This last opinion is that of Voltaire, and would appear to have some support in the Memoirs published by the duke de Richelieu in 1790.

MASSA-CARRARA, *mas'-sa kar-ra'-ra*, a former duchy in the central part of Italy, situate on the S. side of the Apennines, and inclosed on its respective frontiers by Modena, Tuscany, Lucca, and the Mediterranean. It was given to the archduchess Maria Beatrice in 1814, and at her death, in 1829, reunited to Modena. It now forms part of the new kingdom of Italy under Victor Emmanuel II. *Pop.* 57,000.

MASSACHUSETTS, *mas'-sa-chu'-sets*, one of the United States of America, is bounded N. by Vermont and New Hampshire, E. by the Atlantic Ocean, S. by the Atlantic, Rhode Island, and Connecticut, and W. by New York. *Area*, 7,800 square miles. *Desc.* Surface diversified, the western parts being intersected with different ranges of mountains, the middle part is agreeably varied with hill and dale, and the coast indented with bays, studded with islands. The soil is exceedingly various, comprising every description, from the most fertile to the most unproductive. The climate is liable to extremes of heat and cold. *Rivers.* The Connecticut, Pawtucket, and the Merrimac. *Pro.* Indian corn, rye, wheat, oats, barley, peas, beans, buckwheat, potatoes, hops, flax, and hemp. Beef, pork, butter, and cheese are abundant in most parts of the state, and of excellent quality. Orchards, in which are grown apples, peaches, pears, quinces, plums, cherries, and currants. The bays and rivers abound with salmon, mackerel, and other kinds of fish. *Minerals.* Salt, slate, and iron. *Manf.* These consist of almost every article of domestic use in metals, wood, cotton, and woollen goods. The United States have an extensive establishment for the manufacture of firearms. Breweries and distilleries have been long established, and shipbuilding is prosecuted with ardour. The whale-fishery is also carried on with great activity and success by the inhabitants of Nantucket. *Pop.* about 800,000. The colony of Plymouth was first settled in this state by Puritans from England in 1620. It is further distinguished for the leading and spirited part it took in the American Revolution, which resulted in the independence of the Union.

MASSACHUSETTS BAY is on the coast of the United States, between Cape Ann on the N. and Cape Cod on the S. *Ext.* 40 miles long, with a breadth of 20.

MASSACRE ISLAND. (*See* MAOUNA.)

MASSA DI CARRARA, *mas'-sa de kar-ra'-ra*, an episcopal city of N. Italy, 60 miles from Modena. Its principal public buildings are a palace and a cathedral. *Manf.* Silk; and it has a trade in fine marble. *Pop.* 8,300.

MASSAFRA, *mas'-sa-fra*, a strong town of Naples, 10 miles from Otranto. *Pop.* 9,300.

MASSA LOMBARDA, *lom-bar'-da*, a town of Italy, 30 miles from Ferrara. *Pop.* 4,500.

MASSA LUBRENSE, *loo-brain'-sai*, a town of Naples, 13 miles from Naples. *Pop.* 8,500.

MASSAROOMY, or MAZARUMI, *ma'-za-roo'-me*, a river of British Guiana, rising near *lat.* 4° N. and *lon.* 60° W., and entering the estuary of Essequibo. It has been explored 400 miles, and has numerous rapids.

MASSENA, André, *mas'-se-na*, prince of Essling, duke of Rivoli, and marshal of France. He joined a French regiment at an early age, and distinguished himself in the first wars of the Revolution. In 1795 he was promoted to the rank of general of division, and bore a glorious part in the Italian campaigns of Bonaparte. In 1798 he was placed at the head of the army charged to establish the republican government in the Papal States; but both his own soldiers and the inhabitants of the subjected states complaining of his insatiable avarice, he was compelled to resign his command. He remained unemployed until the following year, when he was given the command of the armies of the Danube and Switzerland, and defeated the Russians at the battle of Zurich; thus saving France from invasion. He was next sent to defend Genoa from the attacks of an Austrian army and the English fleet. In 1804 he was nominated marshal of France and duke of Rivoli, and, in the following year, received the command-in-chief of the army of Italy, when he succeeded in driving the archduke Charles before him, and effecting a junction with Napoleon. In 1806 he accompanied Joseph Bonaparte to Naples; and, by defeating the insurgent Calabrians, enabled the latter to take possession of the throne. He commanded the fifth corps in Austria in 1809, and decided the victory at Essling, for which Napoleon created him prince of Essling. He was charged, in 1810, with the task of driving the duke of Wellington out of Portugal, but met a signal failure against the lines of Torres Vedras; and, after a masterly retreat into Spain, he was recalled in 1812. Ill-health prevented his taking part in the Russian campaign; and, in 1813, while commanding a division at Toulon, he declared his adhesion to the Bourbons. After the Hundred Days, he became commander-in-chief of the National Guard of Paris. He was chosen a member of the council of war before which Ney was arraigned, but formed one of the number who pronounced the court to be incompetent. This remarkable general, who was called by Napoleon "the favoured child of Victory," was one of the ablest tacticians of Napoleon's subordinates; but although he possessed in the field all the best qualities of a commander, his talents were obscured by an avarice which was apparently without limit. Disraeli appears anxious to establish the fact that Massena was a Jew. In his "Coningsby" he says, "Several of the French marshals, and the most famous,—Massena, for example, was a Hebrew: his real name was Manasseh." B. at Nice, 1758; D. 1817.

MASSERA, *mas'-se-ra*, an island off the coast of Arabia. *Ext.* 40 miles long, with an average breadth of 15. *Lat.* 20° 30' N. *Lon.* 30° E.

MASSILLON, John Baptiste, *mas'-see-yawng*, a famous French prelate. At the age of 18, he entered the congregation of the Oratory. He acquired a superiority over all the preachers of his time; and Louis XIV. once said to him, "Father, when I hear other preachers I

go away much pleased with them, but when I hear you I go away much displeased with myself." In 1717 he was appointed bishop of Clermont, and, in 1719, admitted a member of the French Academy. His works were printed in 12 vols. in 1746. B. at Hières, Provence, 1663; D. 1742.

MASSINGER, Philip, *măs'-sin-jer*, a celebrated English dramatic author. He was the son of one of the earl of Pembroke's retainers, and was sent to the university of Oxford. By some means, the reason of which is uncertain, he lost his patron's favour, and, quitting the university without a degree, went to London in 1606, where he engaged in dramatic composition until his death. At the outset he appears to have assisted others in writing plays, but, in 1622, he produced an entire play of his own—the "Virgin Martyr." Some of the best of his remaining extant plays are "A New Way to pay Old Debts," the "Maid of Honour," the "Fatal Dowry," the "City Madam," and the "Bashful Lover." B. at Salisbury, 1584; D. 1640.

MASSON, Antoine, *măs'-son*, a celebrated French engraver, who excelled in portraits. His print of the "Disciples at Emmaus," by Titian, is pronounced to be the best engraving after that master. He likewise executed the portraits of the most distinguished men during the reign of Louis XIV. B. at Loury, near Orleans, 1636; D. at Paris, 1700.

MASSON, David, a modern English *littérateur*, who, after completing his education at the university of Edinburgh, went to London, and devoted himself to literature, and was engaged to write articles for the "Edinburgh Review," for "Fraser's Magazine," &c.; the best of which are those on Thackeray, Carlyle, the "Genius of Rabelais," the "Dignity of Labour," "Modern pre-Raphaelitism," Shakspere, Göthe, &c. In 1859 he undertook the editorship of "Macmillan's Magazine." B. at Aberdeen, 1823.

MASUAH, or MUSSOUAH, *mas'-soo-a*, the principal seaport-town of Abyssinia, situate on a small island, separated from the continent by a narrow channel. Some of the houses are of stone, but they are, in general, built of poles and bent-grass. Its intercourse is chiefly with Mocha, Jidda, and Bombay. The imports consist of spices, piece-goods, lead, iron, copper, tin, and European manufactures. The exports are rhinoceros' horns, gold, ivory, honey, slaves, and wax. *Pop.* 12,000. *Lat.* 15° 31′ N. *Lon.* 39° 37′ E. This island belongs to the viceroy of Egypt, who has a governor here.

MASULIPATAM, *ma-sul'-le-pa-tăm*, a seaport-town and district of Hindostan, with a good harbour, 220 miles from Madras. It has been long celebrated for the fineness and brilliant colours of its cotton cloths, called chintzes, and carries on a very considerable traffic with China, Calcutta, Persia, and Arabia. Its port is the only part of this coast not surface-beaten. *Pop.* of town, 25,000. *Lat.* 16° 10′ N. *Lon.* 81° 10′ E.—The DISTRICT has an area of 5,000 square miles, and a population of 550,000. It is watered by the Kistna, and yields rice, tobacco, and cotton.

MATA, *ma'-ta*, a lake of Brazil, in which the river Codo has its rise. It is 160 miles from Maranham, and has a length of 20 miles.

MATAMORAS, *ma-ta-mo'-ras*, a river-port town of the Mexican Confederation, 40 miles from the Gulf of Mexico. *Pop.* Unascertained.

MATAN, *ma-tan'*, one of the Philippines, lying to the E. of Zebu, where Magellan, in a skirmish with the natives, was killed, in 1520.

MATAN, a table-land of Cashmere, India. It has the ruins of a temple, said to have been the most magnificent in the world. *Lat.* 33° N. *Lon.* 75° 20′ E.

MATANZAS, *ma-tan'-thas*, a fortified seaport-town of Cuba, on the N. coast, 60 miles from Havanna. It has a good harbour, and a considerable export trade. *Pop.* 18,000.

MATAPAN, CAPE, *mat'-a-pan'*, the southern extremity of the Morea, Greece. *Lat.* 36° 23′ N. *Lon.* 22° 29′ E.

MATARIEH, *ma-ta-ri'-a*, a village of Lower Egypt, in the province of Ghizeh, on the site of the ancient Heliopolis, 5 miles from Cairo.—Here the Turks were defeated by the French in 1800.

MATARO, *ma-ta-ro'*, a town of Spain, in Catalonia, 17 miles from Barcelona. The Old town is of great antiquity; the New town is built in the modern taste. *Manf.* Calico, laces, silk and cotton stuffs, velvets, ribbons, and silk twist; also canvas and leather. Bay-salt is collected along the shore. *Pop.* 14,000. It has communication by railway with Barcelona.

MATELICA, *ma-tai'-le-ka*, an ancient town of central Italy, 30 miles from Ancona. It is inclosed by walls, and has several churches. *Manf.* Coarse woollen cloths. *Pop.* 7,500.

MATEO, SAN, *ma'-tai-o*, a town of South America, 50 miles from Cumana. *Pop.* 7,000.

MATERA, *ma-tai'-ra*, a town of Naples, on the Gravina, 40 miles from Potenza. It has a cathedral and convents. *Pop.* 12,400.

MATHER, Increase, D.D., *maï'-ther*, an American puritan divine, who, in the time of Cromwell, had a church at Gloucester, but on the approach of the Restoration returned to America. He wrote a "Brief History of the Wars with the Indians in New England," and "Divine Right of Infant Baptism." D. 1723.

MATHER, Cotton, an eminent American divine, was the son of the last-mentioned. He became assistant to his father, and distinguished himself by his piety and learning. In 1710, the university of Glasgow conferred on him the degree of D.D., and, in 1714, he was chosen a member of the Royal Society of London. He wrote a number of books; among which are, an "Ecclesiastical History of New England;" "The Christian Philosopher;" "The Wonders of the Invisible World, being an Account of the Trials of several Witches lately executed in New England;" &c. In this last work, he showed an astonishing degree of credulity. B. at Boston, 1663; D. 1728.

MATHEW, Rev. Theobald, *mă-thu*, the "Apostle of Temperance," was the son of an illegitimate member of the Llandaff family, and was educated for the Roman Catholic priesthood, at St. Patrick's College, Maynooth. After being appointed missionary at Cork, he acquired the greatest respect and consideration from all classes, and established religious societies for visiting the sick and poor. At a later period, he became president of a temperance association at Cork. He then devoted himself to the task of inducing spirit-drinkers to "take the pledge" of abstinence. In a few months, he converted no less than 150,000 in Cork alone. He afterwards made a progress through Ireland, visited Dublin, Liverpool, Manchester, and London, where the same success greeted his philanthropic efforts. A striking proof that he disregarded his temporal interests in the cause he had espoused, was afforded by the fact that a large distillery, owned by his brother, and from which he himself drew almost his whole income, was shut up in consequence of his crusade against alcoholic liquids. In recognition of his services, he was granted a pension of £300 per annum. B. in Tipperary, 1790; D. 1856.

MATHEWS, *mă'-thews*, a county of Virginia, U.S. *Area*, 90 square miles. *Pop.* 7,000.

MATHIAS, Saint, *ma-thi'-as*, one of the twelve apostles, and elected after the death of Judas. He is said to have preached the gospel in Ethiopia, where he suffered martyrdom.

MATHIUS CORVINUS, called the Great, king of Hungary and Bohemia, was the son of John Hunniades. The enemies of his father confined him in prison in Bohemia; but, on regaining his liberty, he was elected king of Hungary, in 1458, when only 15 years of age. His election, however, was opposed by many of the Hungarian lords, who offered the crown to Frederick III. The Turks, profiting by these divisions, invaded the country, but were expelled by Mathias, who compelled Frederick to yield to him the crown of St. Stephen, of which he had obtained possession. The war was afterwards renewed, and Mathias, overrunning Austria, took Vienna and Neustadt; on which the emperor was obliged to make a peace, in 1487. Mathias reformed many abuses, particularly with respect to duels and lawsuits, and was preparing an expedition against the Turks, when he died of an apoplexy, in 1490. B. 1443.

MATIGNON, James de, *ma'-teen-yawng*, prince of Montagne, and count of Thorigni, a famous general of France. He displayed great courage when young, in

several battles, and in 1572 commanded the royal army in Normandy. In 1579 he was made a marshal of France, and assisted as constable at the coronation of Henry IV. B. 1525; D. 1597.

MATILDA, or MAUD, *ma-til'-da*, the daughter of Henry I., king of England, and wife of Henry IV., emperor of Germany, was nominated by her father, in 1135, successor to the English throne; but, in her absence, Stephen, the nephew of Henry, usurped the title. Arriving in England with a large army, in 1139, she defeated Stephen, and was acknowledged queen by a parliament held in 1141. Stephen afterwards defeated the empress; on which the people declared for him, and Matilda was obliged to leave the kingdom. On the death of the emperor, she married Geoffrey Plantagenet, earl of Anjou, by whom she had a son, afterwards Henry II., king of England. B. 1100; D. 1167.

MATILDA-CAROLINE, queen of Denmark, the daughter of Frederick-Louis, prince of Wales, and father of George III. She was married at the age of 15 to Christian VII., king of Denmark; but, having been accused of an intrigue with the minister, Struensee, was divorced and sent into exile. B. 1751; D. at Zell, Hanover, 1775.

MATLOCK, *măt'-lok*, a village of England, in Derbyshire, on the Derwent, 16 miles from Derby. *Manf.* Cotton goods, and there are lead-mines; but the place is chiefly noted for its romantic scenery and hot springs. *Pop.* 4,000.

MATO-GROSSO. (*See* MATTO-GROSSO.)

MATSMAI, *mats'-mai*, a large town, the capital of the island of Jesso, or Yesso. It stands on the S. coast, at the mouth of a river. *Pop.* 50,000. *Lat.* 41° 30′ N. *Lon.* 140° E.

MATSYS, Quintin, *măt'-sis*, an eminent painter, of the Dutch school. He is stated to have been brought up as a blacksmith, which trade he abandoned on falling in love with a young lady, to claim whose hand he studied painting, and became an excellent artist. A Descent from the Cross, in the cathedral of Antwerp, is his masterpiece, and there is a celebrated picture by him, called "The Two Misers," at Windsor Castle. B. at Antwerp, 1460; D. in the same city, 1529.

MATTHEW, or LEVI, *măt'-thew*, the son of Alphæus, an apostle of Jesus Christ, before which he had been a publican (*i. e.* a tax-gatherer, or receiver of tribute). His gospel is supposed to have been written A.D. 64. Some critics think that it was originally written in Hebrew or Syriac, whence it was translated into Greek; but this is mere conjecture. Matthew is said to have been put to death in Parthia, where, and in Persia, he had propagated Christianity with zeal and success.

MATTHEW CANTACUZENUS, *kăn'-ta-ku-zē'nus*, the son of John, emperor of the East, and his associate in the empire in 1354. John abdicated the throne some time after, on which Matthew remained emperor, with John Palæologus. These princes at length disagreed, and had recourse to arms. A battle was fought between them in Thrace, and Matthew being taken prisoner, was compelled to renounce the throne to his rival. He then retired to the monastery of Mount Athos, where he composed commentaries on the Song of Solomon.

MATTHEW of Westminster, an English monk and historian of the 14th century, who wrote a chronicle entitled "The Flowers of History," published at London, in 1567, in which he commences with the creation of the world; but the most valuable portion is that which he devotes to the chronicle of English events from the Conquest to the end of Edward I.'s reign. A translation of the work has been published in Bohn's "Antiquarian Library."

MATTHEWS, Thomas, *măth'-thews*, an English admiral, who commanded in the Mediterranean in 1744, and fought an obstinate but indecisive battle off Toulon, with the combined fleets. Owing to his not being supported by Lestock, his second in command, Admiral Matthews failed to gain a complete victory; and yet for this he was dismissed the service, and Lestock was acquitted. He retired to his estate in Glamorganshire, and died there, 1751.

MATTHIAS, *măth-thī'-as*, emperor of Germany, was the son of Maximilian II., and succeeded his brother, Rodolph II., in 1612. The empire was then at war with the Turks, with whom Matthias concluded a peace in 1615; but the war was renewed in 1618, and continued during thirty years. B. 1557; D. at Vienna, 1619.

MATTHIEU, Peter, *mat'-ye(r)*, a French historian and poet. He was a zealous partisan of the League, and attended Louis XIII. to the siege of Montauban. He wrote "A History of Memorable Events in the Reign of Henry the Great," the History of the death of that monarch, "The History of St. Louis," "The History of France, from Francis I. to Louis XIII." B. 1563; D. 1621.

MATTHISSON, Frederick, *măth'-this-son*, a German poet and prose-writer, who held an appointment as travelling companion to the princess of Anhalt-Dessau. One of his poems, named "An Elegy in the Ruins of an Old Castle," is as popular in Germany as that of Gray with ourselves. He produced, in 1807, a valuable work in 20 volumes, containing extracts from more than 200 writers, entitled "A Lyrical Anthology." B. near Magdeburg, 1761; D. near Dessau, 1831.

MATTO-GROSSO, *mat'-to grot'-so*, a province of Brazil, bounded N. by the province of Para, S. by that of St. Paul, W. by La Plata, and E. by the province of Goyaz. *Area*, 427,000 square miles. *Desc.* Mountainous in the centre, and, in many parts, covered with immense forests, from which it takes its name. *Rivers.* The Paraguay, Cuyaba, Guapore, Tapujos, and Xniga; all of which have their rise in this province, and are tributaries of the Amazon, La Plata, and Araguaya. The country is inhabited by numerous Indian tribes, and, as yet, has been very partially explored. *Lat.* between 7° and 24° S. *Lon.* between 50° and 62° W.

MATURIN, Rev. Charles Robert, *măt'-u-rin*, an Irish divine, who produced several successful novels, and, in 1816, brought out a tragedy, entitled "Bertram," at Drury-Lane theatre. B. in Ireland, 1782; D. 1824.

MATURIN, formerly Orinoco, the largest of the departments of the republic of Venezuela, consisting mostly of extensive uncultivated plains, covered with innumerable herds of cattle. *Pop.* 130,000.

MATY, Matthew, *mat'-te*, an eminent physician, who took his doctor's degree at Leyden, and, in 1740, settled in England. In 1750 he commenced a periodical work, printed at the Hague, called "Le Journal Britannique," giving an account of the principal productions of the English press. In 1758 he was chosen fellow of the Royal Society, to which, in 1765, he became secretary. He also rose to be librarian of the British Museum. The life prefixed to the "Memoirs of the Earl of Chesterfield," and many smaller works, were written by him. B. near Utrecht, 1718; D. 1776.

MATY, Paul Henry, son of the preceding, became chaplain to Lord Stormont, ambassador at Paris, and afterwards one of the librarians of the British Museum, and, in 1778, a secretary of the Royal Society. In 1782 he commenced a literary Review, which was continued till 1786. In 1784, when there were great divisions in the Royal Society, occasioned by the dismissal of Dr. Hutton from the post of foreign secretary, Maty resigned his place. B. 1745; D. 1787.

MAUBAN, *mo'-ban*, a town of the Philippine islands, Luzon, lying to the S. of Manilla. *Pop.* 6,000.

MAUBEUGE, *mo'-be(r)ge*, a fortified town of France, on the Sambre, 13 miles from Mons. *Manf.* Firearms, and iron and steel goods. *Pop.* 8,000.

MAUCHLINE, *mawk'-lin*, a town and parish of Scotland, 10 miles from AYR. *Manf.* Cotton goods and wooden snuff-boxes. *Pop.* of town, 1,500.

MAUDE, St., *mawd*, a town of France, in the department of the Seine, 3 miles from Paris, and now close to its walls. *Pop.* 4,000.

MAUGINO, *mau-zhe'-no*, a town of France, in the department of Hérault, 6 miles from Montpellier. *Pop.* 2,300.—It is on the railway to Nimes.

MAULE, *mawl*, a province of Chili, lying between the departments of Conception and Colchagua. *Area*, about 3,990 square miles. *Pop.* 100,000.

MAULE, a river of the above province, entering the Pacific Ocean in *lat.* 34° 50′ S.

MAULMAIN, or MOULMEIN, *mawl'-main*, a seaport-town of Further India, on the Tenasserim coast, at the mouth of the Salen, 28 miles from Amherst. It was founded in 1825, as a frontier military station. It has a trade chiefly with Calcutta and Madras. *Pop.* about 12,000. *Lat.* 16° 30′ N. *Lon.* 97° 37′ E.

MAUPERTUIS, Peter Louis Mareau de, *mo'-pairt-we*, a celebrated French philosopher, was some time in the military service, which he quitted, and devoted himself to scientific pursuits. In 1723 he became a member of the French Academy, and, about five years after, was chosen fellow of the Royal Society of London. In 1736 he was sent, with other academicians, to the north, to determine the figure of the earth, which service they performed with perfect success. At the invitation of the prince of Prussia, afterwards Frederick the Great, he went to Berlin in 1740, and was appointed president and director of the Academy. He accompanied that king in his campaigns against the Austrians; but exposing himself too much at the battle of Molwitz, he was made prisoner, and sent to Vienna, where he was well received by the emperor. He was soon permitted to return to Berlin, after receiving several marks of the imperial favour. He was of a vain and irritable temper, and had a dispute with Koenig, and another with Voltaire, who exerted his satirical talents against him. This, however, was not much to the credit of the poet, who had before paid the highest compliments to Maupertuis, and from whom he had received no injury to justify his wanton attacks; Frederick, however, ordered the satire to be burnt by the executioner; upon which Voltaire quitted Berlin. His works are,—"The Figure of the Earth determined," "The Measurement of a Degree of Meridian," "Discourse on the Figure of the Stars," "Elements of Geography," "Nautical Astronomy," "Elements of Astronomy," "Reflections on the Origin of Languages," &c. B. at St. Malo, 1698; D. 1759.

MAUR, St., *mor*, a disciple of St. Benedict, and abbot of Glauseuil, in Anjou. D. about 584. At the beginning of the 17th century was founded a congregation of Benedictines of St. Maur, which has produced many learned men.

MAUR, Don Charles le, brigadier in the Spanish army, and director-general of the engineers. He was an excellent mathematician and mechanic, and constructed several canals and other great works. His "Treatise on Dynamics" and his "Elements of Mathematics" are held in great esteem. D. 1785.

MAUR, St., the name of several parishes and towns in France, none of them with a population above 2,000.

MAURE, St., the names of several parishes and towns of France, none of them with a population above 4,300.

MAUREPAS, John Frederic Philippeaux, Count de, *mor'-pa*, a French statesman, who, in 1715, was appointed secretary of state. In 1723 he was made superintendent of the marine, and, in 1738, minister of state. By the intrigues of Madame de Pompadour, he was exiled to Bourges in 1749. He was not recalled till 1774, when Louis XVI. intrusted the public affairs to his management. He entirely remodelled the marine department of his native country, and was a liberal encourager of the sciences; but the part he took in assisting America against England is a reflection on his political prudence. His memoirs, by himself, are curious, but carelessly written: they were printed at Paris in 1792. B. 1701; D. 1781.

MAURICE OF NASSAU, prince of Orange, *mor'-ice*, was the son of William; after whose death, in 1584, he governed the Low Countries, being then only 18 years old. He evinced, however, great courage and talents; and being named captain-general of the United Provinces, established that liberty which his father had begun. He made himself master of Breda in 1590, and this was followed by the capture of Zutphen, Deventer, Hulst, Nimeguen, and Gerturydenburg. He defeated the archduke Albert in 1597, and, in the same year, compelled the Spaniards to abandon the Low Countries. In 1600 he was forced to raise the siege of Dunkirk, but he soon afterwards obtained a great victory over Albert near Nieuport. This was followed by numerous conquests. In 1619, aiming at the sovereignty of Holland, he was opposed by the virtuous Barneveldt, who was sent to the scaffold for resisting the ambition of Maurice. He was one of the greatest captains of his age, but his cruelty to those who opposed his aspirations to absolute power has cast a stain upon his memory. B. 1567; D. 1625.

MAURICE OF SAXONY. (*See* SAXE, Marshal.)

MAURICE, Rev. Frederic Denison, a modern English divine, regarded as the chief of the "Broad Church" party. He was son of a Unitarian clergyman, and was sent to the university of Cambridge, where, although he did not take a degree, he passed his examinations with considerable distinction. After leaving Cambridge, he went to London, and was employed to write for the "Athenæum" upon its being started by Mr. Silk Buckingham. He likewise produced, at the same period, a novel, entitled "Eustace Conyers." His religious views next undergoing considerable modification, he went to Oxford, took his degree there, and became a clergyman of the Church of England. Like Archdeacon Hale and Mr. Kingsley, he has been active in connecting the Church of England with the wants of modern society; and he regards Christianity as the real source of sound social amelioration. His orthodoxy on many doctrinal points has been brought into question, but with every section of the clergy his moral and intellectual worth has been freely admitted. He has written largely on theological matters, and has contributed treatises on Moral and Metaphysical Philosophy to the "Encyclopædia Britannica." He was one of the promoters of the Christian Socialist movement, which had for its object the abolition of the system of competitive labour, and the association of the working classes into small communities, which should undertake work in common, and divide the proceeds. As founder and president of the Working Man's College, he has given considerable advancement to the cause of general education. He held the professorship of divinity in King's College, but resigned the appointment upon the authorities raising objections to his religious views, as developed in his theological essays. B. 1805.

MAURICE, ST., the name of several parishes and towns in France, none of them with a population above 3,000.

MAURICE, St., a river of Lower Canada, rising in a lake, in *lat.* 48° 40′ N., *lon.* 74° 30° W., and, after a course of 200 miles, joining the St. Lawrence at Three Rivers.

MAURITIUS, or the ISLE OF FRANCE, *maw-rish'-e-us*, an island in the Indian Ocean, about 600 miles to the east of Madagascar, and forming a colony of Great Britain. *Area*, 700 square miles. *Desc.* Chiefly consisting of rugged and irregular mountains, rising usually into points or pinnacles. *Pro.* Wheat, maize, yams, and sugar; but it depends for provisions almost entirely upon Bourbon, which is considered as its granary; while it is, on the other hand, the port of Bourbon. The exports consist of coffee, cotton, indigo, raw sugar, and cloves. *Pop.* about 170,000, of whom 10 or 15,000 are whites, the rest negroes and hill coolies. *Lat.* 20° 27′ S. *Lon.* of the S.W. point, 57° 16′ E. In 1505, this island was discovered by the Portuguese, and, in 1598, was taken by the Dutch, who, in honour of Prince Maurice, gave it its present name. In 1810 it came into the possession of the British. It is the scene of the tale of "Paul and Virginia," by St. Pierre.

MAURITIUS, Tiberius, a Roman emperor. After holding several posts at the court of Tiberius Constantine, he obtained the command of the army against the Persians, and distinguished himself so greatly as to obtain the emperor's daughter in marriage. In 582 he was crowned emperor. He re-established Chosroes II. on the throne of Persia, and was engaged in a war with the Arabs, who had ravaged his territories, when his general, Phocas, caused himself to be proclaimed emperor, and having taken Mauritius prisoner at Chalcedon, put him to death, with his five sons, 602. B. in Cappadocia, 539.

MAUROLICO, Francis, *mo-ro-le'-ko*, an Italian mathematician, who was abbot of Santa Maria del Porto, in Sicily, and publicly taught mathematics at Messina. He produced an edition of the "Spherics of Theodosius," and wrote treatises on Astronomical Instruments, the Sphere, Music, Arithmetic, and Cosmography. B. at Messina, 1494; D. 1575.

MAURUS, Terentianus, *maw'-rus*, a Latin poet and grammarian, who flourished under Trajan, and is alluded to with respect by St. Augustine. The only work by him which has survived, is a dissertation on the Art of Poetry.

MAURY, Jean Siffrein, Cardinal, *mor'-e*, a distinguished French orator, who, after pursuing his theo-

logical studies at Avignon, went to Paris in his 18th year, to gain a livelihood by the exercise of his talents. His first works attracted considerable attention; but, being resolved to devote himself to pulpit eloquence, he took orders, and having produced, in 1772, an "Eloge" on Fenelon, he was nominated a vicar-general. He was elected a member of the Academy in 1785, and was sent four years subsequently to the States-general as a deputy of the clergy. He took a prominent part in the debates upon every great question, whether of finance, ecclesiastical affairs, or general administration. A partisan of the aristocracy, his eloquence was constantly brought to bear against Mirabeau, whose most formidable antagonist he became. Upon the closing of the National Assembly, he left France, and went to Italy, when Pope Pius VI. nominated him cardinal, and bishop of Montefiascone. In 1804 he was permitted to return to France, and from that period he became the devoted servant of Napoleon. The latter made him archbishop of Paris in 1810, a dignity he retained until the fall of his master, in defiance of the pope's commands to the contrary. The events of the year 1814 compelled him to again seek a refuge in Italy; whereupon the pope, for his former disobedience, imprisoned him for some months. Cardinal Maury was an acute logician and fluent orator, but he was far from possessing the energy and eloquence of Mirabeau. As a divine, his habits were not a model for imitation. An edition of his works was published at Paris in 1827, under the title of "Select Works of Cardinal Maury." B. in France, 1746; D. at Rome, 1817.

MAURY, Lieutenant Mathew, a distinguished American hydrographer, who, at the age of 19, entered the United States navy as midshipman, and made a voyage round the world, which lasted four years. After his return, he passed his examination, and was appointed, with the grade of lieutenant, to the *Falmouth*. Subsequently, he was charged with the astronomical department of an expedition dispatched to the South Sea. He was next placed at the head of the hydrographical department of the United States Naval Board. In this last position he constructed his "Wind and Current Charts," a work deduced from a great number of nautical journals and logs, and of the highest utility to the seaman. Of a similarly excellent character is his work entitled "The Physical Geography of the Sea," which has been translated into all the European languages, and is full of the most important details. His great services have been acknowledged by all countries having maritime traffic. He is a member of many learned bodies, and has received a gold medal from the emperor of Austria. B. in Virginia, 1806.

MAXENTIUS, Marcus Aurelius Valerius, *măx-en'-she-us*, Roman emperor, was the son of Maximianus Hercules, and declared himself Augustus in 306. He was opposed by Galerius Maximianus, who was defeated, and slew himself. Maxentius then marched into Africa, where he rendered himself odious by his cruelties. Constantine afterwards defeated him in Italy, and he was drowned in crossing the Tiber, 312.

MAXIMIANUS, Marcus Aurelius Herculius, *măx-im-i-ai'-nus*, a Roman emperor, who, from being a common soldier, was associated in the government by Diocletian, in 286. He distinguished himself by his military skill and bravery against the barbarians, and defeated Aurelius Julius, who had assumed the imperial title in Africa. When Diocletian abdicated the crown, in 304, he compelled Maximianus, much against his will, to do the same; but, about a year afterwards, he resumed the dignity, and opposed his son Maxentius. The troops, however, mutinied against Maximianus, who fled into Gaul, where he was put to death by order of Constantine, 310.

MAXIMIANUS, Galerius Valerius, emperor of the East, was originally a shepherd in Dacia, afterwards a soldier, and raised to the imperial dignity by Diocletian, who also gave him his daughter in marriage. He conquered the Goths and Dalmatians, but was defeated by the Persians, over whom he afterwards gained a complete victory. In 305 he compelled Diocletian to abdicate the throne; but his cruelty soon rendered him odious to the Romans, who raised Maxentius to the throne. He was a bitter persecutor of the Christians, whose God he implored for relief in his last illness, after vainly seeking aid from the heathen deities. D. 311.

MAXIMILIAN I., *măx-i-mil'-yan*, emperor of Germany, was son of Frederick III., and was created king of the Romans in 1486. Upon the death of his father, in 1493, he became emperor. He engaged in several wars with France, in most of which he was successful. Forming the design of making himself pope, he, to further his purpose, assumed the ancient title of the Roman emperors, *Pontifex Maximus*, and endeavoured to prevail upon Julius II. to admit him as coadjutor. He united with England against France, and served under Henry VIII. in 1513. He wrote some poems, and the Memoirs of his own life. B. 1459; D. 1519.

MAXIMILIAN II., emperor of Germany, was the son of the emperor Ferdinand I., and elected king of the Romans in 1562. He was chosen king of Hungary and Bohemia, and succeeded his father in 1564. He was a tolerant ruler and a lover of peace, and greatly encouraged the arts and sciences. B. 1527; D. at Ratisbon, 1576.

MAXIMILIAN, duke of Bavaria in the 17th century, was named, on account of his courage and success, the Defender of Germany, and, for his singular prudence, he acquired the name of Solomon. He zealously opposed the Protestants, and was considered as one of the principal supporters of the Catholic religion. In 1620 he gained the battle of Prague, against Frederick, prince palatine, who had been elected king of Bohemia. For these services Maximilian was named an elector of the empire. B. 1581; D. 1651.

MAXIMILIAN-EMANUEL, *e-măn'-u-el*, elector of Bavaria, rendered great service to the emperor Leopold. He signalized himself at the siege of Neuheusel, in 1685; at that of Buda, in 1686; and, the year following, in the battle of Mohacz. He commanded, about this time, the army of Hungary, and took Belgrade, sword in hand, in 1689. He was afterwards governor of the Low Countries; but, taking part with France in the war of the Spanish succession, he was put under the ban of the empire, and, in 1706, deprived of his estates, regaining them at the general peace. B. 1662; D. at Munich, 1726.

MAXIMILIAN-JOSEPH, *jo'-sef*, king of Bavaria, succeeded his uncle, Charles-Theodore, in 1799. Attaching himself to the fortunes of Napoleon, he gave his daughter in marriage to Eugene Beauharnais, in 1806. In the same year his duchy was erected into a kingdom. In 1813, however, he formed a member of the league against the emperor, and, by that proceeding, retained his throne after the fall of Napoleon. His reign was marked by a great number of reforms in the administration of his kingdom. B. 1756; D. 1825.

MAXIMIN, St., *max'-i-mă*, a town of France, in the department of the Var, 10 miles from Brignoles. *Manf.* Principally woollen cloths. *Pop.* 4,000.

MAXIMINUS, Caius Julius Verus, *max-i-mi'-nus*, emperor of Rome, was the son of a Thracian peasant, and having displayed great courage in the Roman armies, he rose to command. On the death of Alexander Severus, he caused himself to be proclaimed emperor, 235. He was a great persecutor, and put to death above 4,000 persons, on suspicion of their being concerned in a conspiracy against him. His stature and strength were very extraordinary, and his disposition proportionably brutal. The most extraordinary stories are related of his appetite and physical powers. Capitolinus, in his "Historia Augusta," relates that forty pounds of meat and eighteen bottles of wine were his ordinary allowance for a day. His strength was such that he is said to have stopped a chariot in full speed with one of his fingers. He was killed in a revolt of his soldiers, 238.

MAXIMUS, Magnus, *măx'-i-mus*, a Spaniard, was general of the Roman army in Britain, when he proclaimed himself emperor, 383. Gratian marched against him; but was defeated near Paris, and afterwards assassinated at Lyons. Maximus, having made himself master of Gaul, Britain, and Spain, fixed the seat of his empire at Treves. He next marched into Italy, where he committed dreadful cruelties; but was at last besieged in Aquileia, by the emperor Theodosius. His soldiers delivered him up to Theodosius, who ordered him to be beheaded, in 388.

MAXIMUS OF TYRE, a Platonic philosopher, who visited Rome in 116, but died in his own country, in the reign of Commodus. Forty-one of his discourses are extant, the best edition of which is that of Reiske, 1774. They have been translated into French by Formey, but have never been reproduced in English.

MAXIMUS THE CYNIC, and tutor of Julian the Apostate, was a native of Ephesus. He professed magic, initiated Julian into the Eleusinian mysteries, and assured him of success in his Persian expedition; he also flattered that prince by saying that the soul of Alexander had passed into his body. Maximus was put to death by the emperor Valens, in 366.

MAXWELL, Lord Robert, *măx'-wel*, one of the lords of the regency that governed Scotland in 1536, while James V. was absent in France upon a matrimonial expedition. At a subsequent period, taking offence at the appointment of Oliver Sinclair to the command of the army, he, with many of the Scottish nobility, surrendered to the English at Solway Moss. After the death of James V. he was ransomed, and returned to his native country, where, in 1543, he presented to the Lords of Articles a bill for the authorization of the Scriptures to be read in the vulgar tongue; an act which formed one of the most important of those which preceded the Reformation. The measure became law, despite the energetic opposition of Cardinal Beaton and the hierarchy. Lord Maxwell was soon afterwards apprehended, at Beaton's command, but contrived to effect his escape. D. 1546.

MAXWELLTOWN, *măx'-wel-town*, a borough and barony of Scotland, in Kirkcudbright, on the Nith, opposite the town of Dumfries, with which it communicates by two bridges. *Pop.* 4,000.

MAY, *mai*, a small island of Scotland, in the mouth of the Firth of Forth, 6 miles from Fifeness. It is about a mile long, and has a ruined quay, and a light-house 240 feet above the sea.

MAY, a small river of Scotland, in Perthshire, falling into the Erne.

MAY, a river of Wales, in Caernarvonshire, falling into the Irish Channel.

MAY, Thomas, an English dramatic poet and historian, was educated at Cambridge, after which he entered of Gray's Inn, where he wrote some plays, and translated several authors, particularly Lucan's "Pharsalia." Charles I. employed him in writing two historical poems; one on the life of Henry II., and the other on the reign of Edward III.; but, in the civil war, May joined the parliament, and was appointed their secretary and historiographer. He published the History of the Parliament which began in 1640, and a "Breviary of the History of the Parliament of England," 1650. He is said to have written five plays, two of which are printed in Dodsley's collection. B. 1595; D. 1650.

MAYAGUEZ, *mai'-a-gwai*, a town and port of the island of Portorico, 70 miles from St. Jean de Portorico. *Pop.* Unascertained.—The adventurer Ducondray took this town in 1822, and made the attempt to establish an independent republic.

MAYEN, *mi'-en*, a town of the Prussian province of the Lower Rhine, 16 miles from Coblentz. *Manf.* Woollen cloth and paper. *Pop.* 5,500.

MAYENCE, *mai'-yence*, a fortified city of Germany. (*See* MENTZ.)

MAYENNE, *mai'-yen*, a department of France, comprising the N.W. portion of the province of Maine and part of Anjou. It is bounded by the departments of the Orne, Sarthe, Maine, and Loire. *Area*, 2,010 square miles. *Rivers.* The Mayenne, the Colmont, and the Oudon. *Desc.* Generally flat, but fertile. The vine is cultivated to a small extent, and cider and perry are extensively made. Lint and hemp are grown, and the forests abound with excellent timber. *Pop.* 375,000.

MAYENNE, a town of France, in the above department. *Manf.* Linen, thread, and woollen goods. *Pop.* 10,000.

MAYENNE, a river of France, rising in the department of Orne, and joining the Loire near Angers.

MAYENNE, Charles of Lorraine, Duke of, second son of Francis of Lorraine, duke of Guise. He displayed great courage at the sieges of Poitiers and Rochelle, and at the battle of Moncontour; he also defeated the Protestants in Guienne, Dauphiny, and Saintonge. When his brothers were killed, at the meeting of the States at Blois, he declared himself head of the League, and assumed the title of lieutenant-general of France. He proclaimed the cardinal of Bourbon king, by the name of Charles X.; but was defeated by Henry IV. at the battle of Arques, and again at Ivry. In 1599 he was reconciled to the king, who made him governor of the Isle of France. B. 1554; D. 1611.

MAYER, John Frederick, *mi'-er*, a Lutheran divine, who became superintendent of the churches of Pomerania, and professor at Stettin. His greatest work is the "Bibliotheca Biblica," printed in 1713. Besides this, he wrote "A Treatise on the Method of Studying the Holy Scripture," "Dissertations on Particular Parts of the Bible." B. at Leipsic, 1650; D. 1712.

MAYER, Tobias, a celebrated German astronomer, who was self-taught, and, by his own application, acquired a knowledge of the Latin language. In 1750 the university of Göttingen appointed him mathematical professor. Mayer made several discoveries in geometry and astronomy, and published some excellent works, the chief of which are his "Table of Refractions," "Theory of the Moon," and "Astronomical Tables and Precepts;" for which last the English Board of Longitude gave his widow £3,000. B. at Würtemberg, 1723; D. at Göttingen, 1762.

MAYHEW, Henry, *mai'-hu*, a modern English *littérateur*, whose father, a solicitor in good practice, sent him to Westminster school, whence he twice ran away, and subsequently made a voyage to Calcutta on board a ship of war. Returning to England, he served three years in his father's office as articled clerk. He next spent some time in Wales, and, on his return to London, commenced his literary career. With his old schoolfellow Mr. Gilbert A'Beckett, he took the Queen's Theatre, in London, and there produced his first farce, called "The Wandering Minstrel." About the same time he started the comic publication "Figaro in London;" he was also the chief originator of "Punch," which was commenced in 1841, and of which he was for a long time the editor. Between the years 1846—1851, he published, in conjunction with his brothers Horace and Augustus, a series of humorous tales, which became very popular. Some of these were entitled "The Greatest Plague of Life; or, the Adventures of a Lady in Search of a Servant," "Whom to Marry, and How to get Married," "The Image of his Father," and "The Adventures of Mr. and Mrs. Sandboys and Family at the Great Exhibition of 1851." Mr. Mayhew's most important work was that produced in 1851, entitled "London Labour and London Poor; a Cyclopædia of the Condition and Earnings of those that will Work, those that cannot Work, and those that will not Work." The large amount of information contained in this work, derived from personal observation, and the remarkable insight into the condition of the lower classes it afforded, excited considerable attention at the time; but its publication was discontinued, in consequence of the claims of contending parties causing it to be thrown into the court of Chancery. Of a similar character was "The Great World of London," commenced by Mr. Mayhew in 1856, but which, like its predecessor, came to a sudden termination. He has likewise written a couple of excellent books for boys; one, founded on the life of Sir Humphrey Davy, called "The Wonders of Science;" the second, entitled "The Peasant-Boy Philosopher," being based upon the life of James Ferguson. B. in London, 1812.—His brothers Horace and Augustus, besides assisting in the composition of several of the above-mentioned works, have been the authors of a number of tales and sketches of a broadly humorous character, which have enjoyed a considerable share of popularity. The excellent novel entitled "Paved with Gold" was commenced by Henry and Augustus in collaboration, but was soon afterwards continued and conducted to a most effective termination by Augustus alone. Horace has been for many years a principal contributor to the pages of "Punch."

MAYN. (*See* MAIN.)

MAYNE, Jasper, *main*, an English divine and poet, who was educated at Westminster school, whence he removed to Christ Church, Oxford, of which he became student. In 1648 he was created D.D., and two years afterwards was deprived of his studentship for his

loyalty. At the Restoration he was promoted to a canonry of Christ Church. Mayne was a man of considerable wit and humour, which he often carried to some excess, particularly in his will, wherein he left his servant-man, who was fond of tippling, an old trunk, in which, says he, there is something to make him drink. The man eagerly sought for his legacy, and, on opening the trunk, found a *red herring*. Dr. Mayne wrote some poems, now obsolete, sermons, and two plays, called the "City Match" and "The Amourous Warre," the latter of which was a satire upon the Puritans. B. in Devonshire, 1604; D. at Oxford, 1672.

MAYNOOTH, *mai-nooth'*, a neat modern-built town of Ireland, county of Kildare, 15 miles from Dublin. It has a college, instituted in 1795, for the education of the Irish Roman Catholic clergy. It accommodates 450 students, 250 of whom are maintained free. *Pop.* 2,200.—The Maynooth grant of £30,000 annually has created much dissatisfaction to some Protestants.

MAYO, *mai'-yo*, a maritime county of Ireland, in the province of Connaught, bounded S. by Galway, W. by the Atlantic Ocean, N. by Sligo, and E. by Roscommon. *Area*, 2,131 square miles. *Gen. Desc.* The soil varies greatly, from the bleak and rugged mountain to the fertile and cheerful plain. The best lands are almost exclusively occupied in grazing. The lakes are Loughmask, Carra, Raheens, and Loughconn; besides numerous smaller ones, which, in a district less watered, would be deemed considerable. The most extensive rivers are the Moy, the Guishenden, the Deal, the Owenmore, the Awenmore, the Robe; besides other inferior streams. The coast is lined with islands, and possesses excellent harbours and bays; such as Killery, Newport, Blacksod or Clegg Bay. *Pro.* Flax, oats, and potatoes. *Pop.* 275,000.

MAYO, one of the Cape de Verd islands, off the W. coast of Africa, lying E. of Santiago. *Ext.* 21 miles in circumference. It abounds in salt, but water is extremely scarce. *Pop.* Unascertained. *Lat.* 15° 10′ N. *Lon.* 23° 8′ W.

MAZAMET, *ma'-za-mai*, a town of France, in the department of the Tarn, 10 miles from Castres. *Manf.* Woollen-weaving and cloth fabrics. *Pop.* 10,000.

MAZANDERAN, *ma-zan-de-ran'*, a province of Persia, lying along the S. shore of the Caspian Sea, having Khorassan on the E. and Irak-Ajemi on the S. *Area*, estimated at 10,000 square miles. *Desc.* Generally flat and swampy, producing cotton, fruits, rice, and silk. *Pop.* 150,000.

MAZARIN, Julius, *maz'-a-rĭn*, a Roman cardinal and minister of state to Louis XIV. of France. Being appointed nuncio-extraordinary to France, he acquired the friendship of Richelieu and the confidence of Louis XIII. In 1641, Pope Urban VIII. made him cardinal, and, on the death of Richelieu, Louis appointed him minister of state. He was also nominated one of the executors of the king's will, and had the principal management of affairs during the minority of Louis XIV.; but at length the murmurs of the people rose so high against him, that he found it expedient to quit the kingdom, and a price was set on his head. He afterwards recovered his power, and continued to render the state the most important services, the principal of which was the restoration of peace between France and Spain, in 1659. His application to business produced a disease, which caused his death. B. 1602; D. 1661.—His letters have been published in 2 vols.—One of his nieces, Hortense Mancini, duchess of Mazarin, was celebrated for her wit and beauty. She married, in 1661, the duke de la Meilleraie, from whom she separated, and went to England, where she was surrounded by a crowd of admirers, but particularly patronized St. Evremond. D. in London, 1699.

MAZEENA, *ma-zee'-na*, a fort of Afghanistan, 15 miles from Jelalabad, near which the Afghans were defeated by the British in 1842.

MAZEPPA, *ma-zep'-pa*, hetman or commander-in-chief of the Cossacks of the Ukraine. He was the son of a Polish gentleman, and became a page at the court of John Casimir, king of Poland. After his return to his native province of Podolia, he engaged in an intrigue with the wife of a neighbouring lord, who surprised him and caused him to be bound naked upon the back of a wild horse. The frightened animal ran with his burden until it reached the country of the Cossacks of the Ukraine, where Mazeppa was released and restored to health. He subsequently adopted their course of life, and rose by degrees to the rank of their hetman. In that capacity he displayed great energy and talent, and succeeded in gaining the esteem of the Czar Peter, who appointed him prince of the Ukraine. Being desirous, however, of rendering himself independent, Mazeppa fought against the Czar, and enlisted his forces under the banner of Charles XII. at the battle of Pultawa. After the defeat of the Swedish king, he took refuge first in Wallachia, and afterwards at Bendar. His extraordinary life forms the subject of one of Lord Byron's poems. B. about the middle of the 17th century; D. in Turkey, 1709.

MAZZARA, *mat-sa'-ra*, a town of the island of Sicily, on the S.W. coast, 25 miles from Trepani. It has numerous churches and convents, a senate-house, bishop's palace, college, theatre, and hospital. *Pop.* 8,500.

MAZZARA, VAL DI, an old province of Sicily, formerly comprising the W. part of the island, now subdivided into the provinces of Girgenti, Trepani, and part of Palermo and Caltanisetta.

MAZZARINO, *mat-sa-re'-no*, an inland town of Sicily, in the Val di Noto, 13 miles from Caltanisetta. It has a college. *Pop.* 11,000.

MAZZINI, Giuseppe, *mat-se'-ne*, a modern Italian politician, who was educated for the law; but being inspired with an enthusiastic love of liberty, he abandoned his profession, soon after he had commenced its practice. Allying himself with a small circle of ardent Genoese gentlemen, he became the soul of a movement which had for its object the regeneration of Italy. In furtherance of their ideas, these young Genoese established a literary journal, which was soon suppressed, but was again commenced at Leghorn. In 1830 he became an active member of the secret society called the Carbonari, but being denounced to the police, was arrested. After a detention of six months, he was set at liberty, on the understanding that he should quit Italy. He took refuge at Marseilles, and founded there a journal and a society, both of which were significantly named "Young Italy." The main idea of both was that "the freedom of Italy, both from domestic and foreign tyranny, could only be attained by a union of all the separate states into one nation,—Romans, Piedmontese, Tuscans, Neapolitans, Lombards, Venetians, &c.—all merging their separate interests in the one common name of Italians, and under this name forming a single powerful European nation." The precise form of government was to be decided by circumstances; Mazzini himself preferred the republican. After months of secret plotting, a conspiracy was organized, which, from Genoa as a centre, spread through all Italy, from the Alps to the extremity of Sicily, and even the officers and soldiers of the Piedmontese and Neapolitan armies were concerned in it. This formidable organization was discovered, however, and a great number of the chief agents therein either lost their lives or sought safety in flight. This took place in 1833, and from that year until 1848, Mazzini was mainly employed in a propagandism of his ideas throughout the Italian peninsula. He resided in France, in Switzerland, and was expelled from both countries in turn; upon which he went to London, always keeping up a close correspondence with his party in Italy. In 1844 Sir James Graham, then home secretary, authorized the opening of several letters in the post-office. It was thereby ascertained that the brothers Bandiera were plotting an insurrection in the Venetian states. This was communicated to the Austrian government, and the lives of the Bandieras were lost in consequence. After the French revolution of 1848, and the insurrection at Milan, Mazzini went to Italy with the view of giving a turn to the great Italian movement in conformity with the ideas he had so long advocated. After the defeat of Charles Albert, and the consequent re-establishment of the Austrian rule in Italy, Mazzini was accused of nullifying the king's efforts by causing the republican party to keep aloof from him. He next travelled about in Garibaldi's wake, and, in 1849, went to Rome. The pope had fled before his arrival, and an assembly, elected by universal suffrage, had passed decrees for the total abolition of the temporal sovereignty of the pope, and for the

creation of the Roman states into a republic. Mazzini's advent at this crisis was met with the acclamations of the Romans. With Saffi and Armellini, he was appointed triumvir, and charged to defend the republic against its enemies. The French, under General Oudinot, landed soon afterwards at Civita Vecchia. It was generally believed that the French would be allowed to enter Rome without impediment; but Mazzini and his great ally, Garibaldi, prepared for a desperate resistance. Garibaldi had only 14,000 regular troops under his command; he nevertheless maintained the city against the invaders during two months, with an obstinate bravery, that excited the astonishment and admiration of Europe. On the entrance of the French, Mazzini returned to England and resumed his pen. His ideas were promulgated as zealously as before, and on many occasions he expressed his perfect belief in the early occurrence of that explosion which has just taken place. The expulsion of the Austrians from Lombardy, and its annexation to Piedmont, again opened up the field for the labours of Mazzini. He went to Italy to give a personal weight to his doctrines, and although his acts at Naples during recent events would appear to be calculated to retard the great Italian struggle for liberty, yet, when we observe the high esteem in which the noble Garibaldi holds him, and also remember how earnestly, persistently, and eloquently he has preached the unification of Italy and the expulsion of its oppressors, we cannot withhold our sympathies from one who must be regarded as a pure-minded and patriotic man. B. at Genoa, 1808.

Mazzuoli, Francis, *mat'-soo-o'-le*, commonly called Parmigiano, a famous Italian painter, who has also been named as the inventor of the art of etching. He had an admirable genius for painting; his invention was ready, and he had a peculiar talent in giving grace and sweetness to his figures. B. at Parma, 1504; D. 1540.

Meaco, or Miako, *me-a'-ko*, a great city of Niphon, in Japan, formerly the metropolis of the whole empire, and still the ecclesiastical capital, and the residence of the *dairo*, or spiritual sovereign, 240 miles from Jeddo. It is situate in a wide plain inclosed by mountains. Some of the temples are of extraordinary magnificence, and the imperial palace forms a city by itself. It is the centre of all the literature and science of the empire. *Manf.* Japan-work, painting, carving, &c. *Pop.* Variously estimated, from 500,000 to 1,000,000. *Lat.* 35° 24′ N. *Lon.* 153° 30′ E.

Mead, Richard, *mede*, a celebrated English physician, who studied under Grævius, at Utrecht, after which he removed to Leyden, and contracted a close intimacy with Boerhaave. On completing his studies in that celebrated school of physic, he went to Italy, and took his doctor's degree at Padua. In 1696, he returned to his native country, and commenced the practice of physic at Stepney, where he resided seven years. In 1702 he published his treatise on Poisons, which procured him considerable reputation. In 1704 he was admitted a member of the Royal Society, of which, in 1707, he became vice-president, and, in 1727, he was appointed physician to George II. He was, also, author of "A Discourse concerning the Plague," a treatise "On the Scurvy," and "Medicina Sacra." His works were very popular at the time, and have been translated in Italy, France, and Germany. B. in London, 1673; D. 1754.

Meangis Islands, *me-an'-gis*, a group in the Asiatic archipelago, 90 miles from Mindinao. Its principal island is Nanusa. *Lat.* 5° N. *Lon.* 127° E.

Mearns, *meerus*, the popular name of the county of Kincardine, Scotland.—Also a parish 3 miles from Paisley, *Pop.* 4,000.

Meath, *meeth*, a maritime county of Ireland, in the province of Leinster, bounded N. by the counties of Cavan, Monaghan, and Louth; E. by the Irish Channel and the port of Dublin; S. by the county of Kildare; and W. by Westmeath. *Area*, 906 square miles. *Desc.* It consists, in general, of rich flat pasture-land, having few bogs or hills, and these but of inconsiderable height. It is noted for grazing and tillage. There are a number of dairy-farms, especially in the S.E. part. Some marshes on the Moynalty river feed an immense number of horses in the summer season; and the Kilcrew Hills, in the W. angle, adjoining Cavan, are remarkable for fattening sheep. *Rivers.* The principal are the Boyne, the Blackwater, the tributary streams of the Nanny, the Ryewater, and Moynalty. *Pro.* Wheat, oats, barley, rye, clover, flax, and potatoes. *Manf.* Dowlas, sacking, and coarse linen. In the N.W. parts, linen of a finer texture is made. *Pop.* 141,000.

Meaux, *mo*, a town of France, in the department of the Seine-and-Marne, 25 miles from Paris. It stands on the Marne, and is divided into two parts by that river. The principal public building is the cathedral, the choir of which passes for a masterpiece of Gothic architecture. Here is the tomb of Bossuet, bishop of Meaux. It has some trade in corn and cheese. *Pop.* 10,000.—After a siege of several months, this place was taken by the English, in 1520. It is a station on the railway to Strasburg.

Mecca, *mek'-ka*, a city of Arabia, capital of the province of Hedjas, and of the district Belud-ul-Haram. It is situate in a narrow valley, about a day's journey inland from the Red Sea. The houses follow the windings of the valley, and are built partly on the declivities upon each side. The streets are regular and rather handsome, being level and convenient, and the fronts are extremely neat. This handsome external appearance is carefully preserved, as the livelihood of the inhabitants depends much on the letting of apartments to pilgrims, who flock to this place from every part of the Mahometan world, extending on one side to the frontier of China, and on the other to the states on the Niger. This resort has now greatly diminished; still many thousands annually repair to the holy Mount Arafat, where Mahomet prayed. It is 3 miles distant from the city, which must be visited, at least, once in their lives by all good Mussulmans. The chief ornament of the place is the famous temple, in the interior of which is the Kaaba, or the house of the Prophet. This is contained in a square, which is entirely surrounded by the temple. The most sacred relic in the Kaaba is the black stone said to be brought by the angel Gabriel, to form the foundation of the edifice. *Pop.* Probably 50,000. *Lat.* 21° 18′ 9″ N. *Lon.* 40° 15′ E.—This is the birthplace of Mahomet, and the cradle of the Mussulman creed. In 1804 and 1807 it was taken by the Wahabees, and, in 1813, by Ibrahim Pasha.

Mechain, M., *mek'-ă*, an eminent French astronomer, whose great merits were first discovered by Lalande. In 1782 he gained the prize of the Academy for his memoir on the comet of 1661, which was expected to return in 1790. He became editor of the "Connaissance des Temps," which work he improved. In 1792 he was employed in the great work of measuring the arc of meridian between Dunkirk and Barcelona. He returned from it in 1798; but wishing to extend it as far as the Balearic Isles, he set out for them in 1803; but death prevented his accomplishment of the task. B. in France, 1774; D. 1805.

Mechitar, or Mekhitar, *mek'-hi-tar*, the founder of the order of Mechitarists, and reviver of Armenian literature. In 1691 he entered an Armenian convent at Sebaste, and subsequently became secretary to Archbishop Michael. Meeting with a work by an Italian priest on the reconciliation of the Armenian church with that of Rome, he secretly became a proselyte to the latter church. In 1700 he sought to reconcile the two parties of the Armenian priesthood at Constantinople; but, meeting with little success, he openly preached submission to the pope. The Armenians were so enraged at this, that, to save his life, Mechitar was compelled to fly from the city. He went first to Smyrna, and afterwards to the Morea, then under the dominion of Venice. On the conquest of the Morea by the Turks, he went to Venice, where he was permitted to found a convent, wherein he set up a printing-press, which, in his hands and in those of his followers, has produced hundreds of volumes in the form of Armenian translations of the best works in European literature. The Armenian missionaries are an increasing body at the present day, and, in addition to the Venetian establishments, have branches at Paris and Constantinople. Mechitar published an Armenian Bible in 1733, and an Armenian Grammar and Dictionary. B. at Sebaste, Cappadocia, 1676; D. 1749.

MECHLIN, or MALINES, *mek'-lin*, or *ma'-leen*, a town of Belgium, in the province of Antwerp, and divided by the Dyle into two parts. It is 14 miles from Antwerp. The streets are broad, and bordered in many places by good buildings. The public square and the market-place are both spacious and regular, whilst the cathedral has a tower 370 feet high, and contains "The Last Supper," by Rubens. The interior is elegant. The other buildings are the arsenal, the town-house, a Franciscan monastery, and an asylum for 800 widows and elderly women. *Manf.* Fine Brabant lace and linen, besides damask, and silk and woollen stuffs, shawls, and tobacco. It has likewise breweries. *Pop.* 30,000.—This is the central station for the railways which traverse Belgium in all directions.

MECHOATAN, *mek'-o-a-tan'*, a maritime state of the Mexican Confederation, having the Pacific on its S.W., and on its other sides the states of Kalisco, Guanaxuato, Mexico, and Querertaro. *Area*, 23,000 square miles. *Desc.* Diversified with hills and plains, but fertile, and interspersed with numerous lakes. *Pro.* Wheat, maize, indigo, hemp, flax, aloes, cotton, and sugar. *Manf.* Unimportant. *Pop.* 450,000, mostly Indians and Catholics. *Lat.* between 18° and 21° N. *Lon.* between 100° and 104° W.

MECKLENBURG, *mek'-len-berg*, a county of Virginia, U.S. *Area*, 685 square miles. *Pop.* 20,443.—Another in Carolina. *Area*, 578 square miles. *Pop.* 14,000.

MECKLENBURG-SCHWERIN, *mek'-len-boorg-shver'-in*, a grand-duchy in the north of Germany, bounded N. by the Baltic, E. and S. by Prussia, and W. by Denmark. *Area*, 4,845 square miles. *Pop.* 545,000.—This duchy was formerly a part of Lower Saxony.

MECKLENBURG-STRELITZ, *strel'-itz*, is comprised in two parts, separated by Mecklenburg-Schwerin. The one is called the duchy of Strelitz,—*area*, 628 square miles, *pop.* 85,000; the other is the principality of Ratzburg,—*area*, 140 square miles, *pop.* 17,000.

MEDE, Joseph, *meed*, a learned English divine, who, in 1602, entered of Christ's College, Cambridge, where he studied with intense application, was chosen fellow, and proceeded to his degree of bachelor in divinity. He refused several preferments, particularly the provostship of Trinity College, Dublin, which was repeatedly offered him by Archbishop Usher. His works were collected into one volume folio, and published in 1672. The principal is his "Commentary on the Apocalypse," in explaining which his plan has been followed by Bishops Newton and Hurd, and a number of other great divines. B. at Berden, Essex, 1586; D. 1638.

MEDEA, *me-de'-a*, a celebrated magician, daughter of Æetes, king of Colchis, and the niece of Circe. When Jason came to Colchis in quest of the golden fleece, Medea became enamoured of him, and it was to her arts that the Argonauts owed their preservation. (*See* JASON and ARGONAUTÆ.) Medea had an interview with her lover in the temple of Hecate, where they bound themselves by the most solemn oaths, and promised eternal fidelity. No sooner had Jason overcome all the difficulties which Æetes had placed in his way, than Medea embarked with the conquerors for Greece. To stop the pursuit of her father, she tore to pieces her brother Absyrtus, and left his mangled limbs in the path through which Æetes was to pass. When Jason reached Iolchos, the return of the Argonauts was universally celebrated; but Æson, the father of Jason, was unable to assist at the solemnity, on account of the infirmities of his age. Medea, at her husband's request, removed the weakness of Æson, and, by the juice of certain herbs, restored him to the vigour of youth. Her conduct, however, to the daughter of Pelias, and her refusal to bring Pelias to life after they boiled his flesh in a caldron, greatly irritated the people of Iolchos, and Medea, with her husband, fled to Corinth, to avoid the resentment of an offended populace. Here they lived for ten years; but the love of Jason for Glauce, the king's daughter, soon interrupted their mutual harmony, and Medea was divorced. Medea revenged the infidelity of Jason by causing the death of Glauce and the destruction of her family. (*See* GLAUCE.) This act was followed by another more atrocious. Medea killed two of her children in their father's presence, and when he attempted to punish the barbarity, she fled through the air upon a chariot drawn by winged dragons. From Corinth Medea went to Athens, where she married king Ægeus. From her connection with Ægeus, Medea had a son, who was called Medus. She fled at length from Athens, after having attempted to poison Theseus at a feast, and went to Colchis, where, according to some, she was reconciled to Jason, who had sought her in her native country, after her sudden departure from Corinth. The story of Medea's life has furnished a subject for both ancient and modern tragic writers; Euripides, Seneca, and Corneille being the principal.

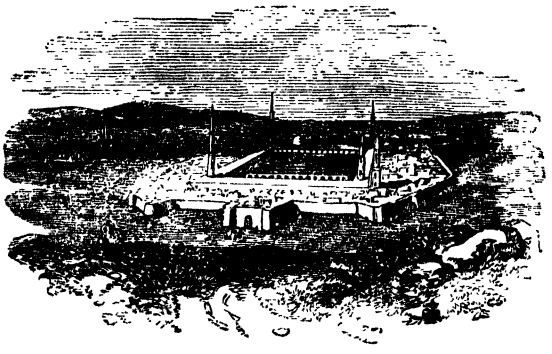
MEDEAH, *me'-de-a*, a fortified town of Algeria, 40 miles from Algiers. *Pop.* 4,600. In 1830 this town was taken by the French. Before that event, it was the residence of the bey of Titteri.

MEDEBACH, *med'-e-bak*, a town of Prussian Westphalia, 32 miles from Arnsberg. *Manf.* Woollen goods. *Pop.* 2,500.

MEDELLIN, *mai-dail'-leen*, a town of S. America, New Grenada, 50 miles from Antioquia. It is an entrepôt of a vast district of country. *Pop.* 14,000. This city is upwards of 5,000 feet above the level of the sea.

MEDICI, Cosmo, *med'-e-che*, called the Elder, and the father of his country, founder of an illustrious family at Florence, was a merchant, who acquired great wealth, which he appropriated to the noble purposes of advancing learning and supporting learned men. He collected a noble library, which he enriched with inestimable manuscripts. The envy excited against him by his riches, raised him many enemies, by whose intrigues he was obliged to quit his native country. He then retired to Venice, where he was received as a prince. His fellow-citizens afterwards recalled him, and he bore a principal share in the government of the republic of Florence, during thirty-four years. On his tomb was engraved this inscription: "The Father of his People, and the Deliverer of his Country." B. 1389; D. 1464.

MEDICI, Lorenzo de', surnamed the Magnificent, was the son of Peter, grandson of Cosmo, and brother of Julian de' Medici. These two brothers, who enjoyed an almost absolute power in Florence, were viewed with a jealous eye by Ferdinand IV., king of Naples, and Pope Sixtus IV. At their instigation the potent family of Pazzi formed a conspiracy against the Medici in 1478, and Julian was assassinated as he was attending mass. Lorenzo was also wounded, but escaped with his life, and was conducted to his palace by the people, with loud acclamations of joy. Having inherited the great qualities of his grandfather Cosmo, he was accounted the Mæcenas of his age. It was a singular but noble spectacle to observe the citizen engaged in commerce on the one hand, and managing public affairs on the other; now entertaining merchants, and next receiving ambassadors; giving public shows to the people, and erecting asylums for the sick and unfortunate; ornamenting his country with magnificent buildings and sending learned men to the East in search of valuable Greek manuscripts: such a man was Lorenzo, whom the Florentines, grateful for all these benefits, declared chief of their republic. He drew to his court a number of learned men, and sent John Lascaris into Greece to purchase literary treasures to enrich his library. Lorenzo himself cultivated letters, particularly poetry, and his compositions have been several times printed. He was so universally esteemed that the princes of Europe were glad to choose him as arbitrator in their differences. This illustrious man had three sons,—Peter, who succeeded him, Julius, and John, who became pope by the name of Leo X. Lorenzo forms the subject of a splendid biography by William Roscoe. B. 1448; D. 1492.



MEDINA, *me-di'-na*, a county of Ohio, U.S. *Area*, 416 square miles. *Pop.* 25,000.

MEDINA DEL CAMPO, *mai-de'-na dail kam'-po*, an inland town of Spain, in the province of Leon, 37 miles from Segovia. *Pop.* 3,000.—This is the birthplace of Ferdinand I. of Aragon.

MEDINA DEL RIO SECO, *re'-o sai'-ko*, an old and ill-built town of Spain, in the province of Leon, 25 miles from Valladolid. It contains several parish churches, convents, and hospitals. *Manf.* Woollens and pottery-wares. *Pop.* 5,000. Medina is the name of several other small towns in Spain.

MEDINA SIDONIA, *se-do'-ne-a*, a very ancient town in Andalusia, 22 miles from Cadiz. It has two churches and several monasteries. *Manf.* Earthenware goods. *Pop.* 11,000.

MEDINA, *me-de'-na*, a city of Arabia, one of the two rendered sacred by a connection with the founder of the Mahometan faith, 245 miles from Mecca. It consists of about five hundred houses, most of which are very poorly built. The tomb of Mahomet is here, and is placed between two others, containing the ashes of

MEDINA.

the first caliphs, Abubeker and Omar. The building which incloses it is hung with silk, which is renewed every seven years. The mosque founded by the Prophet is said to be very magnificent, being supported by four hundred columns, and containing three hundred lamps always burning. *Pop.* 8,000. This was the seat of the Arabian empire under Mahomet, who died here, in 632.

MEDITERRANEAN, *med'-i-ter-rai'-ne-an*, an inland sea, forming the S. boundary of nearly the whole of Europe, and the largest expanse of water in the world that does not come under the name of ocean. It is bounded E. by Asia, S. by Africa, and terminates W. in a point at the Straits of Gibraltar. *Ext.* Its length from E. to W. is about 2,000 miles, with a varying breadth, averaging from 400 to 500. *Area*, 149,288 square miles. This includes several other seas, as the Adriatic, Ionian, Tyrrhenian, and the sea of the Grecian archipelago. The Sea of Marmora, the Black Sea, and the Sea of Asof, are considered separate seas. The Mediterranean was called by the Hebrews the "Great Sea," and has erroneously been considered tideless. At present it may be regarded as politically under the influence of Great Britain, from the possession by that country of Gibraltar, Malta, and the Ionian Islands.

MEDNOI, *med-noi'*, an island belonging to Russia, in Behring Strait. *Ext.* 30 miles long, with a breadth of 5. *Pop.* Unascertained.

MEDUSA, *me-du'-sa*, one of the three Gorgons, and the only one of them subject to mortality. She was celebrated for her personal charms and for her beautiful hair. Neptune became enamoured of her in the temple of Minerva, which so provoked the goddess, that she changed the beautiful locks of Medusa into serpents. Perseus rendered himself immortal by the conquest of Medusa, whose head he cut off, the blood that dropped from the wound producing innumerable serpents in Africa. He placed the head upon the ægis of Minerva, which he had used in the expedition, and it retained its former power of changing the beholder into stone.

MEDVIEDITZA, *med'-ve-ai-dit'-sa*, a river of Russia, in the country of the Don Cossacks. After a course of 300 miles, it joins the Don, below the influx of the Choper. Many German colonies occupy its banks.

MEDWAY, *med'-wai*, a river of England, which, rising in Surrey and Sussex, unites its various branches in Kent, and falls into the Thames in a large estuary at Sheerness. It is navigable to Penhurst.

MEEANEE, *me-a-ne'*, a village of Scinde, 6 miles from Hyderabad.—Here, in 1843, a Beloochee force of 20,000 men was completely defeated by about 3,000 of the Anglo-Indian army.

MEERPOOR, *meer'-por*, a town of Scinde, near the Pingaree, 45 miles from Hyderabad. *Pop.* 10,000. —There are numerous villages of Scinde and Beloochistan of the same name.

MEERUT, *meer'-oot*, a district of British India, in the N. W. provinces. *Area*, 2,332 square miles. This country forms a part of the Doab, and was the scene of one of the first mutinies during the Sepoy rebellion of 1857. *Pop.* about 900,000. *Lat.* between 28° 35′ and 29° 16′ N. *Lon.* between 77° 12′ and 78° 15′ E. —A TOWN of the same name, and capital of the district, is the headquarters of the Bengal artillery. *Pop.* 30,000. *Lat.* 28° 59′ N. *Lon.* 77° 48′ E.

MEGALO-KASTRO, *mai-ga'-lo kas'-tro*, the capital of the island of Crete, or Candia. (*See* CANDIA.)

MEGARA, *meg'-a-ra*, a town of Greece, in the Isthmus of Corinth, 20 miles from Athens. This was formerly an important city, but it has now decayed to a mere village. *Pop.* 1,000.

MEGARA, a daughter of Creon, king of Thebes, and wife of Hercules. During the descent of the latter hero into the infernal regions, Lycus, a Theban exile, attempted to carry off Megara; but Hercules, returning at that moment, killed Lycus. Juno, displeased at the death of Lycus, rendered Hercules so delirious, that he slew Megara and his three children by her in a fit of madness.

MEHEMED, *mai'-hai-maid*, the name of seven kings of Grenada, who reigned between the years 1235 and 1454.

MEHEMET ALI, *me-he-met*, Pacha of Egypt. This remarkable man commenced life as the keeper of a small shop at Cavalla, in Roumelia; but, abandoning the pursuits of a trader for the profession of arms, he took an active part in suppressing a rebellion of the pirates of Candia. In 1799 he headed a corps of Albanians, and went to Egypt, where he fought on the side of the British, and assisted in the expulsion of the French from that country. He soon acquired great influence in Egypt, and formed an alliance with the Mamelukes, against Khozrew Pacha, the viceroy of the sultan. The Mamelukes having regained all their former influence, chose Mehemet as their viceroy. The sultan created him pacha of Cairo in 1806, and added to this dignity the pachalic of Alexandria, in the following year, ostensibly for his services rendered to the Ottoman empire, but gained over, in reality, by Mehemet Ali's gold. His next step was to turn against the redoubtable soldiery that had helped him to gain so much power, and, after a vain effort to reduce the turbulent Mamelukes to subjection, he ordered them to be exterminated. In 1811, 470 of the Mamelukes were invited within the citadel of Cairo, where they were ruthlessly put to the sword, 1,200 more being massacred throughout the country. By this step Mehemet Ali became the undisputed master of Upper Egypt. The Wahabis, a fanatical sect, were his next victims, and these he destroyed after a war which lasted six years. He subsequently dispatched an army into Nubia, under the command of one of his sons, Ismail Pacha, who succeeded in conquering the provinces of Dongolah, Sennaar, Kordofan, &c. Upon the Greeks raising the standard of independence, he assisted the sultan to subdue them, by dispatching to the shores of the Morea a fleet of 163 vessels, under the command of his son, Ibrahim Pacha. This fleet wrought havoc upon the country during three years, but was destroyed at Navarino, by the combined squadrons of England, France, and Russia, in 1827. As a reward for his co-operation against the Greeks, the sultan ceded to Mehemet Ali the island of Candia, in 1830; but this was not sufficient to gratify his ambitious desires, for he further demanded of the sultan the cession of Syria. This

being refused, he invaded the country with a powerful army, and rapidly conquered the province. After a great victory at Konieh, in 1832, he was in triumphant march upon Constantinople, but was brought to a halt by European intervention; he succeeded, nevertheless, in gaining, by the treaty of Kutayeh, the possession of Syria and the province of Adansh. In 1839 the sultan, Mahmoud II., resolved to regain Syria; but suffering defeat at the hands of Mehemet Ali, he sought the assistance of England and other European powers. By this means, Mehemet, after having been defeated near Beyrout, and finding Alexandria blockaded, consented to forego his claims upon Syria, on condition that his family should be constituted hereditary pachas of Egypt. Thenceforth he ruled in peace, but in 1848 resigned the government to his son, Ibrahim Pacha, who dying soon afterwards, the pachalic was vested in Abbas Pacha, Mehemet's grandson. During the last two years of his life he was deprived of reason. Mehemet Ali was unquestionably an extraordinary man and wise ruler: he introduced European organization and tactics into his army, encouraged agriculture, commerce, and industry, and founded military and medical schools in his kingdom. His rise was due to his native intelligence and indomitable courage and energy; for it is a remarkable fact that this former Albanian peasant was throughout his earlier career totally destitute of education. He only learnt to read at the age of 45. It is, however, to be regretted that his rise was assisted by such violent measures as intrigue, treason, and assassination. For the French people he had a particular admiration, and he sent to Paris two of his sons and a number of Egyptian youths, to receive their education. B. at Cavalla, Roumelia, 1769; D. at Cairo, 1849.

MEHUL, Stephen Henry, *me(r)l*, a celebrated composer, who, in 1779, went to Paris, and there became the friend of Gluck. In 1790 he produced, at the Opéra Comique, "Euphrosyne" and "Coradin," both of which were prodigiously successful. He subsequently composed, among other operas, "Stratonice," "Joseph and Phrosine," and "Melidor." A large number of hymns, sonatas, and the celebrated republican airs, "Chant de la Victoire," "Du Départ," and "Du Retour," issued from his genius. B. 1763; D. at Paris, 1817.

MEIAPONTE, *mai'-e-a-pone'-tai*, a town of Brazil, in the province of Goyaz, 65 miles from Goyaz. *Pop.* 8,000.

MEIGO, *mi'-go*, a county of Ohio, U.S. *Area*, 403 square miles. *Pop.* 18,000.

MEININGEN, *mi'-ning-en*, a town of Saxony, on the Werra, 33 miles from Fulda. It has a palace, in which the dukes reside. *Manf.* Woollens and linens. *Pop.* 6,500.

MEISENHEIM, *mi'-sen-hime*, a town of W. Germany, the capital of a detached principality, on the Glau, 45 miles from Coblentz. *Pop.* 3,000.

MEISSEN, *mi'-sen*, a town of Saxony, on the Elbe, 15 miles from Dresden. *Manf.* Porcelain, known as Dresden china, hosiery, leather, and colours. *Pop.* 9,000.

MEISSNER, Augustus Gottlieb, *mise'-ner*, a popular German writer, who composed a large number of romances, essays, and tales. His style was exceedingly agreeable, lively, and shrewd. The most important of his works were "Alcibiades," "Bianca Capello," and "Spartacus." B. in Upper Silesia, 1753; D. at Prague, 1807.

MEISSONIER, Jean Louis Ernest, *mi-son'-e-air*, a celebrated French painter, of the style termed in France *genre*. His most celebrated works were,—"The Painter in his Studio," "Le Corps-de-Garde," and "A Barricade—June, 1848." All his works were painted with Flemish care and finish, but were, nevertheless, thoroughly original in their treatment. His pictures, although generally of a small size, obtained very large sums, and he stood at the head of a crowd of enthusiastic imitators. He was likewise very successful as a designer of book illustrations. The best of these last were the sketches for "Paul and Virginia," Balzac's novels, and "The French People painted by themselves." B. at Lyons, 1815.

ME-KONG, *me-kong'*, one of the principal rivers of S.E. Asia, rising in Tibet, and, after traversing several provinces, falling into the China Sea by several mouths, in *lat.* 10° N.; *lon.* 106° 40′ E.

MEKRAN, *mek-ran'*, a large maritime province of Beloochistan, extending on the E. to the province of Scindo, and on the W. and N. it has Kerman and Seistan: on the N. it is separated from Afghanistan by a desert. *Area*, estimated at 100,000 square miles. It is divided into a great number of petty districts, held by separate chiefs, whose subjects are principally engaged in pastoral pursuits. *Pop.* 200,000. *Lat.* between 25° and 28° N. *Lon.* between 58° and 66° E.—This is the country through which the troops of Alexander the Great passed on their return from India, and in which they suffered severely from drought.

MELA, Pomponius, *me'-la*, a Latin geographical writer, was a native of Spain. His valuable work, entitled "De Situ Orbis," is divided into three parts, and contains a description of the world as it was known in his time. Flourished in the earlier half of the 1st century.

MELANCTHON, Philip, *me-lĭnk'-thon*, the famous reformer, and friend of Luther. His family name was Schwarzerde, or Black-earth, which Reuchlin, his friend, altered to the corresponding Greek word, Melancthon. He made a rapid progress in his studies at the university of Heidelberg, whence he removed to Tubingen, where he continued six years. In 1518 he obtained the Greek professorship at Wittemberg, where he formed a close friendship with Luther, whose opinions he defended both in his public lectures and in his writings. In 1527 the elector of

MELANCTHON.

Saxony appointed him to visit the churches in his territories; but his greatest labour was in drawing up the Augsburg Confession of Faith. His learning and moderation became famous throughout Europe, and the kings of France and England invited him to their kingdoms, with flattering offers, which he declined. During the progress of the Reformation, he exhibited a different temper from Luther, being more cautious and timid; on which account he was often reproved by him in severe terms. The prudence of Melancthon, however, was of important service, and tended considerably to the propagation of the Protestant doctrines, by guarding them from the abuses of intemperate zeal. In 1539 Melancthon assisted in the conferences at Spires, and, in his journey thither, visited his mother, a pious woman, who asked him what she should believe, and how she should pray amid these religious disputes, at the same time repeating her simple creed and form of devotion. "Continue," said her son, "to believe and to pray as you do at present, and do not trouble yourself about controversies." He distinguished himself in the conferences held at Ratisbon in 1541 and 1548. He wrote a "Censure of the Interim,"

and all the papers presented at those conferences. The works of this learned and amiable man were collected in 1544, and published at Basle. B. at Bretten, or Bretheim, in the palatinate of the Rhine, 1497; D. at Wittemberg, 1560.

MELANIPPIDES, *mel'-a-nip'-pi-dees*. There were two Greek poets of this name: the one lived B.C. 520; the other, who was the grandson of the former, flourished 60 years after, and died at the court of Perdiccas II., king of Macedon. Fragments of their poems are in Maittaire's "Corpus Poetarum."

MELAS, *mel'-a*, a celebrated Austrian general, who, in 1796, commanded against the French in Italy, and uniting with Suwaroff, in 1799, defeated Championnet at Genola, but was himself beaten by Napoleon at Marengo, in the following year. D. 1807.

MELBOURNE, *mel'-born*, the capital town of the British colonial territory of Victoria, on the Yarra-Yarra, in the S. part of Australia. It was founded in 1837, and during the gold mania of 1853, immensely increased in population. It is the chief seat of the trade of Victoria. Its streets are regular, and the public buildings are mostly built of stone. It has various churches, clubs, schools, a court-house, government offices, Port Phillip College, a botanic garden, theatre, mechanics' institute, race-course, and numerous associations: it has, besides, extensive wool-stores, iron-foundries, and flour-mills. *Pop.* 100,000, or more. *Lat.* 37° 48′ 0″ S. *Lon.* 144° 57′ 7″ E.

MELBOURNE, William Lamb, Viscount, an English statesman, who entered the House of Commons in 1805, under the auspices of the Whigs. Canning appointed him secretary of state for Ireland, a post he filled with very distinguished success. In 1828 he was called to the upper house, after the death of his father, and while a member of Earl Grey's cabinet, greatly contributed to the passing of the Reform Bill. In 1834 he became first lord of the Treasury, and head of the Whig party, a position he retained, with only one short interruption, until the year 1841. Lord Melbourne was but little qualified to head the ministerial councils of a great nation; but his engaging and conciliatory manners served to secure the allegiance not alone of the Whig, but also of several distinguished members of the Tory party. B. 1778; D. 1848.

MELBURY, *mel'-ber-re*, the name of several parishes in England, none of them with a population above 500.

MELCHISEDECH, *mel-kis'-e-dek*, king of Salem, and priest of the most high God, who met Abraham after his victory over Chederlaomer, king of Sodom, and presented to him bread and wine, with his benediction. St. Paul having said, in his epistle to the Hebrews, that Melchisedech was without father and without mother, led some ancient heretics to assert that he was a celestial being, superior to angels, and even to Jesus Christ. They were called Melchisedecians.

MELCHTHAL, Arnold de, *melk'-tal*, one of the founders of the Swiss liberties. In 1307, with Tell, Furst, and others, he roused his compatriots to arms, and drove out the Austrians. (*See* TELL, William.)

MELCHTHAL, a valley of Switzerland, in the canton of Underwalden, noted as the birthplace of Nicholas von der Flue and Arnold of Grutli, two of the founders of the Swiss confederation.

MELDAL, *mel'-dal*, a parish and village of Norway, 35 miles from Drontheim. *Pop.* 4,500.

MELEAGER, *me-le'-a-ger*, a Greek poet. His epigrams are in the collection of Greek poetry called the "Anthologia." The latest and best edition of his works was that of Graefe, Leipsic, 1811. Flourished in the 2nd century.

MELEDA, *mai-lai'-da*, an island in the Adriatic Sea, belonging to Dalmatia, 16 miles from Ragusa. *Ext.* 23 miles long and 4 broad. *Desc.* Mountainous, producing corn, fruit, wine, and oil. *Pop.* 1,000.

MELENDEZ, Valdez, *mai-lain'-daith*, a celebrated Spanish poet, who occupied the chair of belles-lettres at Salamanca, and became, in 1789, judge of the tribunal at Saragossa. When the French invaded Spain, he attached himself to Joseph Bonaparte, who created him minister of public instruction. Upon the expulsion of the French, he fled to Montpellier. His poems, which are very fine, consist of elegies, odes, &c.: they were published at Valladolid in 1799, and again at Madrid in 1821. B. at Ribera, Estremadura, 1754; D. at Montpellier, 1817.

MELFI, *mail'-fe*, a town of Naples, in the Basilicata, near the Ofanto, 35 miles from Foggia. It contains a cathedral. In 1851 it was nearly destroyed by an earthquake, from which a great many persons perished. *Pop.* 9,500.

MELI, Giovanni, *mai'-le*, a celebrated Sicilian poet, was a physician by profession, and for some time held the professorship of chemistry at the university of Palermo. He was most successful in bucolic verse, and has been placed by his admirers after Theocritus. He likewise produced odes, *canzoni*, satires, epistles, fables, and some captivating short poems. His Don Quixote, a sort of rhymed version of Cervantes' novel, is, although beautiful in portions, little better than farce as a whole. B. at Palermo, about 1740; D. 1815.

MELICERTA, *mel-i-ser'-ta*, son of Athamas and Ino, was saved from the fury of his father by his mother, who threw herself and him into the sea. Neptune out of compassion changed both into sea-deities. Melicerta was known among the Greeks by the name of Palamon, and the Isthmian games were instituted in his honour.

MELILLA, *mai-leel'-ya*, a seaport of Morocco, belonging to Spain, on the coast of the Mediterranean, 40 miles from Beni-Botoya. *Pop.* 3,000.—It has a citadel on a rock, garrisoned by about 1,000 men.

MELITTO, *mai-leet'-to*, the name of several small towns in Naples, none of them with a population above 4,000.

MELKSHAM, *melk'-sham*, an irregularly-built market-town of Wiltshire, on the Avon, 11 miles from Bath. It has a cruciform church and a workhouse. *Manf.* Woollen goods. *Pop.* 6,300. In the neighbourhood are baths and a pump-room, erected over a chalybeate and saline spring.

MELLAN, Claude, *mel'-la*, a celebrated French engraver, whose engravings are very remarkable productions, and mostly from his own designs. B. at Abbeville, 1601; D. at Paris, 1688.

MELMOTH, William, *mel'-moth*, an English writer, who was a bencher of Lincoln's Inn, and, in conjunction with Williams, edited Vernon's Reports. He was the author of the "Great Importance of a Religious Life," a valuable little book, which has gone through many editions. B. 1666; D. 1743.

MELMOTH, William, son of the preceding. He published some well-executed translations of Pliny's and Cicero's Epistles, and was also the author of the letters which bear the name of Sir Thomas Fitzosborne; some poems in Dodsley's Collection, and Memoirs of his father. B. 1710; D. 1799.

MELORIA, *mai-lor'-e-a*, a small island in the Mediterranean, off the coast of Tuscany, 4 miles from Leghorn. In 1250 a naval engagement here took place between the Piaris and the Genoese, in which the former were defeated.

MELPOMENE, *mel-pom'-e-ne*, from the Greek *melpo*, 'a reciter of heroic verse,' one of the nine muses, who presided over tragedy. She is represented as having the form and face of a woman still young, with a commanding mien, and richly dressed. On her feet is the cothurnus; in one hand she holds a poniard, and in the other a crowned sceptre.

MELROSE, *mel'-rose* or *mel-rose'*, a town of Roxburghshire, Scotland, on the side of a fertile vale, intersected by the Tweed, 11 miles from Jedburgh. Near it is the abbey, one of the largest and most magnificent in the kingdom. It is reckoned amongst the most beautiful Gothic structures in Great Britain, from the height and embellishment of its columns, the elegance of its sculpture, and the symmetry of its parts. It was founded in 1326, by King Robert Bruce, and finished in the reign of James IV. A few years ago, the parish church was removed from the abbey to a new building. *Pop.* 1,000. Within a few miles of Melrose is Abbotsford, the former residence, and Dryburgh Abbey, the burial-place, of Sir Walter Scott. It has a station on the North British Railway.

MELTON, *mel'-ton*, the name of several parishes in England, none of them with a population above 1,200.

MELTON MOWBRAY, *mo'-brai*, a market-town of Leicestershire, on the river Eye, over which are here two handsome stone bridges, 15 miles from Leicester. The church is a fine structure, and the tower in the centre

high and elegant. It has, besides, free schools, almshouses, a library, and stabling for 800 horses belonging to the members of the subscription fox-hunt. *Pop.* 4,500. It is a station on the Midland Railway.

MELUN, *mlu(r)*, a town of France, on the Seine, 27 miles from Paris. *Manf.* Linen and cotton stuffs. *Pop.* 10,500. It has a station on the Paris and Troyes Railway.

MELVILL, Rev. Henry, *mel'-vil*, a modern English preacher, who received his education at Cambridge. His first volume of sermons was published in 1836, at Cambridge, by request of the university. He soon acquired distinction as an eloquent divine, and became in succession chaplain to the Tower of London, and principal to the East-India College at Haileybury. In 1855, on the day of the general fast, he preached before the House of Commons. He was subsequently appointed chaplain in ordinary to her majesty. His best sermons have been published under the titles of "Sermons," the "Golden Lectures," "Voices of the Year," and "Sermons on Popular Occasions." In 1855 he received the appointment of canon of St. Paul's cathedral.

MELVILLE, Herman, a modern American novelist. Incited by a passion for maritime adventure, he, in his 18th year, went on board ship as a common sailor. In 1841 he joined a whaling vessel, and went on a cruise. After 18 months of that monotonous mode of life, he took advantage of the vessel putting into Noukahiva, to desert, in company with another young sailor. He gained the interior of the island, but was detained a prisoner during four months by a savage tribe. A vessel from Sydney having put into the port, he succeeded in getting on board. He afterwards visited Tahiti and the Sandwich Islands, and, in 1843, returned to Boston, after four years of travel and adventure. In 1847 he married, and went to reside upon his farm in Berkshire, U.S. "Typee," the first work of this author, had an immense popularity, and in it was recounted, in a delightful manner, his adventures in the Marquesas Islands. In his next works, "Omoo," "Mardi," and "Redburn," the unknown regions of the Pacific Ocean were described with all his former vigour; but his style became by degrees eccentric and unequal. The "White Jacket," "Peter," and "Israel Potter," were subsequently produced, and were greeted with almost as much popularity as his first works. Mr. Melville also supplied a number of romances and sketches to the periodical literature of his country. B. at New York, 1819.

MELVILLE, Sir James, a Scotch writer, who became page to Mary, queen of Scots, whom he attended in her last moments: he afterwards entered the service of the duke of Montmorency. On his return to Scotland, in 1561, he was appointed privy counsellor and gentleman of the bedchamber. He was the author of some very curious Memoirs of Affairs of State, which were published several years since. B. about 1535; D. 1607.

MELVILLE, Andrew, a celebrated Scotch reformer, who, four years after the establishment of the Reformation in Scotland, left the university of St. Andrews, where he had acquired considerable proficiency in languages and philosophy, for that of Paris. After studying in France during five years, he went to Geneva, where he was appointed to the chair of humanity in the academy. In 1574 he returned to Scotland, on which occasion Beza wrote a letter to the General Assembly, declaring that "Melville was equally distinguished for his piety and his erudition, and that the church of Geneva could not give a stronger proof of affection to her sister church of Scotland than by suffering herself to be bereaved of him, that his native country might be enriched with his gifts." As a writer, teacher, and reformer of the church of his native country, Melville soon displayed the most uncommon ardour. The overturning of episcopacy and establishment of presbytery was his constant effort. In 1580 he was appointed principal of St. Mary's College, in the university of St. Andrews, and there taught the Hebrew, Syriac, and Chaldee languages. His boldness giving offence to the Scottish court, he was cited before the privy council, which sentenced him to imprisonment, and to be punished in his person and goods. On this he made his escape to London, where he remained for nearly two years. After James I. had ascended the English throne, he invited him to London; but Melville, having written a short epigram in contempt of a rite of the English church, the privy council convicted him of gross scandal, and, after a year's confinement in the houses of the dean of St. Paul's and the bishop of Westminster, he was sent to the Tower, where he remained nearly four years. In 1611 he was released, and went to the university of Sedan, whence he never again returned. M'Crie says of Melville: "Next to the Reformer, I know of no individual from whom Scotland has received such important services, or to whom she continues to owe so deep a debt of national respect and gratitude." B. 1545; D. at Sedan, 1622.

MELVILLE BAY, an inlet of Greenland, at the head of Baffin's Bay. *Lat.* 76° N. *Lon.* between 60° and 64° W.

MELVILLE ISLAND, an island in the Arctic Ocean, discovered by Captain Parry. Cape Dundas, its most western point, is in *lat.* 72° 27′ 50″ N.; *lon.* 113° 57′ 35″ W.

MELVILLE ISLAND, an island off the N. coast of Australia. *Ext.* 70 miles long, with a breadth of 30. *Lat.* 11° 28′ S. *Lon.* 131° E.

MEMEL, *mem'-el*, a town of East Prussia, on the small river Dange, adjacent to the Curische Haff, which joins the Baltic here by a narrow strait, 74 miles from Königsberg. It is strongly fortified, and consists of the town and three suburbs, one of which lies beyond the Dange. It is the great entrepôt of the country watered by the Niemen, and exports timber, which is brought down in floats; also hemp, flax, and corn. The other articles are hides, skins, tallow, bristles, WAX, feathers, and Lithuanian yarn. The harbour is capacious, and can accommodate 300 vessels. *Manf.* Woollens and soap. *Pop.* 11,000. *Lat.* 55° 42′ 15″ N. *Lon.* 21° 5′ 20″ E.

MEMLING, Hans, *mem'-ling*, a celebrated painter and missal illuminator of the 15th century. Of the circumstances of his life, very little that is authentic is known. He is said to have become an inmate of the hospital of St. John at Bruges, in 1477, and to have therein painted the exquisite pictures which still adorn the establishment. His most celebrated works are the "History of St. Ursula," "The Marriage of Saint Catharine," and "The Descent from the Cross." As a decorator of missals and church books, he was eminently successful; and the specimens of his art which have been preserved are accounted inestimable treasures. D. probably in Spain, at the close of the 15th century.

MEMMINGEN, *mem'-min-gen*, a walled town of Bavaria, on the Iller, 28 miles from Ulm. It has a townhall, arsenal, museum, and barracks. *Manf.* Woollen, cotton, and linen fabrics. *Pop.* 7,300.

MEMNON, *mem'-non*, according to Hesiod, a king of Æthiopia, son of Tithonus and Aurora. He came with a body of 10,000 men to assist his uncle Priam during the Trojan war, where he behaved with great courage, and killed Antilochus, Nestor's son. The aged father challenged the Æthiopian monarch, but Memnon refused, on account of the venerable age of Nestor, and accepted that of Achilles, who killed him in combat, in the sight of the Grecian and Trojan armies. In Egypt, there are several statues said to be Memnonian, the most celebrated being that described as vocal by Strabo and Pausanias. Modern explorers have pronounced this particular statue to be the northernmost of the two situate in the Theban plain, on the west bank of the Nile. It is stated to be fifty feet in height, and on its legs are graven inscriptions in Greek and Latin, commemorating the names of those who had heard the sounds. These sounds are held to have been caused by priestly jugglery. Alexander Humboldt speaks of certain noises which were heard to proceed at sunrise from the rocks on the banks of the Orinoco, which he attributed to confined air making its escape from crevices or caverns, where the difference of the external and internal temperature is considerable. French *savans* attest to having heard such sounds at Carnak, on the east bank of the Nile; and hence it is conjectured that the priests, who had observed this phenomenon, took advantage of this knowledge, and contrived, by what

means we know not, to make people believe that a similar sound proceeded from the colossal statues.

MEMNON, a Greek historian, who wrote an account of the rulers of Heraclia, of which fragments have been preserved by Photius. They have also been translated into French by Gedoyn, and inserted in the fourth volume of the Memoirs of the Academy of Inscriptions. Flourished in the 2nd century.

MEMNON, of the isle of Rhodes, an able general of Darius, king of Persia, whom he advised to desolate his country, in order to impede the progress of Alexander the Great, and then to attack Macedon; but this counsel was overruled by the other generals. After the battle of Granicus, Memnon defended Miletus with vigour, took the isles of Chios and Lesbos, carried terror into Greece, and was near putting a stop to the conquests of Alexander, when he was carried off in the midst of his successes. His wife was taken prisoner, with the family of Darius, and became the mistress of Alexander. D. at Mitylene, B.C. 333.

MEMPHIS, *mem'-fis*, a ruined city, 10 miles from Cairo. It was the ancient capital of Egypt, but now its site is occupied only by a few villages.

MEMPHIS, a town of Tennessee, U.S., on an eminence near the Mississippi. *Pop.* 9,000. Connected by railway with Legrange.

MEMPHREMAGOG, LAKE, *mem'-fre-ma'-gog*, a lake of Lower Canada, principally in the British district and the state of Vermont. *Ext.* 30 miles long. The river St. Francis rises in it, and it receives the Black River.

MENAGE, Giles, *me-nazh'*, a learned French writer, who became an eminent pleader, but quitted that profession and entered into orders, in order to cultivate letters the more undisturbedly. His principal works are,—two books on the Origin and Nature of the French language; Miscellanies; Latin poems; on the Italian language; and an edition of Diogenes Laertius. B. at Angers, 1613; D. at Paris, 1692.

MENAHEM, *men'-a-hem*, or *me-nai'-hem*, king of Israel, was son of Gadi. He advanced against and defeated Shallum, B.C. 771; thus securing the sovereignty; but the people did not all submit to him; and hence he "smote Tipsah, and all that were therein, and the courts thereof, from Tirzah, because they opened not to him." Soon after he ascended the throne, the Assyrians invaded Judæa; but Menahem induced them to depart, by paying them 1,000 talents of silver,—upwards of £350,000, which he raised from "all the mighty men of wealth." He enjoyed his throne, henceforth, until his death, and constantly worshipped the golden calf. D. 760 B.C.

MENAI STRAIT, *men'-ai*, is in North Wales, dividing the island of Anglesey from Caernarvonshire. *Ext.* 14 miles long, with a varying breadth of from 260 yards to 2 miles. A chain-bridge of 560 feet in length crosses this strait; also a tubular suspension-bridge, forming a part of the line of the Chester and Holyhead Railway.

MENAM, or MEINAM, *me-nam'*, 'mother of waters,' one of the largest rivers of S. Asia, traversing the centre of Siam, and, after a course of 700 or 800 miles, entering the Gulf of Siam by three mouths.

MENANDER, *me-nän'-der*, a Greek comic poet, who was called the prince of new comedy, and preferred to Aristophanes. All his plays are lost; but the six comedies of Terence were borrowed from him; by which we may form some judgment of his excellence. His fragments have been collected by Meineke. B. 341 B.C.; D. 290 B.C.

MENDAVIA, *men-da'-ve-a*, a town of Spain, in the province of Navarre, 40 miles from Pamplona. *Pop.* 2,000.—In 1507 Cæsar Borgia was here killed in a skirmish.

MENDE, *mend*, a town of France, capital of the department of the Lozère, on the Lot. It has a cathedral with two towers. *Pop.* 7,000.

MENDELSSOHN, Moses, *men'-del-sone* (which signifies Moses the son of Mendel), a learned German Jew. He was brought up for the pursuits of commerce, but devoted himself to literature, in which he attained a distinguished reputation. In 1755 he published his first piece, entitled "Jerusalem;" in which he pretended that the principle of the Jewish religion is deism. His next work was "Phædon; or, a Discourse on the Spirituality and Immateriality of the Soul." In this excellent treatise the principle of the immateriality of the soul was acutely maintained. On account of this book, the author gained the appellation of the Socrates of the Jews. He also wrote Philosophical Works, Letter to Lavater, Commentary upon Ecclesiastes, and a translation of the first book of the Old Testament. B. at Dessau, 1729; D. 1786.

MENDELSSOHN, Bartholdy Felix, a celebrated German musician, was grandson of the preceding. As early as his 16th year, he distinguished himself as a pianist and musical composer. His first work was the opera entitled "The Wedding of Camælio;" this was quickly followed by the overture to Shakspere's "Midsummer Night's Dream." In 1829, having just completed his 20th year, he made his first visit to England, where his overture was played, and received with enthusiasm. Thenceforth, he paid an almost annual visit to this country, where he felt he was even more appreciated than in his native land. "St. Paul," his first oratorio, was composed for an English musical society, as was "Elijah," his third and best work of the same kind. His last visit to England took place in 1847, when he conducted his "Elijah" at London, Birmingham, and Manchester. In the same year, his health, which had been declining for some time, became very bad, and he went to reside in Switzerland; but, although he appeared to derive considerable benefit from the mountain air, he was carried off by an affection of the brain, soon after his return to Leipsic. He left behind a large collection of musical manuscripts, portions of which were published. Mendelssohn's works embrace every department of the musician's art; and it is the firm conviction of the most competent critics, that his oratorios "St. Paul" and "Elijah" will live to charm and delight the world as long as the "Messiah" and the "Israel in Egypt" of the immortal Handel. B. at Hamburg, 1809; D. at Leipsic, 1847.

MENDERE, *men'-de-re*, two rivers of Asia Minor; one, after a course of 200 miles, entering the Ægean Sea, 30 miles from Ainsaluck; and the other, after a course of 60 miles, entering the Hellespont.

MENDIP HILLS, *men'-dip*, a noted mineral range in the county of Somerset, dividing the N. from the central part of the county. *Length*, about 25 miles. *Height*, 1,800 feet.

MENDOCINO CAPE, *men-do-se'-no*, the most W. point of Upper California, on the Pacific. *Lat.* 40° 30′ N. *Lon.* 124° 29′ W.

MENDOZA, *men-do'-za*, a city and department of the Plata Confederation, S. America. The city stands in a plain at the foot of the Andes. It contains several convents, a college, and a church. *Pop.* 12,000.—The river Mendoza flows by this town, and finally enters the Atlantic, under the name of Colorado.—The DEPARTMENT has a population of about 40,000. It produces fruits, wheat, and maize, and is watered by the Mendoza. *Lat.* between 32° and 34° 30′ S. *Lon.* between 67° and 70° W.

MENDOZA, Diego Hurtado, an eminent Spanish statesman and scholar, under Charles V. He distinguished himself as a soldier, diplomatist, geographer, historian, and poet. Charles V. intrusted him with several important missions, and, during six years, he held the military command of Tuscany. He made a noble collection of Greek and Arabic manuscripts, and used all the resources of his wealth and power to advance learning. Under Philip II. he fell into disgrace, and was banished from the Spanish court; but his leisure was occupied by the composition of his "War against the Moors," and in collecting upwards of 400 Arabic manuscripts. At his death he bequeathed his library to the king. B. at Granada, 1503; D. at Madrid, 1575.

MENDRISIO, *men-dre'-se-o*, the most S. town of Switzerland, 6 miles from Como. It has a college and a convent. *Pop.* 2,000.

MENECRATES, *me-nek'-rai-tees*, a Greek physician, celebrated for his pride and vanity. He crowned himself like the master of the gods, and, in a letter which he wrote to Philip, king of Macedon, expressed himself thus: "Menecrates Jupiter to King Philip, greeting." The Macedonian monarch replied, "Philip to Menecrates, greeting and better sense." Philip once invited him to his board; but a separate table was set for the arrogant physician, served only with perfumes and

frankincense, while before the other guests was placed good and substantial cheer. Menecrates flourished about 360 B.C.

MENEHOULD, ST., *men'-hoold*, a town of France, on the Aisne, 25 miles from Châlons. *Manf.* Glass, leather, and earthenware. *Pop.* 4,500.—This town was taken by Louis XIV., in 1653. In 1719 it was destroyed by fire, but has since been rebuilt.

MENELAUS, *men'-e-lai'-us*, king of Sparta, brother of Agamemnon, with whom he was brought up in the house of Atreus. They went afterwards to the court of Œneus, king of Calydonia, who treated them with paternal care. From Calydonia they went to Sparta, where, like the rest of the Grecian princes, they solicited the marriage of Helen, the daughter of King Tyndarus, who made choice of Menelaus. As soon as the nuptials were celebrated, Tyndarus resigned the crown to his son-in-law. The arrival of Paris in Sparta shortly afterwards disturbed the king's domestic peace. Paris carried off Helen, and the Greek princes, mindful of their oath, took up arms to defend the cause of Menelaus. The combined forces assembled at Aulis, in Bœotia, where they chose Agamemnon for their general and Calchas for their high priest. They then marched to meet their enemies in the field. During the Trojan war, Menelaus behaved with great courage; and, says the poet, Paris must have fallen by his hand, had not Venus interposed, and redeemed him from certain death. In the tenth year of the Trojan war, Helen, by perfidiously introducing Menelaus into the chamber of Deiphobus, obtained his forgiveness, and she returned with him to Sparta, after a voyage of eight years. He died some time after his return.

MENENIUS AGRIPPA. (*See* AGRIPPA.)

MENETOU-SALON, *men'-tawng*, a town of France, in the department of Cher, 10 miles from Bourges. *Manf.* Serges, and it has distilleries. *Pop.* 2,700.

MENGS, Anthony Raphael, *mengs*, a celebrated German painter, who studied under his father, painter to Augustus III., king of Poland, and subsequently greatly improved himself at Rome. Charles III. of Spain invited him to his kingdom, and became his patron. Mengs formed his style after Raphael, Correggio, and Titian. To his excellence as an artist, he added literary talent, and wrote several works in Italian; as, "The Life of Correggio," "Reflections on Beauty," and a treatise on "Tas e in Painting," "On the Principal Pictures at Madrid," &c. They have been translated into English, with his life prefixed. B. at Aussig, Bohemia, 1728; D. at Rome, 1779.

MENIN, *men'-ă*, a fortified town of Belgium, in West Flanders, on the Lys, 11 miles from Lisle. *Manf.* Table linen, lace, and silk stuffs, oil, soap, and tobacco. *Pop.* 8,500.—It has undergone a great number of sieges, and, in the 17th and 18th centuries, was frequently taken by the French.

MENNEVRET, *men'-vrai*, a parish and town of France, in the department of the Aisne. *Pop.* 2,300.

MENNO SIMONIS, *mem'-no si'-mo-nis*, chief of a sect which sprang up in Germany at the time of the Reformation, and was called after his name, was originally a minister in Friesland, but left his parish and was rebaptized by Ubbo Philippi. He gathered about him a number of disciples in Germany, Holland, and Flanders, maintained the necessity of rebaptism in adults, and denied that Jesus Christ received a human body from the Virgin. The Mennonites still continue a considerable sect in Holland, and are not to be confounded with the Anabaptists. A considerable amount of curious information relating to Menno and his followers is to be found in Mosheim's "Ecclesiastical History." B. at Witmarsum, Friesland, 1505; D. in Holstein, 1561.

MENOUF, *me-noof'*, a town of Lower Egypt, on the canal of Menouf, which connects the Damietta and Rosetta branches of the Nile, 30 miles from Cairo. *Manf.* Mats, and there are indigo-works. *Pop.* Unascertained.

MENS, *mens*, a market-town of France, in the department of the Isère, 25 miles from Grenoble. *Pop.* 2,200.

MENSCHIKOFF, Alexander, *men'-shi-kof*, a prince of the Russian empire, was the son of a peasant, and the servant of a pastry-cook, who employed him to carry pies about the streets. His appearance pleasing Peter the Great, he took him into his service. Menschikoff soon insinuated himself into the confidence of his sovereign, who, in 1704, made him governor of Ingria, with the rank of major-general, and at length conferred on him the title of prince. In 1713 he was accused of peculation, and condemned to pay a heavy fine, which the czar remitted, and restored him to favour. Under the Czarina Catherine he had still more power, and his daughter was married to Peter II., who made Menschikoff duke of Cozel, and grand master of the imperial hotel; but, by the intrigues of Dolgorouschki, mistress of the czar, he fell into disgrace, and was banished to his estate, where he lived in such magnificence that Peter was persuaded to send him, for his own safety, to Siberia, where he died in a poor hut, 1729. D. at Moscow, 1674.

MENSCHIKOFF, Alexander Serjevitsch, Prince, a Russian admiral and general, was the grandson of the preceding. He was at first attached to the embassy at Vienna; but, becoming aide-de-camp to Alexander, in 1812, he shared in the military service of the period, and attained the grade of general. When Nicholas ascended the throne, he dispatched Menschikoff on a mission to Abbas-Mirza, shah of Persia, who, taking advantage of a revolt of the Russian army, suddenly broke off the negotiations, and the ambassador narrowly escaped death. In 1824 he commanded a division of the Russian army which took Anapa, and was afterwards severely wounded at the siege of Varna. In 1831 he was appointed governor of Finland, and in 1834 he attained the rank of admiral. In 1853 the Czar Nicholas sent him to Turkey on an embassy relative to the holy places; but his haughtiness and obstinacy were little suited to further the end he had in view. In a short time he presented his ultimatum: his departure soon followed. The war with Russia was the result of this act, and when the allied forces landed in the Crimea, he was in the chief command of the Russian forces. Defeated at the Alma, he hastily fortified Sebastopol, and sank the Russian fleet at the entrance to the port. Shortly after the defeat at Inkermann, and the death of the Czar Nicholas, he fell ill, and was superseded in his command in the Crimea by Prince Gortschakoff. A few months later he was, however, charged with the defence of Cronstadt against the allied English and French fleets. In 1856 he was recalled to occupy a position at the court of the emperor Alexander. Prince Menschikoff was the recognized head of a very powerful and important, although retrograde, party in Russia. This was called the Old Russian party, and was the declared enemy of all reform. The prince himself exhibited the characteristics of his nation;—in him a native rudeness of manner was added to remarkable subtlety and to a cultivated and witty mind; thus completely personifying that strange mixture of barbarism and civilization so prominently shown in the habits and the character of the people, and in the politics of Russia. B. 1789.

MENTOR, *men'-tor*, the friend of Ulysses, who confided to him the education of his son, whilst he was absent at the siege of Troy. He was celebrated for his wisdom, and, according to the Greek tradition, Minerva took his shape, in order to bring up the son of Ulysses. This last view has been adopted by Fénélon in his "Télémaque."

MENTOR, a Greek artist of the age of Pericles. He excelled in polishing cups and engraving flowers upon them.

MENTZ, MAINZ, or MAYENCE, *mentz, mintze, maiyence*, a city of Germany, in the grand-duchy of Hesse-Darmstadt, on the left bank of the Rhine, immediately below the influx of the Main, 36 miles from Coblentz. It is built nearly in the form of a semicircle, of which the Rhine is the basis. It is one of the strongest fortresses of the empire. Towards the river less defence is necessary, and the works are simple; but, on the land side, they are extensive and complicated. There is a bridge across the Rhine to Cassel, which is also fortified, and traversed by the railway from Frankfort to Wiesbaden. The interior of the town is by no means handsome. Most of the streets are crooked, narrow, and gloomy. The principal buildings are the electoral palace, used as a custom-house, the house of the Teutonic Knights, now the residence of the military governor; and the arsenal.

The principal churches are the Dom, or cathedral, built in the 12th century; the church of St. Ignatius, which is a model of architecture, and ornamented in the ceiling with good paintings; and the ancient church of St. Stephen, the steeple of which commands an extensive view. The public library contains a collection of 110,000 volumes, a cabinet of coins and medals, a cabinet of natural history, a collection of philosophical and mechanical instruments, a museum of Roman monuments, said to be the most complete of any out of Italy, and a gallery of pictures. A club-house now occupies the site of the house of Guttenberg, the inventor of printing. The establishments for education are a seminary, a lyceum, schools of medicine, midwifery, and farriery. Along the banks of the Rhine is a beautiful walk; also a quay or wharf for landing goods. But the greatest attraction of Mentz is in its environs and its beautiful prospects. It is the principal trading city of the duchy, and, after Cologne, the principal in W. Germany for the supply of Rhenish produce. *Manf.* Leather, soap, glue, tobacco, artificial pearls, musical and philosophical instruments, metal wares, porcelain, and carriages. *Pop.* 38,000, exclusive of the garrison, which is about 8,000 or 10,000. *Lat.* 49° 59′ 44″ N. *Lon.* 8° 16′ 32″ E. —The site of Mentz was occupied by the Romans as a military position. In the 13th and 14th centuries, it was a place of some note for literature and the arts. In the Thirty Years' War, it was taken by the Swedes, and in 1688 by the French, but restored at the subsequent peace. At the end of 1792, it surrendered to the French. Next year it was taken by the Austrians. By the peace of Luneville (1801) it was formally ceded to France, and in 1815 was ceded to Hesse-Darmstadt. It has extensive steam communications.

MENTZ, *mentz*, a township of New York, U.S., on the Erie Canal, 8 miles from Auburn. *Pop.* 6,000.

MENU, *me-nu'*, a Hindoo legislator, and the supposed author of a code of laws and morality. This vast work, which is still extant, is written in verse, and in the Sanscrit language. Sir William Jones translated it into English, in 1796. The Hindoos consider Menu as the son of Brahma, and the first created man. There is no authentic date to be assigned for his birth, but the code which is attributed to him is considered to be older than the Vedas, which latter were composed about the 11th or 12th century B.C.

MENZALEH, *men-za'-le*, an extensive lagoon of Lower Egypt, extending along the coast to the east of the Damietta branch of the Nile. *Ext.* 60 miles in length and 25 in breadth. It communicates with the Mediterranean by three openings, and has extensive fisheries.

MENZALEH, a town on the above lake, partly ruined, with a trade in rice and fish, 20 miles from Damietta. *Pop.* Unascertained.

MÉON, Dominic Martin, *mai'-on*, one of the conservators of the Bibliothèque Royale, who made some valuable researches into the literature of the middle ages. He published the Fables and Stories of the French poets, from the 11th to the 15th century, the "Romance of the Rose," the "Romance of Renard," &c. B. 1748; D. 1829.

MEPPEL, *mep'-pel*, a town of the Netherlands, on the Havelter Aa, near its mouth, 25 miles from Assen. *Manf.* Sailcloth principally. *Pop.* 6,200.

MEPPEN, *mep'-pen*, a town of Hanover, 43 miles from Osnabruck. *Manf.* Linens and stuffs. *Pop.* 2,500.

MEQUINENZA, *mai'-ke-nain'-tha*, a town and fort of Spain, on the Ebro, at the influx of the Cinca. It is defended by a fortress, which, in 1810, was taken by the French. *Pop.* Unascertained.

MEQUINEZ, *mai'-ke-naith*, a city of Morocco, frequently the residence of the emperors, 35 miles from Fez. It is situate in a fine plain, watered by numerous rivulets. The seraglio is a very extensive quadrangular edifice. *Pop.* 70,000. *Lat.* 33° 56′ N. *Lon.* 5° 50′ W.

MER, *mair*, a town of France, 21 miles from Orleans. *Pop.* 4,300.—It has a station on the Orleans and Tours Railway.

MER and SER, *mer, ser*, two contiguous summits of the Himalaya, in the N. part of the Punjab, among the loftiest between the Indus and the Sutlej rivers. The one is generally white with snow, and the other uniformly black and bare. *Lat.* 34° N. *Lon.* 76° 10′ E.

MERAN, *me-ran'*, a town of Austria, in the Tyrol, 42 miles from Trent. Near it is the mountain fortress of the Tyrol. *Pop.* 2,300.

MERCATOR, Gerard, *mer-kai'-tor*, a celebrated geographer, who composed a Chronology, a greater and lesser Atlas, and "Geographical Tables;" also "A Treatise on the Creation," &c. He was the first to represent the meridians by equidistant parallel lines, and the parallels of longitude by lines at right angles with the meridian; whence the name Mercator's Projection, now employed in nautical maps. He was so exact as to engrave and colour his own maps. B. in Flanders, 1512; D. 1594.

MERCATOR, Nicholas, an eminent Danish mathematician, who settled in England, where he became fellow of the Royal Society, and published several valuable works on astronomy. D. 1640; D. about 1690.

MERCER, *mer'-ser*, the name of several counties of the United States.—1. In Pennsylvania. *Area*, 620 square miles. *Pop.* 35,000.—2. In Illinois. *Area*, 550 square miles. *Pop.* 6,000.—3. In Kentucky. *Area*, 250 square miles. *Pop.* 15,000.—4. In New Jersey. *Area*, 272 square miles. *Pop.* 30,000.—5. In Ohio. *Area*, 450 square miles. *Pop.* 8,000.—Also several townships in the United States, none of them with a population above 1,500.

MERCIA, *mer'-she-a*, one of the old kingdoms of the Saxon heptarchy, comprising all the modern counties between the Thames on the S., Yorkshire and Lancashire on the N., Wales on the W., and the kingdoms of East Anglia and Essex on the E. Its capital city was Leicester.

MERCIER, Louis Sebastien, *mair'-se-ai*, a celebrated French author, who wrote works in almost every department of literature. In 1781 he commenced his celebrated "Picture of Paris," wherein he dissected the social system of the French capital with so much vigour and truth, that he judged it prudent to leave Paris and carry on the publication in Switzerland. So completely did this work exhibit the corruption and frivolities of French society, that its publication has been claimed as one of the great precursors of the French revolution. He returned to France after the revolution, and edited the "Patriotic Annals," a republican journal, but moderate in tone. He was a witty and entertaining writer; but his works are defaced by paradox and inordinate vanity. B. at Paris, 1740; D. 1814.

MERCURIALIS, Jerome, *mer'-ku-ri-ai'-lis*, a celebrated Italian physician, who taught at Padua. Maximilian II. invited him to Vienna. He wrote several important works on medicine; among the rest, "Practical Medicine." He likewise produced a good edition of Hippocrates, which was published at Venice, 1588. B. at Forli, 1530; D. 1606.

MERCURY, *mer'-ku-re*, a celebrated god of antiquity, called Hermes by the Greeks. There were no less than five of this name, according to Cicero. Some add a sixth; but to the son of Jupiter and Maia, the actions of all the others have been probably attributed. Mercury was the messenger of the gods, and Jupiter in particular; the patron of travellers and shepherds; he conducted the souls of the dead into the infernal regions, and not only presided over orators, merchants, and declaimers, but was also the god of thieves, pickpockets, and all dishonest persons. His name is derived *a mercibus*, because he was the god of merchandise among the Romans. On the day of his birth he gave proof of his craftiness in stealing away the oxen of Admetus, which Apollo tended. He gave other tokens of his thievish propensity, by taking the quiver and arrows of Apollo; and he increased his fame by robbing Neptune of his trident, Venus of her girdle, Mars of his sword, Jupiter of his sceptre, and Vulcan of many of his mechanical instruments. Jupiter then took him as his messenger, interpreter, and cupbearer. He delivered Mars from the long confinement which he suffered from the superior power of the Aloides. He purified the Danaides of the murder of their husbands; he tied Ixion to his wheel in the infernal regions; he destroyed the hundred-eyed Argus; he sold Hercules to Omphale, the queen of Lydia; he conducted Priam to the tent of Achilles to redeem the body of his son Hector. Mercury had many surnames and epithets; his amours were also numerous. His worship was well established, particularly in Greece, Egypt, and

Italy. Some of his statues represented him as a youth. The Greeks and Romans offered tongues to him, by throwing them into the fire, as he was the patron of speaking, of which the tongue is the organ.

MERDIN, or MARDIN, *mer-din'*, a fortified city of Diarbekir, in Asiatic Turkey, 55 miles from Diarbekir. The houses appear old, and have small windows grated with iron. *Pop.* 11,000.

MERE, *meer*, a market-town of Wiltshire, 23 miles from Salisbury. *Manf.* Silk and bed-ticking. *Pop.* 3,000.

MEREDITH, *mer'-e-dith*, two townships in the United States, neither with a population above 3,000.

MERGENTHEIM, *mair'-gen-time*, a town of Wurtemberg, 56 miles from Stuttgart. It has an ancient palace, with a library. *Pop.* 2,500.

MERGUI, *mer-ge'*, a seaport-town of British India, in the province of Lower Siam, on an island in the delta of the Mergui river. Its exports are ivory, tutenague, rice, and other provisions. *Pop.* Unascertained. *Lat.* 12° 12′ N. *Lon.* 98° 23′ E.—This place was taken by the British in 1824.

MERGUI ARCHIPELAGO, a group of the Indian Ocean, lying along the coast of Tenasserim and the isthmus of the Malay peninsula, with a strait between them and the mainland, of 15 to 30 miles broad, having good anchorage. It forms part of the British province of Mergui, which is the most S. on the coast of Tenasserim. *Pop.* 18,000. *Lat.* between 9° and 13° N. *Lon.* between 97° and 98° 30′ E.

MERIAN, Matthew, *mer'-i-an*, a German engraver, who set up a book and print business at Frankfort-on-the-Maine. Many of his engravings were excellent. He published the "Topography of the Universe," in 31 volumes. B. at Basel, 1593; D. about 1650.

MERIAN, Matthew, an eminent German painter, chiefly of portraits, was son of the preceding. As a student, he derived instruction from Syndrart, from Vandyck in London, from Le Sueur at Paris, and from Carlo Maratti at Rome. Although he produced some historical pieces, his fame chiefly rests upon his portraits. The emperor Leopold I. and some of the highest German princes and nobles sat to him. Upon the death of his father, he carried on his business, without, however, neglecting his professional efforts. B. at Basel, 1621; D. at Frankfort, 1687.

MERIAN, Sibylla Maria, a celebrated naturalist, who excelled in drawing insects, flowers, and fruits, was sister of the painter, and daughter of the engraver, mentioned above. She became the wife of John Andriez Graff, a painter, in 1665; but her own name was so celebrated as an artist, that her husband's was prevented from being adopted. She painted flowers and insects after nature with scrupulous exactness, and, in 1699, undertook a voyage to Surinam in order to make drawings of the insects of that country. Although her fame mainly rests upon her artistic performances, she was an excellent writer. Her principal works were, the "Origin of Caterpillars; their Nourishment and Changes," which was afterwards enlarged by herself and daughters, and was reproduced in France by Marret, under the title of "Histoire Générale des Insectes de l'Europe." She also wrote "Generation and Transformation of the Insects of Surinam" Both these works were published in Paris under the general title of "Histoire des Insects de l'Europe et de l'Amérique," in 1771. Sir Hans Sloane purchased many of her drawings for a considerable sum, and they are now contained in the print department of the British Museum. Several collections of her fine drawings are also preserved at St. Petersburg, in Holland, and at Frankfort. B. at Frankfort-on-the-Maine, 1647; D. at Amsterdam, 1717.

MERIDA, *mer'-e-da*, a town of Spain, in Estremadura, on the Guadiana, across which there is a large bridge, 30 miles from Badajos. The bridge is a Roman structure, consisting of 80 arches, and 2,570 feet in length. *Pop.* 4,200. This place was founded by Augustus, 25 B.C. It now presents but a feeble picture of its former prosperity. Its antiquities, however, scattered in all directions, are interesting. In 713 it was taken by the Moors, and, in the 13th century, was attached to the kingdom of Castile.

MERIDA, a town of Venezuela, South America, the capital of the province of Chama, 85 miles from Varinas. *Pop.* 6,000. In 1812 it was nearly entirely destroyed by an earthquake. Previous to that event it was the largest city in Venezuela.

MERIDA, the capital of the province of Yucatan, Central America, about 20 miles from the Gulf of Mexico. *Pop.* 25,000. *Lat.* 20° 50′ N. *Lon.* 89° 40′ W.

MERIDEN, *mer'-i-den*, a town of the United States, Newhaven, in Connecticut. *Pop.* 4,000.

MERIMÉE, Prosper, *mer'-e-mai*, a modern French *littérateur*, who was educated for the profession of the law; but after the revolution of 1830, he obtained high employment under the constitutional government. In 1831 he was appointed to an inspectorship of the antiquities of France, a post he has ever since retained. The duties of his office caused him to make several archæological tours throughout France, and the result was the publication of a number of illustrated works of considerable importance. In 1844 he was elected a member of the French Academy. In addition to his archæological labours, he wrote historical works, romances, and plays. His best-known historical studies, were the "Jacquerie" and "Chronicle of the Reign of Charles IX." Of his novels, one became European in its popularity;—this was "Colomba," a wonderful picture of Corsican life and revenge. As a writer for the stage, he obtained only a small amount of success. During fifteen years he has been a regular contributor to the "Revue des Deux Mondes," and to the newspaper press of France. B. at Paris, 1803.

MERINCHAL, *mair'-in-shal*, a town of France, in the department of Creuse, 14 miles from Aubusson. *Pop.* 2,500.

MERIONETH, *mer-i-o-n'-eth*, a maritime county of North Wales, bounded N. by the counties of Caernarvon and Denbigh, S. by Cardigan, from which it is separated by the estuary of the Dovy, W. by Cardigan Bay, and E. by the counties of Denbigh and Montgomery. *Area*, 665 square miles. *Desc.* Wild and mountainous, and everywhere abounding with the most romantic and sublime scenery. Cader Idris is the most noted mountain, being 2,914 feet above the sea. Arran Mowddy is still higher, its height being 2,955 feet. The other principal mountains are Arrenig, 2,809 feet; Cader Ferwyn, 2,563; Arran Benllyn, &c. *Rivers.* The principal are the Dee, the Maw or Mawddach, the Dovy or Dyfi, and the Glaslyn and Dwyrid. *Lakes.* Llyn Tegid, near Bula, and Llyn Tallyn, at the foot of Cader Idris. *Pro.* Wheat, oats, barley, and potatoes, are the principal crops. *Manf.* Principally coarse flannels; also strong cloths, druggets, kerseymeres, and stockings. *Pop.* 40,000.

MERLIN, Ambrose, *mer'-lin*, a British writer, who lived about the year 480, and was regarded in his time as a magician and prophet. The idlest tales are told of him by some ancient writers; such as that he was engendered of an incubus, and that he conveyed by enchantment the stupendous stones on Salisbury Plain from Ireland. There also pass under his name some extravagant predictions. Near Caermarthen is a mount called Merlin's Hill, beneath which tradition relates that he was buried.

MEROË, ISLE OF, *mer'-o-e*, a tract of S. Nubia, lying between the Nile and its tributary the Atbura. *Ext.* 400 miles long, with a breadth of 200. On the N. part of this tract are the ruins of ancient Meroë, 25 miles from Shendy. On its site is a modern town of the same name, with large corn magazines.

MEROPE, *mer'-o-pe*, one of the Atlantides, who married Silphus, son of Æolus, and was, like her sisters, changed into a constellation after death. (*See* PLEIADES.)

MEROVÆUS, *mer-o-ve'-us*, king of France, succeeded Clodius in 448, and defeated Attila in 451. He is said to have extended the bounds of his kingdom to Treves, which city he took and plundered. He began the race of French kings called Merovingian. B. about 411; D. 457.

MERRICK, James, *mer'-rik*, an English divine and poet, termed by Lowth one of the best of men and most eminent of scholars. He published a translation of Tryphiodorus' "Capture of Troy," and poems on sacred subjects; but his principal performance is a version of the Psalms, with annotations. B. 1720; D. at Reading, 1769.

MERRIMACK, *mer'-ri-măk*, a river of the United

States, traversing New Hampshire, and, after a course of 150 miles, falling into the Atlantic at Newburyport.

MERRIMACK, a county of New Hampshire, U.S. *Area*, 845 square miles. *Pop.* 40,000.

MERSE, or MARCH, *march*, one of the three greater divisions of Berwickshire.

MERSEBURG, *mer'-se-boorg*, a town of Prussian Saxony, on the Saale, 15 miles from Leipsic, with narrow and crooked streets, but clean and well paved. Its most remarkable buildings are the cathedral, the palace of the bishops and dukes, a military orphan asylum, and a school of surgery. *Manf.* Woollen and linen fabrics, paper, tobacco, and vinegar. *Pop.* 12,000.

MERS-EL-KEBIR, *mers-el-ke'-bir*, a fortified town of Algeria, on the Mediterranean, 3 miles from Oran. *Pop.* Unascertained.—This place was, in 1830, taken by the French.

MERSENNE, Marin, *mair-sen'*, an eminent French mathematician. In 1615 he was appointed professor of philosophy at Nevers. After resigning this office, as well as that of superior of the convent in which he lived, he travelled in Italy, Germany, and the Netherlands. He subsequently took up his final residence at Paris. His chief work was "Harmonie Universelle," which contains a variety of useful information connected with the science of music. B. in France, 1588; D. at Paris, 1648.

MERSEY, *mer'-se*, a river of England, rising on the borders of Cheshire, Derbyshire, and Yorkshire, and, after a course of 60 miles, falling into the Western Sea, in a large estuary at Liverpool.

MERTHYR, *mer'-ther*, the name of several parishes in Wales, none of them with a population above 1,000.

MERTHYR TYDVIL, *tid'-vil*, a market-town of South Wales, in Glamorganshire, in the valley of the Taaf, 21 miles from Cardiff. It is very irregularly built, and presents the appearance of a straggling heap of cottages. The church is a plain modern building, and there are numerous chapels and schools. There is also a theatre. Merthyr Tydvil derives importance from its iron-works, the Dowlais Company employing about 5,000 men. *Pop.* of the borough, nearly 70,000.—It is in communication by railway with Cardiff, whence is shipped the greater part of its produce.

MERTON, *mer'-ton*, the name of several parishes of England, none of them with a population above 2,000.

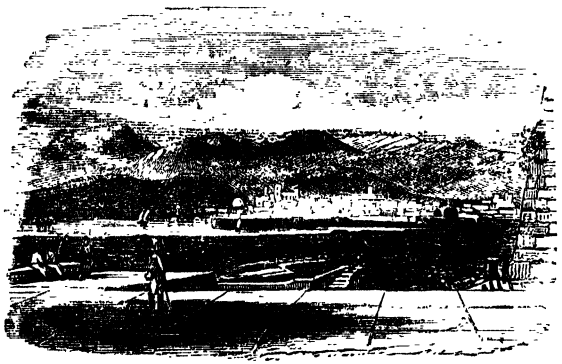
MERVILLE, or MERGHEM, *mair'-gem*, a neat town of France, on the Lys, 18 miles from Lille. *Manf.* Cotton, velvets, and table-cloths. *Pop.* 6,000.

MESCHED, *mesh-ed'*, a city of Persia, in the province of Korassan, standing in a fertile plain, and inclosed by strong walls. Five of its twelve quarters are now in ruins. It is distinguished by a very splendid mausoleum, in which repose the ashes of Imam Reza and of the caliph Haroun-al-Raschid; but its houses are meanly built, and mostly composed of sun-dried bricks. *Manf.* Velvet of the finest quality, and fur pelisses, much esteemed. *Pop.* 50,000. *Lat.* 37° 85′ N. *Lon.* 57° E.

MESCHED ALI, *a'-le*, a town of Asiatic Turkey, 30 miles from the ruins of Babylon. It is well built, defended by a good wall, deep ditch, and lofty towers. The most conspicuous object is the tomb and mosque of Ali, which draws numerous pilgrims towards it. *Pop.* Unascertained.—This place was the capital of the Arab and Christian dynasties, till taken by the Saracens in the 7th century.

MESMER, Frederick Antony, *mes'-mer*, a celebrated German physician, who first propagated the doctrines of animal magnetism, long called Mesmerism, after his name. In 1766 he took the degree M.D. at the university of Vienna, and wrote a treatise on the "Influence of the Planets upon the Human Body." In conjunction with Father Hell, a Jesuit and professor of astronomy at Vienna, Mesmer, in 1772, engaged in a series of investigations relative to the influence of the loadstone in curing disease. They achieved what they termed an "extraordinary success;" but Hell having published a work in which he declared Mesmer to be only a physician who had been employed by him to practically test the new discovery, the latter engaged in a violent controversy with his rival. All the scientific men of Vienna, however, sided with Hell, and Mesmer, who was pronounced to be an impostor, was obliged to quit the city. He visited several parts of Germany and Switzerland, everywhere working astonishing cures, and, in 1778, reached Paris, where he speedily became the most popular professor of the healing art in the French capital. Thousands of people, from peer to peasant, flocked to his apartments for the purpose of being "mesmerized." In a short time, however, he found a rival in a French physician, who embraced his doctrine, and practised it with such success as to gain £100,000 in fees from his patients. Mesmer declared that he was ruined, and applied to the government to grant him "a château and its lands, where he might be enabled to continue his treatment at leisure, and independently of persecution." The French government would not comply with this request, but Mesmer was offered a very large sum, on condition that he would permit certain individuals named by government to witness his proceedings, and report thereon. He soon afterwards left France and settled at Spa, whither a crowd of wealthy patients followed him. A subscription was subsequently entered into for his benefit, and the sum of £14,000 was raised. With this money Mesmer returned to Paris, and again commenced his public treatment; but those persons who had conducted the subscription having set up a society for gratuitously practising animal magnetism, Mesmer, finding no more money was to be got out of his discovery, left France, and repaired to England, where he lived under an assumed name. He subsequently returned to his native country, where he occupied himself in the composition of a new work upon his discovery. He showed himself too much of a charlatan ever to be regarded as a great scientific luminary; it cannot, however, be denied that he was the first to propagate doctrines which have since, in abler and honester hands, been productive of immense benefit to humanity. Animal magnetism is at the present time scarcely admitted to be a true remedial agent; still a zealous investigation of its merits will, doubtless, cause even the most sceptical to believe in its efficacy. Mesmer's principal works were "Memoirs on the Discovery of Animal Magnetism," and "Collection of Facts and Documents relative to Animal Magnetism." B. at Marsburg, Baden, 1734; D. 1815.

MESOLONGHI, or MISSOLONGHI, *me-so-lon'-gi*, a village of Greece, in the government of Ætolia, 22 miles from Lepanto. Here Lord Byron died, in 1824.



MESOPOTAMIA, *mes'-op-o-tai'-me-a*, an ancient name of the country between the Tigris and Euphrates rivers, in Asiatic Turkey. It is now comprised in the pashalics of Bagdad and Diarbekir.

MESSALINA, Valeria, *mes-sa-le'-na*, wife of the emperor Claudian. She was of a most libidinous character, and committed adultery with all the officers of her court. Having been repudiated by Claudian, she espoused her favourite, Silius, who was put to death with her, by order of the emperor, A.D. 46. She was as cruel as she was debauched, and caused many distinguished Romans to be put to death.—There was another of the same name, who was the third wife of Nero, after her first husband, Atticus, had been put to death by that tyrant. On the death of Nero, she devoted the remainder of her days to study, and acquired a great reputation.

MESSENE, *mes-se'-ne*, formerly a city of Greece, but now the modern village of Maurmati, standing nearly in the centre of the ancient city. It is built at the foot of Ithome, 16 miles from Kyparissia, amidst extensive ruins.

MESSINA, *mes'-se-nă*, a city in the N.E. of the island of Sicily, situate on a strait, called from it the Faro di Messina, which separates Italy from Calabria, 8 miles from Reggio. The town runs parallel with the strait, and has, for its finest part, the Marina, a long line of buildings facing the harbour, and running parallel with it for more than a mile. A broad quay separates it from the water. The town sweeps along the swelling eminences, and gradually rises so as to present almost every public edifice in a striking point of view. The whiteness of the buildings forms a beautiful contrast to the dark green of the forests behind.

The public establishments consist of numerous convents, several seminaries, asylums for the poor, and banks; two theatres, a large hospital, town-hall, exchange, custom-house, college, lyceum, public library, and prison. The churches are numerous, and some of them are beautiful buildings, containing a number of admired paintings. The cathedral has a fine Gothic

MESSINA.

front, and a granite pillar which supports the roof. The harbour of Messina is the finest in the Mediterranean, and the trade is considerable. The exports consist of Faro wine, oil, fruits, and corn. Silkworms have long been cultivated with success. *Manf.* Damasks and satins. *Pop.* 85,000. *Lat.* 38° 11′ 10″ N. *Lon.* 15° 34′ 7″ E. Messina is a place of great antiquity, having been known not only to the Romans, but to the Greeks. Garibaldi, the Italian patriot, entered it with his followers, in July, 1860.—The STRAIT of Messina separates Sicily from S. Italy, and has a length of 22 miles and a breadth of from 3 to 10. Opposite Messina is the whirlpool Charybdis.

MESTRE, *mais'-trai*, a town of Italy, 1½ miles from Padua. *Pop.* 6,000. It has a station on the railway to Vicenza.

META, *mai'-ta*, a river of S. America, in New Grenada, rising about 40 miles from Bogota, and, after a course of 500 miles, joining the Orinoco.

METASTASIO, the Abbé Peter Bonaventure, *mai-tas-ta'-se-o*, an eminent Italian poet. He displayed an early genius for poetry, and wrote verses at the age of six years; and he was only 14 when he composed his tragedy, "Il Giustino." A celebrated lawyer and critic, named Gravina, was his instructor, and made him his heir when he died. In 1724 Metastasio produced his play of "Dido," acted at Naples, with the music of Sarro. The success of this piece stimulated him to follow up the same career; and, in 1729, the emperor Charles VI. invited him to Vienna, where he gave him a large pension. The empress Maria Theresa bestowed upon him magnificent presents, as also did Ferdinand VI., king of Spain. The emperor offered him the title of nobility, and the empress the order of St. Stephen; but he declined both. He wrote a great number of operas and other dramatic pieces, which are highly admired in his native country. B. at Rome, 1698; D. at Vienna, 1782. In England he is chiefly known as the author of the libretti of several operas, such as "Artaserse," "La Clemenza da Tito," and "Semiramide." Metastasio's genius has been compared "to the goddess Chloris, of the Greeks, who, in flying through the air, scattered roses wherever she went."

METHVEN, *meth'-ven*, a village and parish of Scotland, 6 miles from Perth. *Pop.* of parish, 2,500.—In this parish is the Lynedoch estate, on which is the grave of "Bessie Bell and Mary Gray," who, in 1666, died of the plague.

METIUS, James, *me'-te-us*, a native of North Holland, who is said by Descartes to have been the inventor of the refracting telescope. About the beginning of the 17th century, this individual, "while one day amusing

himself with a few burning-glasses, after looking through them singly, began to look through them by pairs, placing one at each extremity of a short tube. In this way a convex and concave lens happening to be employed together, the first refracting telescope is said to have been constructed." Barlow, in his "History of Optics," however, declares that the refracting telescope must have been known in England at a much earlier date. Metius lived in the 17th century.

METON, *me'-ton*, an Athenian mathematician, who invented what is called in chronology the golden number. Flourished 432 B.C.

METRODORUS, *met-ro-dor'-us*, a disciple of Democritus, and the master of Anaxarchus and Hippocrates. He was a physician of Chios, and maintained that the matter of the universe is eternal.

METRODORUS, a famous painter and philosopher, who was sent by the Athenians to the Roman general Paulus Æmilius, who, after the defeat of Perseus, had demanded a painter and philosopher; the former to paint his temples, and the latter to instruct his children. Metrodorus gave him satisfaction in both capacities. B. about two centuries B.C.

METTERNICH, Clement Wenceslas, Prince, *mét'-ter-nik*, a celebrated German diplomatist. His ancestors had been distinguished in the wars of the empire against the Turks, and his father, Count Metternich, had obtained some distinction as a diplomatist, and as the associate of Kaunitz. At the age of 15, he entered the university of Strasburg, and, two years afterwards, removed to Mayence, to complete his studies. In 1790 he made his first appearance as master of the ceremonies at the coronation of the emperor Leopold II.; and, in 1794, after a short visit to England, was attached to the Austrian embassy at the Hague, in the following year marrying the heiress of his father's friend Kaunitz. All this time he was serving his apprenticeship in diplomacy. He first came into notice at the congress of Rastadt, where he represented the Westphalian nobility; after which he accompanied Count Stadion to St. Petersburg; was, in 1801, appointed minister at the court of Dresden; then, in 1804, proceeded as ambassador to Berlin, where he took a leading part in the well-known coalition which was dissolved by the battle of Austerlitz. After the peace of Presburg, he became Austrian minister at the court of Napoleon. The rise of the young ambassador had been unusually rapid, and the French emperor greeted him with the remark, "You are very young to represent so powerful a monarchy;" "Your majesty was not older at Austerlitz," replied Metternich, with all the address of a courtier. When the war broke out, in 1809, he returned to the Austrian court, then about to seek refuge in the fortress of Comorn, and was appointed minister of foreign affairs. It was during his tenure of office that he struck out the idea of a marriage between Napoleon and an Austrian archduchess. Napoleon was divorced from Josephine, and Maria-Louisa was escorted by Metternich to Paris. But Austria had only adopted this course as an expedient, and, after the French defeat in Russia, Austria again declared war against France. The grand alliance was signed at Toplitz in the same year, and Metternich was, upon the spot, created a prince of the empire. He took a very prominent part in the subsequent conferences and treaties, and he signed the treaty of Paris on behalf of Austria. He afterwards paid a visit to England, and received the honour of a doctor's degree from the university of Oxford. Upon the opening of the congress of Vienna, he was chosen as its president. With the continental statesmen, the war against Napoleon was, also, a war against revolutionary principles. England, however, fought not against principles, but for self-preservation. What the potentates of the continent

desired quite as much as the putting down of Napoleon, was the extinction of revolution. This was the object of that "Holy Alliance" which has been the object of merited obloquy, and of which Metternich was the presiding genius. In 1822, when Canning assumed the direction of the Foreign Office, England entered an indignant protest against this infamous compact. After the French revolution of 1830, the emperor Francis exclaimed, "All is lost;" but Metternich thought otherwise; he judged, and rightly, that Louis Philippe would take the liberties of oppressed Italy under his patronage. When Pius IX. ascended the papal throne, in 1847, his professions aroused all Italy, and Austrian influence was shaken throughout the peninsula. The French revolution followed, and half the thrones of Europe were emptied of their occupants. At Vienna the shock was also felt; the government fell, in spite of the resistance of Metternich, who maintained his state policy to the last. To calm the people, the old diplomatist was asked to resign: he answered, "I will not resign, gentlemen; I will not resign." The archduke John, without replying to Metternich, simply repeated his former statement; "*I* have already told you, Prince Metternich, resign." "What! is this the return I get for my 50 years' services?" he said, and the next day he left the city with an escort of cavalry. He went to England, where he remained some time. In 1851 he again appeared at the Austrian court; but the old diplomatist was never again requested to undertake office; his power was really gone. Renowned rather than great,—venerated more for his age than for his power,—admired, but not lamented, the old statesman passed away. B. at Coblentz, 1773.

METZ, *metz*, a fortified town of France, in Lorraine, the capital of the department of the Moselle. It is situate at the confluence of the Seille and Moselle, and is surrounded by ramparts, and defended by a great number of bastions and other works, 170 miles from Paris. The breadth of Metz is nearly equal to its length; so that its form is compact, though by no means a regular square. Two quarters—viz., the east and north—are insulated by intersections of the rivers. The latter are bordered in some parts with quays, and crossed by a number of small bridges. Some of the streets are tolerably straight and wide, but laid out, as in other old towns, on no uniform plan. The public buildings are, the governor's residence, to the east of the citadel, a fine edifice; the cathedral, a Gothic structure, with a spire 373 feet high; the theatre, the town-hall, public library, hospitals, and a number of churches and religious houses. Here is likewise an arsenal, with arms for 180,000 men. For education, the chief establishments are a college royal, a university, academy, college, and an artillery and engineers' school. *Manf.* Cotton, linen, muslin, gauze, fustian, chintz, calico, and different kinds of woollens. There are a number of tanneries, and it has an active trade. *Pop.* 60,000.—Metz stands at the head of a branch of the railway from Paris to Strasburg.

METZENSEIFEN, UPPER and LOWER, *metl'-zen-si'-fen*, two neighbouring towns of Hungary, 16 miles from Kaschau. In the neighbourhood are iron-mines and works. *Pop.* 5,500.

METZINGEN, *metz'-ing-en*, a town of Wurtemburg, on the Neckar, 18 miles from Stuttgart. *Manf.* Woollen goods. *Pop.* 4,500.

MEUDON, *meu'-dawng*, a parish and small town of France, 5 miles from Paris. It has a royal palace and park, and a station on the railway to Marseilles.

MEULEBEKE, *me(r)l'-bek*, a town of Belgium, in the province of West Flanders, 14 miles from Bruges. *Pop.* 9,300.

MEULEN, Anthony Francis Vander, *me(r)t'-len*, a celebrated painter, who always accompanied Louis XIV. on his campaigns, the incidents of which he perpetuated with his brush. In drawing the horse, he was without an equal in his time. B. at Brussels, 1634; D. 1690.

MEUN, *me(r)n*, a town of France, in the department of the Loiret, on the Loire, 12 miles from Orleans. *Pop.* 5,000.

MEURS, *moirs*, a town of Prussia, 16 miles from Dusseldorf. It has a Lutheran and a Roman Catholic church, a town-hall, and a national school. *Pop.* 4,000.—Under the French, it was the capital of the department Roer.

MEURSIUS, John, *moir'-se-us*, an eminent Dutch scholar, who, in 1610, was appointed professor of history at Leyden. After the execution of Barneveldt, in 1619, he retired to Denmark. His principal works were "Glossarium Græco-barbarum," and various treatises on different branches of Greek and Roman antiquities. B. near the Hague, 1579; D. 1639.

MEURTHE, *murt*, a department of France, composed of a part of Lorraine, and bounded by the departments of the Moselle, the Vosges, and the Meuse. *Area*, 2,465 square miles. *Desc.* Hilly, and in the N.E. covered with extensive marshes. It is watered by the Moselle, the Seille, the Meurthe, the Mortagne, and a number of smaller streams. *Pro.* Corn, wine, and timber. *Minerals.* Marble, alabaster, lithographic stones, and rock-salt. *Manf.* Glass, crystal, porcelain, paper, linen, woollen, and cotton fabrics. *Pop.* 451,000.

MEURTHE, a tributary of the Moselle, in France, rising in the Vosges, and, after a course of 70 miles, joining the Moselle 6 miles from Nancy.

MEUSE, *mu(r)ze*, a department in the N.E. of France, including the former duchy of Bar and the bishopric of Verdun, and bounded by the grand-duchy of Luxemburg and the departments of the Moselle, the Vosges, the Marne, and the Ardennes. *Area*, 2,370 square miles. *Desc.* Traversed by the mountains of Argonne, which separate the basins of the Meuse and the Seine. *Rivers.* The Meuse, Chiers, Aisne, Ornain, Aire, and Saulx. *Pro.* Wheat, fruit, and timber. Cattle- and sheep-rearing are extensive. *Manf.* Iron goods, paper, and glass. *Pop.* 330,000.

MEUSE, a river of Europe. (*See* MAESE.)

MEYER, James, *mi'-air*, a Flemish historian, sometimes called Baliolianus, after his birthplace. He was rector of Blankenberg. His works are "Annales Rerum Flandricarum," "Flandricarum Rerum Decus." B. near Bailleul, in Flanders, 1491; B. 1552.

MEYERBEER, Giacomo, *mi'-er-bair*, a celebrated composer, of Hebrew descent, who came of a wealthy family. He was the schoolfellow of Carl Maria von Weber. His first dramatic piece, "Jephtha's Daughter," was produced at Berlin when he was only 18 years of age. His style was formed upon the Italian models. His best operas were "Sémiramide," "Robert le Diable," "Le Prophète," and "L'Etoile du Nord," to conduct which last in person, at the Royal Italian Opera, he visited England in 1855. B. at Berlin, 1794.

MEYRICK, Sir Samuel, *mer'-rik*, an eminent antiquarian, whose chief works were "Arms and Armour," "Costume of the Original Inhabitants of the British Islands," and "A Critical Enquiry into Ancient Armour, as it existed in Europe, but more particularly in England, from the Norman Conquest to the Reign of Charles II." B. 1783; D. 1848.

MEXICO, THE REPUBLIC OR CONFEDERATION OF, *mex'-i-ko*, a vast extent of country founded by Spain, on the N. side of the isthmus which connects N. and S. America. It was formerly of much greater extent, but recent events have reduced it to one-half its original dimensions. On the S. it now borders on Guatemala, and on the N. and N.E. is separated from the United States by the Rio Grande del Norte and the 34th parallel. Its other sides are washed by the Pacific and Atlantic oceans. *Political divisions.* As at present constituted, this country is divided into the following states, departments, and territories:—Chihuahua, Chiapas, Cohahuila, Durango, Guanaxuato, Guerrero, Jalisco, Mexico, Mechorcad, Nuevo Leon, Oajaca, Puebla, Queretaro, San Luis Potosi, Sonora, Sinaloa, Tabasco, Tamaulipas, Vera Cruz, Yucatan, Zacatecas, the Federal district (Mexico), Tlascala (territory of), Colima (territory of), Lower California (territory of). *Area*, 834,140 square miles. *Desc.* About one-half of Mexico is situate under the burning sky of the tropics, while the other half lies within the temperate zone. This is owing partly to the general and prodigious elevation of the land. It has been estimated that about three-fifths of the country is spread out in extensive plains of from 6,000 to 8,000 feet in height. In these plains the climate is comparatively temperate, the average heat not exceeding that of Rome or Naples.

Towards the W. the descent from the table-land is much more steep than towards the E. The E. declivity of the Cordillera is so regular and uniform, that when once the traveller begins to descend from the great central plain, he continues the descent until he arrives at the E. coast. The W. coast is furrowed by four very remarkable oblong valleys, of which the respective heights above the level of the sea are 3,217, 1,685, 557, and 518 feet. Much of the country is fertile, but much of it is arid, from the excessive dryness of the atmosphere. *Coasts and Harbours.* The W. coast possesses some excellent harbours; namely, San Francisco, in New California, San Blas, in Guadalaxara, near the mouth of the river of Santiago, and especially Acapulco, which are magnificent ports. The last is one of the finest basins in the world, but it is now little frequented. There are several others of less importance. The eastern coast does not, however, possess the same advantages as the western. Vera Cruz is merely a bad anchorage between the shallows of La Calleta, La Gallega, and La Lavandera. The whole coast of Mexico is also beset with sand-banks, which are raised by the continual and uniform action of the trade-winds on the ocean. Another very serious inconvenience is common to both coasts,—that of being rendered inaccessible for several months by violent tempests, which effectually prevent all navigation, and which are caused by the N.W. winds blowing in the Gulf of Mexico, from the autumnal to the spring equinox. *Mountains.* The whole country may be regarded as an enormous ridge, raised by volcanic force, between two oceans, and branching off into several chains as the land grows wider. The inhabitants, however, are less disturbed by earthquakes and volcanic explosions than those of Quito. There are five burning mountains; namely, Orizaba, or Citlaltepetl (Star-mountain), of the height of 17,374 feet; Popocatepetl (Smoking-mountain), of the height of 17,716 feet; and the mountains of Tuxtla, Jorullo, and Colima. Earthquakes are by no means rare on the coasts of the Pacific and in the environs of the capital. *Rivers.* Mexico suffers in general from the want of water and of navigable rivers. The great river of the S., Rio Bravo del Norte, and the Rio Colorado, are the only ones worthy of fixing the attention. The former forms all the N.E. frontier. The others are the Rio Guasacualco and the Rio Alvarado, both to the S.E. of Vera Cruz; the Rio de Moctezuma, which carries the waters of the lakes and valley of Tenochtitlan to the Rio de Panuco; the Rio de Zacatula, the great river of Santiago, which falls into the Pacific Ocean. *Lakes.* The most remarkable are the Chapata, covering an area of 1,500 square miles. *Climate.* From the singular construction of the country, the coasts alone possess a warm climate. These are distinguished by the appellation of the *Sierras Calientes*, or the warm regions. In this region the climate, more especially in populous cities, is exceedingly fatal to Europeans. On the declivity of the Andes, at an elevation of from 3,936 to 4,920 feet, there reigns perpetually a soft spring temperature, which never varies more than seven or nine degrees. The natives give to this region the appellation of Temperate. The third region is distinguished by the name of the Cold Region, and comprehends the plains which are elevated more than 7,000 feet above the level of the sea. Here the temperature is mild and agreeable. Above this, the climate is rude and disagreeable, even to an inhabitant of the north. *Zoology.* Innumerable herds of cattle run wild in the savannahs and woods, the skins and fat of which form an important article of commerce. There are also deer, elk, buffalo, cabrie, the grisly black bear, wild horses, the tapir, the jaguar, the puma, and the tiger-cat. The woods swarm with gluttons, sloths, porcupines, ant-eaters, weasels, polecats, armadilloes, cavies, and monkeys. Sheep are numerous; but their wool is of little value. Among the birds may be reckoned those of the domestic kind, goldfinches, nightingales, and upwards of twenty species of singing birds; pigeons, parrots, parroquets, eagles, vultures, pelicans, ravens, and macaws. Serpents are numerous; as, likewise, scorpions, spiders, ants, and mosquitoes and locusts, which are sometimes exceedingly destructive. In the rivers, in the lakes, and on the coasts, are found a variety of fish and a great number of alligators, the Mexican crocodile, and the

cayman. *Pro.* Sugar, cacao, cotton, coffee, wheat, hemp, flax, silk, oils, and wine. Among the forest-trees are cedar, brazil-wood, mahogany, and every sort of timber, either for use or ornament. The fruits are, pine-apples, plums, dates, water-melons, apples, peaches, quinces, apricots, pears, pomegranates, figs, black cherries, walnuts, almonds, olives, chestnuts, and grapes. In the markets of Mexico there are sold, exclusive of European fruits, about sixty different sorts of native productions. The country also produces a great variety of valuable drugs; such as copal, anime, tacamahac-caramia, liquid amber, balsam of Tolu, guaiacum, mechoacan-root, sarsaparilla, &c. Other productions are cochineal, dyeing-woods, tobacco, and indigo. The agricultural products are, in the warmer regions, the plantain or banana-tree, the cassava-root, the farina of which, called manioc, is made into bread; maize, of which the cultivation is extensive and important. In the temperate region are cultivated European grains, such as wheat, barley, oats, and rye. The absolute want of rain during the summer months is very injurious to the agriculture of Mexico; and the inhabitants are, in consequence, compelled to have recourse to artificial irrigation. In places which are not artificially watered, the Mexican soil yields only pasturage to the months of March and April. Mexico now possesses all the garden stuffs and fruit-trees of Europe. The central table-land produces, in the greatest abundance, cherries, prunes, peaches, apricots, figs, grapes, melons, apples, and pears. The olive-tree was formerly rarely to be met with in Mexico; but it is now cultivated to a considerable extent. *Minerals.* Very important. The mountains contain ores of every kind of metal; comprising not only the precious metals, but mercury, iron, copper, lead, tin, alum, crystal, vitriol, and different kinds of precious stones. In the province of Zacatecas, about 200 miles N.W. of Mexico, and San Luis de Potosi, there are silver-mines, formerly deemed the richest in the world; but the most important mines, at present, are in the province of Guanaxuato, about 100 miles from Mexico. There are, besides, numerous other mining stations scattered throughout the country. The metallic produce of Mexico also forms one of the most important objects of its industry. The American mines are distinguished rather by the abundance of their produce than by the richness of that produce. The quantity of silver annually extracted from the mines of Mexico is ten times greater than what is furnished by all the mines of Europe; and, on the other hand, gold is not much more abundant than in Hungary and Transylvania. The Mexican gold is, for the most part, extracted from alluvial grounds, by means of washing. Another part of the Mexican gold is extracted from the veins which intersect the mountains of primitive rock. More than three-fourths of the silver obtained from America is extracted from the ore by means of quicksilver; and the loss of the quicksilver in this operation is immense. The mines are surrounded by cultivated fields, towns, and villages; the neighbouring summits are crowned with forests; and a combination of circumstances facilitates the acquisition of the subterraneous wealth of this country. *Manf.* Unimportant; consisting of sugar, rum, wine, brandy, aloes, glass, paper, earthen and stone ware, thread, and tissues of cotton, wool, and silk. In time of war, the want of communication with the mother country, and the regulations prohibiting commerce with neutrals, favoured the establishment of manufactures of cottons, calicoes, fine cloth, and whatever is connected with the refinements of luxury. The working of gold and silver, and the coining of money, may be reckoned among the most important. Chandeliers, and other ornaments of great value, are frequently executed with taste and elegance. Carriages are made, and the cabinet-makers execute articles of furniture remarkable for their form, and for the colour and polish of the wood. In the interior provinces, harpsichords and pianofortes are manufactured. The Indians display an indefatigable patience in the manufacture of small toys in wood, bone, and wax. *Exp.* Gold and silver, in coin, bullion, and plate; cochineal, sugar, flour, indigo, salt meat and other provisions, tanned hides, sarsaparilla, vanilla, jalap, soap, logwood, pimento. *Imp.* Bale goods, including woollens, cot-

tons, linens, and silks; paper, brandy, cacao, quicksilver, iron, manufactured and unmanufactured; steel, wine, and beeswax. *Inhabitants.* The inhabitants of Mexico are composed of several races. 1. The whites born in Europe; 2. the Spanish Creoles, or whites of European extraction born in America; 3. the Mestizoes, descendants of whites and Indians; 4. the Mulattoes, descendants of whites and negroes; 5. the Zambos, descendants of negroes and Indians; 6. the Indians, or copper-coloured indigenous race; 7. the African negroes. *Gov.* Republic, consisting of a senate and a chamber of deputies. These latter are elected by the people for two years. *Pop.* Estimated at 7,662,000. *Lat.* between 16° and 33° N. *Lon.* between 92° and 117° W.—Mexico was, in 1519, conquered by the Spaniards, led by Cortez; and, after having been long engaged in a struggle with the mother country, and having been subjected to her authority, dissolved the connection in 1820. In 1822 it was acknowledged independent, and was governed by an emperor. In 1824 the form of government was changed into that of a federal republic, with the legislative power vested in a general congress, consisting of a senate and chamber of deputies. In 1835, Santa Anna, a successful general, changed the federal into a central republic. In 1849 its armies were beaten by those of the United States, to which it was forced to yield upwards of 530,000 square miles of territory. In 1853 further concessions were made to the United States, which, by having obtained a portion of the valley of Massilla, has secured command of the Pacific, and, by forming a railway through this valley, can unite the Atlantic with the Pacific.

MEXICO, the capital of the Mexican Confederation, is the oldest city in America of which we have any account, and stands in a plain 7,470 feet above the level of the sea. The original city, or, as it was called, Tenochtitlan, was founded by the Mexicans in the year 1325, and was situate in the valley, on a group of islands in Lake Tezcuco, and connected with the mainland by three principal dykes, or causeways, formed of stone and earth. The ancient city was taken by Cortez, in the year 1521, and was completely destroyed, and the present city has risen out of its ruins. The situation is exactly the same; but owing to the diminution of the waters in Lake Tezcuco, the modern city stands on dry land, about three miles distant from the lake in which it was formerly built. It is inclosed by walls, and the ground on which it stands is quite level. The streets are drawn at right lines from each other, and, being very spacious, appear, in general, rather deserted. The lake communicates with the city by means of various small canals, which flow through some beautiful streets, and are covered with craft and canoes, which appear every day, loaded with supplies of fruit, flowers, and other produce, and make their way as far as the walls of the palace, situate in the great square. The city is entered by seven stone causeways, three of which were built by the Indians; the others are the work of the Spaniards. The public buildings are magnificent, and some of them of the most beautiful architecture. Those which chiefly attract attention are, the cathedral, of which a small part is in the Gothic style (the principal edifice, which has two towers ornamented with pilasters and statues, is of very beautiful symmetry); the treasury; the convents, among which is particularly distinguished the great convent of St. Francis, founded in the year 1531; the hospital, or rather the two united hospitals; the *Accordada*, or prison, of which the apartments for the prisoners are generally spacious and well aired; the School of Mines, and the old provisory establishment, with its fine collections in physics, mechanics, and mineralogy; the botanical garden, extremely rich in vegetable productions, either rare, or interesting with a view to commerce; the university and public library; the Academy of Fine Arts, with a collection of ancient casts; a sepulchral monument, consecrated to Cortez, in a chapel of the Hospitale de los Naturales, and the mint. Mexico being situate at the extremities of the lakes Tezcuco and Xochimilco, is abundantly supplied, by means of boats, with all the productions of the surrounding country. The houses are not loaded with useless ornaments. Two sorts of hewn stone, one a porphyry, give to the Mexican buildings an air of solidity, and sometimes of magnificence. Its general appearance is much heightened by the beautiful character of the scenery by which it is surrounded. The eye sweeps over a vast plain of carefully-cultivated fields, which extend to the very foot of the colossal mountains, covered with perpetual snow, which inclose the valley; among which the famous volcanoes of La Puebla, Popocatepetl, and Iztaccicihuatl, are the most distinguished. The first of these forms an enormous cone, of which the crater, continually inflamed, and throwing up smoke and ashes, opens in the midst of eternal snows. *Manf.* Cloth, woollens, gold and silver lace, hard soap, and tobacco, which is held as a royal monopoly. The working of gold and silver, in all its branches, is carried to great perfection, as well as various other arts dependent on luxury and wealth. *Pop.* about 230,000. *Lat.* 19° 25′ 7″ N. *Lon.* 99° 5′ W.

MEXICO, a state of the Mexican Confederation, bounded on the S. by the Pacific, and on the other sides by Michoacàn, Queretaro, Vera Cruz, and La Puebla. *Area*, 16,038 square miles. *Desc.* Well watered, and rich in minerals. *Pop.* about 1,000,000.

MEXICO, GULF OF, a large bay or gulf of the Atlantic, extending N. to S. from the coast of Florida to the coast of Tabasco and Yucatan, about 600 miles, and E. and W. from Cuba to the coast of Mexico, about 700. *Area*, 800,000 square miles. The gulf-stream sets into it at its S.E. part, and leaves it at its N.E. side.

MEXICO, a township of New York, U.S., 145 miles from Albany. *Pop.* 4,500.

MEZERAI, Francis Eudes de, *mez'-e-rai*, an eminent French historian, who was educated at the university of Caen; on leaving which, he obtained a military employment, and served two or three campaigns in Flanders. Having abandoned the army, he projected the "History of France," while writing which he was liberally encouraged by Cardinal Richelieu; and on its completion in 1651, he obtained a pension from the king. He was also admitted a member of the Academy, and had a principal share in the compilation of their dictionary. Besides his History of France, and an abridgment, he wrote a treatise on the Origin of the French, a continuation of the History of the Turks, several satires against the ministry, "History of a Mother and Son," &c. B. at Ry, near Argentan, 1610; D. 1683.

MEZIÈRES, *mez'-e-air*, an ancient and well-built town of France, on a peninsula formed by the Meuse, 45 miles from Rheims. It has a Gothic church, and is commanded by a citadel. A suspension-bridge connects it with Charleville, on the opposite side of the Meuse. *Pop.* 5,300.—In 1520, the Chevalier Bayard successfully held this place against 40,000 Spaniards, and, in 1815, it held out for two months against the Russians.

MEZO, *me-zo'*, a prefix to the names of numerous places in Hungary.

MEZZOFANTI, Joseph Caspar, *met-so-fan'-te*, a celebrated linguist, was the son of a carpenter, and was intended for the same trade; but being taken under the patronage of Father Respighi, was sent to the university of Bologna, where he so distinguished himself, that at the age of 22 he was appointed professor of Arabic. At that period he was master of the Latin, Greek, Hebrew, Arabic, Spanish, French, German, and Swedish languages. During the war for which northern Italy was so long the field, Mezzofanti came into contact with soldiers of the Austrian, Russian, and French armies, and always turned the opportunity such meetings afforded him of studying the modern languages, to the best account. He thus speaks of his mode of studying at Bologna:—"The hotel-keepers were in the habit of notifying to me the arrival of strangers, and I never hesitated, when anything was to be learned thereby, to call upon them, to interrogate them, to make notes of their communications, and to take lessons in the pronunciation of their several languages. There were a few learned Jesuits, too, and several Spaniards, Portuguese, and Mexicans, residing in Bologna, from whom I received valuable assistance, both in their own and in the learned languages. I made it a rule to learn every strange grammar, and to apply myself to every new dictionary that came within my reach. I was constantly filling my head with new words. Whenever a stranger, whether of high or low degree, passed through Bologna, I tried to turn the visit to account,

either for the purpose of perfecting my pronunciation, or of learning the familiar words and terms of expression. Nor did all this cost so much trouble; for, in addition to an excellent memory, God has gifted me with remarkable flexibility of the organs of speech." In 1812, he became assistant, and in 1815, chief librarian of his university; and every traveller through Bologna made a point of seeing the great linguist. Lord Byron, when he visited the place, called him "a walking polyglot, a monster of languages, and a Briareus of parts of speech." In 1822, according to Lady Morgan, he spoke forty languages. Although he had received many flattering offers to take up his residence in Paris, Vienna, and Rome, it was not until 1831 that he was induced to settle in the last city. After being appointed to some minor posts, he was nominated keeper of the Vatican library, retaining the post until the year 1838, when he was created a cardinal. In 1841, a great German scholar thus spoke of him:—"He is familiar with all the European languages; and by this I mean not only the ancient classical tongues and the modern ones of the first class, such as the Greek and Latin, or the Italian, French, German, Spanish, Portuguese, and English;—his knowledge extends also to the second class, viz., the Dutch, Danish, and Swedish; to the whole Sclavonic family, Russian, Polish, Bohemian or Czechish; to the Servian, the Hungarian, the Turkish; and even to those of the third and fourth classes,—the Irish, the Welsh, the Wallachian, the Albanian, the Bulgarian, and the Illyrian. Even the Romani of the Alps and the Lettish are not unknown to him; nay, he has made himself acquainted with Lappish. He is master of the languages which fall within the Indo-Germanic family,—the Sanscrit, the Persian, the Koordish, the Georgian, the Armenian; he is familiar with all the members of the Semitic family,—the Hebrew, the Arabic, the Syriac, the Samaritan, the Chaldee, the Sabaic,—nay, even the Chinese, which he not only reads but speaks. Among the Hamitic languages, he knows Coptic, Ethiopic, Abyssinian, Amharic, and Angolese." Mezzofanti, although incomparably the greatest linguist that ever lived, left no works, philological or otherwise, to perpetuate his fame; and notwithstanding his ability to express himself in fifty-six different languages, and his acquaintance with sixty-four others, he wrote nothing of importance relative to any one of them. B. at Bologna, 1774; D. at Rome, 1849.

MIAKO. (*See* MEACO.)

MIAMI, *mi-ăm'-i*, a county of Ohio, U.S. *Area*, 410 square miles. *Pop.* 25,000.—Another in Indiana. *Area*, 376 square miles. *Pop.* 12,000.—Also the name of several townships, none of them with a population above 5,000.

MIAMI, GREAT and LITTLE, two rivers of the United States, entering the Ohio.

MIAMI OF THE LAKES, a river of the United States, which rises in Indiana, and flows into Lake Erie.

MIAVA, *me-a'-va*, a town of Hungary, on an affluent of the Morava, 50 miles from Presburg. *Manf.* Woollens and linen. *Pop.* 10,000.

MICAH, *mi'-ka*, the sixth of the minor prophets, lived in the reigns of Jotham, Ahaz, and Hezekiah, between 759 and 699 B.C. He prophesied the captivity of the tribes, and their deliverance by Cyrus; also of the coming of the Messiah.

MICHAEL I., *mi'-kel*, emperor of the East, succeeded to the throne on the death of Nicephorus, in 811. He was a great prince, and the father of his people; but was deposed by Leo the Armenian, his general, in 813. He then retired to a monastery, where he spent the remainder of his days in devotion.

MICHAEL II. was born in Upper Phrygia, of an obscure family; but was ennobled by Leo the Armenian. That monarch afterwards sent him to prison, and condemned him to death; but, the night previous to his intended execution, Leo was assassinated, and Michael placed on the throne, A.D. 820. He endeavoured to force his subjects to celebrate the Jewish sabbath and passover, and was guilty of great cruelties; on which his general, Euphemius, revolted, and proclaimed himself emperor; but was slain near Syracuse, in Sicily. D. 829.

MICHAEL III. succeeded his father Theophilus, in 842, under the regency of his mother Theodora, whom he compelled to enter a monastery with her daughters. He at first associated Bardas, his uncle, with himself in the empire, and, at his instigation, sent St. Ignatius, patriarch of Constantinople, into exile. Michael afterwards put Bardas to death, add elevated Basil the Macedonian to the title of Cæsar, by whom he was assassinated, in 867.

MICHAEL IV., usually styled the Paphlagonian, from the country where he was born, of obscure parentage. He obtained the imperial throne in 1034, through the influence of the empress Zoe, who, being enamoured of his person, murdered her husband, Romanus Argyrus, to obtain her wishes. Michael made war, with success, against the Saracens and Bulgarians; and afterwards retired to a monastery, where he died, in 1041.

MICHAEL V. succeeded his uncle, the preceding emperor, in 1041, after having been adopted by the empress Zoe, whom he exiled a few months afterwards, which so irritated the people, that they deprived him of his eyes and sent him to a monastery. Zoe and her sister Theodora then reigned in conjunction.

MICHAEL VI., or the Warrior, reigned after the empress Theodora, in 1056; but, the year following, he was compelled to relinquish the sceptre to Isaac Comnenus; on which Michael retired to a monastery, in 1057.

MICHAEL VII. was the eldest son of Constantine Ducas and of Eudocia. That princess, a few months after the death of her husband, married Diogenes, a Roman, whom she caused to be proclaimed emperor; but, in 1071, the usurper was taken prisoner by the Turks, and Michael regained the throne. In 1078, Nicephorus took Constantinople by the aid of the Turks, and Michael was obliged to retire to a monastery. He afterwards took orders, and became archbishop of Ephesus.

MICHAEL VIII., surnamed Palæologus, regent of the empire during the minority of John Lascaris, whom he deprived of his throne and his eyes, in 1260. The year following, he retook Constantinople. He signed an act for effecting a union between the Greek and Latin churches, which, however, did not succeed. Pope Martin IV. excommunicated him, as the supporter of heresy and schism. D. 1282.—He is not to be confounded with MICHAEL PALÆOLOGUS, who was crowned emperor in 1214, governed the empire under his father, Andronicus the elder. D. 1220.

MICHAEL-ANGELO BUONAROTTI, *an'-jal-lo bo-na-rot'-te*, a celebrated Italian painter, sculptor, and architect. Born of an ancient Tuscan family, he evinced, from his earliest youth, the greatest talent for art. He was placed under the tuition of Domenichino and Ghirlandajo, the two most celebrated artists of the time; but quitted them at the age of 15 years, having already acquired all that they could teach him. Lorenzo de' Medici soon afterwards assigned him apartments in his palace, and treated him as if he were his own son. At the death of his magnificent patron, his fame was established. Julius II. invited him to settle at Rome, where Michael-Angelo carved the mausoleum of that pontiff: he also painted in fresco the ceiling of the Sistine chapel, and was, in succession, the favourite artist with three popes, — Leo X., Paul III., and Julius III. At the age of 40, he turned his talents to architecture, and constructed one of the grandest examples of that art,—the cupola of St. Peter's. Michael-Angelo's commanding genius has never been contested: all place him in the first rank as painter, sculptor, and architect. At Mantua there is a "Sleeping Cupid," and at Rome a "Bacchus," which Raffaelle said was worthy of Phidias or Praxiteles. His "Last Judgment" remains a marvellous proof of his great genius as a painter. Beauties and excellencies of all kinds are to be seen in his works; but his manner was sometimes exaggerated,—a defect which may be pardoned in one who was ever seeking to attain the sublime in art. He was the author of some sonnets. B. in Tuscany, 1474; D. 1563.

MICHAEL, St., the largest island of the Azores, belonging to Portugal, in the Atlantic Ocean. *Area*, 224 square miles. *Pro.* Maize, wheat, fruit, and wine. *Manf.* Druggets and coarse pottery. *Pop.* 81,000. *Lat.* 37° 44′ N. *Lon.* 25° 30′ W.

MICHAEL'S, St., the name of numerous parishes

in England, none of them with a population above 5,000.

MICHAEL, ST., MOUNT, a granite rock in Mount's Bay, Cornwall, opposite Marazion. It rises in the form of a cone, and has, on its summit, a chapel, founded in the 5th century. It is the Ocrium of Ptolemy, whence tin was shipped in ancient times from Cornwall.

MICHAEL, ST., a river of Maryland, U.S., entering Chesapeake Bay after a course of 16 miles.

MICHAELSTONE, *mi'-kel-stone*, the name of several parishes in England, none of them with a population above 7,000.

MICHAUD, Joseph, *me'-sho*, a French historian, who was a member of the Institute under the Empire, and celebrated, in verse, the marriage of Napoleon and the birth of the king of Rome. Under the Restoration he acted as newspaper censor. His principal works were,—"History of the Crusades," and "History of the Hundred Days." B. in Savoy, 1767; D. 1839.

MICHEL, ST., *me'-shel*, the name of numerous parishes and villages in France, none of them with a population above 4,000.

MICHELET, Jules, *me'-she-lai*, an eminent modern French historian, who, in 1826, was appointed teacher of history and languages at the Collége Rollin. He commenced his literary career with the composition of several elementary works on the study of history, which, obtaining considerable popularity, attracted the attention of the government towards him as a writer of research. He received the appointment of chief officer in the historical department of the French Archives, and was soon afterwards selected by Guizot to continue the latter's lectures on history to the Faculty of Literature. In 1838 he was appointed professor of history in the College of France. In 1845-46 considerable attention was directed towards two works of this author, translations of which appeared in England, under the titles, "The People," and "Priests, Women, and Families." In consequence of the attacks made in these works upon the ecclesiastical party, Guizot, the prime minister, interdicted his lectures. In 1847 he commenced his "History of the French Revolution;" upon which, and the "History of France," he has ever since been engaged. Translations of both these works, as far as they have been published, have appeared in England. Michelet's style as an historian is marked by great vehemence and pictorial power. He is strongly given to generalize, and has a great deal of the poet in his nature. His latest works are "The Bird," "The Insect," and two small treatises on social questions. B. at Paris, 1798.

MICHIGAN, *mich'-i-găn*, one of the United States. It consists of two separate peninsulas, bounded N. by the Straits of Michillimackinack, N.E. by Lake Huron, E. by St. Clair's river and lake, by Detroit river, and Lake Erie, S. by Ohio and Indiana, and W. by Lake Michigan. *Area*, 65,000 square miles. *Desc.* The N. peninsula is covered with woods, lakes, and rivers, and is mountainous and rocky; the S. is level, and comprises a large extent of prairie-land. *Pro.* Wheat, oats, maple-sugar, wool, and live stock. *Minerals.* Copper, lead, coal, gypsum, limestone, and marl. *Manf.* Woollens, cottons, iron-forges and furnaces, tanneries, breweries, and distilleries. *Pop.* about 1,000,000. *Lat.* between 41° 40′ and 47° 30′ N. *Lon.* between 82° 35′ and 90° 50′ W.—This state was, in 1836, admitted into the Union.

MICHIGAN, LAKE, one of the five great lakes of N. America, included in the territories of the United States. *Area*, 20,000 square miles. It has a communication with Lake Huron, by the river or channel of Michillimackinack. *Lat.* 41° 15′ to 45° 35′ N. *Lon.* 84° 40′ to 87° 8′ W.

MICHIGAN CITY, a town of the United States, on the S. coast of Lake Michigan, forming the terminus of several canals and railways. *Pop.* 1,000.

MIDAS, *mi'-dăs*, a king of Phrygia. Having shown hospitality to Silenus, the preceptor of Bacchus, he was permitted by the god to choose whatever recompense he pleased. He had the avarice to demand that whatever he touched might be turned into gold. His prayer was granted; but, when the very meats which he attempted to eat became gold in his mouth, he begged Bacchus to take away so fatal a present. He was then ordered to wash himself in the river Pactolus, whose sands were turned into gold by the touch of Midas. Midas subsequently declared that Pan was superior to Apollo in singing and playing upon the flute; for which opinion the offended god changed his ears into those of an ass, to show his ignorance and stupidity.

MIDDLEBURG, *mid'-del-boorg*, a well-built town of the Netherlands, the capital of the province of Zealand, situate in the small island of Walcheren, 45 miles from Rotterdam. It is no longer fortified, but has round it a circular mound of earth. Some of its streets are wide and handsome, and it is on the whole tolerably regular. The market-place forms a spacious square, and part of the town is traversed by canals, across several of which are drawbridges. It has a town-house, churches, and a high spire, school of design, public library, and agricultural society. *Manf.* Starch, glass, paper, powder, and sugar; and there are saw-mills. *Pop.* 16,000.—It was the head-quarters of the British army in the expedition of 1809, and in autumn is very unhealthy.

MIDDLEHAM, *mid'-del-ham*, a market-town of the W. Riding of Yorkshire, on the Ure, 10 miles from Richmond. Here are the ruins of a once magnificent castle, built in 1190. In it Edward IV. was detained a prisoner by the earl of Warwick.—MIDDLEHAM MOOR, in the neighbourhood, is a noted place for the training of race-horses.

MIDDLESBOROUGH, *mid'-dels-brur*, a river-port and parish of the N. Riding of Yorkshire, on the Tees, 4 miles from Stockton. This is a port which has risen for the shipment of coals. It has an observatory, reading-rooms, and a national school. *Manf.* Rope and sail-cloth. In the neighbourhood are iron-works and shipbuilding-yards. *Pop.* 8,000.

MIDDLESEX, *mid'-del-sex*, an inland county of England, comprising the city of London, and bounded S. by Surrey and part of Kent, N. by Hertfordshire, W. by Buckinghamshire, and E. by Essex. The Thames divides it from Surrey and Kent, the Colne from Buckinghamshire, and the Lea from Essex. Between it and Hertfordshire there is no natural boundary. *Area*, 282 square miles. *Desc.* In general a gently waving surface, with considerable inequalities in some parts, and extensive levels in others. The ground rises from the banks of the Thames towards the north; and within a few miles of London there is a range of eminences,—namely, Hampstead, Highgate, Muswell-hill, and others; and a yet higher and more extensive ridge runs north-eastward in Edgeware and Barnet, to the forest scenery of Enfield Chase. The Thames, the Lea, and the Colne, form the boundaries of the county. *Rivers.* The Brent is the chief. The New River supplies great part of the metropolis with water. There are, besides, the Grand Junction, the Paddington, and the Regent canals, which greatly assist the internal communication of the county. *Pro.* In Middlesex, almost the only business consists in providing articles of necessity for the metropolis. Of these, hay, milk, and vegetables are the chief. The greatest portion of the land is in meadow and pasturage; about one-fifth of the whole is occupied with nurseries, gardens, and pleasure-grounds, and not more than one-fifth is in tillage. The corn crops raised are chiefly wheat and barley, the green crops various; such as beans, pease, turnips, cabbages, white and red clovers, rye-grass, &c. The raising of willows for the basket-makers is pursued to a considerable extent, and forms a very lucrative branch of cultivation. The extensive tracts of waste land, uncultivated heath, and commons, such as Hounslow Heath, Finchley Common, Enfield Chase, &c., which not long ago existed in this county, are now mostly inclosed, and in the way of improvement. *Pop.* about 2,000,000.

MIDDLESEX, the name of several counties in the United States. 1. In Massachusetts. *Area*, 925 square miles. *Pop.* 162,000.—2. In Connecticut. *Area*, 345 square miles. *Pop.* 32,000.—3. In New Jersey. *Area*, 285 square miles. *Pop.* 30,000.—4. In the east part of Virginia. *Area*, 105 square miles. *Pop.* 5,000.

MIDDLETON, *mid'-del-ton*, a market-town of Lancashire, 6 miles from Manchester. It has a church, several chapels, and a free grammar-school. *Manf.* Cotton

and silk goods. *Pop.* 17,000.—Also the name of various parishes in England, none with a population above 5,000.

MIDDLETON, a market-town of Ireland, in the county of Cork, on a navigable stream of the same name flowing into Cork harbour. It is 14 miles from the city of Cork. *Pop.* 6,000.

MIDDLETON, Conyers, a celebrated English divine and critic, received his academical education at Trinity College, Cambridge, of which he was chosen fellow in 1706. In 1717 he was created D.D., on which occasion he resisted the claim of Dr. Bentley, regius professor, to exorbitant fees. This occasioned a lawsuit, in which Middleton triumphed. A personal enmity was the consequence of this affair; and when Bentley printed his proposals for a new edition of the Greek Testament, Middleton attacked them with such force that the design was abandoned. In 1724 he spent some time in Italy, and on his return published his famous "Letter from Rome," showing that the religious rites of the Roman Church were drawn from the heathens. An attack on Dr. Waterland's "Vindication of the Scripture," in 1730, drew upon Middleton the charge of infidelity, and he narrowly escaped academical censure. In 1741 appeared his "Life of Cicero," a very curious and valuable work, and highly necessary towards forming a just idea of the character and writings of that great man, as well as exhibiting an exact picture of the Roman republic in his time. In 1743 he published the Epistles of Cicero to Brutus, and those of Brutus to Cicero, in Latin and English, with a vindication of their authenticity. In 1747 appeared his "Discourse on the Miraculous Powers supposed to have subsisted in the Christian Church, from the earliest ages." This work gave great alarm to the clergy, and numerous answers were written to it. In 1752 appeared an edition of all his works, with the exception of the "Life of Cicero." Dr. Middleton's style is admirable, and his learning was profound and multifarious. B. in Yorkshire, 1683; D. 1750.

MIDDLETON, Sir Hugh, a wealthy citizen and goldsmith of London, who, in 1606, offered, at his own cost, to supply London with pure water. His proposal being accepted, he commenced what he termed the "New River," selecting the Chadwell and Amwell springs at Ware, in Hertfordshire, as the sources thereof. The river had a course of about 37 miles, and its projector had stipulated to complete it in four years; but the mechanical appliances of that day not proving equal to such a speedy completion of the work, and Middleton's fortune being, moreover, exhausted, he applied to his fellow-citizens for assistance. Meeting with no response, he petitioned James I., who entered into an agreement with him to pay half the present or prospective expenses, on condition of being entitled to half the property. In little more than a year the great work was completed, and on the 29th September, 1613, the water of the New River entered a reservoir prepared for its reception at Sadlers Wells, near Pentonville. The work had occupied five years and five months in its execution, and had cost £500,000. There was no dividend, however, for nineteen years, and then only one under £12. Meanwhile Middleton had been knighted, but had been compelled to sell his shares, and made a profession of what is now termed civil engineering. In token of his services, he was created a baronet in 1622. These services were set forth as follows:—"For bringing to the city of London, with excessive charge and greater difficulty, a new cut, or river of fresh water, to the great benefit and inestimable preservation thereof. 2. For gaining a very great and spacious quantity of land, in Brading Haven, in the Isle of Wight, out of the bowelles of the sea; and, with banks and pyles, and most strange defensible and chargeable mountains, fortifying the same against the violence and fury of the waves," &c. In 1636, Charles I. made over to Sir Hugh the whole of his father's shares for a yearly rent of £500. B. date unknown; D. about 1640.

MIDDLETON, Thomas, an English dramatic writer, who wrote in conjunction with Jonson, Fletcher, and Massinger. Three of his plays,—"A Mad World, my Masters," "The Mayor of Queenborough," and "The Roving Girl,"—are included in Dodsley's collection of old plays. These were his best works; but there are many others by him. D. about 1626.

MIDDLETOWN, *mid'-del-toun*, a post-township of the United States, in New York, 80 miles from Albany. *Pop.* 3,000.—2. A city, port of entry, and capital of Middlesex county, Connecticut, on the Connecticut river, 22 miles from Newhaven. *Pop.* 9,000.—3. A township of New Jersey, 50 miles from Trenton. *Pop.* 3,500.

MIDDLEWICH, *mid'-del-wick*, a market-town of Cheshire, 20 miles from Chester. *Manf.* Silk and cotton goods. There are salt springs in the neighbourhood, which yield a trade in salt. *Pop.* 4,500.—Two miles from it is a station on the Grand Junction Railway.

MIDHURST, *mid'-hurst*, a well-built market-town of Sussex, 11 miles from Chichester, on the river Rother, a tributary of the Arun. *Pop.* 1,500.

MIDNAPORE, *mid-na-por'*, a district of Bengal, in the province of Orissa, British India. *Area*, 4,000 square miles. *Desc.* Hilly in the W., but level in other parts. It is traversed by affluents of the Hooghly. *Pro.* Rice, indigo, sugar, silk, salt, wax, honey, and lac. *Manf.* Cotton cloths and gauzes, metal and shell ornaments. *Pop.* 535,000. *Lat.* between 21° 41′ and 22° 57′ N. *Lon.* between 86° 36′ and 87° 59′ E.

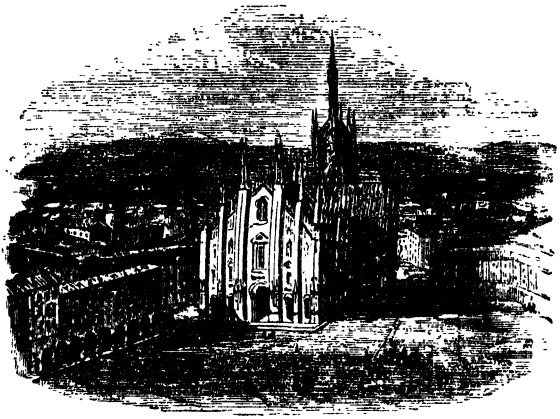
MIDNAPORE, capital of the above district, 72 miles from Calcutta. It has a gaol, hospital, barracks, and is the station of the British judge, collector, &c. *Pop.* Unascertained.

MIERIS, Francis, *meer'-is*, called the Elder, a celebrated Dutch painter, was the disciple of Gerard Douw, whose manner he imitated. His pictures are very valuable. B. at Leyden, 1635; D. 1681.—He had a son, WILLIAM MIERIS, called the Younger, who was a good landscape-painter, and a modeller in clay and wax. B. at Leyden, 1662; D. 1747.—His son FRANCIS was also an artist in the same line. B. 1687; D. 1763.

MIFFLIN, *mif'-flin*, the name of several townships in the United States, none of them with a population above 3,000.

MIGNARD, Peter, *meen'-yard*, called the Roman, from his long residence at Rome, was the favourite artist of Louis XIV., whose portrait he painted ten times. He also adorned the palaces of St. Cloud and Versailles, and was ennobled by Louis. B. 1610; D. 1695.

MIGNET, Francis Alexis, *meen'-yai*, an eminent modern French historian, who was educated for the legal profession at Aix, but removed to Paris, where he lodged with M. Thiers, and in 1824 produced, when only 28 years of age, his "History of the French Revolution, from 1789 to 1814." He was afterwards extensively employed as a journalist, and was associated with Armand Carrel and Thiers in conducting the "National." After the revolution of 1830, he was appointed director of the archives in the foreign ministerial department, which office he vacated in 1848. His principal works are, "History of Mary Stuart," "Charles V.," "Negotiations relative to the Spanish Succession under Louis XIV.," and several treatises on Moral and Political Science. B. at Aix, 1796.



MIJIRITCH, *mij'-i-ritch*, the name of several towns in Russia, none of them with a population above 7,000.

MIKHAILOOKA, *mik-hai-loo'-ka*, two towns of Russia, neither with a population above 6,000.

MIKLOS, *mik'-los*, two towns of Hungary, neither with a population above 10,000.

MILAN, *mi-lan'* (MILANO, *me-la'-no*), a city of Austria, the capital of the Lombardo-Venetian kingdom, on the small river Olona, between the Ticino and the Adda, 75 miles from Turin. Its form is compact and nearly circular. The circumference of the closely-peopled part is nearly 5 miles; that of the outer wall is about 8 miles, entered by thirteen gates. It is built with little regard to regularity. The private houses are tolerable, and are generally from three to five stories in height; the public edifices, however, display all the richness and magnificence of Italian architecture. Of these, the cathedral is the grandest and most imposing specimen of Gothic architecture extant. It is built of white marble, and is remarkable for the extreme lightness of its construction. It is 485 feet long, 252 broad, and the dome is 355 feet high. It was commenced in 1386, and is not yet finished. For the delicacy of its carvings it is unrivalled, and is adorned by upwards of 4,500 statues. Several of the

other churches are worth attention, both for their architecture and the statues and paintings of celebrated masters which decorate their interior. The church of St. Ambrogio is that in which the emperors

MILAN.

of Germany were formerly crowned. Hospitals and charitable institutions are numerous, and some of them large. The lazaretto, outside of the city, is likewise on a vast scale. Of theatres, there are no less than nine, most of them small; but the opera-house, *La Scala*, rivals in size and magnificence the famous theatre of Naples. The residences of the great families, though less grand than those of Rome and Genoa, display a similar architectural luxury, and several of them possess valuable collections of paintings. A triumphal arch on the road leading from Milan to the Simplon, called the *Arco della Pace*, is the finest in the city. In the esplanade, or *Piazza di Castello*, is an arena, in imitation of the amphitheatre of the Romans: it was made in 1806, by order of Bonaparte. Of the literary and scientific institutions, the first is the Ambrosian College, with its valuable library of 60,000 volumes and about 15,000 manuscripts, together with a fine gallery of paintings, statues, antiques, medals, and curiosities. The university of Milan was instituted by the empress Maria Theresa, in 1766. The college of Brera, a seminary in which are taught painting, sculpture, drawing, architecture, and engraving, is of vast extent and magnificence. It has a library of 100,000 volumes, valuable MSS., an observatory, and a fine gallery of paintings, formed by the French government out of the property of dissolved monasteries. The *Collegio Helvetico*, or Swiss College, is also an interesting institution on a smaller scale. Milan contains, likewise, an academy of arts and sciences, academies of sculpture, architecture, and agriculture, a conservatory of music, a museum, a cabinet of natural history, and, at the mint, a collection of coins and medals. *Manf.* Silks, ribbons, lace, velvets, cotton, carpets, jewellery, glass, porcelain, and paper. There are various other manufactures on a small scale, and it is the largest book-mart in Italy. *Pop.* 165,000, besides military. *Lat.* 45° 28′ 1″ N. *Lon.* 9° 11′ 20″ E. —Milan was founded 400 B.C., and is one of the few cities of Italy which survived the devastation of ages, and has brought down its celebrity to modern times. It suffered much during the wars of the middle ages; but it always rose with new lustre from its misfortunes. In 1796, the French, under Bonaparte, made themselves masters of it; but, in 1799, they were driven from it by the Austrians and Russians. After the battle of Marengo, it again was possessed by the French, and continued the seat of their viceroy until the fall of Bonaparte, in 1814. In 1815 it was restored to Austria, and, in June, 1859, Napoleon III. and Victor Emmanuel, king of Sardinia, entered it in triumph, after the battle of Magenta.

MILAN, a delegation of Austria, Lombardy, bounded on the N. by Como, on the W. by the Ticino, on the S. by Lodi and Pavia, and on the E. by the Adda. *Area*, 760 square miles. *Pop.* 605,000.

MILAN, the name of numerous townships in the United States, none of them with a population above 3,000.

MILANESE, *mil'-a-neese*, an old division of Italy. The Austrian Milanese is now comprised in the government of Milan.

MILAZZO, *me-lat'-so*, a fortified seaport-town of Sicily, 18 miles from Messina. It consists of an upper and a lower town, both irregularly built, and so strongly defended as to be deemed impregnable. It has an export trade in wine, fruit, silk, corn, oil, and rags. *Pop.* 8,000. In August, 1860, this place was, for a time, occupied by the troops of Garibaldi, the Dictator; and hence that chief sent his letter which contained his refusal to obey his sovereign, the king of Sardinia, when urged by the Neapolitans to assist the cause of Italy against their king.—The GULF OF MILAZZO extends to the E. about 16 miles, and has been the scene of many engagements in both ancient and modern times.

MILE-END, *mile end*, a suburb of Middlesex, now included in the neighbourhood of London.

MILETO, *me-lat'-to*, a town on the Calabrian coast, 48 miles from Reggio. It has a bishop's palace and a cathedral. *Pop.* 2,000. Here Garibaldi, on August 19th, 1860, landed with 3,800 men, previous to his attack upon Reggio.

MILFORD, *mil'-ford*, the name of numerous townships in the United States, none of them with a population above 6,000.

MILFORD, NEW, the name of several townships in the United States, none of them with a population above 5,000.

MILFORD HAVEN, a deep inlet of the sea, in Wales, county of Pembroke. It is completely land-locked, and has a length of 15 miles and an average breadth of 2.

MILFORD HAVEN, a town, which was founded in 1790, on the northern shore of Milford Haven, 6 miles from Pembroke. The houses are built with neatness, and even elegance. It has a church with a lofty tower, a custom-house, a plain but commodious building, and a dock-yard, which forms a principal feature in the plan. An establishment of packets has been formed here, under excellent regulations, for conveying the mail and passengers to Waterford, in Ireland. *Pop.* 3,000.

MILHAU, or MILLAU, *me-lo'*, a town of France, in the department of the Aveyron, on the Tarn, 30 miles from Rodez. *Manf.* Silk twist, chamois leather, and leather gloves.

MILITARY FRONTIER, a long narrow strip of country, extending from the Adriatic, through Illyria, Croatia, Slavonia, Hungary, and Transylvania, and forming the defensive barrier of Austria on the Turkish frontier. *Area*, 18,160 square miles. *Pop.* 1,230,000. In time of war it furnishes 50,000 men.

MILL, James, *mil*, an eminent historian, who, after receiving some education at the grammar-school of Montrose, and continuing it in the house of Sir John Stuart, M.P. for Kincardineshire, was sent to the university of Edinburgh to study for the Church. After distinguishing himself as a Greek scholar, he obtained a license to preach in 1798; but, changing his views, he, two years afterwards, went to London with Sir John Stuart. For some time he supported himself by means of the "Literary Journal;" but, on the discontinuance of that print, he was engaged to write for others, and occasionally contributed to the "Edinburgh Review." He commenced his "History of British India" in 1806, and completed it in the year 1818. This great work was much decried at one time. Macaulay wrote bitterly against both it and its author,

but retracted at a later period. Of this work the "English Cyclopædia" says, "It is perhaps no very high praise to say that it is not only the best history of British India, but the only single work calculated to convey to the general reader any clear and connected view of India and Anglo-Indian affairs. But it possesses higher claims than these; it is admitted by some of the most eminent of those who have administered Indian affairs during the last few years, that Mr. Mill's work was the beginning of sound thinking on the subject of India. The style has been represented by some as dry and unattractive; Mr. Mill certainly does not deal much in rhetorical ornament, at least in what is usually considered such by modern writers, for his style reminds us more of the nervous simplicity and terseness of some of the ancient masters of the difficult art of writing, than that of any modern, except Hobbes. The reader who is really in search of a meaning will find it in the writings of Mr. Mill with far less labour than where it is to be sought for in a crowd of unapt and unnecessary words. Although not possessing narrative powers of the same kind as Sir Walter Scott, or even David Hume, there are passages of Mr. Mill's history which will interest many readers as much as the most spirit-stirring romance; for instance, his account of some of the actions of Clive, and of Cornwallis's night attack upon the outworks of Seringapatam. His narrative of military operations is good; clearness, in which Mr. Mill excels, being the principal quality required. And some of his characters, that of Clive in particular, are drawn in a few bold and forcible lines, which engrave them on the mind of the reader." The knowledge and ability displayed in the course of this history led to his being employed as head of the Correspondence department of the East-India Company. Besides his great work on India, Mr. Mill contributed articles on Education, Government, Jurisprudence, Law of Nations, Liberty of the Press, &c. to the "Encyclopædia Britannica." In 1822 he published "The Elements of Political Economy," and, seven years subsequently, "The Analysis of the Phenomena of the Human Mind." His latest efforts were the "Fragment on Macintosh," and the articles on "The Formation of Opinions" and "The Ballot," in the "Westminster Review." B. at Montrose, 1773; D. in London, 1836.

MILL, John Stuart, an eminent writer on political economy, was son of the preceding. At an early age appointed to a clerkship in the East-India House, he rose to the grade of examiner of Indian correspondence, the post formerly held by his father. His first literary efforts appeared in the form of contributions to the Westminster and Edinburgh Reviews; but the work which made him generally known was his "System of Logic, Ratiocinative and Inductive," the first edition of which was published in 1843. The practical portion of this work was, says its author, "an attempt to contribute something towards the solution of a question which the decay of old opinions and the agitation that disturbs European society to its inmost depth, render as important in the present day, to the practical interests of human life, as it must at all times be to the completeness of our speculative knowledge." His next work was the "Essays on some Unsettled Questions of Political Economy." The more extensive "Principles of Political Economy" succeeded, and, in 1835, he undertook the management of the "London and Westminster Review," and carried it on until 1840. He was a frequent contributor to magazines and newspapers on questions of the day, in all of which he showed himself a brilliant advocate of the principles of advanced liberalism. His latest work was a charming piece of composition, entitled "Liberty." B. 1806.

MILLAIS, John Everett, *mil'-lais*, an eminent English painter, and the acknowledged head of that body of innovators in modern art termed the "Pre-Raphaelite" school, or, as it was formerly called, the "Pre-Raphaelite Brotherhood." A student of drawing from a very early period, he entered the Royal Academy school, and, by the time he had reached his 19th year, he had carried off all the honours to be gained in that probationary period. With William Holman Hunt (*see* HUNT) and others, he assisted in founding the "Brotherhood" mentioned above, and, in 1849, exhibited his first picture in the new style, which was afterwards to become celebrated. The picture was not named, but was a representation of the child Jesus in the shop of his reputed father, Joseph the carpenter. This picture shadowed forth all the great qualities, no less than the defects, of the painter. It was harsh, uncouth, and mediæval in its drawing and perspective; but it was full of thought, invention, richness of colour, and displayed great power over pencil and brush, upon the artist's part. Year after year has Mr. Millais departed further from his old manner, and, at the present day, it may certainly be said of him that he is the best of living English painters. Most people are acquainted with his beautiful works, called, respectively, "The Huguenot," "The Proscribed Royalist," "The Order of Release," and "Autumn Leaves." He has, likewise, drawn a number of illustrations to books, short tales, and sketches; but we think him not so successful as a draughtsman upon wood as he is as a painter. He became A.R.A. in 1853, and R.A. in 1856. B. at Southampton, 1828.

MILLER, Hugh, *mil'-ler*, an eminent geologist, whose father was lost at sea on board a small vessel of which he was the owner, while Hugh was still a child. He was sent to the parish school, and in course of time was apprenticed to the trade of a stonemason. From the time he had mastered the art of reading, he had been assiduous in his search after knowledge, and a love of natural history had been fostered in him by his uncle. While hewing stones in the quarry, he was engaged in observing their geological facts. Of poetry, also, he was very fond; and, after seeking in vain to get a certain effusion in rhyme inserted in a newspaper, he published a volume of verse, which brought him into notice, and obtained for him the clerkship of a bank in his native place. The leisure afforded by this occupation he turned to good account. After contributing for a short period to the "Inverness Courier," he published "Scenes and Legends of the North of Scotland." He was next selected by the "Free Church" party to edit their organ, the "Witness" newspaper, a post which he continued to fill until his death. His first geological paper appeared in this print, and when the Geological Association met at Glasgow, Sir Charles Lyell, Dr. Buckland, and Sir Roderick Murchison, all expressed themselves astonished and delighted at the labours of the new scientific writer. One of the fishes described by him in this course, was named, by Professor Agassiz, after Mr. Miller. A republication of the papers afterwards took place, under the title of the "Old Red Sandstone; or, New Walks in an Old Field." His ready, picturesque, and vigorous pen was henceforth constantly employed; and he produced, after a visit to the south, "First Impressions of England and its People;" "Footprints of the Creator," —an answer to some of the statements of the "Vestiges of Creation;" the "Geology of the Bass," and the "Testimony of the Rocks." He also lectured upon his favourite science in Edinburgh and London, and, in 1855, read a paper on the Fossil Flora of Scotland, before the British Association at Glasgow. In addition to the above-mentioned works, he gave to the world a most interesting account of his early life, in a work called "My Schools and Schoolmasters." In 1855, while labouring under a paroxysm of disease of the brain, he shot himself through the body. B. at Cromarty, 1802.

MILLES, Jeremiah, *mils*, a learned English divine and antiquary, who succeeded Dr. Lyttleton as dean of Exeter, and also as president of the Society of Antiquaries, to whose Archæologia he was a great contributor. He was a zealous champion for the genuineness of the Rowley poems, of which he printed an edition, in 1782, with glossarial annotations. This work laid him open to the attacks of the critics, who were sceptical on these supposed relics of antiquity. B. 1713; D. 1784.

MILLESIMO, *mil-lai'-se-mo*, a town of Sardinia, on the Bormida. *Pop.* 1,400. This was the scene of severe fighting between Bonaparte and the Austrians, in 1796.

MILLETIÈRE, Theophilus Brachet, Sieur de la, *meel-lai'-te-air*, a Protestant advocate, who instigated the Protestants at Rochelle to take up arms in defence of

their religion. In 1628 he was arrested at Toulouse, and kept in prison four years. On regaining his liberty, he turned Catholic, and wrote against the Calvinists. D. 1665.

MILLIN, Audin-Louis, *mee'-yă*, a celebrated French antiquary, who acted as keeper of the medals and antiquities in the Royal Library at Paris. His chief works were, "Dictionary of the Fine Arts," "Dictionary of Mythology," "Monuments of Antiquity," and "Gallery of Mythology." He edited the "Magasin Encyclopédique" during 20 years, and also produced a number of works relative to the antiquities of his native land, Savoy, &c., which were full of valuable historical matter. B. 1758; D. 1818.

MILLINGEN, James, *mil'-lin-jen*, an English archæologist, who, about the time of the French revolution, went to Paris with his father, but was arrested at the instance of the National Convention. After his liberation, he became partner in a bank at Paris, and henceforth devoted his leisure to archæological pursuits. He was fortunate enough to become the purchaser of several vases full of gold coins of the Roman emperors, dug up at Abbeville. Being afflicted with disease of the chest, he was compelled to repair to Italy, where he resided until his death, making, however, occasional visits to the French capital, where he was always welcomed by antiquaries as the bearer of some valuable ancient relic. His most important works were, "A Medallic History of Napoleon," "Ancient Coins of Greek Cities and Kings," "Ancient Unedited Monuments of Grecian Art," and "Remarks on the State of Learning and Fine Arts in Great Britain;" besides which he was the author of many valuable papers in the "Transactions of the Royal Society of Literature of London." B. in London, 1774; D. 1845.

MILLOT, Claude Francis Xavier, *mee'-yo*, a French historian, who was for some time a member of the Society of Jesuits, which order he was permitted to quit, after officiating as a preacher at Versailles and Luneville. He was professor of history at Parma many years, and on his return to France became tutor to the duc d'Enghien. His works are, "Elements of the History of France," "Elements of the History of England," "Elements of Universal History," "History of the Troubadours," "Memoirs for a History of Louis XIV. and XV.," and "Translations of Orations from the Latin Historians." B. at Besançon, 1726; D. 1785.

MILMAN, Rev. Henry Hart, *mil'-măn*, an eminent English historian and poet, who concluded his education at Oxford, of which university he was elected fellow. In 1815 he published a tragedy, entitled "Fazio," which was played at Covent-Garden theatre without his consent, in consequence of the defective state of the law at that period. In 1817 he entered upon holy orders, and obtained a living at Reading. In 1820 he produced "The Fall of Jerusalem," a sacred poem, founded upon Josephus's narrative. The university of Oxford appointed him its professor of poetry in the following year. The "History of Christianity from the Birth of Christ to the Abolition of Paganism in the Roman Empire," was his next important publication. In 1849 he produced a beautiful edition of Horace, adding to it a most interesting life of the poet. In the same year he was appointed dean of St. Paul's, and shortly afterwards gave to the world a continuation of his "History of Christianity," under the form of a "History of Latin Christianity." He likewise produced a new and copiously-annotated edition of Gibbon's "Decline and Fall of the Roman Empire." In addition to the poem already mentioned, he was the author of "The Martyr of Antioch," "Belshazzar," and "Anne Boleyn." B. in London, 1791.

MILNES, Richard Monckton, *milns*, a modern English politician, poet, and prose writer. A few years after concluding his university career at Cambridge, he was elected member of parliament for Pontefract, and distinguished himself therein as a zealous supporter of all questions relative to popular education and complete religious equality. His literary efforts were various in kind and of an excellent character. As a poet, he produced "Poems of Many Years," "Memorials of Many Scenes," "Poems, Legendary and Historical," and "Palm Leaves." His "Life, Letters, and Literary Remains of John Keats" was an appreciative and delightful commemoration of departed genius. He was understood to have been the writer of several interesting articles in the "Westminster Review." He published several of his speeches, delivered from his seat in the House of Commons, and wrote a number of political pamphlets, the most important of which were "Thoughts on Party Politics," "Real Union of England and Ireland," and "The Events of 1848." B. 1809.

MILO, *mi'-lo*, the ancient Melos, an island of the Grecian Archipelago, in the Mediterranean. *Area*, 65 square miles. *Desc.* Mountainous, volcanic, and generally barren. *Pop.* 4,000. *Lat.* 36° 45' N. *Lon.* 24° 23' E.

MILO, a famous athlete of Crotona, in Italy, who is said to have carried a bullock on his shoulders above forty yards, and then killed it with one blow of his fist, after which he made a meal of it in one day. He received the prize seven times at the Pythian games, and six at Olympia. Many other marvellous things are related of his enormous strength. According to Ovid, he was devoured by wild beasts, about 500 B.C.

MILO, Titus Annius, a Roman, who made several parties for the purpose of obtaining the consulate. He was opposed by Claudius, and supported by some of the first members of the senate. In a quarrel between Clodius Milo, on the Appian Way, the former was slain by some of the domestics of the latter. Cicero undertook to plead the cause of Milo; but the rostrum being surrounded by soldiers and a crowd of people, who expressed their disapprobation, he was so dismayed as to be unable to proceed. Milo was exiled to Marseilles, whither the orator sent him his discourse; on which he said, "O Cicero! if thou hadst spoken this, Milo would not have been now at Marseilles." Killed 48 B.C.

MILTIADES, *mil-ti'-ă-dees*, a celebrated Athenian general, who succeeded his uncle in the government of the Athenian colony in the Chersonese, B.C. 513. He proposed to destroy the raft over which Darius had passed in his Scythian expedition, and so cut off the Persian king's retreat: his comrades, however, overruled the proposal, and Miltiades became so unpopular as to be compelled to return to Athens. Twenty years afterwards, the Persians having declared war against Greece, their army landed in overwhelming numbers at Marathon. The Athenians, under Miltiades, were very few; yet, by his superior skill, the Persians were defeated with great slaughter, and part of their fleet destroyed, 490 B.C. After this, he had the command of a naval squadron, with which he took several islands; but being obliged to raise the siege of Paros, and also dangerously wounded, he returned to Athens, where he was accused of holding intelligence with the Persians, and condemned to death, which sentence was altered to imprisonment. He died shortly after, of his wound, B.C. 489.

MILTON, *mil'-ton*, the name of numerous parishes in England, none of them with a population above 3,000.

MILTON, a parish in Kent, lying immediately E. of Gravesend, of which it forms part. *Pop.* 10,000.

MILTON, the name of several townships in the United States, none of them with a population above 3,500.

MILTON, John, an illustrious English poet. He was educated first at St. Paul's School, and afterwards at Christ's College, Cambridge, where he took his degrees in arts, being designed for the bar or the church; but, not having an inclination for either calling, he returned to his father, who had retired from business with a good fortune, and settled at Horton, in Bukinghamshire. Here the poet wrote his "Comus," "L'Allegro," "Il Penseroso," and "Lycidas;" poems of such merit as would alone have immortalized his name. In 1637 he travelled into France and Italy. On his return to England, he settled in London, and undertook the tuition of his nephews, for which profession he appears, by his "Tractate on Education," to have been well calculated. On the outbreak of the differences between the king and parliament, Milton engaged as a political writer on the popular side; and having a great animosity to the hierarchy, he published some pamphlets against the bishops. In 1643 he married the daughter of a justice of peace in Oxfordshire; but, his wife having been brought up with different sentiments from her husband, and disapproving of his

zeal, eloped from him, and returned to her friends. He repudiated his wife, and published some tracts on divorce, to vindicate this act, which he was about to carry into effect, when his wife's friends brought about a reconciliation. He continued an ardent champion for the parliamentary party, even after the execution of Charles I. He also wrote with great asperity against the king's book of prayers and meditations, entitled "Eikon Basilike." About this time he was wholly deprived of his sight, owing to a natural weakness and an intense application to his studies. In 1652 he lost his wife, and soon afterwards took another. He was a determined republican, and wrote with energy against monarchical government, "the very trappings of which," he said, "would support a commonwealth," while, as Latin secretary to the Council of State, he rendered good service to the cause of national liberty. Milton endeavoured to prevent the Restoration; which event he had undoubted cause to dread, considering the active part taken by him in the rebellion. And when the Restoration took place, he was excepted from the act of indemnity; on which he kept himself concealed some time. By the interest, however, of Sir William Davenant and others, he obtained a pardon, soon after which he lost his second wife. In the time of the plague he removed, with his family, to Buckinghamshire, where he completed his "Paradise Lost," which was first printed in 1667. This immortal work he sold to a bookseller for £5. For the idea of it he is said to have been indebted to an Italian drama on the Fall of Man; and it is certain that he had himself an in-

MILTON.

tention at first of writing only a tragedy on the same subject. As the work grew under his hand, his soaring genius gave it the form and consistence, the variety and elegance, of an epic poem. He subsequently composed "Paradise Regained," which, though abounding in beauties, is in all respects inferior to "Paradise Lost," though Milton, remarkably enough, is said to have considered it the better poem. This poem was unknown in the poet's lifetime, and for many years after. It was not till Mr. Addison wrote his admirable critique upon it in the "Spectator," that its beauties became generally understood, and the whole merits of the poem to be admired. Dryden had, indeed, given his approbation of the work and his opinion of the author in an excellent epigram, which is usually prefixed to the "Paradise Lost." Besides this, and the other poems mentioned above, Milton wrote a drama on the Greek model, entitled "Samson Agonistes," which possesses uncommon beauties, though not adapted to theatrical representation. His "Comus" has been several times performed, and the first time was for the benefit of the author's granddaughter, Mrs. Clarke, a widow in reduced circumstances. On that occasion Johnson wrote a prologue. Among the prose works of Milton, we shall only mention his "History of England," which comes down only to the Conquest, and his "Areopagitica," in which he pleaded the cause of a free press with great force. The whole of his prose works have been published in five volumes in Bohn's Standard Library. When at Cambridge, he was so handsome as to be called the lady of Christ's College, and he retained his comeliness to the last. By his first wife he had three daughters, two of whom used to read to him in eight languages, though they understood only their own, it being a usual saying with him, that "*one tongue* was enough for a *woman*." His remains were interred at the parish church of St. Giles, Cripplegate, where a monument has been erected to his memory; and there is another in Westminster Abbey. B. in Bread Street, London, 1608; D. 1674.

MILTON ROYAL, *mil'-ton*, a market-town and parish of Kent, 8 miles from Faversham. *Pop.* 2,500.—This place is noted for its oyster-fisheries.

MILWAUKIE, *mil-waw'-ke*, a county of Wisconsin, U.S., bordering on Lake Michigan. *Area*, 240 square miles. *Pop.* 33,000.—Also a TOWN, capital of the county, 70 miles from Madison. *Pop.* 21,000.

MIMNERMUS, *mim-ner'-mus*, a Greek poet and musician, was a native of Colophon, and contemporary with Solon. He excelled in elegiac poetry, the invention of which has been ascribed to him. Some fragments of his are included in the "Analecta" of Brunck. Flourished about 630 B.C.

MIN, *min*, a river of China, rising in the black-tea district, and draining the province of Fo-Kien. It falls into Hosein Bay, in *lat.* 26° 8′ N., *lon.* 119° 40′ E.

MINAB, *me-nab'*, a maritime town of S. Persia, 35 miles from Ormuz. *Pop.* about 800.—This town is situate in a tract so fertile that it is called the "Garden of Persia."

MINAS GERAES, *me'-nas je-ra'-ais*, a province of Brazil, bounded on the N. by Pernambuco, on the E. by Bahia, W. by Goyaz, and S. by San Paolo. *Area*, 253,600 square miles. *Desc.* Mountainous, and watered by tributaries of the Parana. It is the highest table-land in Brazil, and is the richest of its provinces. *Pro.* Maize, sugar, coffee, cotton, and tobacco. *Minerals.* Gold, silver, copper, and diamonds. *Pop.* 2,000,000. *Lat.* between 14° 25′ and 23° S. *Lon.* between 40° 37′ and 53° 20′ W.

MINCHING HAMPTON, *min'-ching*, an irregularly-built market-town of Gloucestershire, on the Cotswold hills, 4 miles from Stroud. The church is in the form of a cross, with side aisles and a tower. *Manf.* Woollen coths. *Pop.* 4,500.

MINCIO, *min'-cho*, a large river of Italy, flowing from the Lake of Garda, and, after a course of 38 miles, falling into the Po, 8 miles below Mantua.

MINDANAO, or MAGINDANAO, *min-da-na'-o*, one of the largest of the Philippine islands, in the Asiatic archipelago. *Area*, estimated at 36,000 square miles. *Desc.* Mountainous, densely wooded in many parts, in others consisting of prairies. *Pro.* Wax, cassia, pepper, rice, and rattans. *Minerals.* Gold, nitre, and other volcanic products. *Pop.* Unascertained; perhaps 80,000. *Lat.* of Samboangar, 6° 50′ N. *Lon.* 122° E.

MINDEN, *min'-den*, a strongly-fortified town of Prussian Westphalia, on the Weser, over which is a bridge 600 feet in length, 60 miles from Munster. It has several Lutheran, Calvinist, and Catholic churches; a gymnasium, an orphan-house, hospitals, and various schools. *Manf.* Woollen and linen fabrics, leather, soap, and tobacco. *Pop.* 10,000.—It is noted for the defeat of the French near it, in 1759, by the British. It has a station on the railway from Berlin to the Rhine.

MINDORO, *min-do'-ro*, one of the Philippine islands, in the Asiatic archipelago. *Area*, estimated at 4,150 square miles. *Pop.* 30,000. *Lat.* between 12° 21′ and 13° 30′ N. *Lon.* between 120° 24′ and 121° 21′ E.

MINERVA, *mi-ner'-va*, the goddess of wisdom, war, and all the liberal arts, was supposed to be produced from Jupiter's brain, whence she issued all armed and grown up, and was immediately admitted into the assembly of the gods. The actions of Minerva are numerous. Her quarrel with Neptune concerning the right of giving a name to the capital of Cecropia

*deserves attention.* The assembly of the gods settled the dispute by promising the preference to whomsoever of the two gave the most useful present to the inhabitants of the earth. Neptune, upon this, struck the ground with his trident, and immediately a horse issued from the earth. Minerva produced the olive, and obtained the victory by the unanimous voice of the gods, who observed that the olive, which is the emblem of peace, is far preferable to the horse, which is the symbol of war. The victorious deity called the capital Athenæ, and became the tutelar goddess of the place. She was known among the ancients by many names. She was called Athena, Pallas, and Parthenos from her remaining in perpetual celibacy. The worship of Minerva was universally established; she had magnificent temples in Egypt, Phœnicia, all parts of Greece, Italy, Gaul, and Sicily. The festivals celebrated in her honour were solemn and magnificent. She was invoked by every artist, and particularly such as worked in wool, embroidery, painting, and sculpture. Minerva was represented in different ways, according to the different characters in which she appeared. She was usually depicted with a helmet on her head, with a large plume nodding in the air. In one hand she held a spear, and in the other a shield, with the dying head of Medusa upon it. Sometimes this Gorgon's head was on her breastplate, with living serpents writhing round it, as well as her shield and helmet. When she appeared as the goddess of the liberal arts, she was arrayed in a variegated veil, which the ancients called *peplum*. She was partial to the olive-tree; the owl and the cock were her favourite birds, and the dragon, among reptiles, was sacred to her.

MINGRELIA, *min-gre'-le-a*, a province of Asiatic Russia, situate on the southern side of the Caucasian mountains, between the Caspian and the Black seas. On the N. it has Georgia, E. Immeretia, S. the river Phasis, W. the Black Sea. *Area*, 2,365 square miles. *Desc.* Mountainous, and fertile in the valleys. The country has frequently been devastated by wars. *Pop.* 61,000.

MINHO. (*See* ENTRE DUERO E MINHO.)

MINIATO, SAN, *me-ne-a'-to*, a town of Tuscany, on the ARNO, 29 miles from Florence. It is the original seat of the Bonaparte family. *Pop.* 2,400.

MINIÉ, M., *min'-e-ai*, commonly *min'-e*, the inventor of the rifle which bears his name. He entered the French army as a private soldier, and rose to the grade of brigadier. He was among the first of those scientific gentlemen who in recent times endeavoured to perfect the long-known but neglected principle of the rifle. Although it is now superseded, the Minié was for some time the best rifle extant. The Minié ball was a great advance upon everything of the kind that had preceded it. It was an elongated one, conical at its point, and with a hollow behind, in which was placed a metal cup or thimble. Captain Norton, Mr. Greener, and M. Caron, a French artillery officer, arrived at similar results with M. Minié; but, at any rate, his inventions were the first to become extensively employed, and they form, undoubtedly, the first steps in that grand march of improvement in gunnery which has taken place within the last few years. Minié is a practical mechanic, and has a workshop fitted up for his use at Vincennes. B. at Paris, about 1800.

MINNESOTA, *min'-ne-so'-ta*, a territory of the United States, bounded on the N. by British America, S. by Iowa and the Missouri territory, E. by Wisconsin and Lake Superior, and W. by Missouri. *Area*, 165,000 square miles. *Desc.* An elevated region, distinguished as "Prairie Heights," "Wooded Heights," and "Highlands." It has no mountains, properly so called, but abounds with lakes, and produces large quantities of rice. *Pop.* Whites, about 10,000; Indians, 25,000.—This country, in 1849, was constituted a territorial government.

MINO, *meen'-yo*, a river of Spain and Portugal, rising in Galicia, 30 miles from Santiago, and, after a course of 130 miles, entering the Atlantic near Caminha.

MINORCA, *mi-nor'-ka*, the second largest of the Balearic islands, in the Mediterranean, 22 miles from Majorca. *Area*, 260 square miles. *Desc.* The surface is very uneven, but it contains no mountains except the central one, called Toro. Vegetation is in general luxuriant. *Pro.* Corn, wine, flax, hemp, saffron, wool, honey, wax, capers, and cheese. *Minerals.* Iron, copper, lead, and fine marble. *Pop.* 44,000. *Lat.* 39° 52′ 5″ N. *Lon.* 4° 21′ E. The British took possession of Minorca in 1708, and held it until 1758, when it was retaken by a French fleet and army. At the peace of 1763 it was restored to Britain, but in 1782, was retaken by the Spaniards. It was once more taken by the British in 1798, but restored at the peace of Amiens, in 1802.

MINOS I., *mi'-nos*, takes his place in mythological history as the king of Crete, where he is said to have reigned B.C. 1432. He founded several cities, and established some excellent laws and customs. The laws of Minos were in force even in the time of Plato, more than a thousand years after the death of the legislator. His grandson, Minos II., exercised justice with so much strictness as to be made by the fabulists one of the judges of the infernal regions.

MINOS III., of the same family as the preceding, reigned B.C. 1300. He imitated the severity of his ancestors in the administration of justice, and made several new laws, which he pretended to have received from Jupiter. He defeated the Athenians and Megarians, against whom he declared war, to avenge the death of his son Androsus. He took Megara, and reduced Athens to such extremity that the people were obliged to make peace, on condition of delivering to him yearly seven youths of each sex; whence arose the fable of the Minotaur. These personages belong to a period when history and mythology interlace.

MINOTAUR, *min'-o-taur*, a celebrated monster of Crete, who, according to Ovid, was half a man and half a bull. Minos confined the monster in a labyrinth constructed by Dædalus. The Minotaur was at length slain by Theseus, one of the tributary Athenian youths to be devoured by it. Theseus received, it is said, a clue from Ariadne, which served to extricate him from the mazes of the labyrinth, and to effect his escape after he slew the Minotaur.

MINSK, *minsk*, an extensive province of European Russia, extending from the Dwina on the north to the province of Volhynia on the south. *Area*, 34,500 square miles. *Desc.* Little more than a marsh in the spring, and covered with extensive forests. *Pro.* Rye, hemp, flax, potash, and tar. *Manf.* Woollen cloth, glass, and Russian leather. *Pop.* 1,100,000, many of whom are Jews and descendants of Tartars. *Lat.* between 51° 12′ and 55° 50′ N. *Lon.* between 25° 10′ and 30° 45′ E.—MINSK, the capital town, is 155 miles from Grodno. It is the see of a Greek archbishop and of a Roman Catholic bishop. It has no remarkable public buildings. *Pop.* 25,000.

MINSTER, *min'-ster*, the name of several parishes in England, none of them with a population above 2,000.

MINTO, Gilbert Elliott, *min'-to*, second Earl of, an eminent English diplomatist, was the eldest son of the first earl. Brought up for the diplomatic service, he entered parliament in 1806, as member for Ashburton. This occurred during the short reign of the Whigs; but, soon afterwards, the party was subjected to a long exclusion from office, during which Earl Minto was not heard of: in 1814 he succeeded to his father's peerage. He obtained no public employment until the year 1832, when, at the mature age of 50, he entered upon his diplomatic career. He was then sent as ambassador to Berlin, where he remained till, in 1835, he was recalled, to assist Lord Melbourne in the responsibilities of a cabinet. He who previously had not had the slightest acquaintance with office, and probably had but very little notion of any business whatever, was at once appointed first lord of the Admiralty. He held this important office until the overthrow of Lord Melbourne's administration, in 1841; and the only thing for which his rule at the Admiralty was distinguished, was the outcry that was raised on account of the number of Elliotts who crowded into the service. When Lord John Russell obtained power, in 1846, his father-in-law was intrusted with no office that entailed the necessity of work: he was made lord privy seal, and retained that post until the ministry was overthrown, in 1852. Towards the close of 1847, he was sent on a special mission to Italy. Lord John Russell and Pio Nono were born in the same year, and they

attained the supreme power in their respective states about the same time. It is well known that on the elevation of Cardinal Feretti to the pontifical chair, he set to work immediately to popularize himself; and, by the reforms which he suggested, raised the enthusiasm not only of the Romans, but also of the whole Italian people, to the highest pitch. It was imagined that the golden age had returned to the land of beauty; but, unfortunately, no real good was effected. At that time, Lord Minto was sent to Italy, with instructions to put into practical and permanent form the improvements suggested by the pope. That mission was a complete failure; there was nothing to be wrought out of the popedom. A revolution broke out, and Italy, in the end, sank into a desperate condition, out of which, happily, in these days, there is every hope of her escaping. Lord John Russell's famous letter to the bishop of Durham may be not unjustly attributed to his kinsman's chagrin. The earl never afterwards had anything ostensible to do in the management of English affairs: he retired into the bosom of his family, and, after a long illness, expired. His career has been thus criticised:—"The public never had an opportunity of estimating his capacity, save on one occasion, when it is well known that he contrived to do as much mischief as it is possible for a dull man to commit. He was one of those men who, no matter what their mistake, or how little their judgment, yet never lose credit like ordinary mortals, because they do all their feebleness with such a gravity of manner, that it is impossible to believe the fault to be in them." B. at Lyons, 1782; D. 1859.

MINUTIUS FELIX, *mi-nu'-she-us*, a famous Roman Christian orator in the 3rd century. He wrote a dialogue, under the title of "Octavius," in which he introduces a pagan and a Christian disputing as to the merits of their respective religions. It is a production of considerable merit, and written with eloquence in favour of Christianity. The best edition is that of Davis.

MIOSEN, *me-o'-zen*, a large lake of Norway, to the N. of Christiana. *Ext.* 55 miles long, with a breadth of 12.—A railway to connect this lake with Christiana has been constructed.

MIQUELON, *me'-ke-lon*, a desert island, 8 miles S.W. of Cape May, in Newfoundland. It is the most westerly of the three islands of St. Pierre, or St. Peter, with which it constitutes a colony belonging to France. *Pop.* about 2,000. *Lat.* 47° 4' N. *Lon.* 56° 20' W.

MIRABAUD, John Baptiste de, *mir'-a-bo*, a French writer, who was at first a member of the Congregation of the Oratory, and afterwards in the army. His works are translations of Tasso's "Jerusalem" and Ariosto's "Orlando" into French. In 1770 was published, under his name, an atheistical book, entitled "The System of Nature," which was translated into English, and attracted much attention at its first appearance. This work, though it still passes under the name of Mirabaud, was in reality the production of Baron d'Holbach and others. B. at Paris, 1675; D. at Paris, 1760.

MIRABEAU, Victor Riquetti, Marquis de, *me'-ra-bo*, was born of an ancient family in Provence. He was one of the principal institutors of a political sect called Economists. For his "Théorie de l'Impôt," a tract in which he made some free remarks on the finances and government, he was incarcerated in the Bastille for some time. His principal work was entitled "L'Ami des Hommes" (the Friend of Mankind). In this work the author displayed a considerable knowledge of rural and political economy, and also furnished some judicious hints for the good of society. B. 1715; D. 1789.

MIRABEAU, Honoré Gabriel Riquetti, Count de, one of the leaders, and the greatest orator during the French revolution. After staying some time in the army, he espoused a rich heiress of Aix; but he soon squandered away the fortune he received with her, and plunged himself into debt. He was confined in different prisons, and, on obtaining his liberty, eloped to Holland with the daughter of the president of the parliament of Besançon. For this he was afterwards imprisoned in the castle of Vincennes, and remained there a considerable time. In 1780 he regained his liberty, and published his work on "Lettres de Cachet." He subsequently visited London, and, on his return to Paris, employed

himself with literature. In 1786 his great abilities recommended him to the notice of the minister Calonne, who dispatched him on a secret mission to Prussia. The French revolution offered Mirabeau an ample element for his activity. Imbibing the doctrine of equality, he opened a shop, over the door of which was inscribed "Mirabeau, dealer in drapery." He was elected deputy of the third estate of Aix, and the courtiers termed him the Plebeian Count. In the National Assembly he displayed the very highest powers of an orator, but died in the midst of his poli-

MIRABEAU.

tical career, as is supposed, of poison, and his obsequies were celebrated with great pomp. Mirabeau wrote "A Comparison between the Great Condé and Scipio Africanus," "History of Prussia under Frederick the Great," collection of his labours in the National Assembly, "Secret History of the Court of Berlin;" this book was burnt by the common executioner. The character of this remarkable man, who might be styled the Alcibiades of the Revolution, was, till lately, but imperfectly understood. It is certain, that if he crushed the old aristocracy upon the one hand, he, on the other, kept down the fury of democracy. When he became president of the National Assembly, in 1791, he rendered immense services to his country, in introducing clearness and order where all had before been entanglement and confusion. Had his life been prolonged, it is more than a question whether the French revolution would have been other than a bloodless one,—a simple change from despotism to constitutional monarchy. "I carry to the grave," he once said, "the last shreds of the monarchy." His death was a public calamity. His ambition was not to set up or destroy absolute monarchy, but to raise himself to the position of prime minister of a constitutional régime. "Much has been said of the venality of Mirabeau," says his friend Dumont, "as if his talents were actually put up to the highest bidder; but this is an exaggeration. It may be admitted that he was not over scrupulous in money matters; but he was too proud to be dishonest, and he would have thrown through the window any one who dared to make a humiliating proposal." At one time he received a pension from Monsieur (afterwards Louis XVIII.), and subsequently, during the last six months of his life, one from the king; but he considered himself as an agent intrusted with their affairs, not to be governed by, but to govern and direct those who granted them. "When I am gone," he said, "my value will be appreciated. Misfortunes, to which I have put a stop for the present, were overwhelming France in every direction; but that base faction (the Jacobins), which I now overawe, will be let loose upon

the country. They want to govern the king, instead of being governed by him; but soon neither they nor he will govern: a vile faction will rule the country, and debase it by the most atrocious crimes."—B. at Bignon, near Nemours, 1749; D. 1791.

MIRAMICHI, or MIRACHI, *mir'-a-me-she'*, a bay and river on the N.E. coast of New Brunswick, British N. America. The bay is in *lat.* 47° 10′ N., *lon.* 65° W., and forms the estuary of the river, which, after a course of 75 miles, falls into it.

MIRANDA, *me-ran'-da*, the name of two towns in Portugal, neither with a population above 5,000.

MIRANDA, the name of three towns in Spain, none of them with a population above 3,000.

MIRANDA, Francisco, the founder of the independence of Spanish America. He rose to be colonel in the Spanish army, and was for some time intrusted with important matters by the governor of Guatemala; but, taking part in a conspiracy against the Spanish viceroy, he was compelled to fly from his native country. He went to Paris in 1791, and allied himself with the republican party, who appointed him to a command under General Dumouriez. In 1806 he resolved to achieve the independence of his country; and, after a long struggle, succeeded in establishing a republic at Caracas, in 1811. He sustained a defeat by the Spanish army subsequently, and was treacherously betrayed to the Spanish general, who sent him in chains to Spain, where he died in the prison of the Inquisition, 1816; B. at Caracas, about 1750.

MIRECOURT, *meer'-koor*, a town of France, in the department Vosges, 30 miles from Nancy. It is the seat of a tribunal of commerce, and has a college. *Manf.* Violins, guitars, barrel-organs, and other musical instruments. *Pop.* 5,500.

MIRFIELD, *mir'-feeld*, a parish of the N. Riding of Yorkshire, 5 miles from Huddersfield. *Manf.* Woollen goods. *Pop.* 7,000.—It has a station on the Lancashire and Yorkshire Railway.

MIRIM, *me-reem'*, a lake of S. America, between Brazil and Uruguay. *Ext.* 100 miles long, with a breadth of 20. It receives several rivers. *Lat.* 33° S. *Lon.* 53° W.

MIRTA, *mir'-ta*, a town of India, in the state of Jodhpoor, 75 miles from the town of that name. *Pop.* 26,000.

MIRZAPORE, *mir-za-por'*, a town and district of Hindostan, in the province of Allahabad, on the Ganges. The town is 26 miles from Benares, and is a flourishing trading place, being the chief mart for silk and cotton between the British and Mahratta territories. *Manf.* Carpets, and there are iron-works. *Pop.* 80,000.—The DISTRICT has a diversified surface, and produces wheat, barley, cotton, vegetables, and fruits. It has also lime, iron, and sandstone. *Pop.* 833,000. *Lat.* between 23° 50′ and 25° 30′ N. *Lon.* between 82° 11′ and 83° 39′ E.

MISENO, *me-sai'-no*, a promontory of S. Italy, 9 miles from Naples. Near it are the ruins of the ancient Roman port of Misenum.

MISKOLCZ, *mis'-koltz*, a large and well-built town of Hungary, in the county of Borsod, 33 miles from Tokay. It has numerous churches, and a considerable trade in wine. The iron obtained in the neighbouring mines is manufactured into the best steel in Hungary. *Pop.* 17,000.

MISSAGLIA, *mis-sal'-ye-a*, a market-town of Italy, 14 miles from Como. *Pop.* 2,300.

MISSISSIPPI, *mis'-sis-sip'-pi*, one of the United States, bounded N. by Tennessee, E. by Alabama territory, S. by the Gulf of Mexico and Louisiana, and W. by Pearl and Mississippi rivers, which separate it from the state of Louisiana. *Area*, 47,160 square miles. *Desc.* Elevated in the N. and E., but flat and marshy in the S. and W. *Rivers.* The principal are the Mississippi, Pearl, Pascagoula, Yazoo, Black, Tennessee, and the western branches of the Tombigbee. *Pro.* Cotton is the staple. Peaches and figs are the fruits most easily produced. Apples, plums, lemons, and oranges are common. The Chocktaw and Chickasaw Indians possess a large portion of the territory of this state. *Pop.* 595,000. *Lat.* between 30° 12′ and 35° N. *Lon.* between 88° 12′ and 91° 45′ W. —It was admitted into the Union in 1817.

MISSISSIPPI, two counties of the United States, 1. In Arkansas. *Area*, 1,000 square miles. *Pop.* 3,000, of whom a third are slaves.—2. In Missouri. *Area*, 400 square miles. *Pop.* 4,000, of whom a third are slaves.

MISSISSIPPI, or ENGLISH RIVER, rises in La Crosse Lake, British N. America, and, after a course of 650 miles, under the name of the Churchill river, enters Hudson's Bay, 50 miles W. of Cape Churchill.

MISSISSIPPI, 'Great Waters,' the principal river of North America, and the common channel by which all the waters that fall on the immense valley between the Rocky Mountains on the W., and the Alleghany Mountains on the E., are carried to the ocean. It has its source in a small pool, until it subsides in Lake Fraser, *lat.* 47° 42′ 40″ N., *lon.* 95° 8′ W.; and it falls into the Gulf of Mexico by six outlets. Its total length is estimated at 3,160 miles; but from the source of the Missouri, its longest and real head-stream, it is nearly 4,500 miles. In breadth it varies greatly, from 300 to 900 yards in the upper part of the stream, and from 2,000 or 2,500 yards opposite the Missouri. At New Orleans it is rather less than 1,500 yards; though the general width of it along the delta is somewhat less. At New Orleans, and below it in dry seasons, the depth is about 120 feet: it is said to be more than 200 feet at the distance of 100 miles above that city; thence to the Arkansaw it may average nearly 50 feet; and between that and the Missouri, from 25 to 35 feet, in the lowest state of the water. The Mississippi has two annual floods; the first, in ordinary seasons, about the new year; the second, or great spring inundation, commences with the first flood of the Missouri, which is usually in March, on the breaking up of the ice. This is followed by the Mississippi above its junction with that river; afterwards by the Ohio, the Illinois, and all the other tributaries. The great flood of the Missouri begins in June; on the 15th of the same month the Mississippi attains its greatest height at Natchez, which is about 400 miles from its mouth; and on the first week of July the highest flood takes place at New Orleans. At this time, the waters of the Mississippi are spread at New Orleans to an extent of from 80 to 100 miles. The breadth of the inundation gradually diminishes the higher the river is ascended; but even at the mouth of the Ohio, which is 1,000 miles from the mouth of the Mississippi, it still extends over a space of 30 miles. The principal streams which fall into the Mississippi on the W. side, are the Red River, the Washita, the Arkansaw, the St. Francis, the White River, the Missouri, the Rivière des Moines, and the St. Peter's. On the E. side there are the Yazoo, the Ohio, the Tennessee, the Wabash, a tributary of the Ohio, and the Illinois, which enters 18 miles above the Missouri. About 250 miles above the mouth of the Missouri the navigation is difficult, and obstructed by rapids. About 60 miles higher up, occur the falls of St. Anthony, above which the water is 627 yards wide; and it falls perpendicularly 16½ feet. Below the falls it is only 209 feet in breadth. Above the Arkansaw, the current at low water runs at the rate of about two miles an hour, and at high water, at the rate of four miles an hour. As the river approaches the sea, the velocity of the current diminishes to one third, and afterwards to one half. The river is navigated by numerous steamboats. In 1850, upwards of 1,200 were engaged in traffic upon its surface. On its banks and on those of its tributaries are numerous towns and cities of importance.

MISSOLONGHI. (*See* MESOLONGHI.)

MISSOURI, *mis-soor'-i*, one of the United States, which on the E. is bounded by the Missouri river, and on its other sides by Arkansas, Iowa, and the territory of Minesota. *Area*, 67,000 square miles. *Desc.* Mostly consisting of prairies and table-lands, almost destitute of timber and water. *Pro.* Maize, wheat, rye, oats, cotton, and tobacco. Large herds of cattle, hogs, and horses are reared. *Minerals.* Iron, coal, zinc, antimony, and manganese. *Manf.* Woollen and cotton goods; and there are iron-works, tanneries, breweries, and distilleries. *Pop.* 685,000. *Lat.* between 36° 30′ and 40° 30′ N. *Lon.* between 89° 13′ and 95° 35′ W.

MISSOURI TERRITORY, an unorganized tract of N. America, occupying the region lying between the

White Earth and Missouri rivers on the E., and the Rocky Mountains on the W. *Area*, 587,564 square miles. *Desc.* Mostly consisting of prairie-land, abounding with the buffalo, the great brown bear, wild horses, deer, elk, bears, wolves, panthers, and antelopes. The grizzly or white bear is found on the head branches of the Missouri. *Pro.* Wheat, rye, and other small grain are abundant. *Minerals.* Coal, brick, and potter's earth, and inexhaustible supplies of salt. *Pop.* Unascertained; but consisting mostly of Indian tribes. This tract includes the territory of Nebrasca.

MISSOURI, 'Mud River,' one of the greatest rivers of North America, rising by three principal sources in the Rocky Mountains, was explored in 1804, 1805, and 1806, by Captains Lewis and Clarke, who sailed up the stream to its source. At the distance of 2,858 miles from its mouth, it is divided into three branches; the most northern of which, namely, Jefferson's River, being ascended 248 miles, the party reached the extreme navigable point of the Missouri, making the total distance to which they had navigated its waters 3,096 miles, of which 420 lay within the Rocky Mountains. The Missouri falls into the Mississippi in *lat.* 38° 55′ 19″ N., and *lon.* 89° 57′ 45″ W., 18 miles below the mouth of the Illinois; whence it takes the name of the Mississippi to the Gulf of Mexico. The navigation of the Missouri to the falls, which is a distance of 2,575 miles, may be generally deemed good. Above these it meets with various interruptions, and another fall to the depth of 19 feet, over a ledge of rocks so irregular that Captain Lewis gave it the name of the Crooked Falls. There is another irregular rapid above this, and another beautiful fall over a rock, which, without a single niche, and with an edge as straight and regular as if formed by art, stretches itself from one side of the river to the other, for at least a quarter of a mile. Over this it precipitates itself in an even uninterrupted sheet, to the perpendicular depth of 50 feet. Its waters are turbid, and its stream rapid, whilst along its banks are rich lands and extensive prairies.

MISTRA, *mis'-tra*, a town of Greece, in the Morea, 30 miles from Tripolitza. Six miles from it are the remains of ancient Sparta. *Pop.* 1,500.

MITCHAM, *mitch'-am*, a parish of Surrey, on the Wandle, 8 miles from London. *Pop.* 5,000.

MITCHELL, Sir Thomas, *mit'-chel*, a distinguished geographer and military surveyor, who served with distinction during the peninsular war, as an officer of the staff. The military maps which he constructed throughout the campaign are preserved in the Ordnance Office, as models of accuracy and excellent execution. In 1827 he produced "Outlines of a System of Surveying for Geographical and Military Purposes," and was about the same time nominated deputy surveyor-general of New South Wales, which post he retained until his death. He proved himself one of the most distinguished explorers of the Australian continent, and, under circumstances of great difficulty and danger, traced the course of the river Darling to its junction with the river Murray, and discovered Australia Felix. An account of these labours was published in 1838, in a work entitled "Three Expeditions into the Interior of Eastern Australia, with descriptions of the recently explored region of Australia Felix." On coming to England for the purpose of passing his works through the press, he received the honour of knighthood from her majesty, was elected fellow of the Royal and of the Geographical societies, and became D.C.L. of the university of Oxford. He subsequently discovered the Victoria river, and invented a new propeller for steam-vessels, on the principle of a weapon used by the aborigines of Australia. While staying in England, in 1853, he read an account of his invention at the United Service Institution, and afterwards published it, with the title, "Origin, History, and Description of the Bomerang Propeller." In addition to the works we have already mentioned, he produced a "Map of the Colony of New South Wales," in three sheets; "Journal of an Expedition into the Interior of Tropical Australia," and "Australian Geography, with the Shores of the Pacific." He attained the grade of colonel in 1854, and at his death his remains were honoured by a public funeral at Sydney. B. at Craigend, Stirlingshire, 1792; D. at Sydney, 1855.

MITCHELL, Joseph, a dramatic writer, who was patronized by Sir Robert Walpole. He wrote "The Fatal Extravagance," a tragedy; "The Highland Fair," a ballad opera, 8vo; and several poems. B. in Scotland, 1634; D. 1738.

MITFORD, Mary Russell, *mit'-ford*, an eminent modern authoress. She was the daughter of a clever physician, but whose unthrifty habits involved him in constant pecuniary embarrassments. When the future authoress had attained her 10th year, her father made her a present of a ticket in the Dublin lottery, which eventually turned up a prize of £20,000. This large sum was, however, dissipated by the extravagant parent, who was, nevertheless, a most kindly man and affectionate father. Mary was placed at school at Chelsea, where she met as pupils, at various times, Miss Landon (L.E.L.), Fanny Kemble, and Lady Caroline Lamb. Before she reached her 20th year, she put forth a volume of verse, which was demolished by the "Quarterly Review." Nowise disheartened, she brought out another, and, in reality, adopted literature as a profession. For some time, her pen was engaged upon short tales and sketches for the magazines, the success of which emboldened her to take a higher flight. The "Sketch Book" of Washington Irving was published about that period, and attained the greatest popularity. This led Miss Mitford to turn her attention to the composition of a series of rural tales and descriptions of rustic life and scenery. She had long been residing at a pleasant village on the borders of Berkshire and Hampshire, and was familiar with every house, cottage, green lane, and dweller therein. She accordingly set to work to give faithful delineations of the place and its inhabitants. Her first essays were sent to the "New Monthly Magazine," but the then editor, Thomas Campbell, at once rejected them. After many disappointments, they appeared in the "Lady's Magazine." These were afterwards put forth in a collected form, and were entitled "Our Village," a book which justly merits its great popularity, being truly unrivalled of its kind. The best account of the book was written by the authoress herself, when she said: "Her descriptions have always been written on the spot, and at the moment, and, in nearly every instance, with the closest and most resolute fidelity to the place and the people. If she be accused of giving a brighter aspect to her villagers than is usually met with in books, she cannot help it, and would not, if she could. She has painted as they appeared to her their little frailties and their many virtues, under an intense and thankful conviction that, in every condition of life, goodness and happiness may be found by those who seek them, and never more surely than in the fresh air, the shade, and the sunshine of nature." Five series of "Our Village" were published. "Belford Regis; or, Sketches of a Country Town," subsequently appeared, the materials for which were drawn from the town of Reading. Her later, though less-celebrated works, were, "Stories of Country Life," and "Atherton," a novel. She also wrote several dramas, four of which require a short mention. "Julian" was performed in 1823, Macready enacting the leading part. The "Foscari" and "Rienzi" were also very successful; but "Charles the First" was interdicted by Colman, who at the time was licenser of plays. It was subsequently played at a minor theatre, but soon disappeared from the stage. Her latest effort was "Recollections of my Literary Life; or, Books, Places, and People," which is a light gossiping commentary upon many of the people and of the circumstances which influenced her life. B. at Alresford, Hampshire, 1786; D. at Swallowfield Cottage, near Reading, 1855.

MITFORD, William, an eminent English historian, who studied at Queen's College, Oxford, and subsequently entered himself of the Middle Temple; but, succeeding to the family estates upon the death of his father in 1761, he retired into the country, and devoted his life to the study of the Greek language and literature. In 1769 he was appointed captain in the South Hampshire militia, of which Gibbon was the major. Some conversations between the historian of the Decline and Fall and himself led, it is said, to his undertaking a history of Greece. That history was produced in successive volumes, the first of which appeared in 1784. Although superseded at the present

time by the works of Grote and Bishop Thirlwall, the history affords new and accurate views of many important events. The great defect of the work is the strong prejudice of the author against democracy,—a prejudice which caused him to regard Philip of Macedon as a perfect hero, and the Athenians as a set of miscreants. With him Demosthenes was nothing less than an unprincipled demagogue. Mr. Mitford also published a treatise on the Religions of Ancient Greece and Rome. He was returned to parliament in 1785, and sat there during many years; but his speeches were principally made upon the militia laws. A treatise by him upon "The Military Force, and particularly the Militia, of England," created some excitement in its day, but is now forgotten. B. in London, 1744; D. in Hampshire, 1827.

MITHRIDATES I., *mith'-ri-dai'-tees*, king of Pontus, was son of Ariobarzanes; but little is known of his life. Ariobarzanes II. obtained his kingdom B.C. 363; but Mithridates had died before that period.

MITHRIDATES II. was successor to Ariobarzanes, B.C. 337. He was an energetic prince, and greatly extended his dominions, and added thereto Cappadocia and Phrygia. He was put to death by Antigonus, B.C. 302, at the age of 84 years.

MITHRIDATES III. was son of the preceding, and ruled between B.C. 302 and 266. His successor was Ariobarzanes III.

MITHRIDATES IV., son and successor of Ariobarzanes III., about B.C. 240. He attacked Sinope, and made war upon Eumenes II. D. about B.C. 190.

MITHRIDATES V. was grandson of the preceding, and commenced his reign about 156 B.C. He entered into an alliance with the Romans; and, during the third Punic war, assisted them with a powerful fleet. He was slain by some of his attendants, at Sinope, B.C. 120.

MITHRIDATES VI., the greatest of the name, and one of the most determined enemies that the Romans encountered. He succeeded the preceding king B.C. 120, at which time he was only 11 years of age. The Romans, anxious to weaken his power, declared war against him, and he, in revenge, ordered all the Romans in his dominions to be massacred. He then marched with a powerful army against Aquilius, whom he defeated; but Sylla, after some victories, forced Mithridates to make peace, B.C. 84. He renewed the war in alliance with Tigranes, king of Armenia. After conquering Bithynia, Mithridates laid siege to Cyzicum, in the Propontis; but Lucullus, having marched to its relief, besieged Mithridates in his camp. The king of Pontus defeated the Romans in two combats, but was completely vanquished in a third. Glabrio being sent to supersede Lucullus in the command, this change was advantageous to Mithridates, who recovered the best part of his kingdom. Pompey, however, obtained a great victory over him near the Euphrates, B.C. 65, upon which Mithridates fled to Tigranes, who refused him an asylum. He next sent ambassadors to Pompey to sue for peace, but the Romans insisted upon his surrendering in person. Meantime his people revolted, and proclaimed his son Pharnaces king. Rather than fall into the hands of the Romans, Mithridates put an end to his life, B.C. 63. B. about 131 B.C.

MITRIWIEZ, *mit'-ri-veetz*, a town of the Austrian dominions, 24 miles from Peterwardein. It is the headquarters of the Peterwardein regiments. *Pop.* 5,500.

MITSCHERLICH, Eilard, *mitch'-er-lik*, a distinguished German chemist, who was, in 1821, appointed professor of chemistry in the university of Berlin. He was the discoverer of the fact, that two bodies having the same composition could assume different forms; to which Berzelius gave the name "Isomerism." His greatest literary work is "Manual of Chemistry," which details the principles of the science from a mathematical and physical point of view. B. at Neurede, near Jever, 1794.

MITTAU, *mit'-tow*, a town of European Russia, in the government of Courland, on the Aa, 25 miles from Riga. It has churches for various denominations, a gymnasium, theatre, observatory, school of surgery, and benevolent institutions. *Manf.* Linen goods and soap. *Pop.* 33,000.

MITTWEYDA, *mit-vi'-da*, a town of Saxony, 25 miles from Leipsig. *Manf.* Woollen, cotton, and linen fabrics. *Pop.* 7,000.

MITYLENE, *mit'-i-le'-ne*, an island of the Grecian Archipelago, belonging to Turkey, near the coast of Asia Minor. *Area*, 276 square miles. *Desc.* Traversed by a range of mountains covered with pine forests, and attaining an elevation of upwards of 3,000 feet. *Pro.* Fruits, cotton, oil, pitch, wine, and corn. *Pop.* 4,000. *Lat.* 39° to 39° 20′ N. *Lon.* 25° 50′ to 26° 35′ E.

MIXTECAPAN, *mix'-te ka-pan'*, a table-land of the Mexican Confederation, occupying most of the department of Oaxaca. It has an average height of 5,000 feet above the level of the sea.

MOAB, *mo'-ăb*, the son of Lot, was founder of the Moabites, who dwelt in the country on the east of the Dead Sea and the river Jordan, whence they had driven out the Emim, a race of giants. At the command of God, the Israelites left the Moabites in undisturbed possession of their country. Eglon, their king, held the Hebrews in captivity during eighteen years, B.C. 1332—1314. They were subsequently conquered by Saul, and subjected to pay tribute by David. They were a pastoral people, and were ruled by kings and princes. Their religion was a licentious idolatry, and, in cases of extreme danger, they offered human sacrifices. Josephus narrates that, together with the Ammonites, they were reduced to captivity by Nebuchadnezzar in the 5th year after the destruction of Jerusalem.

MOBILE, *mo-beel'*, a seaport city of the United States, formerly in West Florida, now the capital of Mobile county, in Alabama, on the river of the same name, at its entrance into Mobile Bay, 120 miles from New Orleans. In 1839 it was destroyed by fire, but has been rebuilt. Its bay is defended by a fort, with a lighthouse. *Pop.* 22,000. *Lat.* 30° 10′ 30″ N. *Lon.* 88° 15′ W.

MOBILE, a deep, broad, and navigable river of North America, formed by the junction of the Alabama and the Tombogee rivers. After a course of 40 miles, it enters Mobile Bay, in the Gulf of Mexico, in *lat.* 30° 15′ N.

MOCHA, *mo'-ka*, an island of Chili, lying off the coast of Auracania, resorted to by whalers, and 8 miles long. *Lat.* 38° 24′ S. *Lon.* 74° W.

MOCHA, or MOKHA (Arab. *mo-ka'*), a city of Yemen, in Arabia, the principal port on the Red Sea, 55 miles from the Strait of Bab-el-Mandeb. The appearance of the town from the sea is handsome, having all its buildings whitewashed, and three minarets of considerable height; while the dead line of the flat roofs which are employed in all Mahometan cities, is broken by several elegantly-built mausoleums. The interior is, however, filthy, and many of the habitations are in a decayed state. The best houses, in general, are those facing the sea. The main, and almost sole staple of Mocha, is coffee, for which this part of Arabia is famed; also gum-arabic, myrrh, frankincense, balm of Gilead, senna, sharks' fins, rhinoceros' horns and hides, acacia, and civet. *Pop.* 7,000. *Lat.* 13° 20′ N. *Lon.* 43° 20′ E. The country of Mocha is situate in the S.W. of Abyssinia.

MODBURY, *mod'-ber-e*, a market-town of Devonshire, 12 miles from Plymouth. *Pop.* 2,000.

MODENA, duchy of, *mod'-e-na*, lies in the north of Italy, between the Po on the N. and the Apennines on the S., and is bounded E. by the states of the Church, and W. by Parma. *Area*, 2,317 square miles. *Desc.* It is an inland tract of country, traversed by the Apennines, which attain their culminating point in Monte Cimone, nearly 6,976 feet above the level of the sea. *Rivers.* The principal are the Crostolo, the Fanaro, and the Secchia. *Pro.* Corn, wine, fruit, olives, mulberry-trees, and hemp. *Minerals.* Iron and marble. *Pop.* about 590,000. In 1796, the duke of Modena was expelled from his dominions by the French. In 1814, the congress of Vienna restored to his son, the archduke Francis of Este, the territory of Modena. In August, 1859, the National Assembly, by a unanimous vote, declared the forfeiture of Francis V., and any other prince of the house of Hapsburg-Lorraine, to the ducal throne. After which, the Assembly decreed the annexation of the Modenese state to the kingdom of the dynasty of Savoy, under the sceptre of King Victor Emmanuel II.

MODENA, the capital of the above duchy, is situate in a delightful plain, between the rivers Panaro and Sec-

chia, 24 miles from Bologna. It has a citadel, and is surrounded with ramparts. The houses are well built, the streets clean and regular, and the Strada Maestre, on the Æmilian Way, is the finest in the town; but almost all are bordered with arcades, under which the passengers walk. The finest public building is the ducal palace, in a large square, with a picture-gallery, extensive library, and gardens. The cathedral is in the Gothic style, and remarkable for nothing but its marble tower and the wooden bucket, which, in the early part of the 14th century, was the cause of feuds between the Modenese and the Bolognese. There is here a college. The other objects of interest are the hospitals, the theatre, and some good scientific collections. *Manf.* Woollen and hempen cloths, hats, leather, glass, and silk. *Pop.* 30,000. It is the birthplace of Pigonius, Fallopius, and the poet Tassoni. Under the empire of Napoleon I. it was the capital of the department Tanaro.

MODERN, *mo-dern'*, a town of Hungary, 15 miles from Presburg. It is the seat of the Lutheran superintendent for Hungary on this side of the Danube. *Pop.* 5,000.

MODICA, *mod'-e-ka*, the capital of the island of Sicily, near the river Scieli, 30 miles from Syracuse.

MODIGLIANO, *mod'-eel-ye-a'-no*, a town of Tuscany, on the Marzeno, 40 miles from Florence. It is inclosed by walls, and has a castle. *Pop.* 3,000.

MOEN, *mo'-en*, an island of Denmark, in the Baltic, separated from Zealand by the Ulf Sound, and from Falster by the Groen Sound. *Area*, 87 square miles. *Desc.* Mostly level, and on the E. defended by a precipitous coast. *Pop.* 13,500. *Lat.* 54° 57′ N. *Lon.* 12° 36′ E.

MŒRIS LAKE, *me'-ris*, a lake in Central Egypt, occupying the N. part of the valley of Fayoum. *Ext.* 30 miles long, with a breadth of 6. It abounds with fish, and communicates by two large channels with the Nile, and with the canal of Joseph. *Lat.* 29° 30′ N. *Lon.* 32° 30′ E.

MOFFAT, *mof'-fat*, a parish and market-town of Scotland, in Dumfries-shire, on the Annan, 20 miles from Dumfries. The principal, or rather the only street, is spacious, with good inns and lodging-houses. It has been long celebrated for its mineral waters. *Pop.* 2,218.

MOFFAT, Robert, an eminent missionary, who, with John Williams and others, accepted the task of preaching the gospel to barbarous tribes, in 1816. In 1819 he visited England, and, at several public meetings, narrated his adventures among the savage and frequently warlike tribes of Africa. About the same time he published a work, entitled "Missionary Labours and Scenes in Southern Africa;" he also completed a translation of the New Testament and the Psalms in the Bechuana language. He returned to the scene of his missionary labours shortly afterwards. His daughter married the celebrated Dr. Livingstone. B. in Scotland, at the close of the last century.

MOFFAT HILLS, a mountain-chain dividing Dumfries-shire from the counties of Lanark and Peebles, and, in Hearthfell, attaining an elevation of 2,685 feet above the level of the sea. The rivers Tweed, Clyde, and Annan have their sources in this chain.

MOGODOR, or SUIRA, *mog'-o-dor*, a considerable seaport of Morocco, on the Atlantic, 123 miles from Morocco. It stands on a low flat desert of accumulating sand, which separates it from the cultivated country, and has a very beautiful appearance from the sea, the houses being all of stone, and white. It consists of two parts, one of which may more properly be called a citadel, containing the Custom-house, Treasury, and the houses of the foreign merchants. The other part is inhabited by the Jewish population, and, on all sides, is defended by very strong batteries. The harbour is formed by an island to the south of Mogodor. *Exp.* Wool, hides, skins, gum, wax, almonds, feathers, gold dust, wrought iron, hardwares, and cotton goods. *Imp.* The imports consist chiefly of European manufactures. *Pop.* 17,000, of whom a fourth are Jews. *Lat.* 31° 50′ N. *Lon.* 9° 20′ W.—This place was founded in 1760, and, in 1844, was bombarded by the French.

MOGUER, *mo-gair'*, a town of Spain, in the province of Seville, on the Tinto, 5 miles from Huelva. It has an old Franciscan convent, which is preserved as a national monument. *Pop.* 6,700.—In 1484, here Columbus craved charity, and was assisted by the prior who was the means of enabling him to pursue his discoveries. Near this is the port of Palas, whence he sailed, in 1492.

MOGUL EMPIRE, THE, *mo-gul'*, comprised principally the provinces of Delhi and Agra, in India, till overthrown by the British power.

MOHACS, *mo'-hats*, a town of Hungary, on an arm of the Danube, 25 miles from Funfkirchen. It has several churches, a college, and is a station for steamers plying on the Danube. *Pop.* 10,000.—In 1526, the Hungarians were here defeated by the Turks, their king, Louis II., slain on the field, with upwards of 20,000 soldiers. In 1687, the Turks were also here defeated by the imperialists under the duke of Lorraine.

MOHAMMED. (*See* MAHOMET.)

MOHAWKS, *mo'-hawks*, a race of American Indians, one of the six nations which compose the confederation of Iroquois. (*See* IROQUOIS.) The Mohawks dwell partly in Upper Canada and partly in the territories of the United States.

MOHILEV, *mo-he'-lef*, an extensive government or province of the west of European Russia, inclosed by the governments of Smolensk, Tchernigov, Minsk, and Vitebsk. *Area*, 18,700 square miles. *Desc.* Mostly an extensive plain. *Rivers.* The principal are the Dnieper, Druetz, and Sosha. *Pro.* Corn; and large quantities of timber are floated down the rivers to the Black Sea. *Pop.* 940,000. *Lat.* between 52° and 55° 15′ N. *Lon.* between 28° 35′ and 32° 35′ E.

MOHILEV, a town of European Russia, and capital of the above government, on the Dnieper, 85 miles from Smolensk. In the centre of the town is a large octagonal square, surrounded with fine buildings. It has government offices, magazines, an archbishop's palace, and numerous churches. It is the seat of both Greek and Roman Catholic archbishoprics, and has several well-frequented fairs. *Pop.* 25,000.

MOHILEV, a town of European Russia, on the Dniester, 52 miles from Kamenetz. It has an active trade with Wallachia and the neighbouring provinces. *Pop.* 7,500.

MOHRUNGEN, *mo-roon'-gen*, a town of E. Prussia, 60 miles from Konigsberg. *Pop.* 3,100.—Here the Russians were defeated by the French, in 1807.

MOIR, David Macbeth, *moir*, a modern poet and prose writer, who was educated for and practised the medical profession. He made his first appearance as an author in 1812, by publishing a small volume of poems. He next wrote for some local magazines and journals, and, at the commencement of "Blackwood's Magazine," he became a contributor to its pages, and remained so until his death. For the same magazine he also wrote "The Autobiography of Mansie Wauch." In 1831 he published the "Outlines of the Ancient History of Medicine," and, in the same year, exerted himself energetically while the cholera raged in Musselburgh, where he practised his profession, and subsequently published a pamphlet entitled "Practical Observations on Malignant Cholera." In 1851 he delivered a course of lectures upon the "Poetical Literature of the Past Century," at the Edinburgh Philosophical Institution. As a poet, he was tender and pathetic, rather than forcible and original. His poetical works were collected in 1852, and to them was prefixed his life. Dr. Moir was a graceful essayist and a competent man of science, and was, moreover, a kind and excellent man. B. at Musselburgh, 1798; D. 1851.

MOIVRE, Abraham de, *moivr*, an able mathematician, who, on the revocation of the edict of Nantes, went to London, where he perfected his studies in the mathematics, and was chosen fellow of the Royal Society. He also became a member of the Academy of Sciences at Paris. He was so highly esteemed by the Royal Society, that he was appointed to arbitrate in the famous dispute between Newton and Leibnitz on the differential calculus. He was the author of a work on Life Annuities, and of several valuable papers in the Philosophical Transactions. To his other excellent qualities he added that of being a sincere Christian; and when a person once said to him, by way of compliment, that all mathematicians denied religion, De Moivre answered, "I will prove that I am a Christian, by pardoning the foolish insult you have committed." B. at Vitry, France, 1667; D. at London, 1754.

MOLA, *mo'-la*, a seaport-town, of Naples, on the Adriatic, 14 miles from Bari. It has a coasting trade. *Pop.* 8,500.

MOLAY, James de, *mo'-lai*, the last grand-master of the order of Templars. The prodigious wealth of the knights having excited the envy and hatred of Philip the Fair, king of France, he resolved to suppress the order. Accordingly, a violent persecution broke out against the knights, on charges the most absurd and abominable. Molay was tried, condemned, and burnt alive near Paris, in 1314. He endured his sufferings with the greatest fortitude, and vindicated the innocence of his order to the last.

MOLD, or MOULD, *molde*, a market-town of Wales, in Flintshire, 12 miles from Chester. It consists chiefly of one long street. The church is a very handsome building. *Manf.* Cotton goods, and in the parish are iron, coal, and lead mines. *Pop.* 11,000.

MOLDAU, *mol'-dou*, a large and rapid river of Bohemia, joining the Elbe a little above Melnik, after a course of 200 miles.

MOLDAVA, *mol-da'-va*, a considerable river rising in the Carpathian mountains, and, after a course of 100 miles, joining the Sereth, 36 miles from Jassy.

MOLDAVIA, *mol-dai'-ve-a*, a province in the N.E. extremity of European Turkey, bounded E. by Russia, S. by Turkey, W. by Transylvania, and N. by Austrian Poland. *Area*, 17,000 square miles. It is divided into Upper Moldavia, or Zara de Suss, and Lower Moldavia, or Zara de Schoss. These again are subdivided into districts. *Desc.* Traversed by the Carpathians, and covered with forest and pasture lands. *Rivers.* The principal are the Danube, the Pruth, and the Sereth. *Lakes.* The Bratetsch and Dorohoe. *Pro.* Wheat, barley, millet, maize; also wine and tobacco in considerable quantities. To the rearing of horses, and to the breeding of horned cattle and sheep, the Moldavians give considerable attention; and large numbers of these are exported. Moldavia has no manufactures but for home consumption. *Pop.* estimated at 1,500,000, most of whom belong to the Greek church. At the treaty of Bucharest, in May, 1812, the part of Moldavia to the N. of the Pruth was retained by Russia. (*See* DANUBIAN PRINCIPALITIES.)

MOLESWORTH, Lord Robert, *moles'-werth*, a nobleman, who contributed so effectually to the revolution of 1688, that William III. admitted him of the privy council, and dispatched him upon an embassy to the court of Denmark. Having given some cause of offence at Copenhagen, he was recalled, and, after his return to England, published an account of the kingdom of Denmark, which enjoyed great popularity. Under George I. he acted as commissioner of trade and plantations. The same monarch also advanced him to the Irish peerage in 1716. B. at Dublin, 1656; D. 1725.

MOLESWORTH, Sir William, an English statesman and man of letters, who was the eighth baronet in his family, an old Cornish one, originally of Irish extraction. After spending some time at Cambridge and Edinburgh, where an Italian refugee was his tutor in classics, metaphysics, and mathematics, he repaired to Germany. Philology and history were his chief studies in the latter country; and, after completing his collegiate course, he made the tour of Europe, and returned to his native land in 1831. In the year following he was returned to parliament as member for East Cornwall; was re-elected in 1834; but, in 1837, declining to contest this seat, he sought and obtained the suffrages of Leeds. He represented this latter place until 1841, after which time he remained out of parliament during several years. The constituency of Southwark chose him as their representative in 1850, and in that capacity he sat in the House of Commons until his death. In the Aberdeen administration of 1853, he was appointed first commissioner of public works, and in 1855 he commenced his short but brilliant career as secretary for the colonies. As a speaker, he was too philosophical to be generally popular; but several of his speeches were as well received as they, and, indeed, nearly all he uttered, deserved to be. These were the orations on the colonies, the state of the nation and condition of the people, and on transportation. Few men have so faithfully earned the respect and gratitude of the English nation as Sir William Molesworth: in the words of the *Times*, he "found our colonial empire disorganized and distracted by the mal-administration of the Colonial Office, wedded as it then was to a system of ignorant and impertinent interference. He first aroused the attention of parliament to the importance of our remote dependencies, and explained, with incomparable clearness and force, the principles of colonial self-government. With untiring diligence and great constructive power, he prepared draught constitutions, and investigated the relations between the imperial government and its dependencies. Starting from a small minority, he brought the parliament and public over to his side, till principles once regarded as paradoxes came to be regarded as axioms. By such means he fairly won the position of secretary of state for the colonies; but he did not live to enjoy the prize which he had grasped. The best monument that could be raised to him would be a complete collection of his parliamentary speeches; the noblest epitaph that could be inscribed on his tomb would be the title of 'The Regenerator and the Liberator of the Colonial Empire of Great Britain.'" He was for some time the proprietor and conductor, in conjunction with his friend John Stuart Mill, of the "Westminster Review." Many valuable articles from his pen likewise appeared in the newspapers and periodicals. A noble edition of the works of Thomas Hobbes (*see* HOBBES), in 16 volumes, was produced by him at his own expense. B. in Cornwall, 1810; D. 1855.

MOLFETTA, *mol-fet'-ta*, a town of Naples, on the Adriatic, 16 miles from Bari. It has a cathedral and a number of churches, with a considerable trade in corn, oil, and almonds. *Pop.* 23,000.

MOLIÈRE, John Baptiste, *mol'-e-air*, a celebrated French comic poet, whose real name was Poquelin. His father, who was a tapestry-maker, intended him for the same business; but young Poquelin being in the habit of visiting the theatre, conceived a violent inclination for the stage. At the age of 14 he commenced his studies under the Jesuits, and made a rapid progress in belles lettres. His father becoming reduced in circumstances, the youth associated himself with some persons of his own age, who had a like attachment to

MOLIÈRE.

dramatic representation. It was in consequence of this connection that he took the name of Molière. This event took place in the year 1645, after which time we hear no more of him until 1653, when he was appointed by the prince de Conti director of an histrionic company at Languedoc. He subsequently went with his players to Lyons, where, in 1658, he brought out his first comedy, entitled "L'Etourdi," or, the

Blunderer, which piece was received with great applause, and greatly pleased his patron, the prince de Conti, who had known the author at college. That prince offered to make him his secretary, which honourable station Molière declined, saying that, "though he was a passable author, he should make but a bad secretary." After performing at various places, Molière's company visited Paris, where, in 1658, they performed several of his plays before Louis XIV., who took the troupe into his own service, and gave their leader a pension. During the subsequent fifteen years, Molière worked hard as a dramatic author and actor, and received many substantial marks of the royal favour. His last piece, "L'Hypocondriaque; ou, le Malade Imaginaire," occasioned his death; for, by his exertions in performing Argan, the principal character, he was seized with a convulsion, of which he died. The archbishop of Paris refused to allow his remains to be interred in consecrated ground, on account of his profession, till he was compelled to do so by the king. Molière left a widow, with whom he had lived a very unhappy life, and who married a comedian named Guerin, and died in 1728, aged 92. The works of Molière have been often printed; one of the best editions is that of Paris, 1838. They have been translated into English; and several of his comedies have been adapted to our stage with success. Molière is justly called the French Aristophanes. B. at Paris, 1622; D. 1673.

MOLINA, Louis, *mo-le'-na*, a celebrated Spanish Jesuit. He completed his studies at Coimbra, after which he was professor of divinity at Evora during twenty years. Molina wrote "Commentaries on the Summa of Aquinas," a treatise "De Justitia et Jure," another "De Concordia Gratiæ et Liberi Arbitrii." This last is a work of merit, and occasioned great disputes afterwards between the Jesuits and Dominicans, the latter order accusing Molina of reviving Pelagianism. B. at Cuença, Castile, 1535; D. at Madrid, 1600.

MOLINOS, Michael, *mo-le'-nose*, a Spanish divine, who published a book called the "Spiritual Guide," in which he maintained that man must annihilate himself, or reduce his mind to an absolute quiescence, in order to enjoy God. For this he was sent to the prison of the Inquisition, where he died. The religious opinions of Molinos occasioned great disputes in France, where they were known by the name of "quietism," on account of the passive disposition of mind which they inculcate. Fénélon and Madame Guyon were the great advocates and improvers of this system. B. at Saragossa, 1627; D. 1696.

MOLISE, or SANNIO, *mo-le'-sai*, a province of Naples, having the Adriatic on the N., and on the other sides Abruzzi, Capitanata, Principato-Ultra, and Terra di Lavoro. *Area*, 1,785 square miles. *Desc.* Mountainous, and in the S. traversed by the principal chain of the Apennines. *Pro.* Wheat, millet, maize, fruits, wine, and oil. Much of the country is covered with forest and devoted to pasturage. *Pop.* 361,000.

MOLLOY, Charles, *mol'-loi*, a dramatic writer, who became a student of the Middle Temple, and was the editor of a periodical paper, called "Common Sense." His plays are, "The Perplexed Couple," "The Coquette," and "The Half-pay Officers." B. in Dublin, 1706; D. 1766.

MOLO, *mo'-lo*, a rhetorician, who went to Rome B.C. 87. He taught rhetoric with great reputation, and had Cicero and Julius Cæsar among his pupils. The former followed him to Rhodes to profit by his instructions. Some years afterwards, Molo was sent ambassador by his countrymen to the Roman senate, and was received with great honour.

MOLORCHUS, *mo-lor'-kus*, an old shepherd near Cleonæ, who received Hercules with great hospitality. The hero, to repay the kindness he received, destroyed the Nemæan lion, which laid waste the neighbouring country; and therefore the Nemæan games instituted on this occasion are to be understood by the words "Ludus Molorchi."

MOLSHEIM, *molz'-hime*, a town and parish of France, 12 miles from Strasburg. *Manf.* Hardware goods, paper, and tapes. *Pop.* 3,500.

MOLSKOI, *molz'-koi*, one of the Sandwich islands, in the Pacific Ocean. *Area*, 190 square miles. *Pop.* 5,000.

MOLTON, SOUTH, *molt'-ton*, a market-town and parish in Devonshire, on the Mole, 12 miles from Barnstaple. *Manf.* Woollens and lace. *Pop.* 4,500.—NORTH MOLTON is 4 miles from this town. *Pop.* 2,000.

MOLUCCA, or SPICE ISLANDS, *mo-luk'-ka*, the name given to the islands of the Asiatic archipelago; comprising Amboyna, Banda, Ceram, Ternate, Tidore, and Batchian. They are chiefly famous for the production of spices, particularly nutmegs and cloves. *Pop.* Unascertained.—They were taken by the British from the Dutch, but restored in 1814.

MOLYNEUX, Sir William, *mol'-i-noo*, a gallant knight in the reign of Henry VIII., who displayed great bravery at the battle of Flodden Field. On his deathbed he gave this advice to his son: "Let the underwood grow; the tenants are the support of a family, and the commonalty are the strength of a kingdom. Improve this fairly; but force not violently, either your bounds or rents, above your forefathers'."

MOLYNEUX, William, an eminent mathematician, who received his education at Trinity College, Dublin, after which he entered as a student of the Middle Temple, London. The Philosophical Society, established at Dublin in 1683, owed its origin to his endeavours, and he became the first secretary. Soon after, he was appointed surveyer-general of the works and chief engineer. In 1685 he was chosen a member of the Royal Society, and in 1689 he settled with his family at Chester, where he employed himself in finishing his "Treatise on Dioptrics," which was published in 1692. In this year he returned to Dublin, and was chosen one of the representatives for that city. Besides the above, he wrote: "Sciothericum Telescopium;" or, a description of a Telescopic Dial invented by him; also, "The Case of Ireland stated, in relation to its being bound by Acts of Parliament in England;" some Papers in the "Philosophical Transactions;" and several letters between him and Mr. Locke. B. at Dublin, 1656; D. 1698.—Samuel, son of the preceding, became secretary to George II. when prince of Wales, and was distinguished by his skill in astronomy. He improved the method of making telescopes, and presented one made by himself to the king of Portugal. But being appointed a commissioner of the Admiralty, he was left without time to pursue his scientific inquiries. He gave his papers on the subject to Dr. Smith, professor of astronomy at Cambridge, who printed them in his "Treatise on Optics." B. at Chester, 1689; D. 1738.

MOMPOX, *mom'-pox* (Sp. *mom'-poj*), a city of New Granada, S. America, on the Magdalena. It stands in a marshy uncultivated country, but is said to be well built. *Pop.* 10,000. *Lat.* 9° 14′ 20″ N. *Lon.* 74° 27′ 30″ W.

MOMUS, *mo'-mus*, the god of pleasantry among the ancients, son of NOX, according to Hesiod. He was continually employed in satirizing the gods, and whatever they did was freely turned into ridicule. Vulcan, Minerva, Venus, &c., all alike experienced the shafts of his censure and satire. Such illiberal reflections, however, upon the gods, were the cause of his being driven from Olympus. He is generally represented raising a mask from his face, and holding a fool's bauble in his hand.

MONACO, *mon'-a-ko*, a small principality of Italy, in the Sardinian states, bounded by the divisions of Nice, Genoa, and the Mediterranean. *Area*, 53 square miles. *Desc.* Fertile; producing oranges, lemons, and other fruits. *Pop.* 8,000.—The prince of this state is said to reside at Paris one half of the year and at Monaco the other.

MONACO, the capital town of the above principality, stands on a rocky promontory in the Mediterranean, 8 miles from Nice. *Pop.* 1,300.—It was fortified in the time of Louis XIV.

MONAGAY, *mon'-a-gai*, a parish of Ireland, in the county of Limerick, containing part of the town of Newcastle. *Pop.* 6,000.

MONAGHAN, *mon'-a-han*, an inland county of Ireland, in the province of Ulster, bounded N. by Tyrone, E. by Armagh, and S.E. by the counties of East-Meath and Louth. *Area*, 500 square miles. *Desc.* Hilly, and in many parts interspersed with bogs and small lakes. *Rivers.* The Lagan, the Fane, the Myrvale, the Fin,

and the Blackwater. *Lakes.* Numerous, and some of them considerable sheets of water. *Pro.* Potatoes, oats, wheat, and flax. Excellent butter is produced, the breed of cattle being good. *Minerals.* Beds of the richest limestone, abundance of marl, and lead ore of the richest quality. *Manf.* Linen is the great staple. *Pop.* 142,000.

MONAGHAN, the capital of the above county, is situate on two large ponds, 68 miles from Dublin. It has a Roman Catholic chapel, market-house, infirmary, infantry barracks, and schools. *Manf.* Linen. *Pop.* 4,000.

MONASTIR, or BISTOLIA, *mon-as-teer'*, a town of European Turkey, on one of the tributary streams of the Vistritza, or Hebrus, 95 miles from Salonica. It is the principal entrepôt for goods passing between E. and W. Turkey. *Pop.* 15,000.—Also a town of N. Africa, 80 miles from Tunis. *Manf.* Woollen and camlet fabrics. *Pop.* 12,000.

MONBODDO, *mon-bod'-do*, James Burnett, styled Lord, a learned Scotch writer, and one of the lords of the Court of Session. He received his education at Aberdeen, and at the university of Gröningen. In 1738 he returned to Scotland, commenced the practice of the legal profession, and was, in 1767, elevated to the bench. As a writer, he was profound but paradoxical; Boswell, in a note in his "Tour to the Hebrides," says, "there were several points of resemblance between him and Dr. Johnson; learning, clearness of head, precision of speech, and a love of research on many subjects which people in general do not cultivate." Foote paid Lord Monboddo the compliment of saying, "that he was an Elzevir edition of Dr. Johnson." His most important works were, a "Dissertation on the Origin and Progress of Language," and "Ancient Metaphysics." He held the singular notion, that men were only a civilized species of monkeys, and that the savage state was that in which virtue and happiness could be best attained. This extravagant love of the ancients led him to make, like them, supper his principal meal, and at these entertainments, he had Dr. Nash, Dr. Hutton, and many of the learned of Edinburgh, as his guests. B. at Monboddo, Kincardineshire, 1714. D. at Edinburgh, 1799.

MONCALIERI, *mon'-kal-ye-air'-e*, a town of Piedmont, on the Po, 4 miles from Turin. *Pop.* 9,200. One of the largest cattle fairs in Piedmont is held here in October.

MONCH, *mawnsh*, the 'Monk' one of the loftiest heights in Switzerland, 3 miles from the Jungfrau. Height, 13,045 feet.

MONDOVI, *mon-do-ve'*, a town of Sardinia, near the river Ellero, 45 miles from Turin. It is divided into four parts; the town proper, called Piazza, on the mountain; and the three suburbs, Carassone, Breo, and *Piano della Valle, built at the bottom.* The town proper has a small citadel, and contains a great number of religious houses and churches, a bishop's palace, college, and schools. *Manf.* Woollen and muslin goods, and there are tanneries and iron-forges; but the chief branch of industry is the spinning of silk. *Pop.* 20,000. Here, in 1796, the French, under Napoleon I., defeated the Sardinian troops, under Colli, and in 1799 the town was sacked by the French, under Soult.

MONEMVASIA, or NAPOLI DI MALVASIA, *mal-va'-se-a*, a town of Greece, in the Morea, 20 miles from Cape Malea. *Pop.* Unascertained. Near it are the remains of Epidaurus Limera.

MONFLANQUIN, *maw-flan'-kĕ*, a parish and town of France, in the department of Lot-et-Garonne, 10 miles from Villeneuve. *Pop.* 5,000.

MONGAULT, *mawn-golte'*, Nicholas Hubert de, a learned French ecclesiastic, who was educated in the congregation of the Oratory, and became a member of the Academy of Inscriptions, and tutor to the duke de Chartres. His works are a French translation of Herodian, and another of Cicero's Letters to Atticus; and dissertations in the Memoirs of the Academy of Inscriptions. B. at Paris, 1674; D. 1746.

MONGE, Gaspard, *mawnzh*, an eminent French geometrician, was the son of an hotel-keeper, and was employed, at the age of 16, to teach natural philosophy in the college of Lyons. In 1780 he became member of the Academy of Sciences, and, three years afterwards, was appointed examiner of naval aspirants. Energetically espousing the principles of the Revolution, he became, in 1792, minister of marine, which post proving to be little in accordance with his genius, he renounced the employment soon afterwards, and turned his attention to providing his country with the most efficient methods of defence. He was one of the founders of the Polytechnic School, accompanied Bonaparte to Egypt, and became president of the Institute of Cairo. The emperor subsequently nominated him senator, Count de Peluse, and loaded him with honours: after the Restoration, however, he fell into disgrace. His various works on geometry are among the clearest and best in the French language, which is itself particularly rich and excellent in this department of science. B. at Beaune, 1746; D. 1818.

MONGHIER, *mon-geer'*, a celebrated fortress of Hindostan, and capital of a district of the same name, on the banks of the Ganges, 80 miles from Patna. It is situate on a rocky height, and has fine European and other residences. *Manf.* Cutlery, guns, carriages, furniture, arms, clothing, &c. *Pop.* 30,000. *Lat.* 25° 23′ N. *Lon.* 86° 30′ E.—The DISTRICT has an area of 2,558 square miles, and a population of 800,000.

MONGO, *mon'-go*, a mountain-range in W. Africa, opposite Fernando Po.

MONGOLIA, *mon-go'-le-a*, an extensive region in the northern part of Central Asia, to the N. and N.W. of China, and filling most of the space between that empire and Asiatic Russia. *Area*, estimated at 91,500 square miles. *Desc.* Mostly a vast desert, though here and there interspersed with fertile tracts, upon which large herds of cattle are raised. The rivers are mostly affluents of the Amoor, and the lakes are both numerous and extensive. The country is chiefly distinguished as being traversed by the wandering hordes of that nomadic race which, under the name of Mongols, or Moguls, has been so celebrated. They are Buddhists, living under various chiefs, and paying tribute to the Chinese emperor, who returns them presents to a greater amount. Their trade is almost entirely confined to China proper, to which they send their live stock, and receive, in return, brandy, cotton, silk and woollen fabrics, with tobacco. *Pop.* perhaps 10,000,000. *Lat.* between 37° and 50° N. *Lon.* between 88° and 125° E.

MONIMAIL, *mon'-i-mail*, a parish of Scotland, in which is the "Mount" of Sir David Lindsay, a celebrated satirical poet of the time of James IV. and V. It is in Fifeshire, 4 miles from Cupar. *Pop.* 1,200.

MONK, George. (*See* ALBEMARLE, Duke of.)

MONKLAND, *munk'-land*, two parishes of Lanarkshire, Scotland; one near Airdrie, *pop.* 25,000; the other, 8 miles from Glasgow, *pop.* 30,000.—They have iron-mines.

MONKTON, *munk'-ton*, several parishes of England, none of them with a population above 4,000.

MONMOUTH, *mon'-mouth*, the capital town of Monmouthshire, is situate at the confluence of the rivers Monnow and Wye, which are crossed by three bridges, 17 miles from Hereford. There are still some remains of its ancient castle, erected before the Conquest. Its principal buildings are a parish church, a gaol, several banks, a town-hall, and schools. *Manf.* Paper, bar-iron, and tin plates. *Pop.* 5,300.—Henry V. and Geoffrey of Monmouth were natives of this town. In the neighbourhood is Troy House, where the cradle of Henry V., and the armour he wore at Agincourt, are preserved.

MONMOUTH, a large maritime county of the United States, in New Jersey. *Area*, 618 square miles. *Pop.* 30,000.

MONMOUTH, a township of Maine, 16 miles from Augusta. *Pop.* 2,000.

MONMOUTH, James, Duke of, natural son of Charles II., was, at his father's restoration, created earl of Orkney, and, at a subsequent period, became duke of Monmouth and knight of the Garter. He was for some time in the service of France, with an English regiment, and signalized himself against the Dutch; for which he was created lieutenant-general. On his return to England, he was sent, in 1679, to quell an insurrection in Scotland; after this he joined the disaffected party, who were for excluding the duke of York from the succession to the throne. He was also concerned in a

plot against his father, for which he was pardoned, and then went to Holland, whence he returned on the accession of James II.; and having landed in Dorsetshire, obtained followers, but was defeated at Sedgemoor, in Somersetshire, and being taken in a cornfield, was conveyed to London, where he was tried and sentenced to death. B. at Rotterdam, 1649; beheaded, 1685.

MONMOUTHSHIRE, *mon'-mouth-sheer*, a maritime county of England, on the borders of Wales, bounded S. by the Bristol Channel, N. by the counties of Hereford and Brecknock, W. by Glamorgan, and E. by the county of Gloucester and part of Hereford. *Area*, 416 square miles. *Desc.* Extremely diversified, and comprehending every variety of scenery, from the wildness and sublimity of the Alpine region, to the richness and beauty of a highly-cultivated country. The soil is on the whole fertile, more especially in the E. part, and all along the course of the river Usk. The S. part consists partly of large tracts of moor or marsh lands, of a deep rich loamy soil in some places, and a black peaty earth in others. The marsh lands along the coast are many of them subject to inundations of the sea; and great dykes have been raised for their protection, chiefly in the extensive levels of Caldecot and Wentloog. In the W. and hilly part of the county, the soil is barren, and of a thin, peaty nature. The low or marsh lands are principally in a state of pasture, and the uplands under a mixed kind of husbandry, between pasture and arable. *Rivers.* The principal are the Monnow, the Wye, the Usk, the Ebwy; besides a number of smaller streams. *Pro.* Wheat, barley, oats, pease and beans, and the artificial grasses, clover, rye-grass, and trefoil. *Minerals.* Iron-stone, lead, coal, limestone of the finest kind, brescia for millstones, and valuable building-stones. *Manf.* Principally Woollen goods. *Pop.* 158,000.—This county was comprised in England by Henry VIII., and abounds with both British and mediæval antiquities. The Welsh language is much spoken, though the English is mostly used in the towns.

MONNOYER, John Baptist, *mon-nwoi'-yai*, a celebrated fruit and flower painter, who was employed by Le Brun to decorate the palace at Versailles with examples of his art, and became member of the French Academy of Painters. His fame reaching England, he was invited to London about 1680, by the duke of Montague, to embellish his house (the late British Museum). These beautiful decorations were, however, destroyed, when the palace was pulled down to allow of the erection of the present building. Monnoyer likewise decorated the mansions of several of the English nobility, and fourteen flower-pieces by him are to be seen in the room called George the Second's private chamber, at Hampton-Court Palace. He etched a collection of his own designs, which was published in a folio volume. B. at Lille, 1635; D. in London, 1699.

MONOMOTAPA, called also BENOMOTAPA, *mon'-o-mo-ta'-pa*, a region of E. Africa, supposed to comprise various independent states. *Lat.* between 15° and 19° S. *Lon.* between 30° and 35° E.

MONONGAHELA, *mo'-non-gai-he'-la*, a river of the United States, in Pennsylvania, which, after a course of 300 miles, unites with the Alleghany at Pittsburg, and forms the Ohio.

MONONGALIA, *mo'-non-gai'-li-a*, a county of Virginia, U.S. *Area*, 308 square miles. *Pop.* 13,000.

MONOPOLI, *mo-nop'-o-le*, a seaport-town of Naples, in the Terra di Bari, on the Adriatic, 26 miles from Bari. It is well built, contains a cathedral and a number of churches, with a fortress. *Manf.* Hemp and cotton stuffs. *Pop.* 19,000.

MONREALE, *mon'-rai-a'-lai*, a neatly-built town of Sicily, 2 miles from Palermo. It stands on a steep hill, and has a cathedral, and an export trade in oil, corn, and fruit. *Pop.* 14,000.

MONRO, Alexander, *mun-ro'*, a celebrated physician, who studied at Leyden, and contracted an intimate friendship with Boerhaave. In 1719 he returned to Edinburgh, where he read lectures on anatomy. His most important and valuable works are,—"Osteology;" "Anatomy of the Nerves;" several papers in the "Medical Essays of Edinburgh;" and on the "Success of Inoculation in Edinburgh." They were collected and published together in 1781, in one volume. B. in Scotland, 1697; D. 1767.

MONROE, *mun-ro'*, numerous counties in the United States, with areas ranging between 4,500 and 1,100 square miles, and populations between 3,000 and 90,000.—Also numerous townships, none of them with a population above 4,500.

MONROE, James, president of the United States, was of Scotch descent, and entered the American Army of Independence, as volunteer, in his 16th year, and, at the close of the war, became colonel, on the recommendation of General Washington. He next studied the law at the William and Mary College, in Virginia, and was sent as representative of Westmoreland county in the legislature. After forming a member of the senatorial body of the United States for three years, General Washington appointed him minister to France. In 1796 he was recalled, but was, two years afterwards, chosen as governor by his native state of Virginia. He held that office for three years, at the end of which he again went to France as United States minister. While in Paris, he negotiated the purchases of New Orleans and Louisiana. He next represented his native country at the courts of Spain and Great Britain, and, in 1808, returned home. After serving as secretary of state under President Madison, he was chosen president, in 1816, and re-elected in 1821. Upon the termination of his presidentship, he retired to Virginia, where he acted as a justice of the peace. During the last years of his life, he lived at New York. The line of policy known as the "Monroe Doctrine" was first declared by Monroe. It reserves the whole American continent for the inhabitants of the United States, and declares that no foreign power ought to possess jurisdiction over any portion of it. B. in Westmoreland, Virginia, 1751; D. at New York, 1831.

MONS, *mons* (Flemish, BERGEN, *ber'-hen*), a strongly fortified town of Belgium, in the province of Hainault, divided into two parts by the Trouille, 34 miles from Brussels. It is a well-built town, with several squares, and tolerably regular streets. The principal buildings are, the market-place, the government-house, the house of the provincial council, the town-hall, with a fine steeple erected in 1716, and various churches and charitable institutions. *Manf.* Woollens, cotton, linen, and lace; also iron-foundries, with works for salt, earthenware, oil, and soap. *Pop.* 24,000.—It has been frequently besieged and taken: in 1709, by the allies under Marlborough and Eugene; in 1746, by Marshal Saxe; and in the war of the French revolution (in 1792, 1793, 1794), by the French and allies.—The district in which it stands is called the Borinage, and the miners are called Borains. It communicates with the Scheldt by the canal of Condé, and stands on a branch of the Belgian Railway.

MONSELICE, *mon-sai-le'-chai*, a town of Austrian Italy, in Padua, 13 miles from Padua. It stands on the canal of Monselice, which extends from Padua to Este. *Manf.* Woollen and linen goods. *Pop.* 5,500.

MONSEY, Messenger, *mon'-se*, an English physician, was a man of great originality of manners, and of considerable talents, and was for many years physician of Chelsea Hospital. By his will he ordered that his body should be anatomized, and the skeleton preserved in Chelsea Hospital, having a great aversion to interment in churches and churchyards. B. 1692; D. 1788.

MONSTRELET, Enguerrande de, *mon'-stre-lai*, a celebrated French chronicler. Relative to his early life, nothing authentic is known. He was appointed provost of the city of Cambrai, and bailiff of Wallaincourt, which offices he retained until his death. His chronicles commence about the time that Froissart's terminate, and, like his predecessor, he gives a clear and picturesque narrative of the wars of France, and of the principal persons engaged in them, from the year 1400 to 1453. The best modern edition of Monstrelet's Chronicles is that of Buchon, published in 1836. An English translation of the work was made by Mr. Johnes, in 1810. B. about the close of the 14th century; D. 1453.

MONTAGNANA, *mon-tan-ya'-na*, a town of Austrian Italy, 23 miles from Padua. *Manf.* Linen cloths, hats, and leather. *Pop.* 8,500.

MONTAGNAC, *mon-tan'-yak*, a parish and town of

France, in the department of Herault, 20 miles from Montpellier. *Pop.* 4,000.

MONTAGU, Basil, *mon'-ta-gu*, an English writer on law, and the editor of the works of Lord Bacon. After concluding his scholastic career at the university of Cambridge, he entered himself of Gray's Inn, and was called to the bar in 1798. Possessed of little talent as a pleader, he turned his attention to the laws of bankruptcy, obtained a good practice in that department, and wrote many valuable works connected therewith. Lord Erskine, while lord chancellor, appointed him a commissioner of bankrupts; but Mr. Montagu, convinced of the injury done to suitors by this mode of administering the law, published, and presented to the House of Commons, some statements which led to the abolition of the commissionerships and the enactment of a new law. By his exemplary conduct, Mr. Montagu lost his appointment, from which he had derived a large income; but, afterwards, received the post of accountant-general in bankruptcy, and retained it for ten years. His legal works are too numerous to be here quoted; but in general literature the most important of his labours were "Selections from the Works of Taylor, Hooker, Hall, and Lord Bacon;" "The Works of Francis Bacon, Lord Chancellor of England," in 16 vols., to which was added a life of the great writer. Altogether, he is said to have published forty volumes, leaving behind him upwards of a hundred more in MS. B. in London, 1770; D. at Boulogne, 1851.

MONTAGU, Lady Mary Wortley, was the eldest daughter of Evelyn Pierrepoint, earl, and afterwards duke of Kingston. She received a liberal education, and taught herself the elements of the Latin language. In 1712 she married Edward Wortley Montagu, grandson of the first earl of Sandwich. This gentleman distinguished himself as an able and upright senator in parliament, and was the intimate friend of Addison. In 1716 he was appointed ambassador to the court of Constantinople, whither he was accompanied by his lady. During this embassy, she wrote an elegant and interesting description of Constantinople, in letters to her friends. Of these, a surreptitious edition appeared in 1763, in 3 vols., to which was afterwards added a fourth volume. The editor was the notorious Cleland. So well were these letters received, as to pass through several impressions, and to be translated into many languages. A genuine edition of these, and Lady Mary's other works, was published under the authority of her son, the marquis of Bute, in 1803. While at Constantinople, she obtained information of a practice among the villagers, of inoculating for the small-pox. This operation she performed on her son, and by this means was instrumental in introducing inoculation into the east of Europe. At the end of 1718, Lady Mary returned to England, and settled at Twickenham, where she formed an intimacy with Pope; but the friendship was afterwards broken, and the poet did not scruple to write satires against her talents and reputation, which satires, when charged with, he was mean enough to deny. In 1739, on account of her health, she went to Italy, and took up her residence in Venice, where she remained till 1761, when, at the request of her daughter, Lady Bute, she returned to England. B. at Thoresby, Nottinghamshire, 1690; D. 1762. A complete edition of her writings was published by her great-grandson, Lord Wharncliffe, in 1836, under the title of "Letters and Works of Lady Mary Wortley Montagu."

MONTAGU, Edward Wortley, son of the preceding, whom his niece, in her biography of his mother, describes as "betraying from the beginning that surest symptom of moral (or mental) disease, an habitual disregard of truth, accompanied by a fertile and ready invention, never at fault." In 1716, his father going on an embassy to Constantinople, Lady Mary caused her son to be inoculated with the small-pox. He received his education at Westminster school, whence he ran away, and entered into the service of a chimney-sweeper. His family had given him up as lost, when a gentleman recognized him in the street, and took him home to his father. He escaped a second time, and engaged with the master of a fishing smack; after which he shipped himself on board a vessel bound to Spain, where he served as muleteer. In this situation he was discovered and conveyed home to his friends, who placed him under a tutor, with whom he travelled abroad. His father being rather scanty in his remittances, owing probably to the son's extravagance, the tutor is said to have committed a curious fraud to obtain a supply. This was the printing a book entitled "Observations on the Rise and Fall of the Roman Empire, by Edward Wortley Montagu, Esq." This work, whether the production of the son or not, gave great pleasure to the old gentleman, who acknowledged it in a handsome manner. Edward was for some time in parliament, and conducted himself in a manner becoming his rank. He afterwards went to the Levant, where he adopted the dress and manners of the Turks. Out of pique against his family, he caused an advertisement to be inserted in the English papers, for a wife without fortune, that by having an heir, he might disappoint his relations, which expedient, however, failed. He wrote "Observations on Earthquakes," and some curious papers in the Philosophical Transactions. B. at Wharncliffe, Yorkshire, 1713; D. at Padua, 1776.

MONTAGUE, George, a distinguished English naturalist, and one of the original members of the Linnæan Society of London. His "Ornithological Dictionary, or Alphabetical Synopsis of British Birds," was first published in 1802, and may be advantageously consulted by the student of natural history, even at the present time. In the following year, he put forth a "Natural History of British Shells, Marine, Land, and Fresh-water," to which a supplement was added in 1809. His most important contributions to the Transactions of the Linnæan Society were, a "Description of three Rare Species of British Birds," "On some Species of British Quadrupeds, Birds, and Fishes," "Of several New or Rare Animals, principally Marine, found on the South Coast of Devonshire," and "Some New and Rare British Marine Shells and Animals." Mr. Montague was a gentleman of ancient family, who resided upon his estate in Wiltshire, and afterwards at New Knowle, in Devonshire, and his works were the result of a polished and lettered ease. D. in Devonshire, 1815.

MONTAGUE, Richard, a learned English prelate, who, in 1616, became dean of Hereford, and in 1621 published a learned answer to Selden's "History of Tithes." He afterwards engaged in a controversy with the Roman Catholics, on which occasion he wrote his "Appello Cæsarem," for which he was ordered to appear at the bar of the House of Commons in the first parliament of Charles I., on the charge of maintaining Arminian and popish errors. He was made bishop of Chichester in 1628, whence he was translated to Norwich in 1638. His principal work is an "Ecclesiastical History," in Latin, in which his learning appears to great advantage. B. in Buckinghamshire, about 1577; D. 1641.

MONTAGUE, Elizabeth, an English authoress, the care of whose education was undertaken by the celebrated Dr. Conyers Middleton. (*See* MIDDLETON, Dr.) In 1769 Mrs. Montague published "An Essay on the Writings and Genius of Shakspeare," which obtained a great and deserved reputation. She formed a literary society, known by the name of the Blue-Stocking Club, from the circumstance that a gentleman belonging to it wore stockings of that colour. Mrs. Montague was noticed for another peculiarity,—that of giving an annual dinner on May-day to the chimney-sweepers of the metropolis, to celebrate the fact of her kinsman (*see* MONTAGU, Edward Wortley) having been for some time a chimney-sweep. George Lord Lyttleton was a warm admirer of Mrs. Montague, and was assisted by her in the composition of his "Dialogues of the Dead." B. 1720; D. 1800.

MONTAGUE, Edward. (*See* SANDWICH, Earl of.)

MONTAGUE ISLAND, an island in the Pacific Ocean. *Ext.* 50 miles long, with a breadth of 8. *Lat.* between 59° 50′ and 60° 30′ *N.* *Lon.* between 147° and 148° W. —There are several other islands of this name in the Pacific, but little is known of them.

MONTAIGN, *mon'-tain*, three parishes and towns of France, none of them with a population above 4,000.

MONTAIGNE, Michael Equeum, Lord of, a celebrated French essayist. He was intended for the bar, but afterwards renounced that profession, and travelled into Germany, Switzerland, and Italy, making his ob-

servations rather on human nature than on places and curiosities. At Rome he was honoured with the citizenship. In 1581 he was chosen mayor of Bordeaux, in which post he gave such satisfaction as to be elected for four years successively. He appeared with applause at the meeting of the states of Blois in 1588, and was honoured by Charles IX. with the order of St. Michael. After an active life, he retired to his seat of Montaigne, in Perigord, where he devoted himself for the remainder of his life to philosophical studies. The celebrated "Essays" were written at a time when Montaigne was suffering from deep melancholy, which had been induced by the horror with which the massacre of St. Bartholomew (1572) had inspired him. He kept a journal of his tour, which he did not intend to publish, but which was discovered two centuries afterwards, in his family château, and given to the world under the title, "Journal of the Travels of Michael de Montaigne." The essays, which were truly called, by Cardinal du Perron, "the breviary of honest men," treated of the most diverse subjects, were evidently composed without plan, and were the simple and truthful expression of Montaigne's mind upon certain occasions. They are written in a facile and quaint style; on which account, as well as for their deep sincerity, they present a great charm to the reader. The most remarkable essays are those on friendship, the education of children, and on the administration of justice. The best English translation of the Essays is that of Cotton. B. at Montaigne, Perigord, 1533; D. 1592.

MONTALEMBERT, Charles Forbes, Count de, *mon-tal'-em-bair*, a celebrated French writer, who represents an old family of Poitou, and whose father was a peer of France, and ambassador at Stockholm from the court of Charles X. His mother was a Scotch lady. He received his education at the university of Paris. At the outset of his career he was an advocate of the union of Catholicism and democracy, of which Lamennais was the apostle (*see* LAMENNAIS), and was one of the editors of a journal founded to advocate that union, called "L'Avenir." He subsequently commenced a kind of crusade against the university, and opened, in 1831, with Lacordaire, a school called the "Ecole Libre." (*See* LACORDAIRE.) His opposition to the existing government at length brought him before the tribunals of justice; but, during the process of trial, his father died, and, as he thus became a peer of France, he claimed the right of being tried by the upper chamber, by which he was condemned to a fine of a hundred francs. His defence, pronounced before the chamber, may be considered as the beginning of his political career; but he was prevented, not having attained the legal age of 30, from taking his seat until 1840. The condemnation of Lamennais by the pope greatly increased the severity of Montalembert's orthodoxy, and, both by writing and speaking, he thenceforward made himself known as the great champion of Catholicism. In 1836 he published his famous "Life of Elizabeth of Hungary." In 1842 he strongly opposed the educational measure of M. Villemain, and in the following year published his Catholic manifesto. In 1843 he delivered, in the Chamber of Peers, his three remarkable speeches on the liberty of the church, the liberty of education, and the liberty of the monastic orders. He also made himself notorious for the part he took on behalf of oppressed nationalities; and in 1848 he had a solemn funeral service celebrated in Notre Dame to the memory of Daniel O'Connell. After the establishment of the republic, M. de Montalembert was elected a member of the Constituent Assembly, and then acted with the opposition party. He was opposed to the measure for again requiring journals to furnish security, to the continuance of the state of siege, and to the admission of Louis Bonaparte. At the end of the session, however, he supported a bill for the restriction of the press, and loudly approved of the French expedition to Rome. He was re-elected to the Legislative Assembly, and distinguished himself by his frequent encounters with M. Victor Hugo, his only rival in oratory, and by his defence of the president. When the *coup d'état* came, he protested strongly against the imprisonment of the deputies, but was nevertheless named a member of the Consultative Commission,—a distinction he declined, and was, in 1852, elected into the Corps Législatif. At the election in 1857 he lost his seat, and retired into private life, but came before the public again as the writer of the article in the "Correspondant" which led to his being summoned before the bar of the correctional police, and to his trial, which attracted the attention of every capital of Europe. For that effusion he was fined 3,000 francs, and ordered to be imprisoned for six months. M. de Montalembert is likewise known in England as the author of two eloquent works, entitled, respectively, "Catholic Interests in the 19th Century," and the "Political Future of England." The first was a brilliant but partial review of Catholicism in Europe; the conclusion arrived at being, that that form of religious belief promised to spread and to endure. In the latter work he displayed great knowledge and still greater sympathy with English intelligence and energy: its schools, its journalism, and its political institutions were discussed in a liberal and enlarged spirit; but the work can have little practical benefit, on account of the singular view of the author, that England would gain by renewing her intercourse with Rome. Both these works have been translated into English. M. de Montalembert was a liberal, though not, of course, after the English fashion. England, however, had not a more zealous, discriminating, and firm friend than the eloquent Frenchman. Without doubt, also, he showed himself one of the first men in Europe, both as a writer and as a speaker; and, by his eminence and his great interest in literature and education, he was among the leaders of the French Academy, of which he was elected a member in 1852. D. in London, 1810.

MONTALEMBERT, Marc-René, Marquis de, a celebrated French engineer general, and member of the Paris Academy of Sciences. He displayed great military talent in the French, Russian, and Swedish services; but is best known by his works, which were, "Perpendicular Fortification; or, the Art Defensive superior to the Art Offensive, by a New Manner of employing Artillery;" "Correspondence with Ministers and Generals," and some comedies and poems. B. at Angoulême, 1714; D. 1800.

MONTANARO, *mon-ta-na'-ro*, a town of Sardinia, Piedmont, 15 miles from Turin. It has churches, several schools, and a castle. *Pop.* 4,500.

MONTANUS, *mon-tai'-nus*, the founder of the sect of Christian heretics called Montanists, or Cataphrygians. He pretended that the Holy Spirit descended into him, together with two of his followers, Priscilla and Maximilla, two ladies of considerable property. He denied the doctrine of the Trinity, and condemned second marriage as adulterous. His followers, who were numerous, affected extraordinary agitations of the body, as the effects of the spirit, and pretended to make prophecies. Among others who were gained over to this strange sect was the learned Tertullian; but, in the end, he separated himself from them. B. it is supposed, in the middle of the 2nd century, at Ardaba, in Mysia; D. at the beginning of the 3rd century.

MONTARGIS, *mon-tar'-zhe*, a well-built town of France, in the department of the Loiret, 40 miles from Orleans. It stands at the junction of the canals Loing and Briare, and has several churches, a small theatre, and an old castle. *Pop.* 8,000.

MONTAUBAN, *mon'-to-ba*, a parish and town of France, the capital of the department of the Tarn-and-Garonne, on the Tarn, 30 miles from Toulouse. It consists of three parts, two on different sides of the river from the third, with which they communicate by a bridge. In the centre of the town is a square, surrounded with good buildings, and presenting a double range of arcades adorned with pilasters of the Doric order. This square forms the point of junction of eight streets. The most remarkable object is the elevated public walk called the Falaise, which has an extensive view. The principal buildings are the cathedral, the bishop's palace, and the college; here are also an astronomical observatory, a society of arts and sciences, and a public library. Its celebrated Protestant university, suppressed in 1629, was re-established by Bonaparte in 1810. *Manf.* Silk stuffs and stockings, linen, serge, and woollens. *Pop.* 25,000.—This place has several times been besieged. It is a station on the railway from Bordeaux to Cette.—Also a town of France, in the department of the Ille-and-Vilaine. *Pop.* 2,800.

MONTAUSIER, Charles de St. Maure, duke de, *mon-to'-se-ai*, peer of France, was appointed by Louis XIV., in 1668, governor of the dauphin. He was a man of inflexible integrity and austere virtue, and inculcated, in the mind of his pupil, the purest sentiments. Bossuet and Huet were nominated by him as the young prince's preceptors; and it was for the use of the latter that the Delphin edition of the ancient classics was first made. Before his marriage with his wife, he presented to her a poetical offering, entitled "The Garland of Julia," which contained madrigals transcribed by the caligraphist Jarry, and was decorated with floral designs by the painter Robert. This splendid volume excited much interest, on account of its beauty. B. 1610; D. 1690.

MONTBART, *mawnt'-bar*, a town of France, in Burgundy, 9 miles from Semur. It stands on the Burgundy canal, and on the railway from Paris to Lyons. *Pop.* 2,800.—Buffon and Daubenton, the naturalists, were born here.

MONTBELLIARD, *mawnt-bel'-le-ar*, a town of France, in the department of the Doubs, 10 miles from Besançon. *Manf.* Woollen and linen fabrics. *Pop.* 6,000.

MONT BLANC, *mawnt bla'*, the loftiest mountain of Europe. (*See* BLANC, MONT.)

MONTBLANCH, *monte-blanch'*, a town of Spain, in the province of Tarragona. *Pop.* 4,300.

MONTBRISON, *mawnt-bre'-sawng*, a town of France, the capital of the department of the Loire, on the Vigez, 40 miles from Lyons. In its vicinity are mineral springs. *Pop.* 8,000.

MONTCALM, Louis Joseph, Marquis de, *mont'-kam*, a brave and distinguished French general, who entered the army at an early age, and signalized himself on many occasions, particularly that of Placenza, in 1746. In 1756 he became field-marshal, and was appointed to command the French army in Canada, where he opposed Lord Loudon with considerable skill and success. He afterwards defeated Abercromby, his lordship's successor; but in the battle fought under the walls of Quebec, in 1759, Montcalm received a mortal wound, as did also his brave opponent, the English general Wolfe. B. at Candiac, near Nimes, 1712.

MONT CENIS, *se-ne'*. (*See* ALPS.)

MONT CERVIN. (*See* CERVIN, MONT.)

MONT DE MARSAN, *mawnt de(r) mar'-sa*, a town of France, in the department of the Landes, 62 miles from Bordeaux. It stands in a sandy plain, and has a college and mineral warm baths. *Manf.* Woollen goods, leather, and sailcloth. It is an entrepôt for wine, brandy, wool, and the agricultural produce of the surrounding country. *Pop.* 5,000.

MONT DOR. (*See* DOR, MOUNT.)

MONTEAGLE, Thomas Spring Rice, Lord, *mont-e'-gel*, an English statesman. After concluding his university career at Cambridge, he commenced the study of the law, and, in 1820, entered the House of Commons as member for Limerick. He espoused the political views of the Whig party, and remained in his seat till the year 1832, after which period he represented Cambridge. From the year 1830 until 1834 he acted as secretary of the Treasury, and, for a few months, held the secretaryship of the colonies. In 1836 he became chancellor of the Exchequer in the Melbourne administration, and held that office during three years. In 1839 he was raised to the peerage. B. at Limerick, 1790.

MONTE BALDO, *mon'-tai bal'-do*, a mountain of Lombardy, rising on the E. side of the Lake of Garda. It is distinguished for its rare plants and geological formations.—In its vicinity the Austrians were defeated by the French, in 1797.

MONTEBELLO, *mon'-tai-bel'-lo*, a town of Italy, 20 miles from Verona. It has several churches and two castles. *Pop.* 3,200.

MONTEBELLO CASTEGGIO, *kas-tedj'-e-o*, a village of Sardinia, 22 miles from Alessandria.—Here the Austrians were defeated by the French in 1800 and in 1859.

MONTECHIARO, *mon'-tai-ke-a'-ro*, a town of Austrian Italy, on the Chiese, 10 miles from Brescia. *Manf.* Silk stuffs. *Pop.* 7,000.—Here, in 1796, the French defeated the Austrians.

MONTECUCULI, Count Sebastian, *mon'-tai-koo'-koo-le*, an Italian gentleman, who went to France in the suite of Catherine de' Medici, and became cupbearer to the dauphin Francis, son of Francis I. He was accused of having poisoned the young prince at Valence, in 1536, and, being put to the torture, confessed that he was hired to do it by the partisans of Charles V. The friends of the emperor, however, fully refuted the abominable charge, and threw it back upon his patron, Catherine de' Medici, wife of Henry II., brother to the dauphin. Put to death 1536.

MONTECUCULI, Raymond, Count de, a famous general in the service of Austria. He entered early into the army, under his uncle, who commanded the artillery of the emperor. The first action in which he distinguished himself was in 1638, when, at the head of 2,000 men, he surprised 10,000 Swedes, who were engaged in besieging Numslau, in Silesia, and whom he compelled to abandon their baggage and artillery, but was subsequently taken prisoner by General Bannier. He did not regain his liberty till two years after; but he employed that time to great advantage in study. On returning to his profession, he defeated the Swedes in Bohemia. After the peace of Westphalia, he travelled in different countries. In 1657 he was appointed field-marshal, and sent to the relief of John Casimir, king of Poland, who was attacked by Sweden and the prince of Transylvania. After defeating the latter, he took Cracow from the Swedes, and gained several splendid actions, which produced a peace. He next served against the Turks, and drove them out of Transylvania, for which he was made president of the imperial council. In 1673 he was sent against the French, and had to oppose the great Turenne, who fell in the contest, and Montecuculi, in his dispatch to the emperor, regretted the loss of a man who was an honour to humanity. He afterwards acted with great courage and skill against the Prince de Condé. B. at Modena, 1608; D. 1680.

MONTE FANO, *fa'-no*, a market-town of Italy, in the States of the Church, 8 miles from Macerata. *Pop.* 3,500.

MONTE FIASCONE, *fe-as'-ko-nai*, a town of Italy, 10 miles from Viterbo. It stands on the site of an ancient Etruscan city, of which some remains are still to be seen. *Pop.* 5,000.

MONTEITH, *mon-teeth'*, a beautiful district of Scotland, situate on the Teith, in Perthshire. It has a length of about 25 miles.—The PORT of Monteith has an area of about 30 square miles, and includes lochs Vennacher and Monteith. *Pop.* 2,000.

MONTELIMART, *mon-tel'-e-mar'*, a town of France, in the department of the Drome, on the Rhone, 25 miles from Valence. Its streets are broad, and there is a pleasant public walk along the walls. *Manf.* Silk, cotton, and woollen goods. *Pop.* 7,000.—The vicinity of this town is rich in vineyards and mulberry-trees.

MONTE MAGGIORE, *madj-e-or'-ai*, a market-town of the island of Sicily, 30 miles from Palermo. *Pop.* 6,000.

MONTENEGRO, or KARA DAGH, *mon-te-ne'-gro*, a district on the western frontier of European Turkey, having Albania to the south and the large province of Herzegovina to the north. *Area.* Estimated at 450 square miles. *Desc.* Mountainous; consisting of a series of lofty ridges, rising in some places to peaks 5,000 feet above the level of the sea. These are mostly covered with timber. *Pro.* Maize, potatoes, and tobacco. Large quantities of vegetables are grown; and cattle, sheep, pigs, and goats are abundant. There are few horses and mules, and asses are employed for draught. Carriages are unknown. *Manf.* Coarse woollens; but the principal industry is agriculture and fishing. The country has about 300 villages, and every village has its church. *Pop.* 120,000. *Lat.* between 42° 10′ and 42° 56′ N. *Lon.* between 18° 41′ and 20° 22′ E.—This country is nominally in the Turkish government of Scutari; but the people are quite independent of the Turks. Their government is republican, under the protection of the czar of Russia. In 1853 the Turks sent an army against the Montenegrans, but it was soon recalled, without having effected any decisive result.

MONTENOTTE, *mon'-tai-not'-tai*, a mountain of Italy, having on its side two small villages, Montenotte Superiore and Inferiore, noted as the scene of the first exploit of Bonaparte, in 1796.

## Montepalciano

MONTEPALCIANO, *mon'-tai-pal-che-a-no*, a city of Tuscany, 25 miles from Arezzo. It has a fine church, and is famous for its wine. *Pop.*, with parish, 12,000.

MONTEREAU-FAULT YONNE, *mon'-te-ro-folte yon*, a town of France, in the department of the Seine-and-Marne, 16 miles from Melun. *Manf.* Earthenware. *Pop.* 5,500.—From this place steamers ply to Paris.

MONTERREY, *mon'-tai-raith*, a town of the Mexican Confederation, on the Fernando river, 115 miles from Coahulia. *Pop.* 12,000.—In 1826 it was taken by the army of the United States, under General Taylor.

MONTE ROSA, *ro'-sa*, an aggregate mountain of the Pennine Alps. (*See* ALPS.)

MONTE ROTONDO, *ro-ton'-do*, the loftiest mountain of the island of Corsica, 25 miles from Ajaccio. It has an elevation of 8,760 feet above the sea.—Monte is the prefix to several towns of Italy, with populations between 3,000 and 8,000.

MONTESPAN, Madame de, *mon'-tes-pā*, a celebrated French lady, who was wife of a nobleman of that title, and mistress of Louis XIV., over whom she gained a complete ascendancy, which she maintained till that monarch became attached to Madame de Maintenon. Madame de Montespan had children by the king, one of whom became duke of Maine and another count of Toulouse. B. 1641; D. 1707.

MONTESQUIEU, Charles de Secondat, Baron de, *mon'-tes-kyu*, an eminent French writer, who was educated for the legal profession. His first literary performance that became famous was entitled "Persian Letters," published in 1721, which gave proofs of a fine genius and a sound judgment. The year following he pleaded with so much eloquence against the imposition of a new duty, that it was suppressed. In 1728 he was admitted a member of the French Academy, though not without opposition from Cardinal Fleury, who conceived there were some things dangerous to religion in the "Persian Letters." Montesquieu having formed the design of his great work, the "Spirit of Laws," travelled into Germany and Holland, and lastly to England, where he resided two years, calling this the country for thinking and France for living. On his return home he published his treatise "On the Causes of the Greatness and Declension of the Romans." In 1718 appeared his "Spirit of Laws," which ought rather to have been termed the Spirit of Nations. In it the author distinguished three sorts of government, the republican, the monarchical, and the despotic; all of which he examined with much clearness, the whole work being an admirable exposition of political science as it was understood in the author's time. Montesquieu was an upright man and a conscientious judge. B. near Bordeaux, 1689; D. 1755.

MONTE VIDEO, *mon'-tai ve'-dai-o*, a fortified town of South America, capital of the republic of Uruguay, 104 miles from Buenos Ayres, on the north side of the river Plata. A mountain overlooks the place, and the harbour, although shallow, and quite open to the western winds, is the best in the Rio de la Plata. The town occupies the whole of a peninsular promontory forming the eastern point of the harbour. It makes a handsome appearance from the harbour, as it is built upon an ascent, and the houses are interspersed with gardens and trees. The great square contains the cathedral, which is a handsome edifice, the town-house, and the public prison; but the streets are unpaved, and, consequently, either always dusty or muddy. The chief trade of Monte Video is in hides, tallow, and dried beef. *Pop.* 75,000. *Lat.* 34° 53′ S. *Lon.* 56° 15′ W. —Monte Video was taken, in 1806, by the British; but was evacuated the following year.

MONTEZUMA, *mon-te-zu'-ma*, the last emperor of Mexico, was a prince of noble qualities. He opposed the invaders of his country with firmness, but was at last seized by Cortes, who forced him to acknowledge himself a vassal of Spain. The Mexicans having assembled in great numbers against the Spaniards, Cortes, being apprehensive that he was not sufficiently strong to resist them, obliged his royal captive to appear in his robes, in order to appease his subjects. The insurgents, however, discharged their arrows while he was speaking, and mortally wounded him, in 1520. Prescott has finely narrated his history in his "Conquest of Mexico." Montezuma left two sons and three daughters, who embraced the Christian religion. The eldest received an estate and the title of count from Charles V. D. 1608.

## Montgomery

MONTFAUCON, *mawnt'-fo-kawng*, the name of several parishes and villages in France, none of them with a population above 2,000.

MONTFAUCON, Bernard de, a learned French antiquary. In his youth he served as a cadet in the army; but the death of his parents made so great an impression upon his mind, that he entered the congregation of the Benedictines of St. Maur, in 1675. He applied himself to study with prodigious application, and acquired a great knowledge of languages, theology, history, and general literature. In 1698 he went to Italy, to consult the public libraries there, and was received with much distinction at Rome, by the college of cardinals and Pope Innocent XII. On his return to Paris, in 1702, he published a curious relation of his journey, under the title "Diarium Italicum." His principal works were "Analecta Græca," an edition of the works of St. Athanasius, Greek and Latin, with notes; a collection of ancient Greek writers, a French translation of Philo's "Contemplative Life," with notes; "Palæographia Græca," "Antiquities Explained," in French and Latin, and a supplement to the same (this is a work of immense erudition, and of the greatest value to students of art); "Monuments of the French Monarchy," an edition of the works of Chrysostom, "Dissertation on the History of Judith." B. at Soulage, Languedoc, 1655; D. at Paris, 1741.

MONTFORT, Simon, Count de, *mawnt'-fort*, a famous French general, who, in 1209, conducted the crusade against the Albigenses, on which occasion he tarnished his reputation by his cruelties. In 1213 he gained a complete victory over Peter, king of Aragon. B. 1165; killed at the siege of Toulouse, 1218.

MONTFORT, Simon de, earl of Leicester, was younger son of the preceding, by an English lady. He went to England in 1236, to assume the English title in right of his mother, and was well received by Henry III., who appointed him to the government of Gascony, with the title of seneschal, and gave him his sister in marriage; but, rendering himself odious by his cruel rule, he incurred the displeasure of the English monarch. In revenge, he excited the English barons into a revolt, placed himself at their head, in 1258, and forced the king to convoke a parliament, called, by the old chroniclers, "the Mad parliament," at Oxford, and extorted from him many important concessions. During many years, he exercised almost absolute power in England, and took the king and his son Edward prisoners at the battle of Lewes, in Sussex, in 1264. In the following year, however, Prince Edward made his escape from Dover Castle, where he had been confined, and, in the same year, the royal and baronial forces met at Evesham, the latter being defeated with immense slaughter, both De Montfort and his son being among the slain. He was certainly a brave and able man, and, although probably more ambitious than he had openly professed to be, was undoubtedly greatly instrumental in founding English national liberty. Killed 1265.

MONTFORT L'AMAURY, *la'-mor-e*, a town of France, in the department of the Seine-and-Oise, 14 miles from Versailles. *Pop.* 1,800.—Here Simon Count de Montfort, who led the first crusade against the Albigenses, was born, in 1165.

MONTFRIN, *mawnt'-fra*, a town and parish of France, in the department of Gard, 10 miles from Nimes. *Pop.* 2,700.

MONTGOLFIER, *mawnt-gol'-fe-ai*, James Stephen, a Frenchman, who became celebrated for his paper manufacture, and in 1783, with his brother Joseph-Michael, invented air-balloons, for which he was admitted a member of the Academy of Sciences, created chevalier of the order of St. Michael, and rewarded with a pension of two thousand livres. D. 1799. Joseph D. 1810.

MONTGOMERY, *mont-gom'-e-re*, the principal town of Montgomeryshire, near the Severn, 20 miles from Shrewsbury. It is well built, and stands in the vale of Montgomery, at the foot of a high hill. It has a church, guildhall, and house of correction. *Pop.* 1,248. In this neighbourhood was fought the last battle between the Welsh and English, in 1294. The ruins of Montgomery Castle stand on an eminence north of the town.

MONTGOMERY, the name of numerous counties in

the United States. 1. In the central part of New York. *Area*, 356 square miles. *Pop.* 35,000.—2. In the S.E. part of Pennsylvania. *Area*, 508 square miles. *Pop.* 60,000.—3. In Maryland. *Area*, 440 square miles. *Pop.* 17,000.—4. In Ohio. *Area*, 470 square miles. *Pop.* 40,000.—5. In the S.W. part of Virginia. *Area*, 485 square miles. *Pop.* 9,000.—6. In the central part of North Carolina. *Area*, 483 square miles. *Pop.* 8,000.—7. In Kentucky, on the river Licking. *Area*, 544 square miles. *Pop.* 10,000.—8. On the N. side of West Tennessee. *Area*, 448 square miles. *Pop.* 22,000.—9. In the central part of Georgia. *Area*, 1,100 square miles. *Pop.* 4,000.—10. In Illinois. *Area*, 720 square miles. *Pop.* 8,000.—11. In Missouri. *Area*, 595 square miles. *Pop.* 6,000.—12. In Indiana. *Area*, 505 square miles. *Pop.* 9,000.—13. In Alabama. *Area*, 940 square miles. *Pop.* 30,000.—Also the name of several townships, none of them with a population above 5,000.

MONTGOMERY, Gabriel de, Count of, a celebrated French nobleman, of Scottish descent, who, in 1559, had the misfortune to kill Henry II. of France, by accidentally wounding him in the eye, as they were tilting at a tournament given by that monarch, on the occasion of the marriage between his daughter Elizabeth and the king of Spain. After this unfortunate disaster, Montgomery went to Italy, and lived there and in other countries, till the civil wars recalled him to France, where he attached himself to the Protestants, and became one of their principal chiefs. He defended Rouen in 1562 against the royal army; and, when the city was taken by assault, he escaped to Havre. In 1569 he raised the siege of Bearne, in Navarre, then closely pressed by the Catholics, after which he followed the besiegers to Orthez, which he took by assault. Montgomery was at Paris at the time of the massacre of the Protestants in 1572, but escaped, though closely pursued. With his family, he retired first to Jersey, and afterwards to England. In 1573 he returned to Normandy, where he was joined by some of the Protestant nobility at St. Lo, at which place he was besieged by Matignon, lieutenant-general in Lower Normandy; but Montgomery escaped, and went to Domfront, whither he was followed by Matignon, who, after a prolonged contest, made him prisoner. This gallant nobleman was subsequently condemned to death by Catherine de' Medici, who was then regent of the kingdom. Beheaded 1574.

MONTGOMERY, James, an English poet, was the son of a Moravian preacher, and was sent to be educated at the settlement of that sect at Fulneck, near Leeds. There he was principally distinguished for his indolence and melancholy; and, although poetry and fiction were strictly forbidden, he contrived to read, clandestinely, "Robinson Crusoe" and Cowper's poems. His inattention to his studies caused him to be placed by the school authorities with a shopkeeper, from whom, in 1789, he ran away. A few months afterwards he sent a volume of poems to a London bookseller, and followed it himself to the great metropolis. The poems were declined; but the young poet obtained a situation in the publisher's office. In 1791 he wrote a tale, his first prose production, for the "Bee," an Edinburgh periodical, and soon afterwards published a novel, which was declined, because the hero gave utterance to an occasional strong expression. The young author was greatly hurt at this, for he was of a deeply religious cast of mind, and imagined he had only done that which was right in imitating Fielding and Smollett. He returned to a situation for some time, and at length entered the service of Mr. Gales, a printer and bookseller at Sheffield, who permitted him to write political articles for the "Sheffield Register," a paper conducted on what were then termed revolutionary principles. A warrant being issued for the apprehension of Gales, he fled to America, and Montgomery started a paper on "peace and reform" principles, called the "Sheffield Iris," and was soon afterwards indicted for producing some doggrel verses, which had been brought to his printing-office to be printed. For this he was fined £20, and sentenced to three months' imprisonment. On another occasion, for publishing an account of a riot at Sheffield, he was fined £30, and was imprisoned for six months. His subsequent career was comparatively uneventful. In 1806 he produced "The Wanderer in Switzerland," which quickly ran through three editions, and was subsequently followed by other and better works of the same nature, the chief of which were, "The West Indies," "The World Before the Flood," and "Greenland," a poem descriptive of that desolate establishment of Moravians, which sect he had again joined. In 1823 he produced "Original Hymns for Public, Private, and Social Devotion." In 1825 he resigned the editorship of the "Sheffield Iris;" whereupon he was entertained at a public dinner by his fellow townsmen. His interesting "History of Missionary Enterprise in the South Seas" was produced in 1830. Five years later he was offered the chair of rhetoric in the university of Edinburgh, which he declined. Sir Robert Peel, about the same time, bestowed upon him a pension of £150. In 1836 he left the house of his old employer Gales, where he had lived during forty years, for a more convenient abode. He delivered several courses of lectures upon "The British Poets," at Newcastle-on-Tyne and other places, during some years; but, in 1841, he visited his native country on a missionary tour. His last effort was a lecture "On some Passages of English Poetry but little known." B. at Irvine, Ayrshire, 1771; D. at Sheffield, 1854.

MONTGOMERY, Rev. Robert, a popular preacher and poet, of whose boyish years nothing is known, till he conducted, at an early age, a periodical publication in Bath. In 1828 he produced his "Omnipresence of the Deity," which attained an astonishing degree of popularity, twelve editions having been sold in as many months. Another volume of religious poems soon followed, containing "A Universal Prayer," "Death," "A Vision of Heaven," and "A Vision of Hell." A third production, entitled "Satan," was next put forth, and obtained almost as much success as its predecessors. In 1830, the religious poet resolved to devote himself to the Church, entered of Lincoln College, Oxford, and graduated B.A. in 1833. Two years afterwards he was ordained, and became a curate at Whittington, in Shropshire. In 1836 he went to London, where he officiated as minister of Percy-street Chapel, which he quitted for the Episcopal chapel of St. Jude's, at Glasgow; but, although his preaching drew large congregations in the latter place, so large an amount of controversy was engendered, that he resigned the incumbency. In 1843 he again commenced his ministerial labours at Percy-street Chapel, which he continued to fulfil until his death. In addition to the works already quoted, he published many others, nearly all of which shared the success of his early efforts. The principal of these were, "The Messiah, a Poem in Six Books;" "Luther, or the Spirit of the Reformation;" and "Sacred Meditations and Moral Themes." Lord Macaulay, in his essay on the Rev. Robert Montgomery, attributes the great success of his poems to unblushing puffery; but the real reason was, doubtless, that he addressed a very large class with whom poetry is usually rejected as profane, and who found in Montgomery's verse a mental food which had hitherto been denied to them. As a preacher, he is described as combining a mixture of rant and affectation; his manner was, however, engaging, and he was, undoubtedly, a general favourite with his congregations. B. at Bath, 1807; D. at Brighton, 1856.

MONTGOMERYSHIRE, *mont-gom'-e-re-sheer*, a county of North Wales, bounded on the E. by Shropshire, W. by part of Merioneth and Cardigan shires, S. by Radnorshire, and N. by Denbigh and part of Merioneth. *Area*, 839 square miles. *Desc.* Considerably diversified; but, on the whole, mountainous, though neither so rugged nor so wild as the adjacent county of Merioneth. The valleys among the mountains are friendly to vegetation, and highly productive of both corn and grass; but the finest arable land lies on the eastern side, bordering on Shropshire. *Rivers.* The principal are the Severn, the Wye, the Virnwy, and the Tanat, on the east side of the main ridge, and the Dovy and its tributary streams on the west. *Pro.* Agriculture is the chief business of Montgomeryshire. The arable lands being chiefly confined to the vales, the uplands are devoted to the pasturage of sheep and cattle. A breed of small horses, peculiar to this county and that of Merioneth, is much used here, and called "Merlins," and the ordinary crops are oats, barley,

wheat, and rye: green crops to alternate with these, have been long introduced. This is the best-wooded county in North Wales. *Minerals.* Considerable, and mostly consisting of lead and slate: limestone occurs, but not very abundantly. *Manf.* Chiefly those of wool. *Pop.* 68,000. This county formed, in the Saxon era, a part of the Welsh principality of Powis, and took the name of Montgomery from one of its Norman conquerors.

MONTHOLON, Charles Tristan, Count de, *mon'-to-lawng*, one of the most faithful adherents of Napoleon I., who, after serving for a short time in the navy, quitted it, and obtained a commission in a cavalry regiment, with which he went through the campaigns in Italy, Germany, and Poland; rose to the grade of colonel, and greatly distinguished himself at the battle of Wagram, where he received five wounds. Appointed chamberlain to the emperor in 1809, he served him in that capacity until Napoleon's first abdication, when the count requested to be allowed to accompany him, but could not obtain that honour. During the Hundred Days he acted as one of Napoleon's aides-de-camp. Upon the deportation of the emperor to St. Helena, the count accompanied him, and remained near his person until his death. He was one of the ex-emperor's executors, and to him was confided all the MSS. which had been composed at St. Helena. These he afterwards published, under the title of "Memoirs towards the History of France under Napoleon, written at St. Helena." In 1840 he took part in Louis Napoleon's descent at Boulogne, and was sentenced to imprisonment with his leader. B. at Paris, 1782; D. 1853.

MONTI, Vincenzio, a celebrated Italian poet, was, in his youth, secretary to Don Luighi Braschi, nephew of Pope Pius VI.; but afterwards entirely devoted himself to poetry. Desirous of rivalling Alfieri, he wrote the tragedies of "Caius Gracchus" and "Aristodemo," and then composed several poems in imitation of Dante. He, in the first instance, ridiculed the French; but, after the successes of the republic in Italy, he became one of the greatest eulogists of Napoleon. He next became professor of eloquence at Pavia, of belles-lettres at Milan, and, finally, historiographer of the new kingdom of Italy; but, after the fall of Napoleon, he sang the praises of the Austrian empire, a versatility of opinion which caused him to lose the esteem of his countrymen. Besides the works we have quoted, he made a beautiful translation of Homer's "Iliad," and published some polemical writings. B. at Fusignano, Ferrara, 1754; D. 1828.

MONTICELLO, *mon-te-sel'-lo*, the chief town of the Mississippi territory, U.S., on Pearl river, 95 miles from New Orleans.

MONTILLA, *mon-teel'-ya*, a town of Spain, in Andalusia, 18 miles from Cordova. *Manf.* Woollen and linen goods. *Pop.* 13,500.—In 1508 the fortifications of this place were destroyed by Frederick the Catholic.

MONTIVILLIERS, *mawnt-vil'-le-ai*, a town of France, in the department of the Lower Seine, 6 miles from Havre. *Manf.* Linen goods. There are sugar-refineries and bleaching-fields. *Pop.* 4,200.

MONTLUC, Blaise de, *mawnt-look'*, a celebrated French general, who rose through the different ranks in the army to that of marshal of France. His first services were in Italy; and at the battle of Pavia, in 1525, he was taken prisoner. In the wars of Piedmont he served with great reputation, and, in 1546, he recovered Boulogne from the English. The city of Sienna, in Tuscany, having driven out the imperial garrison, and solicited the protection of France, Montluc was appointed to command the forces sent thither in 1554. He sustained a siege of eight months against the imperial army, commanded by the Marquis de Marignan, who was obliged, after several attacks, to convert the siege into a blockade. It was not till the garrison and inhabitants had endured the utmost extremity of famine, that the place capitulated, when Montluc and his troops marched out with the honours of war. He commanded in Guienne during the wars which ravaged France on account of religion, and defeated the Hugnenots in several actions, but was guilty of great cruelties to the vanquished. At the siege of Rabastens, in 1570, he was so severely wounded in the face, as to be obliged always to wear a mask to hide his deformity. At the age of 75, he wrote the memoirs of his military life, under the title of "Commentaries;" and therein recounted, with horrible frankness, the story of his numberless acts of cruelty. B. at the château of Montluc, Guienne, about 1502; D. same place, 1577.

MONTLUÇON, *mawnt-loo'-sawng*, a town of France, in the department of the Allier, on the Cher, 38 miles from Moulins. *Manf.* Coarse woollens. *Pop.* 9,000.

MONTMARTRE, *maw-martr'*, a village of France, immediately to the north of Paris, and standing within the new line of fortifications. *Pop.* 24,000.—It was the scene of some sharp fighting in March, 1814, and is a favourite Sunday resort of the Parisians.

MONTMEDY, *mawnt'-me-de*, a fortified town of France, in the department of the Meuse, 25 miles from Verdun. It has a barracks, and is defended by extensive outworks. *Manf.* Oil-cloth; and there are gypsum-quarries in the neighbourhood. *Pop.* 2,700.

MONTMIRAIL, *mawnt'-me-rail*, a town of France, in the department of the Marne, on the Little Morin, 22 miles from Epernay. *Manf.* Cutlery. *Pop.* 2,600.—Here Bonaparte defeated the Russians in 1814.

MONTMORENCI, *mawnt'-mo-rän-se'*, or *mont'-mo-ren'-se*, a river of Lower Canada, which runs into the St. Lawrence, about 7 miles below Quebec. It is noted for its beautiful falls, which are 250 feet high.

MONTMORENCY, or ENGHIEN, a parish and village of France, in the department of the Seine-and-Oise, 10 miles from Pontoise. *Manf.* Lace and embroidery. *Pop.* 2,200.

MONTMORENCY, Matthew de, a distinguished French general, who signalized himself by his valour at the battle of Pont-à-Bouvines, in 1214, and, the year following, was employed against the Albigenses in Languedoc; for which services he received the sword of constable of France, and was made general of the army. He afterwards took several places from the English. Louis VIII. committed his son to the care of the constable, who, by his prudence, dissolved a league which had been formed against the queen-mother during the minority of Louis IX. D. 1280.

MONTMORENCY, Anne de, a descendant of the preceding, displayed great military talents at an early age, and was at the battle of Marignon in 1515. In 1521 he defended the city of Meziers, and compelled the count of Nassau to raise the siege. He accompanied Francis I. to Italy, as marshal of France, and was taken prisoner, with the king, at the battle of Pavia. The important services he had rendered to the state were rewarded with the sword of constable in 1538; but, several years afterwards, he fell under the displeasure of Francis. In the reign of Henry II. he regained favour at court, and was employed in military service, but was again disgraced by the intrigues of Catherine de' Medici. Charles IX. recalled him, and he served against the Calvinists, but was taken prisoner by them at the battle of Dreux, in 1562. Having obtained his liberty the year following, he took Havre from the English. B. at Chantilly, 1493; killed in battle, 1567.

MONTMORENCY, Henry, Duke de, was grandson of the preceding, and was beloved by the people of France for his bravery, generosity, and other great qualities. But having joined Gaston of Orleans against Cardinal Richelieu, Montmorency took up arms in the province of Languedoc, of which he was governor. The king sent against him the marshals De la Force and Schomberg, and a battle ensued at Castelnaudary, where the duke was made prisoner, and, notwithstanding the earnest and general solicitations for his pardon, he was beheaded at Toulouse, in 1632. B. at Chantilly, 1595.

MONTOIR, *mon'-twawr*, two towns and parishes of France, in the departments of the Lower Loir and the Loir-and-Cher. Neither has a population above 5,000.

MONTORO, *mon'-to-ro*, a town of Spain, in Andalusia, on the Guadalquiver, 22 miles from Cordova. *Manf.* Woollen and linen fabrics, and pottery. *Pop.* 11,000.

MONTOUR, *mon'-toor*, a county of the United States, in the E. of Pennsylvania. *Area*, 206 square miles. *Pop.* 14,000.

MONTPELLIER, *mawnt-pel'-le-ai'*, an ancient city in the south of France, capital of the department of the Herault, between the rivers Masson and Lez, 75 miles from Marseilles. It stands on a declivity, which renders the streets, in many places, steep and irregular, and they are in general winding, narrow, and dark. It has, still, some fortifications; viz., an old stone wall,

and a citadel built by Louis XIV. Of the gates, the finest is that which leads to the Place du Peyrou, which is outside of the town, and is said to be the finest public walk, not only in France, but in Europe. The principal structures are the cathedral, partly in ruins, the town-hall, the prefecture, the exchange, formerly the anatomical theatre, and the Hôtel des Monnoies; but the object of greatest interest is a magnificent Roman aqueduct, composed of three rows of arches. Montpellier has long been the seat of a celebrated university, particularly famous for its school of medicine. It is only five or six miles from the sea, and communicates with it through the medium of the canal de Grave: the commodious little harbour of Cette serves as its port. *Manf.* Cottons, muslins, blankets, paper-hangings, chemicals, and surgical instruments. *Pop.* 46,000. Montpellier was built in the 10th century, and many strangers resort to it on account of its literary advantages.

MONTPENSIER, *mawnt-pa'-se-ai*, Anne-Marie Louisa, Duchess de, the daughter of Gaston, duke of Orleans, brother of Louis XIII. She was generally known by the name of Mademoiselle, and embraced the cause of Condé in the civil wars. She caused the cannon of the Bastille to be fired on the French troops, and showed, on many occasions, a most impetuous spirit. After trying in vain to espouse several sovereign princes, among the rest Charles II. of England, she is said to have secretly married the Count de Lauzun. (*See* LAUZUN.) Mademoiselle passed her last years in devotion, and wrote her memoirs, which are very curious, and full of anecdotes relative to the court of Louis XIV. and the Fronde leaders. B. at Paris, 1627; D. 1693.

MONTPENSIER, Duke de, younger brother of Louis Philippe. (*See* LOUIS PHILIPPE.)

MONTPENSIER, Antoine Louis, Duke of, was fifth son of Louis Philippe. In 1842 he entered the artillery with the grade of lieutenant, and took part in all the subsequent campaigns in Algeria. On his return he was decorated with the grand cross of the Legion of Honour, and was promoted to the rank of general of brigade. In 1846 he was married to Marie-Louise-Ferdinande, sister of Isabella II., queen of Spain, an alliance which almost led to a rupture between France and England. The duke was exiled from France, with the other members of his family, after the revolution of 1848. He repaired, in the first instance, to England, but subsequently took up his residence at Seville. B. at Neuilly, 1824; D. 1848.

MONTPÉZAT, *mawnt-pai'-za*, several parishes and towns in France, none of them with a population above 3,000.

MONTRÉAL, *mawnt-rai'-al*, three towns of France, in the departments of the Aude, Dordogne, and Gers. *Pop.* 3,200, 1,900, and 1,800.

MONTREAL, *mon'-tre-awl'*, an island of Lower Canada, at the confluence of the Grand or Ottawa river with the St. Lawrence. It forms the county of Montreal, and is of a triangular shape. *Ext.* 32 miles long, by 10½ broad.

MONTREAL, a town of Lower Canada, British North America, on the south side of the island of Montreal, 140 miles from Quebec. It is divided into the Upper and Lower town. The streets are airy, and the new ones, particularly, of a commodious width; some of them running the whole length of the town, parallel to the river, intersected by others at right angles. The public edifices are the Hôtel Dieu, established in 1644, for the purpose of administering relief to the destitute sick; the convent of Notre Dame, a seminary of education; the general hospital, or convent of the Grey Sisters, a refuge for invalids. The Roman Catholic cathedral church is a large substantial stone building, capable of containing 10,000 persons. The seminary of St. Sulpice, for the education of youth, adjoins the cathedral. The other buildings are the college, court-house, where the courts of civil and criminal judicature are held; the gaol, government-house, the old monastery of the Recollets; and at the upper end of the market-place is a handsome monument, erected in honour of Lord Nelson. *Manf.* Candles, soap, hardwares, floor-cloth, and tobacco. There are, besides, iron-foundries, shipbuilding-docks, and distilling and brewing establishments. It is the grand depôt of the North American fur trade, which, however, has declined. It is also the channel through which is carried on, the commerce between Canada and the United States. The harbour is not large, but always secure for shipping during the time the navigation of the river is open. *Pop.* 90,000. *Lat.* 45° 30′ N. *Lon.* 73° 35′ W.—In 1640 a few log-houses, closely built together, and called Hochelaga, was the commencement of Montreal. It was taken by the English, under the command of General Amherst, in the year 1760. In 1775 it was taken by the Americans, under General Montgomery, but soon after evacuated. The Victoria Bridge, which here spans the St. Lawrence, was opened in 1859, and brought the British settlements in that quarter of the globe, into immediate communication with the United States. This noble structure, which took upwards of seven years to construct, is the finest in the world of its kind, not even excepting that which spans the Menai Straits, in Wales.

MONTREUIL, *mawnt'-re(r)-e*, several towns and parishes in France, none of them with a population above 4,000.

MONTROSE, *mon-troze'*, a parish and neatly-built royal burgh and seaport of Forfarshire, Scotland, near the mouth of the South Esk, 34 miles from Aberdeen. It stands on a flat sandy peninsula, formed by the German Ocean, the river, and a basin into which the flowing tide is spread. A suspension-bridge over the Esk connects it with its suburb, the Inch. The houses are, upon the whole, well built and regular; but, like the Flemish towns, have many of their gables turned to the street. The town-hall, lately enlarged and improved, is a handsome building, of two stories, with an arcade below. It has a parish church, an episcopal chapel, lunatic hospital, academy, a public library, custom-house, news-room, exchange, Dorward's house of refuge, mechanics' institute, museum, and various societies and schools. The harbour, formed by the river South Esk and an arm of the sea, is very commodious, and has excellent quays. Two light-houses are built at the entrance. *Manf.* The principal is linen, sheeting, and sailcloth. There are also tanneries, machine factories, breweries, and soap- and starch-works. *Exp.* Manufactured goods, salmon, stone, and agricultural produce. Of corn, there is more exported from Montrose than from any other Scotch port. *Imp.* Iron, coal, slate, and lime. It is reckoned a fashionable resort, as well as a place of commerce and industry. The downs, or "Links," situate between the town and the German Ocean, are extensive, and are very favourable for the well-known Scots game of golf, which is much practised here. *Pop.* 16,000. *Lat.* 56° 42′ 5″ N. *Lon.* 2° 28′ W.—This is the birthplace of the marquis of Montrose and of Joseph Hume, the financial reformer.

MONTROSE, James Graham, Marquis of, was descended from one of the oldest families in Scotland. He married young, and went abroad, but returned to Scotland about 1633, and was generally considered one of the most accomplished gentlemen of his time. He was at first one of the most violent of the popular leaders, and took a principal part in the preparation of the National Covenant. Thinking himself slighted by the Covenanters, he went over to the royal side. In 1644 he was nominated by Charles II. captain-general of the forces to be raised in Scotland, and immediately commenced his attacks upon the Covenanters with various success. At the battle of Tippermuir, however, he defeated the Covenanters with immense slaughter; but, being surprised at Philiphaugh, in 1645, by General Lesly, his forces were routed, and he and a few followers only succeeded in gaining the Highlands after considerable difficulty. In 1646 he was allowed to take his departure for Norway. He went to France, and served with great distinction in the service of that power, and was offered the grade of lieutenant-general of the Scots in France, and other high appointments, all of which he refused. After the death of Charles I., Montrose was deputed by Charles, the king's son, to invade Scotland, and accordingly dispatched some troops to the Orkneys, joining them himself shortly afterwards; but, in the very first encounter with the Covenanters on the mainland, he was utterly routed. He escaped in the disguise of a Highland rustic; but was soon delivered up to General Lesly, and taken to Edinburgh, where he was subjected to many barbarous

indignities, and sentenced to death. His demeanour throughout this crisis was dignified and self-possessed, and caused many to sympathize with him who had before regarded him as the cruel agent of a tyrant. In 1650 he was hanged on a gibbet, after which his limbs were severed from his body, and affixed to the gates of the chief towns in Scotland. Charles II., at the Restoration, reversed the sentence, and ordered the scattered remains of the unfortunate noble to be collected; which was accordingly done, and they were buried with great solemnity in Edinburgh. B. in Scotland, 1612.

MONTROUGE, *mawnt-roosh'*, a parish and town of France, forming a suburb of Paris, beyond the fortifications. It comprises a theatre, and the asylum of Rochefoucault. *Manf.* Soap, candles, glue, colours, varnishes, locomotive engines, and hydraulic presses. *Pop.* 9,500.—The entrance to the catacombs which extend beneath Paris are here.

MONT ST. JEAN, *zha*, a village of Belgium, 11 miles from Brussels. It is near the scene of the battle of Waterloo, called by the French the battle of Mont St. Jean.

MONTSERRAT, *mont'-ser-rät'*, a British island of the West Indies, belonging to the Leeward group, 28 miles S.W. of Antigua. *Area*, 47 square miles. *Desc.* Mountainous, and producing some of the best coffee and sugar in the West Indies. *Pop.* 8,000. *Lat.* 16° 45′ N. *Lon.* 62° 20′ W.—It was discovered by Columbus in 1493.

MONT-TENDRE, *tandr*, one of the Jura mountains, Switzerland, 15 miles from Lausanne. *Height*, 5,540 feet.

MONT-TERRIBLE, *ter-reebl'*, a former department of France, under the empire of Napoleon I. It is now partly comprised in the Swiss canton of Bern, and named after a mountain of the Jura chain.

MONTUCLA, Joseph de, *mawn-took'-la*, a French mathematician and scientific writer, was an associate of the National Institute, and a member of the Academy of Berlin. He accompanied Turgot to Cayenne, as secretary of the government and royal astronomer. On his return to France, he was appointed first commissioner of public buildings. His principal works were, "Researches on the Quadrature of the Circle," "Collection of Tracts upon Inoculation," and "History of Mathematics." This last is valuable, and has been translated into English. B. at Lyons, 1725; D. 1799.

MONT VICO. (*See* ALPS.)

MONZA, *mond'-za*, a town of Italy, on the Lambro, 10 miles from Milan. It is remarkable chiefly for the treasury of one of its churches, which contains, among other curiosities, the iron crown of the kingdom of Lombardy. There are, besides, a royal palace, a theatre, gymnasium, and hospitals. *Manf.* Cotton stuffs, hats, and leather. *Pop.* 20,000.—It is connected with both Como and Milan by railway.

MONZIE, *mon'-ze*, a parish of Perthshire, Scotland, 3 miles from Crieff. *Pop.* 2,000.—It has the reputed fort of Fingal, the tomb of Ossian, and a castle.

MOOK, *mook*, a village of the Netherlands, 30 miles from Veulo.—Here, in 1574, the Spaniards defeated Louis of Nassau, who was slain in the action.

MOOLTAN, *mool-tan'*, a city of the Punjab, 190 miles from Lahore. It has a citadel, situate on a rising ground, and contains several handsome tombs and Hindoo temples. *Manf.* Silks, cottons, shawls, brocades, and carpets. *Pop.* 80,000.—This place was taken by the British in 1849.

MOOR, *moor*, a town of Hungary, 15 miles from Stuhl-Weissemberg. It has a citadel, and a trade in wines. *Pop.* 7,000.

MOORE, Edward, *moor*, an English poet, who wrote "Fables for the Female Sex;" "The Gamester," a tragedy; "Gil Blas," a comedy, and other pieces. He was likewise editor of "The World," a weekly paper, for which lords Lyttleton and Chesterfield and Horace Walpole wrote. B. 1712; D. 1757.

MOORE, Dr. John, a physician and miscellaneous writer, who received his education at Glasgow, where he applied to the study of medicine. In 1747 he became assistant-surgeon in the army in Flanders, where he remained till the general peace. After the war, he pursued his medical studies at London and Paris; at the latter place he was appointed surgeon to the household of Lord Albemarle, the English ambassador. On his return to Scotland, he became partner with Dr. Gordon, an eminent practitioner at Glasgow; but, in 1773, he accepted an invitation to travel with the young duke of Hamilton. After spending five years abroad, Dr. Moore settled in London, and, in 1779, published the fruits of his travels, in "A View of Society and Manners in France, Switzerland, and Germany." This work was so well received, that, in 1781, he added to it two volumes, entitled, "A View of Society and Manners in Italy." In 1785 he published "Medical Sketches." His next performance was a novel of a very superior character, entitled "Zeluco," which abounds with incident, though the principal character is so atrocious as to excite the reader's horror. In 1792 he accompanied Lord Lauderdale to Paris, and witnessed some of the principal scenes in the Revolution, of which he published an interesting account in 1795. The year following appeared his novel entitled "Edward," intended as a contrast to "Zeluco," but inferior to it. In 1800 he gave to the world "Mordaunt;" being sketches of life, characters, and manners in various countries. This work is neither a romance, novel, nor a book of travels; but it contains many lively and instructive observations. B. at Stirling, 1729; D. at Richmond, 1802.

MOORE, Sir John, a brave and distinguished British general, was son of the preceding, and entered the army in his 15th year. His father possessing great influence in the aristocratic circles, caused the young soldier to rise rapidly, and to gain the rank of lieutenant-colonel before he had seen any service. In 1794, however, he showed that he was possessed of great military qualities, by the part he took in Paoli's descent upon Corsica. His next services were in the West Indies in 1796, in Ireland during the rebellion of '98, and in Holland shortly afterwards. In 1801 he commanded the reserve of the army dispatched to Egypt, and greatly signalized himself, receiving a wound at the head of his men. Upon the renewal of the war in 1802, he applied to be placed in command of a camp of instruction upon the Kentish coast. His request was granted, and he successfully trained a number of light infantry regiments, which afterwards formed the celebrated light division of the duke of Wellington's army in the Peninsular war, and evinced, by their deeds, a valuable proof of the soundness of Moore's method. In 1808 he went, with an army of 10,000 men, to Sweden, to assist Gustavus Adolphus IV. in defending his kingdom against the designs of Napoleon; but, becoming involved in a dispute with that monarch, he returned to England with his troops. In August of the same year he was sent to Portugal, and was placed in command of an army of 30,000 infantry and 5,000 cavalry, which was ordered to co-operate with the Spanish troops against the French in the north of the peninsula. Two months afterwards he commenced his march from Lisbon; but, on entering Spain, discovered that the whole of the Spanish forces with which he was to act had been thoroughly routed. He had sent his cavalry and artillery by another route than that which he had pursued, and a wide tract of country still lay between himself and a portion of his army, which had been sent to him from England under Sir David Baird, and which had landed at Corunna. Sir John Moore remained for a time inactive at Salamanca, urged to advance by the British ambassador in Spain, but himself inclined to retreat into Portugal. Suddenly discovering that the French intended to surround him, he commenced a rapid, if not too hasty, march to Corunna. In that memorable retreat through the mountains of Galicia, in the depth of a severe winter, Sir John Moore displayed the highest qualities of a military commander. Before the battle of Corunna the British troops were, to all appearance, completely disorganized and exhausted; yet, animated by the example of their heroic leader, they turned upon their advancing foes, and inflicted upon them a decisive repulse. The victory was dearly bought, for Sir John Moore fell, but in a manner worthy of the last moments of Epaminondas, Bayard, and Wolfe. With his expiring breath he hoped "that the people of England would be satisfied,—that his country would do him justice." The student who desires to learn

more of the personal history of this hero, may turn with advantage to the first volume of Napier's "History of the War in the Peninsula," to Southey's "Peninsular War," and to Jones's "Account of the War in Spain and Portugal." B. 1761; D. 1809.

MOORE, Thomas, a celebrated poet, was the son of a small tradesman at Dublin, and after receiving some education at a school in the same city, was entered of Trinity College, Dublin, in 1794. He had already commenced rhyme-making, and had inserted two poems in a Dublin magazine. His collegiate career was somewhat distinguished; but being of the Roman Catholic faith, he was not permitted to take honours. About 1799 he went to London, and entered himself of the Middle Temple, with the view of adopting the law as his profession. In 1801 he produced the "Odes of Anacreon," which he had composed while at college, and in the following year, "The Poetical Works of the late Thomas Little," a collection of lyrics in imitation of Catullus. He now began to be introduced to that fashionable circle in which, throughout his after-life, he sought to move. Through the influence of Lord Moira he was, in the following year, appointed to a post at Bermuda; but finding, on his arrival, that the situation was distasteful to him, he returned almost immediately. He pursued his homeward journey through the United States, and visited New York, Virginia, Boston, Niagara, and Quebec. Soon after his arrival in England, he put forth his "Odes and Epistles," which being severely criticised by Jeffrey, led to the "bloodless duel" between himself and that gentleman, satirized by Byron in his "English Bards and Scotch Reviewers." (*See* JEFFREY.) At this period he was much courted by the noble and the fashionable, and was a constant guest at Holland and Lansdowne Houses. He had a sweet voice, and being a good musician, was in the habit of singing the melodies of his native land with much success at aristocratic re-unions. This fact led to his engaging himself to write a series of Irish melodies, the accompaniments to which were to be adapted from Irish airs by Sir John Stevenson. This task was not completed until 1834. Of a similar character were his "National Airs" and "Sacred Songs." In 1812, his friend Mr. Perry, editor of the "Morning Chronicle," negotiated on his behalf with the Messrs. Longman the sale of a 4to volume of poems, for which Moore was to receive 3,000 guineas. Five years afterwards, this poem appeared under the title of "Lalla Rookh," and was immediately highly successful. This brilliant composition was something quite new to the public, who were captivated with its rich colouring, its melody, and its oriental spirit. The "Fudge Family in Paris" was his next work, and was the result of a visit to the French capital, made in company with Mr. Rogers. He soon afterwards learned that his deputy at Bermuda, "after keeping back from him the proper receipts of his office, had made free with the proceeds of a ship and cargo deposited in his hands." For this, Doctors' Commons made a claim upon him to the amount of £6,000. The poet's friends proffered assistance; but he honourably resolved to pay off the claim out of the proceeds from his pen. The remaining years of his life may be described as an untiring pursuit of poetry, prose, and fashionable society. As Byron said, he dearly loved a lord, and was never so happy as when he was in the presence of the noble. The simple enumeration of his chief productions will show, however, that he did not trifle with or neglect the magnificent gifts with which Nature had endowed him. During the subsequent twenty years he laboured incessantly, and gave to the world, among others, "The Loves of the Angels," a poem; "The Epicurean," a prose-poetical romance; "Fables of the Holy Alliance," "Memoirs of Captain Rock," "The Summer Fête," "The Life of Lord Edward Fitzgerald," the "History of Ireland," and "The Life of Sheridan." Some time previously to the year 1821, Lord Byron intrusted Moore with his manuscript autobiography, which was to be published for Moore's benefit, but not until after Byron's death. In 1821 Moore sold the MS. to Murray, and engaged to edit it for the sum of 2,000 guineas. In 1824 Byron died, but Lady Byron deeming that the publication of the autobiography was calculated to injure the character of her husband and his family, offered to repay to Mr. Murray the sum he had advanced to Moore. This the poet would not accede to, but, after some altercation, Moore himself repaid the sum he had obtained from the publisher, and the MS. was burnt. He, however, wrote a Life of Byron for the Messrs. Longman for a like sum. As a poet, he displayed grace, pathos, tenderness, and a luxuriant imagination; his melody was tender and flowing, but it was deficient in power and naturalness. His literary merits obtained for him, in 1835, a pension of £300 per annum. The "Irish Melodies" and "Lalla Rookh" have passed through many editions, and are still exceedingly popular. During the last years of his life, he was engaged in completing a collected edition of his poetical works, which was published after his death. His character was vain but kindly, and many proofs of his goodness of heart appear in the "Memoirs and Correspondence of Thomas Moore," produced by Lord John Russell in 1855. B. at Dublin, 1779; D. 1852.

MOORGHAUB, *moor-gawb'*, a river of Afghanistan, rising in the territory of Huzareh, and, after a course of 250 miles, is lost in the sands beyond Mero, in the Khiva dominions.

MOORSHEDABAD, *moor'-she-da-bad'*, a city and district of Bengal, British India, 115 miles from Calcutta. From the year 1704 till 1757, the city was the capital of that province. Most of the houses have only one story, and have tiled roofs; and the streets are narrow and dirty. It is the residence of the nabob; also of the British civil establishment; and has a college, founded in 1826. *Pop.* Estimated at 150,000. *Lat.* 24° 11′ N. *Lon.* 88° 15′ E.—The DISTRICT has an area of 1,856 square miles, and a population of 1,050,000. *Lat.* between 23° 48′ and 24° 47′ N. *Lon.* between 87° 52′ and 88° 41′ E.

MOOSE RIVER, *moose*, one of the head-waters of the St. Francis, in Lower Canada. After a course of 250 miles, it enters St. James's Bay, in conjunction with the Abbitibile.

MOOSEHEAD LAKE, *moose'-hed*, a lake of the United States, in Maine, in which the river Kennebeck has its rise. *Ext.* 30 miles long, with a breadth of 12.

MORA, *mo'-ra*, the name of several towns of Spain, none of them with a population above 5,300.

MORADABAD, *mo-ra-da-bad'*, a town of Hindostan, 90 miles from Delhi. It has no buildings of importance, but is the seat of a thriving trade. *Pop.* 50,000. Also a DISTRICT of British India, with an area of 2,965 square miles and a population of 998,000.

MORALES, Ambrose, *mo-ra'-lais*, a Spanish divine, historiographer to Phillip II., and professor in the university of Alcala. He was author of a Spanish Chronicle, and other works. B. at Cordova, 1513; D. 1590.

MORAND, Saveur Francis, *mo-rant'*, a celebrated French surgeon, who went to England in 1729 to avail himself of the instructions of Cheselden, whose esteem he acquired. On his return to his own country, he became surgeon-major of the Guards, and director of the Academy of Surgeons. He was also made chevalier of the order of St. Michael, and admitted a member of the Academy of Sciences, and of the Royal Society of London. His chief works were,—"A Treatise on the High Operation for the Stone," "Discourse on the Necessity that a Surgeon should be learned," "Experiments and Observations on the Stone," and "Miscellaneous Works." B. at Paris, 1697; D. 1773.

MORANO, *mo-ra'-no*, a town of Naples, 6 miles from Castrovillari, commanded by a fine Gothic castle. *Pop.* 8,500.

MORANT, Philip, *mo-rănt'*, an English antiquary and divine, who became rector of Aldham, in Essex, and was appointed by the House of Peers to prepare the votes of Parliament for the press. He edited several works, and wrote a "History of Colchester," the "History of Essex," and some Lives, which were inserted in the "Biographia Britannica." B. in Jersey, 1710; D. 1770.

MORAT, LAKE OF, *mo'-ra*, lies in Switzerland, 2 miles from Lake Neufchatel, with which it is connected by the river Broye. *Ext.* 7 miles long, with a breadth of 2.

MORAVA, or the MARCH, *mo-ra'-va*, a tributary of the Danube, and the principal river of Servia; after a course of 115 miles, it unites with the Danube, 6 miles from Semendria.

MORAVIA, *mo-rai'-ve-a*, a province of the Austrian empire, bounded E. by Hungary, S. by Austria proper, and N. and W. by Bohemia; —including Austrian Silesia, which was, in 1783, annexed to it. *Political Divisions.* Moravia proper formerly comprised the six circles of Brunn, Olmutz, Hradisch, Prerau, Znaym, and Iglau, and Austrian Silesia those of Teschen and Troppau, but is now divided into the two regencies of Brunn and Olmutz. *Area.* Computed at 10,300 square miles. *Desc.* It forms a large quadrangle, intersected by several ranges of mountains, of which the highest are on the side of Bohemia. It belongs almost entirely to the basin of the Danube, and although the rivers are numerous, the greatest is the March or Morava. *Pro.* In general, of great fertility, particularly in the south. Little corn, however, is raised for exportation. Flax is cultivated; and certain situations are so well adapted to the grape, that, in 1803, the government had to prohibit the appropriation of more land for the cultivation of the vine. The pastures are extensive, and stock of all kinds are raised in large numbers. *Minerals.* Gold, silver, iron, lead, and coal. Mining for gold and silver was abandoned in the 15th and 16th centuries, notwithstanding the mines were of great antiquity. *Manf.* Woollen, linen, and cotton goods are, with thread, made on a large scale; dyeing is carried to great perfection at Brunn; and the other manufactures consist of leather, paper, potash, and glass. *Exp.* These consist of her manufactures, which are sent not only to the west and north of Germany, but to Hungary, Lower Austria, Italy, and the Levant. *Imp.* Chiefly oil, flax, cotton, and silk, as the materials of manufacture, and cattle, wine, and hardware, for the purpose of consumption. *Pop.* 1,800,000. It extends from *lat.* 48° 35′ to 50° 21′ N., and from *lon.* 15° 10′ to 19° 6′ E. In 1527 Moravia was added to the possessions of the house of Austria, and has, ever since, been subject to the monarch of that empire. In 1805 it was the great theatre of war between the Austro-Russian and the French armies.

MORAVIANS, Sect of, was first established in Bohemia, under the direction of Michael Bradacz, out of the scattered members of the ancient Hussites, and took the name of the Brothers of Bohemia, or the United Brothers. Persecuted by the emperor Ferdinand I., a great number took refuge in Poland and in Prussia, where they enjoyed a certain amount of religious liberty. Their co-religionists who had remained in Bohemia were afterwards protected by Maximilian II., and established themselves at Fulnek, in Moravia, whence they came to be called the "Moravian Brotherhood." Dispersed after the Thirty Years' War, they, in 1721, took refuge at Hernhutt, under the protection of Count Zinzendorff, at which time they began to be called Hernhutters. This religious association is a kind of republic, in which individual interests are secondary to the general good. They obey certain ancients, or ecclesiastical chiefs, who regulate every act of their religious and civil life. These ancients superintend the physical and moral education of children, inflict penance, pronounce exclusions, and mark the rank of every member of the community, some of whom are called probationers, others associates, and others again perfect members. At the present time, the Moravians are to be found in Germany, Switzerland, England, Holland, France, Russia, and in the colonies of Africa and America. The chief of these communities is that of Hernhutt, where the college-director resides.

MORAYSHIRE, MURRAYSHIRE, or ELGINSHIRE, *mur'-rai-sheer*, is the middle district of the ancient province of Moray, in Scotland, bounded N. by the Moray Firth, E. and S.E. by Banffshire, S.W. by Inverness-shire, and W. by the counties of Inverness and Nairn. *Area,* 840 square miles. *Desc.* Rocky and mountainous in the S., and towards the N. rich and fertile. *Rivers.* The principal are the Spey, Findhorn, and Lossie. *Pro.* All the usual crops, which were formerly produced in such abundance, that it was called the "Garden of Scotland." *Manf.* Woollens; and there are both distilleries and tanneries. *Exp.* Grain, salmon, and timber from the ancient forests of Darnawly and Strathspey. *Pop.* 40,000. There are numerous remains of antiquity in this county.—The MORAY FIRTH is the largest indentation on the Scottish coast, being 75 miles across, from Duncansby Head to Kinnaird Head. At its extremity it receives the rivers Ness and Beauly.

MORBEEK, *mor'-bek*, a town of France, in the department of the Nord, 2 miles from Hazebrouck. *Pop.* 4,000.

MORBIHAN, *mor'-be-an'*, a maritime department of France, formed from the old province of Bretagne, bounded on the S. by the Atlantic, and N. by the department of Côtes-du-Nord. *Area,* 2,640 square miles. *Desc.* Mountainous, and watered by the Villaine, the Blavet, the Claye, the Oust, and the Scorf. The soil is sandy, and not of great fertility. *Pro.* Corn, hemp, lint, butter, cider, honey, and inferior wine. There are tracts of excellent pasturage, and large numbers of horses, cattle, and sheep are reared. *Minerals.* Iron and lead. *Manf.* Linen, and there are iron-forges. *Pop.* 480,000.

MORCONE, *mor-ko'-nai*, a town of Naples, 19 miles from Molise. It has a castle, and is inclosed by walls. *Manf.* Linen and cotton goods. *Pop.* 5,000.

MORDAUNT, Charles, earl of Peterborough. (*See* PETERBOROUGH, Earl of.)

MORE, Henry, *mor*, an English divine, who received his education at the university of Cambridge, where he applied himself to the study of the Platonists. Most of his writings were devoted to the exposition of a Christiano-Platonical philosophy. The best account of More's studies was given by Enfield, in his "History of Philosophy." "More was strongly under the opinion, so common among his contemporaries, that the wisdom of the Hebrews had been transmitted to Pythagoras, and from him to Plato; and, consequently, that the true principles of divine philosophy were to be found in the writings of the Platonists; at the same time he was persuaded that the ancient cabalistic philosophy sprung from the same fountain, and therefore endeavoured to lay open the mystery of this philosophy by showing its agreement with the doctrines of Pythagoras and Plato, and pointing out the corruptions which had been introduced by the modern Cabalists. The Cartesian system, which sprang up at this time, was embraced by More, as, on the whole, consonant to his ideas of nature; and he took much pains to prove that it was not inconsistent with the Cabalistic doctrine. His penetrating understanding, however, discovered defects in this new system, which he endeavoured to supply. In short, the writings of this great man, though not without a tincture of mysticism, are eminently distinguished by profound erudition, an inventive genius, and a liberal spirit." More's chief works were, "Conjectura Cabalistica," "A Key to the Revelations," "An Apology for Descartes," "The Immortality of the Soul," and a collection of philosophical poems. He was one of the original members of the Royal Society, and, although offered high preferments in the Church, he chose rather to live a life of retirement, wherein he might devote himself to the pursuit of philosophical studies. B. at Grantham, Lincolnshire, 1614; D. 1687.

MORE, Sir Thomas, a distinguished English statesman and writer, was the son of Sir John More, one of the judges of the King's Bench. He received his education at Oxford, and afterwards became a student of Lincoln's Inn. As soon as he came of age he obtained a seat in parliament, where he opposed a subsidy demanded by Henry VII. for the marriage of his eldest daughter, with such eloquence that it was refused by the house. At the accession of Henry VIII., he was called to the bar, and, in 1508, appointed judge of the sheriff's court, in London, which was then a considerable post. By the interest of Wolsey, he obtained the honour of knighthood and a place in the privy council. In 1520 he was made treasurer of the Exchequer, and, in 1523, chosen speaker of the House of Commons, where he resisted a motion for an oppressive subsidy, which gave great offence to Cardinal Wolsey. Sir Thomas was made chancellor in 1530, and, by his indefatigable application in that office, there was, in a short time, not a cause left undetermined. To the high qualities of learning, wit, and liberality, he joined a stanch adherence to the Roman Catholic religion and the papal authority. This led him to oppose the king's divorce from Catherine of Aragon, for which he was sent to the Tower, brought to trial, and condemned to lose his head, which sentence he courageously endured. Sir

## More

Thomas More wrote several works against the Reformation, and some epistles to Erasmus and other learned men. The best of his works is a kind of political romance, composed in Latin, entitled "Utopia," wherein the author delineates what he conceives to be a perfect commonwealth, situate in an imaginary island. This work has been translated into English by Bishop Burnet, Cayley, and others. Sir Thomas had four children. His eldest daughter, Margaret, married a gentleman named Roper, who wrote the life of his father-in-law. She was an accomplished woman, and well read in the Greek and Latin languages. She wrote a treatise on the Four Last Things, and died in 1544. Sir Thomas More's character has been much misrepresented by Fox, in his "Martyrology," and by Bishop Burnet in his "History of the Reformation," both charging him with cruel persecution of the Protestants while chancellor. Erasmus, however, distinctly testifies, that "whilst More was chancellor, no man was put to death for these dogmas." All his contemporaries describe him as being of a singularly amiable disposition, and unaffectedly and sincerely pious. Erasmus, who was his frequent guest, says, "with him you might imagine yourself in the Academy of Plato. But I should do injustice to his house by comparing it to the Academy of Plato, where numbers and geometrical figures, and sometimes moral virtues, were the subjects of discussion: it would be more just to call it a school and an exercise of the Christian religion. All its inhabitants, male and female, applied their leisure to liberal studies and profitable reading, although piety was their first care. No wrangling, no idle word, was heard in it; every one did his duty with alacrity, and not without a temperate cheerfulness." Sir James Mackintosh gave an interesting sketch of this great man's life in a volume entitled "Eminent British Statesmen," published in Dr. Lardner's "Cabinet Cyclopædia." B. in Milk Street, London, 1480; beheaded, 1535.

More, Hannah, an eminent English authoress, who, early in life, opened a school for the education of girls, at Bristol. In this occupation she was assisted by her sisters, and, in course of time, the establishment became one of the most flourishing schools in that part of England. In 1773 she produced a pastoral drama, entitled "The Search after Happiness," which meeting with a successful reception, she was encouraged to write a regular tragedy. Obtaining an introduction to Dr. Johnson and Garrick, she wrote two works for the stage; but being of a deeply religious order of mind, she determined to forsake writing for the theatre, and retire into the country. During the remaining years of her life, she resided in Somersetshire; the profits resulting from her many productions enabling her to enjoy a literary ease, and to assist in ameliorating the condition of the rustic population in her neighbourhood. It was at one time intended to commit the education of the Princess Charlotte of Wales to her charge; but, although the project fell to the ground, it was the cause of her publication entitled "Hints towards Forming the Character of a Young Princess." Her next effort was the popular novel "Cælebs in Search of a Wife." Her chief works of a religious order were "Practical Piety," "Christian Morals," and "Essay on the Character and Writings of St. Paul." B. near Bristol, 1745; D. at Clifton, Gloucestershire, 1833.

Morea, *mo-re'-a*, the ancient Peloponnesus, situate to the southward of the continent of Greece, with which it is connected by a narrow neck of land, called the Isthmus of Corinth, and to which it now politically belongs. In all other directions it is surrounded by the sea. *Area*, 13,500 square miles. *Desc.* Its form approaches to the oblong, but is irregular and much indented. *Gulfs and Bays.* Numerous. The principal are those of Patras, Arcadia, Coron, Kolokythia, and Napoli di Romania. It has also several large and secure harbours. *Rivers.* The Alpheus, the Eurotas, and the Pamisos. *Lakes.* The Stymphalus and Phenеus, both situate towards the north: the latter is remarkable for giving rise to the small river Styx, which flows out of it. *Pro.* Corn, olive-oil, wine, currants (or raisins of Corinth), silk, cotton, wool, honey, beeswax, and fruit. Some of the wines, particularly those made in the south-east, in the neighbourhood of Napoli di Malvasia (and thence called Malmsey), are delicious; but in general the country is neglected. (*See* Greece.)

## Moreau

Moreau, Jacob Nicholas, *mo-ro'*, a French author, who was counsellor of the Court of Aids, historiographer of France, librarian to the queen, and censor royal. He wrote several works, the chief of which were, "Lessons in Morals, Politics, and Law;" "Principles of Political Morality;" and "The Duties of a Prince; or, a Discourse on Justice." B. at Saint Florentin, 1717; D. 1803.

Moreau, John Michael, a celebrated French designer and engraver, who studied under Lebas, and became, in 1770, designer to the king, and in 1797 professor of drawing to the *Ecoles centrales* of Paris. His designs, nearly all of which were engraved by himself, amounted to more than 2,000, and he was one of the most popular illustrators of the works of Voltaire, Rousseau, Molière, &c. B. at Paris, 1741; D. 1813.

Moreau, John Victor, one of the most celebrated generals of the French republic. The son of an advocate, he was himself educated for the legal profession; but his ardent love of military adventure caused him to enlist as a private soldier when he had attained his 18th year. His discharge was purchased, however, and for several years he studied and practised the law, gaining some popularity by his eloquent defence of the parliament of Rennes against the government. Upon the outbreak of the Revolution, he resolved to devote himself to a career of arms, for which he had always a passionate attachment. He placed himself at the head of a battalion of Breton volunteers, and, in 1792, joined the army of Dumouriez. In two years he reached the grade of general of division, and assisted Pichegru in the conquest of Holland. He was next nominated commander-in-chief of the army of the Rhine and Moselle, and in 1796 defeated the Austrians under General Wurmser, and drove them across the Rhine. While in pursuit of the Austrians in Germany, he was met by the Archduke Charles, who was at first beaten by Moreau. The Austrians, however, were soon so strongly reinforced, that Moreau was compelled to retire before overwhelming numbers. With a powerful enemy in his rear, and assailed on every side by a hostile peasantry, he fought his way through the defiles of the Black Forest, and, by his glorious retreat, gained more honour than by his previous advance. Shortly afterwards he incurred the displeasure of the Directory, by being suspected of complicity with his old friend Pichegru, in corresponding with the Bourbon princes. Upon this, he requested to be allowed to retire from the army. But his services were again sought in 1799, when he was sent to Italy, where the French were in a disastrous condition. At Novi, after the death of Joubert, he saved the army. Again nominated to the command-in-chief of the army of the Rhine, he crossed that river in 1800, defeated the Austrians in several engagements, drove General Kray before him as far as the Danube, gained the decisive victory of Hochstædt, and signed the armistice of Parsdorff. At the recommencement of hostilities, he gained the celebrated victory of Hohenlinden, and advanced upon Vienna, which was only saved by the armistice of Steyer. The peace of Luneville put an end to this glorious career in 1801. Upon his return to Paris, the first consul pretended to receive him with great cordiality; but Moreau and Bonaparte were too eagerly pursuing the same ambitious path to escape coming into collision. Bonaparte spoke of Moreau as "the retreating general;" while the victor of Hohenlinden retaliated by defining his rival as a "general at ten thousand men a day." In 1804, Moreau was accused of being implicated in the royalist conspiracy of Pichegru and Georges Cadoudal; and, although there was no evidence against him, was condemned to an imprisonment of two years. Moreau requested that this sentence might be converted into banishment, which, being acceded to, he set out for the United States, where he lived during several years. His hatred of Napoleon caused him to accept, in 1813, a proposal made to him by the emperor Alexander to assist the allies against France. Scarcely had he joined the allied army before Dresden, when both his legs were crushed by a cannon-shot. He underwent the amputation of both limbs without a groan, but died after a few days of suffering. B. at Morlaix, Brittany, 1763; D. 1813.

Moreau, Hégésippe, a French author, who went

to Paris at an early age, with the intention of attaining a brilliant position by the exercise of his poetical talents. Meeting with little encouragement, he, after several years of misery, died of consumption in one of the hospitals of the French capital. Moreau wrote a volume of poems, which was published three months before his death, entitled "Myosotis," and which evinced a style full of grace and freshness. B. 1810; D. 1838.

MOREAU DE LA SARTHE, James Louis, an eminent French writer upon medicine, who was educated for the profession of surgery, but was compelled to relinquish its practice through receiving a wound of the right hand. Thereupon he devoted himself to the theory of medical science, and produced a number of works which gained him much distinction. In addition to several valuable papers inserted in the "Journal of Medicine," he produced an "Essay upon Gangrene," "Outline of a Course of Hygiene," and a "Treatise on Vaccination." B. near Mans, 1771; D. at Paris, 1826.

MORECOMBE BAY, or LANCASTER BAY, *mor'-kam*, an extensive inlet on the W. coast of England, in the Irish Sea. *Ext.* 16 miles long, with an average breadth of 10.

MORELL, Thomas, *mo-rel'*, a learned English divine and lexicographer, who became fellow and D.D. of King's College, Cambridge, and published valuable editions of Ainsworth's Latin Dictionary and Hederich's Greek Lexicon. He was also author of "Annotations on Locke's Essay on the Human Understanding;" assisted Hogarth in writing his "Analysis of Beauty," and selected the passages of Scripture for Handel's Oratorios. B. at Eton, 1703; D. 1784.

MORELLA, *mo-rail'-ya*, a town of Spain, in Valencia, 33 miles from Tortosa. It has a fortress and some Roman antiquities. *Pop.* 6,300.

MORELLI, James, *mo-rail'-le*, an eminent Italian librarian, who, in 1778, became keeper of the great library of St. Mark, at Venice, and retained that post until his death. He discovered a large fragment of Dion Cassius, and was the editor of many classical authors, besides producing numerous treatises on questions connected with the history of literature. B. at Venice, 1745; D. at the same city, 1819.

MORELY, Lord, *mor'-le*, an English nobleman, who wrote several curious Latin poems, and was a great favourite with Henry VIII., who raised him to the peerage. He secured that monarch's favour by concurring in his divorce from Catherine and his marriage with Anne Boleyn. D. 1547.

MORENA, SIERRA, or MONTES MARIANA, *mo-rai'-na*, a mountain-chain extending along great part of the south of Spain and Portugal, and separating the two great valleys which contain the rivers Guadiana and Guadalquiver. Its culminating point is Aracena, 5,500 feet above the sea. This chain is the scene of many incidents in "Don Quixote."

MORERI, Louis, *mo-reer'-e*, a French divine and historiographer, who conceived the idea of producing a biographical and geographical dictionary, and published it in 1671. His intense application in preparing a second edition of this great undertaking, produced a disorder of which he died. This dictionary has been several times revised and augmented; among others, by Leclerc and Bayle. The last edition is that of Paris, 1759, in 10 vols. B. in Provence, 1643; D. 1680.

MORES, Edward Rowe, *mors*, an English antiquary, who was, in 1752, chosen a fellow of the Society of Antiquaries, and projected an equitable society for insurance on lives and survivorship by annuities. He was the author of the "History and Antiquities of Tunstall, in Kent," and a "Dissertation on Founders and Foundries." B. at Tunstall, Kent, 1730; D. 1778.

MORET, Antony de Bourbon, Count de, *mo'-rai*, a natural son of Henry IV. of France and Jacqueline de Beuil, countess de Moret. He espoused the cause of Gaston, duke of Orleans, and raised an army in Languedoc; but perished in the engagement at Castelnaudary, when the duke of Montmorency was made prisoner. B. 1607; killed, 1632.

MORETON, *mor'-ton*, the name of several parishes in England, none of them with a population above 800.

MORETON BAY, an inlet of the Pacific Ocean, E. Australia, containing several islands, and receiving the Brisbane and Logan rivers. In 1849 it was made a convict settlement. *Ext.* 70 miles long. *Lat.* 27° 30′ *S. Lon.* 153° E.

MORETON HAMPSTEAD, a market-town of Devonshire, on the skirts of Dartmoor Forest, 14 miles from Exeter. It has an extensive woollen trade. *Pop.* 1,932.

MORETON-IN-THE-MARSH, a market-town of Gloucestershire, 26 miles from Gloucester. It is connected with Stratford by railway. *Manf.* Linen goods. *Pop.* 1,600.

MORETO Y CABANA, Augustin, *mo-rai'-to*, a comic poet of the 17th century, and contemporary with Calderon. He was the author of a considerable number of dramas and short poems, which were greatly successful. Several of his plays were imitated by Molière. About 1676 he abandoned poetry to embrace an ecclesiastical life, and became a favourite with Philip IV. His comedies were published at Valentia in 1676, and again in 1703. B. in Spain, about 1625; D. about 1680.

MORETT, *mor'-et*, an ingenious goldsmith in the reign of Henry VIII., who executed several curious works, after the designs of Holbein.

MOREZ, *mo'-rai*, a market-town of France, on the Bienne, 25 miles from Lons-le-Saulnier. *Manf.* Cotton thread. *Pop.* 3,300.

MORGAGNI, John Baptist, *mor-gan'-ye*, a celebrated Italian anatomist. He became professor of medicine at Bologna; whence he removed to Padua, on being elected to the chair of anatomy. His fame chiefly rests upon a work entitled "De Sedibus et Causis Morborum per Anatomen indagatis," which contained a vast number of observations upon morbid anatomy, and is referred to at the present day with advantage. B. at Forli, 1682; D. 1771.

MORGAN, *mor'-gan*, the name of several counties in the United States, none of them with a population above 20,000. They are in Virginia, Georgia, Alabama, Tennessee, Kentucky, Ohio, Indiana, Illinois, and Missouri.—Also the name of several townships, none of them with a population above 3,000.

MORGAN, William, an eminent Welsh divine, who became, in 1595, bishop of Llandaff, whence he was translated to St. Asaph in 1601. He had a principal share in the translation of the Bible into Welsh, first printed in 1588. D. 1604.

MORGAN, the son of Cadwgan, prince of Powys, a fierce chieftain, who subsequently repented, and went on a pilgrimage to Jerusalem, but died at Cyprus, on his return, 1126.

MORGAN, Sir Henry, a celebrated English buccaneer, who at first served under Mansfield, and after whose death he collected a fleet of twelve ships, and attacked and extorted ransom from a town in the island of Cuba. He subsequently carried Portobello by assault, and destroyed the fort of Macaraibo. In 1669 he retired to Jamaica, intending to enjoy peaceably the fortune he had acquired; but in the following year he again put himself at the head of a fleet of 37 sail, with which he ravaged the coast of Nicaragua. In 1671 he marched upon Panoma with 1,300 men, and took and burnt the city. His career was checked by the signature of a peace between England and Spain. After a visit to England, he returned to the West Indies, having been knighted by Charles II., and created governor of Jamaica. B. in Wales, early in the 17th century; D. in Jamaica, 1688.

MORGAN, Sir Thomas Charles, an English physician of some eminence, who received the order of knighthood in Ireland, in 1811, and in the following year, meeting with Miss Owenson, the popular Irish authoress, at the residence of the marquis of Abercorn, in the county of Tyrone, he married her. He shortly afterwards relinquished his medical practice, and became a writer of light and sparkling sketches for the "New Monthly" and other magazines. His best efforts were, "Sketches of the *Philosophy of Life*," "The Philosophy of Morals," and "The Book without a Name," which last was written in conjunction with Lady Morgan. When the Whigs came into office in 1831, Sir Charles was appointed a commissioner of Irish fisheries. He was also fellow of the College of Physicians. B. in London, about 1783; D. 1843.

MORGAN, Sidney Owenson, Lady, a popular Irish

authoress, wife of the preceding, was the daughter of a musician of some merit in Dublin, who was moreover a cultivated and intellectual man, and thus fitted to prepare the future authoress for that elegant society of which she subsequently became so eminent a member. Her first girlish efforts were directed to poetry; and at 14 she produced a volume of miscellaneous verses, and afterwards a series of songs, set to Irish airs. When only 16, she had published two novels, which, although favourably spoken of at the time, produced no very important effects; but the "Wild Irish Girl," published in 1801, at once raised her to a conspicuous position in the literary world. This novel passed through seven editions, and formed an introduction for its gifted authoress into the best society. She first met Sir Charles Morgan while staying at the house of the marquis of Abercorn, and in 1812 they were married. Her next work of importance was entitled "France," and was the result of three observant years spent in that country. It was a critical review of the social state of the country, rather than a book of travels, and was published in 1818. It achieved immense success, and led to a decision, on the part of the French government of the time, to refuse the gifted authoress readmission to the country. "Florence Macarthy," her second novel, was published in England during her stay in France, and contributed in no small degree to add to the writer's fame. "The Life and Times of Salvator Rosa" was first given to the world in 1823. In the historical and philosophical disquisition, entitled "Woman and Her Master," Lady Morgan contended that her sex had been condemned to obscurity and passive obedience by man. Among many other works, she produced "The Book of the Boudoir," "The Princess," and "Dramatic Scenes from Real Life." Lady Morgan, although receiving large sums for her works, was not wealthy, and a well-bestowed pension of £300 a year was conferred on her during the ministry of Earl Grey. B. at Dublin, about 1786; D. 1859.

MORGAN MWYNVAWR, or Morgan the Courteous, a Welsh prince, who was a lover of peace, though great in the field of battle. He was the friend of Edgar, king of England. B. 872; D. 1001.

MORGARTEN, *mor-gar'-ten*, a mountain of Switzerland, 5 miles from Schytz, where, in November, 1315, the first battle was fought for Swiss independence. On this occasion, 20,000 of the Austrian forces were defeated by 1,300 Swiss. In 1798 the French were also here defeated by the Swiss.

MORGHEN, Raphael, *mor'-gen*, a celebrated Italian engraver, who studied under Volpato, whose daughter he married. In 1793 he took up his residence at Florence, at the invitation of the grand-duke Ferdinand II. His masterpiece was an engraving of the "Last Supper," by Leonardo da Vinci; but he is stated to have engraved upwards of 200 plates, some of the best being reproductions of the great works of the painter Raffaele. B. at Florence, 1758; D. at the same city, 1833.

MORHOFF, Daniel George, *mor'-hof*, a learned German writer, who, in 1660, was chosen professor of poetry at Rostock, whence he removed to Kiel, where he discharged the same office, but afterwards became professor of history and librarian. His principal works were "Polyhistor," in which he gave a survey of universal literature down to the middle of the 18th century, treated of choice works, and of rare works upon grammar, rhetoric, poetry, mathematics, history, &c.; and the "Princeps Medicus," in which he defended, in a curious manner, the pretensions of the kings of France and England to the power of curing the scrofula or king's evil. B. at Wismar, Mecklenburg-Schwerin, 1639; D. 1691.

MORICE, Sir William, *mor'-is*, an English gentleman, memorable for the share which he had in bringing about the restoration of Charles II. He was the kinsman of General Monk, who procured him the place of secretary of state, which he resigned in 1668. He wrote a book called "The Common Right of the Lord's Supper asserted." D. 1676.

MORIN, Peter, *mor'-ĕ*, a learned French critic, who spent several years in the printing-office of Paul Manutius, at Venice, and afterwards taught Greek and geography at Vicenza, whence he was invited to Ferrara. Cardinal Borromeo, being apprised of his merit, called him to Rome, where he was employed on the edition of the Septuagint, on that of the Vulgate, and lastly on the great edition of the Bible, translated from the Greek version. He published a collection of General Councils, and other works. B. at Paris, 1631; D. 1608.

MORIN, John Baptist, a French astrologer, who studied physic at Avignon, and took his doctor's degree in that faculty. His pretended skill in astrology, and the fame acquired by the casual fulfillment of some of his predictions, recommended him to the cardinals Richelieu and Mazarin, the latter of whom procured him the place of mathematical professor in the Royal College, with a handsome pension. He wrote "Astrologia Gallica," and a curious little book against the Pre-Adamites. B. in France, 1583; D. 1656.

MORIN, Simon, a French fanatic, who, in 1647, published a strange book, in which he called himself Jesus Christ and the Second Messiah. Notwithstanding his extreme ignorance, he obtained numerous followers; but was burnt alive at Paris, 1663.

MORIN, Louis, a French physician, who was a member of the Academy of Sciences, and made a valuable index to the works of Hippocrates, in Greek and Latin. B. at Mans, 1635; D. 1715.

MORIN, John, professor of philosophy at Chartres, was the author of a piece entitled, "Mécanisme Universel," and a treatise on Electricity. B. in France, 1705; D. 1761.

MORISON, Robert, *mor'-i-son*, a physician and professor of botany at Oxford. He studied in the university of Aberdeen, till interrupted by the civil wars, in which he displayed great zeal and courage on the royalist side. After the execution of Charles I., he went to France, where he took his doctor's degree, and was appointed director of the royal garden at Blois. In 1660 he returned to England, and was nominated physician to Charles II., and regius professor of botany at Oxford. He read botanical lectures in the garden at Oxford, and wrote some interesting works on "Elementary Botany," and on "The History of Botany." B. at Aberdeen, 1620; D. 1683.

MORISOT, Claude Bartholomew, *mor'-i-so*, a French author, who wrote "Peruviana," a secret history, with fictitious names, of Cardinal Richelieu, Mary of Medicis, and the duke of Orleans, first published in 1645. He was also the author of some other works. B. at Dijon, 1592; D. 1661.

MORLAIX, *mor'-lai*, a well-built town of France, in the department of Finisterre, on the small river Morlaix, 34 miles from Brest. On the bank of the river there is a fine quay, forming an agreeable covered walk, and serving, like an exchange, for the meeting of merchants. The only public buildings are the churches, an hospital, a public library, and a commercial college. It trades in cattle, flax, hemp, and linen. *Pop.* 12,500.

MORLAND, Sir Samuel, *mor'-land*, an English statesman, who accompanied Whitelock in his famous embassy to the queen of Sweden, and afterwards became assistant to Thurloe, Cromwell's secretary. Becoming privy to a plot for destroying Charles II., he is stated to have divulged it to that monarch, while still abroad. For this service he was created a baronet at the Restoration. He wrote a book, entitled, "Urim of Conscience." His son was master of mechanics to Charles II., and invented the speaking-trumpet, a fire-engine, and a capstan for heaving up anchors. B. near Reading, about 1625; D. in London, 1695.

MORLAND, George, a celebrated English painter, was the son of an artist in London, who employed him constantly in making drawings for sale. By this means young Morland acquired a wonderful facility of invention and a rapidity of execution; but owing to the narrow and illiberal manner in which his talents were used by his father, he contracted low habits, and formed bad connections. His pictures, however, soon became objects of estimation and inquiry; and the persons who administered to his intemperance profited by his weakness to get into their possession pieces of very great value. Hence he was always at work, and always poor. Many of his best pictures were painted in sponging-houses, to clear him from arrest, or in alehouses, to discharge his reckoning. The pictures of this skilful artist are faithful representations of rural nature and animal life. His drawings of farmyards,

cattle, fishermen, and smugglers on the seacoast, are generally very good. B. 1763; D. 1806.

MORLEY, *mor'-le*, several parishes in England, none of them with a population above 2,000.

MORLEY, George, an English prelate, who was appointed by Charles I. canon of Christchurch, and was one of the divines who assisted him at the treaty of Newport. In 1649 he went abroad, and did not return till the Restoration, when he was made dean of Christchurch, and soon afterwards bishop of Worcester. In 1662 he was translated to Winchester, to which see he was a great benefactor. He was a munificent prelate, and bequeathed large sums to several institutions. He published some religious treatises. B. in London, 1597; D. 1684.

MORLEY, Thomas, an old English composer, of whose life little is known; but Wood, in his "Athenæ Oxoniensis," states, that he became a gentleman of the chapel royal in 1592. He composed canzonets, madrigals, anthems, and the "Funeral Service" included in Dr. Boyce's collection, which was the first attempt to set to music the words of the reformed Liturgy. He was, likewise, the author of a "Plain and Easy Introduction to Practical Music," first published in 1597, and subsequently translated into German. D. about 1604.

MORMON CITY. (*See* SALT LAKE, GREAT.)

MORMON. (*See* SMITH, Joseph.)

MORNAY, Philip de, lord of Plessis-Marlay, *mor'-nai*, a celebrated French nobleman. He was secretly educated in the Protestant faith by his mother; but upon the death of his father, in 1560, he openly avowed his religious opinions. In 1576 he went to the court of the king of Navarre, afterwards Henry IV., who made him a member of his council, confided to him the charge of the finances of his kingdom, and sent him to England to request assistance from Queen Elizabeth. During the wars of the League, he acted as superintendent-general of Navarre, and was, throughout his life, the chief of the Protestant party in France, his great learning and zeal in religious matters causing him to be regarded with deep veneration by the adherents to the Reformed faith. In 1578 he published a treatise on the Church, and, in the year following, began his work on the Truth of the Christian Religion. In 1598 he published his book on the Eucharist, which occasioned a conference between him and Cardinal Du Perron, the result of which was that Mornay obtained the appellation of the Protestant Pope. In 1607 he printed a famous book, entitled "The Mystery of Iniquity; or, the History of the Papacy." B. at Buhy, France, 1549; D. 1623.

MORNINGTON, Garret Wellesley, Earl of, *mor'-ning-ton*, an accomplished Irish nobleman, an eminent composer, and father of the greatest English general,—the duke of Wellington. At the age of 10, he played Corelli's sonatas upon the violin, which instrument gave place to the harpsichord when he had attained his 14th year. Throughout his life, the pursuit of musical composition was his unrelaxing effort; and so highly did the University of Dublin esteem his talents, that it conferred upon him the degree of doctor of music, and afterwards elected him professor of that faculty. His compositions were principally vocal in glee music he was particularly happy. The four-voiced glees, "Here in cool grot,"—"Gently hear me, charming maid," —"Come, fairest nymph," are generally acknowledged to be masterpieces of the art. By his wife Anne, daughter of Arthur, first earl of Dungannon, he had a large family. His sons were the Marquis of Wellesley, Lord Maryborough, the Duke of Wellington, Lord Cowley, and the Rev. Gerard Wellesley. B. in the county of Meath, Ireland, about 1720; D. 1781.

MORNINGTON ISLE, one of Wellesley's Islands, on the north coast of Australia. It is unexplored, and presents a mountainous appearance. *Lat.* 16° 24′ S. *Lon.* 139° 37′ E.

MORNY, Charles Augustus Louis Joseph, Count de, *mor'-ne*, a modern French statesman, and one of the most devoted adherents to the second empire. After pursuing his studies with considerable success, he was appointed sub-lieutenant of the 1st regiment of lancers, and served under the duke of Orleans in several campaigns in Algiers with much distinction. About the year 1838 he quitted the army, turned his attention to commercial speculations, and published a pamphlet on the "Sugar question." Enjoying a large fortune, he was soon enabled to place himself at the head of many important industrial enterprises, as well as to attract much notice as a projector of financial reforms. At the commencement of the revolution of 1848, he kept aloof from politics; but, on being elected to the Legislative Assembly, he rapidly proved himself to be one of the most energetic supporters of the president, Louis Napoleon, whose brother he is supposed to be. The Count de Morny was one of the few individuals of whom the president requested assistance in preparing the *coup d'état* of December, and, on that occasion, he displayed equal coolness and audacity. As minister of the Interior, he signed or countersigned most of the proclamations and decrees by which the opponents of that act were either arrested or banished. In January, 1852, he retired from office, in consequence of the decree promulgated for the confiscation of the property of the Orleans family. He subsequently placed himself in nomination as government candidate for election to the Corps Législatif. Being returned, he took his seat, and, in 1854, succeeded M. Billault as president of that body. In the years 1856-1857, he represented the imperial dynasty of France at the court of Russia, and, while acting in that capacity, he married a daughter of one of the most distinguished noblemen in that country. During the last thirteen years, the Count de Morny's name has been associated with every kind of speculation: railway companies, canals, mines, finance,—no form of commercial and industrial enterprise has been neglected by him. He is likewise a liberal patron of the arts; and his gallery of paintings is admitted to be one of the most choice in France. He has been nominated grand cross of the Legion of Honour, and has received many foreign orders. B. at Paris, 1811.

MOROCCO, or MAROCCO, *mo-rok'-o*, a country situate at the N.W. extremity of Africa, bounded on the N. by the Mediterranean, on the W. by the Atlantic, while Algeria forms a small part of its E. frontier, and on all other sides it is lost in the expanse of the Sahara, or Desert. *Area.* Estimated at nearly 300,000 square miles. *Desc.* Mountainous, but containing many fertile valleys. It is separated into two parts by the great chain of the Atlas, which entirely traverses it, first from east to west, and then from north to south, leaving between itself and the sea, a plain of from 50 to 100 miles in breadth. This plain, the length of which may form an oblique line of 400 or 500 miles, comprises all the fertile and populous part of Morocco. The other division consists of the territory beyond the Atlas, which, at first fertile in dates and wool, passes gradually into the Sahara. *Rivers.* The principal are the Mahala, flowing into the Mediterranean; the Marheya, Susa, Seba, and Tensift, falling into the Atlantic; and the Draha, beyond the Atlas. *Pro.* Wheat, maize, millet, barley, dates, grapes, olives, sugar-cane, tobacco, and cotton. Much more grain is produced than is sufficient for its own consumption. Wool is also very plentiful. Goats afford another very valuable commodity, their skins supplying that leather which, under the name of Morocco, is so distinguished for its softness, pliancy, and beauty. The grass lands feed a fine race of horses, the exportation of which is prohibited; and large numbers of sheep, oxen, and mules are reared. Camels and asses are the principal beasts of burden. Ostriches are numerous on the borders of the southern desert, and their feathers form a valuable article. Fruits abound; but Morocco is chiefly distinguished for almonds. *Minerals.* The Atlas mountains contain iron, tin, copper, and antimony. This last is carefully worked, being a substance extensively used in Oriental cosmetics. Mineral salt occurs throughout the empire in the greatest abundance; and, besides home consumption, makes a copious article of export to Soudan. *Inhabitants.* The basis of the population is formed of what are called Moors; consisting of the original people, now mixed and coalesced with their Arab conquerors, and with the tribes who have, at various times, poured in from the African deserts. To these are added a considerable number of the Moors who once reigned over Spain. The Jews are very numerous, particularly in the cities; and, by dint of exclusive qualification, carry on all the mercantile and

money transactions. Every species of oppression and contempt, however, is heaped upon this devoted race. They are considered by the Mussulmans of Morocco in the light of unclean animals and of enemies of God, and, if they do not exterminate them, it is only because they are useful, and because true believers have a right to turn everything to account. Indeed, were the Jewish population suddenly removed from the country, such an event would be a public calamity of incalculable magnitude; for it is the Jew alone who can mend a lock, build a house, make gold and silver trinkets, coin money, decorate a room, or weave silk; all such handicrafts being regarded by the Mussulman with supreme contempt. Every night the Jews are shut up in a particular quarter, inclosed with a wall, and it is only after sunrise they are allowed to enter the Mussulman town, where they have their shops. The Jewish quarter is called "Mellah," which means a place of damnation. The Jew is obliged to wear black clothes, that colour being the emblem of misfortune and malediction. When the sultan passes through a town, the Jews of the place are obliged to offer him rich and magnificent presents. Yet, with all this burden of servitude upon them, they never abjure their faith. This constancy, however, certainly commendable in itself, is coupled with the grossest ignorance and superstition. *Manf.* Woollen, cotton, and silk fabrics, carpets, red caps, leather, saddlery, chip baskets, and earthenware. The trade with the Levant is carried on by the Mecca and other caravans, whilst a coasting trade is carried on by feluccas with the Barbary states. *Exp.* Hides, skins, olive-oil, gums, wax, wool, honey, dates, indigo, shawls, and carpets. *Gov.* The most despotic on the face of the earth, without either law or religion to modify it. *Army.* During war, about 100,000; consisting mostly of negroes. *Navy.* Insignificant. *Pop.* about 9,000,000. *Lat.* between 28° and 36° N. *Lon.* between 0° 40′ and 11° 40′ W.—This is the ancient Mauritania, and was, in antiquity, a country of great importance. It has belonged successively to the Romans, Vandals, Greeks, and Arabs. In the 11th century it fell under the sway of the Fatimite caliphs, who also held power over Algeria, Tunis, and Tripoli, and pushed their victorious arms into Spain. The Cherifs, who pretended to have been the lineal descendants of Mahomet, obtained power over the country in the 16th century. This last dynasty reigns in Morocco at the present time, the sovereign being Muley-Abderrahman, who ascended the throne in 1822. The sovereign of Morocco takes the title of sultan. Since the conquest of Algeria by the French, the Moroccans have frequently come into collision with the former, at whose hands they suffered a severe defeat at Isly, in 1844. In 1859, war was declared by Spain against Morocco, which the priests desired to convert to the Catholic faith. The result was unsatisfactory.

Morocco, called by the natives Marakasch, the capital of the above empire, stands in a fertile plain 125 miles from Mogodor. The circuit of its walls still appears to be calculated for at least 300,000 inhabitants. It is now much depopulated, and covered with the accumulated ruins of houses and gardens; it still retains vestiges, however, of its former grandeur. The temples, sanctuaries, and mosques are numerous, and some of the latter particularly lofty and splendid: there are also three gardens, with splendid pavilions. The palace is of hewn stone, ornamented with marble, and with its gardens, inclosed by walls, occupies a space of three miles in circumference. The *Kusseria*, or department for trade, is an oblong building, surrounded with small shops, which are filled with every species of valuable commodity. The inhabitants are dirty, and the habitations swarm with vermin. *Manf.* Leather and embroidery. *Pop.* about 80,000. *Lat.* 30° 57′ N. *Lon.* 7° W.—This town was founded in 1072 A.D.

Moromanno, *mo-ro-man'-no*, a town of Naples, in the province of Calabria, 12 miles from Castrovillari. *Pop.* 6,000.

Moron de la Frontera, *mo'-rone dai la fron-tai'-ra*, a town of Spain, on the Guadeira, 28 miles from Seville. *Manf.* Olive-oil. *Pop.* 9,500.

Morosini, Francis, *mo-ro-se'-ne*, doge of Venice, and one of the bravest commanders of that republic. In 1667 he defended Candia against the Turks with uncommon valour, during a siege of twenty-eight months, amid the admiration of the whole of Europe. The besiegers lost 120,000 men, and the Venetians about a fourth of the number. The grand vizier endeavoured to bribe him, and offered to make him prince of Wallachia and Moldavia; but Morosini was not to be corrupted. When the place surrendered, in 1669, he was treated with great honour by the victors; but, on his return to Venice, he was arrested by order of the senate; he, however, soon recovered his liberty, and was made procurator of St. Mark. The war being renewed, he resumed the command, took several places from the Turks, and gained a great naval victory near the Dardanelles. In 1688 he was elected doge. B. at Venice, 1618; D. 1694.

Morpeth, *mor'-peth*, a neatly-built market-town and borough of Northumberland, 9 miles from the sea, on the Wansbeck, 14 miles from Newcastle-upon-Tyne. It consists principally of two spacious streets, in a north and east direction, in the centre of which is a wide square, where the market-house is placed. Its public buildings are the town-hall, the parish church, a plain Gothic building; the county gaol, an ancient schoolhouse for a free grammar-school, founded by Edward VI., and a mechanics' institute. Morpeth has a very large market, on Wednesday, for cattle. Adjoining are the ruins of the baronial castle. *Pop.* of parliamentary borough, 10,000.—This town was, in 1215, burnt down by its inhabitants, in order that it might not furnish quarters to King John.

Morpheus, *mor'-fe-us*, a minister of the god Somnus, who was wonderfully proficient in imitating the grimaces, gestures, words, and manners of mankind. He is sometimes called the god of sleep, and is generally represented as a sleeping child, of great corpulence, and with wings. He holds a vase in one hand, and in the other some poppies.

Morris, *mor'-ris*, a county of New Jersey, U.S. *Area*, 406 square miles. *Pop.* 32,000.

Morris, Louis, a Welsh antiquary and poet, who surveyed the coast of Wales in 1737, by order of the Admiralty board, and his work was published in 1748. Some of his poetical pieces in the Welsh language have been printed, and he left above 80 volumes of MSS. relative to Welsh antiquities. B. in the isle of Anglesey, 1702; D. in Cardiganshire, 1765.

Morris, Richard, brother of the above, was also a poet and critic in his native language, and superintended the printing of two valuable editions of the Welsh Bible. D. 1779.

Morris, George P., an American poet and journalist, who was, for twenty years, editor of the "New York Mirror," a journal to which some of the ablest writers in the United States contributed. He was subsequently engaged in the management of the "Home Journal," one of the most popular of the many cheap publications of that country. Mr. Morris wrote a drama entitled "Briar Cliff," which was founded upon some incidents of the American revolution; and an opera called "The Maid of Saxony." His most important literary production was, however, a collection of Poetical Pieces and Melodies: one of his songs, "Woodman, spare that tree," was at one time as popular in England as it was in America. As a poet, he was more fervid and energetic than elegant. D. at Philadelphia, 1802.

Morrison, Rev. Robert, *mor'-ri-son*, a distinguished missionary to China, who was the first to preach the Protestant doctrines in that country. He was the son of humble parents, but received a fair elementary education at a school kept by his uncle at Newcastle. Between the years 1799 and 1801 he studied Hebrew, Latin, and theology, with the assistance of a Presbyterian minister of the town. The same gentleman, in 1803, furnished him with an introduction to the committee of the Independent Theological Academy in London, and he was accordingly received into their institution. In the following year he offered his services to the London Missionary Society, which being accepted, he removed to the college of that body at Gosport. At the beginning of 1807, after having studied Chinese, he set sail for China, and, in the same year, arrived at Canton. During twenty-five years he remained in China, engaged in translating and disseminating the Holy Scriptures: he translated the whole of the Bible, after eight years of unremitting labour; in this task he

was assisted by Dr. Milne. In 1824 he visited England, and presented to George IV. a copy of the Scriptures in Chinese. Two years afterwards, he returned to the field of his labours, and continued his noble exertions until his death. Dr. Milne, his fellow-worker, wrote of Dr. Morrison, "that his talents were rather of the solid than the showy kind, fitted more for continued labour than to astonish by sudden bursts of genius; and his well-known caution fitted him for a station where one false step, at the beginning, might have delayed the work for ages." Dr. Morrison and his co-adjutors printed and circulated, between the years 1810—1836, upwards of 750,000 copies of works in the Chinese character. In this number were included 2,075 complete Bibles, 9,970 New Testaments, and 31,000 shorter portions of the Scriptures. B. at Morpeth, Northumberland, 1782; D. at Canton, 1834.

MORRISTOWN, *mor'-ris-toun*, several townships in the United States, none of them with a population above 5,000.

MORS, *mors*, the largest island of the Lymfiord gulf, in the north of Jutland. *Ext.* 24 miles long, by 12 broad. *Desc.* Level, and fertile where it is cultivated, but about a third of it is covered by marshes. *Pop.* 6,000. *Lat.* 56° 40′ N. *Lon.* 9° E.

MORS, one of the infernal deities, born of Night, without a father. She was worshipped by the ancients with great solemnity, and represented not as an actually existing power, but as an imaginary being. The moderns represent her as a skeleton, armed with a scythe and a scimitar.

MORSE, Samuel Finley Breese, *morss*, a scientific American, celebrated as the inventor of the United States system of telegraphs. In 1811 he went to England, and entered of the Royal Academy of Arts, where he, two years afterwards, gained a prize for a sculpture model. He subsequently returned to America, and pursued his profession with considerable success. It was while on board ship, in 1822, returning to America after a second visit to England, that the idea of his great invention first occurred to his mind. He remembered the experiments of Franklin with a wire four miles in length, and he imagined "that if the presence of electricity could be made visible in any part of this circuit, it would not be difficult to construct a system of signs by which intelligence could be instantaneously transmitted." Almost immediately after his landing in America, he commenced a series of experiments; but, having little time to give to the subject, it was not until four years afterwards that he succeeded in demonstrating his theory upon a wire half a mile in length. Congress at once voted him 30,000 dollars to enable him to carry out his views; and, in 1844, he saw the realization of his hopes, in the perfect working of a wire 40 miles long, which had been constructed between Washington and Baltimore. Mr. Morse's invention is the simplest of all the electric telegraphs; it requires only a single wire, and is self-recording, or self-printing. The alphabet is formed of a combination of short strokes and dots, marked by a steel pricker upon a sheet of paper, uncoiled beneath it by clock-work mechanism. More than three-fourths of the telegraphic wires in the United States are worked according to this great invention, the proceeds of which have given Mr. Morse a well-earned affluence. The New York and Newfoundland Telegraphic Company nominated him their electrician, and he was also appointed professor of natural history at Yale College. In 1856 he visited England, and was entertained at a public dinner by the directors of several telegraphic companies. B. at Charlestown, Massachusetts, 1791.

MNEMOSYNE, *mne-mos'-i-ne*, a daughter of Cœlus and Terra, mother of the nine Muses, by Jupiter. The word Mnemosyne signifies 'memory;' and therefore the poets have rightly called Memory the mother of the Muses, because it is to it that mankind are indebted for their progress in science.

MORTAGNE, *mor-tain'*, a town of France, in the department of Orne, 20 miles from Alençon. *Manf.* Linen, thread, and leather. *Pop.* 5,000.—There are several more towns of the same name in France, but none of them with a population above 1,700.

MORTARA, *mor-ta'-ra*, a town of Sardinia, Piedmont, 24 miles from Alessandria. In its neighbourhood the miasma has caused it to be nearly deserted. *Pop.* 5,500.

MORTEFONTAINE, *mort-fon'-tain*, a village of France, in the department of the Oise, in the castle of which peace between France and the United States was signed in 1800.

MORTIER, Marshal. (*See* TREVISO, Duke of.)

MORTIMER, John Hamilton, *mor'-ti-mer*, an English painter. He received his first instructions from his uncle, who was an itinerant portrait-painter; but afterwards he became a pupil of Hudson, who had been the teacher of Sir Joshua Reynolds. Mortimer obtained one of the first prizes for an historical picture from the Society for the Encouragement of Arts: his subject was the Conversion of the Britons. In 1779 he was appointed by his majesty a Royal Academician, without any solicitation; but his intemperate habits caused his demise shortly afterwards. B. at Eastbourne, Sussex, 1741; D. 1779.

MORTIMER, Roger, Earl, a powerful English baron, who, during fourteen years, was one of the most zealous adherents of Edward II., who nominated him his lieutenant in Ireland; but he united himself, in 1320, with the insurgent barons, who raised the standard of revolt against the king on account of his favourites the Spencers. (*See* EDWARD II.) Mortimer was taken, and imprisoned in the Tower of London, but contrived to escape to France. Subsequently, he, with Queen Isabella, wife of Edward II., made a descent upon England with a small force, which was increased by large numbers of the English people who joined his standard. The king was taken prisoner, and afterwards assassinated in prison; his son, Edward III., being placed upon the throne, in his 14th year. During some time, Mortimer exercised absolute power in the name of the young monarch, and put to death Kent and Lancaster, the king's uncles. Edward III. at length resolved to get rid of the cruel baron, who was arrested, and hanged near Smithfield, in 1330. B. about 1287.

MORTIMER, Edmund, Earl, espoused Philippine, daughter of Lionel, second son of Edward III.—ROGER, son of the preceding, was declared heir to the crown in 1385, but died in 1399, leaving an only daughter, who married Richard of York, giving to that family a claim to the throne of England. Hence arose the wars of the Red and White Roses, between the houses of York and Lancaster.

MORTIMER'S CROSS, a town of Herefordshire, 6 miles from Leominster, where there is a pillar commemorating the victory of 1461.

MORTLACH, *mort'-lak*, a parish of Scotland, 30 miles from Banff. Its parish church was formerly a cathedral, built in the 11th century. *Pop.* 3,000.—In this parish the Danes, in the 11th century, were defeated by Malcolm II.

MORTLAKE, *mort'-laik*, a parish of Surrey, on the Thames, 8 miles from London. *Pop.* 3,200. It has a station on the London and Richmond Railway.

MORTON, *mor'-ton*, the name of numerous parishes in England, none of them with a population above 2,000.

MORTON, James, fourth earl of, regent of Scotland. He received his education under the famous Buchanan, at Paris, but returned to Scotland in 1554, and greatly promoted the Reformation. In 1563 he became lord high chancellor: in a few years, however, he was compelled to relinquish the office and fly to England, for the part he took in Rizzio's murder. After a few months, Bothwell succeeded in obtaining his pardon from Queen Mary; whereupon he returned to Scotland. He soon began to take a prominent part in affairs, and, in 1572, succeeded the earl of Mar as regent, which office he resigned in 1577, his rule having made him odious to the whole nation. The government was then confided to James VI., who had attained his 12th year. Morton, however, was too ambitious to remain in retirement, and contrived to get possession of Stirling Castle, and also to obtain the charge of the young king. His former power had thus been secured by him; but it was only of short duration, for, being charged as accessory to the murder of Darnley, he was sent to the castle of Edinburgh, and afterwards to Dumbarton, then under the command of Lennox, father of Darnley. In 1581 he was taken to Edinburgh for trial, at which he vehemently protested his innocence of the crime with which he was charged. He was con-

demned to death; but, although he admitted that he had been made acquainted by Bothwell with a design for murdering Darnley, he did not participate in the plot. As to making known the plot, "to whom," he said, "could I reveal it? To the queen?—she was aware of it. To Darnley?—he was such a babe, that there was nothing told to him but he would reveal to her again; and the two most powerful noblemen in the kingdom, Bothwell and Huntley, were the perpetrators. I foreknew, and concealed the plot; but as to being art and part in its execution, I call God to witness I am wholly innocent." He suffered death with the utmost fortitude, being beheaded by a machine much resembling the guillotine, and called the "maiden." D. at Dalkeith, 1530; beheaded, 1581.

MORTON, John, an English prelate and statesman, who was educated at Oxford, after which he became so eminent for his skill in jurisprudence as to be appointed privy councillor to Henry VI. In 1478 he was made bishop of Ely and chancellor of England by Edward IV. During the reign of Richard III. he remained out of England, but upon the accession of Henry VII. to the throne, he was nominated one of the privy council, and, in 1486, obtained the archbishopric of Canterbury. Pope Alexander VI. created him cardinal in 1493. Sir Thomas More, who was in his youth a page in Morton's household, is stated to have derived the facts of his "History of Richard III." from the cardinal archbishop. Morton was a man of the greatest ability and probity. B. at Bere, Dorsetshire, 1410; D. 1500.

MORTON, James Douglas, Earl of, a distinguished Scotch nobleman, who, at the age of 26, established a philosophical society at Edinburgh,—a society which has since made a considerable figure in almost every branch of knowledge. The Royal Society of London elected him their president in 1733, and, by the death of the earl of Macclesfield, he was chosen an associate in the Academy of Sciences at Paris. He evinced an ardent zeal for the sciences, and was an eminent patron of merit. He was well acquainted with natural and experimental philosophy, but more particularly devoted to astronomical observations. B. at Edinburgh, 1707; D. 1768.

MORTON, Thomas, an English dramatic writer, who was educated for the legal profession, but whose natural bent was for the drama. Abandoning his studies before he had been called to the bar, he gave himself entirely to play-writing, and became the most popular dramatist of his day. For his comedy of "Town and Country" he received the sum of £1,000 before the piece was placed in rehearsal. His works are, however, but poor productions to read, when it is remembered how great was their popularity: they are theatrical, unnatural, and scarcely ever genuinely humorous or witty; but they are never dull, and are constructed with admirable dramatic tact. A few of them still keep their place on the stage, such as "Speed the Plough," "A Roland for an Oliver," "The Invincibles," "A Cure for the Heartache," "The School of Reform," &c. B. in the county of Durham, 1764; D. in London, 1838.

MORUMBIDGEE, *mo'-rum-bid-je'*, a river of Australia, rising, by many heads, in the county of Murray, N. S. Wales, and, after a course of 1,000 miles, joining the river Murray in *lat.* 34° 48′ S., and *lon.* 143° E.

MORVEN, *mor'-ven*, a parish of Scotland, forming a peninsula on the coast of Argyleshire. It abounds with game, and yields good pasture, though mostly mountainous.—Also the name of two mountains in Scotland, one in Aberdeenshire, 2,700 feet; the other in Caithness-shire, 3,000 feet above the level of the sea.

MOSCHOPULUS, Manuel, *mos'-ko-pu'-lus*, a Greek grammarian of the 13th century. He was a native of Crete, and wrote several treatises on grammar. His nephew Manuel was a good mathematician and antiquary. He composed a Greek lexicon, 1545.

MOSCHUS and BION, *mos'-kus bi'-on*, two Greek pastoral poets of antiquity, who were contemporaries, and whose works are usually printed together in the Poetæ Minores. They lived, probably, in the 3rd century B.C.

MOSCOW, *mos'-ko* (Russ. MOSKWA, *mosk-wa'*), a government of European Russia, surrounded by the governments of Tver, Vladimir, Riasan, Tula, Kaluga, and Smolensk. *Area*, 12,300 square miles. *Desc.* A plain, interspersed here and there with hills. Its fertility is considerable, and large numbers of cattle and horses are reared. *Manf.* Extensive; woollen, cotton, and silken fabrics, carpets, paper, gold and silver wares, are the principal. *Pop.* 1,400,000. *Lat.* between 54° 50′ and 56° 40′ N. *Lon.* between 34° 50′ and 38° 50′ E.

MOSCOW, a city of European Russia, long the seat of the Russian government, and still the capital of the interior of that empire, on the river Moskwa, 398 miles from St. Petersburg. It is of a circular, or rather oval form, having its length from N. to S., and its breadth from E. to W. It covers a large area, the streets, courts, squares, and gardens being spacious. The river flows from W. to E., and traverses the city with a very serpentine course, receiving towards the middle of the town a rivulet, called the Neglina, and, soon after, the Jausa, a stream of more consequence. The city consists of four successive divisions, each surrounding the other, and each increasing in circuit, in proportion to its distance from the centre. 1. The central part is that which contains the Kremlin and the Kitaigorod, or mercantile quarter. 2. The Bielogorod, or White Town, extending around the central part like a half-moon. 3. The Semliano-gorod, or Earthen town, much more extensive than either of the preceding, and surrounding them both in a circular form. 4. The Slobodes, or suburbs, which surround the whole, and occupy a great extent of ground. The Kremlin stands on a height, and commands a pleasant prospect over almost the whole city. The Moskwa flows past it, and is crossed by two bridges. Here is the ancient palace of the czars, which escaped the great conflagration of 1812, but was much damaged by mines, sprung by the last French detachment, on their leaving Moscow. It is now, however, rebuilt, with improvements. Here also is the church of St. Michael, containing the tombs of the ancient czars, and the church of the Annunciation, in which the emperors are re-crowned. The Kremlin, though of limited extent, contains several other churches and monasteries, which strike the eye of the distant spectator by their gilded cupolas. The Kitaigorod, or Chinese town, contains a number of bazars and shops. Though of small extent, like the Kremlin, the Kitaigorod contains several public buildings; among others, a strong brick edifice for the public archives, consisting of vaulted apartments, with iron floors. Here also is the university, founded in the middle of the 18th century. A considerable part of this quarter escaped the great conflagration. The Semliano-gorod has also wide streets, and contains, from its magnitude, a large proportion of the population of Moscow. The Slobodes, or suburbs, are mean, and look like so many detached villages, with the exception of one called the Nemetska Sloboda, or German suburb, which is extensive, and is inhabited by a number of foreign mechanics. In 1812, nearly three-fourths of the city were consumed by the great fire, ordered by the Russian government, to prevent the French army from occupying it as their winter quarters. The rebuilding of the city was immediately commenced after the enemy withdrew; but for some time it went on slowly. No sooner, however, was peace concluded, than the greatest exertions were made to this effect, both by the government and individuals; and, by the beginning of 1818, a new city seemed to have risen from the ruins. The new city has wider streets, and greater uniformity in its private buildings; but, in its churches and public edifices, the Asiatic taste is still preserved, though the style of architecture is more simple. The streets are paved partly with stone, partly, as in other Russian towns, with trunks of trees. The university has been rebuilt in a magnificent form, by aid from the public treasury. Of the new buildings, one of the most remarkable is a vast hall, erected near the Kremlin, and more than twice the size of Westminster Hall. Among other public buildings is the general post-office for the interior of Russia; also a foundling hospital, which was splendidly endowed by Catherine II., and which maintains and educates a great number of children. Here also are military hospitals. The Kremlin was completely repaired in 1817, and enlarged by a long lateral building, where the suite of the court are lodged: its ramparts are replaced by beautiful alleys. It is the great depôt of the antiquities and curiosities of Moscow. Moscow

is the seat of an archbishop, whose palace is in the Kremlin, and contains the regalia of the empire, with the relics of the patriarchs of Russia; in particular, the splendid robes worn by them in ancient days; likewise a number of precious stones, with others of more doubtful value. The French carried away the celebrated cross of St. Ivan, which they abandoned after they had got beyond Wilna. The churches and chapels are numerous. Among these may be named that of Ivan Veliki, with a belfry 269 feet high. The great bell of Moscow, long buried in the soil, was, in 1836, raised and placed on a pedestal. The most splendid church is that of the Annunciation, in which the remains of the Russian patriarchs are deposited. Here is an immense chandelier of massy silver, weighing nearly 3,000 lbs. The tombs of the czars are in the church of St. Michael, which, like that of the Annunciation, is in the Kremlin. Moscow has a medical and an agricultural society, but few schools of eminence. Of the public libraries, the most remarkable is that of the Synod: it is in the Kremlin, and contains some Greek manuscripts brought from the monasteries of Mount Athos. The climate is subject to great extremes, the thermometer frequently falling to 0° of Fahrenheit, and even 10° or 15° below it; while in summer, it rises to 85°, 90°, and even 95°. *Manf.* Cotton, silk, and linen fabrics, paper, leather, sugar, and steam machinery. It is the grand entrepôt for the interior of the empire. Furs and skins form a very important branch of commerce, as well for domestic use as for export to remote countries in Asia. The Moskwa is navigable in spring for barks; in the rest of the year for rafts only. *Pop.* about 400,000. *Lat.* 55° 45′ N. *Lon.* 37° 37′ E.—Moscow is not of great antiquity, having been founded in the middle of the 12th century, previous to which Kiov, or Kiev, was the residence of the sovereigns of Russia. In 1611 it was taken by the Poles. In 1703, Peter the Great transferred his residence to St. Petersburg, and, in 1812, it was occupied by the French. After the battle of Borodino, it was set on fire, when the French were forced to make their disastrous retreat.

Mosr, *mose*, an island of the Asiatic archipelago, 20 miles in circumference. *Lat.* 6° 20′ S. *Lon.* 131° 30′ E.

Moselle, *mo-sel′*, a department of France, including part of Lorraine, and bounded partly by the southern frontier of the Netherlands, and partly by the French departments of the Meurthe and the Meuse. *Area*, 2,390 square miles. *Desc.* Partly covered with offshoots of the Vosges and Ardennes mountains. *Rivers.* The Moselle, the Sarre, the Seille, the Nied, and the Orne. *Pro.* The usual cereals, with large quantities of excellent timber for building purposes. *Minerals.* Iron, coal, lime, and salt. *Manf.* Paper, cloth, and iron and steel goods. *Pop.* 460,000.

Moselle, a large river of Europe, rising in the S.E. department of the Vosges, and, after a course of 265 miles, joining the Rhine at Coblentz.

Moser, George Michael, *mo′-ser*, a gold-chaser and painter on enamel, who went from Switzerland to London at an early age, became celebrated for his artistic productions, and painted on a watch-case, for George III., portraits of the prince of Wales and the bishop of Osnaburg. He was appointed keeper of the Royal Academy of Arts, being the first that held the office. Sir Joshua Reynolds states that he was unrivalled as a gold-chaser, and that his knowledge in every branch of painting and sculpture was universal. B. in Switzerland, 1704; D. 1783.—His daughter Mary was a distinguished flower-painter, and was elected R.A. D. 1819.

Moses, *mo′-ses*, the celebrated Jewish lawgiver, was the son of Amram and Jochabed, and was of the tribe of Levi. He was born in Egypt; and Pharaoh having decreed that all the male children of the Hebrews should be put to death, he was placed by his mother in an ark of rushes upon the banks of the Nile. There he was found by Pharaoh's daughter, who gave him to his own mother to nurse, and afterwards brought him up at the Egyptian court, where he "became learned in all the wisdom of the Egyptians." After he had attained his 40th year, he slew an Egyptian who was maltreating an Israelite; whereupon he fled from the country, and sought a refuge among the Midianites, with whom he dwelt as a shepherd during 40 years, and married the daughter of their priest Jethro. Whilst feeding his father-in-law's flocks, God appeared to him in a burning bush, and commanded him to return to Egypt, and conduct thence his people into the land of Canaan, the power of working miracles being conferred upon him. Pharaoh would not consent to the departure of the Israelites until Moses had brought ten miraculous plagues upon the land. He then conducted his people through the Red Sea, which was miraculously divided to allow of their passage. Pharaoh and all his host, who had come in pursuit, were drowned. Moses then led his people into the wilderness, where they were fed by manna; and while the Hebrews were encamped at the foot of Mount Sinai, he received from God the law, which he delivered to them. After he had led his people through the wilderness during forty years, Moses was permitted to behold the land of Canaan from the summit of Mount Pisgah, where he died, at the age of 120 years. Moses was the author of the Pentateuch, or five first books of the Old Testament,—Genesis, Exodus, Leviticus, Numbers, and Deuteronomy, which contain the sacred history from the creation of the world to the entrance of the Hebrews into the Promised Land.

Moses, Micosti, a Spanish rabbi of the 14th century, who published, at Venice, a folio volume entitled "The Great Book of Precepts," which is explanatory of the Hebrew laws.

Moshaisk. (*See* Mojaisk.)

Mosheim, John Lawrence von, *mos′-hime*, a learned German divine and historian, who became professor of divinity at Helmstedt, and was afterwards chancellor of the university of Gottingen. He translated Cudworth's "Intellectual System of the Universe" into Latin, with learned notes; but his greatest work is the "Ecclesiastical History," written in Latin, of which the best English translation is that of Dr. Murdoch, published in the United States, 1832, and enriched by valuable annotations. Mosheim also wrote, among many other works, nine volumes on "The Morals of Holy Scripture." B. at Lübeck, 1694; D. 1755.

Moskva, or Moskwa, *mosk-wa′*, a river of Russia, traversing the government of Moscow, and, after a course of 200 miles, falling into the Oka, at Colomna.

Mosquito Shore, *mos-ke′-to*, a maritime state of Central America, lying along part of the northern and eastern shore of Honduras. *Desc.* Mountainous in the interior, but elsewhere fertile and well watered. *Pro.* Sugar, cacao, indigo, cotton, logwood, and vanilla. *Gov.* A monarchy under the protection of Britain, and principally administered by British residents. *Pop.* Unascertained. *Lat.* between 10° 40′ and 16° N. *Lon.* between 83° 15′ and 85° 50′ W.—The English held this country for 80 years, and abandoned it in 1787 and 1788, though many English settlers still remain. In 1848 the Nicaraguens attacked the Mosquito subjects in San Juan; but they were defeated by a British force, and, in 1848, forced to retire from the territory by means of a treaty with the British.

Mostar, *mos-tar′*, an inland town of European Turkey, in Bosnia, on the Narenta, 60 miles from Ragusa. It has an old Roman bridge, consisting of a single arch, with a span of 95 feet. *Exp.* Hides, wool, fruit, wax, and cattle. *Pop.* 8,000.

Mostyn, *mos′-tin*, a township of N. Wales, in Flintshire, 5 miles from Holywell. *Pop.* 2,000.—It has a station on the Chester and Holyhead Railway, and has communication with Liverpool by steam-packets.

Mosul, *mo′-sul*, a large town of Asiatic Turkey, in the pashalic of Mosul, on the Tigris, 250 miles from Bagdad. Its principal ornaments are a college, the tomb of Sheik Abdul Kassin, and the remains of a beautiful mosque, the minaret of which has a fine appearance from a distance. The coffee-houses, baths, khans, and bazars, are also handsome buildings. The city has a stone wall and seven gates, also a castle, all in a declining state. *Manf.* Cotton cloths. *Pop.* 40,000.—The Pashalic has a mountainous surface, and is watered by the Tigris and its affluents. *Pop.* Unascertained. *Lat.* between 35° 30′ and 38° N. *Lon.* from 42° E. to the confines of Persia.

Mothe, *mote*, the names of several parishes and towns in France, none of them with a population above 2,000.

Mothe le Vayer, Francis de la, *le(r)-vai′-yai*, his-

tor-ographer of France during the reign of Louis XIV. He also completed the education of that monarch. He was one of the first members of the French Academy, and obtained several advantageous posts. His works were collected and published at Dresden in 1759. B. at Paris, 1588; D. 1672.

MOTIER-TRAVERS, *mo'-te-ai tra'-vair*, a village of Switzerland, 16 miles from Neufchâtel, celebrated as the place where Rousseau wrote his "Lettres de la Montagne."

MOTLEY, John Lothrop, *mot'-le*, a modern American historian, whose family emigrated to New England about the middle of the last century. His Christian names are derived from a maternal ancestor, the Rev. John Lothrop, who was one of the Pilgrim Fathers, and settled in Massachusetts in 1634. The future historian was sent to Harvard University in 1827, at which time he had attained his 13th year. Leaving that establishment four years afterwards, he spent two or three years at the universities of Gottingen and Berlin. A course of continental travel, which embraced Germany, France, Italy, Switzerland, and England, succeeded. During the years 1841-2, he acted as secretary of the American legation at St. Petersburg; after his return to his native country, he devoted himself to study and to literary pursuits, the fruits of which were a number of articles contributed to the "North American Review," and other periodicals. He likewise produced some works of fiction. Conceiving the idea of composing a history of the great struggle in which the provinces of the Netherlands threw off the Spanish yoke, he again visited Europe, settled with his family at Dresden, in the first instance, and subsequently resided, during three or four years, in Germany and the Netherlands. The first instalment of this great undertaking was given to the world in 1856, under the title of "The Rise of the Dutch Republic, a History." This work was brought out simultaneously in London and New York. It passed through several editions, both in England and America, and was reproduced at Amsterdam and at Leipzig. M. Guizot translated it into the French language; and there was, besides, a French version of it published in Brussels. A German and a Dutch translation were also made. In England, the book has attained a large circulation in the cheapest form (*4s. 6d.*) in which it has been given to the public, viz., as one of the series entitled "Beeton's Historian." This edition has been extensively used in the schools of Holland as one of the standard "reading books" for the acquisition of the English language. The first half of the second portion of this work was published in London at the close of the year 1860, and, like its predecessor, attracted to itself a very widespread popularity. The title of this last is "History of the United Netherlands," and embraces a period beginning with the death of William the Silent and ending with the murder of Henry III. of France. The history, terminating with the Synod of Dort, will occupy four volumes, upon the two last of which the author is at present engaged in London. As a writer, Mr. Motley is clear, forcible, and picturesque, and belongs to the Carlyle, rather than to the Hume school of historians. B. at Dorchester, Massachusetts, 1814.

MOTTE, Antoine Houdar de la. (*See* LAMOTTE.)

MOTTEUX, Peter Anthony, *mot-te(r)'*, a French writer. On the revocation of the edict of Nantes, he visited England, became a merchant, and was afterwards employed in the Post-office. He was a perfect master of the English language, and assisted in translating "Don Quixote" into English. B. at Rohan, Normandy, 1660; D. in London, 1718.

MOTTEVILLE, Frances Bertaut de, *mot'-veel*, a French lady, who was attendant on Anne of Austria, whose Memoirs she wrote. Her work is valuable for its information relative to the private life of the queen, and for its anecdotes of the Fronde. B. in Normandy, about 1621; D. 1689.

MOTTRAM-IN-LONGDEN-DALE, *mot'-tram long'-en-dail*, a parish of Cheshire, 10 miles from Manchester. *Pop.* 24,000. It has a station on the Sheffield and Manchester Railway.

MOULIN, Charles du, *moo'-lã*, an eminent French writer on jurisprudence, who, on account of an impediment in his speech, quitted the bar, and applied to the composition of several legal works, which procured him the title of the Papinian of France. Being a Protestant, the people of Paris pillaged his house in 1563; on which he went to Basle, whence he removed to several other places. On his return to Paris, in 1564, he was thrown into prison for some reflections made by him on the council of Trent. At the solicitation of the queen of Navarre, he obtained his liberty. He subsequently embraced the Roman Catholic faith. B. at Paris, 1500; D. 1566.

MOULIN, Peter du, a French Protestant divine, who, after studying at Leyden, became minister at Charenton. In 1615 he visited England, and James I. gave him a prebend in the cathedral of Canterbury. He afterwards went to Sedan, where he was appointed professor of divinity, and was regarded as the chief minister of the Protestant faith in France. Among other works, he composed the "Anatomy of Arminianism," in Latin; "Treatise on the Keys of the Church;" "The Capuchin, or the History of the Monks;" "The Novelty of Popery;" and "A Defence of the Reformed Churches." B. at Buhy, France, 1568; D. at Sedan, 1658.

MOULIN, Peter du, son of the preceding, was chaplain to Charles II., and prebendary of Canterbury. He wrote a "Defence of the Protestant Religion," and several other theological works. B. in France, 1600; D. at Canterbury, 1684.

MOULIN, Louis du, brother of the preceding, became a violent Independent, and wrote several works against the established Church of England. B. 1603; D. 1680.

MOULINS, a town of France, in the department of the Allier, on the Allier, over which is a bridge of 13 arches, 100 miles from Lyons. The streets are tolerably broad, and well paved, but the houses are built of brick, and are far from elegant. The public edifices are a town-hall, national college, hospitals, picture-gallery, public baths, a small theatre, a library, and several promenades. It is a bishop's see, and is the seat of a tribunal of commerce. *Manf.* Silk, woollen, and cotton goods, cutlery, and glass; and it has a trade in corn, wine, timber, and live stock. *Pop.* 18,000. It is the birthplace of the duke of Berwick, natural son of James II.

MOULMEIN, *mool'-mine*, a town of British India, 30 miles from Amherst. *Pop.* 18,000.

MOULTAN. (*See* MOOLTAN.)

MOULTON, *mole'-ton*, the name of several parishes in England, none of them with a population above 2,000.

MOUNT EDGECUMBE, *mount ej'-kum*, a mountain of New Zealand. *Height*, 10,000 feet. *Lat.* 38° S. *Lon.* 177° E.

MOUNTS BAY, an extensive inlet of the Atlantic Ocean, near Penzance, Cornwall. In it is St. Michael's Mount.

MOUNT PLEASANT, the name of several townships in the United States, none of them with a population above 7,500.

MOUNT SORRELL, a market-town of Leicestershire, on the Soar, 7 miles from Leicester. *Pop.* 2,000. It has a station on a branch of the Midland Counties Railway.

MOUSSOUL. (*See* MOSUL.)

MOWEE, or MAUI, *mow'-e*, one of the Sandwich Islands, in the Pacific Ocean, 20 miles from Hawaii. *Area*, 620 square miles. *Desc.* Rugged and mountainous, but fertile where cultivated. *Pro.* Wheat, sugar-cane, and fine fruit. *Pop.* 25,000.

MOXOS, *mox'-os*, a subdivision of Bolivia, in its N. part watered by the Beni, Mamon, and their affluents. It is highly productive, but little known, being peopled mostly by roving Indians. *Lat.* between 12° and 18° S. *Lon.* between 61° and 69° W.

MOY, *moi*, a river of Ireland, rising in the county of Sligo, and, after a course of 40 miles, falling into Killala Bay, 2 miles from Killala.

MOYSE, Henry, *moise*, a Scotch gentleman, who was page to King James I., and one of the gentlemen of his privy-chamber. He wrote a diary of what passed at court in his time, which was printed in 1753. B. 1573; D. 1630.

MOZAMBIQUE, *mo-zam-beek'*, the principal possession of the Portuguese settlements in Africa. Its limits inland are very uncertainly defined, but along the E. coast it extends from Cape Dalgado to Delagua Bay.

*Area*, estimated at 60,000 square miles. *Desc.* Level near the coast, but mountainous in the interior. *Rivers.* The principal is the Zambesi. *Pro.* Wheat, maize, rice, manioc, sugar, indigo, coffee, ivory, hides, and horns. *Pop.* 231,000.

MOZAMBIQUE, the capital of the Portuguese possessions in Africa, and of an island of the same name on the E. coast. It is large and well fortified, having a strong citadel to defend the harbour. It belongs to the Portuguese, who have generally a good garrison here, and trade with the natives for gold, elephants' teeth, and slaves. They have built several churches and monasteries, and a large hospital for sick sailors. Their ships always call here in going to the East Indies, and the harbour is so commodious that whole fleets may anchor, and provide themselves with all necessaries. The island is about 2 miles long, and is of coral formation. *Lat.* 15° 5′ S. *Lon.* 40° 10′ E.

MOZAMBIQUE, a strait or channel of the Indian Ocean, between the E. coast of Africa and the island of Madagascar. It is narrowest in the middle, where it is 240 miles over, and has a length of about 1,000 miles. In this part, on the coast of Zanguebar, is the kingdom, island, and town of the same name.

MOZART, *mo-zart'*, Wolfgang Gottlieb, a celebrated German musical composer. He received his first instructions in music from his father, who was sub-director of the chapel at Salzburg; and his proficiency was so great, that when a child of six years, he played before the emperor Francis I., who called him "the little sorcerer." In the following year the youthful prodigy went with his father upon a European tour. They visited Paris, where the child played upon the organ before the whole French court: there he also gave concerts, and published his two first works, before he

MOZART.

had completed his eighth year. In 1764 he went to London, where he exhibited his talents before the royal family, and passed through the ordeal in a most triumphant manner. So much interest did he excite in England, that the Hon. Daines Barrington wrote a description of his extraordinary performances, which was read before, and published in the Transactions of the Royal Society. Dr. Burney wrote of him,—"Of Mozart's infant attempts at music, I was unable to discover the traces from the conversation of his father, who, though an intelligent man, whose education and knowledge of the world did not seem confined to music, confessed himself unable to describe the progressive improvements of his son during the first stages of infancy. However, at eight years of age, I was frequently convinced of his great knowledge in composition by his writings, and that his invention, taste, modulation, and execution in extemporary playing, were such as few professors are possessed of at forty years of age." Before leaving London, in 1765, Mozart composed, and dedicated to the queen, six sonatas. After visiting the Hague, and going a second time to Paris, Mozart and his father returned to Salzburg in 1768, in which year he wrote a complete opera, by desire of the emperor Joseph II. At 14, he became director of the archbishop of Salzburg's concerts. He shortly afterwards visited Rome, where the pope bestowed upon him the order of the Golden Spur. In 1779 he took up his residence in Vienna, and, in the following year, was captivated by the charms of Mdlle. Constance Weber, an amiable lady and celebrated singer. He made a proposal of marriage to her, which was declined by the family of the lady, on the ground that his reputation was not sufficiently established. Upon this, Mozart composed his "Idomeneo," and to Mdlle. Weber was assigned the principal part in the opera. It was received with enthusiasm, and the hand of the lady upon whom his affections were fixed rewarded the composer's efforts. In 1786 he produced his famous "Nozze di Figaro," and, in the following year, his *chef-d'œuvre*,—"Don Giovanni," which latter was coldly received by the Viennese; Mozart declared, however, that he had written the opera to please himself and his friends. "Die Zauberflöte" (the magic flute) was given to the world in 1791, and, in the same year, "La Clemenza di Tito" was first sung, during the coronation festival of Leopold II. Considerable space would be required for the bare enumeration of this great musician's masses, vocal pieces, symphonies, quintets, quartets, &c. His sublime "Requiem" was written on his deathbed. Nature, so bountiful of her intellectual gifts, had denied to Mozart physical strength: he was small and weak in body, and with a delicate constitution. "It has been said of Mozart," writes one of his biographers, "that his knowledge was bounded by his art, and that, detached from this, he was little better than a nonentity; but his acquirements were far greater than is generally supposed; in proof of which we have the best authority for saying, that once, at a court masquerade given at Vienna, Mozart appeared as a physician, and wrote prescriptions in Latin, French, Italian, and German. Assuming this to be true, he could not have been a very ignorant man, nor always a dull one, out of his profession: but still stronger evidence in favour of his understanding may be derived from his works. That he who in his operas adapted his music with such felicity to the different persons of the drama,—who represented the passions so accurately,—who coloured so faithfully,—whose music is so expressive that, without the aid of words, it is almost sufficient to render the scene intelligible;—that such a man should not have been endowed with a high order of intellect, is hard to be believed; but that his understanding should have been below mediocrity, is incredible." B. at Salzburg, 1756; D. at Vienna, 1792.

MOZDOK, *moz'-dok*, a town and fortress of S. Russia, in the government of the Caucasus, 170 miles from Slavropol. It is built of wood, and inclosed by gardens. *Pop.* 8,000.

MOZUFFURNUGGUR, *mo'-zuf-fur-nug-gur'*, a district of British India, in the N.W. Provinces. *Area*, 1,620 square miles. *Pop.* 540,000. *Lat.* between 29° 10′ and 29° 50′ N. *Lon.* between 77° 6′ and 78° 10′ E.

MUDGE, John, *mudj*, an English physician, and an excellent mechanic, who wrote a treatise on the Catarrhous Cough, and improved the construction of reflecting telescopes. D. 1793.

MUDGE, Thomas, brother of the preceding, was an excellent watchmaker, and one of the best mechanicians of his day. He made great improvements in chronometers, and received a grant of £3,000 from the government for his services. In 1789 he gave an account of his labours in a work entitled, "Description, with Plates, of the Time-keeper invented by Mr. Thomas Mudge." B. at Exeter, 1716; D. 1794.

MUGGLETON, Ludowicke, *mug'-gel-ton*, an English tailor and fanatic, of the 17th century, who wrote several books full of absurdity and blasphemy, which were burnt by the hangman, and the author pilloried. He nevertheless obtained some followers, and founded the sect termed Muggletonians. This sect is not quite extinct at the present day. D. 1697.

MUHALITCH, *mu'-ha-litch*, a town of Anatolia, Asia Minor, 38 miles from Brousa. It exports silk, wool, and fruits. *Pop.* 11,000.

MUHLENBACH, or SZASZ-SEBES, *moo'-len-bak*, a town of Transylvania, on the Muhlbach, 30 miles from Hermannstadt. *Manf.* Woollen cloths; and there are breweries. *Pop.* 4,500.

MUHLHAUSEN, *mool-how'-sen*, a walled town of Prussian Saxony, 30 miles from Erfurt. It has several churches and hospitals. *Manf.* Woollen and linen cloths; and there are several breweries, distilleries, dye-works, and fulling-mills. *Pop.* 14,000.—The name of several other small towns.

MULAIR KOTELAH, *mu-lair ko'-te-la*, a town of Sirhind, and the principal place of a district held by a chief under British protection. *Area*, 144 square miles. *Pop.* 20,000. *Lat.* 30° 31′ N. *Lon.* 75° 59′ E.

MULDER, G. J., *mool'-der*, a modern Dutch chemist, famous for his discovery of the nature of the substance to which he applied the term "protein." Professor Johnston, in his preface to the English translation of Mulder's "Chemistry of Vegetable and Animal Physiology," thus states the consequences of the discovery: —"That this protein formed the basis of a large group of animal substances—the albuminous group, comprising fibrin, albumen, casein, the crystalline lens of the eye, the hair, horn, &c. That in these substances, the protein was combined with oxygen, sulphur, or phosphorus, or with two of these bodies, or with all three; and that the proportions of these several elements determined the special qualities of each compound of the albuminous group. That the sap and leaves, but especially the seeds of plants, contained protein in combination with sulphur and phosphorus, as it is found in the animal body, and that the gluten of wheat, the legumin of the bean, and the nitrogenous substances generally, which are found in the seeds of plants, were compounds of this kind. That these substances were formed by the plant out of the food drawn by its several parts from the air and from the soil. That it produced them for the purpose of diminishing the digestive labour, so to speak, of the animal; of supplying it with food fitted directly to form and nourish its muscular and albuminous parts, and that the animal received its whole supply of the raw material out of which those parts were to be built up, from the vegetable food on which it lived." Professor Mulder occupies the chair of chemistry in the university of Utrecht.

MULGRAVE, Constantine John Phipps, Lord, *mul'-grave*, an English navigator. He entered the navy at an early age, and became post-captain in 1765. At the general election in 1768, he was returned as member for Lincoln, and took an active part in parliament on several popular questions, particularly those on libels and the Westminster election, on the latter of which he wrote a pamphlet, entitled, "A Letter from a Member of Parliament to one of his Constituents, on the late Proceedings in the House of Commons." In 1773 he went towards the North Pole on a voyage of discovery, with two ships, one commanded by himself and the other by Captain Lutwidge. Of this voyage, Lord Mulgrave published a narrative, in 4to. His lordship was a good navigator and mathematician. B. 1716; D. 1792.

MULGRAVE ARCHIPELAGO, in the Pacific Ocean, comprises various groups of islands between *lat.* 3° S. and 12° N.; *lon.* between 160° and 177° E.

MULHAUSEN, *mul-ho'-sen*, a town of France, department of the Upper Rhine, near the Ill, 22 miles from Basle. The public edifices are the town-hall, the arsenal, the hospital, and churches. *Manf.* Printed cottons; also woollen and linen fabrics, straw hats, hosiery, stained paper; and there are foundries, machine-works, tanneries, and dye-works. *Pop.* 30,000. This place is connected by railway with Strasburg, Basle, and Thann.

MULHEIM, *mool'-hime*, a town of Prussia, on the Rhine, 16 miles from Dusseldorf. *Manf.* Woollen, cotton, and linen fabrics, leather, starch, and tobacco. *Pop.* 11,000.—Another, on the Rhine, 3 miles from Cologne. *Pop.* 6,000.

MULL, *mul*, an island of the Hebrides, off the coast of Scotland; the third in size, of very irregular figure, and deeply indented by arms of the sea. *Area*, 420 square miles. *Desc.* Rugged and mountainous in general. Benmore is the highest mountain, and has an elevation of 3,000 feet above the level of the sea. The land is more peculiarly adapted for grazing; and there is a very hardy race of black-cattle, of small size. A considerable quantity of kelp is made. The principal village is Tobermory. *Pop.* about 16,000. *Lat.* 56° 30′ N. *Lon.* 6° W. Between this island and the mainland of Argyle and Inverness-shires, is the SOUND OF MULL, 18 miles long, with an average breadth of 2.

MULLAGHBRACK, *mul'-la-brūk*, a parish of Ireland, in the county of Armagh, containing a portion of the town of Market-Hill. *Manf.* Linen. *Pop.* 7,000.

MÜLLER, Charles Otfried, *me(r)l'-ler*, a learned German writer, and one of the greatest scholars of modern times. After completing his education at the university of Berlin, he became professor of ancient languages at Breslau in 1817. He conceived the idea of writing a history of the Hellenic races and cities, of which the first volume, "Orchomenos and the Minyans," appeared in 1820. About the same time he became professor of archæology, or ancient art, at Gottingen, whereupon he applied himself to a searching investigation of the principles of antique art, and visited Dresden, France, and England in furtherance of the same design. The nature of his subsequent studies will be seen by the enumeration of a few of his great works,—"Manual of the History of Ancient Art," a "History of Greek Literature" (this was written for the Society for the Diffusion of Useful Knowledge, and was left unfinished at the author's death); "The Dorians," which was a history of the religion, manners, and politics of one of the Greek races; "The Etruscans;" and an edition of the "Eumenides" of Æschylus. B. at Brieg, Silesia, 1797; D. in Greece, 1841.

MÜLLER, John, a Swiss historian, who was professor of Greek at Schaffhausen, and, in 1786, became librarian and councillor of state to the elector of Mainz. In 1800 he received the appointment of first keeper of the imperial library at Vienna. In 1806, after the battle of Jena, Müller saw Napoleon at Berlin, and seemed to have been overcome by the attentions paid to him by the emperor. In 1807 he received from his new patron the post of secretary of state for the new kingdom of Westphalia, and, in the following year, became director of public instruction, zealously discharging these duties until his death, which soon followed. His chief works were "Histoire Universelle," "History of the Swiss Confederation," an invaluable book, which was written in German, but of which there is an admirable French translation by Professor Monnard, of Lausanne, published at Geneva. A complete edition of Müller's works was issued at Tubingen, in 27 vols., 1819. B. at Schaffhausen, Switzerland, 1752; D. at Cassel, 1809.

MÜLLER, John, an eminent modern German physiologist, who took his degree of doctor in medicine at the university of Bonn, in 1823. In 1830 he became professor of physiology and anatomy at the same place, exchanging to Berlin three years afterwards. In 1833 he published his great work, "The Physiology of Man," which was soon afterwards translated into French and English, and is still, perhaps, the best existing work on physiology. His later writings, embracing every subject in comparative anatomy and physiology, have been chiefly published in his own journal, devoted to physiology, &c., and which he has conducted since its establishment, in 1834. B. at Coblentz, 1801.

MÜLLER, Otho Frederick, a Danish naturalist, and one of the most original observers of the 18th century. After travelling in various countries as tutor to a Danish nobleman, he returned to Copenhagen in 1767, and married a lady of considerable property; whereupon he devoted his life to scientific pursuits. He was appointed by Frederick V. of Denmark, to continue the publication of the "Flora" of his native country, and, in 1779, he commenced a corresponding work on the Zoology of Denmark, but only lived to complete two parts. Müller also made researches relative to the minute animals, and published several treatises thereon, which Cuvier declared entitled their author to a "place in the first rank of those naturalists who have enriched science with original observations." B. at Copenhagen, 1730; D. 1784.

MÜLLER, John. (*See* REGIOMONTANUS.)

MÜLLER, Gerard Frederick, a German historian and traveller, who went to Russia in early life, as a teacher of history and geography. Having gained the favour of the empress Catherine, he became historiographer, member of the Academy of St. Petersburg, and conservator of the Russian archives. He was charged with several scientific expeditions, and accompanied Gmelin, in 1733-43, to Siberia. He was the author of "Memoirs towards the History of Russia," and "Travels and Discoveries in Russia." B. in Germany, 1705; D. in Russia, 1783.

MULLER, William John, an English artist, of German descent, who made several long tours in Greece, Egypt, and Turkey, and painted a number of remarkable pictures, illustrative of Oriental life and scenery. In 1845 he was overtaken by a severe illness, the result of the great mental labour he had undergone, and which was increased by the bad treatment he had received at the hands of the Royal Academicians, all his fine pictures having been placed so far from the spectator's eye that they could not be seen. Subsequently to his death, his works were eagerly sought after, and commanded high prices. A collection of his sketches realized £4,360 at a sale by auction. His best paintings were, "Turkish Merchants with Camels," "Athens from the Road to Marathon," "Sketch of an Egyptian Slave-market," "The Sphynx," and "Prayer in the Desert." In 1841 he produced a finely-illustrated work, entitled, "Picturesque Sketches of the Age of Francis I." B. at Bristol, 1812; D. there, 1845.

MULLINGAR, *mul-lin-gar'*, the county town of Westmeath, Ireland, 50 miles from Dublin. It has a parish church, a Roman Catholic cathedral, and a barracks. *Pop.* 5,000.—It has a station on the Midland Great Western Railway.

MULOCH, Miss Dinah Maria, *mul'-lok*, a modern English authoress, who, at the age of 23, made a highly successful appearance as a novelist, by the production of her well-known fiction, entitled, "The Ogilvies." In 1850 she published "Olive," a romance; and, in the following year, a picture of middle-class Scottish life, called "The Head of the Family." "Agatha's Husband" succeeded, and was in turn followed by a collection of short fictions, entitled, "Avilion, and other Tales." Among the best of her latest efforts stands "John Halifax, Gentleman," a charming piece of writing, in which Miss Muloch's fine imaginative powers and agreeable style appear in their most matured form. B. at Stoke-upon-Trent, 1826.

MULREADY, William, *mul-red'-e*, a distinguished modern painter, who evinced a taste for art in his earliest youth, and was accordingly sent, at the age of 15, to study at the Royal Academy. After some ineffectual attempts at the classic and high historic branches of his art, he fortunately acted upon the advice given to students by Sir Joshua Reynolds, and proceeded to make a diligent investigation of the methods pursued by the greatest masters of the Dutch school. This happy turn of study led him to discover where his true strength lay, and quickly enabled him to find subjects in the suburbs of London which he would formerly have passed over as unworthy of his notice. In 1808 he exhibited at the Royal Academy a "Carpenter's Shop and Kitchen," and the "Music Lesson." Other paintings of a similar character followed; and, in 1815, his style was fixed and his fame established, by the production, among other works, of "Idle Boys," which, moreover, secured his election as an associate of the Royal Academy. In the following year he exhibited "The Fight interrupted," and became R.A. From this period down to the year 1852, Mulready continued to produce works of the very highest excellence, all, from first to last, characterized by the same soberness of effect, the same breadth and simplicity of treatment, the same truth of drawing and mellowness of colour. The best of these are, "The Wolf and the Lamb," "The Convalescent," "The Last In," "The Seven Ages of Man," "Choosing the Wedding Gown," and "Crossing the Ford." Fortunately, through the liberality of Mr. Sheepshanks and other gentlemen, these treasures of art have become national property. They may be seen at the South Kensington Museum, where they form a portion of the "British Collection." B. at Ennis, Ireland, 1786.

MUMMIUS, Lucius, *mum'-mi-us*, a Roman consul, who, for his victories over the Achæans, was called Achaicus. He destroyed Corinth, Thebes, and Chalcis, and sent the treasures of art these cities contained to Rome; but was so ignorant of the value of the works of the most celebrated artists of Greece, found at Corinth, that he is stated to have told those who conveyed them to Rome, that if they lost or injured them, they should make others in their stead.

MUNCH, Peter Andrew, *moonch*, a Norwegian antiquary and philologist, who received his early education under his father, at Skien, and afterwards passed to the university of Christiana, where, in 1834, he underwent his examination in jurisprudence. The bent of his genius was, however, towards history and philology; and on his obtaining the appointment of professor of history at the university of Christiana, he devoted himself to an elucidation of the ancient history and languages of Norway and the North. He paid visits to England, Scotland, and Rome, to trace out the vestiges of the ancient Norsemen, either in books or in the customs of the people who are descended from those old sea-rovers. Professor Munch has written extensively, his most important works being "Historical and Geographical Description of the Kingdom of Norway during the Middle Ages," and "History of the Norwegian People." In the translated edition of the Transactions of the Northern Antiquarian Society, many articles by him are to be found: of these, the most interesting to English people is, perhaps, that entitled "Geographical Elucidations of the Scottish and Irish Local Names occurring in the Sagas." He has likewise written, for the use of schools, a "History of Norway, Sweden, and Denmark;" and has collected a series of entertaining stories from Norwegian history. B. at Christiana, 1810.

MUNCH, Andrew, a modern Norwegian poet, and cousin of the preceding, who became, in 1830, an amanuensis in the university library of Christiana. His poems are very popular with his countrymen: of these he has published two collections, entitled, respectively, "Poems, Old and New," and "New Poems." There is also a drama by him, founded on the subject of Solomon de Caus, a lunatic who was imprisoned in the Bicêtre, in 1641, and from whom, it has been stated by some French authors, the marquis of Worcester derived his notions of the principle of the steam-engine. Andrew Munch was born in 1811.

MUNCHEN. (*See* MUNICH.)

MUNCHENGRATZ, *moon'-chen-gratz*, a town of Bohemia, on the Iser, 8 miles from Jungbunzlau. *Manf.* Woollens, cottons, and linens. *Pop.* 4,000.—There is here a palace, where the emperors of Austria and Russia and the king of Prussia met, in 1833.

MÜNCHHAUSEN, Adolphus, Baron, *mu(r)n-chow'-sen*, a Hanoverian statesman, who was, during 37 years, privy councillor to the electors of that kingdom. He had a principal share in founding the university of Göttingen, in which seat of learning he held the office of curator, and established professorships of political science, history, and geography. The Royal Society of Sciences of Göttingen was also much indebted to his liberality. B. at Hanover, 1688; D. 1770.

MUNDEN, *moon'-den*, a town of Hanover, 15 miles from Göttingen. It has Calvinist and Lutheran churches, an hospital, and schools. *Manf.* Earthenwares and tobacco. *Pop.* 6,000.

MUNDI, *mun-de'*, a district of the Punjab, in the Jullinder Doab, comprising several valleys, and inclosing S. ridges of the Himalayas. *Area*, 760 square miles. *Minerals.* Iron and salt. *Pop.* 115,000.

MUNEEPOOR, *mu-ne-poor'*, a native state of E. India, consisting of an extensive valley in the midst of a wild and rugged country under British protection. *Area*, 7,584 square miles. *Pop.* Unascertained. *Lat.* between 23° 49′ and 25° 41′ N. *Lon.* between 93° 5′ and 94° 32′ E.

MUNGO PARK. (*See* PARK, Mungo.)

MUNICH, Christopher Burchard, Count de, *mu'-nik*, a German general in the service of Russia, who at first distinguished himself as an officer of engineers, under Prince Eugene. Peter the Great invited him to Russia, where he constructed the Ladoga canal. After terminating this great enterprise, he was loaded with honours, and created field-marshal and privy councillor. At the head of the Russian troops, he

defeated the Poles and Turks, in 1737, and made himself master of Perekop, Otchakof, and Choksim. He subsequently became prime minister; in which capacity he came into collision with Biren, who had been appointed regent, in accordance with the will of Anna Iwanovna, the late empress, whose favourite he had been. (*See* Biren.) Marshal Munich was at first successful over his rival, and Biren was banished to Siberia; but, upon the accession of the empress Elizabeth, Munich was in turn sent into exile, in 1742, and remained in Siberia during twenty years. He was recalled by Peter III., upon his accession, and appeared at court in the sheepskin dress which he used to wear in Siberia. The emperor restored him to his former rank, and he enjoyed the favour of Peter and Catherine until his death. B. in Oldenburg, 1683; D. at Riga, 1767.

Munich, the capital city of the kingdom of Bavaria, on the Iser, 220 miles from Vienna. It is divided into four quarters by two broad streets, which cross in the principal square, a place of considerable elegance, being surrounded by arcades. Among the public buildings, the palace holds the first rank: it is a large edifice, plain on the outside, but, in its interior, magnificent. The old electoral palace, and another formerly inhabited by Eugene Beauharnais, are fine buildings. There are also the meeting-house of the States, the council-house, the arsenal, and the new opera-house. Among the churches, the principal is that of Notre Dame, containing thirty altars, and having two towers 333 feet high; the church of the Theatins, built on the model of the Vatican at Rome; the church belonging formerly to the Jesuits; and the churches of the Augustines, the Knights of Malta, and St. Peter: these are all ornamented with fresco paintings and stained glass. The college occupied by the Jesuits before their expulsion, was one of the richest establishments of that order in Europe; and its treasury contained, in addition to other property, a large collection of philosophical instruments. The other buildings are the palace of Duke Maximilian, barracks, the hospital, workhouse, mint, and the mansions of several Bavarian noblemen. There are various literary establishments and institutions. The royal library has upwards of 800,000 printed volumes and 18,600 MSS.: here is also the Brazilian collection made by Von Martins and Spix. The Academy of Sciences, erected in 1759, has an extensive collection of specimens of natural history, models, and instruments: the schools are numerous and excellent. The court theatre is in the royal palace: it is a miniature of the Odeon at Paris, and its interior is richly decorated. The charitable institutions are numerous and well supported. The environs of this capital are very pleasant, being enlivened by gardens and a variety of places of public resort. The Iser flows through the town, and has a bridge, which leads, on its right bank, to a variety of romantic walks, amid an extensive shrubbery and along the margin of the river. In the *Karolinen-platz* is a lofty obelisk, made from the cannon taken from the Russians in 1812: it was erected to the memory of the 30,000 Bavarians engaged in that campaign. Near it are the *Pinacothek* and the *Glyptothek*, or museums of painting and ancient sculpture, rich in choice works of art. In a meadow is the colossal bronze statue of Bavaria, by Schwanthaler; and near it is the Hall of Fame. The general drink is malt liquor. Munich is not a manufacturing town; in it, however, are made articles of furniture, tapestry, gold, wine, pianofortes, mathematical and surgical instruments, cards, pencils, snuff, &c. Many newspapers and magazines are printed. *Pop.* 110,000. *Lat.* 48° 8′ 19″ N. *Lon.* 11° 35′ 15″ E.—Munich was founded in 962, was walled by Otho IV. in 1157, and taken by the Swedes in 1632.

Munkacs, *moon-katch'*, a market-town of E. Hungary, 80 miles from Debreczin. *Pop.* 5,300. In its neighbourhood are mines of crystal, called Hungarian diamonds. In 1687, after a siege of three years, it was taken by the imperialists.

Munster, *mun'-ster*, a city of Germany, on the small river Aa, 80 miles from Cologne. It is the capital of Prussian Westphalia. The houses are lofty but irregular, with painted roofs. There are numerous churches: the most noted is the cathedral and the church of St. Lambert. There are, besides, a bishop's palace, botanic garden, and various hospitals and schools. It was the head-quarters of the Anabaptists in 1536, and was taken by the bishop, when the leader, John of Leyden, with two of his chief accomplices, were made prisoners, tortured to death, and their bodies hung up in three iron cages, which are still to be seen on the steeple of the church of St. Lambert. *Manf.* Woollens, leather, starch, and beer. *Pop.* 25,000. In the time of the empire of Napoleon I. this was the capital of the department Lippe.

Munster, the S. W. and largest of the four provinces of Ireland, comprising the counties of Clare, Kerry, Limerick, Cork, Tipperary, and Waterford. Previous to the Norman conquest, it was divided into the kingdoms of N. and S. Munster.

Munster, Sebastian, a learned German divine, who at first was a Franciscan monk, but afterwards embraced the Reformed religion, and was nominated Hebrew professor at the university of Basel. Munster was called the Esdras and Strabo of Germany. He wrote a Hebrew Grammar and Dictionary, and published a Cosmography, in folio, and a Latin version of the Old Testament, with other learned works. D. at Inglesheim, 1489; D. of the plague, at Basel, 1552.

Munsterthal, *moon'-ster-tal*, two valleys of Switzerland, one in the canton Grisons, the other in Berne, where, in 1444, the battle of St. Jacob was fought between the French and Swiss, when the latter were nearly annihilated.

Munzer, Thomas, *moont'-ser*, one of the most violent of the Anabaptist chiefs. He gained a great number of followers, who were rebaptized naked, and lived in common. These enthusiasts committed shocking outrages, and pretended to prophesy and divine visions. Munzer preached against Luther as well as against the pope. At Mulhausen be established a senate, and assumed the title of king. The landgrave of Hesse, and other princes, marched against Munzer, whose army was defeated, notwithstanding his promise of victory. He then fled to Franchausen, where he was discovered and sent back to Mulhausen, and executed in 1525. B. at Zwickau, Misnia, about the end of the 15th century.

Muotta, *moo-ot'-ta*, a village of Switzerland, 6 miles from Schwytz. Here, in 1799, the Russians, under Suwarrow, encountered the French.

Murad, or Amurath. (*See* Amurath.)

Murano, *moo-ra'-no*, a well-built town of Lombardy, on an island in the Lagunes, a little to the east of Venice. *Manf.* Venetian glasses and mirrors. *Pop.* 4,000.

Murashkino, *moo-rash-ke'-no*, a market-town of Russia, 40 miles from Nignii-Novgorod. *Manf.* Hosiery, leather, and soap. *Pop.* 6,000.

Murat, *moo-ra'*, two towns in France, neither with a population above 3,000.

Murat, Joachim, a celebrated French marshal, and king of Naples, was the son of an innkeeper at Perigord. His father intended him for the church, and succeeded in getting him admitted to the college of Cahors; but young Murat's disposition was ill-suited to the ecclesiastical profession. An amour was the cause of his quitting the college; after which he enlisted in a regiment of chasseurs, from which he was dismissed for insubordination. Returning to his father's house, he occupied himself with the management of the horses belonging to the inn. The outburst of the Revolution gave to his impetuous and restless spirit an opportunity for action; he became one of the most energetic partisans of liberty and equality. He had again entered a cavalry regiment, and during the Reign of Terror he rapidly attained the grade of colonel. In 1795 he rendered good service to Bonaparte, for which the future emperor rewarded him by placing him upon his staff when he set out for the Italian campaign of the same year. The fortunes of Bonaparte and Murat were henceforth closely allied. He was confidential side-de-camp to his patron in Egypt; and, having signalized himself on every occasion as a man of impetuous bravery, was soon nominated general of division. On the 18th Brumaire (9th Nov. 1799), he commanded the sixty grenadiers who dispersed the Council of Five Hundred. For this service Napoleon appointed him commandant of the consular guard, and gave him the hand of his sister Caroline in marriage. After the battle of Ma-

rengo, in which he commanded the cavalry with distinguished bravery, he was created governor of the Cisalpine republic, and, afterwards, governor of Paris. When Napoleon became emperor, he bestowed the field-marshal's *bâton* upon Murat, and created him prince, with the title of grand-duke of Berg and Cleves. "The handsome swordsman," as he was termed, went through the German campaign of 1805 with more than his accustomed brilliancy of deed. In the emperor's invasion of Spain, in 1808, he commanded the French army, and was ambitious of gaining the throne, which Charles IV. had vacated, for himself; but Napoleon preferred to place his brother Joseph upon the Spanish throne, at the same time bestowing the crown of Naples upon Murat. In 1808 he was proclaimed king of the Two Sicilies, under the name of Joachim-Napoleon. He reigned in peace until 1812, his rule being characterized by mildness and liberality. In the latter year he commanded the cavalry of the grand army sent to invade Russia, and in the advance performed his customary feats of personal valour; and, during the disastrous retreat, he commanded in chief from Smolensko to Wilna. After the disastrous battle of Leipsic, he hurried back to his kingdom, and having broken with Napoleon, by whom he imagined himself to have been slighted, entered into negotiations with the allies. The congress of Vienna, however, not recognizing his kingly title, he declared in favour of Napoleon immediately after learning that the emperor had returned from the isle of Elba. Calling upon the Italians to fight for their national independence, he marched into Upper Italy, where he encountered the Austrians at Tolentino, in 1815, but met with a signal defeat: he lost at once his army and his throne. Subsequently, he attempted to regain the latter, and landed with a few followers upon the coast of Calabria; but, being captured, was brought before a Neapolitan military commission, which basely condemned him to be shot. As a military commander, Murat was mediocre; but his impetuous bravery, his love of daring, and his uniform success in battle, would seem to entitle him to the praise which Napoleon bestowed upon him when he called his favourite "the best cavalry officer in Europe." B. in Perigord, 1767; shot, 1815.—Prince Murat is his second and only surviving son.

MURAT, Caroline Maria Bonaparte, wife of the preceding. (*See* BONAPARTE, Caroline.)

MURATORI, Louis Anthony, *moo-ra-to'-re*, a celebrated Italian historian, who has been termed "the father of the history of the Middle Ages." After completing his education at Modena, he entered into holy orders, and was invited, at the age of 22, to Milan, by Count Charles Borromeo, who appointed him librarian of the Ambrosian college. Thereupon Muratori commenced the study of the Italian middle-age records, and subsequently published his "Rerum Italicarum Scriptores," in twenty-eight volumes; wherein he gave every chronicle of the mediæval period, accompanying them with learned and valuable commentaries. His "Antiquitates Italicæ" was first produced in 1742; and of this valuable contribution to history the author himself wrote, "I have treated first of the kings, dukes, marquises, counts, and other magistrates of the Italian kingdom; after which I have investigated the various forms of the political government, and also the manners of the private citizens, the freedom and franchises of some classes, and the servitude of others; the laws, the judicial forms, the military system; the arts, sciences, and education; the progress of trade and industry; and other matters of social and civil history." Muratori was a member of the Royal Society of London, and of several other learned bodies; but he was exposed to the calumnies and persecutions of some bigots of his church, who accused him of holding heretical opinions, and even denounced him to Pope Benedict XIV. That liberal pontiff, however, wrote to the historian, that "those passages in his works which were not found acceptable to Rome, did not touch either the dogma or the discipline of the Church; but that, had they been written by any other person, the Roman Congregation of the Index would have forbidden them, which, however, they had not done in the case of Muratori's works, because it was well known that he, the pope, shared in the universal esteem in which his merit was held." The whole of the historian's works were collected and published, in forty-six volumes, in 1767. Besides the above-mentioned productions, he wrote a learned treatise upon Italian Poetry, and an enlightened devotional work, wherein he combated much of the superstition and bigotry of the Roman Catholic church. B. at Vignola, in the duchy of Modena, 1672; D. at Modena, 1750.

MURAVIEFF, Michael, *moo'-ra-veef*, an eminent Russian author, whose distinguished acquirements led to his being appointed tutor to the grand-dukes Alexander and Constantine in 1785. Nearly all his prose works were composed for the use of his imperial pupils. The most important of these productions were,—"Epochs of the Russian Empire," "Geographical Sketches of North and South Russia," and "Dialogues of the Dead;" which last was an imitation of the work of Lucian, but was composed in a more genial spirit. The poetical efforts of this writer were very popular in their day, but are little read at the present time. B. at Smolensk, 1757; D. 1807.

MURAZZANO, *moo-rats-sa'-no*, a market-town of Sardinia, Piedmont, 12 miles from Mondovi. *Pop.* 2,500.

MURCHISON, Sir Roderick Impey, *mur'-chi-son*, a distinguished modern geologist, director-general of the Geological Survey of the United Kingdom, and director of the Metropolitan School of Science applied to Mining and the Arts. After receiving a portion of his education at the Durham grammar-school, he entered the military college at Marlow in 1805, and left it two years subsequently, upon receiving a commission in the 36th regiment. He served at the battle of Vimiera, and shared the dangers and the glory of the retreat made by Sir John Moore upon Corunna. In 1815 he married, and quitted the military profession. Becoming acquainted with Sir Humphry Davy, he was urged by that great chemist to devote his leisure to scientific pursuits. Acting upon this advice, he proceeded to study the science of geology, and shortly afterwards explored the Highlands, Yorkshire, and other parts of the kingdom, in company with Professor Sedgwick. In 1828 he accompanied Mr. (afterwards Sir Charles) Lyell in a geological tour among the extinct volcanoes at Auvergne. After exploring the chain of the Eastern Alps, he published a memoir upon the subject, accompanied with a geological map, in 1829. He subsequently returned to the study of the geological formations of Great Britain, and succeeded in discovering the whole series of Silurian rocks in the sea-cliffs westward of Milford Haven. The term "Silurian system" was first used by him, in consequence of the vast deposits of which it is constituted being most fully displayed in those parts of England and Wales once inhabited by a tribe of Britons to whom the Romans applied the name "Silures." With this great discovery Sir Roderick Murchison's name has ever since been identified, and he has put forth his views thereupon in an important work, entitled "The Silurian System." In the years 1835 and 1839 he explored the Rhenish provinces; and, in 1840, in company with M. de Verneuil, a French geologist, he set out for Russia, with the intention of investigating the geological formations of that country, hitherto very little known. The result of his several expeditions was published in 1845, in a magnificent volume, entitled "Geology of Russia and the Ural Mountains," in the production of which he was assisted by M. de Verneuil and the Count Von Keyserling. Shortly after the publication of this book he was knighted by her majesty Queen Victoria, and was created a member of the order of St. Stanislaus by the emperor Nicholas. About the same time the Royal Society awarded him its Copley medal, for his efforts in establishing the "Silurian System." He wrote extensively upon the subjects of his observations and explorations, and a large number of important contributions by him appeared in the Transactions and Journals of the learned societies of Great Britain. In 1854 he produced "Siluria; the History of the oldest known Rocks containing Organic Remains, with a Brief Sketch of the Distribution of Gold over the Earth." Sir Roderick Murchison likewise declared that gold should be found in the Australian Alps, and urged the government to organize an expedition to test the truth of his views. This appeal met with no official response; but his theories were rapidly confirmed through the actual discovery of the precious metal by

private individuals. He is M. A. of Cambridge and Dublin, D.C.L. of Oxford, trustee of the British Museum, and member of almost all the scientific bodies of Europe. B. in Ross-shire, 1792.

MURCIA, *mer'-she-a* (Sp. *moor'-the-a*), an old kingdom in the S.E. of Spain, included between Valencia on the E., Andalusia on the W., and the Mediterranean on the S. It now comprises the modern provinces of Murcia and Albacete. *Area*, united, 8,000 square miles. *Desc.* Mountainous in general, with a very fine climate. *Pro.* Wheat, barley, hemp, rice, vines, olives, mulberries, saffron; also citrons, pomegranates, and almonds. Several of the mountains contain good pastureges. *Minerals.* Lead, copper, sulphur, nitre, alum, crystal, and marble. *Pop.* 600,000.

MURCIA, the capital of the kingdom and province of Murcia, on the Segura, 28 miles from Carthagena. It is divided into the Old and New towns, and is ill-built throughout; the streets being irregular, crooked, badly paved, and narrow. The principal public buildings are numerous churches, a decorated cathedral, monasteries, convents, colleges, and hospitals. The cathedral is a very large edifice, and the churches of Santa Olalla and San Juan are on the same plan: those of La Caridad and St. Peter, and the Franciscan and Dominican convents, are all richly decorated. There are four public walks in Murcia,—the arsenal, which is merely a spot of ground gained from the river by an embankment; the botanical garden, on the south of the river; the Alameyda, or public walk, properly so called; and the Malecon, or quay, a large dyke thrown up to prevent the encroachments of the Segura. In summer, the heat is excessive. *Manf.* Pottery-ware, woollen cloth; and there are tanneries and lead-works. There are, besides, factories of nitre and gunpowder, the saltpetre of Murcia being the best in Spain. *Pop.* 45,000.—Murcia is first mentioned in history in the year 713, when it was taken by the Moors. In 1810 it was taken and sacked by the French.

MURE, Sir William, *mure*, a Scotch poet, whose works mostly remain in manuscript. Some of them, however, appeared in a volume entitled "Ancient Ballads and Songs," published in 1820. In the civil war, he took the popular side, served as captain in the Ayrshire regiment, and was wounded at Marston Moor. B. at Rowallan, Ayr, 1594; D. 1657.

MURET, Mark Antony Francis, *moo'-rai*, a learned French critic, who, at the age of 18, read lectures upon Cicero and Terence in the college of Auch, whence he proceeded to Paris, and taught the classics and civil law with great reputation. His sarcastic and vivacious character, however, procured him many enemies, and, being accused of heresy and depraved habits, he was imprisoned; but, obtaining his release, he repaired to Toulouse, where fresh charges were brought against him. To avoid punishment, he fled to Italy. At Rome he was well received, was ordained a priest, and was presented to several rich benefices. He taught philosophy, theology, and civil law in the latter city, and enjoyed the esteem of Popes Pius V. and Gregory XIII. His works consist of valuable annotations upon the Latin classics, "Poemata," and "Orations." His commentaries upon Plato's "Republic," and upon Sallust, Cicero, Terence, and Aristotle, are regarded as very excellent. B. near Limoges, 1526; D. at Rome, 1585.

MURGER, Henry, *moor'-zhai*, a modern French *littérateur*, who became, in 1838, secretary to Count Tolstoy, a wealthy Russian nobleman, resident at that period at Paris. It was whilst reading to his patron the productions of contemporary authors, that the desire to achieve a name in literature was first awakened in his breast. He began by writing verse, and attacked the poet Barthélemy in a satirical poem. His next work was a volume of poetry, entitled "Via Dolorosa," for which he was unsuccessful in obtaining a publisher. He then lived that strange, irregular, but somewhat romantic mode of life called by himself and other French novelists the "Bohemian." Fired with literary ambition, but painfully uncertain as to where he should procure a dinner, the young enthusiast mixed in the society of a number of young painters, musicians, and poets,—the strange bond of impecuniosity uniting them all. Champfleury became his friend during this time, and, with him, Murger wrote a number of small pieces for the Luxembourg theatre. After producing several poems and novels with more or less success, he, in 1848, gave to the public the celebrated "Scenes of Bohemian Life," which fixed his fame. This fine recital of the adventures of his early days opened to him the pages of the "Revue des Deux Mondes," and to that journal he afterwards contributed several of his best works. M. Murger was less successful as a dramatist and poet, the particular charm of his style depending not upon invention and imagination, but on the truth and reality of his pictures of life. B. in Paris, 1822; D. 1860.

MURILLO, Bartholomew Stephen, *moo-reel'-yo*, a celebrated Spanish painter. He studied under his uncle Juan del Castillo, at Seville, whence, in 1643, he proceeded to Madrid, and obtained instruction from the celebrated Velasquez. In 1645 he returned to Seville, where he rapidly rose to the highest distinction, and painted several historical works for the king of Spain. In his own country, his fame chiefly rests upon his numerous altar-pieces; but in England, where his works are highly prized, his simple works, such as "The Spanish Peasant Boy," in the National Gallery, are most highly prized. His death was the result of an accident he met with while working upon a scaffolding in the Capuchin convent at Cadiz, at his painting entitled the "Marriage of St. Catherine." B. at Seville, 1618; D. at the same place, 1685.

MURPHY, Arthur, *mer'-fe*, a dramatic and miscellaneous writer. After receiving some education at the college at St. Omer, in France, he, at the age of 18, returned to Ireland, and was placed in the countinghouse of a merchant who was his relation; but not liking that occupation, he went to London, and, having a great inclination to the stage, he made an effort in the character of Othello, but without success. He then commenced a literary career, and produced "The Orphan of China," a tragedy, which was well received. He also established a weekly paper, called "The Gray's-Inn Journal," and two others in defence of government, entitled the "Test" and the "Auditor." Having studied the law, he was called to the bar by the society of Lincoln's Inn, but never had much practice. His plays of the "Grecian Daughter," "All in the Wrong," "The Way to Keep Him," and "The Citizen," had great success, and produced the author wealth and fame. Mr. Murphy also acquired considerable reputation by his Lives of Fielding and Johnson, and, above all, by his translation of Tacitus. He was a commissioner of bankrupts, and, for the last two years of his life, had a pension of £200 a year. His last literary performance was the "Life of Garrick," which is by no means equal to his former works. Mr. Murphy was the intimate friend of Dr. Johnson, Burke, Garrick, Foote, and other eminent men. B. in Ireland, 1730; D. in London, 1805.

MURPHY, James Cavanah, an architect and historian, who spent several years in Spain and Portugal, and produced a number of works relative to the history and antiquities of those countries, of great importance and value. The chief of these are, "Travels in Portugal," "General View of the State of Portugal," "The Arabian Antiquities of Spain," and "The History of the Mahometan Empire in Spain." The volume entitled "Arabian Antiquities" contained 97 fine plates, among which were several depicting the Alhambra. B. in Ireland, about 1760; D. 1816.

MURPHY, Robert, a modern mathematician, was the son of a poor shoemaker of Mallow, in Ireland. In his 11th year, his thighbone was fractured by his being run over by a cart. This accident was the cause of his being confined to his bed during twelve months. Among other papers, an old Cork almanac, containing some mathematical problems, was given him wherewith to employ his mind. This led him to ask for a copy of Euclid, and a work upon algebra, both of which he mastered unaided, and before he had attained his 13th year. He next forwarded answers to the mathematical problems inserted in the newspapers by a gentleman at Cork. The latter sought out the lad, and succeeded in interesting some gentlemen in his behalf. He was received into a classical school in his native town, and subsequently went to the university of Cambridge, where, in 1829, he took the B.A. degree, and afterwards became fellow and dean of his college. Having fallen

into dissipated habits, he was compelled to leave the university in 1832. After spending some time in Ireland, he went to London in 1836, and commenced as a mathematical teacher and writer. Two years later, he was appointed examiner in mathematics and natural philosophy at the University of London. To the Cambridge Philosophical Transactions he contributed many papers on mathematics, and wrote a treatise on the "Theory of Algebraical Equations." He likewise furnished the earlier parts of the "Penny Cyclopædia" with articles on natural philosophy. B. at Mallow, Ireland, 1806; D. in London, 1843.

MURR, Christopher Theophilus von, *mur*, a learned German writer, who distinguished himself by his works upon language, bibliography, and antiquities, which he composed in Latin, French, and German. The principal of these were "Library of Painting, Sculpture, and Engraving," "Contributions towards the History of the Arts and Literature," and a Latin work upon the library of Nuremberg and the museum of Altdorf. B. at Nuremberg, 1733; D. at the same place, 1811.

MURRAY, James Stuart, Earl of, *mur'-rai*, was a natural son of James V., king of Scotland, by Margaret, daughter of the earl of Mar. He accompanied his sister Mary, queen of Scots, to France, in 1548, and was among her retinue when she was married to the dauphin of France; but after his return to his native country, he soon began to play an important part in the councils of the party of the Reformation. He was subsequently deputed to repair to France and invite his sister to Scotland. In 1561 he returned to Edinburgh, and upon the queen's arrival, a few weeks afterwards, he was appointed, by her, prime minister. For his services in that office, Mary created him earl of Mar; but a rival claimant to the title having appeared in Lord Erskine, the minister received the earldom of Murray in its stead. Together with John Knox and Queen Elizabeth, he was opposed to the queen's marriage with Darnley; but though he became estranged from his sister, he took no active part in the murder of her husband. He is said, however, to have been aware of the plot for the assassination of Darnley, which, it is avowed, he declared he would neither aid nor hinder. Soon after the horrid deed, he left Scotland for the continent, visiting Elizabeth on his way. He returned after the coronation of James VI., and was proclaimed regent in 1567. After the queen's escape from Lochleven Castle, he took up arms against her, and defeated her at Langside. Subsequently, he complied with the summons of Queen Elizabeth, and appeared at the trial of his unfortunate sister, and bore witness against her. In 1570, however, while riding through the streets of Linlithgow, he was shot by James Hamilton, of Bothwelhaugh, in revenge of a personal injury committed by him years before. D. it is supposed, about 1633.

MURRAY, John, an eminent English publisher, who was at first in partnership, as medical bookseller, with Mr. Highley, but afterwards devoted his attention to a much more extensive line of business. A man of considerable tact, he sought and made the acquaintance of the best writers of his day, and contrived to maintain a long course of business transactions with them by the exercise of well-timed liberality. His first great undertaking was the establishment of the "Quarterly Review," in 1809. He published a few of Sir Walter Scott's, and all Lord Byron's works. His name was also to be found on the title-page of works by Campbell, Moore, Canning, Hallam, Croker, Disraeli, Washington Irving, Southey, Lockhart, Crabbe, and Bishop Heber. Several of his publishing ventures were particularly fortunate; such as the "Domestic Cookery," of which upwards of 300,000 copies have been sold. The "Family" and "Colonial" Libraries were also valuable and successful speculations. B. 1778; D. 1843.—His business is still carried on by his only son, Mr. John Murray.

MURRAY, Lindley, an American grammarian, who at first acted as clerk to his father, a merchant at New York, but was subsequently placed with a private tutor, to acquire some classical knowledge. He next applied himself to the study of the law, and, in his 21st year, was called to the bar; but, upon the breaking out of the dispute between Great Britain and America, he entered upon a commercial career. Having acquired some property, he retired from business, and bought an estate near New York; but the summers of his native country proving too relaxing for his frame, he resolved to settle in England; and accordingly crossed the Atlantic, and took up his residence near York, where he lived till his death. His "Grammar of the English Language," Key, and Exercises, were composed in England, and in a condition of such bodily infirmity, that he could take no exercise, except in a carriage. During the latter years of his life, he was entirely confined to his chamber. Besides the three works already named, he produced "The English Reader," "Lecteur Français," and a small work "On the Duty and Benefit of a Daily Perusal of the Holy Scriptures." The large sums obtained by him for his educational works were entirely devoted to charitable purposes. B. in Pennsylvania, 1745; D. near York, 1826.

MURRAY, William, carl of Mansfield. (*See* MANSFIELD, Earl of.)

MURRAY, the principal river discovered in Australia, and formed by the junction of numerous streams west of the Australian Alps. After passing through Lake Victoria, it enters the ocean in *lat.* 25° 20′ S., *lon.* 139° E.

MURRAY, a county of the United States, in Georgia. *Area*, 590 square miles. *Pop.* 15,000.

MURVIEDRO, *moor'-ve-ai-dro*, a walled town of Spain, 13 miles from Valencia. It presents many vestiges of antiquity. A Roman theatre and circus are in good preservation. *Manf.* Brandy. *Pop.* 6,000. This place was taken by Hannibal 219 B.C. The RIVER Murviedro enters the sea below the town.

MUSA, Antonius, *mu'-sa*, a Greek physician, who cured Augustus of a dangerous illness by bathing. He was the first who advised the use of the cold bath. The Romans erected a statue to his honour. Two tracts, "De Herbâ Botanicâ," and "De tuendâ Valetudine," are attributed to him.

MUSA, Ibn-Nosseyr, a famous Arab conqueror, who, in 707, was nominated governor of Mauritania, and who quickly reduced the whole of the tribes inhabiting the northern shores of Africa. In 710 he landed in Spain with a small army, and, after some successes, returned to Africa laden with spoil. In the following year he dispatched his subordinate, Tarik, into Spain. The latter defeated and killed Roderick, the Gothic king, and pushed his victorious arms as far as the rich city of Toledo, which he plundered. Musa, unwilling to allow so much glory and wealth to fall to the share of his lieutenant, put himself at the head of 18,000 men, with whom he landed at Algesiras in 712. He rapidly reduced Seville, Beja, Merida, and marched upon Toledo, where he met Tarik, whom he caused to be beaten and thrown into prison. Tarik was, however, subsequently restored to his command by the caliph Al-Walid; whereupon he overran Spain in an easterly direction. Musa, on the other hand, pursued a northerly course, and took Salamanca and other considerable cities. The two Arab generals quickly reduced the whole of Spain, and were summoned to Syria by the caliph Al-Walid. Tarik obeyed instantly; but it was not until a second messenger had been dispatched to Musa that he turned eastward. He arrived in Syria at the beginning of 715, accompanied by thousands of captives, among whom were four hundred of the Spanish nobility, and with a long train of camels laden with spoil. The caliph received him coldly; and upon his death, shortly afterwards, Suleyman, his successor, cast Musa into prison, and fined him 200,000 pieces of gold. One of his sons was also put to death, and his head brought to Musa by Suleyman himself, who asked him if he knew it. Upon which the afflicted parent replied, "Cursed be he who has slain a better man than himself." Musa died in poverty, 717; D. 640.

MUSÆ (MUSES), *mu'-ses*, certain goddesses, who presided over poetry, music, dancing, and all the liberal arts. They were generally supposed to be the daughters of Jupiter and Mnemosyne, and were nine in number,—Clio, Euterpe, Thalia, Melpomene, Terpsichore, Erato, Polyhymnia, Calliope, and Urania. Apollo, their patron and conductor, had received the name Musagetes, or leader of the Muses. The palm-

tree, the laurel, and all the fountains of Pindus, Helicon, Parnassus, &c., were sacred to the Muses. They were generally represented as young, beautiful, and modest virgins, and commonly appeared in different attire, according to the arts and sciences over which they presided. The worship of the Muses was universally established, particularly in the enlightened parts of Greece, Thessaly, and Italy. Sacrifices were never offered to them, though no poets ever began a poem without a solemn invocation to the goddess who presided over verse.

MUSÆUS, *mu-se'-us*, an ancient Greek poet, who is stated to have lived in the mystic ages of Greece, and to have been an Athenian. All his works are lost; but some quotations from them, given by Plato, Philostratus, and others, were inserted by Henry Etienne in his "Philosophical Poetry of the Ancients."—There was another of the same name, who wrote a poem called "Hero and Leander." He is supposed to have flourished in the 5th century of the Christian era.

MUSÆUS, John Charles, an eminent German writer, who studied theology at the university, with the intention of entering upon holy orders. Relinquishing the theological for the literary profession, he, in 1760, published a parody on Richardson's novel, entitled "Grandison the Second," the success of which urged him to make renewed efforts as an author. It was not, however, until after an interval of eighteen years that he gave to the public his "Physiognomical Travels," a satire upon Lavater. In the interim he had supported himself by teaching at the gymnasium of Weimar. His fame was secured by this last production; and he thereupon proceeded to collect and write his "Volksmärchen der Deutschen," or Popular Legends of Germany, which were a series of charming narratives gathered from the peasantry, and dressed up in a simple and beautiful style. His other works were a collection of novelettes and tales for children, and a number of satirical sketches, entitled "Freund Heins Erscheinungen," or Death's Advent, in which Musæus treated of the many human undertakings cut short by the summons of that inevitable visitor. Some of his posthumous sketches were collected by his pupil Augustus von Kotzebue, and published in 1791, with the title, "Some Traits of the Life of the good Musæus." Musæus was no less witty and captivating as a writer than kindly and generous as a man. B. at Jena, 1735; D. 1787.

MUSGRAVE, William, *mus'-grav*, an English physician and antiquary, who, in 1684, was chosen secretary to the Royal Society. He edited Capitolanus's "Life of Geta Britannicus," and a number of medical works. B. at Charlton, Somersetshire, 1657; D. at Exeter, 1721.

MUSHED. (*See* MESCHED.)

MUSKAT. (*See* MUSCAT.)

MUSKINGUM, *mus-king'-gum*, a county of Ohio, U.S. *Area*, 950 square miles. *Pop.* 50,000.—A river of Ohio, which joins the Ohio.

MUSONE, *moo-so'-rai*, two small rivers in Italy, neither with a course of more than 40 miles.

MUSSCHENBROECK, Peter van, *moosh'-shen-bre(r)k*, an eminent Dutch natural philosopher and mathematician, who, with Gravesande, first introduced the Newtonian philosophy into Holland. He became professor of mathematics and natural philosophy at his native place; and he was also a member of the Royal Society of London and of the Academy of Sciences at Paris. His "Course of Natural and Experimental Philosophy" is a valuable work, and has been translated into English by Colson. He also wrote, in Latin, treatises on the Magnet, Capillary Attraction, Cohesion, and Meteorology. B. at Leyden, 1692; D. at the same place, 1761.

MUSSELBURGH, *mus'-sel-bru(r)*, a town of Edinburghshire, Scotland, at the mouth of the Esk, 5 miles from Edinburgh. It consists chiefly of a well-paved street, broad at the extremities, and narrower towards the middle. The suburbs are united to Musselburgh by three bridges over the Esk. Besides the parish church, there are other churches and chapels, belonging to various religious denominations. Here was an ancient building, belonging to the abbey of Dunfermline, called the Chapel of Loretto, from which a curious prison was erected in 1590. Betwixt the sea and the town, lie the extensive downs called Musselburgh Links, excellently adapted for the healthful exercise of the golf, and where there is a course for horse-racing, and where the Edinburgh races are run. *Manf.* Leather, sail-cloth, and hair-cloth. *Pop.* 7,000.

MUSSET, Alfred de, *moos'-sai*, an eminent modern French poet, playwright, and novelist. After completing his education at the college of Henry IV., where his fellow-pupil and intimate friend was the duke of Orleans, son of Louis Philippe, he essayed the most diverse studies. The law, medicine, finance, painting, were in turn engaged in, in turn abandoned. In 1830 he put forth a small volume of poetry, entitled "Tales of Spain and Italy." The success which the work obtained was quite undeserved, in a moral point of view, at least; but this early favour encouraged its author to proceed, and to achieve better things. A celebrity at 23, the young poet made a journey to Italy with George Sand, under the name of confidential secretary. Between the years 1836-40, he produced several works, more or less characterized by an affectation of Byronic misanthropy and disgust of things mundane. Two or three collections of poems and a number of plays succeeded, the best of which last, however, were not adapted for the stage. At the revolution of 1848, he lost his post as librarian to the ministry of the Interior, but regained it after the establishment of the empire, with the additional appointment of reader to the empress. During his last years he gave himself up to play and even grosser pleasures. His last volume of verse was published in 1850, and showed a premature decay of the author's powers: he was nevertheless elected a member of the French Academy in 1852. At his death, he left some poems and a drama uncompleted. B. at Paris, 1810; D. 1857.

MUSTAPHA I., *mus'-ta-fa*, sultan of Turkey, succeeded his brother Ahmed I. in 1617; in the same year he was, however, deposed by the Janissaries, and thrown into prison. He was afterwards released and placed upon the throne, but again deposed by the Janissaries, and strangled in 1623.

MUSTAPHA II., son of Mahomet IV., succeeded Ahmed II., his uncle, in 1695. He defeated the Austrians at Temeswar, and made war, with success, against the Venetians, Poles, and the Russians. Fortune, at length, turning against him, he was forced to make peace. He was deposed by his subjects, and died in 1703.

MUSTAPHA III., the son of Ahmed III., ascended the throne in 1757. He was a weak prince, and, by trusting to his favourites, greatly exhausted the public treasury. His brother Abdul Hamed succeeded him. D. 1774.

MUSTAPHA IV. ascended the throne in 1807, after the deposition of Selim III. Mustapha Bairaktar, pasha of Rudshuk, collected an army and marched upon Constantinople, demanding that the deposed Selim should be given up to him; but Selim had been already strangled, and his dead body was brought to Bairaktar, who thereupon deposed Mustapha IV., and placed his brother Mahmoud upon the throne. (*See* MAHMOUD II.) Mustapha IV. was put to death by his brother Mahmoud II., in 1808.

MUSURUS, Marcus, *mu-su'-rus*, a native of Candia, who taught Greek at Venice, and afterwards at Rome, with great reputation. Pope Leo X. made him archbishop of Epidaurus, in the Morea. He published editions of Aristophanes and Athenæus, and his "Etymologicum Magnum Græcum" is a valuable work. B. at the close of the 15th century; D. at Rome, 1517.

MUTIUS, Cælius, *mu'-shi-us*, first named Codrus, and afterwards Scævola, an illustrious Roman, who distinguished himself when Porsenna besieged Rome, 507 B.C. Mutius entered the camp of Porsenna to assassinate him, and, by mistake, stabbed one of his attendants. Being seized and brought before Porsenna, he said that he was one of 300 who had engaged, by oath, to slay him; and added, "This hand, which has missed its purpose, ought to suffer." On saying this, he thrust it into the coals which were burning on the altar, and suffered it to be consumed. Porsenna, struck with his intrepidity, made peace with the Romans. The name of Scævola, or left-handed, was given as a mark of distinction to Mutius and his family.

MUTTRA, *moot'-tra*, a town of British India, on the right bank of the Jumna, 35 miles from Agra. It is held as sacred by Hindoos. *Pop.* 50,000.

MYCENÆ, *mi-se'-ne*, an ancient city of Greece, now in ruins, 22 miles from Corinth. It has some Pelasgian remains.

MYCONE, *mik'-o-ne*, an island of the Grecian Archipelago, between NAXOS and TINO, 5 miles from the latter. *Area*, 45 square miles. *Desc.* Fertile, and producing corn, figs, and wine. *Pop.* 6,000.

MYHER-CAUNTA, *mi-he'*, a division of the kingdom of Guzerat, under the superintendence of the Bombay government. *Area*, 3,400 square miles. *Desc.* Hilly in the N. and E., and level in the S. and W. It is well watered. *Pop.* Unascertained. *Lat.* between 23° 14′ and 24° 28′ N. *Lon.* between 72° 41′ and 74° 5′ E.

MYHIE, *mi-he'*, a state of India. *Area*, 1,025 square miles. *Pop.* 100,000. *Lat.* 24° 16′ N. *Lon.* 80° 49′ E.

MYLNE, Robert, *miln*, an eminent architect and civil engineer, who designed and built Blackfriars Bridge, and also erected Sir Christopher Wren's monument in St. Paul's Cathedral, to which establishment he acted as surveyor. B. at Edinburgh, 1734; D. 1811.

MYMENSING, *mi-men-sing'*, a district of British India, in the Bengal presidency. *Desc.* Level in some parts, hilly in others, and abounding in shallow lakes. *Pro.* Wheat, barley, sugar, hemp, rice, flax, and tobacco. *Pop.* 1,490,000. *Lat.* between 24° 4′ and 25° 40′ N. *Lon.* between 89° 28′ and 91° 13′ E.

MYENPOORE, *mirn'-poor*, a district of British India, in the N.W. Provinces. *Area*, 2,000 square miles. *Desc.* Level, and watered by the Jumna and other streams. *Pro.* Wheat, rice, barley, sugar-cane, tobacco, and cotton. *Pop.* 640,000. *Lat.* between 26° 54′ and 27° 50′ N. *Lon.* between 78° 30′ and 79° 30′ E.

MYRON, *mi'-ron*, a celebrated sculptor of ancient Greece, whose praises were frequently sung by both the Greek and Roman poets. He excelled in carving animals. He was the modeller of the Discobolus or Quoit-thrower, an ancient marble copy of which is in the British Museum. He flourished in the 5th century B.C.

MYSOL ISLE, *mi-sol'*, in the Asiatic Archipelago, between Ceram and Papua. *Ext.* 50 miles long and 15 broad. It exports slaves and shells. *Pop.* Unascertained. *Lat.* 2° S. *Lon.* 130° E.

MYSORE, *mi-sor'*, a large province of the south of India, principally surrounded by the British territories, subject to the presidency of Madras. *Area*, 30,886 square miles. It consists of a high table-land, elevated 3,000 feet above the level of the sea, from which rise a number of lofty hills, containing the sources of many rivers, the principal of which are the Cavery, Toombuddra, Vedawati, Bhadri, and Penar. *Climate.* Temperate and healthy to a degree unknown in any other tract of similar extent within the tropics. *Pro.* The grains and vegetables of other parts of India, and many of the fruits of Europe. The cultivation of the soil is much aided by means of reservoirs and wells, whence the farmers irrigate their fields and gardens. Horses, cattle, sheep, and swine, but none of them of a good size, are also reared. *Pop.* 3,000,000. *Lat.* between 11° 35′ and 15° N. *Lon.* between 74° 45′ and 78° 45′ E.—This country was ruled by Hyder Ali, and afterwards by his son Tippoo, who was slain at the taking of Seringapatam, and the country occupied by the British, who set up an heir of the ancient Hindoo family to rule in his stead. The state is now subsidiary to the British.

MYSORE, capital of the above province, about 9 miles from Seringapatam, on the top of a lofty hill. It was destroyed by Tippoo, but has since been rebuilt by the British, and made the seat of government. It is now about a mile in length, and continues to increase yearly in size and population. *Pop.* 65,000. *Lat.* 12° 18′ N. *Lon.* 76° 52′ E.

MYTENS, Daniel, *mi'-tens*, a Dutch painter, who went to England, and became the best portrait-painter at the court of James I. He painted portraits of James I., Prince Rupert, and the dwarf, Sir Jeffrey Hudson. When Vandyke became popular, Mytens retired to the Hague. B. in Holland, 1590; D. about 1660.

MYTILENE, or METELIN, *mit'-i-le'-ne*. (*See* MITYLENE.)

MZENSK, or MTZENSK, *mtsensk*, a town of European Russia, in the government of Orel, 30 miles from the town of that name. It has a large trade in hemp and corn, and was once important as a military post. *Pop.* 9,500.

## N.

NAAS, *naice*, a town of Ireland, in the county of Kildare, 10 miles from Dublin. The ruins of religious establishments still attest its former magnificence. It has a court-house and a gaol. *Pop.* 3,000.—It stands on a branch of the Grand Canal, near the South-western Railway.

NAB, or NAAB, *nap*, a navigable river of Bavaria, joining the Danube, after a course of 90 miles, 3 miles from Regensburg.

NABAJOA, RIO, *na-ca-ho'-a*, a river of Upper California, falling into the Rio Colorado of California, after an estimated course of 250 miles.

NABIS, *nai'-bis*, tyrant of Sparta, whom Philip, king of Macedon, appointed governor of Argos. He was guilty of the greatest cruelties, and had a statue, carved to resemble his wife, which, by springs, would embrace any one that touched it, and then pierce the victim through the body with spikes. This machine Nabis devised as a means of extorting money from his people; and when any one refused, he threatened to introduce him to his wife. He was slain B.C. 192.

NABLOUS, NABULOUS, or NAPOLOSE, *nap-loos'*, a city of Palestine, the ancient capital of Samaria, 32 miles from Jerusalem. It stretches along a valley at the base of Mount Gerizim. It has several mosques and bazars. *Manf.* Soap, and cotton fabrics. It has also a trade in oil, cotton, and other agricultural produce. *Pop.* 8,000.—Near it are several localities spoken of in Scripture; among which is Jacob's Well.

NABONASSER, *nai-bo-nâs'-ser*, king of Babylon. He is celebrated by the famous epoch which bears his name, and which commenced in the year 747 B.C. He is supposed to be the same with Baladan, the father of Merodach, mentioned in Scripture. Reigned between 748—734 B.C.

NABOTH, *nai'-both*, an Israelite of the city of Jezreel, who had a vineyard near the palace of Ahab. Ahab coveted the inheritance of his subject, and, to gain possession of it, caused Naboth to be stoned to death.

NADAB, *nai'-dăb*, king of Israel, was son of Jeroboam, whom he succeeded, B.C. 968. In the second year of his reign, he led "all Israel" against Gibbethon, but was slain during his siege of that city, by Baasha, son of Ahijah, who mounted the throne, and reigned 23 years, during which he "smote all the house of Jeroboam; he left not to Jeroboam any that breathed," as was prophesied by Ahijah the Shilonite.

NADIR-SHAH, *nai'-dir-sha*, called also Tamasp Kouli Khan, king of Persia, and a famous conqueror. He was son of a maker of sheepskin coats, who belonged to the tribe of Affshar, a Turkish tribe, which had attached itself to the king of Persia. Nadir, after he had become great, was fond of alluding to his mean origin; and when one of his sons, who was about to marry a princess of the royal family of Delhi, was requested to name his ancestors for seven generations, Nadir replied, "Tell them that he is the son of Nadir Shah, the son of the sword, the grandson of the sword, and so on, till they have a descent of seventy, instead of seven generations." From his earliest youth he displayed great courage and boldness. At the age of 17 he was taken prisoner by the Usbegs in one of their annual incursions into Khorassan. After a captivity of four years, he effected his escape, returned to his native country, and subsequently entered the service of the governor of Khorassan, who appointed him to command an army sent against the Tartars. Nadir gained a complete victory with an inferior force, and took the Tartar general prisoner. The governor at first treated him with great distinction; but becoming jealous of his aspiring spirit, he refused him a grade in the army he had promised him, and when Nadir complained of this breach of faith, he caused him to be bastinadoed. Exasperated at this dishonourable treatment, he became the leader of a

band of robbers. With this troop he rose to great power. In 1727 he joined Tamasp, son of the monarch of Persia, who had been pushed from the throne by the Affghan conquerors of Persia. His first act was to kill Futteh Ali, the commander of the Persian forces; after which he took the supreme command. In the same year, he drove the Affghans out of Mushed. After several great victories he took Ispahan, and put to death Askraff, the Affghan king. He next took the name of Tamasp Kouli, or "the slave of Tamasp," and was also ennobled with the title of Khan. He was likewise granted the four finest provinces of the kingdom. But this did not satisfy his ambitious nature, and upon the first opportunity, he deposed Tamasp, whose son, an infant eight months old, he proclaimed king, at the same time constituting himself regent. In 1735 he gained the battle of Erivan, in which the Turks lost 50,000 men. The infant monarch died in the same year; upon which Nadir called a great council of the kingdom, at which more than a hundred thousand persons are said to have attended, by whom he was acknowledged king. With the view of destroying the Affghans as an independent power, he invaded the province of Candahar, and in 1738 the city of that name fell into his power. In the following year he marched into Hindostan, and after defeating the Mogul troops, entered Delhi, where he acquired immense riches. After his return to Persia, he turned his arms against the king of Bokharah, who was compelled to submit. Nadir next marched along both banks of the Oxus, as far as the Caspian, which territory he conquered, and put its monarch to death in 1740. He had thus secured peace for Persia, whose dominions were extended in every direction. But his last years were characterized by cruel tyranny, which excited universal hatred against him, and at length a conspiracy of some of the highest officers of his court was formed, and he was assassinated in 1747. B. at the village of Abuver, Khorassan, 1688.

NAEFELS, *nai'-fels*, a small town of Switzerland, in the canton of Glaris, 4 miles from Glaris. *Pop.* 2,000. —Here, in 1388, a battle was fought between 1,300 Swiss and 6,000 Austrians, when the latter were defeated.

NÆVIUS, Cneius, *ne'-vi-us*, a Latin poet, who served in the first Punic war, upon which he wrote an epic poem. He likewise produced several comedies, one of which was so displeasing to Metellus, the consul, that he expelled him from Rome. Nævius retired to Utica, where he died, about 204 B.C. Some fragments of his are extant.

NAGORE, *na-gor'*, a seaport of India, in Tanjore. *Pop.* Unascertained. *Lat.* 10° 49′ N. *Lon.* 79° 55′ E.—2. Another in Bengal. *Lat.* 23° 56′ N. *Lon.* 87° 20′ E. *Pop.* Unascertained.

NAGOUR, *na-goor'*, a walled town of India, 250 miles from Delhi. It is well supplied with water. *Pop.* Unascertained.

NAGPOOR, *nag-poor'*, 'the town of serpents,' a city of India, the capital of a territory of the same name, 100 miles from Ellichpoor. It is of modern date, and, although very extensive, is meanly built, few of the houses consisting of more than one story, and covered with tiles. It is situate on a flue high plain, watered by a small river called the Nag. *Manf.* Arms, native cutlery, and silk and cotton fabrics. *Pop.* Unascertained, but considerable. *Lat.* 21° 9′ N. *Lon.* 79° 11′ E. —The TERRITORY is in the Deccan, and under British protection. *Area*, 76,430 square miles. *Pro.* Wheat, maize, pease, cotton, sugar, rice, betel, and tobacco. *Minerals.* Iron, talc, marble, and limestone. *Manf.* Brass and copper utensils, coarse woollen stuffs, cotton goods, and turbans. *Pop.* 4,650,000. *Lat.* between 17° 50′ and 23° 5′ N. *Lon.* between 78° 3′ and 83° 10′ E.

NAGY-BANYA, *nqj'-e ban'-ya*, a town of Hungary, 90 miles from Debreczin. It has a mint, where all the gold, silver, and copper found in the district are coined. *Pop.* 5,500.—NAGY is the prefix of several other towns in Hungary and Transylvania, with generally small populations.

NAHR EL KEBIR, *nar el ke'-bir*, a river of Syria, which, after a course of about 40 miles, falls into the Mediterranean, 20 miles from Tripoli.—NAHR is the name of several other rivers in Asiatic Turkey.

NAHUM, *nai'-hum*, one of the twelve minor prophets, was a native of Galilee, and prophesied in the reign of Hezekiah. He prophesied with great force against Nineveh. His language is vehement, and his descriptions glowing.

NAIADES, *nai'-a-dees*, certain inferior deities among the Greeks, who presided over rivers, springs, wells, and fountains. They generally inhabited the country, and resorted to the woods or meadow near the stream over which they presided. Ægle was the fairest of the Naiades, according to Virgil.

NAIRN, *nairn*, the county town of Nairnshire, at the mouth of the river Nairn, where it falls into the Moray Firth, 15 miles from Inverness. It is a neat little town, with a harbour for small vessels. The inhabitants prosecute the white, salmon, and herring fisheries. *Pop.* 3,500.

NAIRNSHIRE, a maritime county of Scotland, formerly included in the ancient province of Moray, with the exception of the detached portion of Ferintosh, which is now completely surrounded by Ross-shire. It is bounded N. by the Moray Firth, E. and S. by Morayshire, and W. by Inverness-shire. *Area*, 200 square miles. *Desc.* The general character is rather bleak, with the exception of a border along the coast, from one to six miles in breadth, and the valley of the river Nairn, which is extremely fertile and well cultivated. *Rivers.* The Findhorn, which intersects the southern part of the county, as do several smaller streams. Its agriculture resembles that of Morayshire. *Manf.* Unimportant. *Pop.* 10,000.

NAJERA, *na-he'-ra*, a town of Spain, in the province of Logrono, 16 miles from Logrono, and once the seat of the court of Navarra, but now in a state of decay. *Pop.* 3,000.—Here, in 1367, a battle was fought between the troops of Peter the Cruel and his brother Henry.

NAKHCHEVAN, *nak-che'-van*, a town of Asiatic Russia, 80 miles from Erivan. It is mostly in ruins, and claims to be the oldest city in the world. It stands in a district of the same name, ceded to Russia in 1828.

NAKHIMOV, Nicolavitch, *nak-he'-mof*, a Russian poet, who received his education at the university of Moscow; after which he entered the army; but soon quitted it, and devoted himself to literature. Possessed of considerable wealth, he retired to his estates, where he occupied himself with the composition of his "Fables" and a large number of prose satirical pieces. His satire in verse, entitled "The Speaking Monkey," was written in derision of the French, subsequently to the invasion of Russia by Napoleon I. This production is pronounced to be not inferior to the writings of Voltaire. B. at Kharhov, 1782; D. 1814.

NAKITCHEVAN, *na-kitch-e-van'*, a town of Russia, on the Don, 18 miles from Novo-Tcherkask. It is the residence of the Armenian patriarch for Russia. *Pop.* 15,700.

NAMUR, *na'-moor*, one of the provinces of Belgium, bounded partly by the French frontier, partly by the Belgic provinces of Hainault, South Brabant, and Liége. *Area*, 1,400 square miles. *Desc.* Hilly and fertile. *Rivers.* The Maese, the Sambre, the Lesse, and the Homme. *Pro.* The usual cerealia, hemp, and lint. Cattle are also extensively reared. *Minerals.* Iron, coal, copper, and lead. *Pop.* 270,000.

NAMUR, the capital of the foregoing province, stands at the conflux of the Sambre and the Maese, or Meuse, 30 miles from Liége. It is well built, with wide and clean streets, and is defended by a citadel, built on the summit of a craggy rock. The cathedral and the church of the Jesuits are both worthy of attention. The former is a fine specimen of modern, the latter of ancient architecture. *Manf.* Fire-arms, swords, knives, scissors, and other articles of iron, copper, and brass. Quantities of leather, paper, thread, and tobacco are also made. *Pop.* 25,000.—Namur has often changed masters, and is noted for the long siege which it sustained in 1692, against Louis XIV.; and again in 1695, against William III. of England. In the beginning of the 18th century, it was seized by the French, but in 1713 was ceded to Austria. In 1746 it was taken by the French, but restored to the Dutch in 1748. In 1793 it was taken by the French; in 1793 retaken by the Austrians. In 1794 it was again occupied by the French, who kept it till the general cession of the Netherlands in 1814. Under the French empire it was the capital of the

department Sambre-and-Meuse. It is connected with Brussels by railway.

NAN, *năn*, a town of Siam, the capital of Laos state, and on a tributary of the Me-nam. *Pop.* about 60,000. *Lat.* 20° 40′ N. *Lon.* 101° 20′ E.

NANCY, *năn'-se* (Fr. *nan-se'*), a city of France, capital of the department of La Meurthe, on the Meurthe, 30 miles from Metz. It is divided into the Old and New towns, and has a citadel; but its fortifications were destroyed by Louis XIV. The gates are particularly fine, and are more like triumphal arches than the mere entrance of a city. The royal square, built by Stanislaus, contains some of the finest buildings in the town. Of its public edifices, the chief are the town-hall, the cathedral, a large modern edifice, the church of St. Sebastian, the church of Notre Dame, and the theatre, all in the New town; the Palais de Justice, the exchange, the arsenal, the barracks, and churches. *Manf.* Embroidery, for which it is celebrated; also candles. *Pop.* 15,000.—In 1475, this place was taken by Charles the Bold, and in 1477 he was killed here, while besieging it. In 1634, it was taken by Louis XIII.

NANGASAKI, or NAGNASAKI, *nan'-ga-sa'-ke*, the principal seaport of Japan, standing on a slope on the S.W. of the island of Kin-sin. It is regularly built, and is one of the chief commercial cities of Japan, having an excellent harbour, and being resorted to by the Chinese and Dutch traders, who, however, are subjected to a watchful supervision by the fortified island called Desima, lying off the shore. The shops are numerous and well supplied. The chief edifices are the palaces of the governors and other grandees, the arsenal, several theatres, upwards of sixty temples, with numerous tea-houses, and the Dutch and Chinese factories. *Imp.* Sugar, cotton and woollen goods, sandal and sapan woods, ivory, cloves, buffalo-hides, tin, and Bengal piece-goods. *Exp.* Cotton fabrics, drugs, toys, camphor, copper, and silks. *Pop.* about 100,000. *Lat.* 32° 44′ 8″ N. *Lon.* 129° 51′ 53″ E.—This is one of the ports opened to the British by the treaty with Japan of 1858. (*See* JAPAN.)

NANI, John Baptist, *na'-ne*, a Venetian historian, who in 1641 was admitted of the college of senators, and sent ambassador to France. He returned to Venice in 1648, having obtained from Louis XIII. considerable succours for carrying on the war against the Turks. In 1654 he was sent as ambassador to Germany, where he rendered great services to the republic. He continued to serve his country on many great occasions, and was appointed procurator of St. Mark. He wrote the History of Venice. B. 1616; D. 1678.

NANKIN, or NANKING, *năn-kin'*, the 'Court of the South,' a city of China, not equalled, perhaps, by any in the world for the extent of ground which it covers; but since the seat of government was transferred to Pekin, it has lost its importance. It is situate on the river Yang-tse-kiang, and the space inclosed by the walls is divided into the inhabited and uninhabited parts. It is a seat of Chinese learning. Its chief ornaments now are the gateways, which are very lofty and splendid, with temples attached to them; the porcelain tower, nine stories and 200 feet high, and the "tomb of the kings," supposed to be the Ming dynasty; an observatory, and the governor's palace. *Manf.* Artificial flowers, paper, crape, satin, China or Indian ink, and nankin, which derives its name from that of the city. It is the centre of a very extensive trade, and is the residence of a grand viceroy, with authority over the Kiang provinces. *Pop.* Estimated at 500,000. *Lat.* 35° 2′ N. *Lon.* 118° 49′ E.—In 1842 a British force was kept before this place, till the final treaty of the 29th of August was signed and ratified between China and Great Britain.

NANNI, John, *nan'-ne*, a celebrated ornamental artist, who received instructions from Raffaelle, and decorated the Vatican with groups of birds, plants, fruits, &c. B. at Udine, 1490; D. 1564.

NANTES, *nănts* (Fr. *nant*), a commercial city of France, the capital of the department of the Loire Inférieure, about 27 miles from the mouth of the Loire, which is here crossed by a magnificent stone bridge, or rather a succession of bridges, extending in nearly a straight line over several islands. Immediately below the town, the different branches unite into a single channel. The form of the city, exclusive of the suburbs, is an oblong, of which the length is parallel to the river. The public edifices are, the cathedral, the town-hall, mint, and the prefecture; the castle, situate on the quay, at the eastern extremity of the town, and in a good state of repair, a theatre, national college, normal school, public library, observatory and a magazine of munitions for the marine. *Manf.* Extensive, and consist of spinning, weaving, and printing of cotton; also woollen and linen goods, cordage, earthenware, glass, hardware, and spirituous liquors. Shipbuilding is carried on to a considerable extent. The foreign trade of Nantes, though not great, extends to a number of different countries in Europe, as well as to America, the West Indies, and in a small degree to the coast of Guinea. The canal of Nantes connects the Vilaine and the Loire. *Pop.* 97,000. Nantes is noted in history for the celebrated edict issued there in 1598, by Henry IV., in favour of the Protestants, the recall of which, in 1685, by Louis XIV., is justly considered a fatal error in that memorable reign. In 1793 the town was attacked without success by a Vendean army. It is the birthplace of Fouché, and of Bougner the mathematician.

NANTEUIL, Robert, *nan'-te(r)-e*, a celebrated French miniature-painter and engraver, who drew the portrait of Louis XIV., in crayons, with such elegance, that the king appointed him designer and engraver to his cabinet. His engravings of portraits are highly valued. B. at Rheims, 1630; D. at Paris, 1678.

NANTINAN, *năn'-ti-nan*, a parish of Ireland, in the county of Limerick, 3 miles from Askeaton. *Pop.* 2,300.

NANTUA, *nan'-too-a*, a town of France, the capital of the department Ain, 16 miles from Bourg. *Manf.* Cotton, woollen threads, tanning, and paper-making. *Pop.* 4,000.

NANTUCKET, *năn-tuk'-et*, an island in Massachusetts, U.S., in the Atlantic, 56 miles from Cape Cod. *Ext.* 18 miles long, with a breadth of 4. *Pop.* 8,500.

NANTUCKET, a post-township and port of entry on the above island, 123 miles from Boston. It is the only town on the island, and contains several churches. *Manf.* Woollen ropes, and there are corn- and fulling-mills. *Pop.* about 7,000.

NANTWICH, or NAMPTWICH, *nănt'-wich*, a market-town of Chester, on the Weaver, 19 miles from Chester. It consists of several regular streets. The church is an ancient building, in the form of a cross; and it has various almshouses, schools, a workhouse, which was erected in Beam Heath, in consequence of a grant from the earl of Cholmondeley, to whom the town gives the title of baron. *Manf.* The chief are confined to salt and the making of shoes for export. The cotton manufacture is also pursued, and many people are employed in the making of gloves. The Chester canal terminates here with a handsome broad basin, forming a kind of harbour. *Pop.* 6,000.—In the beginning of the 18th century, large mines of rock-salt were discovered here. The salt-quarries, with their pillars and crystal roof, afford a very curious and singular appearance.

NAOS, *na'-ose*, a port of the Canary Islands, on the S. coast of Lanzarote. Also a cape on the S. side of the island of Faro.

NAPIER, John, Baron of Merchiston, *nă-peer'*, a celebrated Scotch mathematician, who, towards the close of the 16th century, discovered the method of superseding long and laborious arithmetical operations by the invention of his logarithmic tables, which, says Laplace, in his "Système du Monde," "by reducing to a few days the labour of many months, doubles, as it were, the life of an astronomer, besides freeing him from the errors and disgust inseparable from long calculations." The principles of this great invention were detailed by Napier in two works, published in the years 1614 and 1619. Besides other works, he wrote a curious pamphlet, entitled, "Secret Inventions profitable and necessary in these Days for the Defence of the Island," the original of which is kept in the archbishop of Canterbury's library at Lambeth. B. at Merchiston Castle, near Edinburgh, 1550; D. at the same place, 1617.

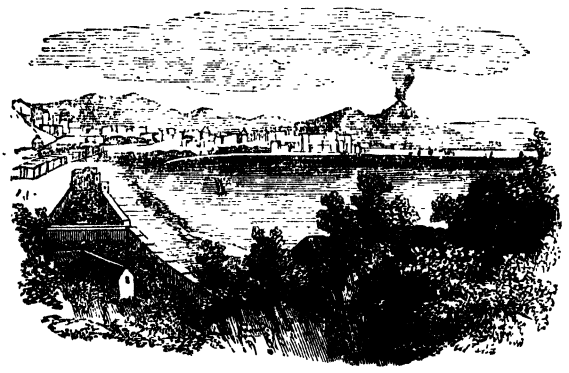
NAPIER, Sir Charles John, a modern British admiral, who, in 1799, at the age of 13, entered the navy, and served in the North Sea, on board the *Martin* sloop of war. In the following year he went to the Mediterranean station, where he took part in several minor

actions, and had his thigh broken by a shot, during an engagement between the *Recruit* brig and a French corvette. In 1809 he displayed signal bravery at the taking of Martinique, being the first to scale the walls. For this and some subsequent services he was created post-captain; after which he served as volunteer on land in Spain. In 1811 he stormed the heights near Talinuro, in Sicily, under a tremendous fire, and captured a number of the enemy's merchant vessels. He was engaged in 1813 in North America, where he won for himself the thanks of his superior officer for his bravery during the operations which took place before Baltimore. At the conclusion of the war, in 1815, he struck his flag and went ashore; upon which he was created C.B. He remained without employment during 14 years; but, in 1829, was sent to Portugal to procure the restoration of some ships which Don Miguel had seized. As commander of the Portuguese fleet, he, in 1833, gained a victory over Don Miguel's squadron; for which service Don Pedro created him admiral of the Portuguese fleet and Viscount Capo Santo Vincent, adding to these honours the order of the Tower and Sword. He resigned this command, however, at a later period, and returned to England. In 1839 he was appointed second in command of the Mediterranean squadron, under Sir Robert Stopford. In this capacity he maintained his former reputation for personal fearlessness, and took a distinguished part in the storming of Sidon, the defeat of Ibrahim Pacha at Beyrout, and the taking of Acre. For these services he received the thanks of parliament, and was created K.C.B., as well as obtaining several military and naval orders from the European potentates. He was shortly afterwards created rear-admiral, and, during two years, commanded the Channel fleet. He was unemployed until 1854, but in the meanwhile republished his letters upon Naval Reform, in which, amongst many other important suggestions, he advocated the abolition of flogging. In the last-mentioned year, he was appointed to the command of the Baltic fleet, about to be dispatched against the forts and ships of Russia in that sea. His operations in that quarter induced a large amount of ill-feeling between himself and the ministry of the day. It is true, he himself declared, in an after-dinner speech, that, in less than a month, he would be within Cronstadt; while, after his return, he maintained that the fortress was impregnable. He returned to England at the end of the year 1855, and was soon afterwards elected to parliament by the borough of Southwark, in the place of the late Sir William Molesworth. He soon engaged in a parliamentary warfare with the ministry, whom he charged with fettering him with galling restrictions, and with otherwise hampering him during his command in the Baltic. A few years before his death, he paid a visit to Russia, where he had an interview with the Grand-duke Constantine, who agreed with him in asserting Cronstadt to be impregnable. Sir Charles Napier undoubtedly possessed all the personal bravery and daring which belonged to his name, and a strong spice of the family vanity withal; but, as a commander, he appeared to succumb to that trying accompaniment to all great posts of leadership, where immense interests are at stake,—responsibility. A good sailor, and a good friend of the British sailor, he was undoubtedly. B. at Merchiston Hall, N. B., 1786; D. 1860.

NAPIER, Sir Charles James, a distinguished modern general, cousin of the preceding. Before he had attained his 12th year, he obtained his commission as ensign in the 22nd regiment. His first services were during the Irish rebellion of 1798. In 1806 he became captain, and was ordered to Spain, where he held the command of the 50th foot during the memorable retreat of Sir John Moore upon Corunna. At the battle which terminated that terrible march, he was wounded in five places, was taken prisoner, and, on repairing to England upon parole, he found his relatives in mourning for his supposed death. Remaining for some time without a command, he occupied himself with writing upon military law, colonization, and the state of Ireland; but, in 1809, he again went to Spain as a volunteer, received a severe wound at Busaco, participated in the terrible battle of Fuentes de Onoro, and was present at the second siege of Badajoz. His next services were in North America, in the year 1813. He was a few days too late to share in the British triumph at Waterloo, but was present at the storming of Cambray; and when the British army entered Paris, he accompanied it. His great talents for administration were first displayed while governor of Cephalonia, to which post he was nominated not long after his return from Paris. In that capacity he co-operated with Lord Byron in a scheme for the independence of the Greeks. In 1841 he was sent out to India as commander-in-chief of the Bengal army, and, in a short time, his energetic mind was busy with numberless plans of military reform. Upon the arrival of Lord Ellenborough, who had been created governor-general of India, Sir Charles Napier submitted to him a plan for an Affghan campaign. The Ameers of Scinde were at that period strongly disposed to dispute the authority of British arms, the prestige of which had been much shaken by the recent disasters in Affghanistan. Napier decided to attack them at once; he invaded their territory, blew up the fortress of Emaum Ghur (hitherto deemed impregnable), and finally routed them with immense slaughter, although his own numbers were very inferior, at the battle of Meanee, in 1843. Taking possession of Hyderabad, and outflanking Shere Mohammed by a series of brilliant manœuvres, Napier made himself master of Scinde in a space of time which appears truly astonishing, when the difficulties with which he had to contend, and the small force at his disposal, are taken into consideration. His military operations brought to an end, his great talents for administration came into play. His brother, Sir William Napier, in the "Narrative of the Administration of Scinde," thus characterizes his services:—"Two years only elapsed since he quitted Sukkur to make war on the Ameers, and in that time he had made the march to Emaum Ghur, in the great desert, gained two battles, reduced four large and many smaller fortresses, captured six sovereign princes, and subdued a great kingdom. He created and put into activity a permanent civil administration in all its branches, conciliated the affection of all the different races which inhabited Scinde, had seized all the points of an intricate foreign policy, commenced a number of military and other well-considered works, and planned still greater ones, not only suited to the exigencies of the moment, but having also a prospective utility of aim." In 1847 he returned to England, where he was enthusiastically received. During the reverses of the Sikh campaign, however, he was once more called upon to repair to India. He set out immediately; but when he reached the country, the tide of battle had turned, and the Sikhs were utterly defeated. After a short but decisive campaign,—not in the field, but with British officers' extravagant and luxurious mode of living, he returned to his native country in 1850. From that time, his shattered frame, worn out by so many fatigues, began to grow rapidly weaker and weaker, till, three years after his return, his gallant soul passed away in death, under the colours of his first regiment, the 22nd foot. A statue, in bronze, of Sir Charles Napier was, a short time ago, erected, by subscription, in Trafalgar Square. B. in London, 1782; D. at Oaklands, near Portsmouth, 1853.

NAPIER, Sir William Francis Patrick, a British general and distinguished military historian, brother of the preceding. Like him, he entered the army at an early age, being only 15 when he was gazetted to his first commission as ensign, in 1800. He was engaged at the siege of Copenhagen in 1807, served under Sir John Moore at Corunna, and passed through the subsequent campaigns in the Spanish peninsula till its conclusion in 1814. He was severely wounded at Cazal Nova, during Massena's retreat from Portugal, and again while defending the churchyard of Arcangues. At the peace he had attained the rank of lieutenant-colonel. In 1828 he published the first instalment of his great work, entitled "The History of the War in the Peninsula and the South of France, from the Year 1807 to the Year 1814," which was completed, in six volumes, in 1840. Two years afterwards, by which time he had reached the grade of major-general, he was nominated lieutenant-governor of Guernsey; which post he held till 1848, when he became knight commander of the order of the Bath. His other publications were "The Conquest of Scinde," "His-

tory of General Sir Charles Napier's Administration of Scinde, and Campaign in the Cutchee Hills," and some pamphlets connected with military matters. His "History of the Peninsular War" occupied him during sixteen years, and both the duke of Wellington and Marshal Soult supplied him with valuable materials during its composition. The many editions this work has passed through, and the high estimation in which it is held, attest its great merits as a record of the greatest war in which the British arms were ever engaged. The "English Cyclopædia" thus speaks of the work:—"The historian is skilled in the science and practice of war, is well informed in the politics of the time, and has written the work honestly and in good faith, from excellent materials, and in a lofty and severe morality. The narrative is exceedingly interesting; the leading events are distinctly traced and connected, and the leading characters briefly but vividly sketched. The sites of the battles are clearly described, and the arrangements, manœuvres, and evolutions made intelligible, even to non-military readers. The style is original, clear, and vigorous; and, though somewhat laboured and declamatory, has a peculiar charm, from its seeming to be obviously the outpourings of his own carefully-collected thoughts and well-considered convictions." B. at Castletown, Kildare, Ireland, 1785; D. 1860.



NAPIER, Sir George Thomas, brother of the preceding, served in all the campaigns in the Peninsula, was present at the battles of Talavera and Orthes, and was wounded at the battle of Talavera and at the siege of Ciudad-Rodrigo. He was sent out as governor of the Cape in 1837, where he effected many civil reforms, and dealt successfully with the Boers and Kaffirs. He returned to England in 1844, and, while staying in Italy, in 1849, was offered the command of the Piedmontese army, which he refused. Shortly afterwards, he attained the rank of lieutenant-general. B. in London, 1784; D. at Geneva, 1855.

NAPLES, Francis Marie-Leopold, King of, was the son of Ferdinand II., by Maria Theresa Isabella, daughter of the archduke Charles of Austria. Francis II. succeeded his father Ferdinand II. in 1859 (*see* FERDINAND II.), having previously married the Princess Maria Sophia Amelia, daughter of Maximilian Joseph, duke of Bavaria. From the outset of his reign he evinced a disposition to pursue the same arbitrary and detestable rule as his late father, King Bomba, of unhappy memory. Already had he earned the nickname of Bombalino, or Little Bomba, from his cruelly-treated and miserable subjects, when the great liberator, Garibaldi, after taking Messina and Palermo, and delivering Sicily, with a mere handful of followers, crossed the straits and marched upon Naples. Francis II., with a portion of his army, left the capital, but afterwards made a stand against the Piedmontese. Repulsed on each occasion, he was compelled to shut himself in Gaeta, where he lies at the time this notice is written, maintaining a defence of the place against the army of Victor Emmanuel with a certain obstinacy, —it cannot be called heroism, when the character of Francis is taken into consideration. B. 1836.

NAPLES, KINGDOM OF, *nā'-pelz*, a division of the former kingdom of the Two Sicilies, comprising the whole of the continental portion of the state. It occupies the southern part of the Italian peninsula, and is bounded N.W. by the States of the Church, N.E. by the Adriatic, and S. and W. by the Mediterranean. *Political Divisions.* These consist of the following provinces:—Napoli, or Naples, Terra di Lavoro, Principato Citra, Principato Ultra, Abruzzo Ultra I., Abruzzo Ultra II., Abruzzo Citra, Capitanata, Molise, Terra di Bari, Terra d'Otranto, Basilicata, Calabria Citra, Calabria Ultra I., and Calabria Ultra II. *Capes.* Sorrento, Gaeta, Baia, Vaticano, Nan, and Leuca. *Gulfs.* Manfredonia, Gaeta, Salerno, Policastro, Gioja, Squillace, St. Eufemia, and Taranto. *Area,* 32,620 square miles. *Desc.* In comparing the Italian peninsula to a boot, the kingdom of Naples forms the foot and lower part of the leg. The surface, like that of great part of Italy, is mountainous; but it contains also a number of beautiful plains and extensive valleys, though traversed by the great chain of the Apennines, which separates into several lateral branches. The highest summit is Monte Corno, which is 9,520 feet above the level of the sea. The principal isolated summits are Vesuvius and Monte Gargano, near the Adriatic. *Rivers.* The Garigliano, the Volturno, the Basiento, the Pescara, Biferno, Candelaro, the Sangro, Bradano, Crate, and the Ofanto, the ancient Aufidus. *Lakes.* Celano, Agnano, Averno, Licola, Fusaro, Patrea, Lesina, and Fondi. Marshes, or rather large lagoons, are found on various parts of the seacoast, and, by their insalubrity, render some of the most fertile tracts almost uninhabitable. *Climate.* This might be divided into three regions. In the Campagna Felix, the air is almost invariably genial, and the sky serene. Beyond the Apennines, and opening to the east and south, the climate is hotter, and exhibits the productions of southern latitudes. The mountainous regions vary according to their elevation. *Zoology.* Of wild animals, the lynx, or tiger-cat, and the wild boar, are the most formidable. There is the crested porcupine, said to be peculiar to the south of Italy, whilst snakes and other reptiles are common in the hot districts. Game of all kinds abound in the forests, and among the marshes buffaloes pasture in herds. The domestic animals comprise goats, sheep, and pigs; cattle are extensively raised, besides horses of a small and active breed. The coasts have always been distinguished for the quantity of fish they produce. *Pro.* Wheat, Indian corn, barley, and, in the colder situations, rye. In many parts corn, vines, and olives are cultivated by the same persons, and on the same farm. In general, the larger proportion of labour, if not of ground, is given to the grape: the celebrated *Lacryma Christi,* or red wine, is grown on the sides of Vesuvius. The wines of Naples are accounted the best in Italy. Rice is produced in the marshy tracts, cotton in the province of Otranto, and tobacco in many of the southern districts. Flax, hemp, and silk are cultivated to a large extent; and, in warmer situations, olives, oranges, with melons, almonds, dates, figs, lemons, pomegranates, and other fruit, indicative of an approach to a tropical climate. Manna is an important product of Calabria, and of almond-trees there are forests in several parts, especially on the east coast. Olive-oil forms a great object of export. Apulia, Calabria, and the mountainous parts of other provinces, contain very extensive forests. Along the coasts, large numbers of the inhabitants are employed in the tunny, anchovy, mullet, and coral fisheries. *Minerals.* Salt, alum, vitriol, sulphur, crystal, and marble. *Manf.* Unimportant: they mostly consist of muslins and other cotton stuffs, porcelain, fire-arms, paper, glass, and cutlery. *Exp.* Silk, wool, hemp, wine, olive-oil, grain, macaroni, and coral. *Imp.* Iron, cutlery, and manufactured goods. *Rel.* Roman Catholic. Monasteries and nunneries are numerous. *Army.* About 100,000. *Navy.* About 30 vessels, of various sizes. *Pop.* About 7,000,000. *Lat.* between 37° 56′ and 42° 55′ N. *Lon.* between 12° 54′ and 18° 33′ E.—Before 1837, the kingdoms of Naples and Sicily had each a species of provincial council called Consulta; but these were united in the Consulta generale common to both kingdoms, as all the other political institutions are. In 1848, a constitutional form of government was granted, and on the obtainment of the liberty of the press, several journals were published; but in the end of 1849 they were entirely suppressed. In 1861, Naples, by a constitutional vote, placed itself under the rule of Victor Emmanuel, the sovereign of the Two Sicilies.

NAPLES, a city of Italy, the capital of the kingdom of the Two Sicilies, and of the province of *Napoli,* situate on the Bay of Naples, near the foot of Mount Vesuvius. The situation of Naples is one of the most delightful that can be imagined. In the form of an amphitheatre, it is built partly on the declivity of a hill, partly on the margin of a spacious bay, spreading its population along the shore, and covering the shelving coasts and adjacent eminences with its villas and gardens. The bay is extensive, and presents an almost unrivalled assemblage of picturesque and beautiful scenery. The streets, though in general narrow, are straight and tolerably regular, and are handsomely paved with large flags of lava. They are tolerably clean, the filth being carried off by large subterranean sewers; but many of them are dark and gloomy, from their narrowness and the height of the buildings. The Strada di Toledo, extending half the length of the city,

and having at the one end the Piazza di Mercato, on the other the royal palace, is the finest street in Naples, and equal to any in Europe. The number of squares is considerable: several are spacious, but few handsome. The principal are the Largo di Castello, Largo di Palazzo, and Piazza di Mercato: several of them are decorated with obelisks and fountains. The buildings of Naples are rather remarkable for their size than for their taste or elegance. The quays and buildings along the water-side extend, in the form of a crescent, along the bay, for the space of nearly five miles. The royal garden in this suburb is a favourite promenade. The harbour, properly so called, is small, and is entirely artificial, being formed by a large mole projecting into the sea, and inclosing a basin nearly square, which is little more than a quarter of a mile across. The fortifications of Naples are not adapted to resist an army,

NAPLES.

though the city is surrounded with a wall and defended by a number of towers, as well as by several forts and castles. The arsenal adjoins the sea, and is defended by bastions. Of the public edifices, the churches are the most conspicuous; but their splendour consists less in the elegance of architecture than in the richness of their paintings, marbles, and other decorations. The cathedral, built on or near the substructure of a temple of Apollo, is a handsome Gothic edifice: it is supported by more than a hundred columns of granite. The Santi Apostoli, or church of the Holy Apostles, erected on the ruins of a temple of Mercury, is, perhaps, the most ancient in Naples. That of St. Paul is said to occupy the site of a temple of Castor and Pollux: its interior is spacious, well-proportioned, and finely incrusted with marble. The church of St. Filippo Neri is remarkable for the number of ancient pillars that support its triple row of aisles on both sides of the nave. The Spirito Santo is of a more pure and simple architecture than the other churches of Naples. The palaces and the mansions of the nobility have little pretensions to purity of architecture, and are, in general, too much loaded with ornaments. The royal palace, at the southern extremity of the Strada di Toledo, has an air of grandeur. The palace of Capo di Monte is situate outside of the town, and has its best apartments appropriated to a collection of paintings. The old palace of the sovereigns of Naples is now occupied by the courts of justice. There are ten theatres, great and small: the one called San Carlos, contiguous to the royal palace, is one of the largest in Italy. Of the literary institutions, the university was founded in 1224, and, in 1841, had upwards of 1,500 students. Its interior contains a collection of statues belonging formerly to the Palazzo Farnese at Rome. It has a large library, besides ancient MSS., a museum of paintings, sculpture, bronzes, &c. The schools and academies are numerous; but there is much ignorance in the city. The charitable establishments are numerous and well endowed. *Manf.* Silk fabrics, and, on a small scale, stockings, carpets, flannels, gloves, lawn, lace, cotton stuffs, and diaper. Those of firearms, china, and glass are of some importance; but those of soap, leather, and wax are of little account. A good deal of ingenuity is displayed in making violins and other musical instruments; also in mahogany furniture and carriages, and even in the petty manufacture of snuff-boxes from lava and tortoise-shell: macaroni is also extensively made. There are, besides, royal type-foundries and iron-works. *Inhabitants.* The higher ranks are frequently ignorant, frivolous, and dissipated; while, in the lower orders, the most striking characteristics are indolence and superstition. The lazzaroni are a part of the populace without either dwellings or regular occupation. They pass their lives in the streets, lying in the shade or sauntering about during the day, and sleeping at night under a public portico, on the pavement, or on the steps of a church: their number is said to have been formerly between 30,000 and 40,000; but they are still considerable, and there is, perhaps, no city in Europe where so small a proportion of the inhabitants contribute to the wealth of the community by productive labour. The city literally swarms with nobility without fortunes, priests without benefices, and beggars of all descriptions. *Pop.* about 420,000. *Lat.* of observatory, 40° 51′ 8″ N. *Lon.* 14° 15′ 5″ E. —The environs of Naples are picturesque, and highly interesting to the antiquary and classical scholar. The origin of the city is lost in the fables of antiquity: it is said, however, to have been founded by the Greeks, and called by them Parthenope. It has suffered, at different periods, from war, earthquakes, and the eruptions of Vesuvius. In 1799 it was taken by the French, who, in June following, evacuated it, but again occupied it in 1806. Joseph Bonaparte was soon after proclaimed king; and in 1808, on his removal to Spain, the crown was conferred on Murat. In 1815, King Ferdinand, after an absence of nine years, made his entrance into his capital. In 1848 it was plundered by the lazzaroni, of whom 1,500 lost their lives. In August, 1860, Francis II. was forced to retire to Gaeta, on the approach of Garibaldi, the Italian liberator, from Salerno. In September, that chief entered the city without bloodshed, and was hailed as the deliverer of his country.—Among the numerous objects of interest in the vicinity are the island of Capri, in the bay, Vesuvius, Herculaneum, and Pompeii. It is the centre of several railways.

NAPO, *na'-po*, a river of S. America, rising in the mountain deserts of Cotopaxi, and, after an estimated course of 500 miles, joining the Amazon, in *lat.* 3° 26′ S.

NAPOLEON I., Napoleon Bonaparte, *nă-pole'-yon* (Fr. NAPOLÉON, *na-po'-lai-on*), emperor of the French. He was the second son of Charles Bonaparte, assessor to the Royal tribunal of the island of Corsica. At the age of 10 years, the young Napoleon, a "dusky-complexioned, taciturn boy," obtained admission to the celebrated military school of Brienne, through the interest of Count de Marbeuf. He remained there during five years, distinguishing himself by his steady application to his studies. In 1784 he passed to the Royal Military School at Paris, which establishment he left a year afterwards, upon his appointment as sub-lieutenant to an artillery regiment. He paid two visits to Corsica, in the years 1790 and 1792, but was banished from the island by Paoli in the latter year. For about a year he resided at Marseilles with his mother and sisters, but was created captain in 1793, for having cannonaded the Marseilles federalists. In the same year he was created colonel, and was sent to the siege of Toulon, then holding out against the Convention, and supported by an English fleet under Lord Hood. Now came Napoleon's opportunity, and the astute Corsican was quick to avail himself of it. Several attacks had been made, and had failed, when young Napoleon suggested an entirely new plan of attack. The plan was tried, and was perfectly success-

ful, the English admiral being compelled to put to sea. Toulon surrendered, and Napoleon was created general of brigade by the Committee of Public Safety. In 1794 he was attached to the army of the Alps, as commander of the artillery, but becoming an object of suspicion with the government, he was recalled to Paris, and had his name struck off the army roll. For some time he remained in poverty and obscurity, and at one period thought of offering his sword to the Turks. The Parisian insurrection of the 13th Vendémiaire (5th Oct. 1795) changed his situation. His friend and admirer Barras was appointed by the Convention to command the 6,000 troops they had at disposal. Barras chose Napoleon as his second in command. He repulsed 40,000 insurgents, killing some 1,200 of them with grapeshot. The Convention rewarded him by creating him general of division. In the following year he married Josephine, widow of Viscount de Beauharnais, who had lost his head during the reign of terror. Shortly afterwards, he received the command of the army of Italy, then in a defeated and disorganized condition. In a year and a half, the "little corporal," as he came to be called by his admiring soldiery, had either routed or destroyed four armies, each stronger than his own,—that of Beaulieu, at Cairo, Montenotte, Millesimo, Dego, and the bridge of Lodi; that of Würmser, at Castiglione, Roveredo, and Bassano; that of Alvinzi, at Arcole, Rivoli, and Mantua; that of Prince Charles, whom he pursued into Germany as far as Leoben, upon the road to Vienna. The result of this unexampled career of victory was the treaty of Campo-Formio, which secured to France a vast accession of territory. The young general was now the most popular man in France, and the Directory, eager to get rid of their dangerous rival, accepted a proposal made by him for the invasion of Egypt, and appointed him commander-in-chief of a finely-equipped expedition, which sailed for the East in 1798. He took Alexandria, gained over Mourad Bey the battle of the Pyramids, and, although the fleet had been destroyed by Nelson at Aboukir, the French were soon masters of Egypt. Suddenly quitting his army, he set sail for France, and, after narrowly missing capture by the English cruisers, appeared, unexpectedly, at Paris at the end of the year 1799, at a time when the administration of the Directory had grown irksome to the nation. Bonaparte at once became the head of a very powerful party, and, aided by Sieyès, his brother Lucien, and General Leclerc, he overthrew the Directory on the famous 18th Brumaire, year 8 of the Republic (9th Nov. 1799), caused himself to be named first consul, having for his colleagues Cambacérès and Lebrun, also dignified by the title of consul, but mere tools to his ambition. In 1800 he placed himself at the head of the army of Italy, crossed the Alps, and gained the battle of Marengo. General Moreau having about the same time beaten the Austrians at Hohenlinden, the peace of Luneville was signed with Austria in 1801, and in the following year the treaty of Amiens with England concluded the second war of the French Revolution. In the same year he was proclaimed consul for life: in 1804 he became emperor of the French. Pope Pius VII. went to Paris to assist at the ceremony, but Napoleon placed the crown upon his own head, and also crowned his consort Josephine. Six months later he erected the Cis-Alpine Republic into a kingdom, and crowned himself king of Italy at Milan. About this time he committed an act which forms one of the foulest blots upon his memory. Some time previously, his life had been threatened by a plot, in which the Bourbon princes were implicated. Resolved to make an example of one of them, he caused the young duc d'Enghien to be seized, and after a disgraceful mockery of a trial, the innocent prince was shot at Vincennes. Napoleon gloried in this odious act. "I had never personally offended these Bourbons," he wrote; "a great nation had chosen me to govern it, almost all Europe had sanctioned its choice. My blood, after all, was not ditch-water, and it was time to place it on a par with theirs." In 1805, the destruction of the combined French and Spanish fleets by Nelson at Trafalgar completely overturned his long-cherished scheme for the invasion of England. In the same year, England, Russia, and Austria entered into a new coalition against France, and the

Napoleon

battle of Austerlitz was fought, and terminated so successfully for France, that a large accession of territory was gained, and what she already possessed was confirmed to her by the treaty of Presburg. In 1806 he placed his brother Joseph upon the throne of Naples, Louis becoming king of Holland: the victory of Jena was obtained towards the close of the same year. Russia was next attacked, and the emperor Alexander was compelled to sign the peace of Tilsit. Jerome Bonaparte was then placed upon the throne of Westphalia. In 1808, Napoleon made his unprincipled invasion of Spain, sending Murat and 80,000 men thither. Charles IV. and his family retired to French territory, where they virtually became prisoners of Napoleon, who placed his brother Joseph upon the throne of Spain, and gave Naples to Murat. But Spain resisted the French invaders, and the defeat and capitulation of Dupont at Baylen, and Junot at Cintra, were the commencement of the declining fortunes of the self-created emperor. Notwithstanding the greatest efforts of Soult, Massena, and Suchet, Spain, backed by the brilliant genius of Wellington and his fine army, repulsed the French. This struggle cost France, in five years (1808—1813), more than 400,000 men. Meanwhile, Josephine, having given no heir to the empire, was divorced by Napoleon, in 1809, and Maria Louisa, daughter of his old enemy the emperor of Austria, became empress of the French. The fruit of this union was a son, who, at his birth, was styled king of Rome. (*See* NAPOLEON II.) About this time, Fouché, Bernadotte, and several others, began to withdraw from him; Pope Pius VII., who had been stripped of his temporal dominions, excommunicated him; finally, the prohibitive system of continental commerce, which he had organized with the view of ruining England, begat, instead, universal poverty and misery throughout France. Having drained France of her treasure, he next conceived a formidable invasion of Russia, which was to rob France of the flower of her youth and manhood. In 1812 he assembled the largest army that was ever led by a European general, and, at the head of 500,000 men, passed into Russia, whose army he defeated in several engagements. In September he entered Moscow, which had been previously evacuated and almost totally consumed. After spending a month there, in expectation of overtures of peace from St. Petersburg, the frost and snow of a Russian winter compelled him to commence a precipitate retreat. Harassed by innumerable foes, the French army, deprived of everything, perished in the snow, or found a grave in the icy waters of the Beresina. Hastily returning to France, the emperor succeeded in creating another army, and opened the campaign in Germany with the victories of Lutzen, Bautzen, and Dresden; but Russia, Prussia, Austria, and Sweden were now in arms against him; and at Leipsic, where, in three days, the French lost upwards of 50,000 men, his power received a death-stroke. The allies entered France, and Napoleon, finding his army disorganized, and most of his ministers and generals disaffected towards him, abdicated the throne of France, at Fontainebleau, on the 4th of April, 1814. The Bourbons were re-established in France, Napoleon accepting the island of Elba for his retreat. In less than a year he again appeared in France, and, by the time he had reached the capital, the whole army had declared for him. Immediately, the coalition that had dethroned him was renewed; but Napoleon, at the head of his brave and enthusiastic troops, took the initiative, and defeated the Prussians at Ligny, on the 16th of June. Upon the 18th he suffered defeat at the hands of Wellington, at the memorable field of Waterloo. Four days afterwards, he abdicated in favour of his son. His new reign lasted for, and is generally styled, the Hundred Days. He set out for Rochefort, with the intention, it is stated, of escaping to America; but not being able to evade the English cruisers, he surrendered to Captain Maitland, of the *Bellerophon*, and claimed the hospitality of England. The English cabinet, however, declared him to be the prisoner of the allies, and he was dispatched to the island prison of St. Helena. For nearly six years did this extraordinary man pine in bondage, the bitterness of which was augmented by the petty tyranny of Sir Hudson Lowe, the governor of the place. The opinions

relative to Napoleon are as numerous and conflicting as his many biographers. Let us, in the first instance, regard his character from a French point of view: "Napoleon ranks with Alexander, Cæsar, and Charlemagne, and was one of the greatest men the world has ever seen. He possessed, in the highest degree, the genius of the warrior and of the administrator; he put an end to anarchy, reconstituted society, re-established the Church, promulgated the Code, and placed France at the head of nations. Nevertheless, we must reproach him with overwhelming ambition, and too great a love for war, which plunged our country into the deepest misfortunes. Moreover, he stifled public liberty, and did not scruple to have recourse to the most violent measures." The foregoing is perhaps the highest panegyric that even a Frenchman can pass upon him. His character has been laid bare by Emerson, who takes the philosophical standpoint, and regards Napoleon with that hardy scepticism which is necessary to history. He says, "Napoleon was singularly destitute of generous sentiments. The highest-placed individual in the most cultivated age and population in the world, he had not the merit of common truth and honesty. He is unjust to his generals, egotistic and monopolizing; meanly stealing the merit of their great actions from Kellermann and from Bernadotte; intriguing to involve his faithful Junot in hopeless bankruptcy, in order to drive him to a distance from Paris, because the familiarity of his manners offends the new pride of his throne. He is a boundless liar. The official paper, his 'Moniteur,' and all his bulletins, are proverbial for saying what he wished to be believed; and worse, he sat, in his premature old age, in his lonely island, coldly falsifying facts and dates and characters, and giving to history a theatrical *éclat*. Like all Frenchmen, he has a passion for stage effect. Every action that breathes of generosity is poisoned by this calculation. His star, his love of glory, his doctrine of the immortality of the soul, are all French. 'I must dazzle and astonish. If I were to give the liberty of the press, my power could not last three days.' To make a great noise, is his favourite design. 'A great reputation is a great noise; the more there is made, the further off it is heard. Laws, institutions, monuments, nations, all fall; but the noise continues, and is heard in after-ages. This doctrine of immortality is simply fame.' His theory of influence is not flattering. 'There are two levers for moving men,—interest and fear. Love is a silly infatuation, depend upon it; friendship is but a name.' He would steal, slander, assassinate, drown, and poison, as his interest dictated. He had no generosity, but mere vulgar hatred; he was intensely selfish; he was perfidious; he cheated at cards; he was a prodigious gossip, and opened letters, and delighted in his infamous police; he rubbed his hands with joy when he had intercepted some morsel of intelligence concerning the men and women about him, boasting that 'he knew everything,' and interfered with the cutting of the dresses of the women, and listened after the hurrahs and the compliments of the street incognito. His manners were coarse; he treated women with low familiarity; he was in the habit of pulling their ears, and pinching their cheeks, when he was in good humour, and of pulling the ears and whiskers of men, and of striking and horseplay with them to his last days. It does not appear that he listened at keyholes, or, at least, that he was caught at it. In short, when you have penetrated through all the circles of power and splendour, you are not dealing with a gentleman at last, but with an impostor and a rogue; and he fully deserves the epithet of 'Jupiter Scapin,' or a sort of scamp Jupiter." At Saint Helena he dictated his memoirs, which were afterwards published with many interpolations, as the "Memoirs of Las Casas," and again as the "Memoirs edited by Count Montholon." He died and was interred at St. Helena, in 1821; but his remains were brought to France, on board of a ship of war, by Prince de Joinville, in 1840. They now rest under the dome of the Invalides, in the midst of the ashes of many who were his companions in victory. B. at Ajaccio, Corsica, 1769.

NAPOLEON II., Francis Charles Joseph Napoleon, duke of Reichstadt, was the son of Napoleon I. and Maria Louisa, and at his birth was styled king of Rome. After the abdication of his father, an attempt was made to proclaim him emperor, but it was soon abandoned. When the allies entered Paris, his mother fled with him to her father's court. He was brought up by his grandfather Francis, emperor of Austria, by whom he was created duke of Reichstadt in 1818, and appointed colonel of a regiment of cavalry. This young prince, who was apparently born to such a brilliant destiny, died shortly after he had attained his 21st birthday, of consumption. There are ugly rumours current, that his grandfather deliberately planned his destruction, and employed the gay duke of Salerno to entice him into every form of dissipation, by which his strength was undermined, and his premature death brought about. B. at Paris, 1811; D. 1832.

NAPOLEON III., Charles Louis Napoleon Bonaparte, emperor of the French. He was the third son of Louis Napoleon Bonaparte, king of Holland, and of Hortense Beauharnais, daughter of the empress Josephine. Queen Hortense's three sons were decreed to be successors to the French throne in the event of the death of the king of Rome. (*See* the preceding.) The eldest, Napoleon-Charles, who was brought up by Napoleon, died in 1807; the second, Napoleon-Louis, died in his brother's arms at Forli, in 1831. In the history of modern times, there are few examples of men who have passed through greater changes of life than this survivor of the queen of Holland's sons. "Born in a palace," says one of his latest biographers, "for a while the heir-presumptive of the greatest monarch in Europe, he was afterwards thrown headlong from that high estate, and condemned, in obscurity and exile, to associate with the sons of tradesmen and farmers; to be to-day the companion of cardinals, popes, and kings, and to sleep to-morrow on a heap of stones in the street, in the disguise of a livery servant; to be hidden during eight days, in a burning fever, in the midst of Austrian troops, who were eager to take his life; to fight as a common soldier and a rebel, in the hope of overthrowing a hateful form of despotism; to have his brother die in his arms; to wander about in sickness, hunger, and dejection; to take refuge in common taverns; to tread the soil of France as an outlaw, at the peril of his life; to organize repeated insurrections; to be in prison; to lie in a dungeon; to write treatises on pauperism and the sugar question; to mingle with the haughty nobles of England at a tournament; to be the president of a republic; to take advantage of the opportunity thus afforded him to make himself emperor; to be the ally, on terms of equality, of the strongest government in Europe; and, in conjunction with Great Britain, to subdue the armies of Russia, and to compel her czar to sue humbly for peace in that capital which, forty-two years before, on that selfsame day, he had entered as a conqueror." After the fall of Napoleon I., Queen Hortense went into exile with her two sons, residing in succession at Geneva, at Aix in Savoy, in the duchy of Baden, in Bavaria, and finally repairing to the château of Arenenberg, on the banks of Lake Constance, where she resided until her death. There, Queen Hortense, or duchess of St. Leu, as she was now called, employed herself with the education of her two sons. Louis Napoleon displayed the greatest eagerness for study, and distinguished himself by his ardent pursuit of all knowledge bearing upon military matters. After Louis Philippe ascended the throne, Louis Napoleon and his brother asked to be allowed to return to France, but were refused. The brothers next took part in a revolution in Italy; but, their party being defeated by the papal troops, they became fugitives, the elder dying of fever at Forli, and Louis Napoleon only escaping the Austrians by assuming the disguise of a footman. He reached Cannes in safety, and subsequently reached Paris with his mother, who asked permission to remain there a short time, as her son was ill. The king refusing to accede to this request, Hortense and her son repaired to London. In a short time they returned to Switzerland. Until the year 1836, he occupied himself with military studies, and with composing political and military treatises; but, in the last-named year, considering that he had only to present himself to the French soldiery in order to shake their allegiance towards

Louis Philippe, he went to Strasburg, where, after an absurd attempt at carrying out his project, he was made prisoner, and placed in a dungeon of the garrison. Louis Philippe regarded the affair with contempt, and shipped off the pretender to the United States. He remained but a short time in America; for, hearing that his mother was dangerously ill, he repaired to Arenenberg, in defiance of the French government. The duchess of Saint Leu died two months after his arrival. The French government demanded of Switzerland the extradition of the refugee; and, to prevent a war, Louis Napoleon quitted the country for England in 1837. In London he lived the life of a fashionable lounger, and wrote his "Napoleonic Ideas;" but, in 1840, he resolved to make another attempt at subverting the government of Louis Philippe. A steamer was hired, a number of disaffected Frenchmen were collected, and Louis Napoleon, provided with a tame eagle and a carved and gilded effigy of the same emblem of imperialism, steamed from Margate and landed at Boulogne. He presented himself to the officers, displayed his wooden eagle, and set free the living bird; but the soldiers would not listen to the representative of Napoleonism, the eagle refused to soar aloft and perch upon the top of the Napoleon column. The baffled conspirators next attempted to regain their steamer, Louis himself being captured, after shooting a French soldier who had tried to oppose his retreat. For this absurd affair he was arraigned before the Chamber of Peers, found guilty of high treason, condemned to perpetual imprisonment, and conducted to the castle of Ham, whence he contrived to effect his escape in the disguise of a workman, in 1846. He reached London in safety, and continued to reside there till 1848, at which time the Republic permitted his return to France, with the other members of the Bonaparte family. Subsequently, with Cavaignac and Ledru Rollin, he put himself in nomination for election as president of the republic, and was voted to that office by an overwhelming majority. At the close of the year 1851, he destroyed the last vestige of French liberty, by the celebrated *coup d'état*, and contrived to secure his re-election, not for four, but for ten years. He was now emperor of France in all things but the name, and this latter title was given to him, after an appeal to universal suffrage, in December, 1852. In the following year he married Eugénie, countess de Teba, who bore him a son. He became the ally of England in the struggle against Russia, which terminated with the fall of Sebastopol and the treaty of Paris in 1856. In the same year he paid a visit to Queen Victoria in London. Two attempts against his life were made; the first by Pianori in 1855, and the second by the Count Orsini, Pierri, and others, at the beginning of 1858. Upon this latter occasion, Napoleon III. demanded of the British government that the English laws affecting political exiles should be altered. This attempt at dictation and interference created a strong feeling in England against the French emperor, which was heightened by the insults of several colonels of the French army. The Palmerston administration, by appearing disposed to yield, became highly unpopular, and was compelled to quit office. At the beginning of the year 1859, Napoleon treated the Austrian ambassador with marked coolness, which clearly foreshadowed what was speedily to occur. Francis Joseph declared war against the king of Sardinia and his French ally. The French army crossed the Alps into Italy, and the emperor, leaving the empress as regent during his absence, hastened to put himself at its head. The Austrians lost battle after battle, till at length they were compelled to evacuate Lombardy. Terms of peace were concluded even more suddenly than war had been declared. At Villafranca the two emperors met: Lombardy was given up to France, and by France ceded to Sardinia; Austria remaining in possession of Venetia and the celebrated Quadrilateral. One of the latest acts of this extraordinary man's political life has been to declare himself a partisan of the principles of free trade; whereupon Mr. Cobden was charged by the British government to effect between France and England a treaty of commerce. The treaty itself is an "accomplished fact," but its results lie in the future. It must, however, be productive of good to both nations. Napoleon III. was born at Paris, 1808.

NAPOLEON, Prince. (*See* BONAPARTE, *Napoleon* Joseph Charles.)

NARBAH, *nar'-ba*, a town of Sirhind, India, defended by a fort, and the residence of a rajah, whose territory has a population of 80,000. *Lat.* 30° 20′ *N.* *Lon.* 76° 15′ E.

NARBONNE, *nar-bun'*, a town of France, in the department of the Aude, situate in a hollow between mountains, on two canals, 32 miles from Carcassonne. It has a cathedral, admired for the elegance of its architecture and the boldness of its vaults. Also an ancient archiepiscopal palace, which has the appearance of a fortress. It has a trade in honey, for which it is famed, wine, brandy, oil, and salt. *Pop.* 13,300.—This is the Gallia Narbonensis of the Romans, by whom it was colonized, 121 B.C.

NARBOROUGH, Sir John, *nar'-bur-o*, an English naval commander, who served with distinction in the first Dutch war, and was present at the desperate naval engagement between the English fleet and the Dutch under De Ruyter and Van Tromp, in 1666. Three years afterwards, he went out on a voyage of discovery to the South Seas, and explored the Straits of Magellan. In 1672 he again fought against the Dutch at the battle of Solebay, and was for his bravery knighted, and created rear-admiral. In the following year he compelled the Bey of Tripoli to give up all British captives, and to pay 80,000 dollars for the injuries British shipping had received at the hands of Tripoline pirates. He cannonaded the city of Algiers in 1677, and captured five Algerian frigates. In 1770 he became commissioner of the navy, which post he held during the reigns of Charles II. and James II. B. in Norfolk, early in the 17th century; D. about 1688.

NARCISSUS, *nar-sis'-sus*, a beautiful youth, son of Cephisus and the nymph Liriope, who saw his image reflected in a fountain, and became enamoured of it, thinking it to be the nymph of the place. His fruitless attempts to approach this beautiful object so provoked him, that he grew desperate and killed himself. His blood was changed into a flower, which still bears his name.—A freedman and secretary of Claudius, who abused his trust, and plundered the citizens of Rome to enrich himself. Messalina, the emperor's wife, endeavoured to remove him; but Narcissus sacrificed her to his resentment. Agrippina, who succeeded Messalina, was more successful. Narcissus was banished by her intrigues, and compelled to kill himself, A.D. 54.

NARDI, James, *nar'-de*, an Italian historian, who wrote the history of the republic of Florence, which forms a continuation to the work of Machiavelli. He likewise acted as ambassador from Florence to Venice in 1527. B. at Florence, 1476; D. about the middle of the 16th century.

NARDO, *nar'-do*, a town of Naples, 8 miles from Gallipoli. *Manf.* Cotton goods. *Pop.* 8,000.

NARENTA, *na-rain'-ta*, a river of European Turkey, rising in the Dinaric Alps, and, after a course of 140 miles, falling into the Adriatic.

NARO, *na'-ro*, a town of Sicily, in the Val di Mazzara, on a river of the same name, 12 miles from Girgenti. It stands in a fine country, and has a trade in oil, wine, and sulphur. *Pop.* 11,000.—The RIVER, after a course of 22 miles, enters the Mediterranean, 6 miles from Girgenti.

NARSES, *nar'-sees*, king of Persia, succeeded his father Varennes in 296. He conquered Mesopotamia and Armenia. Maximianus Galerius being sent against him by Diocletian, was repulsed; but afterwards he defeated the Persians, whom he laid under tribute. D. 303.

NARSES, a Persian eunuch, who became one of the greatest generals of his time, commanded the Roman army against the Goths, whom he defeated in battle in 552, their king, Totila, being slain. As exarch of Italy, he administered with wisdom and discretion, and established order throughout the country. D. at Rome, at a very advanced age, 568.

NARVA, *nar'-va*, a town of European Russia, in the government of, and 81 miles from, St. Petersburg, on the Narova, 9 miles from its mouth in the Gulf of Finland. Its houses are built of brick, and stuccoed white. In the suburb called Ivangorod are the remains of an extensive fortress built by the czar Ivan Vassi-

*lievitz*. It has a brisk traffic in corn, timber, and flax, which it exports, and in salt. It has also a salmon-fishery. *Pop.* 4,100.—Near this town, in 1700, Charles XII., at the head of 8,000 Swedes, defeated Peter the Great, with 80,000 Russians. Narva was retaken by the czar five years after.

NARVAEZ, Don Ramon, duke of Valentia, *nar-va-aith'*, a modern Spanish general and statesman. After the return of Ferdinand VII., he entered the army as cadet of the Walloon Guards. In 1822, when the royal party attempted to destroy the constitutional *régime*, he ranged himself upon the liberal side, and, by his gallantry, contributed to suppress the *émeute*. Shortly afterwards, while serving against the guerillas of Catalonia, he was severely wounded; upon which he retired to his native city, and lived in retirement during ten years. In 1836 he attained the grade of brigadier, under Espartero. Charged to pursue the notorious Carlist general Gomez, who had hitherto baffled all attempts at capture, Narvaez came up with him near Arcos, and completely routed him. This was the turning point of his fortunes, and he became one of the most popular men in Spain. He now abandoned the constitutional party, became a royalist, and aspired to a rivalry with Espartero. In 1844 he was nominated president of the council, and was created duke of Valentia. Three years afterwards he lost the royal favour; but, in 1856, he supplanted O'Donnell, and once more became president of the council. His opponents were for a period completely foiled; but the tenure of power in Spain is too intimately dependent upon court intrigue to be either durable or secure: accordingly, one turn of the political wheel brought General O'Donnell to the position from which he himself had already been ousted by Narvaez. At the end of 1859, Narvaez was again out of office, while O'Donnell flourished as prime minister, and commander of the forces sent against Morocco. B. in Andalusia, 1800.

NASEBY, *nais'-be*, a village and parish of Northamptonshire. *Pop.* 900.—Here, in 1645, Charles I. was totally defeated by Oliver Cromwell.

NASH, Richard, *năsh*, commonly known as "Beau Nash." He received his education at Caermarthen, whence he was sent to Jesus College, Oxford, where he remained but a short time. He afterwards obtained

BEAU NASH.

an ensign's commission, but soon quitted the army, and entered of the Temple, but never followed the law as a profession. A love of pleasure and gaming drew him, in 1704, to Bath, which place of amusement became, through his tact and good management, a centre of fashionable resort. He was chosen master of the ceremonies, and was so much esteemed as to be called King of Bath; but commonly he was termed, from the peculiarity and foppery of his dress, Beau Nash. Though much given to gambling, he was very liberal, and numerous instances are recorded of his benevolence; and to his efforts, combined with those of two other gentlemen, the foundation of Bath Hospital is due. B. at Swansea, Glamorganshire, 1674; D. at Bath, 1761.

NASH, John, an eminent English architect, who studied under Sir Robert Taylor, and about 1792 established himself in London. He soon acquired a high position, and was employed to design mansions for the nobility, both in England and Ireland. In 1812 he designed plans for the new Marylebone, afterwards Regent's Park, and for Regent Street. In 1820 he improved the Opera-house, and designed the Haymarket Theatre. As surveyor to the Crown estates, he was engaged during several years in improving the street architecture of the metropolis, chiefly at the west end of the town. The terraces in the Regent's Park, Buckingham Palace (since altered), Carlton-House Terrace, and the improvements in the garden of St. James's Park, were the principal of his subsequent works in London. That whimsical piece of architecture known as the Pavilion, at Brighton, was also from his designs. B. in London, 1752; D. at East-Cowes Castle, 1835.

NASH, a county of N. Carolina, U.S. *Area*, 588 square miles. *Pop.* 12,000.

NASHVILLE, *nash'-vil*, a post township of Tennessee, U.S., on the S. side of Cumberland river, 275 miles from Lexington. It is situate in the midst of a very fertile and populous country, and is the largest and most flourishing town in the state. The steamboats ply between this place and New Orleans. The Cumberland is navigable for vessels of 30 or 40 tons during the greater part of the year, and in the highest floods for vessels of 400 tons. *Pop.* 20,000.

NASIELSK, *na-seelsk'*, a town of Poland, 25 miles from Warsaw. *Pop.* 3,000, mostly Jews.—Here, in 1806, the Russians were defeated by the French.

NASMYTH, Alexander, *nai'-smithe*, a Scotch landscape-painter, who repaired to London at an early age, and became pupil of Allan Ramsay. He subsequently studied at Rome; after which he went to Edinburgh, and established himself there as a portrait-painter. Ultimately, he abandoned portrait for landscape-painting, and produced some of the best works in that class of which the British school can boast. He had, likewise, a considerable share in suggesting the architectural improvements that were made in Edinburgh. His portrait of Robert Burns is stated to be the only authentic likeness of the poet. B. at Edinburgh, 1758; D. at the same place, 1840.

NASMYTH, Patrick, a Scotch landscape-painter, son of the preceding, who repaired to London in his 20th year, and soon became popular enough to gain the title of the English Hobbima. All his pictures were painted with the left hand, he having early in life lost the use of his right through an accident. B. at Edinburgh, 1786; D. in London, 1831.

NASMYTH, James, a practical engineer, and inventor of the steam hammer, steam pile-driver, and other great mechanical contrivances. He was brother of the preceding, and from his earliest youth displayed a love for any kind of mechanical employment. After studying at the High School and university of Edinburgh, where he rendered great assistance to the professors by his skill as a mechanical draughtsman and practical mechanic, he, in 1829, set out for London, where he succeeded in obtaining employment in the engineering firm of Maudsley and Co. He remained there until 1832, at which time he returned to Edinburgh, and during two years worked incessantly in the construction of tools and machinery, with the intention of establishing himself in business. In 1834 he took a floor in an old cotton-mill at Manchester, and soon obtained so many orders for machinery, that his shop became too small for his operations. He then removed to Patricroft, near Manchester, and in a few years, so rapidly had his business increased, was in a position to build the well-known Bridgewater foundry, from which establishment emanated those fine mechanical inventions which have made the name of Nasmyth familiar wherever modern mechanism is required. In 1856 he retired from business, having resolved to devote his

remaining years to artistic and scientific pursuits. B. at Edinburgh, 1808.

NASSAU, *năs'-saw* (Ger. *nas'-sou*), Duchy of, formerly comprised several principalities in the German empire, all of which are now united under one head, and form an independent duchy in the Germanic confederation. Its boundaries are the Prussian territory on the Lower Rhine, and the different states of the princes of Hesse. *Area*, 1,760 square miles. *Desc.* Hilly throughout, with considerable elevations in some places, affording excellent pasturage. *Rivers.* The Rhine to the W., the Maine to the S., and the Lahn in the interior. In this duchy are found some of the principal watering-places in Germany; namely, Ems, Schlangenbad, Wiesbaden, Lower Selters, Upper Lahnstein, and other places. *Pro.* The culture of the vine and the rearing of cattle form the chief employments. *Minerals.* Iron, copper, silver, and lead. *Pop.* 430,000. *Lat.* between 49° 56′ and 50° 48′ N. *Lon.* between 7° 30′ and 8° 30′ E. The Nassau family, after long being counts, were made princes of the empire in 1688 and 1737. In 1806 they were declared dukes, which, in Germany, is a distinct, and in general, a higher title. The duchy is now a member of the Zollverein, with an armed force of between 6,000 and 7,000.

NASSAU, a town of Germany, and capital of the duchy of Nassau, on the Lahn, 25 miles from Wiesbaden. *Pop.* 1,500.

NASSAU, or POGGY ISLANDS, a chain of islands which lie off the whole length of the west coast of Sumatra, at the distance of about 80 miles. The N. extremity of the most N. island, which is called the Northern Poggy, is situate in *lat.* 2° 18′ S.; and the S. extremity of the most S. island in *lat.* 3° 16′ S. They are separated from each other by a narrow strait. On the S. island are several villages, and also on the N. *Pop.* Unascertained.

NASSAU, a river of East Florida, which runs into the sea, *lat.* 30° 44′ N.

NASSAU, the capital of the island of New Providence, one of the Bahamas. *Pop.* 7,000. *Lat.* 25° 5′ 6″ N. *Lon.* 77° 21′ W.—It was taken by the Spaniards in 1782, but restored to the English in 1783.

NASSAU, a post township of Rensselaer county, New York, U.S., 15 miles from Albany. *Pop.* 3,000.

NASSAU, Adolphus of. (*See* ADOLPHUS, Emperor.)

NASSAU, Maurice of. (*See* MAURICE of Nassau.)

NASSAU, William of. (*See* ORANGE, William of.)

NASSAU, William of. (*See* WILLIAM III. of England.)

NASSICK, *nas-sik'*, a large town and place of pilgrimage in British India, in the district of Ahmednuggur, 95 miles from Bombay. *Pop.* 25,000.

NASTATTEN, *na-stat'-ten*, a town of W. Germany, in the duchy of Nassau, 20 miles from Wiesbaden. It has numerous mineral springs. *Pop.* 3,000.

NATAL, *nă-tăl'*, a colonial possession of Great Britain, on the S.E. coast of Africa. *Area*, 18,000 square miles. *Desc.* Hilly, well watered, and covered with long grass. The soil is, in general, fertile, and, along the coast, mangroves grow, whilst in the interior the timber rises in clumps. *Pro.* Cotton, sugar, coffee, wheat, beans, oats, and tobacco. Indigo grows wild. *Minerals.* Coal, iron ore, and building-stone. *Pop.* Unascertained. *Lat.* between 27° 40′ and 30° 40′ S. *Lon.* between 29°. and 31° 10′ E.—This territory forms a dependency of the Cape of Good Hope, and is administered by a lieutenant-governor and a board of officers.

NATAL, a town of Brazil, S. America, capital of the province Rio Grande del Norte, near the mouth of the Grande, or Porengi, in the Atlantic. It was formerly an important military post, and has several churches, a governor's residence, and a harbour. *Pop.* 10,000. *Lat.* 5° 45′ S. *Lon.* 35° 15′ W.

NATAL, or NATAR, a Malay settlement on the S.W. coast of Sumatra. It has an export trade in camphor and gold-dust. *Lat.* 32° N. *Lon.* 98° 57′ E.

NATCHEZ, *năch'-ez*, a city and port of entry of Mississippi, U.S., on the E. bank of the Mississippi, 80 miles from Jackson. The greater part of the town stands upwards of 150 feet above the surface of the river, and is regularly laid out on very uneven ground, the streets intersecting each other at right angles. It contains a court-house, gaol, market-house, bank, an academy, and several churches. It has an extensive export trade, and is in constant communication with the various towns on the Mississippi and its tributaries. *Pop.* 6,000.

NATCHITOCHES, *năch'-i-toch'-es*, or *năk'-e-tosh*, the capital of Natchitoches county, Louisiana, on the Red River, about 200 miles above its junction with the Mississippi. *Pop.* 3,000.—The COUNTY has an area of 2,257 square miles, and a population of 15,000.

NATHAN, *nā'-than*, a prophet who lived in the reign of David. At the Divine command, he reproached that monarch for his guilt in the murder of Uriah and adultery with Bathsheba, and predicted that the glory of erecting the temple would be reserved for Solomon. On that occasion he brought the monarch to repentance, by relating the beautiful parable of the poor man's lamb.

NATHAN, Isaac, or Mordecai, a rabbi, was the first who compiled a Hebrew Concordance, which he began in 1438 and finished in 1448. It was printed at Venice in 1523, and afterwards at Basle in 1632.

NATHPORE, *nath-por'*, a town of British India, in the presidency of Bengal, on the right bank of the Kosee. *Pop.* 8,000. *Lat.* 26° 18′ N. *Lon.* 87° 10′ E.

NATOLIA, or ANATOLIA, *na-to'-le-a*, a division of Asia Minor, comprehending most of its western districts. Under its name is generally understood the whole of Asia Minor. *Lat.* between 36° and 42° N. *Lon.* between 26° and 35° E.

NATRON LAKES. (*See* EGYPT.)

NAU CAPE, *na'-ou*, a promontory of S. Italy, 6 miles from Cotrone. From this place Hannibal is said to have embarked when leaving Italy, 202 B C.

NAUDÉ, or NAUDÆUS, Gabriel, *no'-dai*, a learned French writer. After studying at Paris, he went to Padua, where he took his degrees in physic. He next became librarian to Cardinal de' Bagni at Rome, and, on his death, was patronized by Cardinal Barberini. On being recalled to France in 1642, he was made librarian to Cardinal Mazarin, who conferred on him several benefices. Christina, queen of Sweden, invited him to her court, but he soon returned. His principal works are, "An Apology for Great Men who have been accused of Magic," "Advice for Forming a Library," "Addition to the Life of Louis XI.," "Bibliographia Politica," and a commentary upon the Rosicrucians. B. at Paris, 1600; D. at Abbeville, 1653.

NAUMBURG, *noum'-boorg*, a town of Prussian Saxony, in the government of Merseburg, on the Saale, 28 miles from Leipsic. It is divided into three parts,—the Town proper, the Liberties, and the Suburb. The Town is surrounded with walls, and contains a royal mansion, several churches, an orphan-house, hospital, and schools. The part called the Liberties contains the cathedral, a fine Gothic building, erected in 1027, the chapter school, the residences of the canons, and a number of private houses. *Manf.* Stockings, gloves, caps; also soap, starch, and gunpowder: leather is also tanned. *Pop.* 14,000.—Here, in memory of the conclusion of the Hussite siege in 1432, an annual festival is held. It is a station on the Thuringian railway.—The name of several other towns in Germany.

NAUPLIA, or NAPOLI-DI-ROMANIA, *naw'-ple-a*, *na'-pole de ro-ma-ne'-a*, a fortified seaport-town of Greece, in the Morea, 5 miles from Argos. It is strongly fortified. *Pop.* Estimated at 10,000.

NAUPLIA, GULF OF, an inlet of the Ægean Sea, Greece, between the two arms of the Morea. It contains several small islands, and receives the Keria river, on which Argos is situate. *Ext.* 30 miles long, with a breadth of 20.

NAUPLIUS, *naw'-pli-us*, according to Grecian mythology, a son of Neptune and Amymone, king of Eubœa. He was father to Palamedes, who was sacrificed to the resentment of Ulysses by the Greeks, during the Trojan war. The death of Palamedes irritated Nauplius. When the Greeks returned from the Trojan war, Nauplius saw them distressed in a storm on the coasts of Eubœa, and to make their disaster still more complete, he lighted fires on such places as were surrounded with the most dangerous rocks, that the fleet might be shipwrecked on the coast. This succeeded; but when he saw Ulysses and Diomedes escape, he threw himself into the sea.

NAUSICAA, *naw-sik'-ā-ā*, a daughter of Alcinous, king of the Phæaceans, who, according to Homer, met

*Ulysses* shipwrecked on her father's coasts; and it was to her humanity that he owed the kind reception he received from the king.

NAUVOO, *naw-voo'*, formerly a city of the Mormons, but now occupied by a colony of French communists. It stands on the E. bank of the Mississippi, 125 miles from Springfield. *Pop.* Unascertained.

NAVAN, *năv'-ăn*, a town of Ireland, in the county of Meath, on the Boyne, 26 miles from Dublin. It consists of two streets, which intersect each other at right angles, and is a place of considerable trade. *Manf.* Sacking. *Pop.* 6,500.—It is connected with Dublin and Drogheda by railway.

NAVARETE, Ferdinand, *na-va-rai'-tai*, a learned Spanish friar, who went as missionary to the Philippine Islands in 1647. He afterwards set out for China, where he laboured during many years, but was at last imprisoned by the Chinese authorities. He contrived, however, to effect his escape to Macao, after which he returned to Europe. He was employed to preach against the Jesuits before the pope. His "History of the Moral and Political Condition of China" was published at Madrid, at the end of the 17th century; but the latter volumes of the work were suppressed by the Inquisition. The first volume has since become a scarce book.

NAVARETE, John, a celebrated Spanish painter, surnamed the Titian of Spain. In 1568 he was appointed painter to the king; but having introduced a cat and a dog into some of his religious pictures, Philip caused him to enter into a contract never to employ such accessories again. He was both deaf and dumb. B. at Logono, Castile, 1524; D. at Madrid, 1577.

NAVARIN, or NAVARINO, *na-va-re'-no*, a town of European Turkey, in the Morea, on a bay of the Mediterranean, 6 miles from Modon. It stands near the site of Old Navarin, the Pylos of antiquity, and has a large harbour, sheltered by the island of Sphagia, famous in antiquity for the defeat of the Spartans by the Athenian navy. *Pop.* 2,000.—Here, in 1827, the combined fleets of England, France, and Russia defeated those of the Turks and Egyptians.

NAVARRA. (*See* NAVARRE.)

NAVARRE, *na-var'*, a province of Spain, bounded N.E. by France, and S.W. by Old Castile. *Area*, 2,470 square miles. *Desc.* This province is divided from France by the western part of the Pyrenees, the heights of which are in general rugged and bare, but their base is covered with wood, and affords excellent pasturage. *Rivers.* The Ebro and the Bidassoa. *Pro.* Grain and wine; but not in sufficient quantities for native consumption. Game, cattle, and sheep are numerous; and hemp, flax, fruit, pulse, and a little oil are produced. *Minerals.* Iron abounds at Vedrin and Lugarchuelo; at Pampeluna is a copper-mine; in the neighbourhood of Valtierra is a mine of rock-salt, between strata of gypsum. *Manf.* Unimportant. *Pop.* about 300,000.—This was a small kingdom before Henry d'Albret, afterwards King Henry IV., ascended the throne of France, and from this place the kings of France took the title of king of Navarre. It retained its ancient boundaries in the new division of the country in 1833, and still has some peculiar privileges.

NAVARRE, Peter of, a famous Spanish soldier-seaman in the 16th century, was a Biscayan of low extraction. He commenced his career as a sailor, after which he became a menial servant in the family of the cardinal of Aragon. He next took service among the Florentine troops; but subsequently returned on board ship, where he displayed great skill and courage. The reputation he acquired recommended him to Gonsalvo de Cordova, who was employed in the war of Naples. To he taking of that city Navarre principally contributed, by the construction of a mine. The emperor recompensed him for this service by creating him count of Alvito, in that kingdom, and henceforth he styled himself Count Pedro de Navarre. Being appointed to the command of a naval expedition against the Moors, he took Oran, Tripoli, and other places. On his return to Italy, he served in the army, and was taken prisoner by the French at the battle of Ravenna, in 1512. After remaining in France two years, in hopes of being ransomed, he entered into the French service, and signalized himself on several occasions; but being sent to the succour of Genoa, in 1522, he was taken prisoner by the Imperialists, and conducted to Naples, where he was confined in the castle of *L'Œuf*. After the treaty of Madrid, he regained his liberty, and, in 1528, served under Lautrec at the siege of Naples; but, in the unfortunate retreat of that general at Aversa, he was again captured, and sent a second time to L'Œuf. The prince of Orange, by command of the emperor, having ordered a number of prisoners to be beheaded, barbarously included Navarre with the rest; but the governor, as is asserted by some, possessing more humanity, passed him over, and he died there soon after; others pretend that he was strangled in that citadel.

NAVIGATOR'S ISLANDS, *năv'-i-gai-tors*, a cluster of lofty islands in the South Pacific Ocean. They are of coral formation, and are both fertile and populous. *Lat.* 14° S. *Lon.* 170° W.

NAXOS, or NAXIA, *năx'-os*, an island of the Grecian archipelago, and the largest of the Cyclades. *Ext.* 20 miles long and 15 broad. *Desc.* Fertile, and producing fruits, wine, olive-oil, and cheese. *Pop.* 14,000. *Lat.* 37° N. *Lon.* 26° 31′ E.—This island was taken by the Turks in the 13th century, and now forms a government of the kingdom of Greece.

NAZARETH, *năz'-a-reth*, a village of Palestine, 50 miles from Jerusalem. It stands in a valley of the same name, celebrated as the residence of our Saviour and his family during the first thirty years of his life. It occupies part of a declivity, and has a Latin convent, with a church said to be built on the site where took place the annunciation of the advent of Christ. *Pop.* 3,000, of whom a sixth are Turks.

NAZE, THE, *naiz*, a cape forming the S. extremity of Norway, in the North Sea. *Lat.* 57° 57′ N. *Lon.* 7° 2′ E.

NEAGH, LOUGH, *lok na*, a lake of Ireland, on the border of the county of Antrim. *Area*, 153 square miles. It has several islands, and receives several rivers.

NEAL, Daniel, *neele*, an English non conformist divine. After receiving his education at Merchant Taylors' school, he went to Utrecht and Leyden. In 1706 he was chosen pastor of an Independent congregation in Aldersgate Street, and afterwards in Jewin Street. He wrote, "A History of New England," "A History of the Puritans," and some Sermons. His "History of the Puritans" is a faithful and esteemed work, and has been laid under contribution by almost every historian of the civil war and commonwealth. B. in London, 1678; D. at Bath, 1743.

NEANDER, Christopher Frederick, *nai-an'-dair*, a German sacred poet. After completing his studies at the university of Halle, he acted, for a short time, as tutor in a family, but was, in 1750, appointed pastor of a small country congregation; whence he removed to a more lucrative charge at Gränzhof. In 1784 he was appointed clerical superintendent of the duchies of Courland and Semgallen; but continued to reside at Gränzhof, where he supported a widowed sister and her family. His songs are esteemed as among the best specimens of devotional poetry in the German language. B. at Ekau, Courland, 1724; D. 1802.

NEANDER, John Augustus William, an eminent German historian, who was born of Jewish parents, but, while pursuing his studies at the Johanneum College at Hamburg, became a convert to the Christian faith, and assumed the name of Neander, signifying, in Greek, "a new man." He subsequently studied at the universities of Halle, Göttingen, and Heidelberg. His great attainments led to his being appointed professor of theology at the last-named establishment, and in 1812 he was chosen to fill the chair of theology at the university of Berlin, where he remained until his death. In the same year he published "The Emperor Julian and his Times," which established his reputation as a theological historian. His greatest work, entitled "Universal History of the Christian Religion and Church," was given to the world between the years 1825—1845, and was comprised in five volumes. In 1835 he produced a refutation of Straus's "Life of Jesus," in a work entitled "The Life of Jesus in its Historical Relations." Both the works above mentioned, as well as some smaller ones, were translated into English, and published in Bohn's Ecclesiastical Library. B. at Göttingen, 1789; D. 1850.

NEARCHUS, *ne-ar'-kus*, one of the captains of Alexander the Great, who ordered him to lead the fleet he had built upon the Hydaspes to the Persian Gulf. Nearchus wrote an account of this voyage, the original of which is lost; but Arrian, Strabo, and Pliny have preserved a great portion of it: Arrian's extract is, however, the fullest and most correct. Subsequently to the death of Alexander, Nearchus became governor of Lycia and Pamphylia. Flourished in the 4th century B.C.

NEATH, *neeth*, a market and borough town of S. Wales, in Glamorganshire, on the Neath, 7 miles from Swansea. The principal public buildings are the town-hall and the church. Its trade consists in the exportation of coals. In the neighbourhood are iron-forges, extensive tin-works, and smelting-works for copper. *Pop.* of parish, 6,000.—The RIVER NEATH, after a course of 20 miles, enters the Bristol Channel about 3 miles from Neath.

NEBRASKA, *ne-brăs'-ka*, an unappropriated territory of the United States, bounded on the N. by British America, on the S. by the TEXAS, on the E. by Missouri river, and on the W. by the Rocky Mountains. *Area*, 137,000 square miles. *Pop.* Indians.

NEBUCHADNEZZAR I., or NABUCHADONOSOR, *neb-u-kad-nez'-zar*, king of Nineveh and Babylon. He sent against Judæa, Holophernes, who was slain by Judith. He himself is supposed to have been killed while defending Nineveh against Cyaxares.

NEBUCHADNEZZAR II., king of Babylon and Nineveh, ascended the throne 605 B.C. He invaded Judæa, took Jerusalem, and carried the treasures of the temple and a number of captives to Babylon. After this he set up a golden statue in the plain of Dura, which he commanded all his subjects to worship, on pain of being cast into a fiery furnace. Three young Jews, named Shadrac, Meshac, and Abednego, refused to submit to this idolatry, and the sentence was executed upon them; but they were miraculously preserved amidst the flames. Nebuchadnezzar, having lost his reason, became an outcast from the society of men, and lived among wild beasts in the forest; but, on his recovery, he again ascended the throne, and died B.C. 562.

NECHO, *ne'-ko*, a king of Egypt, called in Scripture Pharaoh-Necho, succeeded his father Psammeticus, 617 B.C. He planned a canal from the Nile to the Arabian Gulf, which undertaking he was forced to abandon, after losing a great number of men. The ships of Necho sailed from the Red Sea round the coast of Africa into the Mediterranean, and returned to Egypt, after a voyage of three years. This monarch invaded Assyria, and, on his march, was attacked by Josiah, king of Judah, who was slain in the battle. Necho was in turn defeated by Nebuchadnezzar, and obliged to return to his own country, where he died 601 B.C.

NECKAR, *nek'-ar*, a river of the S.W. of Germany, rising in the mountains of Schwarzwald, and, after a course of 210 miles, joining the Rhine at Mauheim.
